NOTICE.

In the Calendar for this year the Table for regulating a Time piece has been extended so as to suit Galle and Jaffna, and Colpetty and Mutwal as well as the Fort of Colombo. Colombo is however to be considered as the standard so that when it is said in the Galle or Jaffna column "add one minute" &c. the meaning is that this addition is to be made to the time as given at Colombo. The hours are marked in Roman characters thus VI, V, &c. the minutes in common numerals beneath 59, 58. &c.—These tables give the mean Solar time (the equation of time having been already applied to the moment of the Sun's visible contact with the horizon) that is, the time by which all common clocks and watches are regulated.

In the Moon column the time is given when she is in mid-heaven at Colombo by which that of rising and setting can always be found near enough for any practical purpose viz. by subtracting or adding between five and six hours, more or less, according as the horizon of the observer is more or less level or mountainous.

The longitude of Madras new Light House is encreased by a small quantity from that given in former Calendars in consequence of information transmitted by Major Skinner.

To assist the construction of native Calendars for next year the principal memoranda of 1850 are given.

Both Eclipses of the Moon are partial. The first is of March 9th of which the beginning only is visible here viz. at 3h. 31m. 8s. A. M. daylight having arrived even before the middle of it which is at 6h. 14m. 6s.

The second Eclipse of the Moon occurs on the 2d and 2d September and is visible throughout.

COLOMBO TIME.

Ceylon being so far towards the East or Sun-rising, it is already mid-day here when it is morning in England. The day here is farther advanced than at Greenwich 5 hours 19 minutes and 33 seconds, which must therefore be added to the time in England to give the time here.

TRINCOMALIE—Fine weather throughout, wind more moderate and veers round to E. N. E and East with morning land wind. Towards the end of the month the weather becomes warm. Therm: Max. 86 Min. 72 Mean. 81.

WARIATIONS OF TEMPERATURE CORRESPONDING TO ALTITUDE.

As we ascend, the air becomes thin or rare, and as it becomes rare it also grows cold. No fact is better established than this, though, the rate of this cooling of the air as we ascend in it does not appear to be uniform, but to vary in different countries and even in the same country at different seasons. Were we to go by local data we might calculate it thus. The mean annual temperature of Colombo is probably about 80° 5; that of Kandy is about 74° 5; and that of Nuwera-Ellia at an elevation of 6210 ft: is about 50°; giving a fall of one degree for every 280 ft; in the former case, and for every 295° in the latter results which accord very well with observations made elsewhere, and particularly with those which may be deduced from the other sanataria of India.

ELEVATION above the Level of the Sea of the following Stations in the Island of Ceylon, determined from simultaneous Observations with the Mountain Larometer.

PORT OF COLOMBO.

The Port of Colombo exterds from that of Caltura on the one hand to that of Negombo on the other, but it is only to the outer and the inner harbour at Colombo itself that shipping resort at present. The harbours are separated by a bar formed by the River Calmy which lies across the Bay and has only about 12 leet of water over it.

The ower harbour is a sate anchorage at all seasons. But from the middle of May till the middle of July when the S.W. monson is most violent and again from the first December till the end of January when the long shore wind prevails transport of goods between the shirping and the shore is sometimes liable to be interrupted for several days at a time. The most suit ble season for delivering and taking in cargo is from the first of February till the end of April, which is happily also the season when the greatest quantity of Coffee arrives from the interior. The inner harbour is chirfly the resort of native craft and small country brigs, the former from October till April only, the latter all the year. It is sate all the year round although during the long shore-wind care must be taken to prevent getting foul or ashore.

THE HARBOUR OF TRINCOMALIE.

TRINCOMALIE, situated on the east side of the Island of Ceylon, contains a most spacious sa'e harbour, with its small bays and coves is perhaps superior to any in India. Every part of the harbour is land-locked, the and orage good for any number of Ships and of any burthen.

Back Bay from the 1st of April to the 25th October is also an excellent anchorage with from 10 to 5 lathoms wa er good holding ground, sea quite smooth, so that the smallest hoats may land. Fort Frederick forms the S. E. point of the bay, the Flag-staff there is in latitude 8° 35′ 38′ N. and long, 81° 14′ 52″ E., a good light which can be seen 15 miles off is exhibited at the Flag-staff every night soon after sun set, it is 206 feet above the level of the soa, and serves to guide Ships by night clear of the rocks off Pigeon Island to the north and the shoals off Foul Point to the S. E. as well as to lead them to an anchorage in Back Bay. Pilots for the inner harbour are necessary, as there are dangerous shouls outside and inside; but Back Bay is quite safe. Vessels may lie within 1-3d of a mile from the Custom House in 5 fathoms water. The Custom House is opened for business on the 1st of April and continues until the 25th October when all is changed to the Custom House in the Inner harbour.

A New Light was exhibited at Flag-staff Point Trincomalie on the night of the 1st of October 1845 and is continued every night from sen-

set until day light.

The Lantern having a fixed light with two powerful reflectors, when hoisted, is 216 feet above the level of the sea. The Light can be seen 15 miles off from any hearing between Pigcon Island and Foul Point comprehending an angle of 140 degrees.

The following temarks are published for general information:-.. 8º 35' 38" N Latitude of the Light Longitude from Madras Flag-staff.. .. 0 58 22 E 81 Longitude from Greenwich. . . . 14 52 .. .

Ships coming from the S. E. with a fair wind at night and having made the Light should on no account in passing Foul Point bring the Light to bear to the northward of W. N. W., that bearing will take a Ship more than half a mile to the northward of the reef and in not less than 14 fathoms water. If it is intended to anchor in Back Bay (which Ships may safely do between the middle of March and 25th October) and having brought the Light to bear W. N. W. they may steer directly for it rounding Plag-staff point close (the point being steep too) and anchor in 10 farhoms water with the Light bearing about S. b. E., small Vessels may anchor in 6 or 7 fathoms water with the Light bearing S. E. b. E.

From the Light the outside visible Rock off Pigeon Island distant about 9 miles is in a direct line with Elizabeth point bearing N. 156 W. Ships coming from the northward and wishing to anchor in Back Bay should be cautions not to bring the Light to bear to the ea tward of courts, that beating will lead 2 niles to the easward of Pigeon Island and nearly a mile to the eastward of the Lively Rocks. These Rocks lie half a mile to the eastward of Elizal oth point having a fathous water close too. When quie sure of being to the southward of the

Lively Rocks Ships may bring the Light to bear S, by E, and anchor in Back Bay as before directed.

After the 25th October the unchorage in Back Bay is not safe until the middle of March as there is frequently towards the end of October beiere the A. E. mon-oon sets in a heavy swell with variable winds. Ships should not attempt the Inner Harbour during the night except under most tavorable circumstances, such as good moon light and having a person on board possessing local knowledge of the Harbour and the entrance to it. In such a case and being abreast of Flag-stoff point the Light kept N. N. W. J. W. will lead clear of Chapel Rocks. The extreme Rock which is under water bears from the Light S. 18° E. distant 2 miles.

Joseph Higgs, Master Attendant.

The Society is supported by voluntary monthly contributions and occasional donations. Its design is to relieve by pension or otherwise cases, which upon the personal investigation, are considered deserving of charity. Strangers in distress have also received its aid, many of them having had the means afforded them to return to their native country. The circumstances of the society, continuing prosperous enable it to meet all claims within the sphere of its operations. The society has now on its list 18 fixed and 2 provisional pensioners. A revision of the pensioners is made half-yearly to ascertain the circumstance of each individual.

Sick paupers are admitted and treated in the society's hospital, a commodious and ventilned building, with separate wards for the accommodation of patients of different sexes, according to the character of their diseases. The patients are regularly attended by the resident medical attendant, and have also the benefit of the advice of the consultant ing surgeon. They are dieted under the immediate supervision of one of the members of the hospital sub-committee clothed at the expense of the society and allowed every comfort they may require. Medicine is also afforded gratuitously in particular cases, to out-door patients. The number of patients treated in the hospital during the year ending 31st March 1848 amounted to 62 of these 48 were discharged 9 died and 5 removed.

The Committee in 1846 established at Trincomalie a General Dispensary under the auspices of the Friend in-Need Society, on the same principle as that of the Columbo General Dispensary, and receive a re-

gular supply of medicines from England for its purposes.

The Committee meet for the transaction of business at the Reading Room on the first Monday of every month at 6-30 P. N.

This Society is supported by monthly sub-criptions and donations. All conserving objects in Kandy and its vicinity are rejected by the visitors—Medical rejief and food are afforded gratuitously in a Ho-pital belonging to the Society—into which sick laborers from Estates are also admitted.

In consequence of the rapid increase of the Malabar population in the Central Province the demands on the Society for Medical relief have latterly for exceeded the means at their disposal and increased sub-criptions are greatly required.

PARENT SOCIETY

PROPAGATION OF THE GOSPEL IN FOREIGN PARTS

INCORPORATED BY THE ROYAL CHARTER A. D. 1701.

The Society for the Propagation of the Gospel in Foreign parts was incorporated by Royal Charter, in the reign of King William III, A. D. 1701, for receiving, managing and disposing of such funds as might be contributed for the religious instruction of His Majesty's Christian subjects beyond the seas, for maintaining Clergymen in the British Colonies, Plantations and Factories, and for the general propagation of the Gospel. It has been engaged in its appointed sphere of duty for upwards of 141 years; and during a whole century, it was the only Missionary Society in connexion with the Church of England. In regard to its constitution, it is under the immediate controul of the Bishops of the United Church and is uniformly conducted or Church principles.

The Society has at present in its employment, dissionaries in the four grand divisions of the British Empire, viz., North America, West Indies, East India and Australia, and the whole number on its List amounts to 302, besides 230 Catechists and Schoolmasters; independently of all which its lunds are made available for supporting Colleges and building Churches and Schools. It was in 1818 that the Society extended its operations to the East. Here it has more than 32 Missienaries in its service. It has moreover established a C fleue at Calcutta, called Bistion's College, for the education of an indigenous Clergy, and the diffusion of sound and useful knowledge; and Gronimar Schools at Madras for the instruction of the middle and lower classes.

The Jaffna Boarding Institution is intended for the benefit not only of the youths of Jaffna, but also of the children of parents residing in

other parts of the Island.

The course of study adopted in the day and Boarding Schools includes, in addition to the ordinary branches of a plain education Ancient and Modern History, Algebra, Geometry, Mensuration, Natural Philosophy, and the Elements of Mental and Moral Science.

THE BAPTIST MISSIONARY SOCIETY.

(Commenced its operations in Ceylon in the year 1812.)

The three principal Stations are Colombo, Kandy and Matera. Connected with these are 16 Sub-stations and 143 Villages which are visited by the European and Native Missionaries. In the three Chief Stations there are services in the English Language, and at Colombe there is an English School. On some of the Coffee Estates around Kandy the coolies are preached to in the Tamil language, and in the Chapel at Matellethere is a weekly service in Portuguese. All other the operations of the Mission are in Singhaless. At the Mission Printing Office in Kandy about 40,000 Singhalese Tracts and School Books are printed every year. In the earlier part of this year there were 49 Schools connected with the Mission, containing 1,288 Children, but some reduction has recently been made in consequence of the depressed state of the Society's Funds. There is at Colombo a Native Female Bourding School in which 12 Girls are educated in English and Singhalese. This Mission is entirely dependent on the voluntary contributions of friends here and in England for Sopport. The total expenditure for 1847 was £2,171 1 62. This year it will be considerably less. The amount collected in the Island is about one-sixth of the sum expended. The Parent Society supplies the remainder. The following is a list of the Stations, and Sub-stations with the Agents residing at each
