CUSTOMS MONTHLY RETURNS

Explanatory Notes

1. Corrections.—Errors brought to the notice of the department after the Returns are published are corrected in the following month's publication. The cumulative totals given must not therefore be understood as necessarily representing the sum total of the figures for the particular month to which the Returns relate and of the cumulative totals published in the preceding month.

2. Period covered by Returns.—The Statistics published show the trade of the Island and are compiled from the entries and declarations presented at the Customs for the month and for the period of the year up to the end of the month.

3. The classification of imports and exports based on the United Kingdom Board of Trade Classification adopted on the suggestions of the Imperial Statistical Conference of 1919 has from January, 1955, been replaced by one modelled on the Standard International Trade Classification of the United Nations. In these Returns "merchandise" includes goods imported and exported on public account, *i.e.*, Government, Municipalities, &c., as well as on account of enterprises and persons but excludes—

(*a*) personal and household effects and parcels for personal use exempted from Customs duty ;

(*b*) goods imported or exported by or on behalf of the Diplomatic Service ;

(*c*) goods imported or exported on account of the Naval, Military and Air Forces of the United Kingdom.

4. Quantities and Values—The figures represent the quantities and values entered by importers and exporters and subsequently checked by Customs Officials. From June 1, 1948, the values declared by them are c.i.f. values for imports and f.o.b. values for exports.

5. Countries—Imports are classified according to the countries of origin, " country of origin " being treated—

(*a*) In the case of primary products as the country in which the goods were grown or produced ; and

(*b*) In the case of manufactured articles as the country in which the manufacturing process was substantially completed.

Exports are classified according to the country of final destination whenever the information is available. In respect of goods consigned on optional bills of lading the country of the first optional port of call is entered and subsequently altered whenever the final destination is later notified.

6. Postal Imports are now classified according to Commodities under the respective headings and are included in the General Import figures.

7. Government Stores.—These are included in the general import figures and are also shown separately in the December Returns.

8. Index to Commodities.—In the alphabetical index to commodities at the end of this volume, the page numbers are not given as such numbers are superfluous in view of the serial code numbers given in the classification and quoted against each item in the index. The letter " E " is added to the Code number in the index for items which appear in the export classification (domestic) and the letters " RE " in respect of items which appear as re-exports. Items which appear only as exports, whether domestic or re-exports, are indicated by an asterisk.

9. The format of the publication has been revised in January 1957, the chief features of the revision being the—

(*a*) deletion of several items which appeared unimportant in relation to the present trade of the Island ;

(*b*) separation of domestic exports and re-exports into two different sections ;

(*c*) provision of statistics of imported quantities and values only in respect of import items except for tabacco, liquor, petroleum products and fuel oils for which ex-bond quantities are also furnished;

(*d*) separation of Ships' Stores and Bunkers from General Export Statistics into a separate group under No. 9 31-2 both under domestic exports and re-exports ;

(*e*) elaboration of the summary of trade into principal countries by the inclusion of countries with which the Island has entered into trade agreement.

M. L. D. CASPERSZ,
Principal Collector of Customs.
