Health Officer's Report for the Month of May, 1899.

SIR,—I HAVE the honour to forward my report for the month of May.

Scavenging.—The scavenging of the town was satisfactorily performed, as far as I have been able to judge. The Inspectors in their reports have made no complaints under this head.

Water Supply.—The water supply has been ample and good (*vide* report of analysis appended).

Food Supply.—The food provided in the markets and town was of good quality. The supply of beef, mutton, &c., has been larger than in the previous months. During the month 483 cattle, 83 buffaloes, 296 goats, and 104 sheep were slaughtered, as against 349 cattle, 31 buffaloes, 62 goats, and 153 sheep for the same period in 1898.

I had occasion to reject 20 head of cattle and 5 buffaloes during the month for want of condition. Those passed by me and slaughtered were healthy and in fair condition.

The beef and mutton exposed for sale in the market was good and fit for human consumption.

Drainage.—The drains, though in the same defective condition as regards their structure, were, I am glad to say, in a good sanitary state, owing to the frequent and heavy showers which fell during the month.

Alleys.—These are in the same insanitary condition as when last reported, and will continue so, despite our efforts to keep them clean and sweet, until replaced by a better class of buildings.

Bakeries.—In good condition and well kept.

Latrines.—Well kept. More accommodation is wanted for each latrine for the storage of dry-earth.

Public Markets.—The vegetable stalls are still in the same unsatisfactory condition as when I first reported upon them. The market has been recently painted, and I notice that it is being fitted up for electric lighting. I hope that before it is lighted the vegetable stalls will receive the attention they require.

Exposing Shed and Slaughter House.—In good order and well kept.

Laundries.—In good condition, with the exception of those at Katukele.

Dry Fish Boutiques.—Well kept. The articles sold in these boutiques were in good condition and fit for food.

Cooly Lines.—The permanent cooly lines situated in the town are in a good sanitary condition. The temporary ones, such as those in the Railway Approach road and Deyannewella, should be replaced by permanent structures, as it is quite impossible to keep them in a satisfactory sanitary condition in their present state.

General Health.—The health of the town was satisfactory, and no disease of any consequence prevailed, with the exception of a few cases of measles and mumps. I may mention under this head that hoof disease and a form of diarrhoea prevailed among cattle, but not to any extent.

In conclusion, I may add that I had occasion to effect an exchange of duties during the month between Messrs. Inspector Toussaint and Ferdinands. I find that it has answered well.
