*Australia—Torres Strait, Inner Route—Alteration of
“Course recommended.”*

The Port Master, Brisbane, has given notice (No. 10 of 1899) that the new survey of the inner route by H.M.S. Dart being now completed as far south as Aye (1) reef, it is found that the safest course to be followed to clear the north and south Khandalla shoals lies to the westward of Heath reef; and in order to facilitate navigation on the course now recommended, the Claremont island lightship will, on November 1, 1899, be removed to a position south 85 degrees west, distant 8 cables from the western extreme of Heath reef.

After that date the “course recommended” from Fife island will be as follows:—

When Fife island tree bears north 85 degrees east, distant 6½ cables, steer north 19 degrees west for a distance of 11¼ miles, passing to the eastward of the lightship at a distance of about 2 cables. When the west extreme of Heath reef bears north 85 degrees east, the course is again changed to north 8 degrees west. Continue this course 8.6 miles, when it will intersect the “course recommended” before laid down.
