## PROTEST BY DR. ANTHONISZ.

I have to enter a protest against the motion passed on Saturday, the 25th instant, by the Municipal Council regarding the construction of the China Garden drain on an altered plan, the effect of which will be to divert the surface sewage of two latrines (the police and a public one), the cattle pound, the drainage of two cemeteries, and the police station and barracks, into a drain which runs along the China Garden and opens into the canal opposite the Railway Station.

At present the surface sewage of this locality is more or less absorbed in the soil which it is intended to drain, and is so distributed as to cause a nuisance. To prevent this it was proposed to divert the surface sewage into the sea by constructing a drain and carrying it across the Matara road, underground, to open at the rocks near the coal sheds on the west side of the harbour.

An opening existed here years ago when there was a canal all round the China Garden. This opening was closed to the best of my knowledge at the recommendation of the late Master Attendant, Mr. Twynam, the father of Sir W. Twynam, under the belief that fresh water flowing into the harbour would cause coral to grow there.

The canal already receives the surface sewage of the China Garden, and when the tide is low and its banks exposed, it becomes very offensive. This was pointed out to me by the late Station Master of the Galle Railway.

The water in the canal on the seaside of the bridge is used for washing cattle and sometimes used by coolies who work in the coal sheds as a bathing place, and to increase the sewage which already flows into the canal must be injurious to the health of both man and beast.

The objections taken by the Council to construct the drain to the sea as originally proposed and agreed to by Government, and to allow the flow of the sewage into the canal, is on the belief that a drain into the sea would be blocked up with sand. This is not proved to be the case, and is simply an assertion. Wherever there is an outlet

into the sea it is where there are rocks, and where no rocks exist sandbanks form. A drain runs along or close to the jail, which is daily flushed by the tide, and no sand collects in it—a proof of what I say against the supposed opinion of the Chairman and Council.

The drain opening into the harbour near the rocks will have a better fall, as admitted by the Provincial Engineer, and will be shorter than the one now approved by the Council, which will carry the sewage all round the China Garden, a damp and unhealthy locality saturated with surface sewage, and where, whenever an epidemic of any kind occurs, invariably finds a location.

This short drain into the sea was proposed at the time Mr. Levers was the Acting Chairman, after careful inspection, and received the sanction of Government. It was recommended on sanitary grounds, in that it tended to improve the sanitary condition of China Garden, and also to remove the surface sewage of the police barracks and station. On the return of Mr. Elliott to Galle opposition was raised to this work, as the correspondence on the subject with Government will show.

Another reason for objecting to this work is its cost. Rs. 5,000, it is said, would be necessary, but as Government has promised to pay one-half of it, the charge on the Municipal funds will be only Rs. 2,500. It could not be said that this expenditure is too heavy for a work of this kind where the health of the community is concerned. Since the railway was opened this neighbourhood is being more and more polluted, and it is not desirable that it should be rendered more unhealthy than it is at present.

I could not see any valid reason for altering the plan of the drain sanctioned by the Lieut.-Governor, Sir Noel Walker, and for the construction of which Government is going to pay one-half of the cost.

The Council, when the motion was carried, consisted of only two elected Members besides myself, and *all but one* of the nominated Members were present. The Chairman called on the elected Member of the Ward in which the canal runs to second the motion, and I was left in the minority. I am quite sure if the elected Member who seconded the motion knew the injury he was going to do to the health of his constituents, he would have been the last to second the motion.
