INTRODUCTION

This bibliography of the writing of our academic staff has been a long felt need of our library as it is essential for locating the writings of our staff which otherwise would have gone unnoticed. Hence, the primary objective of compiling this is to ascertain the materials produced by our staff and make them available to our library users.

The tasks of compiling the bibliography was made easy due to the fact that our library has already established a programme of collecting all publications of our staff and preserving them for future use. However, this is not a comprehensive bibliography of all materials but it is exclusively based on the writings of our staff during their period of service at this faculty. A majority of the materials listed has been personally examined by the compiler but some of the unexamined references has also been included based on the published bibliographies & indexes.

ARRANGEMENT

References in the bibliography have been classified in the main section according to the medical subject headings (MeSH) National Library of Medicine. Under each subject heading entries are arranged alphabetically by author. An author index (specifically for our academic staff) is given at the end.

The majority of the entries are in English with a few in Tamil which are separately documented. Most of the documented materials were published between 1975 - 1991. A few retrospective references were not included but are available in the library research files of our academic staff.

ACKNOWLEDGEMENT

I wish to express my sincere thanks to Mr. S. Murugaverl, Librarian, University of Jaffna, for inspiring & encouraging me to undertake this project.

I am thankful to the staff of the Faculty of Medicine for providing me with the data.

This project would not have been possible if not for the assistance & cooperation extended to me by my entire staff, especially Mrs. P. Mangaleswaran for typing and Mr. R. Krishnakumar for proof reading the bibliography.

Mrs. N. Packianathan,
Senior Asst. Librarian,
