# ORDERING NUMBERS

## 23 OR 25 IS BIGGER?

In both figures, number 2 is in the places of Ten.

Both Unit places are different.

They are 3 and 5.

5 is bigger than 3

Therefore 25 is bigger than 23.

## 23 OR 35 IS BIGGER

Now the place Ten is increased to 3.

In this case don't worry about unit (place).

Now you can say, 35 is the biggest number.

## 123 , 245, 135, 125

Which is big number?

Of the four numbers, 245 has the biggest number in the place of the hundreds. Therefore 245 is the biggest number. In the other three numbers, 135 has the biggest number in place ten. Therefore 135 is the next biggest number. In the other two numbers, 125 has the biggest number in unit place.

Therefore 125 is the smallest number.

# ROUNDING TWO DIGIT AND THREE DIGIT NUMBERS

## NEAREST TEN

### 33 AND 38

33 is near to 30 and far away from 40. Therefore 30 is the nearest ten number for 33. 38 is far away from 30 and near to 40. Therefore 40 is the nearest ten number for 38.

### 133 AND 138

133 is near to 130 and far away from 140. Therefore 130 is the nearest ten number for 133. 138 is far away from 130 and near to 140. Therefore 140 is the nearest ten number for 138.

## NEAREST HUNDRED

### 233 AND 278

233 is near to 200 and far away from 300. Therefore 200 is the nearest hundred number for 233. 278 is far away from 200 and near to 300. Therefore 300 is the nearest hundred number for 278.

# HANDLING DATA

Tally - The way of recording data.

|||| - 4      |||| - 5

Frequency table or Tally chart

Frequency - the number of times the data occurs.

Experiment with four sided die.

1, 1, 2, 3, 4, 2, 4, 3, 4  
 4, 3, 4, 1, 1, 3, 3, 3, 4

**Tally chart or Frequency Table**

## Bar chart

Bar chart is the way of representing the data.

- Bars always has equal width.
- Bars won't touch each other.
- The distance between bars are always equal

**Tally chart, Frequency table****Exercise 35**

In each question draw and complete a frequency table to summarise the data.

# Units Conversion

## LENGTH

*100 centimetres in one metre*

*So*

$$400 \text{ cm} = 4 \text{ m}$$

## LENGTH

*1000metres in a kilometre*

*So*

$$4000 \text{ m} = 4 \text{ km}$$

## WEIGHT

*1000grams in a kilogram*

*So*

$$6000\text{g} = 6\text{kg}$$

## CAPACITY

*1000millilitres in a litre*

*So*

$$4000\text{ml} = 4\text{l}$$
