Message From The Assistant Director Of Education

Good things remain good only because they are always scarce. I am glad to pen for Jaffna Hindu College's Fourth issue of the English Day magazine WORDS WORTH as an appreciation of the commendable efforts put forth by the team for its smart progressing in the stream of English. The efforts taken to bring about an informative magazine for the fourth consecutive year is appreciable. This magazine is indeed a pious attempt to make the students' talents give shape to their creativity and learn the art of being aware because I believe that our success depends upon our power to perceive, the power to observe and the power to explore. I am sure that the positive attitude, hard work, sustained efforts and innovative ideas exhibited by our young students of JHC will surely stir the mind of the readers and take them to the surreal world of unalloyed joy and pleasure. The release of this spectacular fourth issue of their English Day magazine with around forty worthy articles has added value to the students' and teachers' constant efforts. Through this message, I wish them "All the very Best" for their future endeavors to and hope the students of Jaffna Hindu College bring more laurels to the college on the whole.

Mr. K. Subramaniam
Assistant Director of Education – English
Zonal Education Office
Jaffna

Message From The Principal

The English Day Celebration has successfully been conducted annually by our college. English Language has an important place in the present world.

I have no doubt that the English Day celebrations organized and celebrated by our English Union and English Teachers together with the students will course the improvement of English Language.

The individuality of our students is being well maintained by achieving victories in the English Day Competitions at Zonal, Provincial and National Levels. May the God Sivagnanavairavar bless for a great success of the English Day Celebration and the launching of the Magazine.

Mr. S. Nimalan

Principal – Jaffna Hindu College

Message From The Teacher in Charge

It's my great pleasure to pen down this, as the teacher in-charge of the English union. I'm really proud of this release of "Words worth" 4th edition this year.

This magazine comes out with its new outlook, which is related to the theme 'winter'. This is a great opportunity to the students to display their talent in English language. This magazine comes with valuable articles, poems, riddles, topical issues and grammatical items which are written by our school students. This is a great effort of all the members of English union and our teachers of English

I thank all the people who contributed towards the successful.

Mrs.S.Nishanthan

From The Heart of President

As the president of English union. I take a great pleasure and pride to reveal my view in publishing the annual English day magazine, "WORDS WORTH" to refresh the knowledge of English for students with great efforts of students and teachers.

English is a language of international communication, the media, diplomacy, tourism and the internet. So the learning English is important for socializing and entertainment as well as work. The words -4 of "WORDS WORTH "come out with colorful pictures, poems, essays and articles written by the hinduites.

I am responsible to thank some persons to make the magazine effectively. Especially to all the teachers of English who have persuaded us to reach this success and I also thank the students who gave their wonderful articles without any hesitation. My dreams and visions to publish the 4th milestone of our words worth could not succeed without the support our union members. I also thank the members of English union for their untiring efforts and making this magazine a success.

We hope that those who read this magazine become a knowledgeable individual in English with the help of this book " words worth".

K. Mathurangan

From The Heart of Editor

As the editor of the English Union of Jaffna Hindu College, I am very proud to release our beautiful magazine, “Words Worth”, the fourth edition.

English language is an international communicative language. In this globalized world, it is the powerful key to enter the job world. Nowadays, we cannot do anything without English knowledge. Most of us see the English language as a subject. But, it is totally wrong. Everyone should understand English is not a subject; it is a language to communicate with others.

The annual magazine, “Words Worth” brings out the talent and skills of our students. In this magazine, our students' creativity reveal through their articles about trending issues, community events and different matters relating to education.

On behalf of our team, I kindly request all the readers to bear our mistakes in this magazine. I thank every dedicated students and beloved teachers who involved with the release of this magazine. I hope, this magazine is going to be the next milestone in our school history.

School Days

We may hate many students, many teachers
And every damn rule but
We enjoy it only because of very good friends

Class punishments
Silly excuses for incomplete works
Fight with the bench partners

Remarkable marks
Lovable school trips

Group photos
Friendly teachers
Justified mistakes

Sports meet fun
Bunked classes

Prayer songs and school anthem
Sleeping in the first bench in first period
Eating friend's food when he is getting outside
That silence when principal passes by classroom
Hiding behind friends when teacher asks questions
Dreaming about birthdays and parties for months
Group discussion on anything and nothing
Sound of ringing bell at the end of physics period
Are the unforgettable ones
Sometimes these memories
Sneak out of my eyes and
Roll down my cheeks
When I think after few years....

M.Nithushan - 2019 Maths

To My Love....

Since the first day we met
I knew You are the one
I asked god through my prayers
He blessed me with!!- My Angel

Your eyes talk to me
As the world stands still
My heart was empty once;
Now it's filled with you

You gave me your heart
You gave me your trust
From that very moment
It was Agape not Eros

I tell you everything and
Never with a lie
I'm gonna share all my wordly secrets
That once made me cry

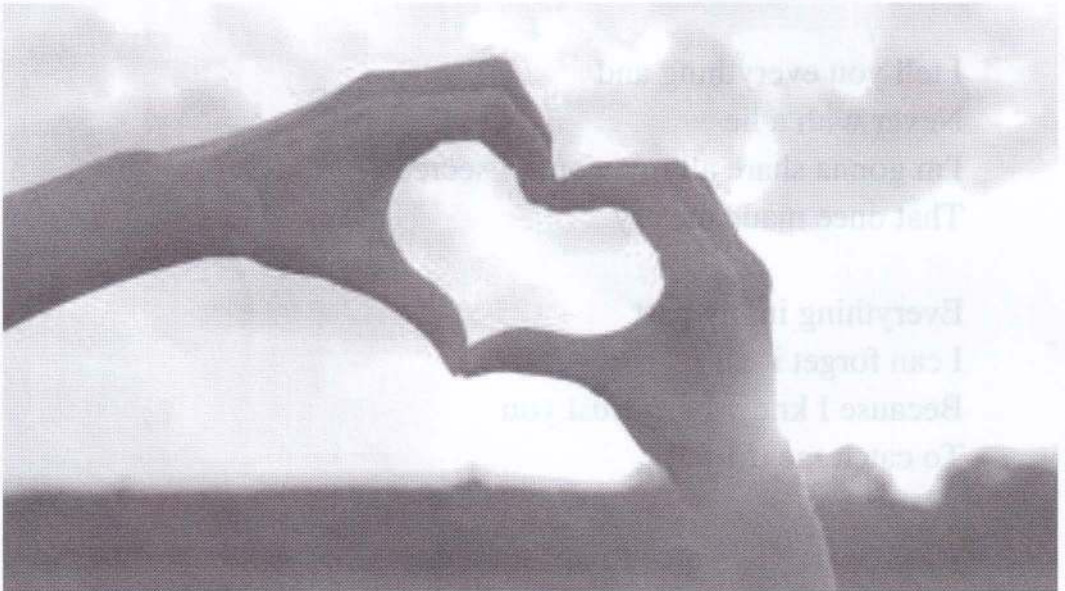

Everything in my past
I can forget it all
Because I know I can trust you
To catch me if I fall

Your eyes , tell me
That you'll love me everyday
No matter what may come-
I'll be there for you Forever

I want to share my whole life with you
For me to show my love is true
I want to hold you near my heart
Even my heart yearns for your love

I don't love you;
For what you are
But what I'm

A.Janushan - 2019 Bio

I Was 09 Years Old...

That was a Monday,
I was 09 years old.
To me, it was a usual day
But for them it was not.
I heard bullet sounds in movies.
But never thought,
How it would feel,
When it pierce my skin.
Ohhh! It is painig.
But my brothers and sisters
Who were younger than me?
Were trapped in those
Rains of bullets. They were crying,
But no one heard them.

Then I saw some men in green with AK47,
Banging on the closed doors of that house.
A mother and a child were in there.
She was searching for a good place
To hide her child.
“Boooooom”, a loud noise,
The door fell down and the entrance was open.
She was sweating, anything can happen.
Some tall and dark men came inside and closed the door.
“Help me! Help me!” she was screaming,
No one heard her voice, but her baby.
Then after everything was done,

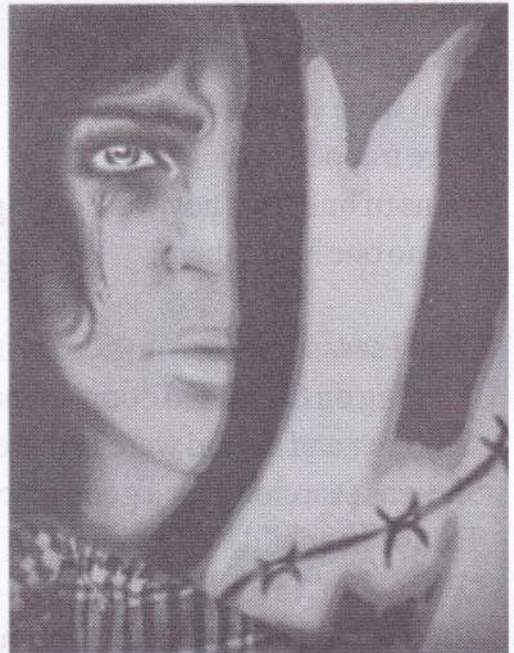

She was in the floor of blood,
With a red dot on her head,
Not a bindi but a bullet.

I hear a baby crying,
Ohhh! Poor lad, he is crying for his mama,
How can I tell him she is no more?
How can I say him that,
He has to live in this dark world alone.
On that day, moon raised in red,
The blood of my people reflected on it.
Oh God! Why didn't you have mercy upon them?
Today I am questioning god but I didn't on that day.
Because I was 09 years old.

Fathers lost their children,
Sisters lost their brothers,
Wives lost their husbands.

But why they have to?
While I was playing
Cricket in K.K.S Road.
Because I was 09 years old.

And then I felt like
Something is happening.
I heard many bullets firing,
I saw army men waving lion flags in jeeps
And they were celebrating.
They were laughing in joy.
And I also laughed with them.
Not knowing that my people there

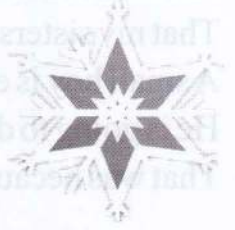

Are in the river of blood,
That my sisters are being raped.
A small boy is eating biscuits and
He is going to die in few hours.
That was because I was 09 years old.

09 years have passed,
And now I am 18.
Now I am thinking why I laughed
On that day,
Because I was ignorant,
Or because I was 09 years old?
Still I'm thinking, couldn't find the answer.....

R. Banujan - 2019 Maths

You Can

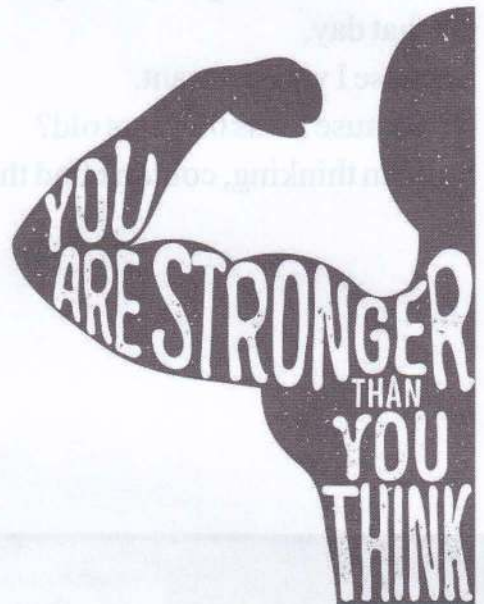

If you think you're beaten you are
If you think you dare not you don't?
If you think to win but think you can
It's almost a cinch you won't

If you think you'll lose you're lost
For out in the world you'll find
Success begins with a fellows will
It's all in a state of mind

If you think you're out classed you'r
You're got to think high to rise
You're got to be sure of yourself bef
You can ever win the prize

Life's battles don't always go
To the stronger or caster man
But sooner or later the one who wins
IS THE ONE WHO THINKS HE CAN

Importance Of Failures

FAILURE
★★★★ IS NOT ★★★★★
FINAL

A.P.J Abdul Kalam , the ex-president of India once said if you fail , never give up because F.A.I.L means “ First Attempt In Learning “. We all agree that at some point of time in our lives we have tasted the bitterness of failures, rejections and disappointments. The famous words by A.P.J Abdul Kalam

give us the directions on how to face failures in life.

Just like two faces of the coin, success in life also comes with failures. If we look at the life stories of great persons, they never reached the heights of success directly. Failure always ignites the beginning of new phase. Let's look at our childhood and see how we learned to walk. We must have crawled first and then tried to sit and then grabbed onto something in our attempt to stand, can we remember how many times we have failed in our attempts, but we never stopped trying and finally succeeded. Life is also similar to new circumstances after the failure. Thomas Alva Edison failed at least thousand times in making electric bulbs but eventually succeeded.

Can we imagine what would have happened if he got fed upon his 100th attempt and diverted his focus to something else? But, each failure was an opportunity for him to improve his model and finally he mastered it. The great Abraham Lincoln lost eight elections before tasting success and Albert Einstein was once expelled from the school.

So friends, it's perfectly ok to fail. It's not something to be afraid of accepting. Accepting the failure is the first big step. We have to approach it honestly as an opportunity to analyze the cause and rectify it so that we can be successful next time. So, let's face failures with a positive mind and consider it as a stepping stone of success.

The Annual Sports Meet

The Annual Sports Meet of our school was held on 22nd of March 2018. It was a memorable day for every one of us. A month before the event, we have started having our practice every evening after school.

The pavilion of our school was packed with people. The five houses were beautifully decorated. The bright flag were waving in the breeze. The chief guest was Mr. Sanmugalingam former Vice Chancellor of University of Jaffna.

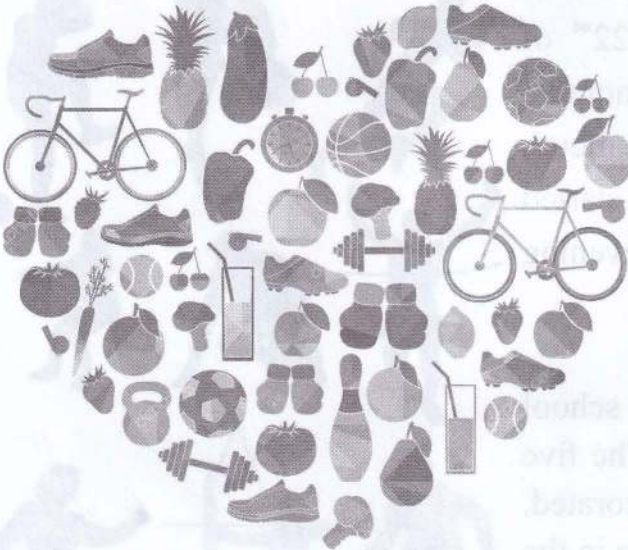

The meet started at 01.00pm with the lighting of Olympic torch. The first event was the march past then there were many other interesting events, such as, the 150 meters race, 400 meters, the javelin throw. There was a short interval from 03.30 to 03.45 pm. After the interval there were many exciting events such as relay, bicycle race and musical chair were some of them. The last event was much awaited tug of war. Then followed the distribution of awards by the chief guest.

The pleasant event came to an end by 06.30pm.

By S. Sripirinthiran- 6 G

Good Health Habits

Health is man's best wealth. It is a priceless gift that God gives us. So we must be careful about our health. What we eat decides how we grow. Hence we should eat wholesome, nutritious food if we want our body to be healthy and strong. Our food must have all the main nutrients; Carbohydrates, fats,

proteins, vitamins and minerals. Carbohydrates are our chief source of energy for work and play. They are present in rice, flour, bread and potatoes. Sugar also gives us energy but too much of sugar is bad for our teeth and can make us fat. So we ought to avoid eating too many biscuits, sweets, pastries, chocolates, cakes and ice creams.

Fats too are another source of energy. They are found in butter, margarine, cheese and cooking oil. But, too much of fat in our diet may cause heart diseases. Proteins help to keep our body fit and strong. Fish meat and eggs are rich in protein. Vegetarians can get their proteins from soya, green peas, dhal and nuts. Vegetables like lady's fingers, beans, radish and drumsticks will do us much good. We must eat a sufficient quantity of green leafy vegetables like gotukola and spinach. They are high in vitamins and minerals – salts are good for our hair. Carrots again are good for our eyes. Milk is the only food for which

there is no proper substitute. Calcium in milk helps to build strong bones and teeth. So it a must for growing children. Fresh fruits are rich in vitamins. So we must take them daily.

We should have our meals at regular intervals. We must avoid eating between two main meals. We should drink plenty of water every day. It is always good to drink boiled water. We must brush our teeth in the morning and at night before going to bed. We must take regular exercise in the evening. We must trim our fingernails regularly. We must have a bath every day, preferably in the morning. We oughtn't to forget the saying "Early to bed and early to rise makes a man healthy, wealthy and wise".

By K.Paveeshan- 6 G

Peace

Peace is not rude or unkind
Peace is the most essential part of mind
Peace is to be devoted to
God, others and even you
Peace is radiance and love
Peace is the vivid glow from above

“Peace is freedom from disturbance,
It is quiet and tranquility “

By S.Hārshavarthan - 6 G

Birbal's Wisdom

One fine day, Akbar lost his ring. When Birbal arrived in the court, Akbar told him "I have lost my ring. My father had given it to me as a gift. Please help me find it." Birbal said, "do not worry your majesty, I will find your ring right now."

He said "Your majesty the ring is here in this court itself, it is with one of the courtiers. The courtier who has a straw on his beard has your ring." The courtier who had the emperor's ring was shocked and immediately moved his hand over his beard. Birbal noticed this act of the courtier and said, "Please search this man, He has the emperor's ring."

Akbar could not understand how Birbal had managed to find the ring. Birbal then told Akbar that a guilty person is always scared.

By S. Niruththigan - 6 G

A river Speaks

My life begins from the peak of a mountain when I start from the top I flow through various forests, lands, through rubber estates, tea estates, under bridges and I end up in the sea. This place is known as estuary.

This flow is not a beauty to me as all think. The road is difficult to me. Daily I have to face same problem. I meet them at the mountains, hills, rocks, pebbles, sandy and marshy land. During rainy days some trees fall across me. Then my flow get delayed. There are days I have to transport rafts loaded with bamboos. Some days rafts are loaded with heavy timber.

Some day's people remove sand. This is not legal but cannot be stopped. When I start flowing I am not alone. On my way I have to carry flooded water as well as fallen trees. When rain ceases and dry season comes.

By S. Tharnis

My Mother's Garden

My mother kept a garden,
A garden of the heart,
She planted all the good things.
That gave my life its start

She turned me to the sunshine
And encouraged me to dream
Fostering and nurturing
The seeds of self esteem

And when the winds and rain came,
She protected me enough
But not too much – she know I'd need
To stand up strong and tough

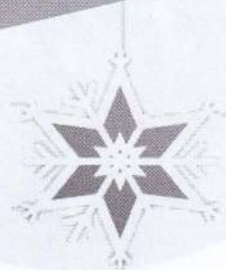

Her constant good example
Always taught me right from wrong
Markers for my pathway
To last my whole life long

I am my mother's garden
I am her legacy
And I hope today she feels the love
Reflected back from me.

By N.Thuthikaran - 7A

Valuable Tree

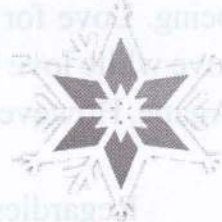

In this modern world many valuable trees are in endangered stage. In that prospect, Neem is one of the valuable tree. Product made from neem have been used in India for over two millennia for their medicinal properties. They are said to be antifungal, anti-diabetic, antibacterial, anti-viral, contraceptive and sedative. Neem products are used in selectively controlling pests in plant. Neem is considered as a part of Ayurveda medicine.

Neem is also known as the village pharmacy. All parts of neem are used for preparing much different medicine especially for skin disease. A compound from neem tree can be used as a spermicide. Neem oil is used for preparing cosmetics [soap, shampoo, lotions etc.] and is useful for skin care such as acne treatment. Neem oil has been used effectively as a mosquito repellent. Neem is useful for repelling many types of insects, mites, ticks and nematodes. Neem does not normally kill pests right away but slows their growth and drives them away. As Neem products are cheap and not poisonous to animals and friendly insects, they are good for pest control.

By T. Thanugaran -10C

Love and Affection

Love is an affectionate feeling for different people including husband, wife, children, friends or coworkers and god. There are various types of love. Eros is what probably mean when they announce with a smile “I am in love “. This type of love covers everything from queasy stomachs and warm fuzzy feelings to strong sensual passion. There are a couple of very interesting characteristics of Eros.

First in order to exist, Eros is depended upon the situation and circumstance. As long as a couple is enjoying romantic situations, Eros can thrive. But as soon as hurtful words or actions appear, Eros simply evaporates. Eros is based on self-benefit, it is often untested by hardship and has its basis in romantic feelings. Philos is the love of friends, best friends and fellowship of being with those people you enjoy. It is based on the concept of give and take.

Agape love, unlike the previous two types of love is not limited to being held on stage by its environment and someone's perception. The reason why agape can soar above is because it is based upon the commitment

of decision. It entails the decision to pro-actively seek someone's well-being. Love for one's sibling can be divided between Philo and Agape love while love between spouses can start as Eros and end up as Philo or Agape. However love for all mankind is the essence of Agape love.

Regardless of economy or race or status, people value love and recognize that love will shape what is good and true.

“Love all: Serve all”

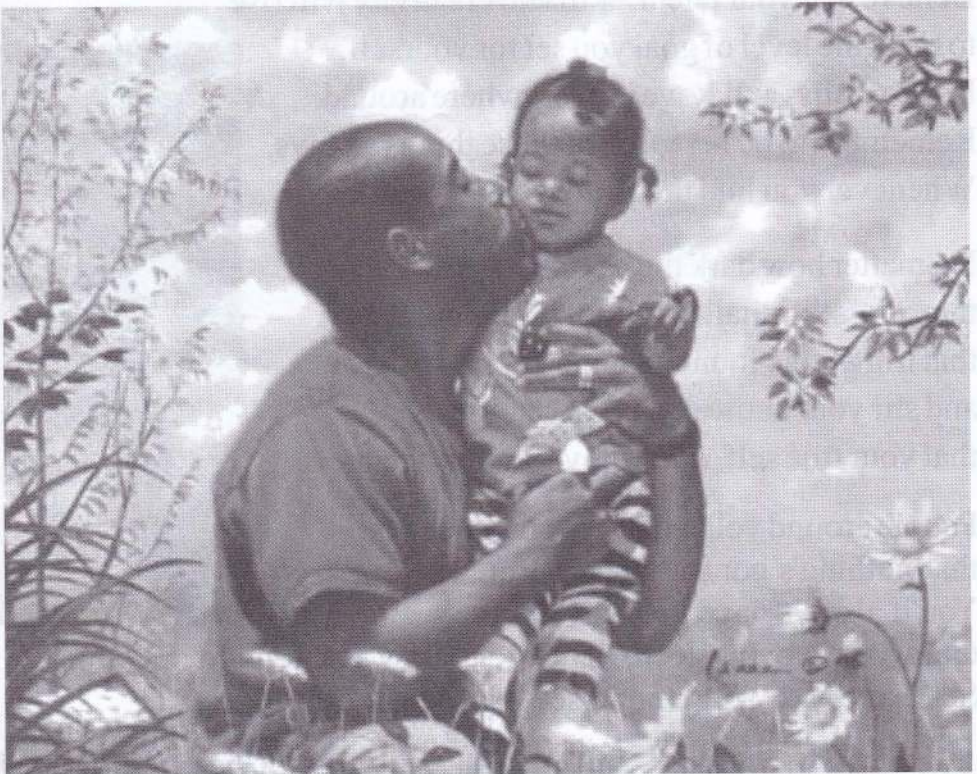

By: Paramanatham Braveen -7A

My Father

My father is a great man
He loves me and I love him
Because he's very nice
He spends most of his time in office
And some time with us
He always protects me
Because he's very strong
My father takes good care of me
He always helps me without any fee
“I Love My Father “

Set Your Soul on Fire!

There are moments when you have to choose between living your own life, fully, entirely, completely - or dragging out some false, shallow, degrading existence that the world in its hypocrisy demands. Always choose the former one by default.

With a mind full of ideas yet to be executed,
Heart full of dreams yet to be accomplished,
you stand there in the edge of the road, called life,
thinking, reliving, planning and not doing!
What are you waiting for? Start now! Start where you are.

Believe that your talent, skill and creativity will rise to meet the level of goal you set for yourself.
Beauty, Bliss and Love is everywhere around.
Remember to be in search of those things always.
Whenever you find them, hold on to them. Tight.

No matter how dark the days are,
there are still small beautiful things out there
that trigger the fountain of power in you
and stir your entire self up so rigorously
that your true self rises above your broken self.

People around you will try to convince you
that nothing's gonna happen. But,
You'll always have that tiny Spark
that won't let you sleep, that won't allow you to give up.
Set that Spark on Fire and see the Magic unfurl.

By: N. Aathavan - 2019 Maths

Environmental Pollution

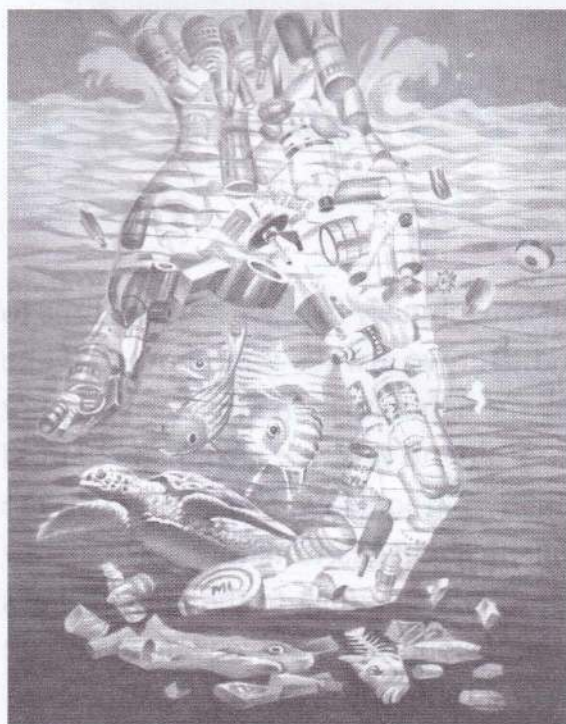

Nowadays, we are leading a machinery life. We have no time to think about others and ourselves too. But we always think how to make money in everything. So, we destroy the nature to earn money. We do not bother about our mother nature. According to this, we face many natural disasters like global warming, drought, earthquakes; tsunami etc. In the past, humans led a life without causing damages to nature so that they could lead a peaceful life. But we lead a life against to the nature, that's why we all are affected badly by climatic conditions. If we want to be safe from disasters, we should protect the environment.

The environment means surrounding. The environment is being polluted by the humans meant as environmental pollution. It can be classified into four main types namely land pollution, water pollution, air pollution and sound pollution.

Land is polluted by deforestation, dumping electrical and industrial wastages, usage of plastic things and scattering harmful chemicals for plants. Land pollution occurs mainly due to the deforestation. Trees play an important role in securing the minerals of soil. If trees are cut down, the minerals must be affected. Loss of minerals becomes as a main problem for farming. There are many waste lands in this earth where farmers cannot do farming due to the loss of minerals. That's why; the world's food production is badly affected.

The people pollute the water by releasing garbage and other waste chemicals into the water streams, mixing of industrial waste with water and usage of chemical fertilizers. The water pollution makes the

scarcity of pickerel. Nowadays there are many countries like Africa, India that are facing water scarcity. the researches of UN reveal that the Cape town , the first place has no water resources to get water in this present situation. Many social enthusiasts say that the third world war will occur for the water.

The air is polluted by the harmful gases like carbon monoxide and sulfur dioxide which are emitted by vehicles and factories. The humans'

irresponsible activities have damaged even the Ozone layer which is safety roof of the earth. According to the researches, the scientists say that the above harmful gases cause many diseases in men including cancer.

If we want to skip the bad effects of environmental pollution, we should stop our irresponsible activities against to the nature. First and foremost thing is that everyone must know the value of nature and treat the nature with more love and affection. Through conducting awareness programs, there is a chance for people how to protect the nature. Every government has to bring down rules to protect nature and punish severely the persons who disobey. If we avoid protecting our nature, we will face the biggest problem in the future. Therefore, everyone tries to come forward to protect the nature.

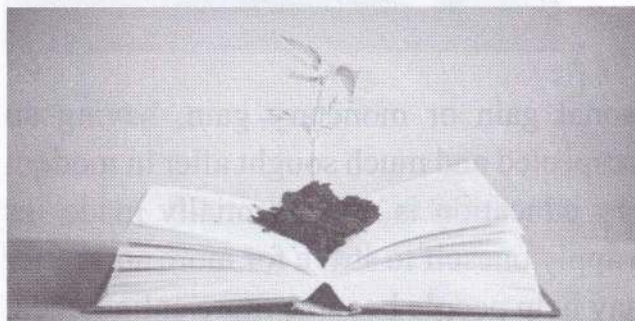

“You destroy mother nature that means you dig a pit for your grave”

By: S.Vishnujan - 2019 Bio

Importance of Education

Acquiring education is one of the most critical aspects of a person's life. Without education, you're not going anywhere in this world” is a

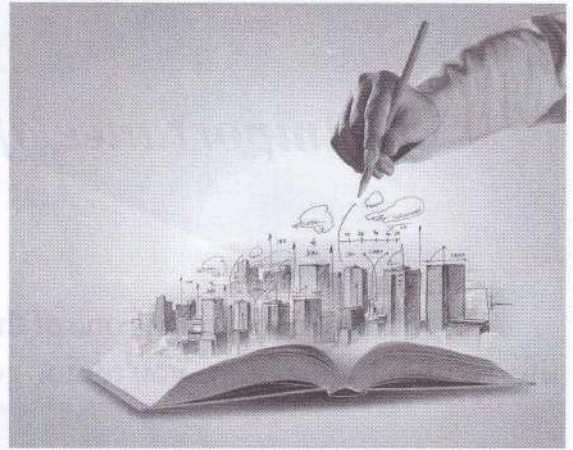

famous quote by Malcolm X. Education is essential to every student's life as well as their future. Students can have a prosperous life by receiving a good quality education. Further it will help

a person grow as an individual because a highly knowledgeable person will have a better grip on handling any problem that comes his or her way. Decision making and gaining knowledge gives us pleasure as well as boosts our moral. In addition it should be part of everyone's life because it is one of the most precious possessions a person could ever have since that can open doors and facilitate the pathway for future achievement and economic successes. It is good to denote that the Wikipedia illustrates “Education encompasses both the teaching and learning of knowledge, proper conduct, and technical competency.” The higher the education a person has, the greater chances of that person landing a better-paying job and make his or her future prosperity. It paves the way to a successful life. It can provide people with information and knowledge for getting a job and pursuing their dream.

The importance of education can never be stressed enough, no matter the person or situation. It is an essential to everyone and provides not only knowledge but also enlightenment, wisdom, and character. In modern society, there are always alternatives offered and many people

choose to put a negative stigma on schooling and education. A few reasons why education is so inherently important are It provides self-dependence, offers career progression, builds character and exposes the world and educated people helps the progression of society.

Whether it be for personal gain or monetary gain, having an education is something that is respected and much sought after in modern society. Though post-secondary education is not essentially made for everyone, having the ability to apply oneself to strive for more and better in life is what is essential. It may help people become more enlightened, self-aware, more skilled at time management, and overall respectable human beings.

An ideal education will not be possible if one of these three components is missing; they are: parents, educators and students. The student, the parent, and the educator should always conspire to develop and establish a flawless academic plan. The students need to learn from the books along with other various materials. There are many advantages that are associated with receiving an education. Students will be able to contribute to their community and help make it a better place to live. Learning involves a person acquiring the knowledge or skills that is being taught to them. This can occur through methods such as observation, listening or through hands on learning. It is the fundamental to development and growth. The human mind makes possible all development achievements, from health advances and agricultural innovations to efficient public administration and private sector growth. For countries to reap these benefits fully, they need to unleash the potential of the human mind.

Education is a self-enlightening process. It is an important component of life. It equips us with all that is needed to make our dreams come true. It opens doors to brilliant career opportunities. It fetches better prospects in career and growth. Education is essential as it paves the path leading to disillusionment. It believes that basically helps shape society and makes students learn to become more sociable and helps them develop relationships with their peers. Students will be more qualified for different job positions if they have a good solid education. Education is vital to each student's life, therefore, by working hard to provide the best instruction possible will help train students to become future leaders and will lead to make it a better place to have a better life.

Students need to be taught discipline and respect because it is important for them to respect themselves so they can learn to respect others. The teacher needs to be firm and enforce the rules to all the students because displaying immoral behavior disrupts learning for everyone. Furthermore, a good curriculum is a major part of the learning process, educating students goes beyond subject matter because sometimes students have issues that interfere with their learning. This is why the teacher has to find out what the student is lacking and try to help the student achieve what they need to learn. Parents play a major part in their child's education. The first place children start learning at is in the home. Parent's jobs are to help encourage and support their child's learning. Most of the time children look at their parents as role models so it is important for parents to stress the importance of education. Parents need to be involved in their child's education and that means making sure homework is completed, reading with their child and just basically working with them at home to help with improvement. The teacher and parents need to work together for the development of a child.

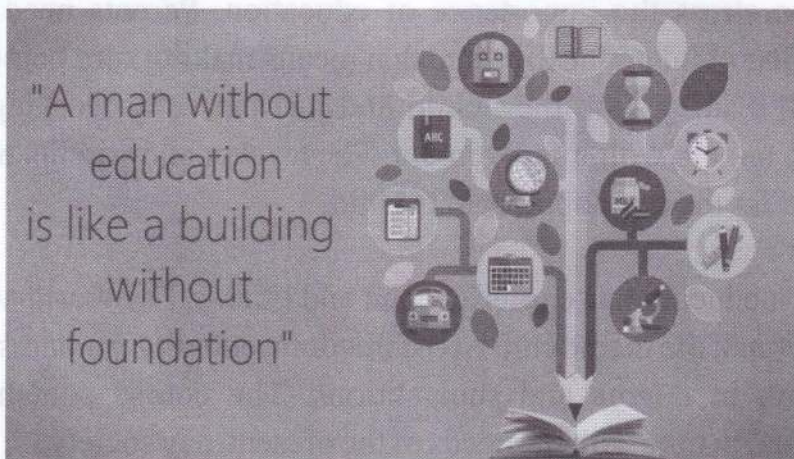

Modern education is exoteric, open and liberal. The world-view is scientific-rational; the theme consists of freedom, equality, humanism and denial of faith in dogma and superstitions. The course contents are rationalistic and in tune with the needs of the present-day society.

Science and technology, grammar and literature, social philosophy, history and culture, geography and ecology, agriculture and horticulture comprise the vast range of subjects which are taught in educational institutions. It lays emphasis on the subjects like freedom, nationality, law, human rights, democracy and scientific world view. The other parts of education are the co-curricular and extra-curricular activities, which are often organized for total personality development of a student.

The present industrial society has opened up a multiplicity of occupations and professions and each one of them is associated with scientific knowledge and skills. It is a society of complex division of labor and requires people with specialized knowledge. Education thus is an essential prerequisite of modernization. It enables people to know the world beyond their own surroundings and transforms them to become rationalist and humanist in outlook and world view. However, it has to be kept in mind that the education has got modernized and in turn is contributing to the process of modernization of the society. The modern education also fulfills needs of the economic growth. A vast range of subjects like medicine, health, engineering, management and law have become hot areas of professionalization and specialization today.

Finally, Getting educated can help prepare a man to fit the world, and able to think critically to solve problems throughout the lives and also to be good citizens and future leaders.

LOVE

There is no person who never heard about the word 'Love'. Because, everyone love something or someone. When we think about 'love', we always think that love must be between girl and boy. But that is not true. Someone loves their friends, someone loves their parents, someone loves their pets, and someone loves their jobs too. So, everyone can feel love in their little heart.

There are so many things that cannot be bought by paying money. One of them and most favorable thing is love. This is a wonderful feeling for everyone. We cannot define the love in words, because there is no one who has full knowledge of love. Till this moment, many psychological researchers are doing their researches about love. Many philosophers mention love as a mysterious thing. We can compare the love to the mystery of Bermuda triangle.

Love is defined as an intense feeling of affection for someone. Love can also be a virtue representing human kindness, compassion and affection. Love is an unconditional one which means there are no expectations and limitations. In order to understand true love, we need to understand love. To love unconditionally is a difficult thing. But true love really never tries to change other person. Many conflicts among the persons occur, when they try to change others. Most of them do not like to be influenced by others.

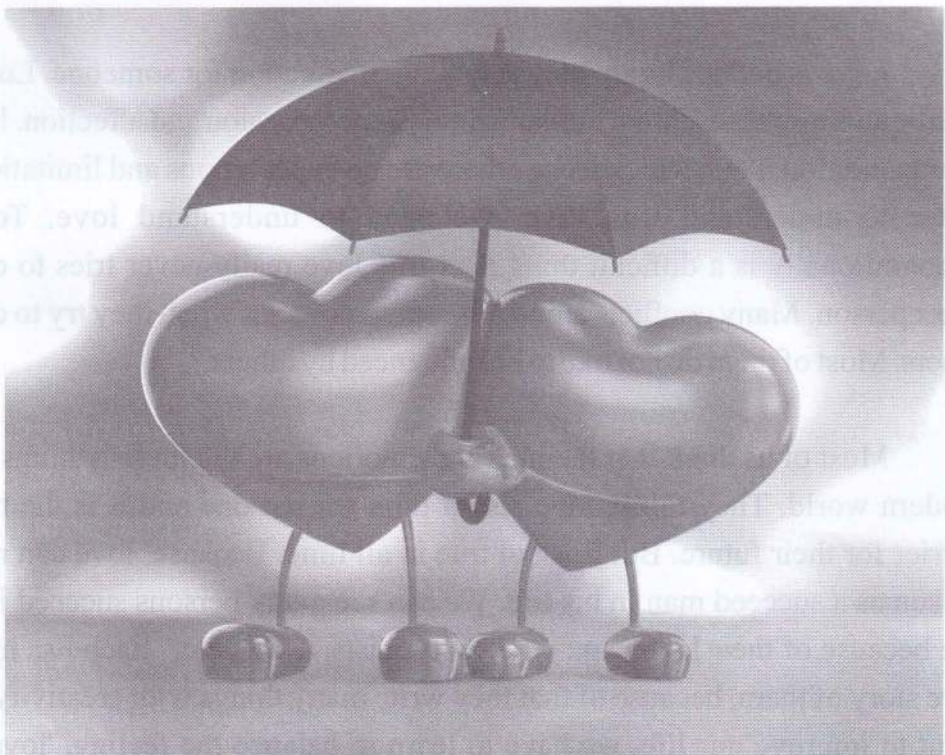

Most of us think that feelings and emotions are the foolish things in this modern world. They think, love also a time wasted one and it is the biggest barrier for their future. But it is not true in all time. Because, love can make a person as a succeed man in his life. We can see many persons succeed in their life because of their love. e.g.: writers, lyricists, artists etc. Each has his own love story of them, because of that they write many things with creativity. If we want to improve our life, we have to learn to balance the feeling, 'love' with

other things. If we do not control our feelings, we will face many problems in our life. Some cruel minded people use the love in a wrong way. That 'why, many persons see this love as the worst thing in this world. But, love is the best thing in the world.

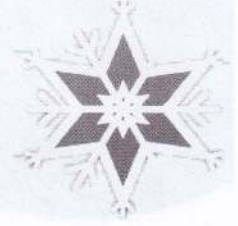

Love makes everyone's mind as a good one. Love destroys jealousy and competitive mind set, violence, revenge mind set and attrition. Love has a power to lead the people to the peaceful world. If there is a love in everyone's heart, there will no chance to the war. Love is the best teacher for everyone. It teaches us how to lead our life happily and peacefully and how to love others emotionally. We can learn many good habits like endurance, concession and patience through love. So, we have to learn love everything in our beautiful world.

“Love is like a wind, you can't see it but you can feel it”

Listen to Your Parents

In a forest there was a herd of deer. A young deer was so naughty because, he never listen to his parents. one day it wandering without telling his parents and he was caught in a trap. He shouted and his parents came to rescue him. They said "please little deer, don't go anywhere without telling us" but it didn't listen and on next day it went again. This time it fell into a hole and shouted. The parents came and rescued it.

After that day the deer went to the village and the people who live there took the deer in a vehicle to the zoo. The deer was so sad. After few days the forest officers leave that deer in its forest. The deer ran faster and back to home. He saw his parents and it was so happy. He said to his parent "sorry dad and mom, i never do anything without listening you."

Last Year Rememberance

A Dark Night

I was lonely in a dark place

I think it was a forest

Ah! The dangerous noises

It must have been of animals

a huge figure must approaching me

What could i do but move my legs

Why? What has happened?

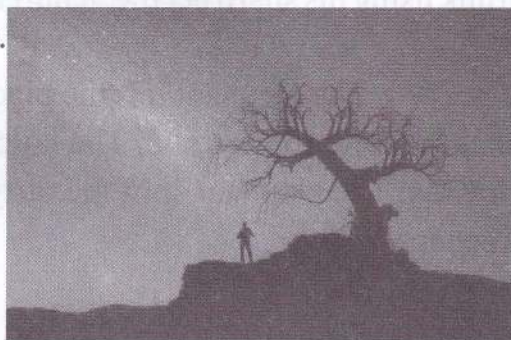

They were refusing to snake.

I shouted aloud

Closing my eyes

I felt the droplets of water

Oh! It was raining hard.

Searching for that giant figure

I ran here and there

I was running from chasing figures

Who were getting closer to me?

Ultimately they caught me

And tied me up with ropes

They were talking something about a fire

Ah! What was going to happen?

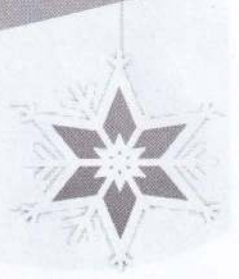

They threw me into the fire

I shouted "somebody help me"

When i opened my fearful eyes

I found it was only a dream.

Revenged Elephant

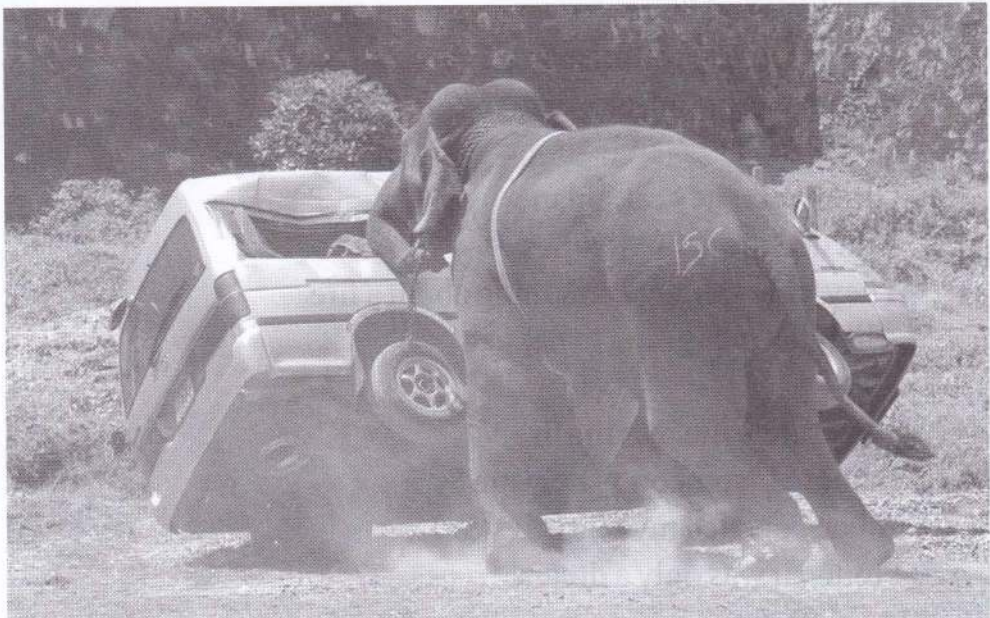

There was an elephant lived in a village. it daily goes to a river to take bath. The mahout leads the elephant on the pavement. it stands in front of the tailor shop. The tailor gives fruits each day.

One day the tailor wished to play with the elephant. so when the elephant came and it stretched it's trunk as casual but the tailor pinched the trunk using his sharp needle, it hurt the elephant too much immediately.

The elephant left the place & went to river. it brought the dirty muddy water in it's trunk. The tailor shop was decorated with many new dresses. The elephant split the dirty water all over the shop and on shop keeper.

A day in Farm

One day, i went to my grandfather's house in Jaffna. I went to the farm with my father and two friends. That was a fine morning. I went to the farm grandfather was in the farmhouse.

I saw a brood of chickens near the gate. I took my camera and i clicked many pohotos.me and my friends enjoyed a cup of tea with bun. I saw the fish tank with many beautiful fishes.

I went to the back of the house and saw many animals there were goats, pigs,pigeons, cows,bulls,ducks,chickens and horses.We came back to our home in the evening. We were very sad because we were left the farm.

Poverty

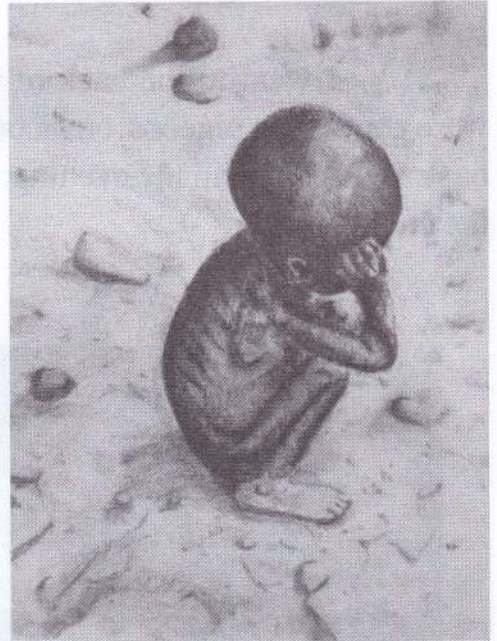

You Come Into My Life
By An Accident Then
You Stole My Things
Now I Lost Every Thing

I Lost My Parents, Friends & Also My State
People Who See Me
Think I Must Feel Shame
All These Happened Because Of You

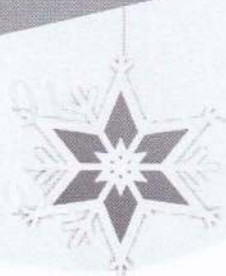

I Can't Face You Anymore
If Don't Leave Me
I Can't Do Anything
Surely I Will Die Soon

People Who See Me
Look Away In Guilt
You Are Like A Slow Poison
Eating In To My Life

You Go In Your Way
And I Will Go In Mine
Don't Interfere In My Life
Leave My Poverty, Please Leave Me

Time Is Gold

Give time to smile
That is the music of heart

Give time to play
That is the energy of the body

Give time to study
That is the key to all knowledge

Give time to speak
That is the freedom of the human

Give time to friendship
That is the way of success

10 Benefits of Reading: Why You Should Read Every Day

1. Mental Stimulation

Studies have shown that staying mentally stimulated can slow the progress of (or possibly even prevent) Alzheimer's and Dementia,^[1] since keeping your brain active and engaged prevents it from losing power.

Just like any other muscle in the body, the brain requires exercise to keep it strong and healthy, so the phrase “use it or lose it” is particularly apt when it comes to your mind. Doing puzzles and playing games such as chess have also been found to be helpful with cognitive stimulation.^[2]

2. Stress Reduction

No matter how much stress you have at work, in your personal relationships, or countless other issues faced in daily life, it all just slips away when you lose yourself in a great story. A well-written novel can transport you to other realms, while an engaging article will distract you and keep you in the present moment, letting tensions drain away and allowing you to relax.

3. Knowledge

Everything you read fills your head with new bits of information, and you never know when it might come in handy. The more knowledge you have, the better-equipped you are to tackle any challenge you'll ever face.

Additionally, here's a bit of food for thought: should you ever find yourself in dire circumstances, remember that although you might lose everything else—your job, your possessions, your money, even your health—knowledge can never be taken from you.

4. Vocabulary Expansion

The more you read, the more words you gain exposure to, and they'll inevitably make their way into your everyday vocabulary.

Being articulate and well-spoken is of great help in any profession, and knowing that you can speak to higher-ups with self-confidence can be an enormous boost to your self-esteem. It could even aid in your career, as those who are well-read, well-spoken, and knowledgeable on a variety of topics tend to get promotions more quickly (and more often) than those with smaller vocabularies and lack of awareness of literature, scientific breakthroughs, and global events.

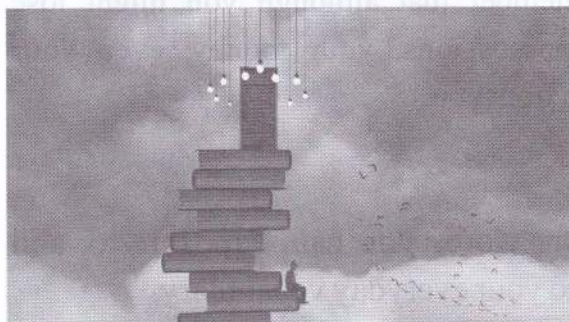

Reading books is also vital for learning new languages, as non-native speakers gain exposure to words used in context, which will ameliorate their own speaking and writing fluency.

5. Memory Improvement

When you read a book, you have to remember an assortment of characters, their backgrounds, ambitions, history, and nuances, as well as the various arcs and sub-plots that weave their way through every story. That's a fair bit to remember, but brains are marvelous things and can remember these things with relative ease.

Amazingly enough, every new memory you create new brain pathways and strengthen existing ones, which assists in short-term memory recall as well as stabilizing moods. How cool is that?

6. Stronger Analytical Thinking Skills

Have you ever read an amazing mystery novel, and solved the mystery yourself before finishing the

book? If so, you were able to put critical and analytical thinking to work by taking note of all the details provided and sorting them out to determine.

That same ability to analyze details also comes in handy when it comes to critiquing the plot; determining whether it was a well-written piece, if the characters were properly developed, if the storyline ran smoothly, etc.

Should you ever have an opportunity to discuss the book with others, you'll be able to state your opinions clearly, as you've taken the time to really consider all the aspects involved.

7. Improved Focus and Concentration

In our internet-crazed world, attention is drawn in a million different directions at once as we multi-task through every day.

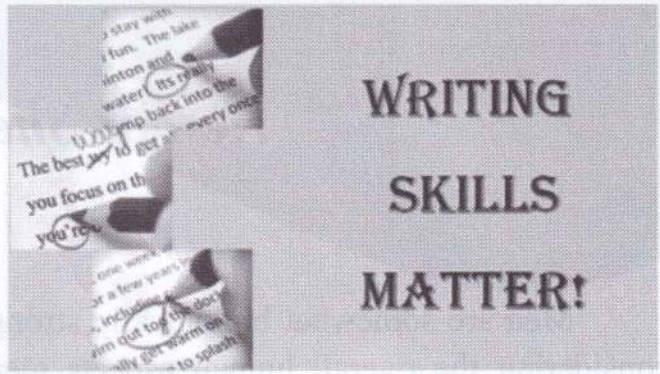

In a single 5-minute span, the average person will divide their time between working on a task, checking email, chatting with a couple of people (via Viber, Skype, etc.), keeping an eye on twitter, monitoring their smart phone, and interacting with co-workers. This type of ADD-like behavior causes stress levels to rise, and lowers our productivity.

When you read a book, all of your attention is focused on the story the rest of the world just falls away, and you can immerse yourself in every fine detail you're absorbing.

8. Better Writing Skills

Exposure to published, well-written work has a noted effect on one's own writing, as observing the cadence, fluidity, and writing styles of other authors will invariably influence your own work.

In the same way that musicians influence one another and painters use techniques established by previous masters, so do writers learn how to craft prose by reading the works of others.

9. Tranquility (Calmness)

In addition to the relaxation that accompanies reading a good book, it's possible that the subject you read about can bring about immense inner peace and tranquility.

Reading spiritual texts can lower blood pressure and bring about an immense sense of calm, while reading self-help books has been shown to help people suffering from certain mood disorders and mild mental illnesses.

He For She

Men are somewhat biologically stronger than women, but when considering the overall human aspects men and women are equally strengthened by nature for the progress of this earth. Therefore we men should rebalance the way In which we frame gender inequality and should make up our mind to seek women as other half of this planet.

UNICEF says gender equality “means that men and women and boys and girls, enjoy the same rights,resources, opportunities and protection. And I consider gender equality as one of the unfinished businesses of 21st century. But if we finish this business we can uplift the human society to another level of its development. Whenever men and boys tried to fight for gender equality pioneering some flaw people from back end will say “it's female fight and it is none of men's dealing”, but many socialists emphasize that “gender equality is a human fight, not a female fight”.

Every human anticipates for the positive progress of human society. Hence it's better if men and women work together than being separated by gender inequality. Thus we men have to be allies for women to fight for gender equality. There you arise a question that how gender equality contribute for development of human society. The answer is that gender equality is more than a goal in itself. It is a prior condition for meeting the challenge of reducing poverty, promoting sustainable development, etc.

Another question is also caused that generally women are discriminate gender wisely in home, school, and workplace and in society. So by working with women to uplift their gender what the men going to

deserve? The answer is that gender inequality results in poor conditions and outcomes for men and whole society and perfect ion can't be achieved by men without women because in everything they have the ability to think in a different point of view. Thus the blending of genders with equality wills efficiently work on creating positive phrases to future world.

There are enormous pressures for a real man to act in realistic manners to bring this gender equality inspire those unreal men. First the men should tackle those old unconscious biases on gender. This could be done by many acts that men and women could perform in their home, school, and workplace and in society.

In homes, for example it is a well followed theory that boys will play with cars and guns while girls will play with cooking sets and dolls. And in home whenever a boy child did a flaw, the parents normalize that behaviour saying the famous phrase that “boys, will be boys”, this will suppressed the girl child and using gender as an excuse for anything is unacceptable. To bring gender equality in home 'the real men 'idea to promote gender equality in childhood.

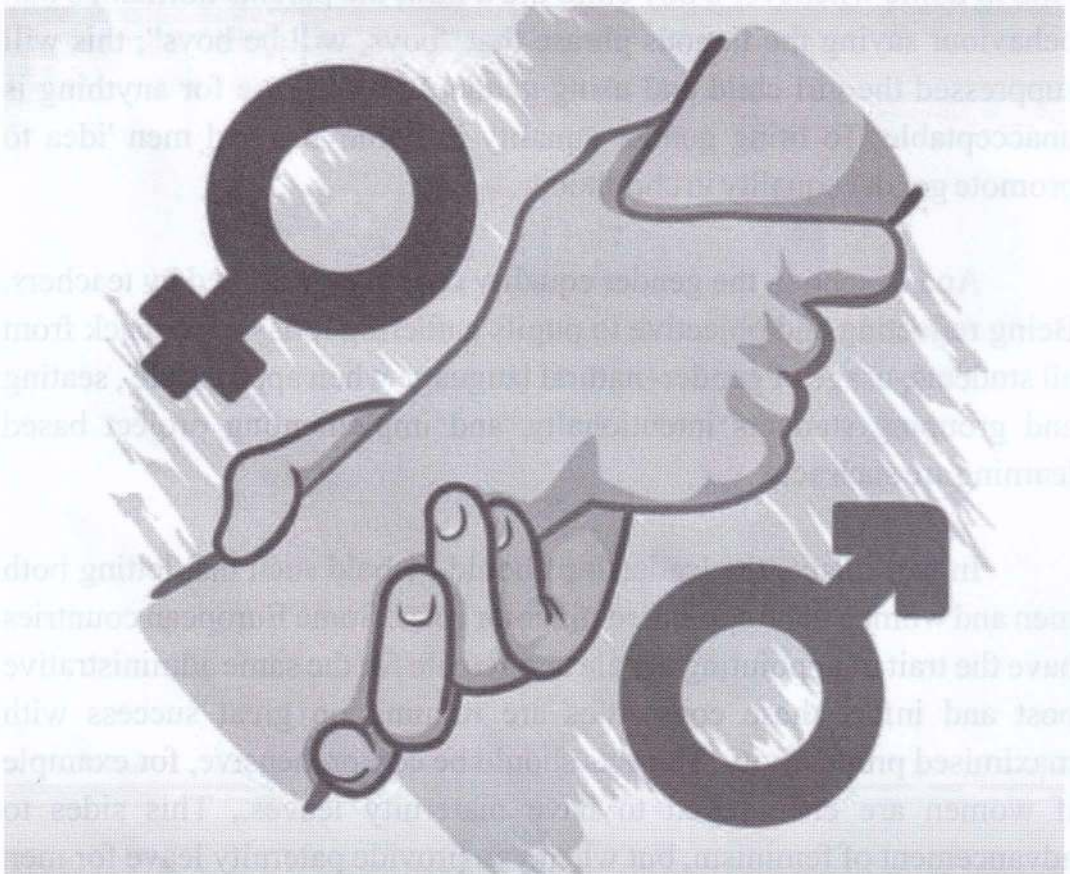

And in school, the gender equality could be promoted by teachers. Being reflecting and objective to pupils gathering today's feedback from all students, usage of gender- natural language when appropriate , seating and grouping students intentionally, and implementing project based learning are such acts.

In workplace, the leadership should be bold such that letting both men and women to be appointed to senior roles. Some European countries have the trait of appointing a male and female for the same administrative post and infact these companies are running on great success with maximised productivity. The acts should be comprehensive, for example if women are encouraged to have maternity leaves., This sides to advancement of feminism, but when you provide paternity leave for men

this will eradicate gender inequality. Hence through analytical acts and comprehensive acts we can bring a positive impact on advantages of gender equality. Ensuring the acquisition of men and women with equally empowered environment is also important. Giving both genders with equal chances to access the resources and tools also such a necessary step.

If every spirit in this world feels equality within them, then it will be a privilege to live in this world. And on the day of human victory, we can see that every men and women with their hands clasped and their faces with the proud smile in behalf of balancing off and closing off the account of gender inequality.

The Easter Bunny

I met a little rabbit once
Hopping on his way
I asked, "where are you going
In such a lovely day?"
He said with just the slightest frown,
"Don't hinder me I pray!
I'm taking round the Easter eggs,
Because it's Easter day

“A time When I had Strong Opinion About Something ”

The human mind is very complex. There is much awe in its ability to linger from fact to fact choosing the solution which will ensure its survival. My mind was not indifferent to this

global ideology. One day I had found myself clinging on a decision regardless of what society thought.

The day -'January 5th, 2013' had been imprinted on my mind as an eternal memory .I remember everything that had made me stand by what I thought was right -every detail clear but as a crystal . All that fuss was about debate on the topic-“Is homework beneficial to students”, the entire audience had adhered to the opposite saying that it wasn't. Every person seated In front of the stage clapped with tremendous energy as the opposers have their facts in lightning speed. Yet I sat there deeply saying no to the ideology being spread throughout the audience .I believed that homework was necessary.

The reason for my opinion was unclear at that time as the debate progressed my intentions were brought out at the time but as the debate

progressed my intentions were brought out whenever the proposal talked about the advantages of homework ,I sat with me a younger self who has thrived off the work given to me by my teachers . I saw what I would have become .If it wasn't for the active participation of education in the house with no money or lays to individual happiness I found joy in doing what was assigned to me by my teacher.

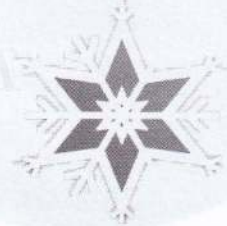

That's why I stood storing to my opinion, because I was a first example to the advantages to homework in the lives of students.

Even though the results of the debate were not in my favour .I was proud I stood by my opinion .It was my personal experience that led me to have a steady hand. But the funny thing was, even amidst the benevolent and inquisitive facts provided by the opposes -our teacher ended up giving us a mountain load of homework the next day.

“Dare to do right, Dare to be true, even if the world disagree” Peter Percival.

A.Harshan. 11A

Sorry!

SORRY! SORRY! SORRY!

I never thought it will hurt you.
It brings me pleasure
But it puts you in a pressure.
Let me try to solve it
As soon as possible.

Give me a chance.
In my life I want to ask
Deep sorry just for few.
Come on mom, you are first.
I put you in a lot of pain
When I was born,
And when I grew up
Again and again I did the same.
I didn't realize you, till yet
Just asking this for formality
Because I never asked sorry
To my friends.

Papa, I never thought, I will
Reach this situation.
Because you made me, you taught me,
You inspired me, but I did
This to you. I am sorry
Papa.

Hey Guys,
But still I can see both of you in my lifes
After all this years
After I did this much to you
Sorry Guys.
Hey Love,
Forgive me, forgive this fool.
Sorry that I acted so cruel.
I know this won't change a bit
But I can't stop loving you.
I love you and I will love only you.
Take my hand and let's start a new.

I am sure I will never burry you all
In graveyard one more time.
I will carry you all as much as I can.
I am very very very
SORRY! SORRY! SORRY!.

The Girl Who Was Shot By The Taliban

Malala Yousafzai was born in Mingora, Pakistan, located in the country's Swat Valley, on July 12, 1997. For the first few years of her life, her hometown remained a popular tourist spot that was known for its summer festivals. However the area began to change as the Taliban tried to take control. Yousafzai attended a school that her father, Ziauddin Yousafzai, had founded. After the Taliban began attacking girls' schools in Swat, Malala gave a speech in Peshawar, Pakistan, in September 2008. The title of her talk was, "How dare the Taliban take away my basic right to education?". In early 2009, Yousafzai began blogging for the BBC about living under the Taliban's threats to deny her an education. In order to hide her identity, she used the name Gul Makai. However she was revealed to be the BBC blogger in December of that year. With a growing public platform, Yousafzai continued to speak out about her right, and the right of all women, to an education. Her activism resulted in a nomination for the International Children's Peace Prize in 2011. That same year, she was awarded Pakistan's National Youth Peace Prize. Malala and her family learned that the Taliban had issued a death threat against her because of her activism. Though Malala was frightened for the safety of her father - an anti-Taliban activist - she and her family initially felt that the fundamentalist group would not actually harm a child. On October 9, 2012, when 15-year-old Malala was riding a bus with friends on their way home from school, a masked gunman boarded the bus and demanded to know which girl was Malala. When her friends looked toward Malala, her location was given away. The gunman fired at her, hitting Malala in the left side of her head; the bullet then traveled down her neck. Two other girls were also injured in the attack. The shooting left Malala in critical condition, so she was flown to a military hospital in Peshawar. A portion of

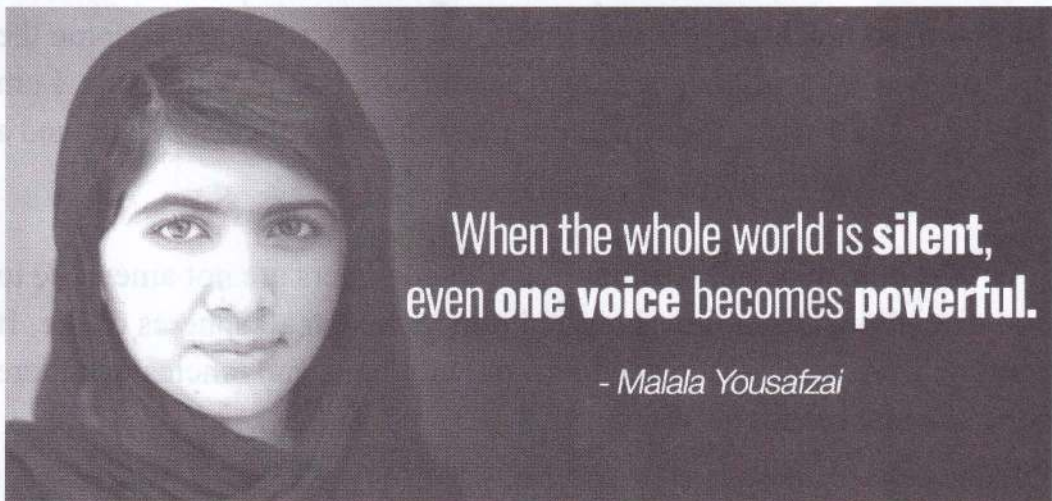

her skull was removed to treat her swelling brain. To receive further care, she was transferred to Birmingham, England. Once she was in the United Kingdom, Yousafzai was taken out of a medically induced coma. Though she would require multiple surgeries-including repair of a facial nerve to fix the paralyzed left side of her face - she had suffered no major brain damage. In March 2013, she was able to begin attending school in Birmingham. The shooting resulted in a massive outpouring of support for Yousafzai, which continued during her recovery. Unfortunately, the Taliban still considers Yousafzai a target, although Yousafzai remains a staunch advocate for the power of education.

Nine months after being shot by the Taliban, Malala Yousafzai gave a speech at the United Nations on her 16th birthday in 2013. Yousafzai highlighted her focus on education and women's rights, urging world leaders to change their policies. At Malala Yousafzai's 2013 speech at the United Nations, Secretary-General Ban Ki-moon pronounced July 12th – Yousafzai's birthday – 'Malala Day' in honor of the young leader's activism to ensure education for all children.

Malala was first nominated for the prize in 2013 but did not win; she was renominated in March 2014. In October 2014, at age 17 Malala Yousafzai became the youngest person to receive the Nobel Peace Prize.

Y. Nivethan - 2018 Bio

Discipline and Good Manners for a Better Society

Discipline and the good manners should be the key words in every home for the child to acquire these two qualities. It's the responsibility of every parent to lead a disciplined life with a loving consideration not only for their children but for others also. Children as we all know usually follow in their parent's footsteps. So, a father and mother can only make a world full of disciplined citizens.

Parents should see that discipline is strictly adherent in the homes too, for slackness and even a wee bit of indifference on the part of the parents can make the child take the wrong turn become a menace not only at home but also outside as well.

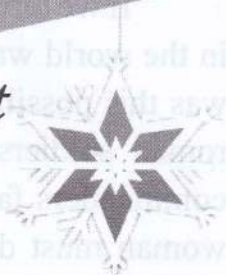

As the child grows up, he moves out into a different environment and that is the school. Here, while increasing his knowledge on various subjects the schools are also imbibe him the importance of discipline and good manners. But is the discipline maintained in all the schools? Isn't it a sorry state of affairs, that in many of leading school discipline has become a by-word, so much so, that unruliness and drug abuse have become the order of the day, and good manners seem to be on the wane. But, I am really proud and happy to say that our institution has always maintained a high standard of discipline.

The human society cannot live if its members are not amenable to good discipline. Discipline is of vital importance in all spheres of life. If everyone were to act according to his or her whims and fancies will there not be universal chaos?

If we turn back the pages of history we see that the strongest empire in the world was the Roman Empire which lasted over 500 years. How was this possible/ it was the disciplined behavior and obedience of the roman soldiers that ensured their great success. They obeyed their commanders faithfully and were loyal of their country. Every man and woman must do their duty perfectly. He or she must have a sense of responsibility. Nowadays a thank you or a don't mention or a please is a rare word to hear from children as well as adults. Many children think that it's not necessary to be polite. They don't realize how other people would be affected by their lack of good manners. For example when someone gives you a helping hand when you are in difficulty and you forget to express your gratitude to him or her they will feel unhappy. The younger generations do not obey the elders nowadays. They treat elders very badly. This will lead to a bad society.

The discipline and the good manners must be taught to everyone from child age to old age. This is merely a responsibility of the whole society to build a generation full of good mannered citizens.

Why You Should Respect A Teacher

You must have seen a man or woman dressed elegantly walking or running fast towards the bus stop. In one hand maybe carrying a bag full of notebooks or a big folder with assessment reports she made last night. Yes you got it right; she is the teacher, a rare species which is on the verge of extinction. She is somebody with whom your child spends major part of his day; she is the one who ties his shoelaces when you are not around. She is the one who feeds them with her hands and holds them when at times they fail. A teacher is the one person who has tried 100 ways to get that wrong habit off your son and then her 101st step was to seek your help.

I have been a teacher and observed many teachers closely, and today when India celebrates its teachers day, I want to share my insight about how I truly believe a teacher commands respect for what they are doing for the society.

They are Givers

A teacher is a true symbol of giver; they give all they can to your son or daughter. They give their time, their care, their knowledge. And they give it with patience, love, commitment and honesty. A teacher is like that preen fountain which will inspire your child with undiluted modesty forever. Take a look into a teacher's heart and you will find ample love for your child. A teacher will always want your child to flourish in life and be on path of righteousness. She will feel happy in all stages of life to meet your child and truly bless them.

They are knowledge bank

A teacher studies 6 hours to teach for 30 minutes in his classroom. He will burn midnight oil preparing lesson plan, assessment sheets, evaluating his papers, preparing for remedial classes tailor made according to your child. A teacher commands our respect because they spend extra hours in library to prepare wonderful notes. He is on constant look out for things he can share in his classroom. He will teach your child to be a knowledge seeker. He will make him curious first and then answer to

their silly questions. A teacher loves to be beaten by his students' answers. A teacher spends his life giving answers to thousands of silly questions asked ever from any human being.

They are super human beings

A teacher has to be smart, knowledgeable , charismatic personality , techno savvy , witty , fit and fine . Do you know why your child says every time you teach him something "my teacher said so " Because a teacher thrives to come up to his expectations every day . One of my student's once went home and said to his mother, mummy please learn to wear sari like my madam . It was the best compliment I ever got for my saree draping skill. A teacher is always under scanner. They do not smoke, drink or misbehave in front of your child . A teacher will never be found gorging on fast food at the tuck shop in market corner. A teacher will never say "No he doesn't know this", He will instead say "Let's find the answer and share it tomorrow in the classroom ". He will reward the best answer and appreciate all the honest efforts. He will learn to jazz,sing , play a piano , carve a wooden block and do all that he can to be your child's real mentor .

They never fall sick during final exams

We all should consult a teacher when suffering with cold , cough , laryngitis , fever (biggest enemy of a teacher) . A teacher is a half doctor when it comes to these minor but very painful ailments . Imagine a teacher who is suffering with severe cough ,shouting at top of her voice in the classroom . she deserves respect when she drinks a luke warm water even in summer , to soothe her throat . A teacher is a human being too , but she cannot fail to prepare your child's report card on the Open day . Do we recall any teacher coming up with an excuse , "I could not meet the deadline and so please postpone the PTA meeting by one week " . A teacher fails to have such luxuries . A child will never come home and say my teacher is absent because she is on a vacation to Singapore or Bali maybe . A teacher knows the value of time , for the sake of your child .

A teacher teaches your child to be the Doctors , Engineers , Architect, but not a Teacher

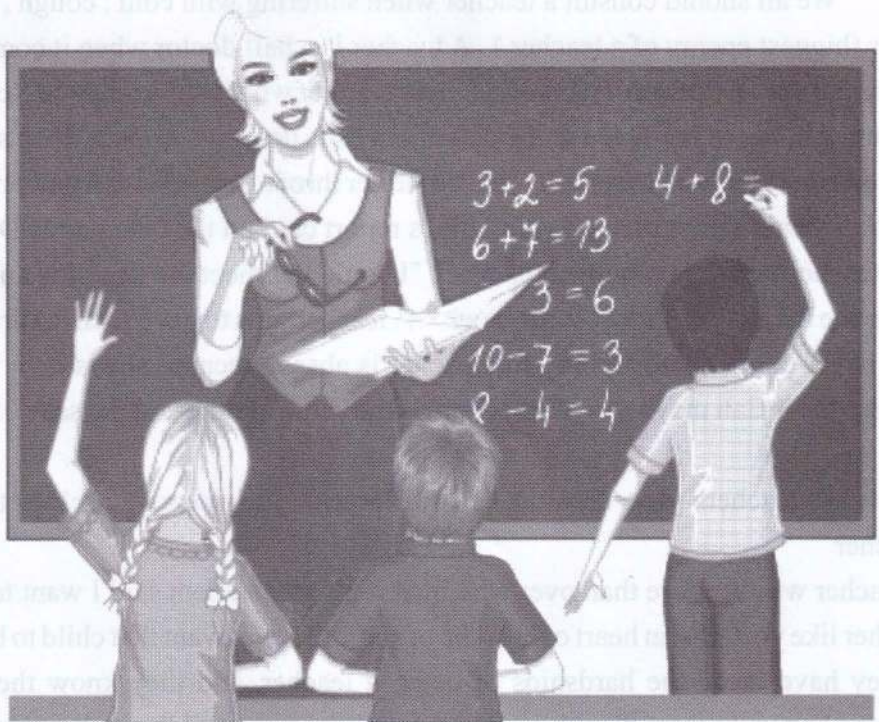

A teacher will be more than over whelmed if his any student said I want to become a teacher like you . But in heart of heart he or she will never want that child to be a teacher . They have faced the hardships of being a teacher, and they know their students deserve better avenues than this . Be respectful to your child's teacher that they don't

groom your child to be a teacher , who will have no savings , no perks of a job done , no gratitude , no social status , no accomplishment .

A teacher Builds the culture

A teacher not only teaches history or literature but imbibes our true culture in our students . A child learns the lessons of life together with academics . He learns to appreciate poetry together with charms of science . He know the value of physical education together with importance of morning prayer and assembly . A teacher like a moson puts a brick in the strong foundation of society . We should be respectful that they are the rare community who work relentlessly towards a stronger nation .

Respect a teacher and trust her at times she may get tough on your child . There may be exceptions but a teacher always wants the best for her students . A teacher complained about your child and you truly abhorred it , but think it was the last resort to her as he tried all the ways to mend the flaw . Cooperate with her at times , she is just a guide and cannot brain feed your child . A teacher needs your assistance , help her during school annual function and cooperate with her . Teaching is not a hobby , to kill time .Teaching is something which leaves no time for her hobby . A teachers commands your time .

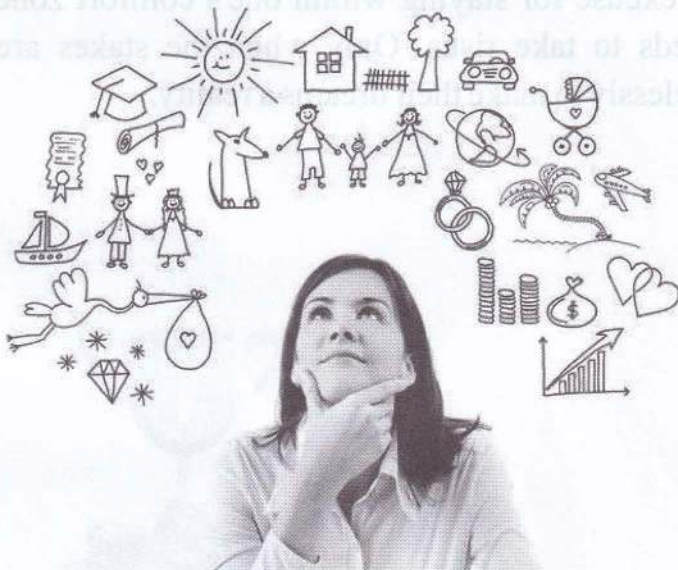

"Dreaming Big is The First Step to Success"

"Shoot for the moon. Even if a person misses, he will land among the stars". In reality,

we have many dreams, but we may not achieve all our goals because of certain constraints. So, it is important to dream big so that even if we don't achieve our goal, we will fall somewhere near our goal. When one dreams big, he

does not put any restriction on himself. There are no limits to one's dreams. Dreams are what differentiate great people from ordinary people. Ordinary people only dream about what they can achieve. Hence, they can never carry out extraordinary tasks.

Successful people dream big, even if the goal may seem extremely difficult to achieve. Mahatma Gandhi dreamt big about an independent India. At that time, people did not believe in his dream because it seemed unachievable. However, he was determined and never gave up. Because he dreamt big, he managed to reach his goal.

Successful businessmen also think and dream big. The founder of Infosys, Narayanamurthy, had humble beginnings. He was not born with a silver spoon, yet he dreamt big of being the CEO of India's largest

software company. Although he did not have funds to establish a business initially, he and his family worked hard to make his dream a reality. This is the power of big dreams. As the saying goes, “When there is a will, there is a way”, similarly, once an individual sets a big goal, he is bound to gather his resources and work hard to attain success.

Even though the world may laugh at people who dream big, it is not an excuse for staying within one's comfort zone. To be successful, one needs to take risks. Only when the stakes are high do people work tirelessly to make their dreams a reality.

The Greedy Dog

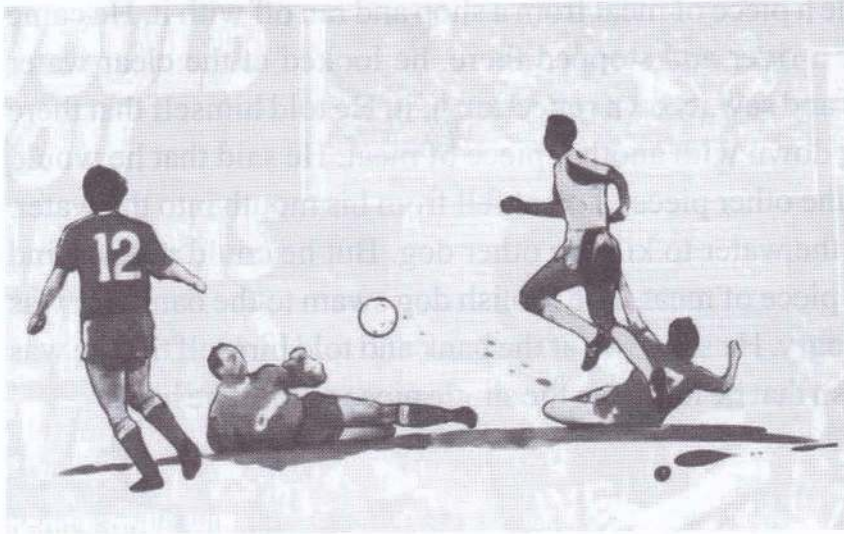

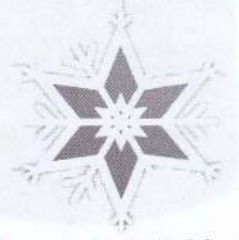

A dog stole a piece of meat from a shop and ran off with it. He came to a bridge over a river and stopped there. He looked at the clear water under the bridge and saw its own reflection in it. He told himself that there was another dog down with another piece of meat. He said that he would kill him and get the other piece of meat fell from his mouth into the water. He jumped into the water to kill the other dog. But he could neither find him nor his own piece of meat. The foolish dog swam to the bank. He was sad, tired and hungry. He sat down at the bank and told himself that he was greedy and foolish that he lost even the single piece of meat he had.

Don't be greedy

Foot Ball

While football traces its origins to rugby and soccer, the unique history of American football has resulted in a game that substantially differs from

its predecessors. As such, even those who are familiar with rugby and soccer might find football difficult to follow. Although a short summary might not sufficiently cover the intricacies of football, knowing its basic rules and goals can help you to develop a deeper understanding of the game.

The Field

Measuring 100 yards long by 53 yards wide, the boundaries of a professional football field are indicated by white lines at the edges. A white line is drawn across the field at each 5-yard mark, with small white lines drawn along each side of the field at every 1-yard mark between these. At each end of the field is an end zone, a 10-by-53-yard scoring area. The goalposts, or "uprights," are placed in the middle of the outer boundary of each end zone, measuring 10 feet high at the lowest point and 18 feet 6 inches wide, with 30-foot-high upright posts on each side.

Teams and Offense

Each team fields 11 players at a time, with the offensive team attempting to advance the ball down the field and the defensive team trying to prevent this. The offensive side revolves around the center, who snaps the ball back to start play, and the quarterback, who receives this snap and either runs, hands the ball to another player or passes the ball down the field. The remaining players are two offensive guards and two tackles, who defend the quarterback from the defensive line, and a varying number of wide receivers, who attempt to catch passes; running backs, who take the ball from the quarterback and run; and tight ends, who can both block the defense and catch passes.

Defense

The defensive side is composed of different numbers of linebackers, defensive ends and defensive tackles, all attempting to block runs and passes or break through the offensive line to tackle, or "sack," the quarterback before he releases the ball. The remaining players are cornerbacks and safeties, who follow offensive players down the field to prevent runs, block or intercept passes and try to force runners to "fumble," or lose possession of the ball.

General Rules of Play

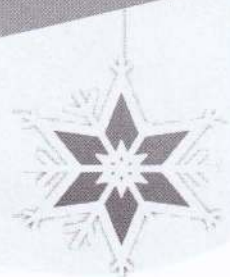

The game is divided into four quarters, each measuring 15 minutes in length. Each half of the game begins with a kickoff, with one team kicking the ball up the field from its own 30-yard line and the other attempting to catch and run with the ball as far as possible. If the kick receiver is tackled or goes out of bounds, a first down is called. The offensive team must then advance the ball 10 yards for a new first down. If it cannot do this by the fourth down, possession automatically goes to the defensive team. Typically, however, the offensive team will "punt," or kick the ball up the field after the third down.

Scoring

If the offensive team is able to either run or pass the ball into the other team's end zone, it is credited with a touchdown and awarded 6 points. This is followed by an extra point attempt from the defending team's 2-yard line, with a kick through the uprights adding 1 point and a run or pass into the end zone adding 2 points. Also worth 2 points is a "safety," which occurs if the player with possession of the ball is tackled in his own end zone. If the offensive team wishes to add points without reaching the opposing team's end zone, its "special teams" may be called in to attempt a field goal. A field goal attempt is aimed at kicking the ball through the opposing team's uprights from a distance. If successful, it is worth 3 points.

Life!

Look after – Taking care

The nurse looks after the old patient kindly

Give up – Stop trying

He promised me to give up smoking

Throwing away – Discard something

Throwing away plastics and polythene cause pollution

Figure out – Finding a solution

As the question is very difficult, I could not figure out the answer

Run after – Chasing

The police man started to run after the thief

Looking for – Trying to find

I am looking for my old shoes which I put here last month

Move in – Taking possession

His family moved in their new house in London

Run away – Escaping from a place

Peter ran away from home because of a misunderstanding with his father

Washing up – Cleaning the things

Mother is in the kitchen washing up the dishes

Hangs out – Spending time socially

His hangouts with his friends during the weekends

English Idioms

- Barking dogs seldom bite
- Fire is a good servant but a bad master
- All that glitters is not gold
- Two hands are better than one
- Prevention is better than cure
- A rolling stone gathers no mass
- Empty vessels make the most noise
- There is no smoke without fire
- Look before you leap
- Every cloud has a silver lining

Is it Love!

In those blue valleys
Where the breeze shows its wonder
Where the sky bends And touches
Fallen in your sweet smile – my love
 Fallen in your countless expressions
Still thinking is it love?

Is it love???

Like a snowflake that dazzles day and night
You drench my soul bringing sweetness
Can even die for that single glance
Through corner of the eye – stealing my heart
Falling again and again in your eyes
Still emerging out is it love?

Is it love???

I've always thought of saying it
This feeling's so pleasant
This unbearable torture of love
Forgetting my existence – in your beauty
Still wondering is it love?

Is it love???

My life leaves me
At your sight
Am suffering and begging you
Give me a place your heart my love

To protect you more than your eyelids
Oh my dear!
You are the never played music
Come to me my darling
To change into a version of you
Do you hear my words
My heart speaks...

To hold your soft hands with mine
To walk with you by your side forever
My heart still yearns for this to happen
My baby, the apple of my eye
Won't you say it
Won't you give yourself to me.....
This one birth is not enough,
Even seven more won't be enough,
Won't you read through my heart?
Oh god make my girl

Understand this love – pure like a snow
Understand the love of SP.....

"It is always more difficult to fight against faith than against knowledge."

- Adolf Hitler

One of the very important characteristics of a student is to question. Let the students ask questions.

- A P J Abdul Kalam

Look at the sky.
We are not alone.
The whole universe is friendly to us and conspires only to give the best to those who dream and work.

- A P J Abdul Kalam

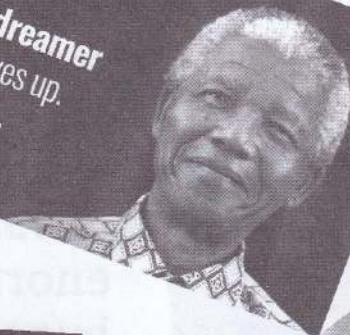

There is nothing either good or bad, but thinking makes it so.

(HAMLET: ACT 2, SCENE 2, PAGE 11)

A winner is a dreamer who never gives up.

- Nelson Mandela

If you judge people, you have no time to love them.

- Mother Teresa

Strong people are often those whom the noisy world hears least.

William Wordsworth
