## ADMINISTRATION REPORTS,

### 1919.

#### PART I.—CIVIL.

#### WESTERN PROVINCE.

##### ADMINISTRATION REPORT OF THE GOVERNMENT AGENT, WESTERN PROVINCE, FOR, 1919.

Area of the Province, 1,432 square miles.

Population, 1911, inclusive of Colombo Town, 1,106,321.

Population, exclusive of Colombo Town, 895,046.

Area of Colombo District, 808½ square miles.

Population, inclusive of Colombo Town, 826,828.

Population, exclusive of Colombo Town, 615,554.

##### I.—OFFICIAL CHANGES AND EVENTS CONNECTED WITH THE KACHCHERI.

THE writer administered the Province during the year 1919. Mr. C. V. Brayne was in charge of the Kalutara District till May 29, 1919, when he proceeded on furlough, and Mr. T. A. Hodson succeeded him.

Mr. A. P. Boone was appointed Assistant Government Agent, Colombo, and Office Assistant on December 2, 1919, when Mr. G. S. Wodeman took up duties as Assistant Government Agent, Nuwara Eliya.

Mr. P. Saravanamuttu was appointed as Cadet and attached to the Colombo Kachcheri on August 4, 1919.

Celebrations in connection with the conclusion of Peace were observed throughout the district with great rejoicing and enthusiasm. The programme of events included the feeding of the poor and the distribution of clothes, processions of school children, the singing of the National Anthem, native music and dancing, decorations, illuminations, and fireworks, and the passing of loyal resolutions.

His Excellency the Governor visited Moratuwa in July and opened the Agri-Industrial Show, in September he paid a visit to Negombo town and its vicinity, and in November made excursions to Henaratgoda and Avissawella. The new bi-lingual school at Hanwella was opened by His Excellency on his way to Avissawella.

##### II.—REVENUE AND EXPENDITURE.

The revenue collected at the Colombo Kachcheri during 1918-19 was :—

|                                 | Rs.       | c. |
|---------------------------------|-----------|----|
| Exclusive of land sales .. .. . | 4,596,341 | 16 |
| Land sales .. .. .              | 64,187    | 67 |
| Total .. .. .                   | 4,660,528 | 83 |

as against Rs. 4,244,202·10 in 1917-18. The total expenditure in 1918-19 was Rs. 159,738·21, as against Rs. 145,165·25 in 1917-18.

##### III.—CONDITION OF THE PEOPLE.

The condition of the people showed no great improvement during the year owing to the shortage of imported rice and the partial destruction of the paddy crops by floods in the latter part of the year. The re-opening of the factories dealing with coconut produce, however, gave employment to a large number of people and greatly relieved the situation.

*Food Supply.*—The shortage of rice and other foodstuffs and the increase in their prices were greatly felt by the people. It became necessary for Government to undertake and control the importation of rice and to regulate the price at which it was sold. The control—at first of a comparatively simple nature—gradually developed into a rice card system, and has, on the whole, worked remarkably well. The difficulties with regard to food had the natural result of stimulating interest in its production, and a Food Production Committee for the district and sub-committees for each peruwa were organized, and have done a fair amount of useful work in clearing elas, &c., and in encouraging cultivation. It was decided to allow villagers to plant up about 850 acres of exhausted railway reserves in Hapitigam korale

with chena produce on re-afforestation agreements, and about 600 acres were cleared during the year and cultivated with various kinds of foodstuffs. The supply of fish was fairly abundant, but the prices were high.

*Industries.*—The coconut industry was in a very flourishing condition, nuts reaching the unprecedented price of Rs. 120 per thousand during the latter part of the year. There was no market for plumbago, and the rubber market remained dull. Cinnamon was in fair demand. The minor industries began to recover to some extent from the depression that had prevailed during the war. A fine exhibit of lace and needlework was sent to the Women's Work Exhibition at Madras and was much admired.

#### IV.—HEALTH OF THE PEOPLE.

Health conditions were, on the whole, satisfactory. Although influenza was widely prevalent, it was not of the virulent nature characteristic of its first appearance, except in the Hewagam korale, where relief had to be given to many families. There were sporadic cases of enteric, chickenpox, dysentery, and measles.

In connection with anchylostomiasis, latrine installation work was carried out in the whole district, and especially in Henaratgoda, Avissawella, Kesbewa, and Minuwangoda areas, where a campaign for the near future has been planned. The number of latrines erected in the Colombo District was 5,220, as against 2,414 in 1918.

#### V.—HEALTH OF CATTLE.

The cattle in the district suffered from a severe outbreak of rinderpest. The first case occurred in January, and the largest number of cases was recorded in October. The total number of cases was 2,849, of which 1,904 proved fatal. The Government Veterinary Surgeon detailed Stock Inspectors for service in the district in this connection, and these were assisted by the Sanitary Officers and by the local headmen.

In the latter half of the year a small Committee was appointed by Government to deal with the situation, and joint action was taken by the Municipality and the Revenue Officer; at the end of the year the outbreak appeared to be well in hand.

Many sporadic cases were found to have received the infection in Colombo, where the disease continues to prevail, despite the strenuous efforts of the Municipal Veterinary Surgeon to combat it. There can be no doubt that with a more satisfactory system of quarantine and inoculation the periodical havoc in the numbers of the cattle, and especially of the buffaloes, which are in great demand for paddy cultivation, could be almost entirely prevented. The whole question is being dealt with by the Committee above referred to.

Hoof-and-mouth disease was also prevalent during the year.

#### VI.—DISTRICT SCHOOL COMMITTEE, COLOMBO.

During the year the Rev. H. Binks and the Rev. Fr. J. Brault resigned their seats on the Committee, and their places were taken by the Rev. R. Lamb and the Rev. Fr. J. Jamoays. Dr. C. A. Hewavitarne and Mr. W. Dias Bandaranayaka replaced Dr. W. A. de Silva and Sir S. Dias Bandaranayaka, who left the Island temporarily. Three meetings were held.

The following permanent buildings were completed, viz, the Essella girls' school and the Kiriwattuduwa boys' vernacular school, as also an Anglo-vernacular school at Hanwella. The last mentioned is a very fine building, and the teachers' quarters, built separately from the school, are an improvement on the old type plan.

Boys' vernacular schools on the semi-permanent type plan were erected at Danowita and Buthpitiya.

Permanent latrines were constructed at Pasyala, Kumbaloluwa, and Udugahawalpola boys' vernacular schools, and at Bomiriya bi-lingual school.

The compounds of the boys' vernacular schools at Ellakala and Galahitiyawa were fenced, and a well was sunk at Urapola boys' vernacular school.

All the schools in the district were kept in good repair.

Sites were acquired for a girls' vernacular school at Pasyala, and for a mixed vernacular school at Waragoda, and for boys' vernacular schools at Heenkenda and Jaltara.

There are a fair number of very creditable school gardens in the district.

The question of the education of Moorish children was taken up during the year, and Muhammadan school buildings were provided at the expense of the respective villagers at Kammaltara, Galoluwa, Hunupitiya, and Mabola. Steps are being taken, with the co-operation of the villagers, to open similar schools in Siyane korale west and Siyane korale east.

During the latter part of the year the average school attendance fell off badly owing to the prevalence of influenza, and a considerable number of schools had to be closed for some weeks.

Contracts were entered into for the construction of Piliyandara bi-lingual school; for vernacular schools for boys at Magalegoda, Mabodale, Kananpella, and Jaltara; for mixed vernacular schools at Deltara and Waragoda; and for vernacular schools for girls at Magalegoda and Mabodale.

There are now five bi-lingual schools, twelve mixed schools, eighty boys' schools, sixty-four girls' schools, and two infant schools.

The following statement shows the revenue and expenditure for 1919:—

| REVENUE.                               |         |    | EXPENDITURE.            |         |    |
|--|---------|----|-------------------------|---------|----|
|  | Rs.     | c. |                         | Rs.     | c. |
| Balance on December 31, 1918           | 33,987  | 6  | Construction            | 30,404  | 0  |
| Fines                                  | 3,920   | 5  | Wells and fences        | 913     | 95 |
| Village Committee contributions        | 11,735  | 28 | Repairs                 | 7,466   | 44 |
| Annual Government grant                | 19,786  | 33 | Printing and stationery | 398     | 87 |
| Special Government grant for buildings | 75,000  | 0  | Purchase of sites       | 2,919   | 4  |
| Special grant for a pottery school     | 500     | 0  | Salaries                | 3,839   | 0  |
| Miscellaneous                          | 423     | 65 | Miscellaneous           | 463     | 11 |
|  |         |    |                         | 46,404  | 41 |
|  |         |    | Balance                 | 98,947  | 96 |
| Total..                                | 145,352 | 37 | Total ..                | 145,352 | 37 |

## VII.—VILLAGE COMMITTEES.

The total revenue amounted to Rs. 84,970.59 in 1919, as compared with Rs. 81,604.26 in 1918. The expenditure was Rs. 70,667.89 in 1919, as compared with Rs. 110,011.88 in 1918. The decrease in the expenditure was due to the fact that some of the Village Committee works given out on contract were not completed, and were consequently not paid for during the year. The delay in the completion of these works was due to floods and the scarcity of labour resulting from the food conditions which prevailed during the year.

In addition to the usual repairs to roads, bridges, and buildings, the following works were carried out, viz.:—(1) The construction of an additional length of 660 feet of the Palliyawatta-Lansiyawatta road; (2) the construction of an additional length of 530 feet of the Pamunugama-Kepungoda road; (3) a Village Tribunal building at Honnantara; (4) a pit latrine at Gangodawila. The construction of a temporary Village Committee market at Galahitiyawa was commenced, and the deviation of the Pitumpe-Waga road was nearly completed. The bridge on the road from Batuwandara-Moraenda was opened for traffic. Signposts were erected on several roads which are passable for ordinary vehicular traffic. Almost all the village burial grounds were kept in fair order. The question of providing more burial grounds in the villages is engaging the attention of the Committees, and land for burial grounds at Wattadara, Kossinna, and Migahawatta has been acquired.

## VIII.—COLOMBO DISTRICT SANITARY BOARD.

The members of the Board were the Government Agent, the Provincial Engineer, the Provincial Surgeon, and Messrs. W. Dias Bandaranayaka, T. H. A. de Soysa, and C. Namasivayam. Three meetings were held during the year. Fair progress was made during the year in the twenty-five small towns administered by the Board, as will be seen from the following particulars:—

*Avissawella*.—The construction of the town waterworks by the Public Works Department is progressing, and it is anticipated that they will be completed early in 1920. A trenching ground was acquired by the Board, and an approach road leading to it was constructed. Scavenging was carried out satisfactorily, and the conservancy of the public latrine and several private bungalows was attended to efficiently.

*Puwakpitiya*.—Scavenging was carried on as usual. A conservancy system was introduced and dealt with the public latrine and several private latrines.

*Padukka*.—The improvements to roads in the town were continued in 1919. A number of new houses of an improved type are being built by the residents. The market is in a flourishing condition. Scavenging was carried out satisfactorily.

*Hanwella*.—The supply of water to the residents from the Labugama main was continued during the year. The Provincial Road Committee built a fine approach road with side drains and pavements to the ferry, whilst the District School Committee constructed a fine bi-lingual school. These improvements have greatly added to the appearance of the town. Scavenging was carried on efficiently.

*Gampaha*.—Two conservancy lanes were opened during the year, and have proved a great convenience. A further portion of the swamp was filled up. A small piece of land adjoining the market site was acquired for the extension of the market, which continues to flourish. Scavenging was carried out satisfactorily. The public latrine and several private latrines were efficiently conserved. All roads were maintained in good order. The opening up and widening of the roads has been followed by the erection of several fine new buildings by private parties.

*Ja-ela*.—Another section of drains on the main road was built during the year. The market is very popular with the people. Scavenging was attended to satisfactorily. The public latrine and several private bungalows were conserved by the Board.

*Peliyagoda*.—A public latrine and well were provided during the year, and a portion of the low-lying land at the market place was filled up. Scavenging was attended to as usual. A conservancy system was introduced from the beginning of 1920. Steps are being taken to acquire a site for a trenching ground.

*Veyangoda*.—A further section of the drains on the main road was constructed during the year. Scavenging and conservancy were carried on satisfactorily. The market continues to increase in popularity. The water supply worked well, and is much appreciated by the people.

*Pugoda*.—Scavenging was done satisfactorily during the year.

*Kochchikade*.—The market was well patronized. A further portion of the market premises was levelled and a water service was installed. Scavenging and conservancy were attended to in a satisfactory manner.

*Piliyandara*.—The necessary land for roading a further area of this small town was acquired. The section of road leading from the Moratuwa road to the circus near the site of the public park was opened up. Scavenging and conservancy were duly attended to. Two new shops were built by the Board in connection with the market. The water supply was kept in satisfactory condition. The market continues to be very well patronized.

*Mirigama*.—Scavenging and conservancy were carried on satisfactorily.

*Mount Lavinia*.—A public slaughter-house, an exposure shed for cattle, and a new latrine of two compartments were built on the Karagampitiya market site during the year. The scavenging staff was increased and worked more efficiently. Conservancy on the dry-earth system was applied to a further area during the year. The roads were maintained in fair order.

*Kirillapone-Nugegoda*.—A public latrine and a well were provided during the year. Conservancy will be started next year. A commencement was made with the improvement of the triangular space in front of the railway station.

*Egoda Kolonnawa*.—Two new boutiques were built at the Wellampitiya junction on the new road alignment during the year. A temporary market, which is nearing completion, will be opened early next year. The Public Works Department, in co-operation with the Board, is taking steps to build the drains at the junction, which will greatly improve the town. Scavenging was done satisfactorily.

*Waga*.—Scavenging was carried on in a small scale. The market was maintained in good order.

*Kosgama.*—The public well was nearly completed. A new market was built by the Board. Scavenging was carried on in a small scale.

*Kelaniya.*—A great step in advance was made by the acquisition of the land required for the town improvements. The reconstruction of the Dalugama road and of the approach road to the temple was at once started, and made satisfactory progress. Scavenging was attended to efficiently.

*Homagama.*—A small public latrine was built in the market premises for the convenience of the large number of people who assemble here weekly. The new road to the resthouse site has greatly improved the appearance of the town. Scavenging was carried out as usual.

*Kandana.*—The scavenging service worked efficiently.

*Wattala-Mabola.*—A boutique was built by the Board at the public market. Steps were taken to acquire a piece of land for a trenching ground. Scavenging was carried out in a satisfactory manner. The market was maintained in good condition.

*Cotta.*—A new market, slaughter-house, and boutiques were built during the year. Scavenging and conservancy were duly attended to.

*Welikada-Nawala.*—A trenching ground was acquired in 1919. Conservancy and scavenging were carried out satisfactorily. The market and the market water supply were maintained in good repair. The roads were kept in fair order.

*Siduwa.*—A new boutique was built by the Board at the market premises. The work of scavenging the town received careful supervision.

*Diulapitiya.*—A slaughter-house was constructed. Scavenging was carried out satisfactorily. A section of drains was built on the main road to Mirigama.

From the above it will be seen that scavenging is now carried on in all the twenty-five small towns. Its efficiency is being increased wherever possible. Conservancy systems have been introduced into eleven of the small towns, and are being rapidly extended. The public latrine at Homagama market is conserved by the market renter. Conservancy will be undertaken at Peliyagoda and Nugegoda in 1920. The conservancy system at Mount Lavinia is already on a fairly large scale, and is growing very quickly. The supply of drinking water to the towns continues to receive careful consideration. The erection of public latrines is also being pushed on as rapidly as the very limited funds of the Board permit.

A marked improvement is visible in the standard of private buildings, and much greater attention is being paid to the provision of properly constructed wells and latrines. Much greater cleanliness is also apparent in the bakeries, laundries, dairies, and eating houses which are now under supervision. During the year the building applications dealt with numbered 1,676, of which 1,335 were in respect of new buildings and 341 in respect of alterations. A large proportion of the new buildings were latrines.

#### IX.—LOCAL BOARDS AND ROAD COMMITTEES.

Annexed to this report will be found appendices dealing with the Local Boards of Negombo, Moratuwa, and Minuwangoda, the Provincial Road Committee of the Western Province, and the District Road Committee of Colombo.

#### X.—VILLAGE TRIBUNALS.

The number of cases pending on January 1, 1919, was: Civil, 117; criminal, 508. The number of cases instituted in the district during the year was: Civil, 2,605; criminal, 14,703, making a grand total of 2,722 civil and 15,211 criminal cases to be disposed of. At the end of the year 44 civil and 311 criminal cases were pending. In 230 cases appeals were lodged. The Government Agent set aside the judgments of the Presidents in 39 cases. From the Government Agent's decisions there were 13 appeals to the Governor in Executive Council. Two of these were successful.

There has been an increase over 1918 in the number of cases in respect of lands, cattle trespass, petty thefts, and cattle disease.

The number of amicable settlements was: Civil 574 and criminal 2,428, as compared with 601 civil and 3,052 criminal in 1918.

#### XI.—DOG REGISTRATION.

There was a considerable decrease in the number of dogs registered, the number being 16,930, as against 17,395 in 1918. The number of collars sold was 9,840, as compared with 13,241 in 1918. The most marked falling off was in Siyane korale west.

There are five dog seizers in the district. 3,881 dogs were destroyed during the year, as against 2,103 in 1918.

Instructions have been issued to the Mudaliyars to exercise closer supervision over this important work. The system of registration in the Kachcheri has been improved to ensure better results in future years.

#### XII.—IRRIGATION.

The amounts recovered and spent during 1919 on account of the following works were:—

|                             | Amount recovered. |    | Amount spent. |    |
|-----------------------------|-------------------|----|---------------|----|
|                             | Rs.               | c. | Rs.           | c. |
| Boralesgomuwa tank .. .. .  | 28                | 62 | 40            | 0  |
| Kadurugaha tank .. .. .     | 66                | 66 | 60            | 0  |
| Polgaha tank .. .. .        | 78                | 15 | 40            | 0  |
| Dikmaga Pahala tank .. .. . | 50                | 63 | 40            | 0  |
| Dikmaga Ihala tank .. .. .  | 37                | 52 | 39            | 7  |
| Kotugoda anicut .. .. .     | 140               | 10 | 148           | 34 |
| Peliyagoda sluices .. .. .  | 19                | 84 | 10            | 0  |

The balance to the credit of the Irrigation Fine Fund (minor works) on December 31, 1919, was Rs. 433.11.

The scheme to divert flood water from the Ja-ela and the Kelaniya river from the extensive tract called Mutturajawela is being investigated by the Irrigation Department. Two other matters requiring early attention are the clearing of rank vegetation in the Kalu-oya in Alutkuru korale south and the Rambara-ela in Salpiti korale.

A considerable amount of good work has been done by the Peruwa Food Production Committees in the way of clearing channels, repairing bunds, &c.

### XIII.—(a) LAND SALES AND LEASES.

The number of lots sold in the Colombo and Negombo Districts during 1919 was seventy, comprising 45 acres and 39 perches, the amount realized was Rs. 56,074·95, the average price per acre being Rs. 1,239·40. Thirty-seven lots were settled at half-improved value, the extent being 42 acres 2 roods and 35 perches, and the amount recovered Rs. 4,847·84. In respect of twelve lots certificates of no claim by the Crown were granted, the area dealt with being 20 acres 1 rood and 31 perches.

The following return shows the extent of land purchased by, and leased to, Europeans and natives respectively in the Western Province during the year :—

|                                  |   | Sales.       |         |    |    |           |
|----------------------------------|---|--------------|---------|----|----|-----------|
|                                  |   | No. of Lots. | Extent. |    |    | Amount.   |
|                                  |   |              | A.      | R. | P. | Rs. c.    |
| <i>Europeans.</i>                |   |              |         |    |    |           |
| Colombo and Negombo Districts .. | 3 | ..           | 4       | 0  | 22 | 34,285 93 |

|                |     |              | Extent. |    |    | Amount.   |
|                |     |              | A.      | R. | P. | Rs. c.    |
| Grand Total .. | 200 | ..           | 1,218   | 2  | 6  | 93,383 60 |

Besides the above, leases of the following lands in the Colombo District for the production of food on special terms sanctioned by Government were granted :—

(a) Irrigable Land for Paddy Cultivation.

| Lot.  | A.  | R. | P. |
|-------|-----|----|----|
| 41 .. | 183 | 3  | 17 |

(b) High Land for the Production of Foodstuffs.

| Lot.  | A.  | R. | P. |
|-------|-----|----|----|
| 61 .. | 374 | 1  | 12 |

(b) LAND ACQUISITION.

The total area acquired during the year was 89 acres 2 roods and 29·21 perches at a cost of Rs. 445,760·37. The heaviest acquisitions were in connection with the Oil Installation Depot at Kolonnawa and the Harbour Railway connection. Lands were also acquired within the Local Board limits of Negombo and Moratuwa for new roads, and there were several small acquisitions for the Public Works Department and the Sanitary Board towns.

XIV.—FOREST ADMINISTRATION.

The forest revenue of the Province amounted to Rs. 20,039·42, as against Rs. 20,321·61 in 1918-19. A sum of Rs. 707·85 was recovered by the Forest Department as compensation for timber felled illicitly and Rs. 102 by this Department. Four cases were instituted by the Assistant Conservator of Forests, in which 11 persons were involved, of whom 8 were convicted and fined Rs. 490·50. Twenty-three offences were reported by the Mudaliyars. With regard to 7 of these, prosecutions were entered by this Department, and in all of these cases the accused were convicted and fined Rs. 112; 11 were dealt with by departmental fines; and in 5 the accused were reported unknown, and the timber was sold by public auction and the proceeds credited to revenue.

XV.—PUBLIC WORKS.

The following are a few of the more important works carried out in the Colombo District in 1919 :—

- |  |  |
|--|--|
| <ul style="list-style-type: none"> <li>(1) Dispensary and kitchen, new Lunatic Asylum, Angoda.</li> <li>(2) Clerks' and overseers' quarters, new Lunatic Asylum, Angoda.</li> <li>(3) Additions and alterations to Training College.</li> <li>(4) New east wing, Training College.</li> <li>(5) Temporary offices and stores to the Survey Department at Headquarters, Colombo.</li> <li>(6) Elementary school on Technical School site.</li> <li>(7) Improvement to Lady Havelock Hospital.</li> <li>(8) Additions and improvements to Law Courts buildings at Hultsdorp.</li> <li>(9) Additional accommodation, De Soysa Lying-in Home.</li> <li>(10) Raising Dematagoda bridge.</li> <li>(11) Clearing jungle on the site of new Government Dairy and taking levels.</li> </ul> | <ul style="list-style-type: none"> <li>(12) Provision of latrines to Public Works Department cooly lines.</li> <li>(13) Improving Ratmalana-Attidiya road.</li> <li>(14) Erecting new Government Dairy at Nara-henpita.</li> <li>(15) Surveying and levelling 23rd and 24th miles, Kallawellawa-Beliapiya road.</li> <li>(16) New road, Padukka.</li> <li>(17) Extension, Kallawellawa road.</li> <li>(18) Land Registry, Negombo.</li> <li>(19) School for Anglo-vernacular teachers at Henaratgoda Gardens.</li> <li>(20) Constructing groynes at Duwa.</li> <li>(21) Measures for the prevention of erosion by the sea at Negombo.</li> </ul> |
|--|--|

Some of the more important wants of the district are :—

- |   |   |
|---|---|
| <ul style="list-style-type: none"> <li>(1) Widening of the Colombo-Avissawella road.</li> <li>(2) Widening of the Colombo-Negombo road.</li> <li>(3) Improving Tummodera-Puwakpitiya road.</li> <li>(4) Improving Labugama-Karardana road.</li> <li>(5) Renewing Mahola bridge.</li> <li>(6) Improving of the Ragama water supply.</li> <li>(7) New quarters for the Forest Ranger at Waga.</li> <li>(8) New Public Works Department quarters and offices, &amp;c., for the proposed new district at Veyangoda, and for the District Engineer's staff.</li> <li>(9) Widening Colombo-Galle road, from Dhiwala bridge to Mount Lavinia railway approach road.</li> </ul> | <ul style="list-style-type: none"> <li>(10) Improvement of Kelaniya station approach road.</li> <li>(11) Drainage of bazaars.</li> <li>(12) Additions and improvements to Henaratgoda court-house, or the construction of a new court-house.</li> <li>(13) Repairs to roads and culverts, &amp;c., Botanic Gardens, Henaratgoda.</li> <li>(14) Conversion of old Land Registry, Negombo, into a Post Office.</li> </ul> |
|---|---|

XVI.—RAGAMA CAMP.

The camp remained unoccupied during the year. There have been no admissions since immigration by the Tuticorin-Colombo route was suspended in May, 1917.

*Water Service.*—The water service, which also supplies Mahara Jail and the Anti-Tuberculosis Hospital at Ragama, worked satisfactorily, except for a few complaints regarding the supply to Mahara Jail. This was due entirely to the small size of the pipes laid for the service. There was no lack of water, the reservoirs being almost full throughout the year. The Public Works Department intends replacing these pipes by larger ones during 1920.

*Buildings and Grounds.*—These have been kept in good order and repair.

The boundaries of the camp grounds will be re-fenced and completed in 1920.

*Staff.*—The staff worked satisfactorily during the year.

## XVII.—POLICE.

The Western Province has a provincial police office at the Kachcheri, Colombo; district police offices at Panadure and Kalutara; twenty police stations in the Colombo District, nine in the Kalutara District, and seven in the Panadure District. There is also a Police Identification Office in the Negombo Jail.

Mr. T. P. Attygalle, Superintendent of Police, has been in charge of the Police in the Western Province from 1906, and during this period has gained the appreciation of successive Government Agents by his tact, ability, and keen devotion to duty. Mr. G. Bennett, Assistant Superintendent, Western Province, was attached to the provincial office.

In the Colombo District there was a decrease in crime under the heads of Arson, Burglary, and Voluntarily Causing Hurt with Knife, &c., but there was an increase under the heads of Cattle Stealing and Murder.

The increase under the head of Cattle Stealing was due to the shortage of foodstuffs. Cattle are now stolen, not for barter or sale, but for consumption. Detection is difficult, as the stolen animals are slaughtered immediately after the theft in the nearest jungle, and the hide, hoofs, &c., buried or thrown into a river or stream. In 1919, in the Colombo District, there were 47 successful prosecutions for possessing beef without a satisfactory excuse (Ordinance No. 9 of 1893, section 21).

With regard to murder, it may be stated that strict supervision is exercised to prevent the indiscriminate issue of gun licenses, as shooting cases are extremely difficult to detect as a rule. In the rural areas the offender is able to get away hours before a police officer arrives on the scene, as the victim is shot in most cases in an isolated place or in the vicinity of a jungle, where the offender lies concealed. Five cases of murder by shooting were reported in 1919. In two the accused were acquitted after trial, in two cases the accused were discharged by the Attorney-General, and in one the offender was not known.

In September, 1919, His Excellency the Governor, accompanied by the Government Agent, inspected the Negombo police station.

*Minor Offences.*—Special action was taken for the suppression of unlawful gaming, and the decrease in burglary is largely due to the suppression of dens where bad characters congregated. These criminals generally made up for their losses by committing burglary on the way home. Ordinances as regards the rule of the road, the prevention of rash driving, and the possession of unlicensed firearms were enforced, with good results, in 1919.

The headmen worked very well with the police; and the Mudaliyars and Presidents, without exception, co-operated with the Superintendent of Police in encouraging the headmen to patrol their villages, suppress gambling, and arrest absconders.

## XVIII.—EXCISE.

For the 1918-19 rent period there were 149 arrack taverns and 143 toddy taverns. As a result of the ballots held and of action in Advisory Committee, there are, for the 1919-20 period 113 arrack taverns and 132 toddy taverns.

In 1919 twenty-five ballots were held regarding toddy taverns, and will result in the number of taverns being reduced for the 1920-21 period by 19. A further reduction of 2 will take place as a result of action in Advisory Committee. Seventeen ballots were held regarding arrack taverns early in 1920, and will result in the closure of 11 taverns for the 1920-21 period.

## XIX.—MISCELLANEOUS.

(a) *Cattle Branding.*—24,200 cattle were branded during the year.

(b) *Laundries.*—Licenses were issued under section 16 of Ordinance No. 38 of 1908 for 136 laundries for the calendar year 1919. During the same period the Senior Sanitary Officer instituted 25 cases for using unlicensed premises; in 21 cases the accused were convicted.

(c) *Dairies.*—Licenses were issued under section 6 of Ordinance No. 38 of 1908 for six dairies, fourteen prosecutions were instituted, in all of which convictions were obtained.

(d) *Laundrymen and Dairymen.*—Twenty-nine prosecutions were entered against dairymen and laundrymen for breach of rules.

(e) *Opium.*—Thirty-two new consumers and five vedaralas were registered during the year. Eighty-three consumers died during the same period.

(f) *Burial Grounds.*—Thirty-three new burial grounds have been proclaimed as such and registered during the year. Of these, 13 are estate burial grounds, 10 denominational, and the remaining 10 communal burial grounds. There were four prosecutions for burials outside recognized areas, all of which were successful.

(g) *Administration of Estates.*—There were 63 cases in which there was a divergence of opinion between the Korale Mudaliyars and the administrators regarding the value of estates. In all of these cases the Mudaliyar's appraisement was eventually accepted, resulting in an increase in duty by Rs. 2,935, as against Rs. 1,176, in the previous year.

(h) *Pupil Midwives.*—Forty-two applications were received during the year for admission to the De Soysa Lying-in Home for training as midwives. Forty-one of these were recommended for admission.

(i) *Gun Licenses.*—The Ordinance No. 33 of 1916 is working very satisfactorily. During the year 3,017 gun licenses were renewed and 610 new licenses issued. The total number of guns in the Colombo District in 1919 was thus 3,627, an increase of 838 over the previous year. The stamp duty thereon amounted to Rs. 13,505, being Rs. 2,134.50 in excess of the amount paid in 1918.

The Kachcheri,  
Colombo, April 7, 1920.

J. G. FRASER,  
Government Agent.

## APPENDIX.

## I.—REPORT ON THE LOCAL BOARD OF NEGOMBO FOR 1919.

A COMPARATIVE statement of revenue and expenditure of the Local Board of Negombo for the years 1918 and 1919 is annexed :—

| REVENUE.                                   |            | 1918.  | 1919.     | EXPENDITURE.                |            | 1918.  | 1919.     |

## REVENUE.

*Taxes.*—The increase is due to the prompt recovery of assessment tax.

*Licenses.*—The increase is due chiefly to a larger number of motor cars kept as hiring conveyances, and an increase under liquor and gun licenses, and the fact that the revenue from trade licenses has more than doubled.

*Rents.*—The increase is due to the vegetable and meat markets being more largely patronized, and the increase under other rents to increased slaughter-house fees and Town Hall rents.

*Fines.*—There is a small increase under this head due to prosecutions against unlicensed dairy-men and for the adulteration of milk.

*Miscellaneous.*—The decrease is due to a smaller sum having been earned as interest, the amount in fixed deposit having been reduced.

## EXPENDITURE.

*Establishment.*—The increase is due to the payment of increments to the staff.

*Sanitation.*—The increase is due to a higher rate of wages paid to coolies, and to the cost of a staff employed on a campaign for the destruction of mosquitoes.

*Police Charges.*—The decrease is due to the death of the vagrant, towards whose maintenance at the Home the Board contributed in previous years.

*Public Works.*—The increase under maintenance is due to the roads in that part of the town recently included within Local Board limits requiring extensive repairs.

*New Construction.*—This amount is made up as follows :—

|   | Rs.           | c.       |
|---|---------------|----------|
| Cost of erecting latrines .. .. .                   | 6,800         | 0        |
| Cost of acquisitions and surveys .. .. .            | 24,278        | 11       |
| Cost of building a gala .. .. .                     | 700           | 0        |
| Balance cost of new cross road .. .. .              | 550           | 0        |
| Cost of constructing Fernando avenue .. .. .        | 3,200         | 0        |
| Cost of widening Green's road .. .. .               | 735           | 0        |
| Improvement to lake shore .. .. .                   | 193           | 50       |
| Munnakara street scheme .. .. .                     | 69            | 50       |
| Cost of conservancy lane, Main street .. .. .       | 100           | 0        |
| Cost of widening Cemetery and Taladua lanes .. .. . | 1,680         | 0        |
| <b>Total</b> .. .. .                                | <b>38,306</b> | <b>0</b> |

*Miscellaneous.*—The increase is due to a contribution of Rs. 500 towards the local Peace Celebrations, and a lawsuit which involved the Board, in an expenditure of Rs. 661·95.

*Sanitation.*—The scavenging of the town has been generally satisfactory. The conservancy of latrines leaves considerable room for improvement. Conservancy lanes are being opened with a view to extending the "dry-earth" system. Two new latrines were erected at a cost of Rs. 6,800 : one in Chilaw road for males, and the other at Kamaachode for males and females.

*Lighting.*—The lighting of the town is unsatisfactory, due to the non-arrival of lamps from Europe, as a result of which condemned lamps cannot be replaced.

*Town Improvements.*—A sum of Rs. 24,278·11 has been spent on acquisitions and surveys, and new roads have been opened and existing roads widened:

Fernando avenue, called after Mr. John X. Fernando, a member of the Local Board, who donated the land for the road, was completed at a cost of Rs. 3,200, and was formally opened by His Excellency the Governor. Another new road, Pereira place, called after Mr. John H. Pereira, also a member of the Local Board, who donated the land, is shortly to be opened to connect Lewis place with Cemetery road.

The alleys known as Taladua lane and Cemetery lane have been widened, and this work has considerably improved the amenities of this part of the town. The thanks of the Board are due to Reverend Fathers Milliner and Gueguen, O.M.I., for assisting in this much-needed improvement.

The abandoned road from St. Sebastian church to Lewis road has been opened and gravelled, and it is proposed to extend it to join the Kamaachode road at the fish and meat markets.

A gala has been erected near the vegetable market. A new resthouse is being erected by the Provincial Road Committee on the land acquired for the purpose facing the esplanade and sea, and is nearing completion. It is an upstairs building, and promises to be an ornament to the town.

*Peace Celebrations.*—The signing of the Treaty of Peace was celebrated with much jubilation.

*Visit of His Excellency the Governor.*—An event of importance, which should result in much advantage to the town, was the visit of His Excellency the Governor in September. His Excellency inspected different portions of the town, and displayed a keen interest in the schemes in progress for its improvement.

*Water Supply.*—This matter is still under consideration.

*Thoroughfares Ordinances.*—A comparative statement of collections under the Road Ordinances, Nos. 10 of 1861 and 31 of 1864, is annexed :—

## REVENUE.

The total revenue for the year under review amounted to Rs. 58,478·36, as against Rs. 51,748·54 in the previous year.

*Taxes.*—There was an increase of Rs. 1,736·78 under Property Rates, a decrease of Rs. 308 under Road Tax, and an increase of Rs. 144 under Other Taxes.

*Licenses.*—The increase under this head was Rs. 62·81.

*Rents.*—The increase under this head was due to the higher rents obtained for the three public markets.

*Miscellaneous.*—The increase under this head was due partly to larger recoveries under conservancy fees resulting from the increase in the number of persons availing themselves of the dry-earth system, and partly to the proceeds of sale of the materials (comprising buildings) and trees standing on the land acquired by the Board for a cross road from Digarolla bridge to the seashore.

## EXPENDITURE.

*Cost of Administration.*—The increase under establishment was due to the annual increments earned by the staff. The increase under Office Contingencies was mainly due to the enhanced cost of stationery and printed forms, and also to the expenditure of a sum of Rs. 275 in connection with the local Peace Celebrations. The increase under Revenue Services resulted from the payment of fixed monthly salaries (instead of commission in a lump sum) to revenue officers appointed under a new scheme for the recovery of assessment tax.

*Sanitation.*—The increase under this head was largely due to the purchase of three conservancy carts and three bulls for the extension of the dry-earth system of conservancy.

*Lighting.*—The increase under this head was due to the purchase of sixteen petrol installations.

*Public Works.*—The increase under this head resulted from the acquisition of land for (1) a cross road from Digarolla bridge to the seashore, (2) a latrine site and open space at Moratuwella, and (3) a metal quarry at Moratumulla.

## SANITATION.

The scavenging of the town was done on contract, four scavenging carts being used, and was satisfactorily carried out. The conservancy of the town was done departmentally, as in the previous year. The policy of the Board in regard to the extension of the conservancy rules throughout the town is being steadily pursued, three new areas having been dealt with in the year under review. The present "specified areas" comprise nearly the whole of Uyana, a large portion of Moratuwella and Digarolla, and portions of Idama and Moratumulla.

## PUBLIC HEALTH.

The state of the public health was, as usual, far from satisfactory. There were 46 reported cases of enteric, 76 of continued fever, 28 of dysentery, 2 of diarrhoea, 20 of chickenpox, 7 of phthisis, 5 of typhoid, and 227 of influenza.

## LIGHTING

The lighting of the town was carried out departmentally, as in the previous year, and was satisfactorily and economically done. The number of lamps lighted in the first part of the year was 34 oil and 5 petrol lamps. As the latter proved quite satisfactory, 21 petrol lamps were lighted from the month of May, and the oil lamps discontinued.

## NEW WORKS.

The Uyana latrine and cross road which were in course of construction at the latter end of 1918 were completed early in the year. The road is a great improvement to this part of the town, and the latrine is much used and maintained in very good condition.

## LATRINES.

The public latrine at Moratumulla continues to be kept in a clean and sanitary state. Although provision had been made for the construction of a latrine on the proposed road from Digarolla bridge to the seashore, no latrine was built, in view of the fact that a suitable site could not be decided upon before the completion of the road. Funds were, therefore, provided in the Estimates of 1920 for two up-to-date public latrines.

## STREET LINES.

Street lines were laid down in Jeronis place, De Mel's road, Dharmaratne avenue, Laxapathiya road, and Circular road, Main street and the streets in Uyana having been similarly dealt with previously.

## WELLS.

The public well at Moratumulla has proved to be an excellent source of water supply to the people in its neighbourhood.

## ACQUISITION OF LAND.

A long strip of land was acquired for a road from Digarolla bridge to the seashore and a contract entered into for the opening up of this road, as also the road from De Soysa road to the Buddhist temple at Katubedda. In the case of the former road, nearly half the land required was generously donated by Mrs. Clovis de Silva, and in the case of the latter road, the land is being given free, only buildings and trees being paid for. A piece of land near the Moratuwa railway station was acquired for an open space and a site for a public latrine, and a piece of land at Moratumulla for a metal quarry. The total cost of these acquisitions amounted to a little over Rs. 26,000.

## PEACE CELEBRATIONS.

The local Peace Celebrations were enthusiastically participated in by all sections of the people. Large numbers of the poor were fed and alms distributed.

## VISIT OF THE GOVERNOR.

An event of great interest was the visit of the Governor in July in connection with the local Agri-Industrial Show, when the Board presented His Excellency with an address. His Excellency displayed a sympathetic interest in the general wants of the town, and outlined the proposed policy of Government in regard to local government.

## MEETINGS.

There were twelve ordinary meetings during the year. At the biennial election of Unofficial Members held on December 4, 1919, the sitting members were elected to serve on the Board during the years 1920 and 1921, viz., Mr. G. M. Silva for the Rawatawatta Division, Dr. H. F. Fernando for the Moratumulla Division, and Dr. K. J. de Silva for the Moratuwella Division.

A comparative statement showing the working of the Thoroughfares Ordinances, Nos. 10 of 1861 and 31 of 1864, is annexed:—

| <b>Balance ..</b>  | 5,660 81          | <b>Deposit in Bank of Madras ..</b> | 3,865 70          |
| <b>Total ..</b>  | 5,806 15          | <b>Total ..</b>                     | 5,806 15          |

**Taxes.**—The revenue realized under this head shows a decrease of Rs. 112. This was due to the fact that a part of the assessment tax due for the fourth quarter of 1919 was not collected and accounted for within the year under review.

**Licenses.**—The collections under this head for the year was Rs. 2,981·50, an increase over the previous year of Rs. 42. This is due to the issue of a larger number of trade licenses.

**Rents.**—The revenue collected under this head was Rs. 264·45 in excess of the amount realized in 1918. This resulted from the increased number of private latrines conserved by the Board.

## EXPENDITURE.

*Establishment.*—The expenditure under this head was Rs. 877·50, as against Rs. 935 in the previous year, showing a decrease of Rs. 57·50. This was due to the transfer of the Secretary and Inspector, who was drawing a salary of Rs. 540 per annum, and the appointment of a successor to him on a lower salary of Rs. 480.

*Public Works.*—A sum of Rs. 491·88 was spent on public works during the year under review. Of this amount, a sum of Rs. 115 was paid on account of extra work done over the estimate on a new road constructed in 1918. A sum of Rs. 85 was spent in constructing a latrine for the use of Local Board coolies, and a sum of Rs. 291·88 in maintaining the Local Board gravel roads and public buildings during the year. It is proposed to build at an early date two model bakeries.

*Lighting.*—The expenditure under this head was Rs. 585·55, as against Rs. 531·45 in the previous year, showing an increase of Rs. 54·10, due to extra expenditure on repairs and materials.

## SANITATION.

The scavenging of the town and the conservancy of the latrines, both public and private, were carried out satisfactorily by the Board under the supervision of an overseer and the Inspector of the Board. The town was kept neat and clean throughout the year. The Deputy Chairman of the Board visited the town weekly, or oftener, and saw that the coolies of the Board attended to the work allotted to them according to a programme drawn up by him.

## PUBLIC HEALTH.

The health of the town was good, there being only two cases of dysentery, one of which proved fatal, and one case of enteric during the year.

## MEETINGS.

Twelve ordinary meetings of the Board were held during the year under review, eight of which were presided over by the Government Agent, Western Province.

## MEMBERS.

The Official Members of the Board were the Government Agent, Western Province, Mr. C. Herft, and Mr. A. L. Mills; and the Elected Members were: Messrs. J. E. Seneviratne, T. S. Gunewardena, and D. M. P. R. Senanayake.

## GENERAL.

His Excellency the Governor paid an unofficial visit to the town on November 5 last.

The usual statement showing the working of the Thoroughfares Ordinance is annexed:—

The Kachcheri,  
Colombo, March 31, 1920.

J. G. FRASER,  
Chairman.

#### IV.—REPORT OF THE WORKING OF THE THOROUGHFARES ORDINANCES DURING 1919.

##### WESTERN PROVINCE.

The Provincial Road Committee during 1919 consisted of the Chairman, the Hon. Mr. J. G. Fraser, C.M.G.; the Provincial Engineer, Mr. E. H. Vanderstraaten; Mr. R. Garnier; Mr. G. S. Schneider; and Mr. J. E. Seneviratne. Mr. R. Garnier resigned, and Mr. J. Ferguson was appointed in his place.

Meetings of this Committee were held on May 12 and December 18, at the latter of which the estimates for the year 1920 were passed.

As was anticipated in my report of 1918, it was found possible to make a commencement with the building of the new resthouse at Negombo, and in July a contract was entered into for the sum of Rs. 45,862.46 for the first portion of the building to be completed by June 30, 1920. As the construction of this portion made satisfactory progress, the Committee decided to entrust the construction of the remaining portion to the same contractor.

The Committee sanctioned votes for the payment to its officers a temporary increase of salaries, and later voted a 20 per cent. increase, similar to that given to Government officers, from October 1. Temporary increase to pensioners were also sanctioned on the same scale as that granted by Government to its pensioners.

The sale of ferry rents for 1919 realized a sum of Rs. 11,581.14. A vote of Rs. 900 was sanctioned for the repair of the Kitulgahawatta ferryboat, Rs. 160 to improve the approach to the Mutuwadiya ferry, and a sum of Rs. 950 for the repair of the ferryboat at Pugoda. A sum of Rs. 4,804 was also voted for the completion of the work in connection with the Uyana ferry approach road.

Licenses to seize cattle straying on the principal thoroughfares were issued to persons recommended by the Provincial Engineer and the Korale Mudaliyars.

A statement of the revenue and expenditure of the Provincial Road Committee for 1919 is annexed, together with the report of the Chairman, District Road Committee, Colombo:—

Provincial Road Committee,  
Colombo, January 31, 1920.

J. G. FRASER,  
Chairman.

## COLOMBO DISTRICT.

The District Road Committee of Colombo consisted during 1919 of the Chairman, the Hon. Mr. J. G. Fraser, C.M.G.; the Provincial Engineer, Mr. E. H. Vanderstraaten; and the following gentlemen: Messrs. C. S. Jones, W. P. D. Vanderstraaten, A. L. R. Aserappa, and A. E. Rajapaksa, Gate Mudaliyar.

Two meetings of the Committee were held on August 18 and December 18, 1919, at the latter of which the estimates of revenue and expenditure for the ensuing year were passed. The opinion of members was taken by circular at other times.

Estimates amounting to Rs. 26,920 were passed from surplus revenue for the year for widening and improving the junction at Radawana in the Siyane korale east, and for the construction of the road from the Homagama market in Hewagama korale to the site of the proposed new resthouse near the railway station, and also for the improvement of several other roads in the Colombo and Negombo Districts.

Further sums of Rs. 1,150 for the repairs to a bridge on the Aturugiriya-Padukka road and the construction of a culvert on the Kotte-Aturugiriya road and Rs. 2,000 for the repairs to the Akarawita bridge on the Ekala-Henaratgoda road were voted.

The floods in September damaged the low-lying portions on nineteen roads, and for their repair a sum of Rs. 2,500 was sanctioned.

The request of the Superintendent of Ayr estate at Padukka to increase the vote of Rs. 1,000 for the upkeep of the Bope-Dambore road to Rs. 1,750 provided the estates concerned contributed a like sum was deferred for consideration in the ensuing year, when funds become available.

Licenses to seize cattle trespassing on minor roads were issued to persons recommended by the Mudaliyars of the several korales.

A comparative statement showing the working of the Ordinances during 1918 and 1919, and the statement of receipts and expenditure of the District Road Committee of Colombo for 1919, together with the report of the Superintendent of Minor Roads, are annexed:—

## Comparative Statement showing the working of the Thoroughfares Ordinances during 1918 and 1919.

District Road Committee,  
Colombo, February 2, 1920.

J. G. FRASER,  
Chairman.

## REPORT on Minor Roads in the Colombo District for 1919.

THE total expenditure during the year was Rs. 140,994·30, of which Rs. 76,590·09 was spent on the maintenance of roads, the balance Rs. 64,404·21 being expended for the following services, viz., resthouses, bridges, culverts, improvements of roads, flood damages, and ferryboats.

The total number of miles maintained was 256½, spread over 67 roads, 112½ miles being track metalled, 140½ miles having a gravelled surface, and 4 miles being a bridle path.

The average cost per mile is as follows :—Track-metalled roads, Rs. 386·48 ; gravelled surface roads, Rs. 233·88 ; bridle path, Rs. 73·33.

**Bridges.**—The amount voted under this head was Rs. 8,535·28, of which a sum of Rs. 6,525 was expended for the renewal of the wooden platforms of ten bridges. Of the balance, a sum of Rs. 2,000 for the construction of the Akarawita bridge has been re-voted for expenditure during 1920.

**Culverts.**—A sum of Rs. 699 was spent in constructing a stone masonry culvert, 20 feet by 3 feet by 4 feet, covered with reinforced cement concrete slabs on the 13th mile embankment, Kotte-Padukka road.

**Improvements to Roads.**—Of a sum of Rs. 42,871·31 voted for this purpose, Rs. 30,231·10 was expended on the improvement of 47 roads, leaving a balance of Rs. 12,640·21, of which Rs. 12,611·11 has been re-voted for expenditure during 1920.

**Flood Damages.**—The amount voted under this head was Rs. 2,400, of which a sum of Rs. 2,329 has been expended, leaving a sum of Rs. 71, of which Rs. 70 has been re-voted for expenditure during 1920.

**Resthouses.**—A sum of Rs. 50,494·51 was voted under this head, of which Rs. 10,572·79 was spent on the construction of a new resthouse at Negombo and upkeep repairs to thirteen resthouses. Of the balance, a sum of Rs. 54,083·74 has been re-voted for expenditure during 1920.

**Ferryboats.**—A sum of Rs. 11,578·96 was voted under this head, of which Rs. 10,592·68 was spent for repairs to four ferryboats and for the construction of three approach roads to ferries, viz., Hanwella, Uyana, and Mutuwadiya. Of the balance, a sum of Rs. 975 has been re-voted for expenditure during 1920.

**Other Works.**—A sum of Rs. 3,112 was voted under this head, of which Rs. 3,110 was spent for widening the roadway and constructing a retaining wall at Kesbewa, and for repairs to District Road Committee store-rooms, &c.

**General.**—The roads have been maintained in fair order, the limited amount apportioned having been economically distributed over the several roads in the Colombo and Negombo Districts. The traffic on some of the more important roads which form chief outlets to the principal roads and serve as feeders to the Main Line, Kelani Valley, and Negombo Railways was, as usual, heavy. The funds of the District Road Committee do not, however, permit of increased expenditure, and it would be a great relief to the Committee if the following roads were handed over to the Public Works Department, viz. :—

- (1) Kotte-Talangama and Padukka road.
- (2) Negombo-Kimbulapitiya-Alutepola road.
- (3) Ekala-Henaratgoda road.
- (4) Henaratgoda-Yakkala road.
- (5) Veyangoda-Kalagedihena road.
- (6) Kochohikade-Halpe road.
- (7) Mugurugampola-Kotadeniyawa road.

Colombo, February 3, 1920.

J. O. EBERT,  
Superintendent of Minor Roads.

## REPORT ON THE KALUTARA DISTRICT FOR 1919.

## I.—HISTORY OF THE DISTRICT.

DURING the year under review there was a revival of trade in the staple products of the district : rubber, coconuts, tea, and cinnamon, and the year would have been a prosperous one had it not been that every industry was hampered by the serious shortage of imported rice, which began in June, and continued until the end of the year. The price of the limited quantity of rice that was available was high, and there was much distress throughout the district.

2. The rejoicings in connection with the Peace Celebrations were universal. Mass meetings, at which loyal resolutions were passed, were held at Kalutara and at the principal centres in the korales. The custom of feeding the poor on all occasions of rejoicing was observed only to a limited extent on this occasion, as the quantity of rice in the district was not sufficient.

3. The shortage of imported rice, which had been threatened for some time, made itself felt at the beginning of June, and it was with the greatest difficulty that starvation was prevented, thanks to the invaluable assistance rendered by a number of the leading residents of the district, who devoted their time and money whole-heartedly to the relief of distress, by the purchase and distribution of such supplies of rice and other foodstuffs as could be obtained. Government took over the control of rice, and a system of distribution of the limited amount available was organized as quickly as possible, but the sufferings of the poor would have been considerably increased, particularly in June, had it not been for the public spirit displayed by the wealthier residents of the district. Throughout the remainder of the year the district was inadequately supplied with rice, and all industries suffered in consequence, except the production of food, which continued steadily to increase.

4. Sessions of the Supreme Court were held at Kalutara in August, presided over by the Hon. Mr. Justice H. A. Loos.

5. There were the following official changes during the year :—

- (1) Mr. C. V. Brayne went on furlough at the end of May, and was succeeded by the writer.
- (2) Mr. C. J. S. Pritchett, Police Magistrate, Panadure, was transferred to Chilaw, and was succeeded by Mr. M. Prasad.
- (3) Mr. C. E. Wedd, Assistant Superintendent of Police of Kalutara, was relieved by Mr. H. N. Wood on March 1, 1919; Mr. A. I. Sheringham relieved Mr. Wood on July 1, 1919; and Mr. Sheringham was succeeded by Mr. W. C. C. King on September 1, 1919.
- (4) Mr. L. H. Swallow, who was acting as Assistant Superintendent of Police, Panadure, was succeeded by Mr. G. H. Bromley on March 1, 1919.
- (5) Gate Mudaliyar J. A. Weerasinghe retired from the post of Mudaliyar, Rayigam korale, on April 18. Mudaliyar D. A. Emilian of the Land Settlement Department, who was appointed Mudaliyar, Rayigam korale, did not, however, assume duties till 1920. Gate Muhandiram J. J. de Mel, Kachcheri Mudaliyar, Kalutara, acted as Mudaliyar, Rayigam korale, throughout the year, and Mr. A. E. Abeyaratna, of the Colombo Kachcheri, acted as Kachcheri Mudaliyar, Kalutara, for the same period.
- (6) Mr. E. P. Karunaratne, Gansabhawa Clerk, was appointed Muhandiram of Kalutara and Panadure totamunes, in succession to Mr. G. W. Gooneratna, who was appointed President, Village Tribunal, Totamunes.

## II.—REVENUE AND EXPENDITURE.

6. The total revenue for the year, inclusive of land sales, amounted to Rs. 612,614·45, being Rs. 34,139·42 less than that of the preceding year. The decrease is most marked under (1) Customs, (2) Port and Harbour Dues, (3) Licenses, and under Sub-heads Grain and Arrack. Increases shown under Heads (4) Fees of Court, (9) Rent of Lands, and (10) Land Sales.

7. The total amount due on account of arrack and toll rents in Kalutara District, recovered and credited at Colombo Kachcheri and not included in the revenue of Kalutara District, was Rs. 127,076, being Rs. 141,740·33 less than that of the previous year.

8. The revenue from the Beruwala Customs was Rs. 9,569·24, being Rs. 41,052·94 less than that of 1917-18, mainly due to the fact that no grain was imported at Beruwala after May. The revenue derived from the sale of opium was Rs. 51,142·75, showing an increase of Rs. 12,917·55 over that of the preceding year.

9. The total expenditure was Rs. 43,091·09, being Rs. 2,872·97 in excess of that for 1917-18.

## III.—CONDITION OF THE PEOPLE.

10. The end of the war brought with it a stimulus to trade, and the people of this district were approaching a condition of normal prosperity when the rice shortage dealt them a reverse blow. This shortage had its effect on every industry. The planters employed less Sinhalese labourers, because they could not feed them; while, for the same reason, it was found almost impossible to carry out any building operations, or to extend any of the industries of the district. The plumbago industry, which usually employs many thousands of workmen, had practically ceased to exist at the close of 1919, owing to the absence of any market for the product. On the other hand, the price of rubber and tea was fairly good, while coconuts and cinnamon rose considerably in value.

## IV.—FOOD SUPPLY.

11. The staple food of the district is rice, most of which is imported from India. The failure of supplies from India acted as a stimulus to the villagers to make better use of their lands. Paddy fields, which used to be cultivated for one season only, are now cultivated, when possible, for both yala and maha, and there has been a great decrease in the area of uncultivated high land, and a corresponding increase in the production of manioc, yams, and other foodstuffs.

During the year under review 727 acres of Crown land suitable for paddy were leased free of rent, 345 acres of high land were leased for the cultivation of foodstuffs, and 985 acres of forest land were leased for three years for cultivation of foodstuffs under re-afforestation agreements. The greater part of the Crown land suitable for paddy in the Kalutara District has now been taken up; much, however, remains to be done, besides extending the area cultivated with this staple food product. The villagers are beginning to observe the advantages to be gained from manuring their fields, and, more slowly, are beginning to realize the benefits of transplantation of paddy; but there is no doubt that most of the fields in the district could produce a far higher yield than they do at present.

12. During the year the Defence of the Colony regulations were introduced enabling Government to insist on the planting of paddy fields with paddy. The tendency to plant up paddy fields in rubber, which has been growing for several years in this district, has, however, ceased, at any rate for the time being, in view of the shortage of food and the high price of paddy. I have, therefore, found it unnecessary to utilize these regulations, except in a few rare instances.

In spite of the general increase in cultivation of foodstuffs, and the greater amount of care generally devoted to such cultivation, there are large areas of land in the district which are never properly cultivated, and never will be, so long as they continue to be held by numbers of shareholders, without any system of co-operative cultivation. It does not require an experienced eye to identify a *hawul idama* of this type at a glance.

A considerable area of private land could be rendered fit for paddy cultivation if the various canals in the district were cleared from weeds and silt. It is hoped that this work will shortly be commenced. Incidentally, it will tend to improve the drainage of the country in times of flood, and should improve the health of the people.

#### V.—HEALTH AND SANITATION.

13. The general health of the district was fairly satisfactory. There was no plague, smallpox, or cholera during the year. The epidemic of influenza, which occurred about the middle of September, 1918, continued during the early months of 1919. There was a fresh epidemic in part of Rayigam korale in June and July; it was, however, of a mild type, and the mortality therefrom was low. Enteric fever was fairly common, especially in the towns. Malaria and parangi were common, and showed no signs of decrease. Anchylostomiasis was, if anything, more common than before. The conditions under which the people live, particularly in the towns, conduce to the spread of such diseases. None of the towns and populous villages along the coast have any proper water supply or system of drainage, and the soil is everywhere polluted by the insanitary habits of the people, who will not use latrines even when these are available.

The district has a heavy rainfall, and the drainage is imperfect, and could be considerably improved if sufficient funds were available. It is somewhat surprising, however, that the dense population living in the swampy and badly drained area near the coast should suffer least from disease.

14. The five hospitals in the district are generally satisfactory and well equipped. The Infectious Diseases Ward at Ingiriya requires a water service and latrine accommodation. The Kalutara hospital is badly situated in the heart of the bazaar, and it is impossible to protect it from the dust and noise of the streets.

During the year the central dispensary created at Matugama was removed to Horawela, and the district dispensary at Kalawellawa was removed to a place midway between Kalawellawa and Bulatsinhala, while the branch dispensary at Bulatsinhala was moved to Govinna. The greater part of the district is adequately served with hospitals and dispensaries.

#### VI.—AGRICULTURE AND INDUSTRIES.

15. The wealth of the district, apart from the fishing along the coast, is mainly agricultural. The principal product is rubber, but there are larger areas cultivated with coconuts, paddy, tea, and cinnamon. The total area of cultivated land was 180,759 acres. This includes 6,000 acres under rubber and 1,300 acres under paddy brought under cultivation during the year. The area of Crown high land leased for the cultivation of foodstuffs with and without re-afforestation has already been mentioned. The rainfall during the year was exceptionally heavy, and floods occurred at the time of the yala harvest, causing a considerable amount of damage at a time when every bushel of paddy was needed. Fortunately most of the crop had been reaped, but numerous stacks of paddy were washed away from the threshing floors.

16. There was a decrease of about 1,200 in the number of neat cattle during the year, but there are far too many animals for the pasturage available; the breed is poor and stunted, being starved from birth. The best of the bulls are used as draught animals; the remainder of the herd have little value, the meat being of the poorest quality, while the cows give very little milk. On the other hand, the cattle do an immense amount of damage to cultivation, and are a constant nuisance on the roads. So far as I have been able to ascertain, the cultivation of paddy in this district has not suffered from shortage of buffaloes. The health of the cattle was generally good; there were 114 cases of hoof-and-mouth diseases and 6 sporadic cases of rinderpest.

17. The work of the Co-operative Credit Societies has extended largely during the year. Eight new societies were formed in Rayigam korale and five in Pasdun korale east. There are now twenty-nine of these societies in the district, and they undoubtedly do such useful work in providing the cultivators with manure, and in demonstrating and spreading the use of modern improvements in cultivation.

18. The distillation of arrack was carried on throughout the coastal belt. There were fewer distillery licenses than in the previous year; the industry was exceedingly profitable. Minor village industries, such as the making of bricks, tiles, pots, mats, lace, and rattan baskets, and the manufacture of jaggery were carried on as usual. The locally made tiles appear to be of fairly good quality, and the industry is, I think, capable of development. There was a great development in the timber trade during the year, chiefly for the manufacture of tea and rubber chests, the wood for which had previously been imported from abroad.

19. The Kalutara Basket Association, originated by my predecessor Mr. Brayne, to develop and find a market for the basket bags and hats made of the leaf of the *indi* palm, has made considerable

progress. The turn over for the year amounted to Rs. 10,000. Three agencies were established in London, Bombay, and Galle, in addition to the agencies secured in 1918.

The Association is generally able to meet the demand for hats, cigar cases, cushion covers, knitting bags, &c., but the supply falls far below the demand at present as regards square and oblong baskets. There are 34 schools in which basket-making is taught, and, as soon as the numerous workers now being trained in these schools reach the productive stage, the Association should be able to meet the demand for all kinds of *indi*-ware.

A new building for carrying on the business of the Association was commenced during the year. A sum of Rs. 5,000 has been contributed by Government towards this work, and a sum of Rs. 10,900 has been collected by subscriptions.

The Association sent exhibits during the year under review to the Ceylon Ladies' League Exhibition; the Rambukkana Agricultural Show; the Nuwara Eliya Agricultural Show; the Colombo Social Service Exhibition; the Matara Agricultural Show; and the Moratuwa Industrial Exhibition. A sample basket of goods was also sent to the Madras Exhibition on the orders of His Excellency the Governor.

The development of the district has been much hampered in recent years by the fact that no definite policy has been laid down with regard to the Crown lands which can, and which cannot, be alienated. In August Mr. A. B. Lushington, Assistant Conservator of Forests, Haputale, was sent to the district, and at the end of the year he made a full report on the forest area which, in his opinion, should be maintained as such. When his report or some modification of it has been accepted by the Conservator of Forests and a definite policy laid down, it will become possible to inform intending purchasers or lessees of land what areas in the district are available for them.

#### VII.—EDUCATION.

20. The total number of schools in the district is 255. Of these, 104 are Government schools, and the others are managed by various private organizations or individuals. The average daily attendance at Government schools was 10,912, as compared with 11,425 in 1918. The decrease was due to the scarcity of rice and the poverty of the people. Children were in many cases half starved, and their parents could not provide them with clothes. Absentees in many cases were exempted from prosecution in view of their poverty.

21. New building for the Wadduwa Infant School and Paragastota Girls' School were erected, and those for Henemulla Muhammadan, Malawanbadda Girls', Uduwara Boys', and Urugoda Mixed Schools were under construction. Two new schools, for Millewa Girls' and Millewa Boys', were put up by the villagers and gifted to the District Schools Committee. Kitchens for the following schools were erected: Lathpandura Boys' Vernacular School, Agalawatta Boys' Vernacular School, Munhena Boys' Vernacular School, Panapitiya Boys' Vernacular School, and Ittapana Girls' Vernacular School. A new building for the Mahawila Vernacular Mixed School was erected by Buddhists. The following existing schools were extended by the Roman Catholics: (1) Katukurunda Girls', (2) Paiyagala Boys', and (3) Diyalgoda Reformatory Training Boys' School.

22. The balance on December 31, 1918, was Rs. 15,289.05. The receipts during 1919 were Rs. 23,466.02. The expenditure during the year was Rs. 21,830.84. Therefore, the unexpended balance on December 31, 1919, was Rs. 16,924.23. The reason for this large unexpended balance is that, though four new buildings referred to in paragraph 24 were given on contract at an aggregate cost of Rs. 19,468, of which Rs. 6,468 was voted in the estimates of the District Schools Committee for 1920, the sum of Rs. 11,000 (exclusive of Rs. 2,000 already paid by way of a part payment) was not paid, pending completion of the building. It was found impossible to speed up the contractors, as they could not get food for their workmen.

23. Suitable land was acquired for the Malawanbadda Vernacular Girls' School, and a new building thereon is now being constructed. Applications have also been made for the acquisition of lands for extension of the Alutgama Boys' Vernacular School, extension of the Massala Anglo-Vernacular School, and erection of the Henemulla Muhammadan School, the cost of the last named to be met from private contributions from the Moors of Henemulla.

24. The majority of the schools in the district, particularly in the totamunes, are overcrowded, and the funds at the disposal of the District Schools Committee are not sufficient to meet the educational requirements of the rapidly growing population.

#### VIII.—CRIME, POLICE, AND HEADMEN.

25. For public purposes the district is divided into two, with Assistant Superintendents of Police at Kalutara and Panadure. The Panadure Police Division includes a portion of Colombo District.

26. In the year 1918 there was slight decrease of crime in Panadure, and an immense increase in Kalutara Division. In the year under review the number of cases of grave crime reported in Panadure Division totalled 421, against 528 in the previous year; while the percentage of convictions obtained rose from 38 per cent. to 42 per cent. Thus, a distinct improvement is shown.

The Kalutara Division shows still more marked improvement. There was a decrease of 30 per cent. in cases reported, and an increase of convictions obtained, from 30 to 50 per cent. In both divisions there has been a marked decrease in preventible crime, such as burglary, theft, and cattle theft, and both police and headmen deserve credit for this improvement.

27. Throughout the year the police and headmen have worked well together. The system of combined patrol at night by police and police vidanes is now properly organized, and both Assistant Superintendents of Police report that the headmen who fail in this respect are only a small minority. This is the more creditable to the police vidanes, as they are unpaid, and they can only be recompensed with small rewards from the funds at my disposal.

28. Punitive police were established at Potuwila on April 1, 1919, and withdrawn on October 1, 1919. Crime in the vicinity was reduced to a minimum.

29. Nearly all the police stations in the district are on the telephone. It would be a considerable assistance to the police if the Korale Mudaliyars' offices were connected with the telephone. It would also tend to increased efficiency in general administration.

## IX.—LOCAL GOVERNMENT.

30. The Local Government in this district is carried on by means of (1) a Local Board, which administers Kalutara town; and (2) a Sanitary Board, which administers eight small towns, viz., Panadure, Wadduwa, Beruwala, Alutgama, Horana, Tebuwana, Neboda, and Agalawatta. A separate account of the Local Board is appended to this report.

31. The members who comprised the Sanitary Board were the same as those in 1918, viz., the Assistant Government Agent (Chairman); the District Engineer, Kalutara; the Medical Officers of Kalutara and Panadure; the Totamune Mudaliyar; Mr. C. A. Jansz of Panadure; and Mr. F. I. Fernando of Beruwala. Five meetings were held during the year.

32. *Panadure*.—This is the largest Sanitary Board town. The scheme for deviating the main road, referred to in last year's report, has been submitted to Government for sanction. A new public latrine of the latest type adopted by the Sanitary Department was constructed at a cost of Rs. 865. Land required for washing and drying grounds for dhobies was acquired at a cost of Rs. 2,000. A site for the building of a market in the Nalluruwa bazaar was also acquired. Six new butchers' stalls were erected in the vegetable market at a cost of Rs. 1,059. This yields to the Board the handsome return of Rs. 360 a year. The lighting, scavenging, and conservancy were done on contract. There are two public latrines. Further latrine accommodation is very necessary, but it is difficult to find suitable sites in this thickly populated town. A pure water supply is a great necessity, and the question of a water supply scheme is under consideration.

33. *Alutgama, Tebuwana, and Beruwala*.—These towns were provided with new markets of the type adopted in Colombo District. In Beruwala a new market latrine was built by the Sanitary Department, the Board contributing Rs. 500 towards the cost. The scavenging of these towns is done on contract. The Board proposes to enforce the dry-earth system in Alutgama, Beruwala, and Wadduwa, where most of the public latrines are at present scavenged by pigs. Land has been acquired at Alutgama for the construction of a new school and a park, and the improvement of the approaches to the railway station.

34. *Neboda*.—Land has been acquired for the construction of a market at Neboda, but the work of construction has had to be postponed pending the decision of two disputes in the District Court.

35. *Horana*.—This is the most progressive small town in the district. It has a wide well-drained main street, and the sanitation of the private houses is steadily improving.

36. *Agalawatta*.—The site for the market was acquired, and the work of construction given on contract in 1919.

37. *Wadduwa*.—The site for a new market was acquired during the year.

## X.—VILLAGE COMMITTEES.

38. The Village Communities Ordinance worked satisfactorily during the year as in past years. The total revenue for the year was Rs. 52,062·83, and the total expenditure was Rs. 40,134, leaving a balance of Rs. 11,928·83 at the end of the year. The villagers generally commuted their labour in money at the rate of 50 cents per head, but few came and worked on village roads.

39. The Village Committee roads include all classes of road, from mere footpaths to good gravelled roads suitable for motor cars in ordinary weather. They are, on the whole, well maintained. Pasdun korale west is least well supplied with village roads in proportion to its population and prosperity, because the greater number of its inhabitants are Indian immigrants, who contribute nothing to Village Committee funds.

40. The work of the Presidents of Village Tribunals has been satisfactory. There were 47 civil and 142 criminal cases pending on January 1, 1919. The number of cases instituted during the year was civil 1,948 and criminal 6,653, making a total of 1,995 civil and 6,795 criminal. At the end of the year there were 55 civil and 48 criminal cases pending. Out of the 125 cases in which appeals were taken to the Assistant Government Agent, only 25 were successful. From the Assistant Government Agent's decisions 6 appeals were taken to the Governor in Executive Council. In one case only the Assistant Government Agent's decision was varied. The number of civil cases amicably settled during the year was the same as in the previous year, viz., 1,310. The number of theft cases was 1,113, as against 674 in 1918, the increase being chiefly due to thefts of garden and chena produce—a result of shortage of food.

## XI.—THE WORKING OF SPECIAL ORDINANCES.

(1) *Waste Lands Ordinance*.

41. There were 21 notices pending on January 1, 1919. Final orders on 17 of these were published, and 4 are awaiting inquiry. Nineteen notices and 4 final orders were published during 1919. Claims were received under 12 of these notices. Of these 12, 1 notice was abandoned after inquiry, and 2 were settled and final orders published, while 9 are awaiting inquiry. Under 5 notices no claims were made; final orders under section 2 were published as regards 2 notices, and 3 are awaiting preparation of final order sketches. One notice was abandoned owing to a clerical error and re-published, and 1 notice had not expired.

(2) *Excise Ordinance*.

42. The consumption was much the same in 1919 as in previous years. Two hotels with bars were licensed at the end of 1919: one at Kalutara and one at Panadure. Owing to the closing of arrack taverns, there has been an appreciable increase in the sale of foreign liquor. The present staff is quite inadequate to control the illicit traffic. There has been no increase of drunkenness; possibly there has been a slight decrease. Illicit practices have increased considerably since last October, when a number of taverns were closed. There are insufficient arrack taverns to meet the requirements of the people. There are sufficient foreign liquor taverns. There is a considerable decrease in revenue. As a result of local option, the following arrack taverns will be closed next October: Agalawatta, Werawatta, Atulugama, and Nugegoda, and the need for an increase in the preventive staff will be greater than ever.

(3) *Opium Ordinance.*

43. At the beginning of the year there were 2,184 registered opium consumers, of whom 85 died, 1 gave up the use of opium, 13 transferred to other districts during the year, leaving on the register 2,085. The amount realized by sale of opium during 1919 was Rs. 114,300·25. The total number of vedaralas licensed at the beginning of the year was 449; of this number, 4 died. Seventeen new licenses were issued during the year. Three prosecutions were entered during the year for breach of the Opium Ordinance, and resulted in convictions.

(4) *Births, Marriages, and Deaths Registration Ordinance.*

44. During the year under review there has been a decrease of 3 per cent. in births, 5 per cent. in deaths, 16 per cent. in general marriages, and 8 per cent. in Muhammadan marriages. The decrease in the number of deaths during 1919 can be attributed to the prevalence of the epidemic of influenza in 1918. The decrease in the births and marriages is due to general depression in the country.

(5) *Dog Registration.*

45. The number of dogs registered during the year was 5,348. The number shot was 1,671. There are still far too many starving dogs in the villages. An increase in the tax might tend to keep their numbers down.

(6) *Vehicles Ordinance.*

46. The number of carts licensed during 1919 was 4,801, as against 3,774 in 1918; and the number of motor cars licensed was 227, being 24 more than that of the previous year.

## XII.—LAND AND FOREST ADMINISTRATION.

47. 376 cases of illicit clearing and felling were reported to the Kacheheri during 1919. Compensation amounting to Rs. 1,674 was recovered in settlement of some of the cases. 127 cases were instituted against the illicit clearers and fellers. Convictions were obtained in 99 cases, bringing in a sum of Rs. 3,327 in fines. Twenty-two cases are still pending. The sum of Rs. 166 was realized by sale of the timber illicitly felled.

48. 1,171 acres 3 roods and 12 perches were leased in perpetuity under the new system at rents varying from (after the first six years) Rs. 9 to Rs. 15 an acre per annum. The highest premium realized was Rs. 31·20 per acre for a block of 5 acres 3 roods and 11 perches under competition. The average premium realized was Rs. 32 per acre. 1 acre 1 rood and 35 perches were sold outright and 36 acres 2 roods and 7 perches were settled on squatters. 24 acres 2 roods and 21 perches were leased on special terms for seven years for foodstuffs. 365 acres 1 rood and 7 perches were leased for foodstuffs for three years on seventy-seven ordinary permits. 944 acres were leased for foodstuffs on re-forestation agreements for three years, commencing with the yala season of 1920.

## XIII.—IRRIGATION.

49. The Nikatu-ela sluice is the only major irrigation work in the district. A small annual water-rate is levied for the maintenance of this work. The amount due for the year under review, viz., Rs. 152·90, has been collected.

50. There are no village tanks in the district, except in Rayigam korale, where there are six tanks. These are all in good order. Large tracts of field could be brought under cultivation if the following elas were cleared:—Kalawil-ganga, Dummalamodera-ela, Moderawila-ela, Panape-ela, and Alut-ela. This has been referred to under the heading of Food Supply in paragraph 11.

51. *Irrigation Fine Fund.*—Receipts during 1919 Rs. 142·20; expenditure Rs. 105·24; balance at close of the year Rs. 141·75.

## XIV.—PUBLIC WORKS.

52. The public works completed during the year included—

- (1) Latrines to Public Works Department cooly lines.
- (2) Completion of survey of the Agalawatta-Badureliya road.
- (3) Improvements and additions to Neboda and Pimbura hospitals.
- (4) Improvements to approach road to Forest Ranger's quarters at Matugama.
- (5) Widening the road at 9th mile, Angurawatota-Alutgama road.
- (6) Widening of the coast road in Kalutara North.

53. The public works in progress were—

- (1) The construction of Agalawatta-Badureliya road.
- (2) The construction of Kalawellawa-Bellapitiya road.
- (3) Widening of Nagoda-Matugama road.
- (4) Improvements to Government Distillery, Kalutara.
- (5) Survey of land for Police Court, Panadure.

54. The public works most urgently needed are—

- (1) A water supply for the coast towns, particularly Kalutara and Panadure.
- (2) A new Police Court for Panadure.
- (3) Extension or rebuilding of Kalutara hospital.

55. Quarters for Government officials are required in the following order:—

- (1) Police Magistrate, Panadure.
- (2) Police Magistrate, Kalutara.
- (3) Office Assistant, Kalutara.
- (4) Assistant Superintendent of Police, Panadure.
- (5) District Medical Officers, Kalutara, Panadure, and Beruwala.

56. The following main roads are in course of construction :—

- (1) The section of the Kalawellawa-Bellapitiya road between the Kalu-ganga and Bellapitiya.
- (2) The Agalawatta-Badureliya road.
- (3) The Horana-Talagala road.

57. Two other important roads, which, owing to heavy traffic and constant damage by floods, cannot be maintained properly by the District Road Committee, should be taken over by the Public Works Department in the following order of preference :—

- (1) The road from Yala to Kalutara North, 10 miles.
- (2) The road from Tebuwana to Dodangoda, 4 miles.

58. The two railway schemes should be connected.

59. The acquisition of land to widen the road through the Tebuwana bazaar is urgently needed.

60. The following Public Works Department roads should be widened :—

- (1) The section of the coast road between Panadure and Waskaduwa.
- (2) The section of the Panadure-Nambapana road between Panadure and Horana.
- (3) The greater part of the Horana-Angurawatota-Alutgama road.
- (4) The Matugama-Kalawellawa road.

61. Surveys of two proposed railways affecting this district have been made : (1) Dehiwala to Horana, (2) Katukurunda to Agalawatta. No survey has been made of a line connecting Horana with Matugama or Dodangoda on the Agalawatta-Katukurunda line, presumably owing to the necessity involved of constructing a bridge over the Kalu-ganga, and to the liability to flood of the land near the river. These two railway schemes should be connected if possible.

March 9, 1920.

T. A. HODSON,  
Assistant Government Agent.

### APPENDIX.

#### REPORT OF THE LOCAL BOARD OF KALUTARA FOR 1919.

The Local Board of Kalutara during the year consisted of the same members as in 1918. Six meetings were held, and were well attended.

2. The revenue for the year showed an increase of about 6 per cent. on that of 1918.

3. A comparative statement of revenue and expenditure of the Local Board of Kalutara for the years 1918 and 1919 is annexed :—

| REVENUE.                                   | 1918.<br>Amount.<br>Rs. c. | 1919.<br>Amount.<br>Rs. c. | EXPENDITURE.                          | 1918.<br>Amount.<br>Rs. c. | 1919.<br>Amount.<br>Rs. c. |

| (j) Left local area ..   | 41    |       | .97   | 6     |       | .14   |
| 6. Total failed to discharge obligation within local area ..                         | —     | 451   | 1.07  | —     | 307   | .74   |
| 7. Unaccounted for ..  | —     | 303   | 7.21  | —     | 570   | 1.37  |

4. Several improvements were effected to the roads. Land has been surveyed and acquired for widening portions of Hill street, including a dangerous corner, and the work will be undertaken and completed in 1920. A level crossing at Kalutara North was paved with granite setts.

5. The number of cases of infectious diseases during the year 1919 is as follows. The health of the town of Kalutara during 1919 was very satisfactory as compared with 1918 :—

|                  | 1918. | 1919. |               | 1918. | 1919. |
|------------------|-------|-------|---------------|-------|-------|
| Enteric fever .. | 19    | 4     | Chickenpox .. | 24    | 20    |
| Measles ..       | 5     | —     | Dysentery ..  | 2     | —     |

6. The following services, viz., conservancy and lighting, were given out on contract as usual.

7. The Local Board paid all the cost of transport of rice within the town during June, so that the people were able to obtain much rice as was available at cost price.

Local Board Office,  
Kalutara, March 9, 1920.

T. A. HODSON,  
Chairman.

#### REPORT OF THE WORKING OF THE THOROUGHFARES ORDINANCE DURING 1919.

THE District Road Committee during 1919 consisted of the Assistant Government Agent as Chairman; the District Engineer, Kalutara; and four Unofficial Members, viz., Mr. W. E. G. Bell, European Member; Mr. W. H. Hepponstall, Burgher Member; Mr. J. Aloysius Fernando, Native Member; and Mr. J. Ferguson, Additional Member.

2. Three Committee meetings were held in January, May, and August. The ordinary business of the Committee was done by circulation of papers among the members.

3. A statement is annexed showing the working of the Thoroughfares Ordinances in 1919 as compared with 1918 :—

|   | 1918.  |         | Percentage<br>on Number<br>under<br>Head 2. | 1919.  |         | Percentage<br>on Number<br>under<br>Head 2. |

| 6. Total failed to discharge obligation within local area ..                              | —      | 5,044   | 8.18  | —      | 5,240   | 8.501                                       |
| 7. Unaccounted for ..   | —      | —       | —   | —      | —       | —   |

4. The year shows a slightly lower average of recoveries, 91·4, as against 91·8. This may be ascribed to increased poverty. The slight fall in commutation realized in money is due to the fact that Agalawatta was brought under the operations of the Sanitary Board. One man did not commute, but performed six days' labour on the roads. Fourteen defaulters were sent to jail out of 304 arrested and produced before me. Of the 14 men sent to jail, 1 man was released on payment of fine, and 6 men were discharged on the occasion of Peace Celebrations. Out of 61,635 men in the division officers' lists, only 617 remain unaccounted for at the end of the year.

5. A statement of revenue and expenditure is annexed. As has been pointed out in previous reports, a large accumulated balance was reserved to convert some of the plank bridges into permanent iron ones, but owing to the high cost and difficulty in obtaining bridging materials, this work was not undertaken during the year:—

Statement of Receipts and Expenditure for the Year 1919.

| REVENUE.                                      |    | Rs.     | c. | EXPENDITURE.  |    | Rs.     | c. |
|---|----|---------|----|---|----|---------|----|
| Balance on January 1, 1919                    | .. | 48,924  | 69 | Payments made on account of principal roads and resthouses          | .. | 35,417  | 50 |
| Commutation realized in money                 | .. | 86,059  | 50 | Amount expended on minor works                                      | .. | 38,427  | 34 |
| Commutation realized in labour                | .. | 1       | 50 | Amount expended on minor works in labour                            | .. | 1       | 50 |
| Toll grant on minor roads                     | .. | 5,686   | 0  | Establishment and commission to division officers:—                 |    |         |    |
| Government contribution in aid of minor works | .. | 6,587   | 0  | (a) Contribution on account Provincial Road Committee establishment | .. | 1,400   | 0  |
| Miscellaneous receipts                        | .. | 2,570   | 62 | (b) Cost of District Road Committee establishment                   | .. | 9,117   | 72 |
|   |    |         |    | (c) Commission to division officers                                 | .. | 7,314   | 85 |
|   |    |         |    | Miscellaneous charges   | .. | 13,279  | 16 |
|   |    |         |    | Balance on December 31  | .. | 44,871  | 24 |
| Total   | .. | 149,829 | 31 | Total   | .. | 149,829 | 31 |

6. The length of the roads maintained was 114½ miles, upon which nearly Rs. 38,500 was spent. This exceeds the previous year's expenditure by Rs. 3,500.

7. Three hundred and twenty-three persons gave notice under section 86 of Ordinance No. 10 of 1861, and had the lines of the proposed buildings marked out for them. Eight persons were prosecuted during the year for building without notice, and all were fined.

8. Licenses to seize cattle were issued as in previous years. On most of the roads in the district stray cattle are now less frequently met with.

9. The eleven resthouses in the district were kept in order as far as the limited means at my disposal permitted.

District Road Committee Office,  
Kalutara, March 1, 1920.

T. A. HODSON,  
Chairman.

## CENTRAL PROVINCE.

### ADMINISTRATION REPORT OF THE GOVERNMENT AGENT, CENTRAL PROVINCE, FOR 1919.

Area of Kandy District, 911 square miles ; Population in 1911, 408,429.

Area of Central Province, 2,287½ square miles ; Population in 1911, 672,258.

#### I.—CHANGES IN ADMINISTRATION.

In January Mr. G. F. Forrest, Additional Assistant Government Agent, Kandy, was appointed District Judge, Puttalam and Chilaw.

2. Mr. W. L. Kindersley acted temporarily as Government Agent, Central Province, from February 10 to March 21, while the writer acted as Registrar-General.

3. Mr. L. J. B. Turner, Assistant Commissioner of Excise, North-Western Division, and Assistant Government Agent, Kandy, proceeded home on leave on March 2, and resumed duties on August 18.

4. Mr. R. B. Naish acted temporarily as Office Assistant to the Government Agent, Central Province, from March 25 to April 11, in place of Mr. W. J. L. Rogerson, invalided.

5. Mr. J. A. Maybin succeeded Mr. N. Izat as Police Magistrate, Kandy, on July 30.

6. Mr. E. W. Kannangara, Cadet of the Local Division of the Civil Service, was appointed to the Kandy Kachcheri from August 1.

7. Mr. A. N. Hutt was appointed Police Magistrate, Gampola, on August 27.

8. Mr. L. J. B. Turner acted temporarily as Assistant Government Agent, Nuwara Eliya, from October 5, in place of Mr. M. M. Wedderburn, who proceeded home on leave.

9. Mr. C. W. Bickmore succeeded Mr. H. A. Burden as District Judge, Nuwara Eliya, on November 1.

10. Mr. G. S. Wodeman was appointed Assistant Government Agent, Nuwara Eliya, on December 5.

11. Mr. S. Phillipson was appointed Cadet, Kandy Kachcheri, on December 12.

#### II.—IMPORTANT EVENTS.

12. A Durbar of the Government Agents and Assistant Government Agents, Kandyan Provinces, was held at the Pavilion to discuss the increase of the production of foodstuffs in January.

13. A Victory Dinner was held at the Queen's Hotel on February 14.

14. A meeting of Kandyan Chiefs was held on March 4 to discuss the question of improving the food supply.

15. The image of the Kataragam god was stolen from the Kataragama Temple in Kandy on April 8. (The image was subsequently recovered.)

16. In June the rice situation became acute and rice control was ordered.

17. News of the signing of the Peace Treaty by the Germans was received on June 29.

18. Peace Day was celebrated on July 19. In the morning there was a parade of Cadets and Boy Scouts on the Victoria esplanade ; in the afternoon there was a large gathering of town and district schools at Bogambra ; commemoration shields were presented to each school, and children of all the schools, numbering about 4,500, then marched in procession to the Victoria esplanade and sang the Marseillaise and National Anthem. In the evening there was a perahera and fireworks. Commemoration trees were planted at various schools in Kandy and at Teldeniya and Wattedgama. The celebrations were not confined to the towns ; in almost every village the houses were decorated.

19. I regret to report the death of Dunuwila Dissawa on September 8. He had held the rank of Dissawa for thirteen years.

20. The German machine gun presented to Trinity College, Kandy, by His Majesty the King was uncovered by His Excellency the Governor on October 16.

21. The anniversary of the armistice was celebrated on November 11 by the cessation of work, observing silence, and the stopping of all traffic, pedestrian as well as vehicular, for two minutes at 11 A.M. The signal was given by police constables, stationed at intervals in the main streets, sounding their whistles. This arrangement worked successfully, and the effect was most impressive.

#### III.—REVENUE AND EXPENDITURE.

22. The revenue collected at the Kandy Kachcheri during the financial year 1918-19 amounted to Rs. 2,122,190.17, as against Rs. 1,697,060.65 during 1917-18, an increase of Rs. 425,129.52. This increase is due to the fact that three instalments of arrack revenue due for 1917-18 were paid during 1918-19.

23. The expenditure on account of Provincial Administration and Clerical Service under the Government Agent during the financial year was Rs. 107,846, as compared with Rs. 107,079 during the preceding year. The expenditure incurred at the Kandy Kachcheri on account of the outbreak of plague at Nawalapitiya was Rs. 13,229.

## IV.—CONDITION OF THE PEOPLE.

24. The public health has improved since 1918, and though cases of influenza occurred, there was no return of the epidemic of the previous year. Five cases of cholera were reported, all being new arrivals from the coast. A campaign against anchylostomiasis is being carried on in the district, and promises to have a beneficial result on the general health. There was no recurrence of the plague epidemic of 1918.

25. The scarcity of imported rice and the high price of foodstuffs and cloth caused considerable hardships throughout the district. The establishment of food control in the latter half of the year and a marked increase in chena cultivation on permits relieved the situation. Over 4,000 acres were cultivated with kurakkan in Pata Hewaheta alone. A considerably greater extent of mud land was cultivated for the yala harvest than in previous years.

## IV. A.—FOOD CONTROL.

26. Food control was started early in June, the first control prices of rice being fixed on the 6th idem. For the distribution of rice allotted to the district by the Food Controller, centres were selected at Kandy, Wattegama, Katugastota, Gampola, Kadugannawa, Nawalapitiya, Hatton, and Galaha.

27. In Kandy fourteen principal traders (wholesale dealers) were selected, and rice distributed to them in proportion to the volume of their business. Permits were then issued to retail dealers, eating-houses, hotels, schools, and colleges to obtain their supplies from the wholesale dealers on payment at the control rate.

28. To assist the Government Agent a Food Control Committee, consisting of the Assistant Superintendent of Police, the elected members of the Municipal Council, and representatives of the Kandy Social Service League, was established, with Mr. B. W. Kannangara as Secretary.

29. The town was ticketed on coupons prepared and issued by the Kandy Social Service League; the ration allowed was two cut measures per head per week.

30. The system of distribution through the dealers worked well at first, but as old stocks of paddy and the produce of the yala crop became exhausted, and the demand for imported rice became more urgent, numerous complaints were received that the dealers favoured their friends, and were unable to supply the general public. Accordingly it was decided in December (after the dealers had been given an opportunity to amend their methods but failed) to take the distribution out of the hands of the dealers, and to open depôts under the control of the Committee. Two main stores were opened at the Old Jail and Police Barracks, and eight depôts for retail sale in different parts of the town. Since the opening of the depôts there have been no complaints of rice not being available.

31. At Gampola distribution was made on tickets under the control of a Relief Committee, with the Police Magistrate as Chairman. At Nawalapitiya the same course was followed, Dr. A. A. M. Werapemall, District Medical Officer, being the Chairman. At Hatton distribution was controlled by Mr. A. R. Aitken of the Hatton Bank; at Kadugannawa by the Ratamahatmaya and Peace Officer; at Galaha by Mr. L. St. George Carey; at Wattegama by Mr. A. E. W. Holloway. I wish to record my appreciation of the services rendered by the above-mentioned gentlemen and by the Kandy Social Service League.

32. The only other article of food for which control prices were fixed was flour, and that only for Kandy, Nawalapitiya, Gampola, and Hatton.

## V.—AGRICULTURE.

33. Cultivation of paddy is the principal agricultural industry, and more attention than usual was paid to the repair of channels and dams. Transplanting and manuring were practised on an increased scale. Chena cultivation was far more widely practised than in former years, and a large extent of Crown chenas were cultivated on permits.

34. Vegetable cultivation shows an increase, especially in Pata and Uda Dumbara, but considerable damage has been done by snails, for the eradication of which no means have apparently been discovered. In Yatinuwara plantains suffered considerably from disease.

35. There are twelve Co-operative Credit Societies in the district, an increase of five over the number in 1918. The movement progresses slowly in the Kandyan districts. Only four societies out of the twelve showed any vitality during the year; the scarcity of rice is given as the reason for difficulty in getting new members.

## VI.—CATTLE.

36. There were 140 cases of rinderpest in the district, of which 124 were fatal. The chief centres affected were Gampola, Pussellawa, and Hatton. There were 6 cases of anthrax at Maskeliya and 1 at Hatton. All proved fatal. Hoof-and-mouth disease appeared in twelve places. Fifty-three animals were affected, but all recovered.

## VII.—EDUCATION.

37. The number of registered village schools in the district is 128, the same as in 1918. The description of the schools is as follows:—

|   |    |                           |     |
|---|----|---------------------------|-----|
| Government boys' vernacular schools ..      | 49 | Roman Catholic schools .. | 1   |
| Government boys' Anglo-vernacular schools . | 4  | Baptist schools ..        | 2   |
| Government mixed vernacular schools ..      | 9  | Private schools ..        | 8   |
| Government girls' vernacular schools ..     | 16 |                           |     |
| Church Missicnary schools ..                | 27 |                           |     |
| Buddhist schools ..                         | 8  |                           |     |
| Wesleyan schools ..                         | 4  |                           |     |
|   |    | Total ..                  | 128 |

38. One meeting of the District School Committee was held during the year. When necessary, questions were dealt with by circulation of papers. Mr. W. A. de Silva left for England, and his place was filled by Dr. C. A. Hewavitarana. The total receipts were Rs. 62,969.54 (this includes a building grant of Rs. 20,000 received in November for expenditure in 1920); the expenditure was Rs. 28,126.72.

39. The following works were completed during the year :—

- (a) Hataraliyadda girls' school.
- (b) Muruddeniya school and attached quarters and latrine.
- (c) Hedeniya school extension.
- (d) Peradeniya new school building (main building).
- (e) Ulapane new school building and attached quarters.
- (f) Marassana school extension.

New school buildings at Deltota and Giraulla have been taken in hand.

40. In connection with hookworm campaign the following schools were provided with latrines :—

- |                             |                          |
|-----------------------------|--------------------------|
| (1) Gunnepane boys' school. | (7) Maratugoda school.   |
| (2) Mahagama school.        | (8) Talatuoya school.    |
| (3) Paranagama school.      | (9) Dedunupitiya school. |
| (4) Doragomuwa school.      | (10) Butawatta school.   |
| (5) Idamegama school.       | (11) Deltota school.     |
| (6) Halloluwa school.       | (12) Marassana school.   |

41. The following schools were recognized during the year :—(1) Madugalla ; (2) Patitalawa. Offers of free sites for these schools and for a school at Bowala were accepted.

42. The question of compulsory education for Muhammadan girls was considered by the Committee. The Committee was unanimous that the time was not yet ripe for compulsory education for Muhammadan girls.

43. Fines in school cases amounted to Rs. 3,858·60, as against Rs. 3,751 in 1918. Owing to the shortage of food in the villages, prosecutions for non-attendance were withdrawn from October onwards.

44. The average attendance at the Government village schools was 67 per cent. of the number on the roll, as against 76 per cent. in 1918. The decrease may be attributed to the hard conditions in the villages, especially in the last quarter of the year.

#### VIII.—FESTIVALS.

45. The Esala Perahera was held at Kandy from August 1 to 13, and attracted a large crowd of people. The procession on the last day was as imposing as in previous years, about sixty elephants taking part.

46. The Diyakepun Perahera of Wallahagoda Dewale was held at Gampola on September 14 and passed off uneventfully, but little interest being shown in it.

#### IX.—CRIME AND POLICE.

47. In the whole Province the number of true cases of grave crime reported to the police in 1919 was 889, as against 778 in 1918, an increase of 121 cases, but the proportion of convictions was better, namely, 42 per cent., as compared with 36 per cent. in 1918. The headmen, as a rule, co-operated harmoniously with the regular police.

48. The increase of crime is almost wholly due to an increase in the number of burglaries and of thefts over Rs. 20, and may be attributed to the high prices of rice and foodstuffs. The majority of the cases of burglary are from estate lines and mud huts. There were 7 cases of homicide in 1919, as against 12 in 1918 and 12 in 1917.

49. The new buildings for the police station at Teldeniya were occupied on July 1 ; they are well situated in the centre of the town, close to the Police Court, and are a great improvement on the rented building previously used as a station.

#### X.—LOCAL GOVERNMENT.

50. Reports of the Provincial and District Road Committees, of the Local Boards at Hatton-Dikoya, Nawalapitiya, and Gampola, and of the Sanitary Board of Kandy are attached as appendices.

#### XI.—VILLAGE COMMITTEES AND TRIBUNALS.

51. Each of the subdivisions of the nine Ratemahatmayas' divisions in the district has its Village Committee, which carries out village works and contributes to the District School Committee. In 1919 they maintained 1,150 miles of village roads and paths, 67 bridges and edandas, 223 wells and spouts, 152 ambalams, 7 Village Committee buildings, and contributed to the cost of 74 schools.

52. The total receipts for the year amounted to Rs. 28,827·79, and the expenditure to Rs. 27,704·62, the balance on December 31 being Rs. 11,156·55. The apportionment of Rs. 750 out of the Government grant to the Kandy District in aid of village works was spent on five bridges.

53. The total number of cases decided by the Village Tribunals during the year was 8,389, which is practically the same as in 1918. Of these, 1,804 were civil cases and 6,585 criminal. Amicable settlements were made in 353 civil and 939 criminal cases.

54. The number of appeals to the Government Agent was 153, as compared with 166 in 1918 ; 114 were affirmed and 39 set aside. There were 5 appeals to the Governor in Executive Council, and all the decisions were affirmed.

#### XII.—LAND.

55. Thirty small lots aggregating 28½ acres were sold, realizing Rs. 2,744·56. Thirty-five lots aggregating 227½ acres were leased in perpetuity, the premia amounting to Rs. 7,211.

56. Four notices under the Waste Lands Ordinance were settled, and one was referred to the District Court. Thirteen notices were pending at the end of the year.

#### XIII.—KANDYAN MARRIAGES.

57. The number of Kandyan marriages registered during the year was 745, as against 989 in 1918. The number of dissolutions granted was 106, one less than last year.

## XIV.—LABOUR ORDINANCE.

58. Fifteen new estates were registered, bringing the total for the Province up to 1,221. The number registered in 1909, when the Ordinance came into operation, was 489. Only one prosecution was instituted during the year for breach of the provisions of the Ordinance.

## XV.—DOG REGISTRATION.

59. The number of dogs registered in the Kandy District during the year was 11,423, an increase of 2,113 dogs over the previous year.

60. Several cases of rabies were reported. The number of dogs destroyed in the Province during the year by police was 2,508, an increase of 660 over the last year.

61. Forty-seven persons were sent by police to the Pasteur Institute, Colombo, for treatment.

## XVI.—EXCISE.

62. The arrack rent of the Central Province for the financial year 1919-20 was sold for Rs. 1,648,800, showing an increase of Rs. 323,352 on the previous year's rent. The amount of the rent has risen by 30 per cent. in the last five years, at the same time the number of arrack taverns has been reduced from 66 to 55.

63. The number of toddy taverns in the Kandy District for 1918-19 was 85, as against 92 in the previous year.

64. The number of sanctioned foreign liquor taverns, including 5 beer and porter taverns, for 1918-19 was 24; of these, 9 were not renewed.

65. The Chief Headmen consider that illicit practices are on the decrease, with the exception that there were considerable illicit sales of toddy at Ampitiya, consequent on the closing of the tavern at this place. There are five Excise Advisory Committees for the Kandy District, viz., the Kandy Municipality, the three Local Board towns, and the Revenue District.

66. One ballot was held in connection with local option in respect of foreign liquor taverns, two in respect of arrack taverns, and four in respect of toddy taverns. The ballots did not result in any of the taverns being closed.

## XVII.—IRRIGATION.

67. There are three irrigation works on which rates are recovered in the district, namely, Werapitiya Maha-ela and Palliyawela-amuna in Pata Dumbara and Elpitiya Raja-ela in Uda Palata.

68. Repairs to the Udugoda Bandara anicut in Pata Dumbara and the Siyambalagastenna anicut in Uda Dumbara were carried out from the departmental vote.

69. *Irrigation Fine Fund.*—A statement is annexed :—

| RECEIPTS.                  | Amount.<br>Rs. c. | PAYMENTS.   | Amount.<br>Rs. c. |
|----------------------------|-------------------|---|-------------------|
| Balance on January 1, 1919 | .. 626 36         | Cost of repairs to Aladeniya-amuna                              | .. 24 25          |
| Receipts during the year   | .. 99 75          | Survey of Arambepola-amuna                                      | .. 6 25           |

## XVIII.—PUBLIC WORKS.

70. The following works were completed during the year under review :—

- (1) Administration block, quarters for Sub-Inspector, sergeant, and constables, Teldeniya Police Station.
- (2) Cooly lines, Katugastota-Madulkele road.
- (3) Additions and repairs, Deltota hospital.
- (4) New hospital at Agrapatana.
- (5) Visiting apothecary's quarters near Dolosbage hospital.
- (6) Quarters for Police Inspector, Hatton.
- (7) Cooly lines on Craigie Lea, Nawalapitiya, Dolosbage, and Uda Pussellawa roads.
- (8) Widening and improving Fruithill-Strathdon road.
- (9) Stone sett paving bridge, Peradeniya road and crossing, Station Approach road.
- (10) Improving Naula-Elahera road.

## XIX.—FORESTS.

71. The following is taken from the report of the Assistant Conservator of Forests, Nuwara Eliya, as regards the work of the Forest Department in Kandy District :—

*Protection of Forests : (a) Prosecutions.*—Ten cases involving 17 persons were prosecuted during the year by the Forester, Kandy, and Forest Ranger, Hatton. Of these, 6 resulted in convictions carrying a fine of Rs. 65, 3 in acquittals, and 1 in withdrawal.

*(b) Compositions.*—Ten cases involving 11 persons were compounded by the Assistant Conservator of Forests, Northern Division, on reports made by the Forester, Kandy, and Forest Ranger, Hatton, and Rs. 135.95 was recovered as compensation.

*Timber, &c., supplied to Public Departments.*

|   | Rs.    | c. |
|---|--------|----|
| 240 cubic yards firewood to King's Pavilion, Kandy .. | 360    | 0  |
| 17,259 feet of timber to Education Department ..      | 34     | 40 |
| 8,734 cubic yards firewood to Railway ..              | 17,031 | 30 |
| Total ..  | 17,425 | 70 |

*Revenue.*—The total cost credited to revenue during the year is Rs. 9,182·39, as against Rs. 7,646·85 in 1918. The increase is due to greater demand for timber, &c.

## XX.—MISCELLANEOUS.

72. The Kandyan Art Association has continued to keep alive the Kandyan crafts and industries. During the year the trustees of the Association were incorporated under Ordinance No. 9 of 1917 during the pleasure of His Excellency the Governor. The trustees are the Government Agent, his Office Assistant, and the Muhandiram of the Kandy Kacheheri.

Kandy Kacheheri,  
May 19, 1920.

C. S. VAUGHAN,  
Government Agent.

## APPENDIX.

## I.—REPORT ON THE WORKING OF THE THOROUGHFARES ORDINANCES IN THE KANDY DISTRICT FOR 1919.

## PROVINCIAL ROAD COMMITTEE.

DURING the year 1919 the Provincial Road Committee was composed of the following members :—

*Official :* The Hon. Mr. C. S. Vaughan, Chairman; Mr. P. M. Bingham, Provincial Engineer, Central Province (North); Mr. R. A. Powell, Provincial Engineer, Central Province (South).  
*Unofficial :* Messrs. J. B. Coles, W. R. Westland, Martin M. Smith, and Hon. Mr. C. van der Wall.

2. Meetings were held every month.

3. *Encroachment.*—An encroachment was reported on the road reservation, 4th mile, Kandy-Haragama road, and survey has been applied for to enable the Committee to deal with it.

4. *Election of Native Member, District Road Committee, Kandy.*—Mr. A. Vallipuram was elected Native Member of the District Road Committee, Kandy, for the triennial period ending December 31, 1921, at the election held on January 24, 1919.

5. *Resthouses.*—The receipts and expenditure on resthouses are set out in the following statement :—

| RECEIPTS.                                      | Rs.    | c. | EXPENDITURE.                              | Rs.    | c. |
|--|--------|----|---|--------|----|
| Contributions from District Road Committees .. | 10,398 | 0  | Repairs and improvements to resthouses .. | 6,344  | 39 |

|   |    |        | 44,235 0   |
| Miscellaneous charges   | .. |        | 7,376 41   |
| Balance on December 31, 1919  | .. |        | 5,152 7    |
|   |    |        | 113,727 26 |

## BRANCH ROADS DEPARTMENT.

*Branch Roads Ordinance, No. 14 of 1896.*

The number of roads maintained during the year was 26, and the number of bridges maintained during the year 13. There was no increase in the cost of upkeep. Besides the estimates for maintenance for 1918-19, the following estimates were sanctioned by Government, viz. :—

|   | Rs.   | c. |
|---|-------|----|
| Pupuressa road, blind corners   | 816   | 39 |
| High Forest-Bramley road : Latrines to cooly lines                          | 402   | 50 |
| Huluganga-Bambaraela road : Storm damages                                   | 273   | 38 |
| Railway Gorge road : Damaged retaining wall                                 | 307   | 80 |
| Norwood-Maskeliya road : Water supply to cooly lines                        | 198   | 0  |
| Glenlyon-Preston road : Improvements to Public Works Department cooly lines | 546   | 75 |
| Norwood-Upcot road : Flood damages  | 607   | 50 |
| Lindula-Agra road : Improvements to Public Works Department cooly lines     | 1,377 | 0  |
|   | 4,529 | 32 |

## 2. Estates' contributions during the year were as follows :—

|  | Rs.    | c. |
|--|--------|----|
| On account of maintenance of roads   | 55,687 | 36 |
| On account of maintenance of bridges   | 1,265  | 87 |
| On account of additional works   | 2,190  | 16 |
| On account of reconstruction of Bridwell bridge (second and final instalment, with interest) | 2,717  | 0  |
|  | 61,860 | 39 |

*Estate Roads Ordinance, No. 12 of 1902.*

The cost of maintenance of the roads under this Ordinance during the year ended September 30, 1919, was as follows :—

|   | Amount of Estimate. |    | Government Grant. |    |
|---|---------------------|----|-------------------|----|
|   | Rs.                 | c. | Rs.               | c. |
| 1. Galagedara-Heenabowa road, 11½ miles           | 5,070               | 0  | —                 | —  |
| 2. Lantern Hill-Somerset road, 4 miles            | 3,549               | 0  | 1,300             | 0  |
| 3. Vellaioya-Shannon road, 121 chains 20 lines    | 1,387               | 0  | 418               | 0  |
| 4. Barnagalla-Pen-y-lan road, 2½ miles            | 1,500               | 0  | 600               | 0  |
| 5. Rattota-Gammaduwa road, 7 miles                | 6,195               | 0  | 1,600             | 0  |
| 6. Galaha-Pupuressa road, 7½ miles                | 3,632               | 0  | 1,400             | 0  |
| 7. Aluwihare-Dullewa gap road, 2 miles 24 chains  | 2,700               | 0  | 900               | 0  |
| 8. Kadugannawa-Paranapattiya road, 5½ miles       | 3,446               | 49 | 1,000             | 0  |
| 9. Kandenuwara-Wariapola road, 5½ miles           | 15,627              | 36 | 1,500             | 0  |
| 10. Talatuoya-Kirimetiya road, 3½ miles           | 1,600               | 0  | —                 | —  |
| 11. Alawatugoda-Ancoombra road, 6 miles 68 chains | 5,958               | 0  | —                 | —  |
| Alawatugoda-Ancoombra road (improvements)         | 3,445               | 0  | —                 | —  |
|   | 54,109              | 85 | 8,718             | 0  |

A sum of Rs. 1,250 was allotted by the District Road Committee, Kandy, for upkeep of Galagedara-Heenabowa (Rs. 1,150) and Talatuoya-Kirimetiya (Rs. 100) roads, and the latter road received a further grant of Rs. 100 from the Village Committee of Pata Hewaheta.

Provincial Road Committee,  
Kandy, April 15, 1920.

C. S. VAUGHAN,  
Chairman.

## II.—REPORT OF THE DISTRICT ROAD COMMITTEE, KANDY, FOR 1919.

THE Committee was composed of the following members :—

*Official* : Mr. O. S. Vaughan, Chairman ; Mr. P. M. Bingham, Provincial Engineer, Central Province (North) ; Mr. R. A. Powell, Provincial Engineer, Central Province (South).

*Unofficial* : Mr. W. R. Westland, Mr. R. W. Jonklaas, and Mr. A. Vallipuram, representing the European, Burgher, and Native communities, respectively ; Messrs. J. B. Coles and Martin M. Smith, Additional Members.

2. Meetings were held every month.
3. No change in the office staff occurred during the year.
4. The amount collected as commutation money in 1919 shows an increase of Rs. 961 over that collected in 1918.

5. A comparative statement of the working of the Thoroughfares Ordinances during the years 1918 and 1919 and the statement of receipts and expenditure of the District Road Committee of Kandy for 1919 are annexed :—

### Statement of Receipts and Expenditure of the District Road Committee, Kandy, for 1919.

| REVENUE.   |    | Rs.     | c. |
|--|----|---------|----|
| Balance on January 1, 1919 ..                    | .. | 8,309   | 79 |
| Commutation realized in money ..                 | .. | 73,488  | 50 |
| Toll grant on minor roads ..                     | .. | 1,400   | 0  |
| Government contribution in aid of minor works .. | .. | 23,105  | 0  |
| Miscellaneous receipts ..                        | .. | 2,221   | 85 |
|  |    | 108,593 | 14 |

| EXPENDITURE.   |    | Rs.     | c. |
|--|----|---------|----|
| Payment made on account of principal roads and resthouses ..           | .. | 31,293  | 31 |
| Amount expended on minor works ..                                      | .. | 35,850  | 15 |
| Establishment and commission to division officers :—                   |    |         |    |
| (a) Contribution on account Provincial Road Committee establishment .. | .. | 2,000   | 0  |
| (b) Cost of District Road Committee establishment ..                   | .. | 11,322  | 86 |
| (c) Commission to division officers ..                                 | .. | 6,222   | 96 |
|  |    | 19,545  | 82 |
| Miscellaneous charges ..   | .. | 4,146   | 69 |
| Balance on December 31, 1919 ..  | .. | 17,757  | 17 |
|  |    | 108,593 | 14 |

5. The expenditure of Rs. 35,850·15 on minor works was composed of the following items :—

|   | Rs.    | c. |
|---|--------|----|
| (1) Maintenance, annually recurrent ..            | 16,735 | 60 |
| (2) Improvements ..                               | 3,284  | 40 |
| (3) Voted to planters and inter-district roads .. | 4,121  | 15 |
| (4) Government grants, 1918-19 ..                 | 11,709 | 0  |
|   | 35,850 | 15 |

The sum referred to in item (3) was spent on a total mileage of 253 miles (cart roads 18 miles and bridle paths 235 miles), the work being carried out by the Planters' Associations concerned. Save in a very few cases, the grants are made by the Committee on the condition that the estates interested contribute a like amount.

6. The Government grants for 1918-19 were Rs. 250 for the Bogawantalawa-Balangoda road, Rs. 5,000 for the Nugatenna-Bintenna road, and Rs. 6,459 grant in aid for minor roads, Kandy District. On the Nugatenna-Bintenna road metalling was continued on the 24½ to 28 miles and laid on 33 to 36 miles; a retaining wall was built on the 32nd mile; and the section 36 to 39 miles improved by metalling, gravelling, and blasting rock in the side drains. Foundation and track metalling were laid on 2nd and 3rd miles of the Embilmegama-Alagalla road. This is an important village road, hitherto difficult for cart transport in wet weather. Stone-bottoming was laid on the 3rd mile of the Nanuoya-Daulagala road and on the 1st mile of the Embilmegama-Daulagala road.

7. The following grants appear in the Supply Bill for 1919-20 :—

|   | Rs.   | c. |
|---|-------|----|
| Grant in aid of minor roads, Kandy District .. .. | 6,396 | 0  |
| Nugatenna-Bintenna road .. ..                     | 5,000 | 0  |
| Bogawantalawa-Balangoda road .. ..                | 250   | 0  |

8. The mileage in charge of the Committee, exclusive of planters' and inter-district roads, is as follows :—

|                           | Miles. |              | Miles. |
|---------------------------|--------|--------------|--------|
| Cart roads :—             |        | Bridle paths |        |
| Metalled ..               | 35½    |              | 131½   |
| Gravelled and metalled .. | 22½    |              |        |
| Gravelled ..              | 10½    |              | 225½   |
| Natural surface ..        | 24½    |              |        |

April 15, 1920.

C. S. VAUGHAN,  
Chairman.

### III.—REPORT ON THE LOCAL BOARD OF GAMPOLA FOR 1919.

2. The revenue shows an increase of Rs. 1,350·91, and the expenditure an increase of Rs. 872·53.

3. *Public Health.*—The health of the town was satisfactory during the year.

4. *Water Supply.*—The Mount Temple tank was re-bottomed with cement concrete as it was leaking, and the Sinhapitiya reservoir was cleaned out several times.

5. A Sub-Committee of the Board has been appointed to draw up a scheme for providing the town with an adequate supply of water.

6. *Street Lighting.*—The lighting was improved by the addition of six new lamps purchased from Messrs. Hunter & Co., Colombo. There are now forty-four street lamps in the town.

7. *Public Latrines.*—These were regularly flushed and disinfected during the year. Steps are being taken to construct a public latrine at Sinhapitiya.

8. *Sanitation.*—(i.) A large number of house owners were compelled to provide latrine accommodation for their houses. This facilitated the work of the anchylostomiasis campaign, which was continued throughout the year.

(ii.) Application was made to the Police Magistrate under the Housing Ordinance for closing orders in respect of ten premises, and all were granted.

9. The scavenging of the town and the latrine conservancy were satisfactorily carried out by the contractor.

10. *Public Markets.*—The markets were painted and kept clean. The question of constructing a new public market on a better site for meat, fish, vegetables, &c., has been referred to a Sub-Committee of the Board.

11. *Bakeries, Eating-houses, &c.*—These were periodically inspected by the Assistant Sanitary Officer, Nawalapitiya, and with the help of the new by-laws passed towards the end of the year efforts are being made to improve their condition.

12. *Cemetery.*—The cemetery was kept in good order. There were 83 burials during the year.

13. *Cattle Disease.*—There was a serious outbreak of rinderpest in June, which lasted for four months. Out of a total of 97 cases attacked, 53 proved fatal. The first occurred among a number of animals that had been recently brought from Colombo.

14. *Peace Celebrations.*—These were of a befitting nature, and included the distribution of alms among the poor and treat to school children. The whole town was gaily decorated and illuminated.

15. The shortage of rice was keenly felt in Gampola, as in other parts of the Island. A relief society was formed, and paddy and rice were freely distributed among the poor.

16. The food control work is in the hands of a Local Committee, with the Police Magistrate as Chairman.

17. *Constitution of the Board.*—Chairman: The Government Agent, Central Province, Kandy; Official Members: Dr. L. de la Harpe, District Medical Officer, and Mr. J. L. Longbottom, District Engineer, Pussellawa; Unofficial Members: Messrs. E. G. Jonklaas, T. B. Panabokke, and D. S. de Simon.

18. Mr. A. N. Hutt, having succeeded Mr. R. B. Naish as Police Magistrate, was appointed Deputy Chairman in September, 1919.

19. Twelve ordinary meetings were held during the year. The biennial election was held in December, when the sitting members were returned unopposed.

20. Statements of collections under the Thoroughfares Ordinances and of loans are annexed:

Comparative Statement showing the Working of the Thoroughfares Ordinances in 1918 and 1919.

#### Return of Debt for 1919.

|   |                                     |
|---|-------------------------------------|
| Year in which the loan was raised ..      | 1901 and 1904                       |
| Original amount of loan ..                | 1901: Rs. 6,200<br>1904: Rs. 25,000 |
| Present amount of loan ..                 | Rs. 26,840                          |
| Rate of sinking fund ..                   | 2 per cent.                         |
| Rate of interest ..                       | 3½ per cent.                        |
| Annual amount payable for sinking fund .. | Rs. 776.60                          |
| Annual amount payable for interest ..     | Rs. 939.40                          |
| Date when loan will be extinguished ..    | May 31, 1926                        |

\* *Remarks.*—For all loans prior to 1905 the annual amounts paid for sinking fund were formerly treated as instalments in reduction of the original loan. In that year the loans were consolidated, and sinking fund and interest made payable on the original amount of the loans. Interest, however, is only taken by Government on the amounts of the loans as they stood in 1905, the balance of the annual payment being invested as a sinking fund, and a date given for the extinction of the debt. The sinking fund is invested by the Colonial Treasurer. The sinking fund system is in accordance with law. The whole amount due as interest and sinking fund as shown above for the year 1919 has been paid to the Colonial Treasurer.

Kandy Kachcheri,  
April 9, 1920.

VAUGHAN,  
Chairman.

## IV.—REPORT OF THE LOCAL BOARD OF NAWALAPITIYA FOR 1919.

*Revenue and Expenditure.*—A comparative statement of revenue and expenditure for 1918 and 1919 is annexed :—

The revenue of 1919 shows a decrease of Rs. 4,009·27, but, as pointed out in last year's report, the revenue of 1918 included under Miscellaneous a sum of Rs. 7,500 withdrawn from the fixed deposit, and Rs. 4,750 refund of advances, which cannot be considered as revenue proper. The item of Rs. 8,080·46 under Miscellaneous for 1919 included a sum of Rs. 2,500 withdrawn from fixed deposit, and Rs. 5,000 loan obtained from Government. Apart from the head Miscellaneous, the revenue for 1919 shows an increase of Rs. 1,355 over that of 1918, testifying to the gradual recovery of the town after the outbreak of plague, but the revenue is still Rs. 3,000 behind that of 1917, the year before the plague. Assessment rate for 1919 was based on site value within the *tagaram* area, as houses had not in general been reoccupied or rebuilt by the end of the year. The expenditure includes a sum of Rs. 1,000, being first instalment of a contribution of Rs. 10,000 payable in this year, which Government decided the Board should pay towards the cost of dealing with the outbreak of plague ; a sum of Rs. 750, being instalment and interest on the new loan of Rs. 5,000 received early in 1919 ; and a sum of Rs. 1,430 on account of draining the swamp.

2. *Public Health.*—The health of the town was satisfactory ; except for the occurrence of a few cases of influenza, there was no outbreak of infectious disease.

3. *Water Supply.*—The improvements to the intake main pipe are still being carried on under the supervision of the District Engineer, and the work will, it is expected, be finished within a short time, when the question of extending services to private houses can be settled.

4. *Lighting.*—Twenty-two duplex lamps are in use ; the Wells' lights were discontinued owing to the high cost of mantles.

5. *Public Latrines.*—The repairs to the public latrines have been attended to, and they were flushed and disinfected daily. They were always kept clean and in a sanitary state.

6. *Sanitation.*—The sanitary condition of the town was fairly satisfactory. The drains were regularly flushed and kept in proper repair. The night soil depôt in Bailey road was closed, and a new temporary depôt in railway land on Gampola road opened instead. The Nawalapitiya Building Syndicate began the building of some model dwellings in Kotmale and Dolosbage roads.

Thirty-six applications were made to the Police Magistrate for closing orders under the Housing and Town Improvement Ordinance, and all were granted. The filling up of the swamp with coke, commenced by the Railway Department in December, 1918, was completed in May, 1919. The Public Works Department laid drains for the swamp, and constructed a back lane along one side of the land thus reclaimed, connecting Ambagamuwa and Market roads.

The filling up of the swamp has added greatly to the healthiness and amenity of the town, and has provided the inhabitants with a recreation ground. During the year Government has sanctioned an extensive scheme for street widening and acquisition of land for back lanes to the main streets, the cost to be defrayed from the general revenue.

7. *Public Markets.*—The markets were regularly inspected and kept clean.

8. *Eating-houses, Bakeries, and Dairies.*—These were regularly inspected and kept clean. By-laws regarding the registration of eating-houses and tea and coffee boutiques have been recently framed and passed by the Board, and will lead to better sanitary conditions.

9. *Cemetery.*—The cemetery was maintained in good order. There were 31 burials during the year.

10. *Town Survey.*—The survey of the town was continued by the Government surveyors.

11. *Plague Precautions.*—A rat campaign under the supervision of Dr. S. F. Chellappah, Assistant Sanitary Officer, is being carried on. The total number of rats seized and sent for examination of plague bacilli during the year was 2,725. No infected rats were found.

12. *Rice Control.*—The scarcity of rice was keenly felt since June. The Nawalapitiya Relief Society under Dr. A. A. M. Werapemall as Chairman took up the management of rice control. Rice cards were issued from end of June, rice being issued at the Local Board Office. Later the distribution was entrusted to the traders, but this system was discontinued early in the present year, as the Society opened its own depôt.

13. *Miscellaneous.*—His Excellency the Governor paid a visit to the town on January 7. Peace Celebrations were held on Peace Day, July 19. A memorial tree, *Peltophorum ferrugineum*, was planted in the hospital grounds. There was a procession of school children, with sports and feeding of the poor, decorations and illuminations of houses, and fireworks. The Board spent Rs. 250 on the decorations, augmented by private contributions.

14. *Unofficial Members.*—An election of Unofficial Members took place at the Local Board Office in December, 1919, and the same members were re-elected.

15. *Constitution of the Board.*—Chairman: Hon. Mr. C. S. Vaughan, Government Agent, Central Province; Official Members: Mr. J. C. Cooper, District Engineer, Dimbula; Dr. A. A. M. Werapemall, District Medical Officer, Nawalapitiya; Unofficial Members: Mr. F. J. Fernando, Mr. J. A. F. Atapattu, and Mr. H. O. Lebbe.

*Inspector.*—Mr. J. M. Ponniah of the Sanitation Department was seconded for service under this Board as Sanitary Inspector from February 1, 1919.

*Cemetery-keeper.*—Mr. H. E. Edema succeeded Mr. C. Cole, who left the services of the Board to take up an appointment in the Railway Department.

16. *Meetings.*—Twelve ordinary meetings of the Board were held during the year under review.

17. Statements of collections under the Thoroughfares Ordinances and of Loans are herewith annexed:—

Comparative Statement showing the Working of the Thoroughfares Ordinances in 1918 and 1919.

|   | 1918. |       | Percentage on<br>Number<br>under Head 2. | 1919. |       | Percentage on<br>Number<br>under Head 2. |

| 7. Unaccounted for ..   | —     | —     | —  | —     | 18    | 2.13                                     |

## Statement of Loans.

|   |                      |             |
|---|----------------------|-------------|
| The years in which the loans were raised .. | 1899 and 1900        | 1918        |
| Original amount of loans ..                 | (1899 : Rs. 13,400 ) | Rs. 3,000   |
|   | (1900 : Rs. 10,000 ) |             |
| Present amount of loans ..                  | Rs. 16,179.06        | Rs. 4,500   |
| Rate of sinking fund ..                     | 2 per cent.          | —           |
| Rate of interest ..                         | 3½ per cent.         | 5 per cent. |
| Annual amount payable for sinking fund ..   | Rs. 720.74           | —           |
| Annual amount payable for interest ..       | Rs. 566.26           | Varied      |
| Date when the loans will be extinguished .. | May 31, 1922         | 1928        |

*Remarks.*—For all loans prior to 1905 the annual amounts for sinking fund were formerly treated as instalments in reduction of the original loan. In that year the loans were consolidated, and sinking fund and interest made payable on the original amount of the loans. Interest, however, is only taken by Government of the amount of the loans as they stood in 1905, the balance of the annual payment being as a sinking fund and a date given for the extinction of the debt. The sinking fund is invested by the Colonial Treasurer. The sinking fund system is in accordance with law. The whole amount due as interest and sinking fund as shown above for the year 1919 has been duly paid to the Colonial Treasurer. The Loan of Rs. 5,000 is to be repaid in ten annual instalments of Rs. 500 each, with 5 per cent. interest on the balance.

Kandy Kachcheri,  
April 25, 1920.

C. S. VAUGHAN,  
Chairman.

## V.—REPORT OF THE LOCAL BOARD OF HATTON-DIKOYA FOR 1919.

A COMPARATIVE statement of the revenue and expenditure for the years 1918 and 1919 is appended :—

2. *Revenue*.—The revenue of the Board for 1919 shows an increase of Rs. 419·90.
3. *Expenditure*.—The total expenditure was about the same as in 1918, but exceeded the revenue by Rs. 1,521. Expenditure under Miscellaneous includes a sum of Rs. 350 on Peace Celebrations, Rs. 273·50 on cattle segregation camps, and Rs. 207·50 on an incinerator for Dikoya.
4. *Health*.—There were 8 cases of chickenpox, 17 of measles, and 2 of enteric fever. There was no plague or smallpox.
5. *Cattle Disease*.—There were 44 cases of rinderpest, of which 25 proved fatal. There was no hoof-and-mouth disease. The question of a quarantine camp for cattle received from other places was under the consideration of the Board for some time, and the Board has now selected a site for this purpose.
6. *Lighting and Sanitation*.—The lighting of the street lamps, the scavenging, and the latrine conservancy are done by a contractor. Applications were made to the Police Magistrate under the Housing and Town Improvement Ordinance for closing orders in respect of fifty-eight insanitary houses, and all were granted.
7. *Local Board Roads*.—The road leading to the recreation ground has been improved to enable vehicular traffic to enter the ground.
8. *Markets*.—The public markets were well kept during the year.
9. *Bakeries*.—The bakeries were clean and well kept.
10. *Constitution of the Board*.—Chairman, the Government Agent of the Central Province, Kandy; Official Members: Mr. W. J. Price, District Engineer, Dikoya; Dr. C. E. van Rooyen, District Medical Officer, Dikoya; Unofficial Members: Messrs. T. C. van Rooyen, H. Tambirajah, and Rev. A. S. Beaty.
- Staff*.—Mr. N. H. Martin, Secretary and Inspector, and Mr. L. B. Abeykoon, Sanitary Inspector.
11. The Board held twelve ordinary meetings during the year. An election was held in December to elect three Unofficial Members for the years 1920 and 1921. Mr. H. Tambirajah, Proctor, re-elected; there were no other candidates.
12. *Miscellaneous*.—Peace Day was celebrated on July 19 by feeding the poor and gatherings of the school children. The distribution of rice for the town and district was supervised by Mr. A. R. Aitken of the Hatton Bank, with the advice of a small Local Committee.
13. Statements are annexed of collections under the Thoroughfares Ordinances and of Loans:—

| Rate of interest ..                       | 3½ per cent. ..                               | 4½ per cent. |
| Annual amount payable for sinking fund .. | Rs. 468·50 ..                                 | —            |
| Annual amount payable for interest ..     | Rs. 521·50 ..                                 | Varies       |
| Date when loan will be extinguished ..    | November 30, 1925 ..                          | 1921         |

*Remarks*.—For all loans prior to 1905 the annual amounts paid for sinking fund were formerly treated as instalments in reduction of the original loan. In that year the loans were consolidated, and sinking fund and interest made payable on the original amount of loans. Interest, however, is taken by Government only on the amounts of the loans as they stood in 1905, the balance of the annual payment being invested as a sinking fund, and a date given for the extinction of the debt. The sinking fund is invested by the Colonial Treasurer. The sinking fund system is in accordance with law. The whole amount due as interest and sinking fund as shown for the year 1919 has been duly paid to the Colonial Treasurer. The loan of Rs. 4,000 is to be repaid in eight annual instalments of Rs. 500 each, with 4½ per cent. interest on the balance.

Kandy Kachcheri,  
April 28, 1920.

Chairman.

## VI.—REPORT ON THE SANITARY BOARD OF THE KANDY DISTRICT FOR 1919.

THE Sanitary Board of the Kandy District has control of the following eleven towns :—Wattegama, Pussellawa, Norwood, Bogawantalawa, Maskeliya, Kadugannawa, Teldeniya, Mailapitiya, Galaha, Huluganga, and Ulapane.

2. The Board consisted of the following members :—The Government Agent, Central Province, Chairman; the Provincial Engineer, Central Province (North); the Provincial Surgeon, Central Province; Mr. Martin M. Smith; Mr. J. B. Coles; Mr. R. E. Paranagama, Ratamahatmaya, Pata Dumbura; Mr. A. J. W. Marambe, retired Ratamahatmaya, Uda Bulatgama. Twelve meetings were held during the year under review.

3. The towns are in charge of an Assistant Sanitary Officer and three trained Sanitary Inspectors appointed by the Senior Sanitary Officer. Mr. E. G. Canagasabey, who was in charge of Wattegama, Teldeniya, Huluganga, and Mailapitiya, was transferred on July 7, 1919, and was succeeded by Mr. T. A. de Silva. Sanitary Inspector Mr. Caldera, who was in charge of Norwood, Bogawantalawa, and Maskeliya, was transferred on October 20, 1919, and the vacancy was filled by Mr. Felix de Soya. Mr. H. P. B. Ukuwela remained in charge of Kadugannawa, Pussellawa, Galaha, and Ulapane. Their work is supervised by the Assistant Sanitary Officer, and also by the Honorary Sanitary Supervisors appointed by the Planters' Associations. The assistance given by these gentlemen is much appreciated by the Board.

4. The following statement shows the revenue and expenditure of each town and balances to their credit :—

| Name of Town. | Balance on<br>December 31,<br>1918. |    | Receipts<br>in 1919. |    | Payments<br>in 1919. |    | Balance on<br>December 31,<br>1919. |    |
|---------------|-------------------------------------|----|----------------------|----|----------------------|----|-------------------------------------|----|
|               | Rs.                                 | c. | Rs.                  | c. | Rs.                  | c. | Rs.                                 | c. |

| Kadugannawa   | 46                                  | 26 | 2,847                | 44 | 2,111                | 24 | 782                                 | 46 |
| Teldeniya     | 2,963                               | 83 | 1,430                | 16 | 2,030                | 41 | 2,363                               | 58 |
| Mailapitiya   | 620                                 | 66 | 537                  | 12 | 536                  | 63 | 621                                 | 15 |
| Galaha        | 118                                 | 22 | 1,368                | 47 | 1,283                | 20 | 203                                 | 49 |
| Huluganga     | 119                                 | 3  | 813                  | 96 | 926                  | 34 | 6                                   | 65 |
| Ulapane       | 1,176                               | 11 | 668                  | 70 | 823                  | 12 | 1,021                               | 69 |
| Total         | 18,554                              | 18 | 18,619               | 24 | 18,758               | 69 | 18,414                              | 73 |

5. The following towns are supplied with public latrines :—Wattegama, Pussellawa, Norwood, Bogawantalawa, Maskeliya, Kadugannawa, Teldeniya, and Galaha. Conservancy of all these latrines was carried out satisfactorily during the year. A new latrine was erected at Maskeliya, and repairs were effected to the latrines at Pussellawa and Norwood. In October the Board took charge of the conservancy of some of the private latrines of Kadugannawa. The scavenging of all the towns was satisfactorily carried out under the supervision of the District Medical Officers and Sanitary Inspectors.

6. *Drainage.*—A sum of Rs. 1,025 was spent on the construction of drains at Teldeniya, in addition to a sum of Rs. 1,000 allowed from Government vote for the construction of side drains in bazaars on main roads. On the Board's recommendation Government has sanctioned a survey of the town of Bogawantalawa with a view to improving the drainage.

7. *Waterworks.*—Necessary repairs were effected to the waterworks at Bogawantalawa.

8. *Markets.*—The question of constructing markets at Wattegama and Teldeniya is under consideration.

9. *Health.*—On the whole, the health of the people has been satisfactory.

10. *Education.*—An attendance officer has been appointed by the Board under the Rural Schools Ordinance on a salary of Rs. 60 per annum to look after the progress of school work at Kadugannawa.

11. *Cemetery.*—A piece of land for a burial ground has been acquired by the Board at Teldeniya.

12. A sum of Rs. 21.55 was spent on the destruction of stray dogs in Sanitary Board towns during the year.

13. The clerical staff consisted of two clerks; both of them were discontinued at the beginning of 1919, and new clerks appointed in their places.

14. Owing to lack of funds for the needs of the towns, the assessment rates at Kadugannawa, Galaha, Huluganga, and Bogawantalawa were raised from 4 per cent. to 6 per cent., and the water-rate at Galaha was also raised to 6 per cent.

Kandy, May 1, 1920.

C. S. VAUGHAN,  
Chairman.

## REPORT ON THE MATALE DISTRICT FOR 1919.

Area, 928½ square miles; Population in 1911, 108,367.

## \* IMPORTANT EVENTS AND ADMINISTRATIVE CHANGES.

Food control was initiated on May 9 consequent on the curtailment of rice supplies from India.

The signing of the Treaty of Peace with Germany was celebrated on July 19 with great enthusiasm throughout the district. At Matale the proceedings commenced with the planting of a commemoration tree, followed by a police ceremonial parade, at which war service certificates were presented to officers and men. At 10.30 A.M. there was a ceremony on the esplanade attended by the general public and all schools within a radius of 5 miles from the town. The gathering was addressed in English, Sinhalese, and Tamil, a salute fired, the National Anthem sung, and the schools marched past saluting the flag. The poor were then fed, and the school children provided with breakfast. The afternoon was occupied in sports for the schools. At dusk the town and esplanade were brilliantly illuminated. A *perahera* consisting of twenty-two elephants and numerous troupes of dancers proceeded through the town, and there were effective displays of fireworks at the police station and on the esplanade. The chain of hills surrounding the Matale valley was illuminated by bonfires under a scheme organized by the Matale Planters' Association, but rain and cloud unfortunately spoiled the full effect of these fires. In the rural areas the occasion was celebrated by almsgivings and illuminations at the temples.

On November 11 the anniversary of the signing of the armistice with Germany was observed by a solemn silence and cessation of all business and movement for two minutes at 11 A.M. The signal in Matale town was given by the tolling of bells.

There are no administrative changes to be recorded.

## REVENUE AND EXPENDITURE.

The revenue for the financial year 1918-19 was Rs. 160,185.68, as against Rs. 140,514.02 for the previous financial year, representing an increase of Rs. 19,671.66. Recoveries under heads Licenses, Fees of Court, and Land Revenue were responsible for the increase. The expenditure on account of the Assistant Government Agent's Department amounted to Rs. 32,173.02, as against Rs. 31,062.18 in 1917-18.

## CONDITION OF THE PEOPLE.

*Public Health.*—The general health of the district has been satisfactory. There were no outbreaks of epidemic disease. The birth-rate was 41.2 per 1,000 and the death-rate 48.7 per 1,000, as compared with 52.6 and 57.5 respectively in 1918.

The incidence of malaria was normal. Preventive measures taken include the clearing of compounds of houses, the burning of rubbish, and the distribution of quinine through vaccinators and school teachers.

Parangi is endemic in the northern part of the district. The hospital at Dambulla is a central institution for the treatment of this disease by the intravenous injection of kharsivan, salvarsan, and mercuric arsenious iodide solution.

The anchylostomiasis campaign has been continued throughout the year. A large number of estates have received post-campaign treatment, and nearly 4,000 latrines have been installed in villages under the supervision of the four Sanitary Inspectors working under the Assistant Sanitary Officer, Matale. The Matale Planters' Association, however, in its annual report for 1919, expresses the opinion that the treatment does not effect a permanent cure, and concludes its remarks on the subject as follows:—  
“It is high time that further research for a definite cure should be undertaken, pending the discovery of which post-campaign treatment should be confined to coolies infected up to the point where their working capacity becomes impaired.”

*Industries.*—Industries are almost entirely agricultural. The chief are the cultivation of paddy, kurakkan, and other fine grains, tea, rubber, coconuts, cacao, and cardamoms. Mica of indifferent quality has been found in small quantities.

*Food.*—Rice and kurakkan form the staple food of the people. Crops were satisfactory throughout the year, and a considerably increased acreage was sown with these products. The northern and part of the eastern portions of the district are practically self-supporting in the matter of foodstuffs, but in the remainder of the district local supplies have to be supplemented by imported rice. Apart from the estate population, the average weekly consumption of imported rice since the commencement of weekly rice issues by the Food Controller in July last has been 544 bags of 2½ bushels each.

The high price of rice throughout the year inflicted considerable hardship on the poorest classes of the population. The people have met the situation with remarkable patience and fortitude. They have made use of substitutes, such as flour and yams, and have cultivated with foodstuffs far more land than they have ever done in the past. There has fortunately been no distress, and this is largely due to the fact that there is no lack of employment, the tea and rubber estates being always prepared to employ large numbers of local labourers. The price of paddy and kurakkan moved up in sympathy with the price of imported rice. Local producers who had a surplus for sale thus made large profits. The coolies and non-agricultural classes have been the chief sufferers.

Land settlement is one of the urgent requirements of the district. Very little has yet been done by the Land Settlement Department, and little more can be hoped for until the staff of Settlement Officers is increased. The bulk of the chena lands under ten years' growth are claimed against the Crown, frequently on very doubtful titles; but until these titles are settled, neither the claimants nor prospective purchasers are in a position to develop them. These unsettled areas are so extensive that the present position of affairs is a serious bar to progress.

## AGRICULTURE AND FOOD PRODUCTION.

**Paddy.**—The acreage cultivated with paddy was 19,907 acres, as compared with 17,924 acres in 1918. This very satisfactory increase of nearly 2,000 acres was due to the appreciation by the people of the urgency of the food situation, in view of the curtailment of supplies of rice from India, the inducement of high prices for locally-grown paddy, and the individual efforts of the headmen and the members of the Food Production Committee and its staff of agricultural instructors in stimulating and encouraging production. The methods adopted were the strict enforcement of the irrigation rules providing, *inter alia*, for (a) the efficient maintenance of tanks, anicuts, and channels; (b) the cultivation of every existing field; and (c) punctual sowing at the proper season, and the insistence on a high standard of energy and efficiency on the part of the irrigation headmen. A considerable extent of land abandoned for many years past has been cultivated. Several new works are under consideration; these will be detailed below under head "Irrigation."

Weather conditions were, on the whole, favourable, the rainfall being well distributed throughout the year. The total crops harvested amounted approximately to 540,505 bushels, as against 490,880 bushels in 1918.

The easy terms offered by Government in August last for the purchase or lease of Crown lands suitable for paddy cultivation have evoked very little response in this district. The chief reason is that there is scarcely any new land irrigable under existing tanks, anicuts, and channels, but in one or two instances applicants have preferred to apply for the purchase of the land outright on the ordinary terms, presumably owing to a dislike of the condition which requires the bringing of the land under cultivation within a fixed period under pain of forfeiture.

**Dry Grains.**—5,019 acres were cultivated with kurakkan and other dry grains, as compared with 4,188 acres in 1918. As with paddy, the increase has been due to high prices, rice shortage, and the efforts of the headmen, Food Production Committee, and agricultural instructors. Crops were satisfactory, the yield being approximately 84,353 bushels, as compared with 48,091 bushels in 1918.

The offer by Government to estates of chena lands for cultivation of foodstuffs for two years at a nominal rent elicited only two applications. This is due to the fact that (a) the estate labour force is fully occupied in its ordinary work; (b) so many of the available chenas are claimed, thus necessitating action under the Waste Lands Ordinance.

**Vegetables.**—The area under vegetables was 686 acres, as compared with 438 acres in 1918. Crops were satisfactory.

**Rubber.**—The year has been, on the whole, favourable. The district is practically free from serious pests. Very little new clearing has been undertaken during the year.

**Tea.**—Crops have been below the average owing to unfavourable climatic conditions. The market has been good with rising prices. The acreage under cultivation has not increased.

**Cacao.**—The weather has not been altogether favourable. The spring crop was poor, but was fortunately succeeded by a good autumn crop. This product is being eradicated on a number of estates to make way for tea and rubber. The market has been good.

**Cardamoms.**—Crops poor. Cultivation has been neglected owing to low prices.

**The Rubber Thefts Prevention Ordinances, 1908 and 1917.**—Six prosecutions were instituted under this Ordinance. Convictions were obtained in four cases. Messrs. C. P. Anderson (Chairman of the Matale Planters' Association) and H. D. Garrick have rendered valuable service to the police in investigating the yield of the trees on the lands in respect of which these prosecutions were instituted. There is, however, good reason to believe that thefts of latex are still prevalent, and the planting community generally has not availed itself as much as might have been expected of these undoubtedly practical enactments for the prevention and detection of such thefts.

## THE MATALE FOOD PRODUCTION COMMITTEE.

The Food Production Committee was constituted early in March, and took over the organization and assets of the earlier Matale Food Production Society, which had done valuable work in the district since its formation in 1917. The Committee is very fortunate in having among its members five experienced planters of the district, men who have contributed very largely to the success of its operations. The personnel of the Committee is as follows:—The Assistant Government Agent (Chairman), the Director of Agriculture, the Secretary of the Ceylon Agricultural Society, the Acting Divisional Agricultural Officer of the Central Division, the Divisional Irrigation Engineer, the Assistant Conservator of Forests, the Ratemahatmayas of Matale South, North, and East, Messrs. C. P. Anderson (Chairman, Matale Planters' Association), H. D. Garrick, A. B. Thomson, J. Barber, and R. Senior-White (Honorary Secretary). Meetings have been held monthly at the Kacheheri.

At the commencement the Committee was provided with only two agricultural instructors, but on its urgent representations the number has now been increased to eight. These instructors are stationed at Matale, Ukuwela, Rattota, Paldeniya, Galewela, Dambulla, Kongahawela, and Pallegama. Their work covers the whole district.

The policy of the Committee is, by the personal efforts of the members and the instructors, to encourage and stimulate the increased production of foodstuffs, to improve methods of cultivation, and to supervise closely the work of the irrigation headmen. It has a demonstration garden in Saxton Park, Matale; a chena experiment station at Maningomuwa; and a nursery garden at Kaikawela.

Arrangements have been made to hold village shows at Matale, Rattota, and Paldeniya in May next. Successful village shows at these centres were held in February last under the auspices of the Food Production Society.

The Committee has given me most valuable advice and assistance in regard to the development of food production in the district. Messrs. Senior-White and Thomson deserve considerable credit for the interest they have taken in the erection of a temporary anicut across the Kalu-ganga by the lessees of the Nikawella fields, about 80 acres in extent, which have been abandoned for many years past. The anicut unfortunately breached shortly before completion during the heavy rains last November, but it is expected that it will now be completed at an early date.

Mr. R. Senior-White has acted as Honorary Secretary throughout. His duties have been arduous and exacting, and I desire to place on record my appreciation of the unflagging energy and ability with which he has carried out his duties.

## FOOD CONTROL.

The system of rice control and distribution in Matale District is concisely summarized by the Food Controller in his report for 1919, and I cannot do better than quote the following extract therefrom :—

70. The rice allotted by the Food Controller was consigned from the Chalmers Granaries to the Assistant Government Agent, who divided it up amongst four selected wholesale traders in Matale town. Retail traders of Matale town and outlying parts of the district obtained their rice from these wholesale traders on permits from the Secretary, Local Board, and the Ratamahatmayas, respectively.

71. It was not found necessary to introduce a card system, though in Matale town no trader was allowed to sell more than one-eighth of a bushel to any one person in any one day. The returns forwarded weekly by the four wholesale traders gave figures of the rate at which rice went into consumption, and as the consumption per head under this system was well under two measures per head per week, it was not considered necessary to introduce any more stringent check on sales to individuals, either in the form of registers of sale or food cards. The total allotment was not large, being finally fixed at about 500 bags per week.

72. In fixing control prices in Matale town, 6 cents per bag of 2½ bushels was allowed for cartage, 6 cents for handling, and 50 cents profit, whilst an additional profit of 40 cents per bushel was allowed for sale by the measure.

It was found, however, early in December, that the consumption in Matale town was increasing, owing to the seasonal shortage of locally-grown paddy and other substitutes, and arrangements were made for the introduction of a card system from the beginning of this year.

On June 13 an order was made prohibiting the removal of paddy or rice from the Matale District except under permit, and on June 19 this prohibition was extended to kurakkan. On August 14 an order was made prohibiting the purchase by estates in this district of any paddy, country rice, or kurakkan grown in the district. This order was found necessary owing to the depletion of village stocks by extensive purchases by estate managers.

The price of paddy, country rice, and kurakkan has also been controlled in Matale town, and at all bazaars throughout the district.

## HOSPITALS AND DISPENSARIES.

There are hospitals at Matale and Dambulla, and dispensaries at Aluwihare, Elkaduwa, Rattota, Nalanda, Paldeniya, Galewela, Kongahawela, Gammaduwa, and Maussaheriya. There are also branch dispensaries at Madawala, Naula, Yatawatta, Kirioruwa, Golahenwatta, Madipola, Elahera, Kamburawa, Opalgala, Pallegama, Inamalawa, Ereula, and Pannampitiya. 12,943 persons were treated at the hospitals, and 50,401 at the dispensaries.

## CATTLE DISEASE.

The health of cattle has been good. The district was not affected by any disease of a serious or infectious nature.

## EXCISE.

The arrack rent is part of that of the Central Province. There are seven taverns in the district. The consumption from January 1 to December 31, 1919, was 19,029 gallons, as against 18,955 gallons in the preceding year.

The toddy rents are held by small local capitalists. The number of sanctioned taverns was 29, as against 34 for 1917-18. The rents for 1918-19 realized Rs. 82,260, as compared with Rs. 70,800 for 1917-18 and Rs. 77,280 for 1916-17.

Foreign liquor licenses realized Rs. 1,504, as against Rs. 2,267 for 1917-18. The fall was due to a reduction in the fees for the Matale hotel bar, the Matale town tavern, and two retail "off" licenses.

The Excise Staff consisted of three Inspectors and six peons stationed at Matale, Rattota, and Dombawela. Co-operation between the Excise Department, police, and headmen has been satisfactory. Improved control has diminished illicit practices, but there has been no marked increase or decrease in drunkenness.

Ballots under the local option rules were held in respect of Udasgiriya and Weragama toddy taverns. No votes were polled in respect of the Udasgiriya tavern, as those attending the poll failed to produce road tax receipts, certificates of performance of labour, or certificates of efficiency as members of the Ceylon Defence Force. Only 35 votes were polled for the closure of the Weragama tavern out of 375 tax-paying inhabitants.

## EDUCATION.

The District School Committee consisted of the following members :—The Assistant Government Agent (Chairman), the Director of Education, the Rev. Father Pius Fernando, Mr. S. M. P. Wijeyetilleke, Mr. H. T. Roper, the Rev. S. F. Pearce, and the Ratamahatmaya, Matale South. The Committee met twice during the year. The revenue amounted to Rs. 4,769.18, and the expenditure to Rs. 3,796.50.

In Matale town there are 3 English (1 provisionally recognized), 2 Sinhalese, and 2 Tamil vernacular schools, as well as 2 vernacular schools provisionally recognized. In the district outside Matale town there are 30 Government vernacular schools and 21 grant-in-aid schools, the latter being managed by the following bodies :—Friends' Mission, 13 schools; Buddhist Theosophical Society, 3 schools; Baptist Mission, 4 schools; Roman Catholic Mission, 1 school.

The new school building at Hanwella is almost completed. A new school building to replace the old one at Puwakpitiya has been sanctioned, and the work given out on contract. Extensions to Kuriwela and Owilikande schools have also been sanctioned. Latrines have been built at Yatawatta, Kaikawela, and Palapatwela, and the Committee has provided funds for their installation at Galewela, Kuriwela, Pussella, Akuramboda, and Madipola. School buildings have been satisfactorily maintained.

The education of boys and girls is compulsory, but the Committee does not consider it desirable to enforce the attendance of girls at mixed schools.

Most of the Government schools have gardens, and every effort is being made to stimulate an interest among the children in gardening and agriculture. Arrangements have been made to supply a few of the schools with beehives.

## POLICE AND CRIME.

The total number of true cases of grave crime reported in 1919 was 160, as against 153 in 1918, 118 in 1917, and 147 in 1916. There were 2 true cases of homicides, as against 6 for the previous year. One case ended in conviction and one is pending. The causes were jealousy over women and sudden quarrel, respectively. The weapons used were the knife in one case and the mamoty in the other case.

Cases of burglary and grievous hurt show an increase over the 1918 figures; arson, robbery, and theft over Rs. 20 cases show a decrease. There has been an increase in cattle stealing, 12 true cases having been reported, as against 3 in 1918. Exposure of children 2 cases, as against nil in 1918; attempted homicide 1 case, as against nil in 1918; and riot 2 cases, as against nil in 1918.

Regular police are stationed at Matale and Rattota. The Matale station is subdivided into Matale town and Matale District stations. The town station deals with all crime in Matale town, while the district station investigates all cases of particularly serious crime in Matale South and North. The Rattota station deals with crime in Rattota town and cases of particularly serious crime in Matale East. The strength of the stations is as follows:—Matale town: 2 sergeants and 14 constables; Matale District: 2 sergeants and 4 constables; and Rattota: 1 sergeant and 4 constables.

The three police stations are in charge of a Sub-Inspector stationed at Matale, who is subordinate to the Assistant Government Agent in his capacity of Additional Superintendent of Police, Matale. The Assistant Government Agent is responsible for the investigation of crime throughout the district. Co-operation between the police and headmen has been satisfactory.

A Police Boys' Brigade was started during the year. The strength of the Brigade is 9. The boys are smart and keen, and have been well trained by the Sub-Inspector.

A ceremonial parade was held on Peace Celebration Day. The Force and the Boys' Brigade turned out smartly and went through the various movements well. War service certificates were presented by the Assistant Government Agent.

## LOCAL GOVERNMENT.

Matale town is administered by a Local Board, which is the subject of a separate report.

*Sanitary Board.*—The Board consisted of the Assistant Government Agent (Chairman); the Medical Officer, Matale; the District Engineer, Matale; the District Engineer, Nalanda; Mr. T. B. Ellepola, Ratemahatmaya, Matale North; and Mr. D. B. Uduwawela, Ratemahatmaya, Matale East.

Five small towns are controlled by the Sanitary Board, namely, Palapatwela, Madawela, Kawudu-pelella, Dambulla, and Rattota. Owing to the smallness of the revenue, little beyond scavenging can be done. Of these towns, only Rattota has a public market, and arrangements are now being made to acquire for this market a more suitable site. The Board has sanctioned part of the cost of cement concrete side drains to be built at Palapatwela and Madawela, the other part being met by Government. The work is in the hands of the Public Works Department. Side drains are also required at Dambulla and Kawudupelella, but owing to want of funds the work cannot be considered at present. A site has been selected at Dambulla for a latrine for the use of pilgrims who visit Dambulla Rock Temple, and the latrine will be erected at an early date.

The following statement shows the state of the funds of each town:—

|               | Balance on<br>January 1, 1919. | Revenue,<br>1919. | Expenditure,<br>1919. | Balance on<br>December 31, 1919. |
|---------------|--------------------------------|-------------------|-----------------------|----------------------------------|
|               | Rs. c.                         | Rs. c.            | Rs. c.                | Rs. c.                           |
| Dambulla      | 959 98                         | 501 57            | 808 2                 | 653 53                           |
| Rattota       | 1,944 22                       | 1,516 2           | 757 63                | 2,702 61                         |
| Madawela      | 345 2                          | 606 45            | 417 24                | 534 23                           |
| Kawudupelella | 710 95                         | 615 52            | 591 81                | 734 66                           |
| Palapatwela   | 880 45                         | 777 45            | 698 94                | 958 96                           |

The Board has not received any money on loan from Government.

## VILLAGE COMMUNITIES.

The three Chief Headmen's divisions have been proclaimed under the Village Communities Ordinance. The following statement shows the revenue and expenditure of the Village Committees:—

| REVENUE.                       | Amount.<br>Rs. c. | Total.<br>Rs. c. | EXPENDITURE.                   | Amount.<br>Rs. c. | Total.<br>Rs. c. |
|--------------------------------|-------------------|------------------|--------------------------------|-------------------|------------------|
| Balance on December 31, 1918:— |                   |                  | Payments in 1919:—             |                   |                  |
| Matale South                   | 4,593 65          |                  | Matale South                   | 3,873 80          |                  |

| Matale East                    | 2,366 0           |                  | Matale East                    | 1,968 99          |                  |
|                                |                   | 10,097 16        |                                |                   | 8,615 19         |
| Receipts in 1919:—             |                   |                  | Balance on December 31, 1919:— |                   |                  |
| Matale South                   | 2,999 63          |                  | Matale South                   | 3,719 48          |                  |
| Matale North                   | 3,673 48          |                  | Matale North                   | 4,038 59          |                  |
| Matale East                    | 1,482 9           |                  | Matale East                    | 1,879 10          |                  |
|                                |                   | 8,155 20         |                                |                   | 9,637 17         |
| Total                          | 18,252 36         |                  | Total                          | 18,252 36         |                  |

No new works of any importance were actually put in hand during the year. The erection of a bridge with masonry abutments and timber platform over the stream at Madawela on the Madawela-Talagasyaya Gansabhawa road was sanctioned, the proprietor of Maharajah estate, Mr. E. M. Windus, contributing a moiety of the cost. The work is now in progress.

Arrangements were made for the collection, with effect from January 1, 1920, of commutation for Village Committee labour on the same lines as road tax. Hitherto, although provided for by the Gansabhawa rules of 1915, the collection of commutation had never been put into actual practice, the villagers continuing to discharge their liabilities under the Ordinance in the form of labour. It seemed, however, desirable formally to recognize and give effect to the principle of optional commutation provided

for by the rules, and arrangements have accordingly been made to this end. The ordinary liability for 1920 has been fixed by the Village Committees at four days' labour commutable by a money payment of 50 cents.

There are three Village Tribunals in the district. Detailed statements showing the work done by these courts and the number of appeals lodged, with results, are appended :—

Statement showing the Work done by the Village Tribunals in 1919.

LAND.

The total extent of land alienated by the Crown during the year otherwise than under the Waste Lands Ordinance was 419 acres 2 roods 16·81 perches. The total amount realized was Rs. 8,421·54, giving an average of Rs. 20·06 per acre. Of this extent, 374 acres 2 roods 12 perches were sold by the Settlement Officer. There was not much demand for land by capitalists. The following statement shows the operations of the Settlement Officer and the Assistant Government Agent respectively under the Waste Lands Ordinance during the year :—

Statement showing the Working of the Waste Lands Ordinance during the Year 1919.

## KANDYAN MARRIAGE ORDINANCE.

The marriages registered under this Ordinance during the year under review were 251 in number, as against 330 for the previous year. Forty-nine applications for divorce (exclusive of the 2 applications pending at the end of 1918) were received. Divorce was granted in 39 cases. Ten applications were withdrawn, and two were pending at the end of the year. Of the divorces granted, 38 were on the ground of mutual consent.

## IRRIGATION.

The four rate-paying works in the district are situated at Kurakolayaya, Bowetenna, Karawilahena, and Pelwehera. The rates under these small works amount only to Rs. 204.40. Out of the rates due, a sum of Rs. 5.82 was outstanding at the end of the year, but has since been recovered.

The village tanks number 156. Of these, 137 are completed and 19 in process of restoration. A sum of Rs. 572 was expended on the maintenance of village tanks. 290 cases were instituted for breach of rules. The fines amounted to Rs. 435.50.

The following schemes are under consideration :—

- (1) Permanent masonry anicut for irrigation of the Nikawella fields.
- (2) The restoration of the Hattota anicut at Leloya by private enterprise.
- (3) Erection of masonry anicut to replace the temporary anicut at the head of the Bowetenna channel, and the enlargement of the irrigable area by the improvement and extension of the channel.
- (4) The extension of the irrigable area under Pelwehera tank.
- (5) Construction of a permanent *potawa* on the Telgomu-ganga for the irrigation of the Kambarawa fields.
- (6) Restoration of Alutwewa at Bibile.
- (7) Restoration of Sigiriya Mahawewa.
- (8) Construction of masonry anicut across the Welimiti-oya for the irrigation of the Pahalawewa fields.

## THE DOG REGISTRATION AND RABIES ORDINANCES.

3,363 dog licenses were issued during the year, as against 3,625 in 1918. 244 stray dogs were destroyed outside Local Board limits.

There have been a few cases of rabies, but no deaths from hydrophobia.

## FORESTS.

The district is in charge of an Assistant Conservator of Forests stationed at Nuwara Eliya. He is assisted by two rangers resident at Matale and Dambulla. The revenue recovered by the Forest Department from the Matale District during the calendar year 1919 amounted to Rs. 4,049.95. The value of free grants of timber was Rs. 387.37.

## PUBLIC WORKS.

Roads and buildings have been satisfactorily maintained. No important new works have been carried out. Government has sanctioned the taking over by the Public Works Department of the private road through North Matale estate connecting the North road with the Palapatwela-Galewela road at the 25th milepost. The opening to the public of this exceedingly useful linking-up road will be of considerable benefit to all classes of the community.

New works required are (a) the linking up of the Golahenwatta-Yatawatta road with the Talgodapitiya-Yatawatta road in the Kurunegala District; (b) the extension of the Matale Kachcheri; and (c) a new resthouse at Matale.

## STAFF.

In conclusion, I desire to place on record my appreciation of the work of the Kachcheri Staff and the Chief Headmen during a particularly heavy year. They have worked untiringly and ungrudgingly throughout, and have discharged their duties with zeal and efficiency.

The Kachcheri,  
Matale, March 4, 1920.

E. T. MILLINGTON,  
Assistant Government Agent.

## APPENDIX.

## I.—REPORT OF THE DISTRICT ROAD COMMITTEE, MATALE, FOR 1919.

## INTRODUCTION.

THE Committee consisted of the following members :—Official: The Assistant Government Agent (Chairman) and the District Engineer; Unofficial: Mr. C. P. Anderson, Mr. F. van Rooyen, and Mr. T. B. Aluwihare, representing the European, Burgher, and Native communities, respectively, and Mr. H. Storey representing the Matale Planters' Association.

## COMMUTATION TAX.

2. The amount collected as commutation money was Rs. 26,514.67. A statement showing the amount collected and the value of labour carried out for the last two years is appended :—

| Year. | Amount collected<br>in Money. |           | Value of Labour. |       | Total. |           |
|-------|-------------------------------|-----------|------------------|-------|--------|-----------|
|       | Rs.                           | c.        | Rs.              | c.    | Rs.    | c.        |
| 1918  | ..                            | 27,088 28 | ..               | 40 50 | ..     | 27,128 78 |
| 1919  | ..                            | 26,514 67 | ..               | 36 0  | ..     | 26,550 67 |

3. The following comparative statement gives particulars of those who discharged their obligation in respect of the payment of commutation tax or failed to discharge it :—

Comparative Statement showing the Working of the Thoroughfares Ordinance during 1918 and 1919.

4. *Establishment.*—There was no change in the staff during the year.
5. *Meetings.*—Eleven meetings of the Board were held during the year.
6. The health of the town was satisfactory. A mosquito brigade with a supervisor was established on April 23, 1919, and was continued throughout the period under review. The whole town was systematically cleaned up, and there was a distinct improvement in the general health. A second incinerator for the disposal of town refuse was erected at a cost of Rs. 585.
7. *Water Supply.*—There was a sufficient supply of water of good quality during the year. Work in connection with the proposed extension of the water system had to be deferred owing to the high cost of materials.
8. *Roads.*—All roads, bridges, and culverts were maintained in good order. A new bridge was constructed over Godapola stream by the District Road Committee, the Board contributing half the cost.
9. *Park.*—The Saxton park grounds were satisfactorily maintained.
10. *Rainfall.*—The total rainfall recorded in Matale during the year was 71·50 inches. February was the driest month, with a rainfall of ·20 inch, and November the wettest month, with 11·02 inches.
11. *Peace Celebrations.*—The Local Board, with the sanction of His Excellency the Governor in Council, contributed a sum of Rs. 1,500 for the Peace Celebrations.
12. *Local Board Election.*—The biennial election of Unofficial Members for the years 1920 and 1921 was held on December 20, 1919. There were four candidates. Voting was by ballot, and resulted in the re-election of the three retiring members, Messrs. C. Ariyanayagam, M. Y. Sally, and H. D. Weerasekera.
13. *Lighting.*—The lighting of the town was improved by the installation of fourteen petrol lamps at important junctions.
14. 444 stray dogs were destroyed.
15. *Rice.*—Control and distribution was in my hands as Assistant Government Agent, and the subject is dealt with in my report in that capacity. I am much indebted to Mr. C. Ariyanayagam and the Matale Social Service League for the valuable advice and assistance which they have always so readily placed at my disposal in connection with distribution in the town. A house-to-house census of town residents was undertaken by the League, and the whole of the arduous work of writing up and distributing the rice ticket books was most efficiently carried out by the members. I also wish to place on record my appreciation of the work done by Mr. N. P. Selliah, the Secretary to this Board. He has throughout the period of control been charged by me with the immediate supervision of all the rice dealers, both wholesale and retail, in the town. A very large amount of additional work has thus been thrust upon his shoulders, and he has throughout discharged it with commendable zeal and efficiency and minute attention to detail.

E. T. MILLINGTON,  
Chairman.

## REPORT ON THE NUWARA ELIYA DISTRICT FOR 1919.

### I.—OFFICIAL CHANGES, EVENTS OF IMPORTANCE, &c.

THE year 1919 has witnessed a complete change of administration in all departments in Nuwara Eliya. Mr. M. M. Wedderburn, Assistant Government Agent, after four years in the district, went home on leave at the end of September. He was succeeded on December 5 by Mr. G. S. Wodeman, Mr. L. J. B. Turner, Assistant Government Agent, Kandy, having administered the district during the interval. Mr. H. A. Burden, District Judge, was appointed Assistant Government Agent, Hambantota, on September 18, 1919. Until the arrival of his successor, Mr. C. W. Bickmore, on November 1, Mr. T. C. van Rooyen, Crown Proctor, Hatton-Nuwara Eliya, acted as District Judge. Mr. G. N. Loggin assumed duties as District Engineer on January 1, 1919, *vice* Mr. O. T. Nettelton, transferred. Mr. Guy Manwaring was appointed Assistant Superintendent of Police, Nuwara Eliya, on his return from active service on June 6, relieving Mr. C. T. Nettelton, whose efficient services in the Ceylon Police Service during the war have been much appreciated.

The most important event of the year was the signing of Peace with Germany, which was celebrated in Nuwara Eliya as befits such an event.

### II.—REVENUE.

The revenue of the district for the financial year ending September 30, 1919, was Rs. 216,779·82. With the exception of the year 1916, this is the highest annual revenue collected in the Nuwara Eliya District. The revenue for the last seven years is as follows :—

|      |    | Rs.     | c. |      |    | Rs.     | c. |
|------|----|---------|----|------|----|---------|----|
| 1913 | .. | 161,569 | 43 | 1917 | .. | 196,411 | 92 |
| 1914 | .. | 151,278 | 86 | 1918 | .. | 194,478 | 24 |
| 1915 | .. | 125,526 | 39 | 1919 | .. | 216,779 | 82 |
| 1916 | .. | 217,800 | 47 |      |    |         |    |

The increase of Rs. 22,301·58 over the revenue of 1918 has been generally distributed under each sub-head, but is chiefly due to increases under Toddy Rents, Land Sales, and Electric Light. The big increase shown in the above table in 1916 is due to the fact that the electric power station was taken over by Government from the Board of Improvement in that year.

### III.—CONDITIONS OF THE PEOPLE AND FOOD SUPPLY.

The year 1919 has been abnormal, and the shortage of imported rice has been felt throughout the district. There is a sharp dividing line in this district between the mountainous region given up to tea cultivation and the valleys where paddy is grown. The scarcity was naturally felt first in the town of Nuwara Eliya and the bazaars of Dimbula and Uda Pussellawa districts, which are almost

entirely dependent on imported rice. Since the institution of rice control, weekly allotments of imported rice have been made to these localities. In the fertile valley of the Kotmale-oya paddy crops did well. It is, however, unfortunate that the Kotmale *goiya* has made no attempt in the past to sow his fields twice a year. Notwithstanding a plentiful supply of water and a fertile soil, the custom of his forefathers remains deeply rooted in his blood. The Ratemahatmaya is alive to the lethargy of his people, and it is hoped that the attempt which is to be made this year to cultivate the fields twice in the year will be successful, now that the villager has felt the pinch of hunger. During the latter part of the year it became necessary to supply these villagers with imported rice and kurakkan from Anuradhapura.

In Uda Hewaheta there are several irrigation works, and it is in this district that the scarcity has been least felt. Even here, owing to indiscriminate sale of country rice and chena grains to estate coolies, and to the removal of rice from the district during the early part of the year, the villagers denuded themselves of their food stocks, and it became necessary to supply them with a small quantity of imported rice at the end of the year. It is hoped that this district will be self-supporting in 1920.

Walapane is a sparsely populated and dry district, admirably suited for the cultivation of chena grains. It needs no imported rice. Its surplus chena grains were used during the year to relieve shortage in Nuwara Eliya and supplement the food stocks of Kotmale. Here, again, indiscriminate sale to estate coolies necessitated the imposition of strict control.

In all parts of the district chena grains, vegetables, and yams have been cultivated on a much larger scale than in previous years. There is still a large area of land suitable for such cultivation, and Crown lands are leased out on easy terms to all who apply for them. It is estimated that approximately 550 acres of Crown land were thus opened up during the year.

The health of the people has been satisfactory on the whole, though the epidemic of influenza which prevailed in almost every village in the early part of the year caused many deaths, particularly in the Kotmale villages. Medical aid and foodstuffs were supplied freely. It is the opinion of the Ratemahatmayas that the epidemic assumed a milder form than in the previous year. No other serious epidemics occurred.

#### IV.—HEALTH OF CATTLE.

During the year a serious outbreak of rinderpest occurred in Nuwara Eliya, the infection being almost certainly brought in by butchers' cattle. The disease was of a virulent type, and killed 77 animals out of 84 infected. The loss of valuable cattle is estimated by the Assistant Veterinary Surgeon at Rs. 10,650, the chief loser being Mr. Hood Wright. Had it not been for the energy of the Assistant Veterinary Surgeon and the careful precautions and strict control exercised by the Board of Improvement and veterinary officers, the outbreak would not have been stamped out so quickly. Cases were also reported from Dimbula, Ragalla, and Kotmale districts. Uda Hewaheta division alone escaped.

The Assistant Veterinary Surgeon reports that 51 contacts were inoculated with anti-rinderpest serum; out of them, 20 became infected; and of these, 17 died. It would appear that either the inoculation was carried out after infection, or that the serum used was not very efficacious.

Foot-and-mouth disease also was prevalent, 59 animals being infected, all of which recovered.

*Rabies.*—There were two cases of rabies in Nuwara Eliya town, the first on January 13, and the second on May 3. Mr. Hood Wright and a Tamil woman were bitten by an ownerless dog on the first occasion, and two estate coolies on the second occasion. The dogs were promptly shot, and their victims were treated at the Colombo Pasteur Institute. The muzzling order was strictly enforced, and over seventy stray dogs were shot.

I am indebted to the Assistant Veterinary Surgeon for an interesting report of some length, of which the above is a *resumé*, and for the appended table showing the incidence of the rinderpest outbreak:—

| Village or Estate.   | Total Number of Cases. |              | Recoveries. | Deaths. |
|----------------------|------------------------|--------------|-------------|---------|
|                      | Buffaloes.             | Neat Cattle. |             |         |
| <i>Nuwara Eliya.</i> |                        |              |             |         |
| Town ..              | ..                     | 84 ..        | 7 ..        | 77      |
| <i>Kotmale.</i>      |                        |              |             |         |
| Forest Creek ..      | ..                     | 9 ..         | 2 ..        | 7       |
| Talawakele ..        | ..                     | 1 ..         | — ..        | 1       |
| Craigie Lea ..       | ..                     | 1 ..         | — ..        | 1       |

| Udagama ..           | 28 ..                  | 29 ..        | 5 ..        | 52      |
| Glenloch ..          | ..                     | 29 ..        | 5 ..        | 24      |
| Helbodde ..          | ..                     | 48 ..        | 21 ..       | 27      |
| <i>Walapane.</i>     |                        |              |             |         |
| Ragalla ..           | ..                     | 1 ..         | — ..        | 1       |
| Maha Uva ..          | ..                     | 15 ..        | 2 ..        | 13      |
| Bramley ..           | ..                     | 5 ..         | 4 ..        | 1       |
| Total ..             | 28                     | 248          | 56          | 220     |

Uda Hewaheta division was free from the disease.

#### V.—CRIME AND POLICE.

The slight increase in crime during 1919 is undoubtedly due to the hardship caused by the food shortage. 234 cases (as against 219 last year) were reported, out of which 173 were true cases, 45 false, and 14 pending. The percentage of convictions was 50. The principal crime in the district is burglary. 97 cases were reported, 31 ending in conviction, while in 44 the accused were undiscovered. The large percentage of undiscovered burglary cases in this district, particularly in Nuwara Eliya town, deserves the serious attention of the police. It is unfortunate that in one case of house-breaking at Plâté's Studio in Nuwara Eliya, in which the accused, a dismissed employee, had left a clear finger print on the glass of the window pane which he broke open, the conviction by the Magistrate was reversed in appeal, on the ground that the accused might have left his finger print on the pane in the course of his duties before he was dismissed. There were 15 cases of grievous hurt, 7 ending in conviction. There

was only one case of homicide during the year, another suspected case being adjudged to be suicide. Out of 15 cases of hurt by knife, 7 ended in conviction. There were 10 cases of cattle stealing: 3 convicted, 3 undiscovered, 3 false, and 1 discharged.

The police and rural headmen worked together smoothly, and I have had no complaints of want of co-operation on either part.

#### VI.—EDUCATION.

The District School Committee consists of five members: The Assistant Government Agent, the Director of Education, Rev. E. V. Freeman, Rev. W. G. Shorten, and the Ratemahatmaya of Kotmale. Two meetings were held during the year. Its funds are barely adequate to keep existing schools in good condition and improve the buildings and their surroundings. All new buildings and extensions require special grants from the revenue of the Colony.

Two new schools were opened in 1919, Kadadora in Kotmale and Udawatta in Uda Hewaheta. The chief requirements of the district are two new Government schools in Kotmale, one in Uda Hewaheta and a Government school in Nuwara Eliya town. It is hoped that these wants will be supplied in the near future.

Separate attendance officers have been appointed for the three divisions, and a systematic attempt to improve the attendance at all schools, Government and private, is being made. The attendance of girls in particular is very poor; the Kandyan villager is no believer in female education.

#### VII.—IRRIGATION.

The three major irrigation works in this district are the Ma-ela (on the east side of the Mul-oya valley, with headworks near Mooloya estate, length 9 miles), the Lemasuriyagama-ela, and the Mulhal-ela. The former two are in Uda Hewaheta, and the latter in Walapane. All these works were maintained in good order by the Irrigation Department, which spent Rs. 3,343.16 on maintenance of and repairs to these works during the year.

The Lemasuriyagama-ela scheme was initiated by the able Civil Servant, whose name is not only borne by this village, but is alive in the memory of many an old headman and villager of this district. Legend has been busy with it. One story told to me—I cannot hold myself responsible for its accuracy—was that he countered a demand for an explanation as to why this village was named after him without Government authority by replying that it bore a Sinhalese name (Maha-suriya-gama). Another and still greater irrigation work originated by him was the ill-fated Bodi-ela, largely constructed, I am told, by the subscriptions of people in England, whom he interested in the scheme. Scarcely had this work been finished when a huge landslide took place on the hillside above Padiyapelella, which completely carried away several hundred yards of the channel, and rendered the lower 8 miles of it useless. The headworks seem to be still as good as ever after thirty-three years, and the first mile of the channel is in use to this day. During the past year the Irrigation Department has surveyed the old channel, and as the proprietors are interested in the scheme, I trust that in the near future the Bodi-ela will be restored once more. This ela, together with the Waduwwala-ela, which takes off not 100 yards from the headworks of the Bodi-ela, is the most promising irrigation scheme in this district, and should shortly bring 2,000 acres of land under paddy cultivation.

There are numerous village works throughout the district. Many of them require permanent improvements in the way of masonry headworks and retaining walls, which are beyond the villagers. "The apportionment of Rs. 100 to the district is utterly inadequate to bring even one work into satisfactory condition"—I quote the *ipsissima verba* of an irrigation officer—and a number of fields now abandoned for want of water could be cultivated, as well as fresh lands aswedumized, were funds more liberally provided, and better supervision made available by the appointment of irrigation overseers.

#### VIII.—REPORT OF THE SANITARY BOARD FOR 1919.

The following twelve towns are under the control of the Nuwara Eliya District Sanitary Board:—Nanu-oya, Talawakele, Dimbula, Kotagala, Lindula, Tillicoultry, Agrapatana, Pundaluoya, Kandapola, Ragalla, Padiyapelella, and Hanguranketa.

The Board consists of the following:—The Assistant Government Agent, Chairman; the Provincial Engineer, Central Province (South); the District Medical Officer, Nuwara Eliya; Messrs. A. M. Cooper, C. B. Coleman, Gordon Windus (acting for Mr. N. W. Davies, who is away on furlough), and E. F. Edirisinghe.

A statement showing the revenue and expenditure and the balance to the credit of each town is subjoined:—

| Name of Town. | Balance on<br>December 31,<br>1918. |    | Revenue,<br>1919. |    | Expenditure,<br>1919. |    | Balance on<br>December 31,<br>1919. |    |
|---------------|-------------------------------------|----|-------------------|----|-----------------------|----|-------------------------------------|----|
|               | Rs.                                 | c. | Rs.               | c. | Rs.                   | c. | Rs.                                 | c. |
| Nanu-oya      | 1,990                               | 20 | 4,382             | 21 | 2,227                 | 38 | 4,145                               | 3  |
| Talawakele    | 7,707                               | 96 | 10,142            | 64 | 6,861                 | 28 | 10,989                              | 32 |
| Dimbula       | 176                                 | 37 | 420               | 30 | 353                   | 44 | 238                                 | 23 |
| Lindula       | 218                                 | 96 | 556               | 26 | 631                   | 46 | 143                                 | 76 |
| Agrapatana    | 31                                  | 34 | 868               | 17 | 702                   | 47 | 197                                 | 4  |
| Tillicoultry  | 1,099                               | 96 | 841               | 3  | 849                   | 37 | 1,091                               | 62 |
| Kotagala      | 863                                 | 42 | 384               | 33 | 896                   | 74 | 351                                 | 1  |
| Pundaluoya    | 1,235                               | 31 | 1,022             | 35 | 563                   | 10 | 1,694                               | 56 |
| Kandapola     | 124                                 | 50 | 656               | 7  | 690                   | 42 | 90                                  | 15 |
| Ragalla       | 587                                 | 9  | 1,288             | 60 | 1,210                 | 98 | 664                                 | 71 |
| Padiyapelella | 764                                 | 30 | 425               | 33 | 684                   | 8  | 505                                 | 55 |
| Hanguranketa  | 7                                   | 69 | 455               | 17 | 333                   | 69 | 129                                 | 17 |

**Conservancy.**—Systematic scavenging is carried out in all the towns, and two pit latrines were erected during the year in Kotagala bazaars. Repairs have been effected to the existing latrines at Tillicoultry and Agrapatana. A second refuse destructor for Talawakele was built on Middleton estate, and a trenching ground was opened.

**Drains.**—Additional cement drains were constructed in Talawakele, Tillicoultry, and Ragalla, and repairs were effected to the existing drains at Talawakele and Tillicoultry.

*Waterworks.*—Repairs were effected to the waterworks at Talawakele and Nanu-oya. There has been no scarcity of water during the year.

*Slaughter-houses.*—The slaughter-houses are in a good condition. Repairs have been effected to the sheep slaughter-house at Talawakele.

*Meat Market.*—The proposed meat market for Talawakele has not yet been built owing to the delay in the selection of a proper site.

*Galas.*—A scheme for the centralization of all the galas at Talawakele is under consideration. When this question is settled, it is hoped that a good site on the centre of the town can be obtained for the market.

*Health.*—The health of the people has been satisfactory.

*Cattle Disease.*—The towns have been practically free from cattle disease. As there was an outbreak of rinderpest at Hatton and Forest Creek, early precautions were taken at Dimbula and Talawakele. A temporary segregation camp was erected at Talawakele in case of emergency.

*Shortage of Foodstuffs.*—Necessary precautions were taken to control the sale of rice in the towns. A card system has been introduced in Talawakele, Nanu-oya, and Kandapola, and is working very satisfactorily. The rice is now distributed to the various towns by the Assistant Government Agent, Nuwara Eliya, and the selling price is controlled according to each consignment. The price of flour and bread is also controlled.

#### IX.—VILLAGE TRIBUNALS AND COMMITTEES.

There are three Village Tribunals and Committees in the district, viz., Kotmale, Uda Hewaheta, and Walapane. The total number of cases instituted during the year 1919 is 2,774, exactly the same total as in 1918, but there were 105 more civil and correspondingly less criminal cases in 1919. The number of appeals has risen from 13 in 1918 to 35 in 1919. In 33 cases out of these 35 the President's decision was confirmed. There were two appeals to His Excellency the Governor, and the decision in both cases was confirmed. Fines in 1919 totalled Rs. 1,900·45, which is Rs. 469·34 in excess of the 1918 total.

The Village Committees' revenue was Rs. 17,978·57 in 1918 and Rs. 34,265·14 in 1919. Expenditure was Rs. 17,281·93 in 1918 and Rs. 28,244·92 in 1919. The increase is mainly due to the control of chena grains by the Village Committee in Walapane. The system is purely voluntary, and has the beneficial results of providing a certain and favourable market for the chena products of the district, while the profits derived from their sale go to augment the funds available for expenditure on the bridges, roads, dispensaries, and other village works in Walapane.

The chief village works carried out during the year were the construction of a bridge over the Ma-oya in Uda Hewaheta, the construction of wells at Kaddadora and Pallewela, and the construction of a portion of the new road from Nugawela to Maswela in Kotmale. This will, when completed to Sangilipalama, provide a very useful road along the Kotmale-oya valley, from Ulapane to Sangilipalama, and provide access to the most fertile and populous villages in this locality. Its completion ranks first and foremost among the village works urgently needed; others are:—

- (1) A bridge over the Bilihul-oya at Lemasuriyagama.
- (2) A bridge over the Madulu-oya on the Province of Uva boundary.
- (3) The linking up of Maswela with Pussellawa by the extension of the Rothschild estate cart road. This will result in the opening up of a fertile valley, which is now devoid of any roads.
- (4) A bridge at Naikelinatota to link up Tispane and Pallepene korales.

#### X.—LAND.

During the year 51 acres 1 rood and 34 perches of land were sold, and realized a total of Rs. 8,592·58. Long leases of 281 acres 3 roods and 37 perches brought in premia amounting to Rs. 1,607. The area of lands leased on permits for cultivation of foodstuffs was 550 acres, exclusive of chena permits, which cover another 975 acres.

#### XI.—LICENSING AND WORKING OF SUNDRY ORDINANCES.

Guns and carts licensed in 1919 totalled 1,129 and 441, respectively, the corresponding figures for 1918 are 1,119 and 420. Dog registration shows a decrease, 1,701 estate and 804 village dogs having been registered this year, as against 2,739 estate and 954 village dogs last year. There has undoubtedly been a large mortality among dogs owing to the rice shortage, but this does not account for the large decrease of over 1,000 in estate dogs, which is due to the fact that the funds for the employment of clerks to visit estates and license dogs are insufficient, and many dogs have escaped registration. 2,579 cattle were branded during the year.

#### XII.—EXCISE.

There are 7 arrack taverns and 15 toddy taverns in the district. The former are all in the vicinity of estates, and the latter in the villages. Local option pollings were held in 1919 in respect of 2 arrack taverns and 6 toddy taverns, but the required percentage was not obtained in any case, the highest result being 50 per cent. in case of an arrack tavern and 57 per cent. in case of one toddy tavern. At one poll no voters appeared.

Revenue from foreign liquor licenses amounted to Rs. 7,772. Revenue from toddy tavern licenses amounted to Rs. 18,168. The arrack revenue is included in the Central Province rent.

Taverns have been strictly supervised, and few cases of drunkenness have been reported.

The arrack tavern at Padiyapelella was closed during the year, with the result that the bazaar is very poorly patronized, as the estate coolies prefer to buy their foodstuffs, &c., in a bazaar where they can quench their thirst with something stronger than water.

#### XIII.—HUNTING AND FISHING ORDINANCE, No. 1 OF 1909.

The major portion of the Nuwara Eliya District comes within the area "up-country forest" as defined by "The Forest Ordinance, 1907." The country is divided between masters of hounds. Early in October each year a meeting of masters of packs and other sportsmen interested in hunting is held in order to allot hunting country for the season. The hunting season begins on November 1

and ends on May 31. During the years 1918 and 1919 three hunting packs were registered each year, and 8 knifing licenses were issued in 1918 and 11 in 1919. The fee for registering a pack is Rs. 100 for the season. As a rule, no licenses to shoot elk are issued.

**Fishing.**—The Ceylon Fishing Club holds the fishing rights of up-country waters in and around Nuwara Eliya, Uda Pussellawa, the Horton Plains, and Dimbula. It has spent large sums of money in stocking and improving the streams. During the year 213 fishing licenses were issued by the Club. The Board of Improvement issued 46 licenses to fish for carp in Lake Gregory and the Barrack Plains lake.

#### XIV.—PUBLIC WORKS.

The chief public works executed during the year were additions and improvements to Nuwara Eliya hospital, erection of new quarters for the Forest Dépôt-keeper, and dredging of the Nuwara Eliya lake. I am indebted to the District Engineer, Nuwara Eliya, for the following interesting remarks on the latter scheme :—

The dredging of the Nuwara Eliya lake was proceeded with according to programme. The scheme of work decided upon provides, in the first instance, for the clearing of the main inlet channel carrying into the lake the drainage from the town of Nuwara Eliya and the drainage from the watershed lying between the town and the top of Ramboda Pass; it also provides for excavating silt traps on this main inlet channel, so that silt may be caused to deposit in certain places from which it can be readily removed, instead of being carried into the lake itself as hitherto. On completion of the work as above, the removal of islands and half-submerged edges of the lake will be proceeded with, after which the systematic deepening of the sides of the lake will be undertaken. As a contingent work to the above, the spoil excavated by the dredger is being deposited to raise the level of the reclamation between the railway line and the edge of the lake, and when this is finished, a large additional area will be available for a cricket ground or other purposes of recreation.

During the year under review a steam dredger has been erected, as also a large mud barge. This new plant is already in operation, and as the steam dredger can lift an average of 30 cubes of spoil per day, as against 3½ cubes per day by the old hand dredger, the work is now showing far more rapid progress than ever before.

Works most urgently needed are :—

##### *In the District.*

- (1) The provision of a road from Ragalla to Mulhakele to open out Walapane, which is a great food-producing district.
- (2) A road from Sangilipalama to Maswela to join the new Nugawela-Maswela road and open up the Kotmale-oya valley.
- (3) The restoration of the Lower Badulla road to be fit for cart traffic. This will help to open up a tract of about 30,000 acres of undeveloped Crown land and about 500 acres of private land.
- (4) The restoration of the Bodi-ela and Waduawala-ela in Uda Hewaheta.
- (5) The provision of a dispensary at Nildandahena in Walapane.

##### *In the Town of Nuwara Eliya.*

- (1) The provision of quarters for the Provincial Engineer and Assistant Superintendent of Police and for clerks.
- (2) The erection of a new Police Court.
- (3) Extension of Government offices, which are at present inconveniently crowded together in one building.

#### XV.—FORESTS.

The following is a *resumé* of the report of Mr. J. R. Ainslie, Assistant Conservator of Forests :—

Three cases were prosecuted during the year in the Nuwara Eliya Police Court, and 18 cases were compounded by the Assistant Conservator of Forests. 42,695 cubic yards of firewood were supplied to the Railway at a cost of Rs. 81,941·53 and 7,771 cubic yards of firewood to the Nuwara Eliya Firewood Dépôt at a cost of Rs. 15,075·74. Total forest revenue credited at the Nuwara Eliya Kachcheri was Rs. 9,917·51.

February 28, 1920.

G. S. WODEMAN,  
Assistant Government Agent.

### APPENDIX.

#### I.—REPORT OF THE BOARD OF IMPROVEMENT, NUWARA ELIYA, FOR 1919.

**Financial Position.**—The comparative statement of revenue and expenditure attached to this report shows the financial position of the Board. The apparent increase of revenue and expenditure for the year under review is due to the inclusion of the rice account. The actual revenue for the year is Rs. 83,852·95, excluding the balance brought forward Rs. 26,527·34, and the expenditure Rs. 73,449·50. The revenue shows an increase of Rs. 2,619·91; and the expenditure a decrease of Rs. 10,564·45, as against the revenue and expenditure of 1918 :—

##### Comparative Statement of Revenue and Expenditure for the Years 1918 and 1919.

*His Excellency the Governor.*—In connection with the address presented to His Excellency the Governor Sir W. H. Manning, His Excellency met the members of the Board on May 7, 1919, and discussed with them the financial position of the Board.

*Sanitation.*—Although the Board pursued a policy of retrenchment owing to the effects of war, yet in the matter of sanitation the expenditure was not curtailed. Many important questions were brought up in connection with the sanitation of the town, such as the removal of the sewage farm to the Moon Plains, the removal of the slaughter-house to Blackpool as a precautionary measure against the introduction of rinderpest into the town, construction of more model dwellings for the poorer classes, and the demolition of insanitary tenements. Final decision on these matters will be arrived at in 1920.

*Health.*—The health of the town was satisfactory. There were a few cases of chickenpox, measles, and whooping cough.

*Drainage.*—New cement concrete drains were constructed near the railway station.

*Water Supply.*—The town water supply continues to be pure and satisfactory. The extension of, and improvements to, the town water service on a large scale are under consideration.

*Roads.*—The Grand Hotel-Golf Club road and Church road were widened and improved. The question of finding gravel for the roads and paths is engaging the attention of the Board. The present quarry will give out in one year's time, and there is little hope of securing another quarry with sufficient deposits of gravel.

*Lake Gregory.*—The Public Works Department has started work with a steam dredger, and the dredging operations are progressing satisfactorily.

*Municipality for Nuwara Eliya.*—Government has sanctioned the proposal to establish a Municipality for Nuwara Eliya, and preliminary arrangements are being made to give effect to the proposal in 1920.

*New Bungalows.*—Seven new bungalows were completed during the year.

*Model Dwellings No. 3 and Dharma Lines.*—This building was sold to Mr. E. L. F. de Soysa as it was insanitary and useless to the Board. The question of constructing an ambalam in place of the dharma lines is under consideration.

*Peace Commemoration.*—A specimen of the Bunya Bunya tree of Queensland was planted on July 19, 1919, in the park in commemoration of Peace. A circular seat around the tree will be constructed in 1920.

*Food Control.*—Rice was controlled from June and flour from October. A strict system of rationing is in force. The residents are well supplied, and there have been no complaints. The controlling of the prices of other foodstuffs is a difficult matter, but steps are being taken to put down profiteering.

*Rinderpest.*—A serious outbreak of rinderpest occurred in the latter part of February and continued till the end of April. Eighty-four head of cattle, including several milch cows, were affected, of which 77 died. The total loss to the owners was estimated at Rs. 10,650. Steps are being taken to prevent the recurrence of the epidemic. Butchers' cattle, which come from North-Central Province and the Province of Uva, are believed to be mainly responsible for the introduction of the disease into the town, and the only way of eliminating this source of infection is to remove the slaughter-house and the butchers' cattle to a place outside the populated parts of the town, and to prevent the butchers' cattle from grazing on patanas used by the other cattle; but this question is not free from difficulty. The selection of a suitable site to which the slaughter-house and cattle shed can be removed is under consideration.

*Constitution of the Board.*—Mr. M. M. Wedderburn left Nuwara Eliya in September, and was succeeded by Mr. L. J. B. Turner till Mr. G. S. Wodeman assumed duties in December as executive officer of the Board.

*Thoroughfares Ordinance.*—A comparative statement of the working of the Thoroughfares Ordinance is annexed :—

Comparative Statement showing the Working of the Thoroughfares Ordinances  
for the Years 1918 and 1919.

|   | 1918. |       | Percentage<br>on Number<br>under<br>Head 2. | 1919. |       | Percentage<br>on Number<br>under<br>Head 2. |

*Conclusion.*—In concluding this report, I wish to express my appreciation of the hard work done by Mr. Sivagnanam, the energetic and efficient Secretary of the Board, during the year.

February 28, 1920.

G. S. WODEMAN,  
Chairman.

## II.—REPORT OF THE DISTRICT ROAD COMMITTEE, NUWARA ELIYA, FOR 1919.

THE members of the District Road Committee are the Assistant Government Agent (Chairman), and Messrs. N. W. Davies, N. C. Rolt, R. Mylius, Everard Bartholomeusz, and E. F. Edirisinghe. One meeting was held during the year.

A comparative statement of the working of the Thoroughfares Ordinance in 1918 and 1919 is annexed. The slight decrease in collections is due to a larger number of absentees than usual owing to the food scarcity. More than 92 per cent. of the male inhabitants liable, however, discharged their liability in money, which is partly satisfactory.

The funds at the disposal of this Committee, after deducting expenses of establishment, &c., amount only to Rs. 7,636.03, which is obviously quite inadequate for the improvement of the 388 miles of road in its charge. As immigrant agricultural labourers are exempted from this tax, the number of taxpayers is very small when compared with the total population of the district. The funds at the disposal of the Committee will be even more inadequate next year owing to the decision of the Sanitary Board to assert its rights in collecting and appropriating road tax within the limits of small towns in future.

The District Road Committee is under a debt of gratitude to the several Planters' Associations of the district in undertaking the maintenance from District Road Committee votes of all roads running through their estates. Without this assistance the District Road Committee would be unable to get the work executed as promptly and efficiently, as its meagre funds do not even permit the appointment of a Superintendent of Minor Roads.

The usual tables are annexed :—

### Statement of Receipts and Expenditure for the Year 1919.

| REVENUE.   |    | Rs.    | c. |
|--|----|--------|----|
| Balance on January 1, 1919 ..                    | .. | 2,268  | 46 |
| Commutation realized in money ..                 | .. | 22,246 | 50 |
| Commutation realized in labour ..                | .. | 9      | 0  |
| Government contribution in aid of minor works .. | .. | 3,640  | 0  |
| Miscellaneous receipts ..                        | .. | 1,123  | 95 |
| Total ..   | .. | 29,287 | 91 |

| EXPENDITURE.   |  | Rs.    | c. |
|--|--|--------|----|
| Payments made on account of principal roads and resthouses ..          |  | 9,665  | 36 |
| Amount expended on minor work ..                                       |  | 9,466  | 3  |
| Establishment and commission to division officers:—                    |  |        |    |
| (a) Contribution on account Provincial Road Committee establishment .. |  | 400    | 0  |
| (b) Cost of District Road Committee establishment ..                   |  | 3,052  | 53 |

G. S. WODEMAN,  
Chairman.

## SOUTHERN PROVINCE.

### ADMINISTRATION REPORT OF THE GOVERNMENT AGENT, SOUTHERN PROVINCE, FOR 1919.

Area of the Province, 2,146½ square miles.  
Area of the Galle District, 652½ square miles.

Population of the Province, 692,455.  
Population of the Galle District, 323,808.

#### PRINCIPAL EVENTS.

1. (1) *Peace Celebrations*.—Peace Celebrations were held in all parts of the district on July 19. There was general rejoicing everywhere, in which all classes participated.
- (2) *The Anniversary of the Signing of the Armistice* was observed on November 11 by a two minutes' silence and suspension of all normal activities. His Majesty's desire in this respect was communicated to all, and there was ready response everywhere.
- (3) *Visit of His Excellency the Governor*.—His Excellency Sir William Henry Manning paid his first visit to Galle on February 20, 1919, and was enthusiastically received. Addresses were read by the Mudaliyars and by important local bodies. After two days' stay in Galle, His Excellency went to Matara. My Assistant describes the visit.

#### ADMINISTRATIVE CHANGES DURING THE YEAR 1919.

2. (1) Mr. V. Coomaraswamy, Police Magistrate, Negombo, was appointed Office Assistant to the Government Agent, Southern Province, and Additional Assistant Superintendent of Galle Prison from February 22, *vice* Mr. T. Goonetilleke, who went on sick leave.
- (2) Mr. S. D. Dhondy, Police Magistrate, Matara, was appointed Police Magistrate, &c., Jaffna, Kayts, and Mallakam from March 1.
- (3) Mr. L. W. C. Schrader, District Judge, Galle, was appointed to act as Government Agent, Uva, from June 19, and Mr. F. J. Soertsz, Advocate, was appointed to act for him.
- (4) Mr. C. E. Jones was appointed Police Magistrate, Matara, from July 28.
- (5) Mr. R. S. V. Poulier assumed duties as Cadet at the Galle Kachcheri on August 4.
- (6) Mr. D. de Kretser, Assistant Superintendent of Excise, Badulla, was appointed to Matara from September 1.
- (7) Mr. F. W. Morris, Assistant Superintendent of Police, Galle, was transferred to the Depot, and was succeeded by Mr. G. S. Baker on September 1.
- (8) Mr. T. Reid, Assistant Government Agent, Matara, was appointed Acting Chairman, Colombo Municipality, from September 5, and was succeeded by Mr. J. D. Brown.
- (9) Mr. O. J. S. Pritchett was appointed Police Magistrate, Commissioner of Requests, and Assistant Collector of Customs, Galle, from September 9, *vice* Mr. N. J. Luddington, who went on leave.
- (10) Mr. H. A. Burden was appointed Assistant Government Agent, Hambantota, from September 18, in succession to Mr. W. L. Murphy, who went on leave.
- (11) Mr. T. W. Goonewardene, Acting Office Assistant, Hambantota, was appointed to act, in addition to his own duties, as Additional Police Magistrate, Hambantota, from November 7.
- (12) Mr. R. S. V. Poulier was appointed Additional Police Magistrate, Galle, from November 9.
- (13) Mr. H. J. V. Ekanayake, District Judge, Tangalla, was appointed District Judge, Ratnapura, and was succeeded by Mr. C. H. Jones from December 2.
- (14) Mr. F. D. Peries was appointed District Judge, Matara, from December 8, *vice* Mr. J. C. W. Rock, who went on leave.

#### REVENUE.

3. The revenue of the Galle District for the financial year 1918-19 was Rs. 851,069·14, or Rs. 264,261·19 less than the previous year. "Customs" and "Port Dues" decreased by Rs. 45,864·91; "Licenses" by Rs. 116,393·72; and "Land Sales" by Rs. 121,329·70. Receipts under the head "Fees of Court" increased by Rs. 14,551·16 and "Land Revenue" by Rs. 5,861·47. The gross Railway Receipts at the stations of the Southern Province were Rs. 1,128,868·90, as compared with Rs. 1,266,000·08 in the previous year. This revenue is not brought to account in the Kachcheries of the Province.

The Assistant Collector of Customs, Galle, furnished the following report :—

*Port of Galle*.—The total revenue collected at this port during the year amounted to Rs. 52,096·09, being an increase of Rs. 3,758·40 on that of the preceding year.

*Port Dues*.—The total collections under this head amounted to Rs. 4,282·32, as compared with Rs. 1,664·60 the previous year, showing an increase of Rs. 2,617·72.

*Other Exports*.—The total collection under "Other Exports" was Rs. 44,317·87, as against Rs. 12,241·13 of the preceding year, showing an increase of Rs. 32,076·74. Besides this, duty to the amount of Rs. 10,117·85 was paid by demand draft on London and was brought to account at Colombo. The increase under this head was due to large shipment of coconut oil. It may be mentioned that 9,713 cwt. 1 qr. 6 lb. of coconut oil was shipped free of duty on Government account. There was no export of plumbago.

Owing to the small number of vessels calling at this port, the greater portion of the local products was sent by rail to Colombo for exportation, while grain, which is under control, and other foodstuffs for local

consumption were brought in by rail. The total number of foreign-going steamers, besides the usual round-the-island and native boats, which put in during the year was 14, of which 12 took cargo for London and 1 for New York, while the other returned to Calcutta in ballast after discharging 1,670 tons of coal at this port.

*Parcel Post.*—195 registered and ordinary parcel post packets from abroad to the approximate value of Rs. 4,946.60 were received and disposed of.

The Assistant Collector of Customs, Hambantota, reports :—

The total revenue collected at this port for the year 1919 amounts to Rs. 278.08, being a decrease of Rs. 120.11 on the revenue of the preceding year. No ships, except the two Island steamers and coastwise dhoniets, call at this port. No goods are exported to ports beyond seas from here.

The Port Surgeon, Galle, reports as follows :—

The total number of arrivals during the period under review was 81, as compared with 58 in the previous year. Of the former, 16 steamers and 3 native crafts were from infected areas, as against 1 steamer and 11 native crafts during 1918.

A case of smallpox was detected on board the ss. *Clan Keith*, which arrived on February 26, 1919. The patient was landed and removed to the Infectious Diseases Hospital at Dadalla, where he recovered.

#### CONDITION OF THE PEOPLE, HEALTH, &c.

4. During the latter half of the year the restricted export of rice from India threatened the Galle and Matara Districts with famine. The Hambantota District is practically self-supporting and suffered little.

The Galle District does not in normal years raise more than 20 per cent. of the rice consumed by the inhabitants. The shortage reached an acute stage in June and July, and again in November, when the highest possible ration sank so low as half measure of imported rice per head per week. The available rice was allotted with due regard to local conditions, but there was naturally much dissatisfaction and some real distress. The people had to live on breadfruit and jak when in season ; and gram, flour, manioc, sweet potatoes, &c.

In July it became necessary to take the distribution of rice out of the hands of the middleman. The whole quantity allotted to the Galle District was consigned to me. Temporary arrangements had to be promptly made for distribution. The requirements of each subdivision were calculated on a population basis, with variations for local possibilities in food raising. Conveniently situated boutiques in each subdivision were selected, and the rice were sold to the traders at the railway stations, to be retailed by them by the measure only at a price fixed by me. In the Galle town a similar arrangement was adopted, the rice being stored in a Customs shed, and sold to selected boutique-keepers twice a week. This rough and ready method worked fairly well at first, but complaints soon began to come in that the boutique-keepers favoured their friends and the well to do at the expense of others. A system of card rationing was then undertaken, and has since been brought into effect throughout the district to the general satisfaction of the public.

The work thrown on the Kachcheri by this suddenly imposed duty of receiving and distributing weekly from 2,000 to 5,000 bags of rice, and recovering and accounting for its value, from Rs. 22 to Rs. 37 per bag, was immense. My thanks are due for valuable assistance in the early weeks of the trouble to Mr. Gottelier, Superintendent of Police, who went far beyond the ordinary scope of his departmental duty to help me ; and to Mr. V. Coomaraswamy, Office Assistant, who, though overburdened with the routine of a busy Kachcheri, devoted his leisure to the elaboration of an excellent system of rationing the district. The officers of the Customs and salt store, whose ordinary work is light, also came forward cheerfully as volunteers in this crisis, and gave valuable assistance.

The Mudaliyars of three divisions had to undertake the sales to boutique-keepers at the railway stations, and although unfortunate incidents occurred, owing to my lack of a supervising staff, the work was, at least in two of those divisions, carried out efficiently.

The general health of the people suffered less than might have been expected from the shortage and high price of their staple diet. Fortunately there was no epidemic. Since the close of the year I have, in the course of the usual circuits for the purpose of considering applications for exemption from road tax, seen and spoken with many hundreds of the poor and sick in all parts of the Galle District, and I have not found an unusually large number suffering from diseases attributable to malnutrition ; in fact, the general appearance of these people was not below normal.

Everything was done to increase the cultivation of foodstuffs. Crown chena land was offered freely, though such cultivation had been prohibited for the last thirty years. There was, however, no great demand. 381 acres were taken up in Talpe pattu, and a small area in Bentota-Walallawiti korale.

Crown deniyas, owitas, and land suitable for vegetable and yam growing were offered on lease on easy terms, and leases covering 1,681 acres were granted.

Efforts were made to bring under paddy some of the large tracts of marshy Crown land in Wellaboda pattu. Cultivation here is very speculative, being threatened by floods on the one hand, and the incursion of sea water on the other. An offer of leases, on which a small rent is payable only on reaping a crop, resulted in some 500 acres being taken up.

An Advisory Committee on Foodstuffs was appointed, and held several meetings. The question of draining and protecting from the sea the land referred to in the last paragraph was raised, but was unfavourably reported on by the Irrigation Department after levels had been taken.

A system of prizes for the best small gardens was devised. An Agricultural Instructor was appointed, and directed to cultivate model plots with paddy, and to deliver lectures in the villages on the advantages of weeding and manuring (transplanting is impossible here as there is no irrigation) and vegetable growing.

#### INDUSTRIES.

5. The chief industries of the Galle District, besides the extensive tea and rubber estates, are coconut growing, the manufacture of coir yarn, copra, and oil, plumbago mining and curing, citronella growing, and the distillation of the oil. There was very little work in plumbago during the year ; but the trade in the products of the coconut palm revived, and many poor people recovered their pre-war means of subsistence.

The paddy crops were fairly good, and the arrack distilleries and toddy rents employed a number of people in the coastal area.

Coral digging and lime burning were carried on extensively, and the fish harvests were good. Unfortunately most of the best kinds of fish are sent to Colombo and the up-country districts, leaving an inadequate supply, and that of the inferior species, for local consumption.

The tea and rubber estates called for more labour at good wages than they were able to obtain.

#### CO-OPERATIVE CREDIT SOCIETIES.

6. There are twelve co-operative credit societies in the Galle District. Several of them are flourishing, and it is hoped to develop their usefulness in the efforts being made to increase the food supply. The following statement gives some idea of their operations:—

| Name of Society.                            | Number of Shares. | Number of Shares sold. | Number of Members. | Amount paid on Account of Shares.<br>Rs. c. | Amount of Loans given to Members.<br>Rs. c. | Amount of Interest received.<br>Rs. c. | Amount of Loans outstanding.<br>Rs. c. |

#### CATTLE.

7. The Galle District was free of cattle disease, with the exception of a few sporadic cases of hoof-and-mouth disease in the town and gravets. Cattle still roam neglected on the roads and in the villages. Thefts of animals for food have naturally increased with the shortage of rice and the facilities offered for this offence.

The improvement of stock was one of the questions considered by the Advisory Committee on food supply, but it was felt that until the villager learns to feed, tend, and tether his cattle nothing can be done; and a method of teaching this lesson did not occur to us.

There were 142 prosecutions of owners of cattle found straying on roads. The fines totalled Rs. 752·50. Thirty-three animals were unclaimed, and were sold for Rs. 141·50.

#### EDUCATION.

8. The members of the Galle District School Committee were the Government Agent, Southern Province; Rev. W. J. T. Small; Rev. J. H. Wickramanayake; Rev. Father J. B. de Geradon; Mr. F. L. Woodward; and Gate Mudaliyar J. P. Goonetilleke.

The revenue for the year was Rs. 20,122·90, and the expenditure Rs. 15,914·20.

Sixty-six school buildings were repaired at a cost of Rs. 3,924·57, extensive repairs being effected to Hiyare, Yatagala, Omatta, and Kataluwa boys' schools, and Galwehera and Gonagala girls' schools. Ten schools were fenced in, and five provided with wells.

New buildings were erected for the Omatta and Kahawe girls' schools. Amugoda and Galwehera boys' schools, Bussa and Hikkaduwa girls' schools, and the Nagoda mixed school were extended. The Udugama boys' school and the Amugoda girls' school were provided with a kitchen each.

Latrines of a new type were constructed for the Amugoda, Bussa, Kahawe, and Keembiya girls' schools, and the Induruwa boys' school. Temporary latrines were built for the Hiyare, Mattaka, and Tawalama boys' schools, Polpogoda, Opata, and Kottawa mixed schools, and the Delduwa girls' school.

*Industrial Classes.*—Steps were taken to teach carpentry at Induruwa boys' school, and weaving at Nagoda, Kottawa, and Hiyare mixed schools, and Hikkaduwa girls' school.

#### CRIME AND POLICE.

9. The total number of cases of grave crime reported in the Province was 2,036, compared with 1,885 in 1918. The increase is to a great extent due to poverty, the scarcity, and high price of food.

In the Galle District the figures are 1,027 in 1919 and 890 in 1918. As usual, burglary is the commonest offence, with 294 cases. Thefts of cattle (195), thefts of property (165), and hurt with the knife (162) show no improvement on former years.

The work of the police and headmen continued to be highly efficient. Of the 613 cases found by the court to be true, 229 ended in convictions, and 93 are pending. Investigations are prompt and thorough, and these results show them to be successful.

#### GALLE MUNICIPALITY.

10. *Revenue* for the year was Rs. 191,704·85, which is higher than that of 1918 by Rs. 2,326·36, and over the average of the five years—1914 to 1918—by Rs. 24,092·30.

*Expenditure* was Rs. 188,797·51, exceeding that of 1918 by Rs. 2,530·73.

*Loans*.—The Council's funded debt on December 31, 1919, was—

|                                       | Rs.     | c. |
|---------------------------------------|---------|----|
| Waterworks Loan .. .. .               | 32,246  | 52 |
| Loan for Sanitary Improvement .. .. . | 37,840  | 82 |
| New Waterworks Loan .. .. .           | 200,000 | 0  |
| Total .. .. .                         | 270,087 | 34 |

The sinking funds for the extinction of the last two loans were Rs. 14,360·91 and Rs. 16,357·29, respectively. The borrowing powers stood at Rs. 726,071.

*Health*.—The health of the town was good, notwithstanding the food shortage and high prices. Forty-eight cases of phthisis, 24 of chickenpox, and 12 cases of enteric were reported. A case of small-pox was landed from a steamer and treated at the Infectious Diseases Hospital.

*Sanitation* was satisfactory.

*Drainage*.—Surface drains were repaired and kept in order. Good progress was made with engineering survey for the town drainage scheme.

*Roads* were maintained in a good state.

*Lighting*.—Single wick kerosine oil lamps were used pending the introduction of electric lighting.

*Cattle Diseases*.—There were a few cases of hoof-and-mouth disease in a private gala.

*Stray Cattle*.—877 head of stray cattle and 303 goats were seized.

*Stray Dogs*.—643 stray dogs were shot in the streets by the Municipal dog shooter.

#### SANITARY BOARD, GALLE DISTRICT.

11. *Members*.—The Government Agent, Southern Province; the Provincial Engineer, Southern Province; the Provincial Surgeon, Southern Province; Mr. C. Northway; Mr. G. Ranasooriya, Proctor; and Mudaliyar of Wellaboda pattu. There are three Sanitary Board towns.

*Ambalangoda*.—The revenue was Rs. 12,272·70; the expenditure Rs. 15,951·60. Lighting, scavenging, and conservancy were carried out. Existing roads were improved. Three new latrines were completed at Rs. 2,111 each. A sum of Rs. 375 was paid to Government in repayment of a loan.

*Hikkaduwa*.—The revenue was Rs. 3,949·73; the expenditure Rs. 2,763·61. Scavenging and conservancy of the public latrines and the maintenance of the roads were the principal work.

*Dodanduwa*.—The revenue was Rs. 3,945·80; the expenditure Rs. 5,568·96. Scavenging and the conservancy of the public latrines were carried out as usual. The roads were well maintained. A sum of Rs. 520 was paid to Government in repayment of a loan. A further sum of Rs. 2,090, being the contribution of the Board, was paid to the Public Works Department for the construction of cement-side drains.

#### VILLAGE COMMITTEES.

12. There are six Mudaliyars' divisions in the Galle District. Each Mudaliyar is Chairman of the Village Committees within his division. The total revenue of the Committees was Rs. 37,288·51, or Rs. 1,093·80 less than last year. The expenditure was Rs. 35,730·04. Good work was done in the maintenance of the Committee's buildings, roads, and edandas, but the state of many of the roads is by no means satisfactory, and funds are insufficient for the necessary improvements.

#### VILLAGE SANITATION.

13. The Village Committee rules on sanitation are enforced by the headmen. The Sanitary Inspector in Talpe pattu continues to work satisfactorily. Throughout the district steps have been taken to compel villagers to construct cesspit latrines. First, a general order to this effect was issued; then formal notices were served on those who did not comply, warning them of the consequences of neglect; and finally, prosecutions were entered against the recalcitrant. 288 such notices were served, and 50 cases instituted. Sixteen accused persons were fined Rs. 2 each, and the rest having complied with requirements were discharged. 9,568 latrines were constructed during the year. The next step is to induce the people to make use of them.

#### PUBLIC WORKS.

14. The new hospital at Elpitiya was the only new work of importance commenced in the Galle District. Some progress was made with the site of the Udugama hospital. Roads, bridges, and buildings were maintained in good order.

#### HOSPITALS, &c.

15. There are two large hospitals in the Galle District, at Galle and Balapitiya. Progress was made with site of the new one at Udugama, and a commencement made at Elpitiya. The district has 22 dispensaries, at which 52,034 patients were treated.

#### LAND SALES.

16. During the year 627 lots were dealt with. The extent of land sold was 353 acres and 26 perches for Rs. 34,139·57. 1,601 acres 1 rood and 10 perches were leased realizing Rs. 46,043·80. 29 lots were settled at half-improved value, in extent 32 acres 3 roods and 11 perches, for Rs. 1,521·95.

Certificates of quiet possession were issued in respect of six lots, the fees amounting to Rs. 222·70. The total revenue from land sales, including fees, was Rs. 81,928·02. The average price on lands sold outright was about Rs. 96·64 per acre.

#### PLUMBAGO LANDS.

17. There was little demand for plumbago leases. Only 31 perches were leased during 1919 for five years, premium paid being Rs. 62·40. Ninety-nine mines were opened during the year (146 during previous year).

#### FORESTS.

18. The Assistant Conservator of Forests reports that the revenue collected during the year by sale of timber, royalty, &c., was Rs. 9,225·20, apart from the value of timber furnished to the Public Works Department.

#### WASTE LANDS ORDINANCE.

19. The Land Settlement Department published four notices dealing with 834 acres 2 roods and 25 perches, of which 495 acres 1 rood and 2 perches were declared Crown, 2 acres 1 rood and 29 perches sold to claimants, 7 acres 1 rood and 10 perches abandoned; action is pending with regard to 329 acres 2 roods and 24 perches.

#### EXCISE.

20. *Toddy Rents.*—The Galle District toddy rent sales realized Rs. 53,298·48 for 1918–19, compared with Rs. 45,982·55 for 1917–18. There were 33 toddy taverns, five less than in the previous year.

*Arrack Rents.*—The Galle District arrack rent was sold for Rs. 249,990, as against Rs. 342,240 for 1917–18. The number of sanctioned arrack taverns was 62, four less than in the previous year.

The following is a statement of foreign liquor licenses issued in the Galle District for the financial year ended September 30, 1919, and the fees recovered therefor :—

| Description of License. | Number issued. | Fees recovered.<br>Rs. c. | Description of License. | Number issued. | Fees recovered.<br>Rs. c. |
|-------------------------|----------------|---------------------------|-------------------------|----------------|---------------------------|
| Retail ..               | 4 ..           | 450 0                     | Resthouse ..            | 10 ..          | 73 0                      |
| Tavern ..               | 4 ..           | 725 0                     | Occasional ..           | 3 ..           | 51 0                      |
| Hotel ..                | 2 ..           | 450 0                     |                         |                |                           |
| Beer and porter ..      | 1 ..           | 30 0                      | Total ..                | 27             | 2,079 0                   |
| Bar ..                  | 3 ..           | 300 0                     |                         |                |                           |

*Distillery Licenses.*—26 licenses were issued for 1919 and 30 for 1918.

Twelve ballots for or against the abolition of taverns were held during the year, ten with regard to arrack taverns, and two with regard to toddy taverns. The 75 per cent. of the taxpayers necessary for abolition voted only in two instances, Lelwala arrack tavern and Pinnaduwa toddy tavern. All these ballots were held in places close to the taverns concerned.

There were 166 prosecutions in the Galle District for offences under the Excise Ordinance; 157 resulted in convictions, and fines aggregating Rs. 3,096 were inflicted.

#### THE RIOT DAMAGES ORDINANCE, 1915.

21. This account was closed early in the year. The amount due by the district (apart from the town of Galle, which had already settled all claims) was Rs. 94,878. Twenty-nine administrative areas were involved. Rs. 95,277·74 was recovered, the excess Rs. 399·74 representing fines on defaulters and payments voluntarily made by persons omitted from the classified lists.

#### IRRIGATION.

22. The irrigation works in the Galle District are :—

(1) Dedduwa in Bentota-Walallawiti korale. The recovery of the rate Rs. 1,077·09 for 1919, which fell due in June, was recovered about the middle of August, the earliest date by which the rates have been recovered so far. Those who were unable to pay earlier were given time till the end of July, when the harvest was reaped. No lot was sold this year for non-payment.

(2) Digoda tank, in Talpe pattu. Government refused to incur expenditure for the maintenance of this tank. Steps are being taken to repair it at the expense of the field owners, who have collected the money.

#### FIREARMS ORDINANCE.

23. In the Galle District 799 guns were licensed; the fees amounted to Rs. 2,636.

#### SALT.

24. The Government salt store at Galle continues to work satisfactorily in keeping down the level of prices throughout the district. It has been described in earlier reports. My Assistant at Hambantota gives an account of the salt collections there.

#### REGISTRATION OF MARRIAGES, BIRTHS, AND DEATHS.

25. The number of marriages registered in the Galle District was 1,551; births, 11,850; deaths, 9,313.

#### PILGRIMAGES.

26. The chief pilgrimages of the Province are to Dondra, Matara District; and Kataragama, on the borders of the Hambantota District and the Province of Uva. Both were prohibited this year owing to outbreaks of cholera.

#### CIRCUITS.

27. Every part of the Galle District was visited by me during the year. Short tours only were possible in the Matara and Hambantota Districts, my presence at headquarters being necessary in connection with the distribution of rice.

Galle Kachcheri,  
April 26, 1920.

R. B. HELLINGS,  
Government Agent.

## APPENDIX.

I.—REPORT OF THE PROVINCIAL ROAD COMMITTEE, SOUTHERN PROVINCE,  
FOR THE YEAR 1919.

*Composition of Committee.*—The members of the Committee for the year were the Hon. Mr. R. B. Hellings (Chairman), Messrs. A. E. Mayos (Provincial Engineer), A. C. Hayley, W. Y. Mackintosh, R. A. H. de Vos, D. G. Goonewardene, and Magdon Ismail.

2. *Meetings.*—Meetings were held on February 1, June 7, and October 18, at which nearly all members were present.

3. *Elections.*—The Committee regrets to record the death of Mr. E. G. Auwardt, Burgher Member of the District Road Committee, Hambantota, in July. Mr. A. W. Anthonisz was elected to the vacant seat in September.

4. *Encroachments.*—Six cases of encroachment outstanding at the end of 1918 were dealt with, 1 was removed, 4 are still pending, and in the remaining case no action was taken. Seven fresh cases were reported during the year; of these, 2 have been removed, no action was taken in 1 case, and the others are pending.

5. *Building without Notice.*—Nineteen cases of building without the required notice were dealt with; prosecutions were successfully entered in 8 cases, departmental fines were imposed in 5 cases, no action was taken in 3 cases, and in 1 case the building was pulled down. The others are awaiting action.

6. *Stray Cattle.*—528 licenses to seize stray cattle were issued in the Galle District, 226 in Matara, and 34 in Hambantota.

7. *Resthouses.*—These continued to be well maintained. The only improvements found necessary were (i.) the renewal of the roof of the Ambalangoda resthouse, effected at a cost of Rs. 1,277.50; (ii.) provision of servants' latrines for the Kottawa, Wakwella, Baddegama, and Kamburupitiya resthouses, total cost Rs. 611.80; (iii.) cementing floors of bedrooms and repair of drains of the Matara resthouse, Rs. 1,100; (iv.) gates for Ambalangoda resthouse, Rs. 64.20; and (v.) extra window at Tangalla resthouse, Rs. 75.

8. *Distribution of Labour.*—A statement showing the distribution of labour to principal roads and resthouses is given below:—

| Principal Roads.                                      |        |    |                  |
|---|--------|----|------------------|
|   | Rs.    | c. |                  |
| <b>Galle District:—</b>                               |        |    |                  |
| Bentota to Goiyapana ..                               | 12,459 | 0  |                  |

| Balance on December 31, 1919 ..  | —       | —  | 12,002  | 19 |
| Total ..   |         |    | 138,679 | 58 |

10. *Deniyaya-Hayes Branch Road.*—The contributions due from estates interested in the Deniyaya-Hayes branch road for 1918-19, amounting to Rs. 3,654, were duly paid in by the proprietors. A balance of Rs. 1,355·22½ on the private contributions for 1917-18 was, at the request of the proprietors, voted for improving dangerous corners on the road, Government providing a like sum for the purpose.

11. *Local Committee.*—Mr. E. C. Anderson was elected Chairman of the Local Committee, *vice* Mr. C. F. Winthrop, who had left the Island.

12. *Kettapolla-Omatta Road.*—An application was made to Government to extend the provisions of the Branch Roads Ordinance to the Kettapolla-Omatta Village Committee road, and is under consideration. This road is an important outlet for the rubber estates of the Omatta district.

13. *District Road Committees.*—The reports of the Chairmen, District Road Committees of Galle, Matara, and Hambantota, are annexed.

R. B. HELTINGS,  
Chairman.

February 24, 1920.

## II.—REPORT OF THE DISTRICT ROAD COMMITTEE OF GALLE FOR THE YEAR 1919.

*Composition of Committee.*—The members forming the Committee were the Hon. Mr. R. B. Hellings (Chairman), Messrs. H. Scott, C. E. de Vos, and E. V. Gooneratne. Two meetings were held, on February 1 and June 7, respectively.

*Staff.*—Mr. Alfred Erskine, Superintendent of Minor Roads, left Ceylon at the end of February on furlough. Mr. R. A. Solomons, Head Clerk, Provincial Road Committee, Southern Province, acted for him during March until relieved by Mr. F. N. de Kretser, Head Overseer, Public Works Department, who has been seconded for service under this Committee. This officer's work, so far, has been highly satisfactory.

*Road Tax.*—The actual collections of road tax recovered during the year amounted to Rs. 82,572, as against Rs. 84,114 in 1918. The decrease is due to the increasing poverty of the district owing to the high cost of living. A comparative return of collections is given below :—

|   | 1918.  |         | Percentage on Number under Head 2. | 1919.  |         | Percentage on Number under Head 2. |
|---|--------|---------|------------------------------------|--------|---------|------------------------------------|
|   |        |         |                                    |        |         |                                    |
| 1. Population of local area by latest Census ..   | —      | 220,951 | —                                  | —      | 220,951 | —                                  |
| 2. Number of resident males by division officers' lists reported liable to labour ..      | —      | 61,358  | —                                  | —      | 61,607  | —                                  |
| 3. Discharged obligation within local area by—  |        |         |                                    |        |         |                                    |
| (a) Paying single commutation ..  | 54,850 |         | 89·39                              | 53,950 |         | 87·57                              |
| (b) Paying double commutation ..  | 613    |         | ·99                                | 548    |         | ·88                                |
| (c) Labouring six days ..   | —      |         | —                                  | 2      |         | ·003                               |
| (d) Labouring twelve days ..  | —      |         | —                                  | —      |         | —                                  |

*Minor Roads.*—A report from the Acting Superintendent of Minor Roads is annexed on the maintenance of roads, bridges, and resthouses in the district, and the improvements carried out.

February 24, 1920.

R. B. HELLINGS,  
Chairman.

#### REPORT OF THE ACTING SUPERINTENDENT OF MINOR ROADS, GALLE.

##### MAINTENANCE OF ROADS.

THE year under review has been a very trying one for road making, owing to the abnormal rain and the floods experienced. Several roads were submerged for long periods, though cart traffic was uninterrupted, and the damage caused was great.

The want of sufficient waterways and the insufficient size of some of the old culverts was also a drawback, and anxiety was caused by the unreliability of most of the old structures, which had to be constantly watched.

The majority of roads, however, were well maintained, the few exceptions being (a) Wanduramba road, (b) Kosgoda-Elpitiya, and (c) Bentota-Uragaha sections. Considering the forty-four sections, amounting to nearly 270 miles, the result gained has been good.

It is my opinion that considerable improvement is necessary if the roads mentioned are to be made passable during all weathers :—

(a) *Nirawella-Wanduramba Road.*—This section is for the most part a gravel road, with several steep gradients; the side drains are badly choked by scour brought down from the hills, and the road requires barrelling badly, the centre being in some places lower than the sides. I have taken some trouble during the year, and am glad to state that it has been with some success. Drains were cut along the whole section where necessary, scoured places filled, and sides reduced. The road was heavy as a result, but the inconvenience caused was unavoidable. The section, though not perfect, is very much improved, and could be better in time.

(b) *Kosgoda-Elpitiya Road.*—Traffic on this road is great, especially in firewood. The grant obtained from Government helped matters to some extent, but it would be good if Government could be persuaded to contribute a larger sum annually.

(c) *Bentota-Uragaha Road.*—This road is now in very fair order. There was some delay in carrying out repairs during the first half of the year owing to difficulty in getting the metal supply and the rice trouble.

##### IMPROVEMENT TO ROADS.

Improvements to the following roads were carried out from Government grants—

- (a) Kosgoda-Elpitiya.
- (b) Ahangama-Imaduwa.
- (c) Hirimbura-Baddegama.

The money was spent in the first two in track metalling, which has been a great improvement. The Baddegama improvement was started about the end of the year, and is nearing completion. The work done was the raising of the section running through the fields at Holuwagoda to an average of 2 feet 6 inches, and laying foundations and surface metal. A new culvert 4 feet by 4 feet is in course of construction, and one of the culverts in existence has been raised 2 feet.

##### NEW ROADS.

*Construction of Road from Hulandawa to Oyata.*—An additional 40 chains of new road has been opened and two temporary bridges built. Seven temporary culverts have also been constructed.

##### CULVERTS AND BRIDGES.

Nine new culverts were built, most of which were of large size. The work done was of a good standard. Nineteen old culverts were repaired. The old structures are a source of continued trouble, and require constant watching. I shall be replacing several with the new estimates.

*Bridges.*—The expenditure for the most part has been in replacing bridge planks. An entire abutment was built to a bridge on Oyata road, and the platform of 3-foot bridges on the Wakwella-Dodangoda road were renewed and all old piles replaced. An attempt was made to secure rail iron for some of the longer bridges, but the Railway Department are unable at present to supply the lengths required.

## RESTHOUSES.

The improvement to resthouses was the providing of several new latrines for servants, and the renewal of the roof of the main building of Ambalangoda resthouse.

Three new latrines were built at Baddegama, Kottawa, and Wakwella, and two are nearing completion at Udugama and Uragaha. A vote has also been passed for a building at Imaduwa, and the work will be in hand shortly.

The roof of the main building of Ambalangoda resthouse was renewed and the ridge set in Calicut tiles. The usual annual repairs were done at all resthouses.

## LABOUR.

Considerable difficulty was experienced in maintaining the labour force owing to the scarcity of rice and the high price of all foodstuffs. The rates stand to-day as they may have been a long time ago. Overseers are unable to get provisions on credit as in former times, and payments have to be frequent to help the men, but this does not altogether ease matters, and the worry and trouble is very great.

January 29, 1920.

F. N. DE KRETSEB,  
Acting Superintendent of Minor Roads.

## REPORT ON THE MATARA DISTRICT FOR 1919.

Area of the District, 481 square miles ; Population at Census of 1911, 227,359.

## I.—ADMINISTRATIVE CHANGES.

1. Mr. T. REID, Assistant Government Agent, was succeeded by Mr. J. D. Brown on September 5.
2. Mr. J. C. W. Rock, District Judge, went on leave on September 12. His successor, Mr. F. D. Peries, arrived on December 8, the work in the meantime being carried on by Mr. G. P. Keuneman.
3. On July 28 Mr. C. E. Jones succeeded Mr. S. D. Dhondy as Police Magistrate.
4. On June 10 Mr. E. J. Christoffelsz, Assistant Superintendent of Excise, was transferred to Kegalla. Mr. E. A. de Alwis, who succeeded him, died on July 9, and Mr. D. de Kretser was appointed to the post.

## II.—PRINCIPAL EVENTS.

5. His Excellency the Governor visited the district in February. His Excellency came a second time on June 27 to open the Matara Exhibition, and to unveil the photograph of the late Mr. H. W. Milligan presented to the Kachcheri by the Hon. Mr. O. C. Tillekeratne. Mr. Milligan, who acted as Assistant Government Agent for three months in 1913, gained the universal esteem of the people, and his death in action in the war was greatly deplored.
6. The Exhibition in June was taken up by everybody with the utmost enthusiasm, and proved to be an unprecedented success.
7. July 19 was observed as a day of rejoicing at the successful conclusion of the great war.
8. On November 11 His Majesty's behest to observe a two minutes' silence and cessation from work at 11 A.M. was duly observed.

## III.—REVENUE.

9. That part of the revenue of the district collected at the Kachcheri amounted to Rs. 265,014·51, as compared with Rs. 232,411·39 for 1918.

10. The principal increases were as follows :—

|                | Rs.   | o. |                            | Rs.   | o. |
|----------------|-------|----|----------------------------|-------|----|
| Land Sales ..  | 7,089 | 93 | Chena Rents, &c. ..        | 2,276 | 67 |
| Stamp Fees ..  | 8,574 | 70 | Opium Sales ..             | 4,592 | 87 |
| Toddy Rents .. | 2,174 | 57 | Fees of Court: Sundries .. | 4,052 | 89 |

The competition for land was very keen, greatly increased areas of chenas were given out in order to combat the food shortage ; the scale of stamp fees and the price of opium were both raised ; while unclaimed Fiscal's Fees chiefly contributed to the large increase under Fees of Court : Sundries.

11. The arrears of revenue showed another satisfactory decrease, from Rs. 649·67 to Rs. 535·23.

## IV.—CONDITION OF THE PEOPLE AND ALLIED SUBJECTS.

12. *Health.*—Unfortunately during the year under review the health of the people fell considerably below the normal standard. This was to a large extent due to the scarcity of food which at times became acute. The district did not escape the universal ravages of influenza, and a few cases of cholera occurred. Enteric cases occurred fitfully in Matara town.

A pleasing feature, however, is the marked manner in which the inhabitants are beginning to realize and appreciate the effectiveness of English treatment. The increased attendance at hospitals and dispensaries is proof of this, and of the fact that the people have confidence in the officers of the Medical Department stationed in the district.

I have been much impressed at my recent exemption work with the universal prevalence of parangi. I am of the opinion that the time has come for the provision of a parangi ward at each of the Matara and Deniyaya hospitals, where treatment with salvarsan or some substitute therefor could be administered. Venereal diseases are also very common, and anchylostomiasis is rampant everywhere.

13. *Food Supply.*—The paddy grown in the district is totally insufficient for the local consumption. It is largely supplemented with Coast rice from Colombo and paddy from Hambantota.

Large areas of chenas were allowed this year, and the supply of the cheaper forms of food was thereby greatly increased. The increased cultivation of high lands privately owned is universally apparent, and is the one redeeming feature arising from the scarcity of food.

Transplantation of paddy is slowly coming into favour, and some splendid results were to be seen all over the district. Rewards were distributed to several cultivators who took this up, and every opportunity taken to impress upon the people the advantages of the system. But the chief hope of getting it more universally adopted lies in the ocular proof of the immensely enhanced yield which results. On the whole, the minor and irrigation headmen are doing good work by personal example.

The experimental garden near Borala in Weligam korale is making excellent progress, and while it has not yet reached the paying stage (and may never do so), it is well worth the comparatively small sum expended on it jointly by the Agricultural Department and the Village Committee.

There are twelve Co-operative Credit Societies, for the most part managed by the Chief Headmen. They have done excellent work, chiefly in the way of securing manure for the villager.

Two meetings of the Food Production Committee were held, and methods for the development of agriculture were discussed. The services of two more Agricultural Instructors were secured for Weligam korale and the Four Gravets. The rewards for transplantation of paddy, mentioned above, were paid from a vote allowed by Government.

14. *Industries.*—The chief industries are the cultivation of paddy, coconut, cinnamon, citronella, tea, and rubber; the manufacture of coir yarn, copra, and coconut oil; and fishing. Minor industries include gemming, plumbago mining, brass work, mat weaving, brick making, and pottery. A certain amount of lace is also produced.

Rubber cultivation is steadily increasing, and is being taken up to a large extent by the villager.

The prices obtainable for plumbago, citronella oil, and coconut products show extraordinary fluctuations, affecting the people concerned very considerably. Prices were low at the beginning of the year, but improved later on.

Large quantities of fish are sent in ice to Colombo from Weligama and Matara. This means scarcity and high prices locally. The fishermen obtain more money, but it is doubtful whether this is any great advantage to a notoriously improvident class. It would undoubtedly benefit the district generally if the Colombo demand were removed by the institution of trawling there.

#### V.—POLICE AND CRIME.

15. The following figures show a further increase in crime :—

|                | 1919. | 1918. |
|----------------|-------|-------|
| Reported cases | 684   | 664   |
| True cases     | 454   | 358   |
| Convictions    | 188   | 137   |

The number of offences against property—cattle lifting, burglary, and petty thefts—has shown a most unsatisfactory upward tendency. This is doubtless due to the scarcity of food and decrease in employment. I have heard it said that the way in which private gardens, &c., are rifled is a real deterrent to enterprise in their cultivation. This may be an exaggeration, but the evil is rampant, and in some cases is caused by real starvation.

16. With a few notable exceptions, the relations between the headmen and the police have been good. Patrol work continues to be carried out jointly by them. The Assistant Superintendent of Police readily brings to my notice any good work done by the headmen, and his recommendations as to rewards are of great assistance to me.

17. I am personally quite convinced that the police station at Deiyandara should be reopened. As I hope to get the Denegama-Mulatiyana road made passable this year, the chief difficulty in the way of resuscitating the station will be removed.

#### VI.—VILLAGE COMMITTEES.

18. The financial position for the six Committees is as follows :—

|                              | Rs.    | c. |                              | Rs.    | c. |
|------------------------------|--------|----|------------------------------|--------|----|
| Balance on December 31, 1918 | 8,354  | 90 | Expenditure, 1919            | 48,450 | 19 |
| Receipts in 1919             | 42,507 | 27 | Balance on December 31, 1919 | 2,411  | 98 |
| Total                        | 50,862 | 17 | Total                        | 50,862 | 17 |

Compared with 1918, revenue increased by Rs. 1,469·81, and expenditure decreased by Rs. 804·25.

19. The improvements carried out in 1919 were not numerous. A permanent market at Kirinde and a temporary one at Makandura were built. Two wells were sunk from money granted by Government at Deniyaya on sites given free by Messrs. D. M. Rajapakse and D. W. R. Wijesekera. Two culverts on roads in the Four Gravets were constructed from the sum of Rs. 866 allotted to the district from the Government vote for "Grant in aid for Village Works."

20. The registration of all roads and paths over which the public have a right of way was completed this year. The lists will be printed in book form.

21. Village Committee burial grounds now exist in almost all villages with a population of one thousand or more. Opposition is dying out to a large extent, chiefly because prosecutions were entered for burials in unregistered grounds, and the registration of family burial grounds where Committee ones exist was refused.

22. The number of cases instituted in the Village Tribunals showed an increase from 23,414 to 27,707, and the Presidents undoubtedly had a busy time. The appeals amounted to 341 to the Assistant Government Agent and 26 to His Excellency the Governor. The number of decisions set aside were 31 and 3 respectively. These figures seem to show that the Presidents did satisfactory work.

#### VII.—IRRIGATION.

23. Water-rate to the extent of Rs. 7,082·86 was collected without arrears.

24. Huwandiram rents fetched Rs. 33,115·39. A sum of Rs. 3,005·39 was spent on the maintenance and upkeep of village works.

25. Voluminous correspondence has passed with reference to the passing of cultivation rules, but the final draft is not yet completed.

#### VIII.—PUBLIC WORKS.

26. The principal roads throughout the district received most efficient attention from the District Engineer, Mr. E. J. Peries. Unfortunately this does not necessarily mean that their condition was satisfactory, owing to the fact that the money provided is totally insufficient. The September floods caused considerable damage to the roads in the interior. The Coast road bears an enormous amount of traffic, especially on the Hambantota side, due to the transport of salt and paddy. Presumably owing to the lack of proper foundation this road gets out up very quickly, even after repairs have been effected.

27. Improvements effected include the provision of foot bridges along the main bridge at Matara (a work of the utmost utility), the coast protection at Matara, &c., benching corners in the hilly district, and the provision of foundation on the Weligama-Telijjawila road.

28. The principal needs of the district are :—

- (a) A new Police Court.
- (b) A Post and Money Order Office at Morawaka.
- (c) The extension of the railway to Tangalla.
- (d) Side drains at Dondra and Dikwella.
- (e) Quarters at Matara for officials.
- (f) A new Post Office at Matara.
- (g) Telegraphic communication to Hakmana.
- (h) The linking up of Matara and Galle by telephone.
- (i) The proper construction of the road from Tihagoda to Kamburupitiya, Mulatiyana, Urubokka, and Kotapola by the Public Works Department.
- (j) The handing over of the road from Hakmana to Denegama, Miella, and Walasmulla to the Public Works Department.
- (k) The provision of additional wards to the hospitals at Matara and Deniyaya.

#### IX.—EXCISE.

29. The consumption of foreign liquor increased slightly, but that of arrack decreased, presumably owing to the fact that seven taverns were closed. The same cause probably contributed to an increase of Rs. 8,876·67 in the amount realized by the sale of the toddy rents.

30. The following figures show the licenses in force compared with the two preceding years :—

|      |    | Foreign Liquor. | Arrack. | Toddy. | Total. |
|------|----|-----------------|---------|--------|--------|
| 1917 | .. | 20              | 36      | 35     | 91     |
| 1918 | .. | 15              | 34      | 36     | 85     |
| 1919 | .. | 15              | 27      | 35     | 77     |

31. In July the right to tap trees for sweet toddy without license was conceded. The jaggery industry consequently received a considerable filip.

32. One toddy tavern was closed by the operation of local option.

#### X.—EDUCATION.

33. The District School Committee consisted of the following members :—The Assistant Government Agent (Chairman), Rev. G. E. H. Arndt, Rev. C. H. S. Ward, Mudaliyar W. A. Amerasekera, and Mr. I. Gunawardena, President of Weligam korale. Three meetings were held during the year.

34. The provision of schools throughout the district is, on the whole, adequate. The total number is 117, of which 53 are Government schools. There are also a weaving school at Talpawila, and a carpentry school at Tihagoda.

35. The attendance, which in recent years was easily a record, fell off considerably owing to outbreaks of influenza and the prevalence of general distress and scarcity of food.

36. The provision of special building grants by the Director of Education raised the revenue from Rs. 24,831·94 in 1918 to Rs. 27,417·61. The expenditure amounted to Rs. 21,798·88.

37. New works consisted of a temporary school at Angunna-Badulla; permanent schools at Henegama, Bathigama, and Talpawila (weaving school); and teacher's quarters at Gandara. The site for the Bathigama school was given free by Don Davith and four other villagers.

38. Each Government school has a garden attached to it, and the interest shown by the teachers and children in these gardens is quite remarkable. Arrangements have been made for several schools to cultivate plots of paddy land for the 1920 yala in the hope that the children may pick up some useful knowledge of the improved methods that will be used. The Chief Headmen and Agricultural Instructors will assist in this work by inspection and advice.

#### XI.—ADMINISTRATIVE ORDINANCES.

39. *Waste Lands Ordinance.*—No notices under the provisions of this Ordinance were issued during the year.

40. *Firearms Ordinance.*—585 licenses were renewed and 112 new licenses issued.

41. *Game Ordinance.*—Only three licenses were applied for, the small number being probably due to the high cost of ammunition.

42. *Dog Registration.*—The number of dogs registered was 1,576, against 1,594 in 1918. 302 dogs were destroyed, compared with 107 in the previous year.

43. *Cart Licenses.*—The number issued decreased from 2,152 to 2,014. Mechanical traction is being increasingly used for the transport of produce from, and rice to, estates.

44. *Butchers Ordinance.*—Eight licenses were issued. The number in 1918 was six.

## XII.—CATTLE.

45. The following figures show the comparative numbers for the last two years :—

|                      | 1918.  | 1919.  |
|----------------------|--------|--------|
| Black cattle .. .. . | 34,529 | 33,521 |
| Buffaloes .. .. .    | 6,239  | 6,358  |

46. 9,273 head of cattle were branded during the year.

47. Hoof-and-mouth disease spread to the district from Hambantota towards the end of April. The towns of Dondra and Matara were proclaimed as infected areas on May 20, while on June 6 the whole district was proclaimed. The proclamations were withdrawn on September 18. 518 black cattle and 107 buffaloes contracted the disease, but only 46 deaths occurred. An Assistant Veterinary Surgeon was stationed in the district from May to September.

## XIII.—GENERAL.

48. The annual fair at Dondra was not held this year owing to an outbreak of cholera in the Hambantota District. The other minor festivals took place as usual.

49. At the end of the year a sum of Rs. 19,927·48 was outstanding from a total of Rs. 214,467·69 to be recovered on account of riot compensation. About Rs. 15,000 of this will be recommended to be struck off as irrecoverable for various reasons. It is hoped that the accounts will be closed about the middle of 1920.

50. A continued improvement took place in the working of the Fiscal's Department. This was due to the prompt inquiry into complaints against village Fiscal's Officers, frequently resulting in severe punishment being meted out.

51. Titular ranks of Mudaliyar and Veda Muhandiram were conferred on Muhandiram D. M. Samaraweera and Veda-Arachchi L. F. M. Jayasekera. These were well-earned compliments paid to a loyal and public-spirited gentleman and to a philanthropic native medical practitioner of considerable repute.

52. Towards the end of June the district, in common with the rest of the Island, began to suffer on account of the rice situation which arose then. The usual system of obtaining rice from Colombo consigned to the Assistant Government Agent came into force. At first this was distributed to traders, who retailed it with little or no control exercised over them. Their work was so unsatisfactory that they were replaced by depôt-keepers, who were subject to control and supervision. A Rice Distribution Committee was formed, the members of which did invaluable work in looking after the depôt-keepers and curtailing their malpractices by introducing a card system of distribution. The members of this Committee were Mudaliyar W. A. Amarasekera, Dr. V. D. Gunaratna, Mr. J. W. R. Ilangakoon, Mr. G. P. Keuneman, Rev. S. G. Mendis (Secretary), and Mr. D. Samaraweera; and the thanks of the residents of Matara are due to these gentlemen for the great amount of sound work they cheerfully carried out. In the rural districts the Chief Headmen, assisted by the minor headmen, were in charge of the distribution, and did their duties satisfactorily on the whole. At times there was trouble in the thickly-populated coast areas of Weligam korale and Wellaboda pattu owing to the supply being insufficient, but this kind of thing was unavoidable. A considerable number of prosecutions were entered against those who sold rice and paddy above the controlled rates.

53. I record with pleasure my appreciation of the hardworking zeal of Mr. G. A. Perera, the Kachcheri Office Assistant, and of the efficient work done by the Pattu Mudaliyars.

Matara Kachcheri,  
March 17, 1920.

J. D. BROWN,  
Assistant Government Agent.

## APPENDIX.

## I.—REPORT OF THE LOCAL BOARD, MATARA, FOR 1919.

The members of the Local Board in 1919 were the Assistant Government Agent (Chairman); Mr. E. J. Peries, District Engineer; Dr. E. W. Scharenguivel, Medical Officer; Mr. D. Samaraweera; Mr. G. P. Keuneman; and Dr. V. D. Gunaratna.

2. The revenue of the Board was Rs. 40,048·81, exclusive of a grant of Rs. 10,000 from Government to help to cover the cost of latrines. The expenditure amounted to Rs. 48,708·98, apart from Rs. 18,685·06 spent from loan account for the provision of new latrines.

3. In response to the address made to His Excellency the Governor on his visit to the town, Government began an investigation as to the possibility of providing a water supply. Mr. C. H. Linnell of the Public Works Department did this work for about four months at the end of the year, and his scheme is now being tested. No report has been received as yet.

4. During the south-west monsoon the sea caused great damage to the road leading to Brown's Hill. This road is a favourite promenade for Matara residents, and is of the utmost value to Government as an approach road to the bungalows of the District Judge and Police Magistrate. It will be still more useful to Government when the new bungalows for officials are built. Correspondence is now going on with a view to the Board obtaining assistance to carry out the necessary steps to prevent further encroachment. A sum of Rs. 1,370 was spent in dumping down large stones, and it is estimated that a further amount of Rs. 2,500 will be needed to go on with this work.

During the north-east monsoon a large sandbank accumulates at the critical spot, but this soon gets washed away when the other monsoon causes the river to back up water between the shore and the reef.

5. A fatal case of cholera occurred at Kadeweediya in July. The disease was introduced from Hambantota. The prompt measures taken to remove the contacts to the segregation camp and to guard the town from the arrival of absconders from infected areas (several of these were arrested and sent to the camp) prevented the spread of the disease.

6. The September floods caused damage to the roads. A sum of Rs. 500 was voted to cover the cost of removal of earthlips and of the rebuilding of culverts which had to be broken down.

7. The road leading to the station from the Hakmana road was taken over by the Public Works Department. This had been hitherto maintained by the Board owing to a misunderstanding.

8. The services of the midwife were discontinued in July. The poorer classes still prefer to resort to untrained quacks rather than to call in a trained woman, even though her help costs them nothing.

9. The Board placed at the disposal of the Assistant Government Agent, in his capacity of Deputy Food Controller, a floating advance of Rs. 6,000 to use in case of emergency for paying for rice and paddy for local consumption. This was frequently drawn upon, and the sums advanced repaid in due course.

10. A few cases of rabies which occurred resulted in a vigorous campaign against stray dogs, 178 of which were destroyed.

11. The upkeep of roads was effected well on the whole, and the Works Inspector put in some very sound work. I take this opportunity of recording my appreciation of the great assistance ungrudgingly given me by Mr. E. J. Peries, District Engineer, in dealing with a number of public works carried out by the Board.

12. The usual returns are annexed :—

Statement of Revenue and Expenditure of the Local Board of Matara for the Year 1919.

| REVENUE.                               |                  | EXPENDITURE.                          |                  |
|--|------------------|---------------------------------------|------------------|
|  | Rs. c.           |                                       | Rs. c.           |
| <b>Taxes:—</b>                         |                  | Interest and sinking fund on loans .. | 3,000 0          |
| Property rates ..                      | 10,810 61        | Cost of administration:—              |                  |
| Thoroughfares Ordinance collections .. | 6,926 0          | Establishment ..                      | 4,623 21         |
| Other ..                               | 2,379 75         | Office contingencies ..               | 912 1            |
| <b>Licenses:—</b>                      |                  | Cost of audit ..                      | 205 62           |
| Liquor ..                              | 1,015 0          | Revenue services ..                   | 1,658 13         |
| Opium ..                               | 3,144 0          | Sanitary charges ..                   | 14,068 92        |
| Carts and carriages ..                 | 1,209 0          | Lighting ..                           | 3,519 3          |
| Guns ..                                | 648 0            | Police charges ..                     | 257 90           |
| Proctors and notaries ..               | 1,135 0          | <b>Public works:—</b>                 |                  |
| Motor vehicles ..                      | 1,270 0          | Maintenance ..                        | 10,161 20        |
| Other ..                               | 291 25           | New construction ..                   | 9,221 68         |
| <b>Rents:—</b>                         |                  | New latrines (loan account) ..        | 18,685 6         |
| Markets ..                             | 4,207 99         | Law expenses ..                       | 12 0             |
| Butchers' stalls ..                    | 130 0            | Pensions and gratuities ..            | 75 0             |
| Boutique sites ..                      | 554 0            | Miscellaneous ..                      | 994 28           |
| Grazing ..                             | 279 0            | <b>Other payments:—</b>               |                  |
| Ferry boats ..                         | 120 0            | Refund of deposits ..                 | 419 70           |
| Rent of lands ..                       | 238 25           | Advances ..                           | 9,238 77         |
| Other ..                               | 63 50            | Balance on January 1, 1920 ..         | 9,048 84         |
| <b>Fines:—</b>                         |                  |                                       |                  |

Local Board Office,  
Matara, March 17, 1920.

J. D. BROWN,  
Chairman.

**II.—REPORT OF THE SANITARY BOARD, MATARA DISTRICT, FOR 1919.**

The members of the Board were :—The Assistant Government Agent (Chairman); Dr. E. W. Schafenguivel, Medical Officer; Mr. E. J. Peries, District Engineer; Mr. D. Samaraweera; Mr. B. Samaraweera; Mudaliyar S. W. Ilangakoon; and Mudaliyar H. E. Wickremeratne.

**WELIGAMA TOWN.**

Comparative figures are as follows :—

|      |    | Revenue. |    | Expenditure. |    | Arrears. |    |
|------|----|----------|----|--------------|----|----------|----|
|      |    | Rs.      | c. | Rs.          | c. | Rs.      | c. |
| 1918 | .. | 16,439   | 28 | 17,323       | 83 | 676      | 95 |
| 1919 | .. | 14,300   | 13 | 19,799       | 21 | 879      | 47 |

3. The traces of three new roads were demarcated by the cutting of side drains, viz., Fourth and Fifth Cross streets and Fourth Sea road. During 1920 these roads will be cleared of the trees standing on them, and compensation for the value of the trees paid to the owners. The chief work at roads, however, will be done towards the opening of Second Cross street, and the making of the surfaces of the above three roads must wait until funds allow of the necessary expenditure.

4. The provision of new roads to let in light and air received a great deal of attention from my predecessor, and this very necessary work will be pushed on to the utmost limit made possible by the funds at the disposal of the Board.

5. The Cemetery road was much improved by the reduction of a hill about halfway along its length. The Batuwala road also received special attention, and its utility was greatly increased by getting it widened and properly gravelled. The eastern end of the Kapparatota road was somewhat badly neglected, and this defect must be put right in 1920.

6. The town needs several more latrines, in addition to the eight new ones put up in 1918. Owing to the prevalence of distress it was found impossible to insist on the provision of privies by householders to the extent that is desirable.

7. A separate distrainer was appointed in the middle of the year, and owing to the fact that the work of collecting tax is not carried out well by the headmen, a special collector will have to be appointed.

8. The health of the people was, on the whole, good, and no infectious diseases occurred, beyond a few cases of chickenpox.

## DONDRA TOWN.

9. Comparative figures are as follows :—

|      | Revenue. | Expenditure. | Arrears. |
|------|----------|--------------|----------|
|      | Rs. c.   | Rs. c.       | Rs. c.   |
| 1918 | 6,310 6  | 11,146 3     | 718 87   |
| 1919 | 5,541 99 | 5,548 96     | 589 39   |

10. No new roads were opened, but existing roads were maintained in very fair order. The widening of existing footpaths is a work which is very necessary.

11. No public latrines exist, and the sanitary condition of the town suffers very considerably in consequence. With such a small revenue available, it is impossible to do anything to improve matters in this respect.

12. It is hoped that the Public Works Department will provide drains on the main road in the near future. Until this is done, this town (especially at the main junction) will continue to be an eyesore.

13. The whole of the work of collecting tax and distraining property was taken off the hands of the headmen, who entirely failed to give satisfaction in the execution of these duties.

14. No by-laws exist yet for the town, because the draft rules drawn up were not approved by the Attorney-General. It is hoped that the new rules about to be submitted will be passed before the end of 1920.

15. The health of the people was satisfactory. But for the first half of the year there was great depression in the coir trade, resulting in a considerable amount of poverty. Fortunately matters improved later on.

16. The usual returns are annexed :—

## Weligama.

Matara, March 17, 1920.

J. D. BROWN,  
Chairman.

## III.—REPORT OF THE DISTRICT ROAD COMMITTEE, MATARA, FOR 1919.

THE members of the Committee were the Assistant Government Agent, Chairman; Mr. E. J. Peries, District Engineer; the Hon. Mr. O. C. Tillekeratne; and Messrs. W. A. Elwell and G. P. Keuneman.

2. One meeting was held during the year, while the rest of the work was done by the circulation of papers amongst the members.

3. The gross collections amounted to Rs. 61,943.50, compared with Rs. 62,689.01 in 1918. Warrants issued against defaulters were 2,432, against 1,395 in the previous year. This increase of figures was due to the fact that the number of people who went to seek for employment elsewhere rose very considerably.

4. The maintenance of the roads was fairly well carried out, but I am personally of opinion that much better supervision as regards the consolidation of metal and the clearing of side drains is necessary. The September floods caused a good deal of damage.

5. The traffic along the roads caused by the transport of firewood and timber has assumed serious proportions. A very considerable mileage of the roads were affected by this, and I have found it necessary to apply to Government for a large sum of money to repair the damage caused. It is impossible for the Committee with the funds at its disposal to cater for the requirements of the Forest Department, and it would appear to be only reasonable that Government assistance should be given.

6. The formation of the Circular road through Urubokka was completed from Government money. Several bridges are still needed, and a proper surface will have to be made along many miles of its length. At the present rate of progress it will be a long time before this exceedingly important road will be available for traffic. I hope in the course of 1920 to approach Government with a scheme for finishing this work in a proper manner rather than by the instalment system at present in vogue.

7. I am opposed to the continued neglect of the Denagama-Mulatiyana road and to the handing over of the Denepitiya-Polatumodara road to the Village Committee. Arrangements will be made in 1920 to have the former road put into good order, and to have this Committee resume the upkeep of the latter road.

8. The handing over to the Public Works Department of the Tihagoda-Kamburupitiya and Hakmana-Miella-Walasmulla roads is long overdue. I am not aware of the reasons for the delay in granting this promised relief.

9. The resthouses were kept up in good order, but some of the approach roads to them are bad.

10. The usual returns are annexed:—

## Statement of Receipts and Expenditure for the Year 1919.

| REVENUE.                                      |    | Rs.    | c. |
|---|----|--------|----|
| Balance on January 1, 1919                    | .. | 11,682 | 8  |
| Commutation realized in money                 | .. | 61,943 | 50 |
| Commutation realized in labour                | .. | 300    | 50 |
| Toll grant on minor roads                     | .. | 6,019  | 20 |
| Government contribution in aid of minor works | .. | 11,397 | 0  |
| Miscellaneous receipts                        | .. | 2,850  | 10 |
| Total   | .. | 94,192 | 38 |

| EXPENDITURE.  |    | Rs.    | c. |
|---|----|--------|----|
| Payment made on account of principal roads and resthouses           | .. | 26,237 | 75 |
| Amount expended on minor works                                      | .. | 42,764 | 97 |
| Establishment and commission to division officers :—                |    |        |    |
| (a) Contribution on account Provincial Road Committee establishment | .. | 481    | 23 |
| (b) Cost of District Road Committee establishment                   | .. | 9,706  | 94 |
| (c) Commission to division officers                                 | .. | 5,558  | 54 |
|   |    | 15,746 | 71 |
| Miscellaneous charges   | .. | 160    | 75 |
| Balance on December 31, 1919  | .. | 9,282  | 20 |
| Total   | .. | 94,192 | 38 |

## Comparative Statement of the Working of the Thoroughfares Ordinance during 1918 and 1919.

|  | 1918.  |         | Percentage on Number under Head 2. | 1919.  |         | Percentage on Number under Head 2. |
|--|--------|---------|------------------------------------|--------|---------|------------------------------------|
| 1. Population of local area by latest Census   | —      | 207,550 | —                                  | —      | 207,550 | —                                  |
| 2. Number of resident males by division officers' lists reported liable to labour      | —      | 46,620  | —                                  | —      | 47,483  | —                                  |
| 3. Discharged obligation within local area by—   |        |         |                                    |        |         |                                    |
| (a) Paying single commutation  | 41,511 |         | 89.04                              | 40,887 |         | 86.10                              |
| (b) Paying double commutation  | 140    |         | .30                                | 204    |         | .42                                |
| (c) Labouring six days   | 137    |         | .29                                | 201    |         | .42                                |
| (d) Labouring twelve days  | —      |         | —                                  | —      |         | —                                  |
| 4. Total discharged obligation   |        | 41,788  | 89.63                              |        | 41,292  | 86.96                              |
| 5. Failed to discharge obligation within local area, but otherwise accounted for as—   |        |         |                                    |        |         |                                    |
| (e) Exempted on account of age, death, disqualification, or physical inability to work | 2,389  |         | 5.12                               | 2,828  |         | 5.95                               |
| (f) Paid or laboured elsewhere   | 1,693  |         | 3.65                               | 1,918  |         | 4.03                               |
| (g) Double entries or entries by mistake   | 91     |         | .19                                | 78     |         | .16                                |

Matara, February 20, 1920.

J. D. BROWN,  
Chairman.

## REPORT OF THE SUPERINTENDENT OF MINOR ROADS FOR 1919.

*Maintenance.*—Up to a good part of the year the roads in my charge were maintained up to a standard of efficiency commensurate with the expenditure I was able to afford on the, as usual, inadequate sums voted. The south-west monsoon was practically a failure, and did not give trouble in the way of heavy rains and floods. There was, however, a factor to be reckoned with, viz., the transport of firewood and heavy logs for Government Departments on a good many of our roads. Deterioration of the surface of the roads affected by this necessary activity on the part of the Forest Department was gradually noticeable, but the insidious damage culminated in a veritable "smash up" of the roads, when unexpected and heavy rains and floods were experienced towards the latter part of the year. There were no funds to meet the cost of extra work to remedy flood damages, so that the ordinary upkeep votes had to meet all charges (except a sum of Rs. 130 for the Diviturai road). This, of course, was an impossible matter, and the consequence was that a good many of the roads were in anything but a good state towards and at the close of the year. I am aware that much will be made of this state of affairs by those who are ignorant of the conditions under which we worked; but, as all fair-minded people first make themselves acquainted with all facts necessary to form a basis for their criticism, adverse comment must to a great extent be of little value.

I have to make special mention of the following roads which suffered very severely, and are now in such a state that urgent assistance from Government alone can save them from getting beyond repair on the annual grants for their maintenance from District Road Committee funds :—

- |  |                                       |
|--|---------------------------------------|
| (1) The Kamburupitiya-Akuressa road.         | (5) The Kamburupitiya-Makandura road. |
| (2) The Kamburugamuwa-Mirissa road.          | (6) The Weligama-Borala road.         |
| (3) Part of the Meddewatta-Hunnadeniya road. | (7) The Weligama-Kananka road.        |
| (4) The Tihagoda-Kamburupitiya road.         |                                       |

Other roads were affected, but in less measure than the above. The amount spent on maintenance was Rs. 31,169.45, of which nearly Rs. 5,000 were devoted to the repair of bridges—a really inadequate sum when the precarious state of some of the structures is considered. It must further be taken into consideration that the rates appearing on my estimates are practically the same as those given a decade ago, and that this makes matters ever so much harder, considering the fact that the cost of labour and materials has advanced so rapidly.

The Kotapola-Urubokka road, the hilliest and twistiest in the district, was much improved by the metalling of wheel tracks, where the surface used to get muddied after the smallest shower of rain owing to the want of even a passably fair quality of gravel. This was done on the upkeep estimate, and should be continued if funds permit. The 5th, 7th, and 8th miles are now passable even in the wettest weather. The 2nd and 3rd miles of this road are often scoured, and, owing to their steep gradient and awkward bends, need a good many additional culverts to keep the surface metal intact.

*Improvements, &c.*—A new culvert 17 feet by 3 feet by 2 feet was built on the Weligama-Borala road (at 2½ mile) at a cost of Rs. 94.72. New mileposts and fractional mileposts were put up on the road from Dampahala to Kotapola at a cost of Rs. 156.50. The bridge at Beralapanatara (on the Kotapola-Urubokka road) had one abutment rebuilt and a new platform provided over an extended waterway on an expenditure of Rs. 393.20.

*Extensions; New Works.*—The money available from the Government grant for the extension of the Mulatiyana-Urubokka road was spent in forming the road and constructing old culverts between the opened sections on the south and north. This leaves the construction of the four bridges at Pasgoda, Bengamuwa, and Dampahala to completely open up a trace which has been merely pecked at for the last twenty years. If Government will only take up this important road and complete it, as it should be completed, by putting in really good bridges right down to Kotapola, a really serviceable and revenue-bringing result will be achieved.

*General Funds* are sure to be much depleted in 1920 on account of the prevailing distress, and the prospect of a reduction of some Rs. 7,000 on last year's votes is not encouraging. Improvements of any description will be impossible, and the hope I entertain of building more waterways must be abandoned. Government aid is urgently necessary, or our roads will go from bad to worse.

*Resthouses.*—These were maintained up to the usual standard.

Matara, February 10, 1920.

J. E. AUSTIN,  
Superintendent of Minor Roads.

## REPORT ON THE HAMBANTOTA DISTRICT FOR 1919.

### I.—ADMINISTRATIVE CHANGES.

MR. H. A. BURTON assumed duties as Assistant Government Agent, Hambantota, on September 18, 1919, relieving Mr. W. L. Murphy, who proceeded home on furlough.

2. Mr. R. S. Gunasekera, Irrigation Clerk, Hambantota Kachcheri, was appointed Chief Clerk and Interpreter of the Minor Courts, Hambantota, on May 1.

3. Mr. T. W. Goonewardene, Office Assistant, Hambantota Kachcheri, was appointed Additional Assistant Collector of Customs, Hambantota, on June 1.

4. Mr. J. L. Caspersz, Assistant Irrigation Engineer, Tangalla Subdivision, left the district in July, and was succeeded by Mr. L. E. de Silva, Irrigation Inspector, as Subdivisional Officer.

5. Mr. S. P. Wijetunga, Acting Mudaliyar, East Giruwa Pattu, was confirmed in his appointment on September 2.

6. Mr. A. R. Watson arrived in Hambantota on September 9 to take up duties as Assistant Superintendent of Surveys.

7. Mr. I. L. M. Usuph, Muhandiram, Magam pattu, was appointed Justice of the Peace and Unofficial Police Magistrate for the Hambantota District on October 3.

8. Mr. R. C. de Silva, Shroff, Nuwara Eliya Kachcheri, was appointed Treasury Officer, Tangalla, on November 1, *vice* Mr. T. Y. Doole, retired.

9. Mr. T. W. Goonewardene, Office Assistant, Hambantota Kachcheri, was appointed Acting Additional Police Magistrate, Hambantota, on November 7.

10. Mr. H. J. V. Ekanayake, District Judge, Tangalla, was transferred to Ratnapura as District Judge, and was succeeded by Mr. C. Harrison-Jones on December 1.

11. Mr. A. C. B. Jonklaas, District Engineer, Hambantota, was transferred to the Government Factory, Colombo, and was succeeded by Mr. W. G. Scott on December 19.

12. Mr. V. S. Wikramanayake was appointed Crown Proctor, Tangalla, on August 4, *vice* Mr. E. G. Auwardt, deceased.

13. Mr. F. E. La Brooy was appointed Justice of the Peace and Unofficial Police Magistrate, Tangalla, on October 17, *vice* Mr. E. G. Auwardt, deceased.

### II.—REVENUE AND EXPENDITURE.

1. The revenue of the district for 1918-19 amounted to Rs. 444,424.57, as compared with Rs. 453,660.68 for 1917-18, thus showing a decrease of Rs. 9,236.11. This decrease is attributable to the falling off of sales of salt during the months in which cholera prevailed at Hambantota.

2. Revenue from arrack rent is credited at the Galle Kachcheri, and receipts by the sale of lands by the Settlement Officer are brought to account by him.

3. The expenditure during the financial year amounted to Rs. 239,820.33, as against Rs. 185,743.95 in the previous year, showing an increase in expenditure of Rs. 54,076.38. The increase was mainly under sub-head "Salt Collection, Storage, &c.," which alone shows an increase of Rs. 52,153.56.

### III.—SALT.

1. The following statement shows the quantity of salt weighed and taken over at each lewaya during the years 1917, 1918, and 1919:—

|                       | 1917.   |     | 1918.   |     | 1919.   |     |
|-----------------------|---------|-----|---------|-----|---------|-----|
|                       | Cwt.    | lb. | Cwt.    | lb. | Cwt.    | lb. |
| Maha Lewaya ..        | 51,427  | 45  | 61,446  | 29  | 148,231 | 95  |
| Bundala Lewaya ..     | 22,573  | 92  | 79,500  | 14  | 58,793  | 5   |
| Palatupana Lewaya ..  | 10,873  | 12  | 67,163  | 100 | 81,706  | 25  |
| Karagan-ara Lewaya .. | 2,286   | 7   | —       | —   | 59      | 66  |
| Koholankala Lewaya .. | 14,906  | 106 | 19,081  | 14  | 11,711  | 60  |
| Total ..              | 102,067 | 38  | 227,191 | 45  | 300,502 | 27  |

2. The figures for salt taken over in 1919 are the highest on record, but they include some salt collected in 1918.

3. The total quantity of salt brought into stores during the year was as follows:—

|  | Cwt.    | lb. |
|--|---------|-----|
| Palatupana Lewaya to Kirinda stores ..     | 60,903  | 99  |
| Bundala Lewaya to Hambantota stores ..     | 13,805  | 85  |
| Maha Lewaya to Hambantota stores ..        | 77,949  | 56  |
| Koholankala Lewaya to Hambantota stores .. | 5,250   | 36  |
| Karagan-ara Lewaya to Hambantota stores .. | 57      | 111 |
| Total ..                                   | 157,967 | 51  |

4. There were eight collections during the year, viz., in March, April, May, June, July, August, September, and October, but unseasonable rains interfered with some of the collections.

5. The highest number of men employed during the collections was 450 on June 4, and the average number was 154.

6. The total quantity of salt issued during the year was 107,528 cwt., as compared with 113,798·14 cwt. in 1918. Of this, 71,125 cwt. were issued for consumption in the Province, and 36,403 cwt. to Uva and Sabaragamuwa Provinces.

#### IV.—CONDITION OF PEOPLE AND FOOD SUPPLY.

The people of this district had comparatively little to grumble at during 1919. The district produces more than sufficient food for the inhabitants. Owing to the shortage of food in Matara District, the maximum price of paddy in this district was fixed at the very high price of Rs. 20 per amunam. Very large quantities of paddy and foodstuffs were exported from the district, especially towards the end of the year. The resultant effects were that the landowners made very large profits indeed, and the people living in towns who own no lands suffered somewhat from the high price of rice. The difficulty in this district as regards the food supply was to prevent too much paddy being removed from the district owing to the shortage elsewhere. The difference in price of paddy in the Matara District as compared with this district found a powerful incentive to the removal of paddy out of the district, and the absolutely groundless complaint that there was a large surplus stock of paddy in Tissa probably originated with interested persons, who wished to remove all their paddy to Matara. A series of regulations have been approved by the Food Controller, by the working of which it is hoped that the fullest possible control over paddy removed from this district will be exercised. Some details as regards the actual crops will be found under the heading Irrigation.

#### V.—HEALTH OF THE PEOPLE.

1. The general good health of the district was marred by two outbreaks of cholera. The first outbreak occurred in Hambantota in July; the cause of the outbreak is not clear. From Hambantota the disease spread to the neighbouring villages and to Tissa and Tangalla. In Hambantota town there were 313 cases and 252 deaths. The difficulty in dealing with the outbreak in Hambantota was intensified by the insanitary nature of the houses, the overcrowding, and the fact that the water supply is derived from public wells. The practice of removing patients, especially women, from one house to another made the spread of the disease certain. In the Tissa area there were 26 cases and 18 deaths.

2. The second outbreak occurred at Yodakandiya in November. The infection was brought from Buttala in the Province of Uva by a Batticaloa Moorman. The disease was confined to the Yodakandiya area, and the last case occurred on December 16. There were altogether 20 cases and 10 deaths. Malaria, as usual, prevailed throughout the district. Additional medical facilities are required for the Walawe area, and with the increased extent of *new lands* to be opened up at Wirawila and Magama in the Kirinde-oya area, additional dispensaries are required in that area.

#### VI.—INDUSTRIES.

1. Apart from paddy and chena cultivation, the only industry of any importance is the citronella oil industry, which, after experiencing hardship in the first half of 1919, recovered somewhat in the second half. A certain amount of brass work, lacquer work, and pottery is done in the district.

2. The fishing industry is also of some importance. A considerable quantity of fish is caught and dried in the sun at various places along the coast, such as Kirinda, Pothanagala, Amaduwa. The collection of coral stone, and the weaving of mats, and the making of lace and coir yarn are minor industries found in West Giruwa pattu.

#### VII.—CRIME AND POLICE.

1. The only policed area in the district is West Giruwa pattu, which is in charge of the Assistant Superintendent of Police, Tangalla.

2. The most criminal portion of the district is Beliatta area, where a large number of outsiders collect owing to the presence of the market, which makes it a busy centre.

3. There have been 9 murders during the year, 3 of which present particularly unsatisfactory features. In 2 cases the murders were caused by shooting by night. Such cases are difficult to deal with, and in neither case has any accused been convicted. In another case an old Tamil woman, who owned a large number of goats and was credited with being well to do, was murdered in a spot a short distance from the main road at Wirawila. The motive was probably plunder, but the actual culprit could not be found.

4. There have been 79 cases of burglary with 17 convictions, and 67 cases of cattle stealing with 32 convictions, which are satisfactory figures for these classes of cases.

5. The headmen and police have worked satisfactorily together, and the headmen have done a considerable amount of patrolling with the police.

#### VIII.—EDUCATION.

1. Owing to the death of the Rev. Father Cooreman from cholera there was a vacancy in the District School Committee, which was filled by Rev. C. H. S. Ward.

2. The chief works carried out during the year were the construction of new schools at Galagama and Bundala.

3. The significant features in connection with education in the district are the generally overcrowded state of the schools, indicating inadequate accommodation and the paucity of girls' schools. For 1920 a grant of Rs. 10,000 has been obtained from the Director of Education, which will be utilized in building two new girls' schools and in extending and repairing seven existing schools.

#### IX.—IRRIGATION AND PADDY CULTIVATION.

1. The shortage of rice and the high price of foodstuffs resulted in a great increase of activity in agriculture in this district, the effect of which will only become fully apparent in 1920.

2. With the maximum price of paddy fixed at Rs. 20 per amunam the paddy landowners made enormous profits, and every endeavour was made to bring every acre of irrigable land under cultivation, and it may safely be said that this was achieved, specially in West Giruwa pattu.

3. 1,287 acres of the lands at Wirawila under the Kirindi-oya Right Bank Scheme were provided with facilities for irrigation, and at the time of writing 864 acres have been disposed of under Sir Henry Ward's Minute at the very high average price of Rs. 175 per acre. These figures indicate the fertility of these lands, and if the minimum price of paddy is guaranteed, they will prove a valuable investment. A further 2,000 acres under the same scheme is practically ready for sale, and should be producing at latest by 1921.

4. The food shortage has naturally caused attention to be drawn to the paddy-producing areas of the Island, and there is no question of the extent of the field for investigation which this district offers. A considerable extent of additional land is being brought under cultivation by the Kirindi-oya Left Bank Scheme at Magama, as well as by the Walawe Right Bank Scheme, by the extension of field channels. As regards the proposed works, the Walawe East Bank Scheme is the one which is of first importance, and which should be pushed on as rapidly as possible. The schemes which have been mooted in the past, such as those which go by the name of Pandikulam and Baddegiriyawewa, should now be re-investigated. The first requisite for irrigation in this district is an increased staff in the Irrigation Department's Staff. The cultivation under the village tanks is always precarious, but with the high prices a greater effort might be made in the direction of properly restoring some of the tanks.

#### X.—EXCISE.

1. The Matara-Hambantota arrack rent for 1918-19 realized Rs. 113,998, as against Rs. 144,600 in the previous year; the toddy rents realized Rs. 16,562, as against Rs. 18,850 the previous year.

2. The number of taverns was the same as in the previous year. The revenue obtained from foreign liquor licenses was only Rs. 355.

3. There were 82 prosecutions under the Excise Ordinance, and 65 convictions.

4. A larger number of sweet toddy licenses was issued during the year than in the previous year, giving a larger supply of jaggery, which goes to increase the amount of foodstuffs.

#### XI.—SANITARY BOARD.

1. The constitution of the Board was the same as last year. Hambantota and Tangalla experienced a severe outbreak of cholera, and the large number of deaths in Hambantota afforded a significant commentary on the sanitary state of the town. In both the towns the necessary initial steps have been taken towards the demolition of the most insanitary premises. The sanitary state of Hambantota will not, however, be satisfactory until the two worst features of overcrowding and of an insufficient and poor water supply are remedied. The same remarks as regards water supply apply to Tangalla.

2. The work of the year consisted for the most part in the upkeep of roads, markets, and buildings. A new well was constructed at Tangalla at Ennapitiya.

3. The revenue of the Board amounted to Rs. 22,656.52, and the expenditure to Rs. 26,150.58, the excess being met from surplus balance of previous years.

#### XII.—VILLAGE COMMITTEES.

1. There is only one Village Tribunal in the district, that of West Giruwa pattu. The President sits at five places, and the work is considerable. All the Chief Headmen are *ex officio* Chairmen of these Village Committees.

2. During the year there were 36 criminal appeals to the Assistant Government Agent, the decision in 33 of which was affirmed and 3 set aside. There were 9 civil appeals, of which 5 were affirmed and 4 set aside. There were 5 appeals to His Excellency the Governor, all of which were affirmed.

3. A very considerable amount of work is done in the West Giruwa pattu with Village Committee funds. A large mileage of road is maintained by the Village Committee, and the funds of the Village Committee appear to have been well spent under the supervision of the Mudaliyars.

4. In East Giruwa pattu a new court-house was constructed at Angunukolapelessa.

5. The Village Committee of the West Giruwa pattu derives considerable revenue from the Village Committee markets established at Wiraketiya, Katuwana, Walasmulla, and Mahawela. The provision of suitable centres at which the villager can dispose of his produce is of the first importance in inducing landowners to plant up their land with vegetable, &c.

#### XIII.—LAND SALES.

1. Twenty-seven lots were sold aggregating 36 acres 3 roods and 20 perches, realizing Rs. 2,391.80.

2. A total extent of 1,056 acres 2 roods and 23 perches was sold by the Settlement Officer otherwise than under the Waste Lands Ordinance, realizing a sum of Rs. 18,516.89.

3. Four lots of 19 acres and 2 perches were leased in perpetuity realizing a premium of Rs. 121.20.

4. A sum of Rs. 543.24 was recovered on account of rent on small lots.

5. Statement showing the results of the working of the Waste Lands Ordinance in the Hambantota District from January 1 to December 31, 1919, by the Settlement Officer:—

|                                  |                    |                          |                    |
|----------------------------------|--------------------|--------------------------|--------------------|

| Acreage declared Crown .. .. .   | 2,848A. 1R. 18.5P. | Total settled .. .. .    | 2,953A. 0R. 10.5P. |

#### XIV.—PUBLIC WORKS.

1. No works of any great importance were constructed in this district during 1919. Two water-collecting tanks were constructed for the use of coolies working on the road, the water from the roofs of the lines being collected in large tanks. The more general adoption of this method in this district would go some way towards augmenting the water supply, which is scanty in so many places in this district.

2. The most pressing of the requirements of the district are:—

(1) Improved means of communication in the shape of a main road to serve the interior of West Giruwa pattu and East Giruwa pattu.

(2) The extension of the railway to Beliatta in the first instance.

(3) A better service of roads in the paddy-producing area at Tissa.

(4) Provision of a sufficient water supply for Hambantota and Tangalla.

(5) Opening up of new streets in Hambantota to relieve the present extreme overcrowding.

## XV.—GAME SANCTUARY AND GAME.

1. The condition of the game in the game sanctuary has been satisfactory throughout the year. The Game Sanctuary Ranger reports an increase in all forms of animal life in the game sanctuary. The number of buffalo strikes any one visiting the game sanctuary. Both in the sanctuary and in the resident sportsmen's reserve herds of buffalo in large numbers can often be encountered, and every herd is accompanied by numbers of young of all ages.

2. The restoration of tanks in the game sanctuary and in the resident sportsmen's reserve would undoubtedly diminish the number of deaths of game owing to thirst. The Game Protection Society has taken the restoration of the Buttawa tank in hand, and this will be of the greatest benefit.

3. The prohibition against issuing licenses to shoot buffaloes will be in force until 1922. It would be no doubt advantageous from an agricultural point of view if a number of the young could be captured, and the numbers are now so large as to allow of this.

4. Elephants are undoubtedly increasing in numbers, and the herds encountered are invariably accompanied by young.

5. The Sanctuary Ranger notes that the jackal is increasing largely in numbers, and is a worse enemy of the young deer than the leopard.

## XVI.—MISCELLANEOUS.

1. The following statement shows the licenses issued :—

|                                 | 1919. | 1918. | 1917. |
|---------------------------------|-------|-------|-------|
| Carts .. .. .                   | 1,358 | 1,391 | 1,387 |
| Guns .. .. .                    | 281   | 282   | 225   |
| Petroleum storage .. .. .       | 5     | 5     | 5     |
| Butchers .. .. .                | 5     | 7     | 7     |
| Game .. .. .                    | 104   | 78    | 65    |
| Capture of buffaloes .. .. .    | 36    | —     | —     |
| Motor cars .. .. .              | 10    | 12    | 18    |
| Vedaras' opium licenses .. .. . | 8     | 2     | 6     |

2. *Dog Registration.*—The number of dogs registered during the year was 1,601, as compared with 2,006 during 1918 and 2,033 in 1919.

3. *Co-operative Credit Societies.*—There are two Co-operative Credit Societies in the district : one in West Giruwa pattu and the other in Magam pattu. Their condition is satisfactory. A new society is being started in East Giruwa pattu.

Hambantota Kachcheri,  
March 27, 1920.

H. A. BURDEN,  
Assistant Government Agent.

## REPORT OF THE DISTRICT ROAD COMMITTEE, HAMBANTOTA, FOR 1919.

THE Committee was composed as follows :—Mr. W. L. Murphy, Chairman, up to September 18, when he was succeeded by Mr. H. A. Burden; Mr. A. C. B. Jonklaas, District Engineer, Official Member (from January 1 to December 15); Mr. W. G. Scott (from December 16 to 31); Mr. C. Zanetti, European Member; Mr. H. Jayawardene Mudaliyar, Native Member; Mr. E. G. Auwardt, Burgher Member, died in July, and Mr. A. W. Anthonisz was nominated on October 9 for the remainder of the year and for 1920 and 1921.

2. There has been no change in the staff.

3. A meeting of the Committee was held on January 11, 1919, at which the estimates of revenue and expenditure were considered and passed, and other matters discussed.

The following is a comparative statement of the working of the Thoroughfares Ordinance in 1918 and 1919 :—

|   | 1918.  |         | Percentage on<br>Number under<br>Head 2. | 1919.  |         | Percentage on<br>Number under<br>Head 2. |
|---|--------|---------|--|--------|---------|--|
| 1. Population of local area by latest Census ..   | —      | 110,547 | —  | —      | 110,547 | —  |
| 2. Number of resident males by division officers' lists reported liable to labour ..      | —      | 25,293  | —  | —      | 25,907  | —  |
| 3. Discharged obligation within local area by—  |        |         |  |        |         |  |
| (a) Paying single commutation ..  | 22,650 |         | 89.55                                    | 23,220 |         | 89.63                                    |
| (b) Paying double commutation ..  | 296    |         | 1.17                                     | 416    |         | 1.60                                     |
| (c) Labouring six days ..   | —      |         | —  | —      |         | —  |
| (d) Labouring twelve days ..  | —      |         | —  | —      |         | —  |
| 4. Total discharged obligation ..   |        | 22,946  | 90.72                                    |        | 23,636  | 91.23                                    |
| 5. Failed to discharge obligation within local area, but otherwise accounted for as—      |        |         |  |        |         |  |
| (e) Exempted on account of age, death, disqualification, or physical inability to work .. | 1,202  |         | 4.75                                     | 675    |         | 2.61                                     |
| (f) Paid or laboured elsewhere ..   | 568    |         | 2.24                                     | 533    |         | 2.06                                     |
| (g) Double entries or entries by mistake ..   | 33     |         | .13                                      | 23     |         | .08                                      |
| (h) Fined ..  | —      |         | —  | —      |         | —  |
| (i) Imprisoned ..   | 4      |         | .01                                      | 12     |         | .04                                      |
| (j) Left local area ..  | 4      |         | .01                                      | —      |         | —  |
| 6. Total failed to discharge obligation within local area ..                              |        | 1,811   | 7.16                                     |        | 1,243   | 4.79                                     |
| 7. Unaccounted for ..   | —      | 536     | 2.11                                     | —      | 1,028   | 3.96                                     |

The following statement shows the revenue and expenditure of the Committee for the year 1919:—

| REVENUE.  |    | Rs.    | c. |
|---|----|--------|----|
| Balance on January 1, 1919                        | .. | 9,917  | 11 |
| Commutation realized in money                     | .. | 36,112 | 50 |
| Toll grant on minor roads                         | .. | 223    | 10 |
| Government contribution on account of minor works | .. | 4,701  | 0  |
| Miscellaneous receipts                            | .. | 2,167  | 93 |
| Total   | .. | 53,121 | 64 |

| EXPENDITURE.   |    | Rs.    | c. |
|--|----|--------|----|
| Payment made on account of principal roads and resthouses              | .. | 9,073  | 25 |
| Amount expended on minor roads   | .. | 28,725 | 57 |
| Establishment and commission to division officers:—                    |    |        |    |
| (a) Contribution on account of Provincial Road Committee establishment | .. | 269    | 0  |
| (b) Cost of District Road Committee establishment                      | .. | 4,947  | 36 |
| (c) Commission to division officers                                    | .. | 3,076  | 63 |
| (d) Pensions   | .. | 8,292  | 99 |
| Miscellaneous charges  | .. | 180    | 0  |
| Balance on December 31, 1919   | .. | 1,666  | 35 |
|  | .. | 5,183  | 48 |
| Total  | .. | 53,121 | 64 |

A statement showing the expenditure on roads, &c., during 1919 is annexed:—

| Name of Road.                                 | Length in Miles. | Amount.<br>Rs. c. |
|---|------------------|-------------------|
| <i>West Giruwa Pattu.</i>                     |                  |                   |
| Beliatta-Walasmulla                           | 9                | 4,975 9           |
| Walasmulla-Katuwana                           | 10               | 3,700 17          |
| Beliatta-Getamanna                            | 5½               | 721 72            |
| Tangalla-Wiraketiya                           | 8½               | 4,057 23          |
| Ranna-Wiraketiya                              | 10               | 1,111 41          |
| Walasmulla-Wiraketiya                         | 4½               | 807 25            |
| Dammulla-Wiraketiya                           | 6½               | 3,308 02          |
| Talaha-anwaduwa-Miella                        | 2                | 298 92            |
| Improving 2nd mile, Tangalla-Wiraketiya road  | —                | 2,426 0           |
|   |                  | 21,406 41         |
| <i>East Giruwa Pattu.</i>                     |                  |                   |
| Hatagala-Katuwana                             | 23               | 2,235 91          |
| Ambalantota-Nonagama                          | 3                | 344 6             |
|   |                  | 2,579 97          |
| <i>Magam Pattu.</i>                           |                  |                   |
| Ambalantota-Wanduruppa                        | 1½               | 174 12            |
| Ambalantota-Koggalla                          | 8                | 501 5             |
| Sittrakala-Koggalla                           | 5                | 243 0             |
| Maha Lewaya-Gonnoruwa                         | 8                | 323 40            |

Hambantota, January 26, 1920.

H. A. BURDEN,  
Chairman.

# NORTHERN PROVINCE.

## ADMINISTRATION REPORT OF THE GOVERNMENT AGENT, NORTHERN PROVINCE, FOR THE YEAR 1919.

Area of the Northern Province, 3,578 square miles.  
 Area of the Jaffna District, 1,147 square miles.  
 Population of the Northern Province, 369,951 (Census of 1911).  
 Population of the Jaffna District, 326,712 (Census of 1911).  
 Estimated population of the Jaffna District at the end of 1919, 343,306.

### I.—HISTORY OF THE ADMINISTRATION OF THE PROVINCE.

THE following changes were made in the administrative staff of the Province :—

2. In April Mr. B. Horsburgh, the Government Agent of the Province, was transferred to Colombo as Acting Controller of Revenue, and was succeeded by Mr. B. Constantine from Ratnapura. This officer went to England on leave in October, the writer of this report acting for him.
3. In August Mr. E. F. Marshall going home on leave, Mr. A. N. Strong on return from service with the Army was appointed Assistant Government Agent, Mullaittivu, but in October was transferred to Kurunegala as Police Magistrate, Mr. R. M. M. Worsley, M.C., taking his place.
4. The District Judge, Mr. P. E. Pieris, was transferred in March as Acting District Judge, Colombo, and was succeeded temporarily by the Hon. Sir A. Kanagasabai.
5. Mr. P. C. Nicholas, Mudaliyar, the Head Clerk of the Jaffna Kachcheri, was appointed Acting Extra Office Assistant in September.
6. In December Mr. T. D. Perera, Cadet, was attached to the Jaffna Kachcheri.
7. In March Mr. A. E. Christoffelsz, Police Magistrate, Jaffna, went as Office Assistant, Badulla, and was succeeded by Mr. S. D. Dhondy, on whose departure on leave to India in December Mr. A. Thalaivasingham of the Colombo Bar officiated.
8. In October Mr. H. Lloyd-Jones, Temporary Assistant Superintendent of Police, left the Force. He was succeeded by Mr. R. J. Tyler, Superintendent of Police.
9. In September Mr. J. Elstone, Assistant Superintendent of Prisons, was transferred, and was succeeded by Mr. A. F. G. Walker.
10. In August Mr. T. V. Saravanamuttu, Assistant Superintendent of Excise, went to Badulla, his place being taken by Mr. P. Parsons.
11. Mr. J. C. C. Middleton, Assistant Conservator of Forests, left for England on leave in May, and Mr. G. D. Templer succeeded him.
12. Mr. T. Muttukumaru, District Engineer of Pallai, was transferred to Colombo in August, and was succeeded by Mr. J. B. Misso.

### II.—PRINCIPAL EVENTS.

13. The foremost events of the year were the signing of the Peace Treaty and His Excellency the Governor's visit.
14. The Peace celebration took place in the Jaffna District on July 19. The bells in churches, temples, and mosques were rung for half an hour at daybreak and services held. At midday there was a free distribution of rice to the poor, followed in the afternoon by the Police parade and the Scouts and school children's rally on the esplanade, which were largely attended by the general public. At dusk the town was illuminated, and a display of fireworks given. Great enthusiasm prevailed throughout the whole day. Celebrations were organized and carried out in every Chief Headman's division by the pealing of bells, divine services, feeding of the poor, processions of school children, and sports.
15. In January His Excellency the Governor stayed in Jaffna for six days, visiting the different parts of the district, and then went to Mullaittivu District, where he remained for three days.
16. In July the honorary rank of Mudaliyar was conferred on Mr. V. M. Muttukumaru, Maniagar of Jaffna, and Mr. T. Karalapillai, a Colombo broker, in recognition of his generous gift of cloth and rice to the poor in time of need. At the same time Mr. J. H. Vanniasingham, a leading advocate, and Mr. William Black, District Engineer, were made Justices of the Peace for the Jaffna District.
17. The Hon. the Chief Justice, Sir Anton Bertram, presided over the Criminal Sessions of the Supreme Court in February, and Mr. Justice T. E. de Sampayo in July.
18. Mr. M. Tampapillai, the first Tamil Adigar, died on October 11 at the age of about ninety.

## III.—REVENUE AND EXPENDITURE.

19. The total amount credited at the Jaffna Kacheheri during the twelve months October, 1918, to September, 1919, was Rs. 1,477,355·29, as compared with Rs. 1,451,546·89 during the previous twelve months. The corresponding figures for the whole Province were Rs. 1,706,524·82 and Rs. 1,657,798·68.

20. The only items calling for remark are :—

(a) *Increases.*

- (1) Import duties, Rs. 4,791·09, due to more importation of grain from foreign ports.
- (2) Salt, Rs. 43,265, due to large sale of Tondaimanar salt.
- (3) Stamp duties, Rs. 4,121·47, due to the increased rates of duty levied under the new Stamp Ordinance.
- (4) Forest revenue, Rs. 10,665·80, due to increased amounts realized by the sale of avaram bark and the large sale of firewood.

(b) *Decreases.*

- (1) Export duties, Rs. 5,501·39, due to less export of chanks.
- (2) Arrack, rum, and toddy, Rs. 32,239·59, due to the Jaffna arrack rent being sold for Rs. 46,490 less than the previous year.

21. The expenditure brought to account in the Jaffna Kacheheri during the twelve months October, 1918, to September, 1919, was Rs. 852,682·99, as compared with Rs. 743,860·26 during the previous twelve months.

22. As much of the district revenue and expenditure is brought to account elsewhere than in Jaffna, no profitable comparison can be made between the revenue and expenditure of the district, nor any statement given of the total contributions of the inhabitants to the revenue of the Colony. The cash transactions of the Jaffna Kacheheri during the financial year (October, 1918, to September, 1919) amounted to Rs. 15,910,616·30, as compared with Rs. 15,466,902·83 for the previous year.

## IV.—FOOD SUPPLY, HEALTH, AND CONNECTED MATTERS.

23. The chief agricultural industries of the district are the cultivation of paddy, dry grains, the palmyra and coconut palms, fruits and vegetables, manioca, and tobacco.

24. *Paddy.*—This is the chief food product. Almost all available lands are under cultivation, except in the Karaichehi division, where a large amount of land can be asweddumized on the completion of the Iranaimadu irrigation works. The harvest is entirely dependent on rainfall, which is not plentiful, and is also uncertain. In the year under review it was fair when compared with last year's crop; about 556,890 bushels of paddy were reaped on an area of 46,274 acres, as against 512,750 bushels on an area of 45,000 acres in 1918. This quantity is hardly sufficient for three months, and is usually supplemented by paddy brought from Mannar, Mullaittivu, Batticaloa, Trincomalee, and Anuradhapura, as well as by large quantities of paddy and rice imported annually from India and Burma. The imports during the year, both coastwise and beyond the sea, amounted to 754,697 cwt. paddy, equal to about 1,760,960 bushels and 122,634 cwt. rice, equal to about 214,610 bushels, as compared with 588,190 cwt. paddy equal to 1,372,443 bushels and 199,280 cwt. rice equal to 348,740 bushels imported in 1918.

25. About the middle of the year the stocks in the hands of the local paddy and rice merchants became very low, and they were sold for high prices, which were beyond the means of the poor. It was thought necessary to control these articles, and maximum prices were accordingly fixed; at the close of the year the situation became more serious, the whole stock having been exhausted, and no more coming owing to the prohibition of export from the Eastern and North-Central Provinces and the reduction of supplies from India.

26. *Dry Grains.*—About ten varieties of fine grain are grown on paddy and tobacco lands after reaping these crops and on other high lands. This is the principal food supply of the poorer classes.

27. The rainfall during the year was fair. For the first nine months 16·31 inches were registered. The rainfall in the months of October, November, and December was 10·89, 18·71, and 17·17 inches, respectively, thus making a total of 63·08 for the whole year, as against 52·53 inches in 1918. The greatest rainfall in the district was at Kilinochchi, where 75·96 inches were registered.

28. *Palmyra.*—This palm grows all over the peninsula. Every part of the tree is utilized in some form or other. Jaggery is extensively manufactured from the sweet juice of the palm; a jelly preserve called "*pinaddu*" is prepared from the juice of the ripe fruit, and the young tap root from the nut is dried and converted into flour. These and other products of the palm form the food of the poor, especially at a time of rice scarcity.

29. *Coconuts.*—The estimated area under coconuts is about 21,408 acres. This palm grows well in most parts of the peninsula and in the Punakari division. The yield of the nuts was below the normal. The price varied between Rs. 100 and Rs. 120 per 1,000 nuts.

30. *Vegetables.*—Brinjals, bandakka, beans, chillies, onions, tomatoes, snake gourds, bitter gourds, pumpkins, melons, cucumber, peas, king yams, sweet yams, and common yams, and other vegetables are usually grown on paddy and tobacco lands as rotation-crops, and on garden lands under irrigation from wells. There is an appreciable extension of vegetable gardens in some parts of the peninsula. Seeds of vegetables and curry stuffs were distributed by the Department of Agriculture.

31. *Fruits.*—Plantains are available throughout the year. Mangoes are abundant in May and June, but this year the crop was very poor. Oranges, grapes, pineapples, and limes are found in small quantities in different parts of the peninsula. During certain seasons of the year jak fruit is plentiful.

32. *Manioca (Cassava).*—This is a food product raised extensively on paddy and tobacco lands as a rotation crop. The boiled root is the chief article of food of the agricultural and lower classes. The surplus raw roots are cut into thin slices, dried in the sun, and preserved for a considerable time to be

converted into flour for use as food. At this time of scarcity of rice and paddy, the demand for this product is great, and I am glad to observe that the people are cultivating it more extensively; portions of tobacco gardens even are under this crop during the tobacco season.

33. *Tobacco*.—About 6,670 acres are under this crop. Two varieties are grown: one for smoking, and the other for chewing. The crop was poor when compared with last year, but fetched good prices. Smoking tobacco is made into cigars and sold in all parts of the Island, particularly in Colombo. Most of the chewing tobacco is exported to Cochin and Travancore in South India. A portion is sold for the use of the Indian labourers on estates. The quantity exported overseas to India was 1,734,396 lb. and coastwise 535,360 lb., as compared with 4,581,242 lb. and 547,236 lb. in 1918. As tobacco is the most remunerative crop, its cultivation has been steadily kept up and extended where possible, in spite of frequent warnings of the scarcity and high prices of foodstuffs and advice to use portions of tobacco gardens for growing food products.

34. The first nurseries in the experimental gardens at Tirunelveli were completely washed away by the floods of November, 1918. A second attempt was made, and only 4 acres were planted: 3 acres with White Burley and 1 with Turkish.

35. *Health of the People*.—The health of the district, on the whole, was good throughout the year. But the unusually heavy rains and floods at the end of last year brought on extensive outbreaks of malarial fever in different parts of the country. The total number of cases treated in the different hospitals and dispensaries during the year was 80,380, as against 56,084 the previous year.

36. There are 2 Government hospitals, 1 infectious diseases hospital, 16 dispensaries, and 14 branch dispensaries in the Jaffna District. The Government medical aid is supplemented by private medical practitioners and four medical mission institutions, which do good work. They are:—

|  |    |                  |
|--|----|------------------|
| McLeod Hospital at Inuvil for women and children | .. | American Mission |
| Green Hospital at Manipay                        | .. | do.              |
| Dispensary at Karaitivu                          | .. | do.              |
| Jevon's Dispensary at Puttur                     | .. | Wesleyan Mission |

37. *Plague*.—One case of plague was reported from Talaimannar, which proved fatal. The deceased was a Coast Moorman from Colombo on his way to India by train. The necessary precautions were taken, and no further cases occurred.

38. *Smallpox*.—There were four cases reported from the village of Sutumalai, in Valikamam West division, in a dhoby's house. The source of infection was from India as usual. Of the four persons attacked, only one succumbed.

39. The number of births registered during the year was 11,239 and deaths 9,609, as against 12,430 and 11,416, respectively, in 1918. The number of marriages registered was 1,728, as compared with 1,616 in 1918.

40. *Cattle*.—The agricultural live stock of the district at the end of 1919 as compared with 1918 numbered—

|              |    | 1919.   |    | 1918.   |
|--------------|----|---------|----|---------|
| Buffaloes    | .. | 2,500   | .. | 2,796   |
| Black cattle | .. | 100,273 | .. | 108,275 |
| Sheep        | .. | 56,819  | .. | 57,909  |
| Goats        | .. | 44,271  | .. | 48,502  |

41. There was an outbreak of rinderpest in the cattle quarantine camp at Kayts introduced by imported cattle from India. 693 head of cattle were imported, of which 33 were attacked with rinderpest; 22 recovered and 11 died. The disease spread among the cattle in the surrounding villages. Ninety-six head of cattle were attacked, of which 64 died and 7 were shot.

42. During the year there were two outbreaks of hoof-and-mouth disease, one at Pachohilaipali and the other at Karaichehi. This was checked from spreading by proper precautions.

43. The number of cattle branded with the communal brand was 13,218, as against 12,949 in 1918. Owing to the scarcity of water and pasture due to drought, most cattle were not in a fit condition for branding with the red-hot iron.

44. *Fisheries*.—Fishing is extensively carried on in the sea and in the lagoons along the coasts of the peninsula. The local supply has been greatly affected by sending away a large quantity of fresh fish to Colombo, Kandy, Kurunegala, and other places packed in ice. In some parts fish is salted and exported.

45 A. The export figures are:—

|           |              | 1919.            |            | 1918.            |
|-----------|--------------|------------------|------------|------------------|
|           | Cwt. qr. lb. | Value.<br>Rs. c. |            | Value.<br>Rs. c. |
| Oversea   | 353 1 17     | 1,906 30         | 254 3 0    | 751 50           |
| Coastwise | 16,549 3 0   | 162,900 0        | 17,285 0 0 | 170,194 0        |

45 B. The fishing of chanks and bêche-de-mer is also an important industry. The catch is all exported. The figures are:—

|              |      | 1919.            |      | 1918.            |
|--------------|------|------------------|------|------------------|
|              | Cwt. | Value.<br>Rs. c. |      | Value.<br>Rs. c. |
| Bêche-de-mer | 316  | 7,918 75         | 801½ | 16,077 50        |

|                 | No.     | Rate per 1,000.<br>Rs. c. | Duty Paid.<br>Rs. c. | No.       | Duty Paid.<br>Rs. c. |
|-----------------|---------|---------------------------|----------------------|-----------|----------------------|
| Live chanks     | 566,000 | 6 0                       | 3,396 0              | 1,497,895 | 8,987 37             |
| Dead chanks     | 187,700 | 3 0                       | 563 10               | 1,247,750 | 3,743 25             |
| Inferior chanks | 210,000 | 2 0                       | 420 10               | 297,150   | 594 30               |

46. *Mines.*—There is no mining industry in the district.

47. *Manufactures.*—The principal manufactures are cigars, cloth, dyed cloth, mats and baskets, coir, pottery, jaggery, oils, aerated waters, gold, silver, brass, copper, iron, and wood work. The output is moderate, and chiefly supplies local wants. Cigars, coir, and cloth are sent to other parts of Ceylon. The restriction on the melting of silver and gold coins has materially diminished the making of jewellery.

48. *Land.*—The demand for land in the district is not very great. Such demand as exists is for coconut planting and paddy growing. The lands under the Karaichehi irrigation scheme suitable for paddy and the lands in the Pachchilaipali and Punakari divisions suitable for coconuts will afford openings for investment of capital.

49. The total acreage of Crown land sold during the year was 490 acres 3 roods and 14 perches, of which 484 acres and 29 perches were sold by public auction, and the remainder settled on claimants under General Order 812. The average price realized by sale was Rs. 36·22.

#### V.—EDUCATION.

50. The Catholic, American, Wesleyan, and Church of England Missions and Hindu organizations undertake the whole work of education in the district, subject to the supervision of the Education Department, and grants in aid are paid from the revenue of the Colony. Forty English schools, 10 Anglo-vernacular schools, and 332 vernacular schools receive grants. There are 38 unaided schools, of which 15 have been recognized by the Director of Education.

51. The vernacular schools have not been maintained in a satisfactory state of efficiency. The school buildings and the quality of teaching have much to be desired. To remedy this defect a model school is to be constructed at Nellyadi in Vadamaradchi West division at Government expense. A sum of Rs. 18,000 is set apart for the building and equipment. The construction of the building has already been given on contract.

52. A technical school is also to be constructed through the kind offices of the Director of Education at Koppay in Valikamam East division. Forty scholarships have been assured by philanthropic gentlemen, both here and in Federated Malay States, to provide a course of two years for poor boys. The Hon. Mr. P. Ramanathan has given the required land free. The work will be begun at the beginning of 1920.

53. A report on the working of the District School Committee is appended.

#### VI.—CRIME AND POLICE.

54. The number of true cases of crime reported in the Province during the year was 778, as against 674 in 1918, 639 in 1917, 574 in 1916, and 538 in 1915. Though crime continues to be on the increase, the percentage of convictions is considerably lower than in 1918. This is particularly so within the town limits, where a considerable increase of crime is noted, convictions being only 29·8 per cent. The principal crimes are burglary and theft.

55. This is practically explained by the fact the first-mentioned crime in Jaffna town is a very easy matter, owing to the large number of cadjan houses and compounds and the network of sandy paths between them, which makes patrolling a very difficult matter, and detection in many cases almost impossible.

56. The rice shortage and the high price of food and other articles no doubt account in a large measure for the increase.

57. Steps have been taken during the latter part of the year to increase the patrols, seven being sent out nightly instead of three.

58. The headmen did their part of the work with regard to crime satisfactorily, and their co-operation with the regular police has been good.

#### VII.—QUASI-MUNICIPAL GOVERNMENT.

59. The existing local government bodies of the Province are :—

- (a) The Provincial Road Committee of the Northern Province.
- (b) The District Road Committees of Jaffna, Mannar, and Mullaittivu.
- (c) The Local Board of the town of Jaffna.
- (d) The Sanitary Boards of Jaffna, Mannar, and Mullaittivu, exercising jurisdiction over the small towns of Point Pedro, Valluvedditturai, Kayts, Mannar, Pesalai, Erukkalampiddi, Talaimannar, Vidattativu, and Mullaittivu.
- (e) The District School Committees of Jaffna, Mannar, and Mullaittivu.
- (f) The District Committee under the Northern Province Markets Ordinance.
- (g) The Village Committees of the Jaffna, Mannar, and Mullaittivu Districts outside the Local Board and Sanitary Board areas.

60. Detailed reports on the work of the bodies enumerated in (a) to (g) above will be found annexed to this report and to the reports of the Assistant Government Agents.

61. There are two Village Tribunals established under the Village Communities Ordinance, No. 24 of 1889. One sits at Delft; and the other, for the Mullaittivu District, holds circuit courts at Vavuniya, Nedunkeni, and Mullaittivu.

62. Forty Village Committees in the Jaffna District have made rules under section 6 of the Ordinance for the regulation, control, and management of village affairs. The labour due for the maintenance and improvement of village works was allowed by the Committee to be commuted for a money payment of 25 cents, which, however, yields insufficient revenue. Except in Delft, where the people perform labour on all village works, the people readily paid the commutation money, which amounted to Rs. 14,851·50.

## 63. The funds of the forty Committees were as follows :—

|                              |    |    | Rs.    | c. |
|------------------------------|----|----|--------|----|
| Balance on January 1, 1919   | .. | .. | 10,845 | 28 |
| Receipts during 1919         | .. | .. | 18,440 | 1  |
| Expenditure during 1919      | .. | .. | 15,285 | 52 |
| Balance on December 31, 1919 | .. | .. | 13,999 | 77 |

## VIII.—EXCISE.

64. *Arrack*.—The arrack rent of the Jaffna District for 1919–20 was sold in Colombo for Rs. 302,555, being an increase of Rs. 70,055 over that of the previous year.

65. The number of taverns is the same as in the previous year. The quantity of arrack sold in the twenty-five taverns during the year was 39,917 gallons, as against 38,819 in the previous year.

66. *Toddy*.—The toddy rents were sold in Jaffna by taverns. The number of taverns was 108, as against 111 in 1918. The amount realized by the sale of the rents for 1919–20 was Rs. 379,153, being an increase of Rs. 21,348 over that of the previous year. The total consumption is 1,073,634 gallons, as compared with 1,187,888 gallons in 1918. The activity of the temperance societies, aided by the high cost of living, is perhaps the cause of the reduced consumption.

67. *Local Option*.—All the eleven toddy taverns, for which polling was held in September in terms of Excise Notification No. 87 of March 12, 1919, will be closed as from July 1, 1920.

68. *Sweet Toddy*.—2,609 licenses were issued and 62,283 palmyra trees were tapped, as against 2,837 and 73,579, respectively, in 1918.

69. *Foreign Liquor*.—Six retail licenses, 1 tavern license, 7 resthouse licenses, and 2 licenses for sale of medicated wines were issued. The total quantity sold for consumption was 2,693 gallons, as against 3,147 gallons in 1918. The decrease is apparently due to the high prices charged for foreign liquor.

70. *Cocaine*.—Seven licenses were issued : 2 for retail and 5 to registered medical practitioners.

71. *Advisory Committee*.—No meeting was held during the year, the work being carried on by circulation of papers among members.

## IX.—IRRIGATION.

72. *Karaichchi Scheme*.—The work on this scheme still continues, and fair progress was made. A sum of Rs. 83,257·13 was expended during the financial year ending September 30, 1919. 15,820 cubes of earth were excavated in the spill channel, inlet channel, main channel, and spill fall No. 3. During the year both banks have been advanced towards the river proper. As much work as possible has been done here in order to ensure the safety of the closure work in 1920. Labour was at a premium throughout the year.

73. A sum of Rs. 2,499·85 was expended on the maintenance and upkeep of the Kilinochchi works.

74. The total rainfall for the year at Iranaimadu was 71 inches, of which 60 inches have fallen in the last three months. The average annual rainfall is about 50 to 55 inches.

75. On December 31 8½ inches of rain fell at Iranaimadu after a week's heavy rain, which resulted in the highest fresh-water flood on record for the past twenty years; at Elephant Pass the lagoon rising to a height of 12 inches over the resthouse floor on January 1, and washing away the Public Works Department bridge next to the railway bridge.

## X.—PUBLIC WORKS.

76. The necessary additions and improvements to public buildings have been effected during the year. Roads and bridges have been kept in a satisfactory condition.

77. The following works have been completed :—

- (1) Additions and improvements to District Court buildings, Jaffna.
- (2) Improvements to court-house and the Magistrate's quarters, Chavakachcheri.
- (3) Cooly lines and overseer's quarters, Talaimannar.

78. The following works are in progress :—

- (1) Erection of a windmill and a disinfecter at Talaimannar.
- (2) Karaiyur reclamation.
- (3) Construction of a new roof to the Mullaattivu Kachcheri.
- (4) Surveying and making drainage channels in the Jaffna peninsula.
- (5) Improvements to the District Judge's bungalow in the fort.

79. *Karaiyur Reclamation*.—37½ acres had been reclaimed up to the end of 1918. 8 acres were reclaimed during the past year. The work was done by prison labour. There are still 19 acres to be reclaimed to complete the scheme.

80. The following works are proposed for consideration :—

- (1) Conversion of the Vadamaradehi lagoon into a fresh-water lake.
- (2) Water supply for Jaffna town.
- (3) Drainage scheme for the town of Jaffna.
- (4) Town-planning scheme on the reclaimed area at Karaiyur.
- (5) Quarters for the Police Magistrate, Jaffna.
- (6) New smallpox hospital, Jaffna.
- (7) Extension of the Vadamaradehi East road to Marutankeni and to Aliyavalai.
- (8) Extension of the road from Parantan to Mullaattivu via Putukkudiyiruppu, of which the first 7 miles have been constructed.
- (9) Bridging the channel between the causeway and the jetty at Mannar.
- (10) Repairing the breach of Kanukkeni tank.
- (11) Restoration of Akattimurippu tank.
- (12) Improvement of the Coast road from Mullaattivu to Kokkilai.

- (13) Improvement of the road from Tanniyuttu to Kallolunkan Puliyankulam in the Mullaittivu District.  
 (14) Completion of the road from Talladi to Pappamoddai in Mannar District.  
 (15) A new road from Parantan to Punakari.  
 (16) A lighthouse at Point Pedro.

81. Work on the Vadamaradhi lagoon scheme was done by the Irrigation Department by blocking up the culverts on the Public Works Department road at Virakali, on the Point Pedro-Chavakacheheri road, as a first step in order to judge to what level water can be held up in the lagoon. It is hoped that the scheme will prove a success and be beneficial to the Vadamaradhi villages.

#### XI.—SALT.

82. *Experimental Saltern at Elephant Pass.*—For the construction and experiment of two salterns at Elephant Pass an expenditure of Rs. 3,500 was sanctioned by Government. The Provincial Engineer, Northern Province, was in charge of the construction work. Only one saltern was constructed near the 165th milepost; the site for the other one near the resthouse was abandoned under advice from Mr. F. W. Gooch, the Government Salt Adviser.

83. Mr. W. Mudaliyar Muttuwellopilly, Member of the Provincial Road Committee, was in charge of the manufacture of salt under the improved system, and worked directly under the supervision of the Government Agent till August 31. The saltern at Elephant Pass was then handed over to the Salt Adviser from September 1, Mr. Muttuwellopilly continuing to work directly under that officer.

84. The quality of salt manufactured at this station was good, and it is expected that salt will be manufactured in this area on an extensive scale in 1920.

85. The Chiviyateru salt pans yielded 25,630 cwt. of manufactured salt in 1919, as against 70,687 cwt. in 1918. The decrease in the quantity was caused by frequent rains while the salt was in process of formation. There was a collection of naturally-formed salt at Karanavai amounting to 49,350 cwt. The collection at Vellaparavai lewayas was a failure owing to untimely rains.

86. An account of the salt collection in the Mannar and Mullaittivu Districts will be found in the reports of the Assistant Government Agents.

87. There are two salt stores in the Jaffna District: one in the town, and the other at Tondaimanar.

88. The salt accounts of these stores are as follows:—

| <i>Karaiyur Store.</i>                               |    |        |         |
|--|----|--------|---------|
|  |    | Cwt.   | Cwt.    |
| Balance on January 1, 1919                           | .. | —      | 62,870  |
| Received from Chiviyateru salt pans                  | .. | —      | 25,630* |
|  |    |        | 88,500  |
| Sold to retailers and fish curers in Jaffna District | .. | 30,506 |         |
| Issued to Assistant Government Agent, Mannar         | .. | 8,920  |         |
| Issued to Assistant Government Agent, Mullaittivu    | .. | 4,000  |         |
| Wastage in stores                                    | .. | 790    |         |
|  |    |        | 44,216  |
| Balance on December 31, 1919                         | .. | —      | 44,284  |

\* Excludes 9 cwt. of confiscated salt.

N.B.—In addition to the transactions noted above, a quantity of 216 cwt. of Elephant Pass salt was sold to the retailers at the Jaffna Customs and Kachcheri.

| <i>Tondaimanar Store.</i>             |    |           |            |
|---------------------------------------|----|-----------|------------|

| Balance on December 31, 1919          | .. | —         | 90,428.7†  |

† Includes 900 cwt. paid for, but not removed.

#### XII.—FOREST ADMINISTRATION.

89. One forest near Puvarasankulam in Mullaittivu District, comprising 13,004 acres 2 roods 22 perches, was finally settled under the Waste Lands Ordinance for purpose of reservation in 1919.

90. The total re-afforested area now amounts to 621 acres, of which 246 acres have been added this year. Experiments have been made with *Cassia auriculata*, avaram (a valuable tanning bark), by sowing 40 acres at Madu Road, with a view to supplying areas cut down for the supply of fuel to the Railway in that arid region.

91. The Railway Department again ran short of coal, and the brunt of the increased supply, which had to be arranged at a moment's notice in the worst months of the year, fell on the Jaffna Division; 73,923 cubic yards of fuel were supplied to the Railway, involving over 16 different contracts and an immense amount of extra work. 8,144 broad gauge and 4,986 narrow gauge sleepers were supplied to the Railway Department from this division, and 13,045 cubic feet of timber to various Departments. At Kankasanturai 1,248 logs and 11,369 broad gauge and 5,962 narrow gauge sleepers were landed from Batticaloa.

92. Owing to the rice shortage, applications for land increased to a great extent, throwing more work on the executive staff, without any corresponding increase in staff.

93. The expenditure for the year amounted to Rs. 258,861·84, the revenue in cash and bills rendered to Public Departments to Rs. 170,092·06, which is exclusive of actual cost.

94. The sales from the Jaffna Dépôt totalled Rs. 69,812·62.

### XIII.—MISCELLANEOUS.

95. Licenses were issued as follows :—

|                                | 1919. | 1918. | 1917. |
|--------------------------------|-------|-------|-------|

| Public performances ..         | 25    | —     | —     |

96. *Dog Registration.*—6,418 dogs were registered during the year, as compared with 3,863 dogs in 1918 and 3,858 dogs in 1917. An endeavour was made at about the end of 1918 to find out the owners of dogs which escaped registration, with the result that 2,555 more dogs were registered than in the previous year.

97. *Co-operative Credit Societies.*—There are in all fifteen societies in the district, only a few of which are doing good work. The Tolpuram and Pandatarippu Societies obtained loans from Government to the extent of Rs. 500 and Rs. 1,000, respectively. The people have not sufficiently realized the benefit of these societies.

98. The relief committee, formed to deal with the distress caused by the floods of November, 1918, expended a sum of Rs. 67,687·12.

Jaffna Kacheheri,  
February 21, 1920.

H. W. CODRINGTON,  
Government Agent.

### APPENDIX.

#### I—REPORT ON THE WORKING OF THE THOROUGHFARES ORDINANCES IN THE NORTHERN PROVINCE FOR 1919.

##### PROVINCIAL ROAD COMMITTEE.

THE Provincial Road Committee at the beginning of 1919 consisted of the following members :—The Government Agent, Chairman ; Mr. W. C. Price, Provincial Engineer ; Mr. J. H. Vanniasinkam, J.P. ; Mr. J. Cherubim ; Mr. W. Mudaliyar Muttuwellopilly ; and Mr. M. S. Ramalinga, Mudaliyar. With the exception of the Government Agent, there was no other change in the composition of the Committee during the year.

2. Five meetings were held during the year.

3. *Resthouses.*—The resthouses in the Province were maintained in good order.

4. The following statement shows receipts and expenditure of the Provincial Committee :—

| REVENUE.   | Amount.<br>Rs. c. | Total.<br>Rs. c. |
|--|-------------------|------------------|
| Balance on January 1, 1919 ..  | —                 | 19,552 52        |
| Amount received from District Road Committees on account of two-thirds commutation for principal roads, resthouses, &c. :— |                   |                  |
| (a) From Jaffna District Road Committee ..   | 49,189 71         |                  |
| (b) From Mannar District Road Committee ..   | 1,093 45          |                  |
| (c) From Mullaittivu District Road Committee ..  | 1,491 9           |                  |
|  |                   | 51,774 25        |
| Government grant in aid of minor works. .  | —                 | 14,064 0         |
| Resthouse collections :—   |                   |                  |
| (a) From Jaffna District Road Committee ..   | 1,888 26          |                  |
| (b) From Mannar District Road Committee ..   | 272 66            |                  |

| (c) Mullaitivu District Road Committee .. ..   | ..      | 2,243  | 0      |    |
|  |         |        | 22,988 | 0  |
| Miscellaneous charges .. ..  | ..      | —      | 291    | 26 |
| Balance on December 31, 1919 .. ..   | ..      | —      | 12,180 | 83 |
|  |         |        | 91,021 | 15 |
| Total ..   |         |        |        |    |

5. *Encroachments*.—The following is a list of encroachments removed or otherwise disposed of during the year on principal and minor roads and lanes :—

- (1) Encroachments on Pandatarippu-Matakal road at Matakal.
- (2) Encroachments on 11th mile, Central road, at Chavakachcheri market.
- (3) Encroachments on a public lane called "Puliyaditteru" in Vallipurakurichchi in the Vadamaradchi West division.
- (4) Encroachments on an abandoned lane at Navali in the Valikamam West division.
- (5) Encroachments on Point Pedro-Punnalai road at 13½ mile at Kankesanturai.
- (6) Encroachments on Jaffna-Punnalai road at 4½ mile at Manippay.

February 21, 1920.

H. W. CODRINGTON,  
Chairman.

## II—REPORT ON THE WORKING OF THE THOROUGHFARES ORDINANCES IN THE JAFFNA DISTRICT FOR 1919.

### DISTRICT ROAD COMMITTEE.

THE District Road Committee of Jaffna consisted of the Government Agent and the following members :—Mr. William Black, District Engineer ; Mr. C. M. Sinnayah, Mudaliyar of the Governor's Gate ; Mr. K. Thambiah, Proctor, Supreme Court ; Mr. S. Supperamaniam ; and Mr. S. M. Cumarasooriar. There was no change in the composition of the Committee during the year.

2. Two meetings were held during the year.

3. The following is a comparative statement of the working of the Thoroughfares Ordinances during 1918 and 1919 :—

|   | 1918.  |         | Percent-<br>age on<br>Number<br>under<br>Head 2. | 1919.  |         | Percent-<br>age on<br>Number<br>under<br>Head 2. |
|---|--------|---------|--|--------|---------|--|
|   |        |         |  |        |         |  |
| 1. Population of local area by latest Census ..   | —      | 277,855 | —  | —      | 277,855 | —  |
| 2. Number of resident males by division officers' lists reported liable to labour ..      | —      | 67,485  | —  | —      | 66,680  | —  |
| 3. Discharged obligation within local area by—  |        |         |  |        |         |  |
| (a) Paying single commutation ..  | 60,629 |         | 89.84  | 58,950 |         | 88.41  |
| (b) Paying double commutation ..  | 373    |         | .55  | 602    |         | .90  |

| 6. Total failed to discharge obligation within local area ..                              |        | 5,702   | 8.44   |        | 6,440   | 9.65   |
| 7. Unaccounted for ..   | —      | —       | —  | —      | —       | —  |

## 4. The funds administered by the Committee are accounted for in the following statement :—

| REVENUE.   |    | Rs.     | c. |
|--|----|---------|----|
| Balance on January 1, 1919   | .. | 21,923  | 18 |
| Commutation realized in money  | .. | 90,231  | 0  |
| Commutation realized in labour   | .. | 1,033   | 50 |
| Government contribution in aid of minor works                          | .. | 17,892  | 0  |
| Miscellaneous receipts   | .. | 336     | 77 |
| Total  | .. | 131,416 | 45 |
| EXPENDITURE.   |    |         |    |
| Payment made on account of principal roads and resthouses              | .. | 49,189  | 71 |
| Amount expended on minor works   | .. | 39,282  | 73 |
| Establishment and commission to division officers :—                   |    |         |    |
| (a) Contribution on account of Provincial Road Committee establishment | .. | 2,030   | 0  |
| (b) Cost of District Road Committee establishment                      | .. | 9,127   | 27 |
| (c) Commission to division officers                                    | .. | 7,209   | 74 |
|  |    | 18,367  | 1  |
| Miscellaneous charges  | .. | 4,498   | 0  |
| Balance on December 31, 1919   | .. | 20,079  | 0  |
| Total  | .. | 131,416 | 45 |

5. *Minor Works.*—The roads in charge of the Committee were maintained in good condition during the year. The expenditure on minor works amounted to Rs. 26,899.26.

## 6. The following special works were undertaken during the year at a cost of Rs. 12,383.47 :—

|   | Rs.    | c. |
|---|--------|----|
| 1. Improvements to Mandaivivu road                          | 1,135  | 85 |
| 2. Constructing a culvert on Sarasalai-Nunavil road         | 171    | 84 |
| 3. Metalling Navali roads                                   | 1,965  | 30 |

| Miscellaneous ..                   | 2,033  | 55 | 2,312   | 53 | Public works ..           | 13,960 | 88 | 16,129  | 69 |
| Refunds ..                         | 415    | 0  | 385     | 0  | Improvements ..           | 1,439  | 43 | 1,643   | 19 |
|                                    |        |    |         |    | New works ..              | 3,369  | 57 | 4,437   | 58 |
|                                    |        |    |         |    | Tools ..                  | 425    | 77 | 895     | 62 |
| Refund to revenue from deposits .. | —      | —  | 717     | 69 | Miscellaneous ..          | 1,144  | 10 | 1,012   | 84 |
| Deposits ..                        | 14,764 | 43 | 35,371  | 22 | Advance ..                | 450    | 0  | —       | —  |
| Balance on December 31 :—          |        |    |         |    | Surveys ..                | —      | —  | 94      | 41 |
| Deposits }                         | 9,180  | 28 | 12,905  | 10 | Shade trees ..            | 90     | 30 | —       | —  |
| Surplus }                          |        |    | 4,904   | 13 |                           |        |    |         |    |
|                                    |        |    |         |    |                           | 50,281 | 52 | 56,470  | 78 |
|                                    |        |    |         |    | Refund of deposits ..     | 5,960  | 70 | 44,818  | 3  |
|                                    |        |    |         |    | Balance on December 31 :— |        |    |         |    |
|                                    |        |    |         |    | Deposits ..               | 12,905 | 10 | 3,456   | 29 |
|                                    |        |    |         |    | Surplus ..                | 4,904  | 13 | 4,937   | 60 |
| Total ..                           | 74,051 | 45 | 109,684 | 70 | Total ..                  | 74,051 | 45 | 109,684 | 70 |

The total revenue for the year under review amounted to Rs. 55,786·56, as against Rs. 50,106·74 in the previous year. The increase is due to rapid recoveries and better supervision of the collection of revenue since the grant of a travelling allowance to the Secretary of the Board.

2. *Public Health.*—The health of the town was, on the whole, satisfactory.

|           | 1918. | 1919. |               | 1918. | 1919. |
|-----------|-------|-------|---------------|-------|-------|
| Births .. | 1,464 | 1,346 | Birth-rate .. | 36·2  | 33·29 |
| Deaths .. | 1,663 | 1,427 | Death-rate .. | 41·1  | 35·30 |

A midwife was appointed during the year to attend, free of charge, on patients who cannot afford a fee.

3. *Sanitation.*—One public latrine was constructed during the year. Eleven dry-earth latrines and twenty cesspit latrines were established in private premises.

4. *Lighting.*—Fifty ordinary street lamps were regularly lit throughout the year till 10 p.m. Two Wells' incandescent lamps were bought and put up at the Grand Bazaar at a cost of Rs. 700.

5. *Public Works.*—All the roads and buildings were maintained in good order.

6. *Staff.*—Mr. S. E. R. Solomon from the Colombo Municipality was appointed Secretary in August, in place of Mr. S. D. Stanislaus; and Mr. W. Sinnatamby, from the Survey Department, Superintendent of Works, in May, in place of Mr. W. F. Ratnagopal.

7. The Board consisted of the following members:—The Government Agent, Northern Province, Chairman; Dr. F. V. Foenander, Provincial Surgeon, Northern Province; Mr. W. C. Price, Provincial Engineer, Northern Province; Mr. R. R. Nalliah; Mr. C. Arulambalam; and Mr. K. Kanagasabai.

8. Twelve ordinary meetings and one special meeting of the Board were held during the year.

9. *Karayiyur Reclamation.*—This work was started about the year 1885, and a wall 5 feet high was built round an area of 64½ acres of lagoon, allowing a bridge for boats to reach the fish market. The filling in of the area within the enclosure was then taken up, and although 9 acres only were filled in up to June, 1914, the total area reclaimed to the end of 1919 is 45½ acres. In order to relieve the congestion of the present narrow beach road, it is proposed to lay out a new beach road almost straight from the end of Graveyard road to the Customs buildings at the jetty, and three large culverts across the line of the proposed road have been constructed, partly by prison labour and partly by paid labour.

10. The administration of the Thoroughfares Ordinance is shown in the following statement :—

|   | 1918. |        | Percentage on Number under Head 2. | 1919. |        | Percentage on Number under Head 2. |
|---|-------|--------|------------------------------------|-------|--------|------------------------------------|
|   |       |        |                                    |       |        |                                    |
| 1. Population of local area by latest Census ..   | —     | 40,424 | —                                  | —     | 40,424 | —                                  |
| 2. Number of resident males by division officers' list reported liable to labour ..       | —     | 10,452 | —                                  | —     | 10,283 | —                                  |
| 3. Discharged obligation within local area by—  |       |        |                                    |       |        |                                    |
| (a) Paying single commutation ..  | 8,442 |        | 80·76                              | 8,523 |        | 82·87                              |
| (b) Paying double commutation ..  | 157   |        | 1·50                               | 145   |        | 1·41                               |
| (c) Labouring six days ..   | 1     |        | —                                  | 2     |        | —                                  |
| (d) Imprisoned ..   | 3     |        | —                                  | 5     |        | —                                  |
| (e) Fined ..  | 5     |        | —                                  | 3     |        | —                                  |
| 4. Total discharged obligation ..   |       | 8,608  | 82·35                              |       | 8,678  | 84·39                              |
| 5. Failed to discharge obligation within local area, but otherwise accounted for as—      |       |        |                                    |       |        |                                    |
| (f) Exempted on account of age, death, disqualification, or physical inability to work .. | 299   |        | 2·86                               | 317   |        | 3·08                               |
| (g) Paid or laboured elsewhere ..   | 894   |        | 8·55                               | 798   |        | 7·76                               |
| (h) Double entries or entries by mistake ..   | 217   |        | 2·86                               | 155   |        | 1·50                               |
| (i) Left local area ..  | 434   |        | 4·15                               | 335   |        | 3·25                               |
| 6. Total failed to discharge obligation within local area ..                              |       | 1,844  | 17·64                              |       | 1,605  | 15·60                              |

Local Board Office,  
Jaffna, February 10, 1920.

H. W. CODRINGTON  
Chairman.

V.—REPORT ON THE WORKING OF THE JAFFNA SANITARY BOARD  
DURING 1919.

EXCEPT the changes in the Government Agency, the Board consisted of the same members as in 1918.

2. The towns under the operation of "The Small Towns Sanitary Ordinance, 1892," are Point Pedro, Valluvedditturai, and Kayts.

3. The revenue and expenditure of the three towns for the year 1919 are shown below:—

| Point Pedro.                    |           |                                 |              |
|---------------------------------|-----------|---------------------------------|--------------|
| REVENUE.                        |           | Rs. c.                          | EXPENDITURE. |
| Taxes ..                        | 3,583 20  | Cost of administration ..       | 985 36       |

| Total ..                        | 4,131 78 | Total ..                        | 4,131 78     |

4. Encroachments on Jaffna-Point Pedro road and Point Pedro East Coast road at Point Pedro and the Kayts-Velanai road at Kayts were removed during the year. The survey of the Point Pedro-Punnalai road within the Sanitary Board limits at Valluvedditturai, which was taken up last year by the Surveyor-General's Department, has not yet been completed. Surveys of important roads and lanes within the Sanitary Board limits of Point Pedro and Valluvedditturai were made for the purpose of detecting encroachments, and steps taken under "The Road Ordinance, 1861," to remove the same.

5. The roads, markets, and latrines in the three towns were maintained in order during the year. The floor of the fish market at Point Pedro was relaid.

6. An outbreak of rinderpest occurred in May and June of 1919 at Kayts West, within the Sanitary Board limits, and effective measures were taken to arrest the spread of the disease.

7. Two meetings of the Board were held during the year.

8. The three small towns were kept in a good sanitary condition during the year.

Sanitary Board Office,  
Jaffna, February 21, 1920.

H. W. CODRINGTON,  
Chairman.

VI.—REPORT ON THE WORKING OF THE DISTRICT SCHOOL COMMITTEE;  
JAFFNA, DURING THE YEAR 1919.

THE District School Committee for the Jaffna District was created under section 6 of the Rural Schools Ordinance, No. 8 of 1907, from January 1, 1917, and consisted of the following members:— (1) The Government Agent, Northern Province (Chairman); (2) the Director of Education (and in his absence the Inspector of Schools, Northern Province); (3) Rev. G. J. Trimmer; (4) Rev. Father J. B. Pottain; (5) Rev. J. Backus; (6) Mr. A. A. Ward; (7) Mudaliyar M. Muttukumaraswamy; (8) Gate Mudaliyar C. M. Sinnayah; and (9) the Hon. Mr. A. Sapapathy.

2. Five meetings of the Committee were held during the year for the transaction of business.

3. Land for the establishment of a Government vernacular model school was acquired at Karaveddi in the Vadamardchi West division at a cost of Rs. 3,509.25. Tenders were called for the building of the school, and an offer of Rs. 15,225 was accepted. The building work will be completed by the latter part of 1920.

4. An attendance officer was appointed from April 1, 1919, and was in charge of the Tenmaradchi division. The Udaiyars of Valikamam West were made attendance officers for their respective divisions.
5. There are 309 schools recognized under the Rural Schools Ordinance.
6. A statement of the revenue and expenditure for the year 1919 is given below :—

| RECEIPTS.                               | Rs.    | c. | PAYMENTS.                     | Rs.    | c. |
|---|--------|----|-------------------------------|--------|----|
| Balance on January 1, 1919              | 35,492 | 71 | Salaries                      | 979    | 74 |
| Government contribution                 | 11,458 | 41 | Erection of new buildings     | 3,561  | 22 |
| School fines                            | 3,035  | 5  | Miscellaneous                 | 247    | 61 |
| Security for Nellyadi school buildings  | 1,522  | 50 | Refund of tender form deposit | 50     | 0  |
| Tender form deposit for Nellyadi school | 70     | 0  | Balance on December 31, 1919  | 46,740 | 10 |
| Total                                   | 51,578 | 67 | Total                         | 51,578 | 67 |

Jaffna Kachcheri,  
February 21, 1920.

H. W. CODRINGTON,  
Chairman.

### REPORT ON THE MANNAR DISTRICT FOR 1919.

Area of the Mannar District, 963½ square miles.  
Population, 25,903 (Census of 1911).  
Estimated population of the Mannar District at the end of 1919, 20,452.

#### I.—HISTORY OF THE YEAR.

THE outstanding event of the year was the signing by Germany of the Treaty of Peace with the Allies, which took place on June 28. Local celebrations in honour of this historic event were held on July 19, 1919, and all Government offices were closed on that day. The school children of the district assembled in the afternoon on the esplanade, and after a march past sports were held. The function was enjoyed by the large number of the public who attended. The proceedings were brought to a close in the evening by a torchlight procession followed by fireworks.

2. *Administrative Staff.*—With the exceptions noted below, the administrative staff of the district was the same as in the previous year :—

- (1) In December Mr. A. L. Fretz, District Engineer, was transferred to Colombo, being succeeded by Mr. H. N. Worth.
- (2) In November Dr. E. S. Godlieb, Port Surgeon, Talaimannar, was transferred to Mandapam. He was succeeded by Dr. P. K. K. Naidu.
- (3) In September Dr. R. R. Tamber was appointed to the hospital at Adampan. This hospital had for some time previously been in charge of an apothecary.
- (4) In December Mr. William Keil, retired Irrigation Inspector, was appointed to act temporarily in the new office of Cultivation Officer, Giant's Tank.

3. *The Madu Festival* was held from June 23 to July 2. The attendance was estimated at about 30,000. The sanitary conditions and health of the camp were good, and there was no crime.

#### II.—REVENUE.

4. Exclusive of land sales, the revenue collected during the financial year 1918-19 was Rs. 153,606·97, as compared with Rs. 142,146·89 in the previous financial year. The principal items are :—

|                  | 1917-18. | 1918-19. |                        | 1917-18.  | 1918-19.  |
|------------------|----------|----------|------------------------|-----------|-----------|
|                  | Rs. c.   | Rs. c.   |                        | Rs. c.    | Rs. c.    |
| Customs          | 2,039 41 | 1,750 59 | Arrack, Rum, and Toddy | 79,433 36 | 82,796 73 |
| Port and Harbour | 1,361 96 | 1,018 85 | Irrigation Works       | 13,539 37 | 13,834 45 |
| Salt             | 20,901 0 | 25,173 0 | Land Revenue           | 1,982 14  | 1,478 39  |

5. Decrease under "Customs" is due to the absence of imports of rice from India. The increase under "Salt" is due to increased fish-curing operations, and under "Arrack and Toddy" is due to a slight increase in tavern rents.

#### III.—CONDITIONS OF THE PEOPLE.

6. Both the paddy crops secured during the year were fair. The tanks in Musali North and South were well filled for the first time for four years, and the whole of the fields were cultivated. The unexpected and unusually heavy rain at the end of December has filled these tanks again, and at the time of writing there is every prospect of another good crop being obtained in these patus—a welcome change for the inhabitants. Prices of all commodities have ruled high during the year. The price of paddy rose towards the end of the year to Rs. 3 a bushel in Mannar. This represents an increase of 50 per cent. upon the previous average price. This entails some hardship upon the non-paddy-producing inhabitants, who comprise about half the total population. Throughout the district wages have risen slightly in consequence of the increased cost of living. The number of promissory notes put in suit in the civil courts during the year shows a marked increase, being 354, as compared with 209 in the previous year. The total sums represented by these notes were Rs. 47,049 and Rs. 29,522, respectively.

7. *Health.*—The health of the people throughout the year was normal.

8. The total number of births and deaths during the year as compared with 1918 are as follows:—

|           | 1918. | 1919. |           | 1918. | 1919. |
|-----------|-------|-------|-----------|-------|-------|
| Births .. | 1,027 | 659   | Deaths .. | 1,756 | 1,378 |

As usual, the deaths very largely exceed the births. The decrease in births as compared with the previous year is very noticeable.

The marriages registered during the year were 153, as compared with 126 in 1918.

The deaths of children under one year of age were 378, an appallingly high figure, with only 659 births during the year.

9. The total number of patients treated in hospitals and dispensaries was 44,177, as compared with 33,792 in 1918.

10. *Food Supply.*—Throughout the year export of paddy from the district was prohibited. From the figures furnished by the headmen it was estimated that the total production of the year was appreciably less than the consumption of the previous year, and amounted, after deduction of the necessary seed paddy, to only a little more than half a bushel of paddy or a quarter of a bushel of rice per head of the population per month. The rise of price referred to in paragraph 6 *supra* indicates that this estimate was probably approximately correct.

11. The question of paddy production was carefully considered by the Food Production Committee, and the conclusions arrived at were as follows:—

- That for the purpose of increasing paddy production, the most important measure, and one which would result in an immediate and considerable increase, is the completion of the Akattimurippu Irrigation Scheme, as this scheme would bring into regular cultivation nearly 3,000 acres of existing paddy fields, which at present are only cultivated at considerable and irregular intervals.
- That in the Giant's tank area, and the Musali district at least, the granting of land free or on easy terms would not result in any increase of paddy production, the available labour being insufficient for cultivation of the existing paddy lands.
- With the view of increasing the labour available for the coming kalapokam cultivation, it was decided to endeavour to arrange for a suitable person to proceed to Southern India and bring over a number of cultivators. Applications for the services of such cultivators to be presented in advance, together with the estimated cost of bringing them over.
- As regards food products other than paddy, it was agreed that the best and only feasible method of encouraging increase was to establish, if possible, one or more demonstration gardens, worked on practical lines, from which cultivators could see the possibilities of local labour and under local conditions, and the profits to be derived from such labour.
- As regards slaughter of buffaloes, it was agreed that there are more black cattle and buffaloes in the district than are required for agricultural purposes, and that, therefore, prohibition of export of buffaloes from the district would be of no advantage to the people of the district, but would deprive many of them of a considerable source of income.
- It was considered that the district is not yet sufficiently advanced to benefit by the holding of village agricultural shows.

12. A memorandum on the Akattimurippu scheme has been prepared and submitted to Government. The District Adigar, Mannar island, was deputed to go over to Mandapam and to endeavour to obtain cultivators from Southern India. He reported, however, that the cultivators in that district were fully employed, and that he was unable to get into touch with any who were willing to come to the Mannar District. Two plots of paddy land of 5 acres each in extent were provided by two of the leading proprietors, and were placed under the supervision of an Agricultural Instructor to serve as a demonstration of what could be done by improved methods of cultivation. Owing mainly to the unsatisfactory nature of the only cultivators available locally, these demonstration plots have unfortunately proved a failure for this year. But I am convinced that it is in this direction that the best hope lies of improving the cultivation in the district and thereby securing a largely increased yield.

13. I am of opinion that much might be done to encourage paddy production and to help the cultivators if a Government paddy store could be established at Mannar or at some central place in the Giant's tank area, or possibly both, at which paddy would be bought in by Government at a fixed rate and subsequently sold at a rate sufficiently in excess of the buying rate to cover the cost of storage. Under present conditions, the smaller cultivators who have no reserve are obliged to sell all their paddy soon after it is reaped—a time when the price to be obtained is at its lowest. This year, for instance, at the close of the reaping season, paddy was being sold for Re. 1.50 a bushel, and the smaller cultivators, who had to sell out their stocks then, are gaining no benefit from the present price of Rs. 3, but, on the contrary, are now compelled to buy back paddy for their own consumption at this price. Later in the year the fact that paddy was obtainable at the Government store at a fixed rate would provide a far more effective means of checking profiteering than the promulgation on paper of maximum prices.

14. *Cattle.*—With an exception of an outbreak of anthrax in the neighbourhood of Murunkan, the health of cattle was normal. The anthrax began in August, 1919, and had disappeared by the end of the year.

15. *Rainfall.*—Total rainfall for the year was 58.48 inches, which constitutes a record for the district, the previous highest recorded being 51.11. Of this 58.48 inches, over 35 inches fell in the months of November and December. There were two months, July and August, in which there was no rain whatever.

#### IV.—INDUSTRIES.

16. *Paddy Cultivation.*—The total production of paddy during the year is estimated at 160,000 bushels obtained from an area cultivated of 11,720 acres. The influenza epidemic at the end of 1918 caused a considerable reduction in the area cultivated for the kalapokam harvest of 1918-19 in the Giant's tank area, but there was a considerable increase in the area under cultivation in the Musali pattus owing to favourable rainfall. The returns for 1918 show a total crop of 177,419 bushels from an area of 9,427 acres under cultivation.

17. *Tobacco*.—There was some increase in tobacco cultivation as compared with the previous year, returns showing a total acreage under this crop of 143 acres in 1919, as compared with 115 in 1918. Late rains interfered with the maturing of the crop, and prices ruled low.

18. *Coconuts and Palmyras*.—No appreciable change in the area under cultivation or the yield of these products is reported.

19. *Fishing*.—The fishing, on the whole, was normally successful, except that the catches of "nettali" were poor. The export of dried fish coastwise was 6,608 cwt. of a value of Rs. 62,846, the export for the previous year being 6,868 cwt. valued at Rs. 66,916. The export of iced and other fish, by rail shows an increase of nearly 20 per cent. The figures for the four railway stations in the district were as follows :—

|                | 1918.<br>Tons. | 1919.<br>Tons. |
|----------------|----------------|----------------|
| Mannar ..      | 1,251          | 1,004          |
| Pesalai ..     | 714            | 852            |
| Talaimannar .. | 53             | 486            |
| Murunkan ..    | 56             | 67             |
| Total ..       | 2,074          | 2,409          |

#### V.—IRRIGATION.

##### (a) Major Works (Giant's Tank).

20. The Giant's tank area was declared a separate irrigation district in April, 1919.

21. Towards the end of the year the supervision and control of cultivation in this new irrigation district was taken over by the Assistant Government Agent, and a cultivation officer was appointed to carry out such supervision under him.

22. A set of irrigation rules was drawn up later in the year in consultation with the Advisory Committee elected by the proprietors. These rules have since been approved by a general meeting of all the proprietors.

23. One mile of new channel under Giant's tank was cut during the year.

24. No lands were exempted from payment of water-rate.

25. 2,063 acres were cultivated for siruppokam under Giant's tank. The crop was a satisfactory one. Cultivation was carried on partly in selected tank beds and partly in selected fields, each proprietor being allotted a share in proportion to his total holding of land irrigable under Giant's tank.

26. The financial position of the Fine Fund is given below :—

|                                 |        | Major Works.                    |        |
|---------------------------------|--------|---------------------------------|--------|
|                                 | Rs. c. |                                 | Rs. c. |
| Balance on December 31, 1918 .. | 89 34  | Expended during 1919 ..         | —      |
| Receipts during 1919 ..         | 160 0  | Balance on December 31, 1919 .. | 249 34 |
| Total ..                        | 249 34 | Total ..                        | 249 34 |

##### (b) Village Works.

27. Gradual restoration and improvement of village tanks was continued. The work of taking levels and preparing sections of the bunds of all working tanks in the Panankamam and Metkumulai divisions was completed during the year.

28. The old *tekkam* or anicut on the Modaragam-arū was investigated during the year, and a survey was made of the *tekkam* and works in the vicinity and levels taken. A partial restoration of this old scheme sufficient to supply water to the Marichchukkaddi tanks is feasible. But it remains to be decided whether or no the cost would be within the means of the proprietors to be benefited.

29. The following statement shows the present position of the Fine Fund (Village Works) :—

|                                 |          | (b) Minor Works.                |          |
|---------------------------------|----------|---------------------------------|----------|
|                                 | Rs. c.   |                                 | Rs. c.   |
| Balance on December 31, 1918 .. | 2,282 72 | Expenditure, 1919 ..            | 723 34   |
| Receipts during 1919 ..         | 2,130 3  | Balance on December 31, 1919 .. | 3,689 41 |
| Total ..                        | 4,412 75 | Total ..                        | 4,412 75 |

No important works were undertaken from this Fund during the year.

#### VI.—EDUCATION.

30. No new schools were opened during the year. After prolonged negotiations the Surveyor-General is now re-surveying the site selected for the extension of the Erukkalampiddi school, with a view to the exclusion from the land to be acquired of a portion of the area originally proposed.

31. The enforcing of attendance at the existing schools was continued. Fines imposed for non-attendance were Rs. 553.50, as compared with Rs. 396.50 in 1918.

32. The District Schools Committee was composed of the following members :—The Assistant Government Agent, Chairman; Rev. Father F. M. Bizien, O.M.I.; Rev. J. W. Garforth; the District Adigar, Mannar; the District Adigar, Mantai; the District Adigar, Musali; and Mr. M. Nilameyadin. No meetings were held during the year, business being conducted by circulation of papers.

33. The balance to the credit of the Committee's funds increased from Rs. 2,777.02 to Rs. 3,861.54. Expenditure was confined to the maintenance of Government school buildings and gardens.

## VII.—SPECIAL ORDINANCES.

34. *Game Ordinance*.—The following licenses were issued :—

|                                |    |
|--------------------------------|----|
| Game licenses                  | 4  |
| Capture of buffaloes           | 12 |
| Capture of elephants, at Rs 50 | 6  |

No game licenses were taken out by villagers.

35. *Guns*.—Guns licensed during the year numbered 700, as compared with 714 in the previous year.

36. *Excise*.—There was no alteration in the number of taverns and licensed premises.

37. The Excise Advisory Committee consisted of the following members :—The Assistant Government Agent, Chairman ; the Medical Officer ; Rev. J. W. Garforth ; Rev. Father F. M. Bizien, O.M.I. ; and Mr. S. M. Anantham ; and held one meeting during the year.

38. There was a satisfactory increase in the number of trees licensed to be tapped for unfermented toddy.

39. There was an appreciable decrease in the consumption of all forms of alcohol as compared with the previous year, probably due to the increased cost of living.

40. *Opium*.—No licenses were issued during the year.

41. *Butchers*.—Twelve licenses were issued.

42. *Cattle Branding*.—The number of cattle branded was 1,276, as compared with 1,904 in the previous year.

## VIII.—SALT.

43. There were small formations of natural salt during the dry weather. The collection of one at Marichchukkaddi odai, near the 4th mile on the Madawachchiya road, was begun, but the formation was destroyed by rain after 900 cwt. only had been collected. This salt was subsequently sold for removal beyond the Province.

44. 9,374 cwt. of salt were received from Jaffna. 8,677 cwt. were sold from store during the year, as compared with 6,625 cwt. in the preceding year.

## IX.—PUBLIC WORKS.

45. Rs. 75,195.98 was expended on public works during the year, the expenditure of the preceding year being Rs. 80,232.27. No new works of any importance were undertaken.

46. The following are the more important of the works required in the district :—

- (1) Construction of the Akattimurippu channel and connected works.
- (2) Bridge over the Mannar channel.
- (3) Extension of metal road from Pesalai to Talaimannar.
- (4) Extension of metal road from Vankalai to Arippe.

## X.—LAND SALES.

47. Nine land sales were held during the year, at which 137 lots aggregating 191 acres 2 roods 27 perches were sold, the average price per acre being Rs. 29.82. The total receipts under "Land Sales" were Rs. 7,992.06, as compared with Rs. 167.90 in 1918. A large number of applications for small lots are in hand. 400 acres of land under the Giant's tank has been surveyed in blocks of 10 acres and advertised for sale. A similar survey of a further block of 600 acres is under consideration. The settlement of Mannar town is almost complete.

## XI.—LOCAL GOVERNMENT.

48. Reports of the working of the Thoroughfares Ordinances and of the Sanitary Board are given as an Appendix.

49. *Village Committees*.—There are twelve Village Committees in the district. These Committees dealt with 587 cases during the year. The number dealt with in the preceding year was 26. The balance to the credit of the Committees rose from Rs. 653.03 to Rs. 732.53. There was no expenditure from these funds during the year.

## XII.—CRIME AND POLICE.

50. The following figures give a comparative statement of cases of serious crime dealt with in the Police Court of Mannar in 1918 and 1919 :—

|                           | 1918.          |             |             | 1919.          |             |             |
|---------------------------|----------------|-------------|-------------|----------------|-------------|-------------|
|                           | Case reported. | True Cases. | Conviction. | Case reported. | True Cases. | Conviction. |
| Rape                      | —              | —           | —           | 1              | 1           | —           |
| Robbery                   | 1              | —           | —           | 3              | 2           | 2           |
| Arson                     | 2              | 2           | —           | 2              | 2           | —           |
| Grievous hurt             | —              | —           | —           | 3              | 3           | 3           |
| Hurt with knife           | 2              | 1           | 1           | 3              | 2           | 2           |
| Cattle stealing           | —              | —           | —           | 4              | 2           | 2           |
| Theft of over Rs. 20      | 30             | 19          | 1           | 28             | 18          | 4           |
| Theft of prædial products | 4              | 3           | 3           | 11             | 8           | 7           |
| Retaining stolen property | 5              | 5           | 2           | 7              | 6           | 4           |
| Criminal breach of trust  | 2              | 2           | —           | 11             | 8           | 4           |
| Murder                    | 1              | 1           | —           | —              | —           | —           |
| Total                     | 47             | 33          | 9           | 73             | 52          | 28          |

51. There is a regrettable all-round increase in the number of cases reported. The proportion of convictions to true cases is considerably higher than in the previous year.

52. The work of the headmen in the detection of offenders still leaves much to be desired.

February 2, 1920.

B. G. DE GLANVILLE,  
Assistant Government Agent.

## APPENDIX.

I.—REPORT ON THE WORKING OF THE THOROUGHFARES ORDINANCES  
IN THE MANNAR DISTRICT DURING 1919.

THE District Road Committee consisted of five members :—The Assistant Government Agent (Chairman); the District Engineer; Messrs. S. Muttutamy representing the European community, and William Keil and V. Viswalingam representing the Burgher and native communities, respectively. The only change was occasioned by Mr. H. N. Worth succeeding Mr. A. L. Fretz as District Engineer in December, 1919.

2. One meeting was held in July, and the rest of the work was done by the circulation of papers.

3. Instructions were given at the beginning of the year for work to be done on the various roads in charge of the Committee to the full extent of the funds available. But owing partly to lack of labour and partly to lack of adequate energy and attention on the part of the headmen to whom the work was entrusted, a large proportion of the work laid out was not done. An energetic and intelligent Superintendent of Minor Roads is badly needed, but unfortunately the Committee's funds will not permit of the employment of such an officer.

4. A comparative statement showing the percentage of payment of the commutation tax is annexed :—

|   | 1918. |        | Percent-<br>age on<br>Number<br>under<br>Head 2. | 1919. |        | Percent-<br>age on<br>Number<br>under<br>Head 2. |

## 5. Details of revenue and expenditure for 1919 are as follows :—

| REVENUE.   |           | EXPENDITURE.                                  |           |
|--|-----------|---|-----------|
|  | Rs. c.    |   | Rs. c.    |
| Balance on January 1, 1919 ..                    | 1,264 63  | Payment made on account of principal roads .. | 1,093 45  |
| Commutation in money ..                          | 7,852 50  | Amount expended on minor works ..             | 5,071 59  |
| Government contribution in aid of minor works .. | 2,853 0   | Establishment ..                              | 955 90    |
| Miscellaneous ..                                 | 1,417 26  | Commission to division officers ..            | 701 99    |
|  |           | Office contingencies ..                       | 113 88    |
|  |           | Cost of audit ..                              | 39 53     |
|  |           | Miscellaneous ..                              | 1,257 12  |
|  |           | Balance on December 31, 1919 ..               | 13,153 93 |
| Total ..   | 22,387 39 | Total ..                                      | 22,387 39 |

February 2, 1920.

B. G. DE GLANVILLE,  
Chairman.

## II.—REPORT ON THE WORKING OF THE MANNAR DISTRICT SANITARY BOARD DURING THE YEAR 1919.

At the beginning of the year the Sanitary Board consisted of the following members :—The Assistant Government Agent, Chairman ; Mr. A. L. Fretz, District Engineer ; Dr. H. E. Schokman, Medical Officer ; and Messrs. S. Anantham, C. Muttucumaru, and A. L. Savundaranayagam. In December Mr. H. N. Worth succeeded Mr. A. L. Fretz as Member of the Sanitary Board.

2. Two meetings were held during the year, and the remainder of the work was done by circulation of papers.

3. The limits of the small town of Talaimannar were altered during the year and the town re-proclaimed under the name of Talaimannar Port with limits defined so as to exclude a portion of the area originally included. Hitherto the sanitation of this small town has been carried out by the Assistant Government Agent from the funds voted to the purpose by Government. For the coming year these funds have been voted as a grant to the Sanitary Board, and the sanitation of the town will be carried out by the Board.

4. A regulation was made during the year by the Board increasing the commutation of labour due under the Thoroughfares Ordinance in respect of the town of Mannar from Re. 1.50 to Rs. 2.

5. The revenue and expenditure of the five towns under the operation of the Ordinance during the year were as per statement annexed :—

| Name of Town.          | Balance on<br>January 1,<br>1919. | Revenue.    | Expenditure. | Balance on<br>December 31,<br>1919. |
|------------------------|-----------------------------------|-------------|--------------|-------------------------------------|
|                        | Rs. c.                            | Rs. c.      | Rs. c.       | Rs. c.                              |
| Mannar town ..         | 1,907 87*                         | 5,225 31    | 4,682 42     | 2,450 76                            |
| Erukkalampiddi town.   | 1,126 79 ..                       | 2,051 38 .. | 2,086 46 ..  | 1,091 71                            |
| Pesalai town ..        | 1,297 97 ..                       | 918 85 ..   | 630 56 ..    | 1,586 26                            |
| * Vidattaltivu town .. | 1,934 43 ..                       | 1,076 57 .. | 1,125 24 ..  | 1,885 76                            |
| Talaimannar town ..    | 220 24 ..                         | 57 50 ..    | — ..         | 277 74                              |
| Total ..               | 6,487 30                          | 9,329 61    | 8,524 68     | 7,292 23                            |

\* This does not include water-rate collections, which are credited to Government Revenue.

The main items of expenditure in each case were for scavenging work and for the upkeep and improvement of roads.

February 2, 1920.

B. G. DE GLANVILLE;  
Chairman.

## REPORT ON THE MULLAITTIVU DISTRICT FOR THE YEAR 1919.

|                                |                      |
|--------------------------------|----------------------|
| Area of the District ..        | 1,466½ square miles. |
| Population (Census of 1911) .. | 17,326.              |

### I.—ADMINISTRATION OF THE DISTRICT AND DEPARTMENTAL CHANGES.

MR. E. F. MARSHALL, who held the office of the Assistant Government Agent since September, 1918, obtained leave to proceed to England, and was succeeded by Mr. A. N. Strong on August 2. The latter was transferred to Kurunegala as Police Magistrate, and was succeeded by the writer on November 3.

2. Mr. A. S. Ramalingam, Irrigation Sub-Inspector, was appointed in February in connection with the restoration of the Kanukkeni tank.

3. Mr. B. J. Arasaratnam, Secretary of the District Court, was transferred to Mannar in February, and was succeeded by Mr. T. Sathasivam, Recordkeeper of the Courts.

4. Mr. T. Velauthan, Recordkeeper of the Kachcheri, was transferred to courts in February, and Mr. M. Sanmugam was sent in his place.

5. Mr. V. Somasunderam, Land Clerk, was transferred to Jaffna, and Mr. A. Manuelpillai succeeded him in February.

6. In November Mr. T. R. T. Kanakasundera, Deputy Fiscal's Clerk, was transferred to Matara, and was succeeded by Mr. B. C. Buultjens, Native Writer of the local courts, and Mr. S. K. Sathasivam was sent in his place.

### II.—IMPORTANT EVENTS.

7. His Excellency the Governor on his tour in the Northern Province visited Mullaittivu on January 23 and Vavuniya on January 24.

8. Vattappalai festival took place in June, and about 6,000 pilgrims attended from different parts of the Northern and Eastern Provinces.

9. The signing of the Treaty of Peace was celebrated at Mullaittivu, Vavuniya, and Nedunkeni on July 19.

10. Three Food Production Committees were started in the district, at Mullaivivu, Vavuniya, and Nedunkeni, in the month of June, with a view to take necessary steps to increase the production of foodstuffs in the district.

11. The Government Agent visited the district in May, July, and December.

### III.—REVENUE.

12. The revenue collected during the financial year ended September 30, 1919, was Rs. 68,296·41, as against Rs. 63,939·40 for the previous year, the principal items being—

|                          | 1918-19.<br>Rs. | 1917-18.<br>Rs. |                       | 1918-19.<br>Rs. | 1917-18.<br>Rs. |
|--------------------------|-----------------|-----------------|-----------------------|-----------------|-----------------|
| Excise ..                | 37,069          | 32,444          | Irrigation Rates ..   | 2,392           | 2,359           |
| Salt ..                  | 11,082          | 12,105          | Rent of Lands, &c. .. | 1,594           | 920             |
| Stamps ..                | 4,418           | 4,746           | Forest Revenue ..     | 3,391           | 1,643           |
| Fines and Forfeitures .. | 1,030           | 721             | Land Sales ..         | 4,650           | 5,866           |

13. The expenditure for the same period was Rs. 61,428, as against Rs. 50,264 for the previous year.

### IV.—FOOD SUPPLY, INDUSTRIES, CONDITION OF THE PEOPLE, AND CONNECTED MATTERS.

14. *Paddy*.—A cultivated area of 15,277 acres gave a produce of 289,400 bushels. The year's paddy crops were good, and no shortage was felt in the district. Owing to scarcity of food supply in other parts of the Island, restrictions over export of paddy outside the district were started in May. Export of paddy was allowed on permits issued by the Assistant Government Agent. 917 permits, covering 46,056 bushels, were issued during the year, mostly to Jaffna.

15. The prospects at the end of the year are good. Kalapokam rain was rather late, but good rains fell during November and December. Rainfall registered during the year was—

|               | Inches. |                | Inches. |
|---------------|---------|----------------|---------|
| Mullaivivu .. | 58·97   | Vavuniya ..    | 81·08   |
| Nedunkeni ..  | 72·48   | Cheddikulam .. | 57·12   |
| Mankulam ..   | 82·98   |                |         |

16. *Dry Grains*.—A cultivated area of 310 acres gave a produce of 3,800 bushels. In view of the shortage of foodstuffs, 2,300 acres have been allowed for chenas at a reduced rent of 50 cents per acre. A great portion of this extent has been cleared and cultivated with kurakkan and other dry grains, and good crops are expected.

17. *Vegetables*.—No vegetable shows were held for want of funds. Vegetable seeds were obtained from the Agricultural Department and distributed to the villagers. Seeds collected in the nursery garden at Vavuniya were also distributed.

18. *Coconut*.—Over 2,500 acres are planted. Owing to the rise in the price of copra, the price of coconuts rose steadily during the latter part of the year.

19. *Tobacco* is grown in the Maritime pattus and Vavuniya North divisions mostly by the Jaffnese. This year's crop was good, and realized moderate prices. All smoking tobacco sold to Jaffna traders.

20. *Fishing*.—This year's catch was good. 7,707 cwt., valued at Rs. 77,120, were transported by sea. No account is taken of the fish transported by land and rail.

21. *Health of the People*.—The influenza epidemic prevailing at the end of 1918 subsided gradually. The increase in the death-rate was due to influenza and malaria. Figures are as follows:—

|                   | 1918.   |         | 1919.   |         |
|-------------------|---------|---------|---------|---------|
|                   | Births. | Deaths. | Births. | Deaths. |
| First Quarter ..  | 203     | 160     | 173     | 361     |
| Second Quarter .. | 182     | 88      | 120     | 218     |
| Third Quarter ..  | 210     | 115     | 92      | 156     |
| Fourth Quarter .. | 240     | 476     | 111     | 161     |

There were no epidemic diseases prevailing. Quinine was distributed free to the villagers.

There are two hospitals and fourteen outdoor and visiting dispensaries, in which 27,886 patients were treated, as against 18,244 in 1918. A few more visiting dispensaries are desirable.

22. *Sanitation*.—There is a Sanitary Board in Mullaivivu only. In villages sanitation is enforced by means of Village Committee rules and by frequent visits of the Assistant Government Agent. Constant pressure is necessary on villagers and headmen to keep villages clean.

23. *Cattle*.—Pasture was good, and there were no contagious diseases. There is a scarcity of buffaloes for cultivation work. Sale to traders and outsiders is checked as far as possible. Black cattle are too numerous; no practical use is made of them, except in the Maritime pattus and Vavuniya North, where they provide for manure for tobacco lands.

24. *Wells*.—Rs. 987·18 was spent in repairing eighteen wells.

### V.—IRRIGATION.

25. The post of Chief Irrigation Inspector was suppressed, and an Irrigation Sub-Inspector was added to the staff, making three Sub-Inspectors, who now work directly under the Assistant Government Agent, instead of through a Chief Irrigation Inspector. Udaiyars and Koralas help the Irrigation Sub-Inspectors.

26. *Major Works*.—There are ten major works in the district, one of them—Kanukkeni—breached in 1911, and has not yet been repaired. Maintenance of major works has been taken out of the Assistant Government Agent's hands and placed under the direct control of the Director of Irrigation. Cultivation matters under these tanks are still under the management of the Assistant Government

Agent. Irrigation rates due under the nine tanks amount to Rs. 2,226.31, and the whole amount was recovered before the close of the financial year. Statement of fines under major works is as follows :—

|                            |    |       | Rs.   | c. |
|----------------------------|----|-------|-------|----|
| Balance on January 1, 1919 | .. | ..    | 1,276 | 51 |
| Receipts during 1919       | .. | ..    | 448   | 25 |
|                            |    | Total | 1,724 | 76 |
| Expenditure                | .. | ..    | 326   | 94 |
| Balance                    | .. | ..    | 1,397 | 82 |

27. *Minor Works.*—The Sinner dam in Mullaivivu town is treated as a minor work, and is the only one in the district. Extensive repairs are required to this dam; a special rate of Re. 1 per acre from lands benefited by the dam, amounting to Rs. 126.93, was collected during the year. The repairs will be carried out in 1920.

28. *Village Works.*—There are 332 tanks in the working list, and 98 non-working tanks. Twenty-nine of these tanks have been completely restored, and a number of them are nearing completion. Progress is slow owing to the slackness of the shareholders, who will do no work themselves. 35,730 days' labour was called, out of which 18,771 days' work was done, leaving 16,959 in default, for which the defaulters were prosecuted and fined. Fines Fund under the village tanks stands as follows :—

|                            |    |       | Rs.    | c. |
|----------------------------|----|-------|--------|----|
| Balance on January 1, 1919 | .. | ..    | 10,193 | 97 |
| Receipts                   | .. | ..    | 8,727  | 59 |
|                            |    | Total | 18,921 | 56 |
| Expenditure                | .. | ..    | 8,827  | 43 |
| Balance                    | .. | ..    | 10,524 | 13 |

Of this balance, Rs. 4,939.02 forms the General Fines Fund, and the balance Rs. 5,585.11 is to the credit of the different tanks.

29. *Permit Tanks.*—There are twenty-two in the list, three being restored under the Vanni Scheme, on which 1,078 days' labour has been done. The restoration is never energetically carried out, and is seldom satisfactorily done.

#### VI.—EDUCATION.

30. There are 10 Government vernacular schools, 3 of which are Sinhalese, and 26 grant-in-aid schools, conducted by Missionary bodies, except 1, in Mullaivivu, conducted by the Hindus. 239 boys and 57 girls are receiving education in these schools. There is only one English school, which is under the management of the Roman Catholic Mission at Mullaivivu. Attendance is enforced by rules, but difficulty is experienced owing to sparseness of the population.

There is one District School Committee at work, and one meeting was held. Two permanent school buildings have been erected. Steps are to be taken to erect another at Iratperiyakulam. The amount available at the end of 1919, including Government grant, was Rs. 3,671.92, out of which expense of erecting the two permanent buildings have to be met.

#### VII.—POLICE AND CRIME.

31. There is very little crime. The only serious cases were :—

|                  |    | Cases. |           |
|------------------|----|--------|-----------|
| Mischief by fire | .. | 2      | Acquitted |
| Kidnapping       | .. | 2      | Convicted |
| Hurt with knife  | .. | 3      | do.       |
| Rape             | .. | 1      | Acquitted |
| Robbery          | .. | 4      | do.       |

Village headmen attend to police duties.

#### VIII.—LOCAL GOVERNMENTS.

32. Separate reports on the working of the District Road Committee and Sanitary Board are appended.

33. *Village Tribunal.*—The President holds court at Vavuniya, Nedunkeni, and Mullaivivu once a month. Statement of work done during the year :—

|  | Civil. | Criminal. |
|--|--------|-----------|
| Cases pending on January 1, 1919             | 25     | 56        |
| Instituted during the year                   | 747    | 576       |
| Disposed of during the year                  | 737    | 609       |
| Pending on December 31, 1919                 | 35     | 23        |
| Appeals to the Assistant Government Agent :— |        |           |
| Confirmed                                    | 8      | 22        |
| Set aside                                    | 3      | 5         |
| Appeals to His Excellency the Governor :—    |        |           |
| Confirmed                                    | —      | 3         |
| Set aside                                    | —      | —         |

#### Statement of Revenue and Expenditure.

|                            |    |       | Rs.   | c. |
|----------------------------|----|-------|-------|----|
| Balance on January 1, 1919 | .. | ..    | 2,293 | 28 |
| Receipts                   | .. | ..    | 2,453 | 77 |
|                            |    | Total | 4,747 | 5  |
| Expenditure                | .. | ..    | 2,054 | 95 |
| Balance                    | .. | ..    | 2,692 | 10 |

34. *Village Committees*.—There are fifteen Village Committees, each comprising six members, one for each Udaiyar's division, presided over by the Chief Headmen. Breaches of rules are tried by the Village Tribunal. Funds are limited.

#### IX.—WORKING OF ADMINISTRATIVE ORDINANCES.

Vehicles Ordinance : 196 licenses issued ; 38 prosecutions ; 33 convictions.  
 Firearms Ordinance : 712 licenses issued ; 35 prosecutions ; 27 convictions,  
 Game Protection Ordinance : 24 licenses issued.  
 Forest Ordinance : 22 prosecutions ; 17 convictions.  
 Dog Registration Ordinance : 1,305 dogs registered, and Rs. 160·50 was collected as tax.  
 Kandyan Marriage Ordinance : Marriages registered nil ; divorces nil.  
 General Marriage Ordinance : Marriages registered 58 ; divorces nil.

#### X.—EXCISE.

35. *Arrack*.—There are seven arrack taverns in the district. There has been a great increase in consumption, viz., 5,105 gallons for 1919, as compared with 4,382 gallons for 1918. At the Mullaitivu arrack tavern 938 gallons were consumed, as against 948 gallons during the preceding year. The arrack rent for 1919–20 fetched a sum of Rs. 34,555, as against Rs. 27,555 for the previous year—a substantial increase of Rs. 7,000.

36. *Toddy*.—There are now seven toddy taverns in the district. The Excise Advisory Committee have decided to close the tavern at Mullaitivu, and to reopen the taverns at Chillavattai and Vadduvakallu, thereby increasing the number to eight for 1920–21. The toddy rents for 1919–20 fetched a sum of Rs. 9,318, as against Rs. 9,297 for the previous year. There were eight prosecutions under the Excise Ordinance, and six prosecutions for drunkenness during 1919.

37. *Excise Advisory Committee*.—One meeting was held, most of the work being done by circulation of papers.

#### XI.—SALT.

38. 3,765 cwt. of salt were collected at Mattalan during 1919. Out of this quantity, 2,522 cwt. were transported to Tondaimanar, but the balance could not be transported before the break of the north-east monsoon owing to the late formation of salt. It is lying in bags at the seabeach ready to be transported as soon as the south-west monsoon breaks. 3,885 cwt. of salt were sold in 1919, as against 4,035 cwt. in 1918. The amount of salt transported from Jaffna to the Mullaitivu stores was 3,752 cwt. (4,000 cwt. minus 248 cwt. wastage).

#### XII.—FORESTS.

39. All proposed reserves in the district have now been declared Crown land by the Land Settlement Department. The total area of plantations now in the district amounts to 180 acres at Vavuniya and 100 acres near Vannivilankulam, 3 miles from Mankulam station. The Forest Department was engaged in supplying timber to the Public Works Department, and sleepers and firewood to the Railway Department.

#### XIII.—LAND SALES.

40. Two sales at Mullaitivu and one at Vavuniya were held, at which 95 acres of Crown land were sold, realizing Rs. 1,984·65, at an average price of Rs. 20·89 per acre.

41. One lease under the Vanni Scheme was cancelled, and eight leases are now in force. Rs. 343 was recovered for leases under this scheme.

42. One hundred and eighty-one survey applications covering 553 acres were received and dealt with.

43. Forty-nine lots covering 218 acres were leased under the new leasing system started for production of foodstuffs.

#### XIV.—PUBLIC WORKS.

44. In addition to the maintenance of the main roads in the district, the following special works were carried out :—

- (a) A cooly line on Vavuniya-Paraiyanalankulam road.
- (b) Improvements to the Mullaitivu hospital.
- (c) Urgent repairs to bridges Nos. 60 and 61 on Mullaitivu road.

The following works are in progress :—

- (a) Bridge near Kodalikkallu on Mullaitivu old trace road.
- (b) Metalling of Vavuniya-Paraiyanalankulam road.

#### XV.—MISCELLANEOUS.

45. Harvest prospects at the close of the year were very satisfactory and encouraging. Though the north-east monsoon rains were somewhat late, the rainfall at the close of the year filled almost every tank, breaching a few of them. Cultivation in manavari lands is coming up well. Good progress has been made in sowing tank lands, and good crops are expected from chenas.

46. There is a great demand for paddy from other districts. The surplus stock in the district is very limited, and export restrictions are being enforced to prevent an actual shortage in the district.

Mullaitivu Kachcheri,  
 February 21, 1920.

R. M. M. WORSLEY,  
 Assistant Government Agent.

## APPENDIX.

I.—REPORT ON THE WORKING OF THE THOROUGHFARES ORDINANCES  
IN THE MULLAITTIVU DISTRICT DURING 1919.

At the beginning of the year the Committee consisted of Mr. E. F. Marshall, Assistant Government Agent, Chairman ; Mr. M. S. Christoffelsz, District Engineer ; and Mr. S. M. K. Madukanda, Kachcheri Mudaliyar ; and there were two vacancies in the Committee.

2. In March, 1919, on the recommendation of the Chairman, Rev. Father S. J. Stanislaus, O.M.I., Parish Priest of Mullaivittu, was appointed to represent the European community, and Mr. C. Chellaiya Mudaliyar was appointed to represent the Burgher community.

3. In August, 1919, Mr. E. F. Marshall was succeeded by Mr. A. N. Strong, who was succeeded by Mr. R. M. M. Worsley as Chairman in November, 1919.

4. There were two meetings held during the year ; the rest of the work was done by the circulation of papers.

5. The improvement of Oddusuddan-Nedunkeni and Velikkulam-Mamaduru roads was continued.

6. The other roads, which are mostly natural tracks, were kept in fairly good order during the year.

7. A comparative statement is appended showing the percentage of payment of the commutation tax :—

|   | 1918. |        | Percentage<br>on Number<br>under<br>Head 2. | 1919. |        | Percentage<br>on Number<br>under<br>Head 2. |
|---|-------|--------|---|-------|--------|---|
| 1. Population of local area by last Census ..   | —     | 15,160 | —   | —     | 15,160 | —   |
| 2. Number of resident males by division<br>officers' lists reported liable to labour ..           | —     | 5,086  | —   | —     | 5,093  | —   |
| 3. Discharged obligation within local area by—  |       |        |   |       |        |   |
| (a) Paying single commutation ..  | 4,535 |        | 89.17                                       | 4,460 |        | 87.57                                       |
| (b) Paying double commutation ..  | 50    |        | .98   | 39    |        | .77   |
| (c) Labouring six days ..   | 6     |        | .12   | —     |        | —   |
| (d) Labouring twelve days ..  | 2     |        | .04   | 6     |        | .12   |
| 4. Total discharged obligation ..   |       | 4,593  | 90.31                                       |       | 4,505  | 88.46                                       |
| 5. Failed to discharge obligation within local<br>area, but otherwise accounted for as—           |       |        |   |       |        |   |
| (e) Exempted on account of age, death,<br>disqualification, or physical in-<br>ability to work .. | 209   |        | 4.11  | 268   |        | 5.26  |
| (f) Paid or laboured elsewhere ..   | 263   |        | 5.17  | 237   |        | 4.65  |
| (g) Double entries or entries by mistake ..   | 2     |        | .04   | —     |        | —   |

| 6. Total failed to discharge obligation within<br>local area ..                                   |       | 493    | 9.69  |       | 537    | 10.54                                       |
| 7. Unaccounted for ..   | —     | —      | —   | —     | 51     | 1.00  |

## 8. The receipts and expenditure of the Committee for the year 1919 were as follows :—

| REVENUE.  |  | Rs.    | c. | EXPENDITURE.   |  | Rs.    | c.       |
|---|--|--------|----|--|--|--------|----------|
| Balance on January 1, 1919 ..                       |  | 2,738  | 94 | Payment made on account of principal<br>roads and resthouses ..                |  | 2,860  | 75       |
| Commutation realized in money ..                    |  | 6,784  | 55 | Amount expended on minor works ..  |  | 4,075  | 76       |
| Commutation realized in labour ..                   |  | 18     | 0  | Establishment and commission<br>to division officers :—                        |  |        |          |
| Government contribution in aid of minor<br>works .. |  | 2,243  | 0  | (a) Contribution on account<br>Provincial Road Com-<br>mittee establishment .. |  |        |          |
| Miscellaneous receipts ..                           |  | 1,409  | 66 | (b) Cost of District Road<br>Committee establish-<br>ment ..                   |  | 1,097  | 24       |
|   |  |        |    | (c) Commission to division<br>officers ..                                      |  | 460    | 55       |
|   |  |        |    |  |  |        | 1,557 79 |
|   |  |        |    | Miscellaneous charges ..   |  |        | 404 42   |
|   |  |        |    | Balance on December 31, 1919 ..  |  | 4,295  | 43       |
| Total ..  |  | 13,194 | 15 | Total ..   |  | 13,194 | 15       |

## 9. The only market in charge of the Committee is at Tanniyuttu. A statement of receipts and expenditure on account of Market Fund is appended :—

| RECEIPTS.                       |  | Rs. | c. | PAYMENTS.                           |  | Rs. | c. |
|---------------------------------|--|-----|----|-------------------------------------|--|-----|----|
| Balance on December 31, 1918 .. |  | 249 | 55 | Maintenance of Tanniyuttu market .. |  | 18  | 99 |
| Rent of Tanniyuttu market ..    |  | 158 | 16 | Balance ..                          |  | 388 | 72 |
| Total ..                        |  | 407 | 71 | Total ..                            |  | 407 | 71 |

District Road Committee Office,  
Mullaivittu, February 21, 1920.

R. M. M. WORSLEY,  
Chairman.

## II.—REPORT ON THE WORKING OF THE MULLAITTIVU DISTRICT SANITARY BOARD DURING 1919.

The members of the Board at the beginning of the year were Mr. E. F. Marshall, Assistant Government Agent, Chairman ; Mr. M. S. Christoffelsz, District Engineer ; Dr. J. R. Jeremiah, Medical Officer ; K. U. Tampaiya Mudaliyar, District Mudaliyar ; Mr. T. M. Lebbe Marakayar.

2. In February, 1919, Rev. Father S. J. Stanislaus, O.M.I., and C. Chellaiya Mudaliyar were added to the Board as Unofficial Members.

3. Mr. E. F. Marshall left the district in August, 1919, and was succeeded by Mr. A. N. Strong. In November Mr. Strong was transferred, and his place was taken by Mr. R. M. M. Worsley.

4. Two meetings were held during the year ; the rest of the work was done by the circulation of papers.

5. Three scavenging coolies and a latrine cooly were, as usual, at work during the year.

6. The rebuilding of the Kudiyruppu bridge was not undertaken owing to want of funds. However, it is hoped that the work will be done in 1920. Application for free rails and timber has been made to Government.

7. A statement of receipts and expenditure for the year is appended :—

| RECEIPTS.                    |    | Rs.   | c. | PAYMENTS.      |    | Rs.   | c. |
|------------------------------|----|-------|----|----------------|----|-------|----|
| Balance on December 31, 1918 | .. | 768   | 16 | Administration | .. | 308   | 34 |
| Assessment tax               | .. | 712   | 34 | Sanitation     | .. | 656   | 87 |
| Licenses                     | .. | 295   | 50 | Public works   | .. | 382   | 36 |
| Road Ordinance collection    | .. | 637   | 50 | Miscellaneous  | .. | 112   | 2  |
| Market rent                  | .. | 148   | 71 | Balance        | .. | 1,117 | 12 |
| Miscellaneous                | .. | 14    | 50 |                |    |       |    |
| Total                        |    | 2,576 | 71 | Total          |    | 2,576 | 71 |

Mullaittivu Kachcheri,  
February 21, 1920.

R. M. M. WORSLEY,  
Chairman.

# EASTERN PROVINCE.

## ADMINISTRATION REPORT OF THE GOVERNMENT AGENT, EASTERN PROVINCE, FOR THE YEAR 1919.

### I.—INTRODUCTORY NOTES.

In spite of a recrudescence of influenza and pneumonia in various parts of the district during the first six months of the year, the condition of the people was, on the whole, considerably better than it was in 1918. In fact, the year 1919 will probably be looked back upon by the general population as an unusually good one. Owing to the prohibition of the export of rice and paddy, the supply in the district was ample for the needs of the people, and, in spite of various unsuccessful attempts to "corner" the market, prices were low throughout the year. The effect on the poorer people was more marked. There was little distress anywhere, save in a few hamlets in the vanams, and no relief works were necessary. Government allowed me a grant for the distribution of cloth in some of the poorer parts of Panama and Akkaraipattu, where the people had suffered much from the scourge of influenza and had been unable to earn their living.

The prohibition of the export of rice and paddy undoubtedly hit the large landowners hard, and, but for the high prices realized by the sale of copra, this prohibition would have made money uncommonly "tight"; but it was a necessary step for the general welfare of the district. At the time of writing, with the prospect of good crops in view, it seems possible that the restriction may be relaxed a little, and returns are being prepared and a scheme is being formulated for dealing with any surplus supplies.

In the beginning of the year for some months there was a serious shortage of small change, and the poorer classes found great difficulty in getting their ordinary necessities, as the boutique-keepers refused to give change. This shortage was not apparently due to hoarding, but to an inadequate supply of change in circulation. The supply was increased by the Treasurer after I had represented matters to him, and there has been no cause for complaint since.

During the year an unusual amount of damage was done by elephants. Complaints reached me from all parts of the district of destruction done to chena and paddy crops. Several people were seriously injured and three were killed. Four "rogues" were shot by Mr. K. W. S. Mitchell, Superintendent of Surveys, and there are still several other dangerous animals which have been proclaimed.

The question of extending the railway to Trincomalee and Batticaloa was again brought up during the year. There is a strong case for a railway to Trincomalee; but Batticaloa will have to wait a long time, I fear, before rails are laid in its vicinity. Batticaloa is certainly very shut off from the rest of Ceylon, and its exclusiveness was much felt during the year owing to the irregularity of the steamer service. Sometimes there was no steamer from Colombo for a month or more, and the shops ran out of nearly all supplies, such as potatoes, flour, sugar, and whisky.

During the year I suffered much from bad health, and was unable to get about the district and look into things as closely as I could wish, and was often unable even to attend office. I take this opportunity of expressing my gratitude to Mr. C. E. de Pinto, Office Assistant, and to Mr. S. R. Muttukumar, Head Clerk, on both of whom much extra responsibility and work were thrown.

Mr. C. E. de Pinto was laid up with enteric from the end of February to the beginning of May, and Mr. S. R. Muttukumar, Head Clerk, was appointed to act for him as Office Assistant.

Mr. W. K. H. Campbell, Assistant Government Agent, went home on leave in July, and was succeeded by Mr. N. Izat.

Mr. C. C. Harward, Divisional Irrigation Engineer, was transferred to Haldummulla in September, and his place was taken by Mr. B. G. Meaden.

Mr. L. R. de Lima, Irrigation Engineer, Rukam, was succeeded by Mr. G. C. Bartlett.

In November Mr. A. V. Sela, Sub-Collector of Customs, was transferred to Colombo, his place being taken by Mr. A. E. Weerasingha.

In November Mr. C. E. de Pinto, who had done two good years' very good work as Office Assistant, was sent as Police Magistrate to Avissawella, exchanging duties with Mr. M. H. Kantawala.

In December Dr. J. C. Cook, Provincial Surgeon, was succeeded by Dr. T. Ohlmus.

### *Notable Events.*

On July 2 a native schooner was wrecked off Vandaloo Point. One of the passengers was drowned, and a diver lost his life during the salvage operations.

On June 23 Germany accepted and signed unconditionally the Peace Treaty.

On July 19 Peace Day was celebrated throughout the district. In Batticaloa a record crowd attended the festivities. A most successful day, followed by a really good display of native fireworks and fire balloons, will be long remembered by the inhabitants. The Boy Scouts under the Rev. G. F. Thompson were much in evidence. The foundation stone of a memorial fountain, the generous gift of Mr. T. K. Sinnatampi of Kalladi-Uppodai, was laid.

On November 11 the anniversary of the signing of the armistice was observed by two minutes' silence.

*Obituary.*

The sad death of Sister Annie Hood, Lady Doctor attached to the Wesleyan Mission, occurred on December 5. She had worked most unsparingly among the poor of Batticaloa town and neighbouring villages. Few probably, except the poor, knew how much good work she did during her residence here.

Mr. C. M. Ponnuthurai, Vanniah, Manmunai South, died in April.

## II.—REVENUE AND EXPENDITURE.

The appended statement shows the revenue of the Eastern Province for the calendar years 1918 and 1919 :—

| Head:                        | 1918.   |    | 1919.   |    | Increase. |    | Decrease. |    |
|------------------------------|---------|----|---------|----|-----------|----|-----------|----|
|                              | Rs.     | c. | Rs.     | c. | Rs.       | c. | Rs.       | c. |
| 1. Customs ..                | 41,512  | 29 | 22,582  | 22 | —         | —  | 18,930    | 7  |
| 2. Port and Harbour ..       | 5,847   | 23 | 6,931   | 12 | 1,083     | 89 | —         | —  |
| 3. Licenses, &c. ..          | 331,661 | 20 | 355,123 | 30 | 23,462    | 10 | —         | —  |

## III.—CONDITION OF THE PEOPLE.

*Agriculture and Industries.*

On the whole, the condition of the people was prosperous, and, owing to a more ample food supply than they generally enjoy, their general appearance was much healthier. This was especially noticeable at the beginning of 1920, when claimants for exemption from road tax were examined. There was not half the number of destitute, ill-nourished people that one generally sees on these occasions. But parangi still continues to be bad. More hospitals are needed, and I have addressed Government on the subject. There are only three hospitals in the district, with a total of 144 beds, among an estimated population of 153,933 persons. This in some districts might be ample; but here, where parangi and fever are so rife, and means of communication, especially in wet weather, so bad, more hospitals and dispensaries are necessary. These hospitals need not be of a permanent type. Half-walled cadjan-roofed buildings of the pattern at the Leper Asylum, Kalmunai, would probably prove sufficient. After some years it is to be hoped that parangi at least may be considerably reduced roundabout the centres where these new hospitals are to be built, and the hospitals can be moved to other centres.

With regard to agriculture, there is little to add to the report I made last year. Improved methods of paddy cultivation have been undertaken by the Ratamahatmaya of Bintenna, by Mr. Lionel Tisseveerasinghe in Batticaloa, by Mr. Canapathipillai Udaiyar at Illuppadichenai, and under Vakaneri tank by Mr. Coomaraswamy. Mr. Lionel Tisseveerasinghe transplanted his paddy, but I have no details as to the success of his operations.

A large quantity of vegetable seeds was distributed throughout the district through the headmen, and some impetus has been given to the cultivation of vegetable gardens. The newly appointed Agricultural Inspector, Mr. N. Thampiah, has done much useful work during the short time he has been in the district, and in several parts the results of his advice, instruction, and encouragement were very noticeable.

With regard to coconuts, the crops were largely affected by the drought of 1918, and the scanty rain of 1919 did little to improve the condition of the trees. A few miles north of Batticaloa the caterpillar pest showed signs of considerable increase, and the Plant Pests Board consulted the Director of Agriculture on the advisability of having this caterpillar declared a pest under the Ordinance, but the Director was not in favour of it.

As regards industries, there is little to report. Locally-made cloth commands a good market in the district, as well as in Galle, Badulla, and a few other places. The cloth is very strong and lasting, and if better dyes could be obtained for the thread, there ought to be ready sales throughout Ceylon when the cloth once becomes known.

## IV.—IRRIGATION.

I am indebted to Mr. B. G. Meaden, Divisional Irrigation Engineer, for the following report on major works :—

The following surveys were completed during 1919 :—

Pattipolai-aru specification survey.

Irakkamam contour survey.

Amparai contour survey.

The special surveys noted below were carried out :—

Vammiyadi tank contour survey.

Sakamam tank contour survey.

Survey of Sakamam land east of Akkaraipattu-Sakamam road.

Lahugala tank contour survey.

*Minor Surveys.*

The following minor surveys were carried out during the year :—

Survey of channels under Rotawewa tank and Lahugala tank.

Survey of proposed Periyavisarai vaikal, from Virayadi anicut to Periyavisarai kandan, under upper and lower anicuts.

Contour levels at Kiliveddi kandan under Amparai tank.

Survey of channels from Irakkamam tank to Akkaraipattu.

Survey for connecting Sakamam scheme levels with Pattipolai-aru scheme datum.

Survey for demarcating boundaries of cultivating kandan, Unnichchai scheme.

Survey of the sites of spills for the left bank channel, Unnichchai scheme.

*Construction.*

*Unnichchai Scheme.*—The right bank spill protection works were completed.

*Left Bank Channel.*—Three spillways were constructed at a cost of Rs. 880·97.

*Rukam Scheme, Kidavakkipallam Anicut.*—The wooden beams and struts were replaced by reinforced ones at a cost of Rs. 326·53.

*Panama Tank.*—Minor improvements to the sluice and inlet channel were carried out. The expenditure was Rs. 514·73.

*Kadukkamunai Tank.*—The construction of a drop wall to the tank spill was commenced in September, and the work was completed in November, 1919. During the financial year ending September 30, 1919, materials were collected, and the excavation of earth and boulders was begun. Only Rs. 350·53 was spent during the financial year. Distribution sluice No. 6 on the channel below Kadukkamunai tank was rebuilt during the year. The expenditure was Rs. 282·37.

*Divulana Tank.*—Repairs to the bund were effected at a cost of Rs. 99·90.

*Fine Fund Expenditure.*

*Tumpankeni Tank.*—The raising of the tank spill was completed during the year. The expenditure was Rs. 933·15.

Blasting rock in channel to Kiliveddi kadam of Pattipolai-aru scheme was completed at a cost of Rs. 118·89.

*Special Maintenance.*

*Unnichchai Left Bank Channel.*—Three breaches in the channel bund have been repaired.

*Rukam Tank.*—About  $\frac{1}{2}$  mile of the upstream side of the tank bund has been damaged by wave action. Earthwork and rubble repairs are necessary. The work is now proceeding. During November few cubes of earthwork were done. The work was stopped in December owing to heavy rains.

*Tempittiya Tank.*—Two leaks in the spill masonry were repaired.

*Pullumalai Tank.*—Repairs were made to a defect in the foundation of the spill wall.

*General Maintenance.*

The usual maintenance of irrigation works and roads was carried out, but efforts were made to effect an improvement in the general state of the works. Improvements in the way of clearing jungle from reservations were made in the Urakai channel at Sakamam, Vilattipiddi inlet channel, and Irakkamam inlet channel. The sluice at Kaliadai anicut was overhauled. The Panama-Nawulla trace was re-cleared and improved. The roads on Vilattipiddi and Rottai tank bunds were made fit for cart or motor traffic. The service road to Rottai tank was widened and gravelled.

*Cultivation.*

(a) The total area of land sown and reaped under the major irrigation works was 49,088 acres, as against 45,277 acres sown and 43,610 acres reaped in 1918. The cultivating season has been a dry one, but the crops, on the whole, have been good. Certain high lands under Sagamam suffered slightly from shortage of water towards the end of the cultivation. The figures obtainable for yield are unreliable; they vary from 8-fold to 20-fold.

(b) The preparation of very valuable control and issue reports by the writer's predecessor, Mr. C. C. Harward, Divisional Irrigation Engineer, was completed during the year for the following schemes:—Pattipolai-aru (seven parts), Divulana, Tumpankeni, Chadayantalawa, Vakaneri, Rukam, Manalpiddi-aru, and Sakamam.

(c) Pattipolai-aru specification survey was completed during the year, and a draft specification has been compiled.

With regard to minor works, there is little new to report. The most important work undertaken during the year was a dam across the Tili-aru, near the ferry crossing. Under the instruction of the Irrigation Inspector and the energetic co-operation of Mr. Kandapodi, Irrigation Vanniah, some 2,000 cubes or more of earthwork were put into this dam. The work was well stamped and sloped, but owing to the want of a proper waste water weir the dam breached in December. The Divisional Irrigation Engineer is now drawing up a scheme for protecting this dam in future from floods, and I have promised the people, who deserve all encouragement, to give a grant from Irrigation Fine Fund as soon as the scheme is prepared.

In some parts the maintenance of village tanks was quite satisfactory; but, as a rule, it is very difficult to get the people to turf their earthwork when it is completed. The result is that with the first heavy rains the bunds are badly washed and a very large part of the earthwork is wasted. Many of the people seem to regard this annual earthwork as a mere imposition put on them by Government, for which there is no reason, except that it is the will of Government. I have seen them over and over again allowing cattle to wander over the freshly made up bunds and to destroy their work without making any attempt to drive off the cattle or to proceed against the owners.

## V.—LAND SALES, SETTLEMENTS, AND FOREST ADMINISTRATION.

Permits for 1,234 acres of land for chena cultivation were issued on payment of rent and 1,696 acres of rent free applications, confined to the poorer parts of the district, were allowed, making in all a total of 2,930 acres, as against 2,713 in 1918. These chenas are, as a rule, very badly cultivated, and very badly fenced. No effort appears to be made to keep off wild animals, and the people do not get a quarter of the crops they might obtain with very little increased labour.

Nine sales were held during the year, and 78 acres 2 roods 19½ perches were sold under the waste lands conditions for Rs. 3,709·15 at an average of Rs. 47·18 per acre, as compared with Rs. 23·27 per acre during 1918. The rise in the average price is due to competition in the case of a few lots suitable for coconut plantation. An extent of 24 acres 1 rood 29 perches was settled at half-improved value for Rs. 426·40, and certificates of quiet possession were issued for 28 acres 2 roods 33 perches. One lot of 18·56 perches was leased on a ticket of occupancy for dwelling purposes.

No lands have been leased in perpetuity according to the proposed lease scheme. The people of this district are not favourably disposed towards the proposal.

In view of the restrictions of sale outright of Crown lands, it was not possible to bring forward for sale many small lots which were surveyed before the leasing proposals were introduced. But since the Government Agents were given the discretionary power to sell outright lots under 10 acres, an attempt is being made to bring up for sale all landmarked lots for which there are applicants. It is expected to dispose of several lots during the first half of 1920.

So far there have been only three applications under the "Increased Food Production" Circular for lands under the major tanks. Possibly there would have been more had the water-rates for lands under Unnichohai and Vakaneri tanks not been so high.

The Lahugala settlement under special conditions is progressing quite steadily under the guidance of the Vanniah of Panama pattu, who is taking a keen interest in the matter.

The Tempitiya settlement has proved a failure, and steps are being taken to offer the lands under that tank to the public.

An extent of 3,551 acres 3 roods 30 perches was leased on annual permits during the year under review, and the total amount realized as rent on the above is Rs. 5,572·84.

#### Details of Lands leased on Permits.

|   | A.    | R. | P. |
|---|-------|----|----|
| For paddy cultivation (irrigable under major tanks) | 1,815 | 2  | 29 |
| Do. (unirrigable)                                   | 1,526 | 1  | 20 |
| For tobacco cultivation                             | 62    | 0  | 39 |
| Other purposes                                      | 147   | 2  | 22 |
| Total   | 3,551 | 3  | 30 |

#### Forest Administration.

The Assistant Conservator of Forests, Batticaloa Division, reports as follows:—

*Changes.*—Mr. A. B. Fontyn, Assistant Conservator of Forests, continued to be in charge of the division throughout the year.

*Forest Area.*—There has been no alteration of areas. The following were the estimated areas of the different classes of forest on December 31, 1919:—

|                         | Acres.    | Square Miles. |
|-------------------------|-----------|---------------|
| (a) Reserved forest     | 98,861    | 154·47        |
| (b) Proposed reserves   | 583,250   | 911·33        |
| (c) Other Crown forests | 1,076,131 | 1,681·45      |
|                         | 1,758,242 | 2,747·25      |

*Demarcation.*—The following works were carried out at a total cost of Rs. 494·75:—

In Koralai proposed reserve 700 chains of boundary lines were re-cleared.

In Baron's Cap proposed reserve 400 chains of boundary lines were re-cleared.

In Kumbukkan proposed reserve 320 chains of boundary lines were re-cleared.

In Chundankadu proposed reserve 135 chains of boundary lines were re-cleared.

In Panama proposed reserve ten boundary pillars were re-erected.

*Plantations.*—The area of plantations in charge of this Department at December 31, 1919, was 2,415 acres and 37 perches, including 125 acres 3 roods taken over from chena cultivators during the year.

The expenditure on the plantations amounted to Rs. 1,171·75, and the following works were carried out during the year:—

(a) Weeding, clearing jungle, and supplying vacancies over 64 acres.

(b) Thinning 3,458 teak; pruning 221,714 teak and margosa, and coppicing 25,054 teak over 626 acres.

(c) Collection and distribution of seeds cost Rs. 112·63.

#### Chena Plantations.

|   | A.    | R. | P. |
|---|-------|----|----|
| (a) Area taken over and in charge of the Department | 2,415 | 0  | 37 |
| (b) Surveyed area in the hands of the cultivators   | 741   | 0  | 8  |
| (c) Unsurveyed area                                 | 362   | 0  | 0  |
| (d) Area granted during 1919:—                      |       |    |    |
| (1) On security                                     | 212   | 0  | 0  |
| (2) Without security                                | 201   | 0  | 0  |
|   | 413   | 0  | 0  |
| Total   | 3,931 | 1  | 5  |

The expenditure on plantations during the year amounted to Rs. 1,284·38, and receipts amounted to Rs. 10, being value of thirty rejected teak poles. The amount of chena rent recovered and credited to revenue during 1919 was Rs. 806.

#### Operations for the Improvement of growing Stock.

*In the Kanthalai Reserve.*—The planted strips in Kanthalai reserve were weeded at a cost of Rs. 4·50.

#### Protection of Forests.

(i.) *Prosecutions.*—There were 67 cases for disposal during the year, including 3 cases brought forward from 1918. 46 cases resulted in conviction, 12 in acquittal, 4 withdrawn, and 5 were pending at the close of the year.

(ii.) *Compositions.*—76 cases were compounded during the year, of which 41 were for unauthorized felling and removal. The total amount of compensation recovered was Rs. 472·82.

(iii.) *Free Grants.*—Free grants of timber and other forest produce were made during the year as follows:—

|                                  | Rs. | c. |                          | Rs.    | c. |
|----------------------------------|-----|----|--------------------------|--------|----|
| To the District Road Committee   | 301 | 75 | To the villagers         | 1,612  | 73 |
| To the District School Committee | 104 | 48 | To the paddy cultivators | 31,551 | 60 |
| To the Village Tribunal Courts   | 29  | 16 | For bonfire              | 93     | 0  |
| To the Irrigation Department     | 6   | 45 |                          |        |    |
| To the Survey Department         | 32  | 50 | Total                    | 33,837 | 11 |
| To the Forest Department         | 105 | 50 |                          |        |    |

*Revenue.*

The revenue of the financial year 1918-19 consisted of the following items:—

|  | Rs.    | c. |
|--|--------|----|
| Cash credited (including Central Timber Depot revenue)         | 36,743 | 60 |
| Paper credit for value of timber issued from dépôts            | 3,002  | 48 |
| Paper credit for royalty on supplies to Government Departments | 44,605 | 51 |
| Estimated value of timber on lands sold or leased              | 293    | 96 |
| Total  | 84,645 | 55 |

*Expenditure.*

The total expenditure during 1918-19 amounted to Rs. 40,788 74. During the year 1919 Government Departments were supplied with the following timber from the Batticaloa Division:—

|   | Cubic Yards. | Cubic Feet. | Rs.     | c. |
|---|--------------|-------------|---------|----|
| <b>Railway Department:—</b>                               |              |             |         |    |
| 7,457 broad gauge sleepers                                | —            | 22,371      | 50,933  | 29 |
| 4,100 narrow gauge sleepers                               | —            | 6,150       | 15,719  | 0  |
| Timber  | —            | 8,242       | 15,770  | 29 |
| <b>Public Works Department:—</b>                          |              |             |         |    |
| Timber, round   | —            | 13,540      | 18,869  | 80 |
| Timber, sawn  | —            | 2,438       | 5,235   | 26 |
| Firewood  | 451          | —           | 270     | 60 |
| Creepers: 6 pingo loads                                   | —            | —           | 0       | 60 |
| <b>Harbour Works Department: Timber</b>                   | —            | 2,979       | 5,736   | 6  |
| <b>Postal Department: Telegraph posts</b>                 | —            | 339         | 661     | 0  |
| <b>Colonial Storekeeper: Timber</b>                       | —            | 29          | 57      | 4  |
| <b>Irrigation Department:—</b>                            |              |             |         |    |
| Timber  | —            | 82          | 27      | 80 |
| Firewood  | 75           | —           | 165     | 0  |
| <b>Forest Department, Batticaloa</b>                      | —            | 40          | 56      | 0  |
| <b>Forest Department, Jaffna:—</b>                        |              |             |         |    |
| Timber  | —            | 634         | 1,419   | 69 |
| Scantlings  | —            | 1,183       | 2,482   | 43 |
| <b>Prisons Department:—</b>                               |              |             |         |    |
| Timber  | —            | 1,375       | 3,553   | 72 |
| Supply of timber from Central Timber Depot for exhibition | —            | 2           | 12      | 20 |
| <b>Total</b>  |              |             |         |    |
| Timber, cubic feet  |              | 59,404      | 120,533 | 58 |
| Firewood, cubic yards                                     |              | 826         | 435     | 60 |
| Creepers, pingo loads                                     |              | 6           | 0       | 60 |
|   |              |             | 120,969 | 78 |

## VI.—CRIME, POLICE, AND HEADMEN.

The total number of cases of serious crime reported to court by the police and headmen during the year was 265, as against 285 in the previous year. Of these cases, 159 were judged by the court to be true cases, and in 59 of them convictions were obtained. This is a satisfactory percentage, but the figures are really more flattering than the circumstances justify. There were six cases of homicide—a most unusual number, for which no reason can be assigned. In one of these cases the accused is still at large; in another the evidence was found insufficient for a committal; and in a third the accused, who was committed for trial before the Supreme Court at Jaffna, managed to effect his escape from the custody of the Fiscal's peons who were conducting him to the jail at night from the railway station. But for these blemishes the record is a satisfactory one. Both police and headmen have, on the whole, done their work well, and there has been generally a decrease of serious crime in the district, except in Eravur korale and town. The increase of crime here has been so steady since the punitive police were removed in 1913 that I have been obliged to recommend the re-establishment of a Police Force there.

Chief Inspector Phillippiah continued in charge of the Force at Batticaloa, the sanctioned strength of which is 1 Inspector, 4 sergeants, and 31 constables. The Force requires strengthening, and I am applying for more men, as there is a considerable amount of work outside the town to be done. The discipline of the men was good, and they were always smart on parade. In the matter of minor offences with regard to road regulations, stray cattle, disorderly conduct, &c., 443 cases were instituted by the police, and convictions obtained in 409. Fourteen cases are pending, and 4 were withdrawn. Such a return speaks well for the force.

A very plucky arrest was effected by Police Constable 2472, M. K. A. Joseph, who was called to arrest a jealous husband who had stabbed his wife. The man was in a very excited state and had a knife in his hand, and but for the prompt arrival of the constable and his firm action would probably have stabbed several other people as well.

The Manual of Instructions for the use of Headmen published during the year has supplied a long-felt want. Hitherto the minor headmen have had no written guide as to their duties (the previously issued instructions being long ago quite out of date), and they have had to learn their multifarious duties from casual instructions given on circuit, and it was quite impossible for a newly-appointed headman to know what he ought to do in all circumstances. I have tried as far as possible when issuing Acts, and on other occasions, to instruct the headmen on the most important parts of their work, but some matters naturally were forgotten. Now with this manual, which is translated into easy Tamil and Sinhalese, a headman should have no excuse for not knowing what his duty is.

The two Village Tribunals continue to do very good work; and it reflects much credit on the Presidents that out of 6,932 cases instituted during the year in Batticaloa North and 5,628 cases in Batticaloa South, only 15 cases were pending in Batticaloa North and 4 cases in Batticaloa South at the close of the year. There were 27 appeals taken during the year, and in all cases, except one, the judgment of the Presidents were affirmed by me.

In Bintenna pattu, where the Ratamahatmaya sits as President, 65 cases out of 75 institutions were disposed of. Of these, 53 cases were criminal, as against a total of 78 in 1918. In Batticaloa South the number of civil and criminal cases was about even. In Batticaloa North the civil cases outnumbered the criminal by four to three.

There were 193 habitual criminals on the district register. 211 convicted prisoners were admitted to jail, 6 of these were road tax defaulters.

#### VII.—EDUCATION.

A new school at Oluvil was built by the District School Committee, and estimates for two new schools at Eravur and Kattankudi have been passed. The Gonagolla school, a temporary experiment, was closed for want of support.

Quarters for assistant teachers were erected at Oddaimavadi, Kattankudi, and Addalaichenai.

The total cost of works carried out by the District School Committee under the supervision of the Superintendent of Minor Roads amounted to Rs. 5,177.77.

The Wesleyan Mission extended its work in connection with vernacular education in the southern part of the district by replacing their temporary buildings at Kovilporativu, Pandiruppu, Sayintamarutu, Nintavur, Sammanturai, Akkaraipattu, Komari, and Pottuvil by permanent buildings, and permanent additions were made to the schools at Periyakallar and Kalmunai. Good progress was also made with school gardens, of which there are now sixteen, where two years ago there was only three.

The Scout Movement, which was begun in 1918, continued during 1919. There are now 126 Boy Scouts in the district.

The war and the rate of exchange crippled the resources of the Missionary Societies, who have hitherto done so much for education in this district; and it is greatly to their credit that they have been able to carry on their good work so successfully.

#### VIII.—PUBLIC WORKS.

The roads in charge of the Public Works Department in the district were maintained in very good order throughout the year, and much credit is due to the officers responsible for their upkeep.

Special mention may be made of the Badulla road, the condition of which was deplorable not very long ago. The road, in spite of its narrowness, which compels the motor bus in many places to follow the same track, stood the traffic well; and even during the dry months, when the surface is generally very much cut up, it was uniformly sound; and tyre troubles were an exception instead of being the rule.

Of works required, the most important, apart from more hospitals and dispensaries, to which reference has already been made, are:—

- (1) Quarters for the Divisional Irrigation Engineer and Provincial Surgeon.
- (2) The extension and improvement of the Customs buildings. Estimate has been framed, but the work was not sanctioned.
- (3) Removal of the dhobies' quarters, now situated on the esplanade in the best residential part of the town, to a site selected in Koddaimunai. This suggestion, which has already had the sympathetic consideration of Government, has not been put into effect owing to want of funds.
- (4) Improvement of the Lakeshore road, from Koddaimunai bridge to its junction with the Bar road. This road is one of the few amenities of the town, and makes a nice drive; but erosion by the lagoon has so damaged it that the Board cannot longer afford to keep it in proper order. An estimate has been framed, and it is hoped that Government will vote the money, if not in a lump, to be spread over a certain number of years.
- (5) An up-to-date steam or oil-driven ferryboat across the lagoon at Kallodai ferry.

Of works carried out and in the course of construction in the district during the year, Mr. W. R. W. Morgan, Provincial Engineer, reports as follows:—

1. *Leper Asylum, Batticaloa.*—This work, consisting of various buildings for a leper asylum, is nearing completion. The main buildings, including hospital of two wards for males and females of thirty beds, administrative block, with kitchen and outhouses, is completed; also nuns' quarters for six nuns and Mother Superior, including storeroom, sitting room, chapel, bath, and earth closet, and kitchen and servants' quarters, are ready for occupation. Three blocks of single women's quarters for fifty beds, Medical Officer's quarters, apothecary's and steward's quarters, overseer's quarters, male and female attendants' quarters, with kitchen and bath and earth closet, laundry, and cells, mortuary, with chapel and cart shed, are all completed. In addition, the entire drainage scheme is practically completed. Of the sixty cottages it was originally proposed to construct, one has been built and approved by the Principal Civil Medical Officer; seventeen more are to be constructed on the present estimate, and work on these is in hand. The scheme for the water service has been thoroughly examined and settled on and pipes have been ordered, and it is expected this part of the work will shortly be in hand.

2. *Dispensary, Kattankudi.*—This work, consisting of Medical Officer's quarters, apothecary's quarters, and dispensary, coach room, &c., have been undertaken and completed during the year.

3. *Providing Flood Outlet at Maha-oya.*—This work, consisting of a bridge 120 feet in length, was completed during the year.

4. *Water Supply to Government Buildings, Batticaloa.*—This work is for laying water service pipes for all Government buildings in Batticaloa. Work in progress.

5. *Widening Bar Road, Batticaloa.*—Work completed during the year.

6. *Improvement, North Coast Road.*—The improvement of the Batticaloa-Trincomalee road is in hand, and 6 miles of the gravel section between 22 and 28 miles are being converted into a metal road, and the platform is being widened and timber bridges converted into iron structures. It is to be hoped that this work will be continued and extended to Muttur.

7. *Improvements to Karativu-Sammanturai and Irrakkamam Road.*—This work is for building a causeway 700 feet long. Work in hand.

## IX.—MISCELLANEOUS.

## Rainfall.

|                            |              |
|----------------------------|--------------|
| 1919                       | 53·73 inches |
| Average for past ten years | 71·39 inches |

## Dog Licenses, &amp;c.

|                                |       |                                |      |
|--------------------------------|-------|--------------------------------|------|
| Number of dogs destroyed       | 31    | Number of cart licenses issued | 959  |
| Number of dogs licensed        | 1,570 | Number of gun licenses issued  | 105* |
| Number of game licenses issued | 43    |                                |      |

\* Of which 64 were "cheap" licenses.

*The Motor Boat Service* in the lagoon, which had been managed by Mr. Green for the past twelve years, was sold by him to Mr. A. Suppramaniam. Government continued to give a subsidy.

*Customs.*—There was very little oversea trade, and the coastwise trade showed considerable decrease. This is due to the effects of the war. The total number of arrivals was 144, against 172 in 1918.

*Motor Mail Services.*—This has run uninterruptedly during the year. The time lost during the year October 1, 1918, to September 30, 1919, was 45·9 minutes per 1,000 miles—a very satisfactory record.

## Village Committees.

Besides the usual upkeep and repairs of village courts, ambalams, and roads, the following new works were undertaken during 1919 :—

|  | Rs.   | c. |
|--|-------|----|
| <i>Manmunai North.</i>   |       |    |
| (1) Bridge 9 feet span across an odai on the field, road between Kannankuda and Kurinchamunai junction | 565   | 0  |
| <i>Eravur korale.</i>  |       |    |
| (2) Extending the gravelling of the sandy lane from Oddamavadi to Miravodai by 465 feet                | 268   | 0  |
| (3) For reopening a path leading to Kiran ferry  | 150   | 0  |
| <i>Karavaku.</i>   |       |    |
| (4) Extending the gravelling of Maruttamunai lane by 900 feet  | 462   | 0  |
| (5) Extending the gravelling of Sayintamarutu boundary minor road by 800 feet                          | 460   | 0  |
| (6) Gravelling sandy lane in Sayintamarutu village by 800 feet   | 563   | 0  |
| <i>Akkaraipattu.</i>   |       |    |
| (7) Extending the gravelling of the sandy lane in Karunkoddittivu by 1,400 feet                        | 631   | 0  |
| <i>Panama.</i>   |       |    |
| (8) Well at Lahugalla  | 280   | 0  |
| Total  | 3,379 | 0  |

A well was sunk at Hagama in Bintenna pattu from the vote allowed by Government. The amount voted was Rs. 300.

Batticaloa Kachcheri,  
January 28, 1920.

R. A. G. FESTING,  
Government Agent.

## APPENDIX.

## I.—REPORT OF THE CHAIRMAN, LOCAL BOARD, BATTICALOA, FOR 1919.

Area of Local Board, 4½ square miles; Population, 10,666 (Census of 1911).

A COMPARATIVE statement of revenue and expenditure for the years 1918 and 1919 is appended :—

|                                     | REVENUE. |        |         |           |       |    |       |           |
|-------------------------------------|----------|--------|---------|-----------|-------|----|-------|-----------|
|                                     | 1918.    |        | 1919.   |           | 1918. |    | 1919. |           |
|                                     | Amount.  | Total. | Amount. | Total.    | Rs.   | c. | Rs.   | c.        |
| Taxes :—                            | Rs.      | c.     | Rs.     | c.        | Rs.   | c. | Rs.   | c.        |

| Total ..                              |                   | 35,327 59        |                   | 29,403 75        |

2. The fall of revenue is chiefly due to the loss of water-rate, which is now credited to Government, as the waterworks have been handed back to the Public Works Department. The increase of expenditure under "Revenue Services" is on account of refunding to Government a sum of Rs. 1,243.66, being water-rate already credited to the funds of the Board.

3. The following were the principal works undertaken during the year :—

- (a) Metalling Bazaar street.
- (b) Sinking a well at the night soil depôt.
- (c) Building a cistern and a platform at the night soil depôt.
- (d) Improvements to market boutiques.
- (e) Rebuilding a culvert in Old Station road.
- (f) Constructing a culvert in Avulia lane.

4. *Debt.*—The Board is now free from debt. The loan of Rs. 20,000 raised in 1891 has been extinguished during the year.

5. *Public Health.*—The general health was fairly satisfactory. There was a recrudescence of the influenza epidemic in April, which necessitated the employment of a special officer for the work. The epidemic did not last long, and passed away without much loss of life. The following is a comparative statement of the number of births and deaths in town :—

|           | 1918. | 1919. |
|-----------|-------|-------|
| Births .. | 412   | 527   |
| Deaths .. | 454   | 560   |

6. *Public Works.*—All roads, streets, bridges, culverts, and buildings in charge of the Board were maintained in good order. The Central road was metalled at a cost of Rs. 290.

7. *Scavenging.*—The work of scavenging the roads, drains, and public grounds, which is done on contract, was satisfactorily carried out. A rubbish cart was purchased from Madras at a cost of Rs. 180.

8. *Lighting.*—The street lamps were maintained in fair order, but the lighting was not very satisfactory. Two new lamps were purchased at a cost of Rs. 160 and erected in Covington's street and Old Resthouse road.

9. *Education.*—The Town Schools Ordinance was brought into operation within the limits of the Board during the year. By-laws were passed under the Ordinance, and an attendance officer has been appointed to enforce them.

10. *Town Survey.*—The town survey is still in progress. When this is completed, the Board will have seriously to consider the question of town drainage and road widening.

11. *Dogs.*—A comparative statement of the number of dogs registered and destroyed is annexed :—

| Year.   | Registered. | Destroyed. |
|---------|-------------|------------|
| 1918 .. | 292         | 140        |
| 1919 .. | 322         | 141        |

12. *Election.*—The biennial election of unofficial members for the years 1920 and 1921 resulted in the re-election of the sitting members without opposition.

13. *Constitution of Board.*—The Board was constituted as follows at the end of the year :—Mr. R. A. G. Festing, Government Agent, Eastern Province, Chairman ; Mr. W. R. W. Morgan, Provincial Engineer ; Dr. J. C. Cooke, who was succeeded by Dr. T. Ohlmus, Provincial Surgeon ; and Mr. S. F. Nagapper, Mr. J. T. Tambyraja, and Mr. L. F. Tisseveerasinghe (elected members).

14. The following is a comparative statement showing the working of the Thoroughfares Ordinance for the year 1918 and 1919. The percentage of those who discharged their liability was 87·56, against 86·68 of the previous year :—

|   | 1918. |        | Percentage<br>on Number<br>under<br>Head 2. | 1919. |        | Percentage<br>on Number<br>under<br>Head 2. |
|---|-------|--------|---|-------|--------|---|

Local Board Office,  
Batticaloa, January 23, 1920.

R. A. G. FESTING,  
Chairman.

## II.—REPORT OF THE CHAIRMAN, PROVINCIAL ROAD COMMITTEE, EASTERN PROVINCE, FOR 1919.

THE Provincial Road Committee consisted of the following members :—Mr. R. A. G. Festing, Government Agent, Chairman; Mr. W. R. W. Morgan, Provincial Engineer; Mr. C. Harward, Divisional Irrigation Engineer (succeeded by Mr. B. G. Meaden); and Messrs. J. Kadramatamby, J. T. Tamby Rajah, and C. Muttiah. During 1919 two meetings were held, and the rest of the work was done by circulation of papers.

2. The resthouses in the Province were maintained in good order. A new resthouse is urgently wanted at Trincomalee. Plans and estimates are being prepared by the Public Works Department, and it is hoped that Government will come to the assistance of the Committee with a grant or loan for the purpose. Trincomalee is yearly becoming more popular as a place to visit; and the present resthouse, which is very dilapidated, is much too small to meet the requirements of visitors. If Arugam Bay is to be opened as a port, a new resthouse will then be required there; and the resthouse at Tirukovil, which is in danger of being washed away by the sea, and is in a very bad state of repair, should be replaced as soon as funds permit.

3. The Committee as usual exercised control over the District Road Committee's estimates.

4. No election was held during the year. The next election falls due in December, 1920. Licenses were issued for the seizure of stray cattle on public thoroughfares, but the nuisance is still continuing to a considerable extent. No encroachments were reported during the year.

5. There are no estate or branch roads in this Province.

6. The usual statement of receipts and expenditure of the Provincial Road Committee, Eastern Province, is annexed, together with a report from the Chairman, District Road Committee, Batticaloa :—

| REVENUE.  |        | Rs.    | c. |
|---|--------|--------|----|
| Balance on January 1, 1919 ..   |        | 11,961 | 85 |
| Amount received from District Road Committees on account of two-thirds commutation for principal roads, resthouses, &c.) :— |        |        |    |
| (a) From Batticaloa District Road Committee ..  | Rs. c. | 16,956 | 50 |
| (b) From Trincomalee District Road Committee ..   |        | 3,586  | 50 |
|   |        | 20,543 | 0  |
| Government grant in aid of minor works ..   |        | 7,336  | 0  |
| Resthouse collections :—  | Rs. c. |        |    |
| (a) From Batticaloa District Road Committee ..  |        | 1,844  | 29 |
| (b) From Trincomalee District Road Committee ..   |        | 1,768  | 93 |
|   |        | 3,613  | 22 |
| Miscellaneous receipts ..   |        | 1,315  | 81 |
|   |        | 44,769 | 88 |

## EXPENDITURE.

Payments made from two-thirds commutation during the year under the provisions of Ordinances Nos. 10 of 1861, 31 of 1884, and 10 of 1902, on account of—

|   |    | Rs.    | c. |
|---|----|--------|----|
| (a) Principal roads .. .. .                         | .. | 15,396 | 0  |

| 7. Unaccounted for ..  | —      | 720     | 2.76                               | —      | 249     | .95                                |

### Statement of Receipts and Expenditure for the Year 1919.

|  | REVENUE. | Rs.    | c. |
|--|----------|--------|----|
| Balance on January 1, 1919 .. .. .               | ..       | 2,886  | 82 |
| Commutation realized in money .. .. .            | ..       | 34,927 | 0  |
| Government contribution in aid of minor works .. | ..       | 6,328  | 0  |
| Miscellaneous receipts .. .. .                   | ..       | 661    | 74 |
|  |          |        |    |
| Total .. .. .                                    |          | 44,803 | 56 |

| EXPENDITURE.   | Rs.    | c. |
|--|--------|----|
| Payment made on account of principal roads and resthouses .. | 16,956 | 50 |
| Amount expended on minor works ..                            | 10,943 | 85 |
| Establishment and commission to division officers:—          |        |    |
| Cost of District Road Committee establishment ..             | 7,135  | 51 |
| Commission to division officers ..                           | 3,705  | 38 |
| Miscellaneous charges ..                                     | 643    | 0  |
| Balance on December 31, 1919 ..                              | 5,419  | 32 |
| Total ..   | 44,803 | 56 |

3. During 1919 two meetings of this Committee were held. The total number of persons who discharged their obligation under the Ordinance is 22,877, as against 23,133 in 1918, showing a decrease of 256.

4. About 192 miles of minor roads (including repairs to culverts and bridges) were maintained in good order. The expenditure of Rs. 10,943·85 on minor works was composed of the following items:—

|                                       | Rs.    | c. |
|---------------------------------------|--------|----|
| (1) Maintenance annually recurrent .. | 7,367  | 83 |
| (2) New works ..                      | 2,247  | 0  |
| (3) Upkeep of ferries ..              | 1,141  | 75 |
| (4) Tools ..                          | 187    | 27 |
| Total ..                              | 10,943 | 85 |

The sum referred to in item (2) was spent by improving and extending the gravelling of the following roads, viz.:—

- (a) Extending the gravelling of Manmunai-Puluganawa road by half a mile.
- (b) Gravelling one mile of the road from Vellaveli junction towards Tumpankeni.
- (c) Completing the track metalling of 5th milepost, South Coast road to Manmunai ferry.

The ferries on minor roads were maintained satisfactorily. Two new vallams were supplied. The annual Government grant of Rs. 3,193 was spent on minor roads.

Batticaloa, January 28, 1920.

R. A. G. FESTING,  
Chairman.

#### IV.—REPORT OF THE CHAIRMAN, SANITARY BOARD, BATTICALOA, FOR 1919.

THERE are four towns under the control of the Sanitary Board:—Kalmunai, Kattankudi, Eravur, and Sammanturai.

2. A comparative statement showing the working of the Thoroughfares Ordinance is annexed:—

|  | 1918. |        | Percentage on Number under Head 2. | 1919. |        | Percentage on Number under Head 2. |
|--|-------|--------|------------------------------------|-------|--------|------------------------------------|
| 1. Population of local area by last Census ..  | —     | 30,433 | —                                  | —     | 30,433 | —                                  |
| 2. Number of resident males by the division officers' lists reported liable to labour .. | —     | 8,077  | —                                  | —     | 7,993  | —                                  |
| 3. Discharged obligation within local area by—   |       |        |                                    |       |        |                                    |
| (a) Paying single commutation ..   | 7,028 |        | 87·01                              | 6,890 |        | 86·20                              |
| (b) Paying double commutation ..   | 105   |        | 1·29                               | 138   |        | 1·72                               |
| (c) Labouring six days ..  | —     |        | —                                  | —     |        | —                                  |
| (d) Labouring twelve days ..   | —     |        | —                                  | —     |        | —                                  |
| 4. Total discharged obligation ..  |       | 7,133  | 88·31                              |       | 7,028  | 87·92                              |
| 5. Failed to discharge obligation within local area, but otherwise accounted for as—     |       |        |                                    |       |        |                                    |

| 6. Total failed to discharge obligation within local area ..                             |       | 811    | 10·04                              |       | 952    | 11·91                              |
| 7. Unaccounted for ..  | —     | 133    | 1·64                               | —     | 113    | 1·41                               |

A statement showing the revenue and expenditure and the balance to the credit of each town for 1919 is subjoined :—

|                 | Balance on<br>January 1,<br>1919. | Revenue. | Expenditure. | Balance on<br>December 31,<br>1919. |
|-----------------|-----------------------------------|----------|--------------|-------------------------------------|
|                 | Rs. c.                            | Rs. c.   | Rs. c.       | Rs. c.                              |
| Kattankudi ..   | 1,570 20                          | 7,291 13 | 7,584 81     | 1,276 52                            |
| Kalmunai ..     | 3,665 81                          | 7,450 18 | 6,655 21     | 4,460 78                            |
| Eravur ..       | 3,323 13                          | 4,864 92 | 4,217 49     | 3,970 56                            |
| Sammanthurai .. | 576 10                            | 3,139 30 | 2,854 16     | 861 24                              |

*Kattankudi*.—The cross roads were maintained in good order at a cost of Rs. 1,251, and the buildings at a cost of Rs. 79. Two new street lamps were fixed and three new roads were constructed on the north, east, and west sides of the market at a cost of Rs. 467·50. Scavenging and lighting, as usual, carried out satisfactorily. Improvements were effected to the market belonging to the mosque by the Mariakkars.

*Kalmunai*.—The roads were maintained in good order at a cost of Rs. 1,186·65. A sum of Rs. 256·30 was spent for maintaining the market buildings, &c. Twelve pipe culverts were inserted on minor roads at a cost of Rs. 462·40. Scavenging and lighting were carried out fairly satisfactorily.

*Eravur*.—A sum of Rs. 1,114 was expended on the maintenance of the roads. The following new works were done, viz. :—

|  | Rs. c. |
|--|--------|
| (a) Track metalling market road (re-vote) .. | 124 0  |
| (b) A bridge of 6 feet span brick masonry .. | 365 67 |
| (c) Two rubbish bins ..                      | 76 0   |

*Sammanthurai*.—The gravelled roads were maintained in fair order at a cost of Rs. 737·50. There were no funds to undertake new work. Scavenging was attended to as usual.

R. A. G. FESTING,  
Chairman.

Batticaloa, January 28, 1920.

## REPORT ON THE TRINCOMALEE DISTRICT FOR 1919.

### I.—HISTORY OF THE YEAR.

*Official Changes*.—Mr. W. K. H. Campbell, Assistant Government Agent, went home on leave, and was succeeded by Mr. N. Izat from Kandy on August 1.

2. Mr. W. G. Vallipuram, Police Magistrate and Office Assistant at the Kachcheri, was confirmed in Class V. of the Civil Service on July 1.

3. Dr. W. S. Ratnavale, District Medical Officer, was succeeded on April 7 by Dr. A. E. Herat, who was in turn succeeded by Dr. A. Chellappa on October 6.

4. The vacancy caused by the death of Mr. A. Muttucumaru, Chief Headman of Kaddukulam pattu east, on October 12, 1918, was filled on January 11, 1919, by the appointment of Mr. A. Muttiah, and the latter's place as Salt Storekeeper, Nilaveli, was taken by Mr. K. Velupillai, Village Tribunal Clerk, on March 15.

5. An Agricultural Instructor was assigned to this district by the Director of Agriculture in 1919, and Mr. A. V. Chelvanayagam, who was appointed to the post, assumed duties on June 9.

6. Mr. V. C. Chinnia, Mudaliyar, President of the Village Tribunals, Trincomalee, retired in June, and was succeeded by Mr. K. Tyalanayagam, Interpreter of the Trincomalee Courts, on July 1.

7. Mr. M. V. Nadarajah was appointed to the newly-created post of Assistant Shroff on October 13.

8. *Obituary*.—I regret to record the death on January 16 of Mr. T. Duraipappah, who retired from the post of Vanniya of Koddiyar pattu only six months before.

9. *Noteworthy Events*.—The signature of the Peace Treaty with Germany was celebrated on July 19 by the feeding of, and distribution of cloth to, the poor, and by sports, processions, bonfires, and fireworks.

10. The prices of the necessities of life continued high, but there was no need to regulate prices or introduce a system of rationing, such as obtained in several parts of the Island. The average price of the necessities of life has increased by over 80 per cent. since 1914. In normal years Trincomalee imports about 35,000 bushels of rice and about 900 bushels of other grains, and exports about 75,000 bushels of paddy. This year no rice or paddy was imported, but about 5,220 bushels of paddy were exported to Colombo during the food crisis in June and July.

11. Trincomalee, which had decreased in importance since its abandonment by the Military and Naval authorities, about fifteen years ago, is again becoming a favourite place of holiday resort for Europeans, who are attracted by its ideal harbour and unrivalled natural scenery. All the resthouses in the district and private bungalows of the European residents were filled with visitors towards the end of the year. The Hon. Sir Graeme Thomson, Colonial Secretary, paid an unofficial visit during the holidays.

12. Since the war warships have paid more frequent visits, and this is probably the reason for a considerable increase in the price of market rents sold by the Local Board.

## II.—REVENUE.

1. The total revenue brought to account in the Trincomalee Kachcheri in 1919 amounted to Rs. 198,127·87, showing a decrease of Rs. 10,524·92, as compared with the previous year's total of Rs. 208,652·79. The principal decreases were under Salt Revenue, Import Duties, Land Sales, and Head 8, Sundries.

2. Salt Revenue fell from Rs. 63,810 to Rs. 52,009·50. There was less demand for salt from the adjoining districts of Anuradhapura and Matale, which took 9,101 cwt. only in 1919, as against 13,167 cwt. in 1918. The explanation is probably to be sought in the fact that the inhabitants of these districts consumed less food, and consequently less salt, in 1919, owing to the unprecedented scarcity in the rice market. Some salt may also have found its way into these districts from Puttalam and Colombo.

3. There was a decrease of Rs. 6,736·59 under Import Duties, due to the fact that the importation of rice into this district from India, which had already shown a downward tendency in 1918, entirely ceased in 1919.

4. The revenue under Land Sales decreased by Rs. 6,705·09. Fewer instalments fell due during the year on lands sold in previous years under Sir Henry Ward's Minute. Comparatively less land has been sold under this Minute since 1915, and the total extent sold since 1916 was very limited owing to the restriction of land sales.

5. The decrease under Head 8, Sundries, amounted to Rs. 2,700·53. There was no pearl fishery in Tamblegam Bay in 1919; whereas a sum of Rs. 3,000 was recovered on this account and brought to account under this head in 1918.

6. The amount realized by the sale of the arrack rent rose from Rs. 33,550 in 1917-18 to Rs. 40,689 in 1918-19 and to Rs. 63,990 in 1919-20. This large increase, however, was partially neutralized by a fall in the toddy rents. The nett increase in the revenue collected under arrack and toddy rents in 1919 was Rs. 11,423·09.

7. Other increases running into four figures were under Stamps, Rs. 4,019·84, due to increased rates of stamp duty, and under Head 2, Port Dues, &c., Rs. 1,806·25, due to arrival of steamers of large tonnage in 1919, which paid port dues and landed cargo at this port, to be afterwards re-shipped.

## III.—CONDITION OF THE PEOPLE.

1. *Public Health.*—The health record this year was very satisfactory, and there were no serious epidemics of any sort. During the first half of the year only six cases of influenza were under treatment in hospital. During the latter half of the year malaria was the most prevalent disease. Quinine was distributed free to all fever patients at the dispensary.

2. The total number of patients admitted to hospital during the year 1919 was 490. The total number who died was 35. The percentage of deaths to the total number of patients was 7·14.

3. A certain amount of parangi is prevalent in Koddigar pattu and in Kaddukulam pattu. Since the supply of salvarsan ceased, very few patients have been sent into hospital by the headmen. An attempt is now being made to induce the people to come in. When the disease becomes bad, the people take treatment at the dispensaries, but when some relief is obtained, the treatment is left off before a permanent cure is effected.

4. Many of the people in Kaddukulam west appeared to me to suffer from severe skin diseases. There is no permanent dispensary in the district, and if one were established, I think it would alleviate considerable suffering. The population of the villages is also very small, considering the amount of irrigable land available. Most of them appear much less prosperous than in the neighbouring district of Anuradhapura. The total number of births was 26, and the total number of deaths was 75. This is a most unsatisfactory proportion, and could probably be much improved by proper medical attention. I consider the establishment of a dispensary at Gomarankadawala an urgent want.

5. *Wild animals* have not made themselves unduly obnoxious this year. Pigs are very plentiful, and the villagers seem to find the usual difficulty in keeping them out of their fields. At the end of the year the Vanniya of Koddigar reported large numbers of elephants in his pattu which were damaging the paddy crops.

6. *Rainfall.*—The rainfall for the year was above the average, being 75·54 inches, against an average of 62·37 inches. Rain fell in May, June, and July, and did considerable damage to the collection of salt.

7. *Agriculture and Food Supply.*—Paddy is the chief crop of the district. Cultivation is unscientific, and the yield per acre is poor, being only an average of 15 bushels per acre for manavari land. The poor outturn is probably largely due to the extensive methods of cultivation employed owing to scarcity of labour. Ploughing for the manavari crop appears to consist in merely scratching the surface of the ground, and the crop is choked with weeds. There is also a considerable scarcity of buffaloes. Efforts have been made to discourage the sale of these animals for export or slaughter. A number of cultivators came from Jaffna to help with the pinmari crops, and to encourage these they were allowed to take back a certain quantity of paddy with them, in spite of the general prohibition of export.

8. The rate of interest for the loan of seed paddy is most usurious in the Trincomalee District. A Co-operative Credit Society has been started and shows some signs of vitality, but its present funds are so limited yet that it has not been able to effect much improvement.

9. The harvests have, on the whole, been fairly satisfactory. This year a number of lands which had been fallow for a number of years have been cultivated for munmari. About 1,800 acres have been cultivated at Kandakadu, and have fortunately escaped so far the usual damage caused by flood water from the Mahaweli-ganga. The crop promises to be a good one if it gets another shower or two of rain.

10. The total food supply for the year has been sufficient for the district, and to allow of the export of 5,200 bushels of paddy to Colombo and of a certain amount to coolies who came from Jaffna. There was a slight shortage of paddy in Trincomalee town just before the pinmari crop under Tamblegam was reaped, but the price of rice never rose above 22 cents per measure. The number of chena permits was slightly increased, but there is not much scope for chenas in this district, as the cultivation would interfere with the munmari paddy cultivation. There is a woeful scarcity of fruit and vegetables at most seasons of the year in the district. Efforts have been made to encourage their cultivation, but not with much success. Mr. S. Tyagaraja has been given the lease of a tank and some land within Local Board limits with a view to experimental culture under irrigation, and it is to be hoped that his attempt will be successful.

11. The general prohibition of the export of food products from the district has been beneficial. The people would otherwise have exported all the paddy at once, and food and seed paddy would afterwards have had to be imported, probably at a much higher rate than for what it was sold.

12. The fishery all along the coast is good, but could probably be considerably developed. An attempt was made to ice fish and send it by motor bus to Anuradhapura, but this has been given up. Large quantities of sardines are obtainable at certain seasons of the year, and a factory to tin sardines would probably be a paying concern.

13. A certain amount of land has been planted with coconuts. The trees appear to do well up the Coast road. There are some large estates near Kinniyai, but these are not in a flourishing condition, possibly due to faulty cultivation. The trees bear well once they have got their roots well down, but many are stunted, and do not look as if they would ever bear.

14. Useful bricks and tiles are made in Koddigar. A certain amount of very poor quality tobacco is cultivated in the town division, in Koddigar, and in Kaddukulam east.

15. *Health of Cattle.*—This was good on the whole. The only outbreak of importance was one of foot-and-mouth disease, which occurred in 1918, and continued till February, 1919. There were 39 cases, as compared with 266 in 1918. Of these, 27 occurred in town and 12 in Kaddukulam east.

16. In the months of March, September, and November a few deaths among cattle were reported from Toppur, Kinniyai, Menkamam, Mutur, and Kaddaiparichehan. It was suspected that these were due to anthrax. The Stock Inspector immediately went out to the villages, but was unfortunately not able to see a single sick animal, or even the carcass of one that had died recently. This was due to the unfortunate tendency of the people to conceal all cases in order to avoid the trouble and expense of preventive methods.

17. The cattle in most of the villages are of very inferior breed. As a rule, there is a great lack of pasturage during the greater part of the year, and no attempt is made to raise any special fodder or pasture for the use of the cattle. There is, however, excellent pasture, even during the dry season, in the swamps by the banks of the Verukal river. The pasture rent is sold to Moor traders, who keep fairly large herds of good animals for sale up-country. The number of cattle fed there could, however, be largely increased.

#### IV.—POLICE AND CRIME.

1. The sanctioned strength of the Police Force is 1 Sub-Inspector, 2 sergeants, and 15 men. At present the force is one constable under-strength. Their duties lie mostly in the town, but they are available for investigation in the few cases of serious crime which occur in the district. There is only one absconder who is suspected in a murder case which occurred in 1916.

2. The Police Magistrate, Mr. W. G. Vallipuram, reports as follows :—

It is pleasant to be able to record a marked diminution in crime in the district, as, during the year under review, the total number of cognizable cases reported was 60, against 93 in 1918. Of these, though 53 were classified under serious crime, only 29 turned out to be true cases, the balance 24 falling under following heads :—

|                              |       |
|------------------------------|-------|
| Unclassified .. .. .         | 2     |
| No offence committed .. .. . | 18    |
| Pending .. .. .              | 4     |
|                              | <hr/> |
|                              | 24    |
|                              | <hr/> |

Of the 29 true cases, convictions were obtained in 15, as under :—

|                                   |       |
|-----------------------------------|-------|
| Housebreaking and theft .. .. .   | 2     |
| Grievous hurt .. .. .             | 4     |
| Hurt with knife .. .. .           | 1     |
| Theft .. .. .                     | 5     |
| Indecent assault .. .. .          | 2     |
| Retaining stolen property .. .. . | 1     |
|                                   | <hr/> |
|                                   | 15    |
|                                   | <hr/> |

It is satisfactory to be able to report that there was not a single case of homicide during either 1919 or 1918.

The total number of criminal institutions amounted to 602, as against 858 in 1918. The greater number of institutions in 1918 was due to more prosecutions under the statutory laws and under the Town Schools Ordinance by the Local Board.

3. In the Court of Requests 32 cases remained pending out of a total of 306 for the year. In the District Court 11 cases are pending.

## V.—LOCAL GOVERNMENT.

1. Separate reports on the working of the Local Board and District Road Committee are annexed.

2. There are no Sanitary Boards in the district. The question of bringing Mutur, Toppur, and Kinniyai under the Ordinance still lies over for lack of funds. Mutur was scavenged to some extent, and the expense met out of Village Committee money, but funds available are entirely inadequate to meet the needs of the place.

3. There is one Village Tribunal for the district, and the President spends a large proportion of his time in travelling, as the district is very scattered. During 1919 890 civil and 2,044 criminal cases were instituted.

4. *Village Committees.*—The revenue of these Committees is small, and a large proportion is taken up in payment of salaries to the Gansabhawa clerk, 2 clerks and a peon for the President, a clerk for the Vanniya of Koddigar pattu, and 7 watchers for the six courts and one Village Committee bungalow. Funds had, however, been accumulated for some years, and the court-houses were kept up well, village wells were repaired, and village roads kept clear.

5. Annexed is a statement of revenue and expenditure of Village Committees for the year :—

| Division.               | Balance on<br>January 1,<br>1919. | Receipts. | Total.   | Payments. | Balance on<br>December 31,<br>1919. |
|-------------------------|-----------------------------------|-----------|----------|-----------|-------------------------------------|
|                         | Rs. c.                            | Rs. c.    | Rs. c.   | Rs. c.    | Rs. c.                              |
| Koddigar ..             | 969 55                            | 2,620 48  | 3,590 3  | 3,407 66  | 182 37                              |
| Tamblagam ..            | 863 93                            | 2,192 57  | 3,056 50 | 2,231 54  | 824 96                              |
| Kaddukulam East ..      | 150 32                            | 838 0     | 988 32   | 756 51    | 231 81                              |
| Kaddukulam West ..      | 60 90                             | 208 50    | 269 40   | 267 70    | 1 70                                |
| Town outside Gravets .. | 24 94                             | 294 0     | 318 94   | 278 28    | 40 66                               |
| Total ..                | 2,069 64                          | 6,153 55  | 8,223 19 | 6,941 69  | 1,281 50                            |

6. *Education.*—This is carried on to a large extent by the Wesleyan and Roman Catholic Missions. The local School Committee has very small funds at its disposal. No important work was carried out during the year, but there is a proposal to build new schools at Tamblagam and Madawachchi.

7. Two new schools were opened by the Roman Catholic Mission during the year : one at Valaitoddam, as a branch to Anaitivu school ; and the other at Karukaimunai, as a branch to Ilakkantai school. Most of the children attending these schools are Veddas. The registration of these and three other schools belonging to the Roman Catholic Mission is under consideration.

## VI.—IRRIGATION.

1. *Major Works.*—There is a keen demand for land under the two largest tanks of this district, Kantalai and Allai. At present little land can be sold under these works until the present schemes of the Irrigation Department are completed. The Divisional Irrigation Engineer informs me that 6,746 acres were cultivated under major works and 6,706 acres were reaped. The estimated yields for the under-mentioned schemes were:—

|                 |    |    |                       |
|-----------------|----|----|-----------------------|
| Allai scheme .. | .. | .. | 25½ bushels per acre. |
| Ilakkantai ..   | .. | .. | 26½ do.               |
| Kantalai ..     | .. | .. | 40 do.                |
| Andankulam ..   | .. | .. | 40 do.                |
| Periyakulam ..  | .. | .. | 40 do.                |

2. *Village Works.*—The total area cultivated under village works was 1,158 acres. The usual earthwork was carried out and sluices were inserted and improved in many tanks. The *bisokotuwa* sluice at Gomarankadawala again began to give trouble, and extensive repairs are needed, which are quite beyond the funds available locally.

3. The earthwork in Koddigar pattu was satisfactorily carried out, thanks to the energy displayed by the Vanniya. An Irrigation Inspector, whose services would be solely devoted to village works, is badly needed, in order to supervise the ordinary maintenance work and before any real schemes of improvement can be instituted.

4. Mr. T. Hamer gave technical advice when this was required for these tanks.

5. Annexed is a statement of the Irrigation Fine Fund :—

|                  | Receipts. | Expenditure. | Balance on<br>December 31,<br>1919. |
|------------------|-----------|--------------|-------------------------------------|
|                  | Rs. c.    | Rs. c.       | Rs. c.                              |
| Major works ..   | 1,300 37  | 939 40       | 1,039 84                            |
| Village works .. | 1,657 1   | 892 27       | 980 45                              |

6. Under major works the money was spent chiefly in making a road to Periyakulam, which will, I hope, be completed this year. A road which is badly needed in connection with agriculture, but which is quite beyond the scope of local funds, is the extension of the present agricultural road from Tamblagam to Kinniyai. Much of the labour for the fields at Kantalai and Tamblagam is supplied from Kinniyai, but the present track is nearly impassable for carts during many months of the year. The villagers of Mallikaitivu also experience great difficulty in getting their carts across the paddy fields under the major work Peruveli.

## VII.—LAND.

1. *Land Sales*.—Seven sales were held during the year. Most of the lots offered for sale were encroachments. 132 lots in extent about 85 acres were sold and settled during the year, as against 61 acres in 1918, and the total amount thus realized, including fees, was Rs. 2,225·85. Total revenue collected during the year is Rs. 8,716·42 (i.e., Rs. 5,269·99 on sales under Sir Henry Ward's Minute and Rs. 3,446·43 on sales under ordinary terms), as against Rs. 15,421·51 in 1918, the large fall being due, as already explained, to fewer instalments remaining to be recovered in 1919 on lands sold under Sir Henry Ward's Minute in preceding years. 213 Crown grants and 10 certificates of quiet possession covering about 1,046 acres were issued during the year.

2. No applications for lease of lands were received, and the people of the district prefer purchasing land to leasing it. 517 acres in small lots were allowed for cultivation on permits during the year. Revenue collected on account of these permits and on lease of fish-curing sites is Rs. 3,152. Every encouragement was given for the increased production of foodstuffs in placing at the disposal of villagers at nominal rents suitable lands which they desired to cultivate. Lands under irrigation schemes are not available in this district to be given on easy terms.

3. *Chenas*.—438 permits, covering an extent of 395 acres, as against 168 acres in 1918, were issued to deserving villagers. These chenas were mostly given for the cultivation of manioc, yams, and other food products.

4. *Illicit Cultivation*.—The system of inspecting land-marked plans was carried on. Seven men were prosecuted, and 27 offenders were dealt with departmentally.

5. *The Pearl Fishery* at Tangleam Bay was not leased during the year, as it was reported that the number of mature oysters was insufficient. A considerable amount of poaching was carried on by the men of Kinniyai. Diving for the oysters is such an easy matter that prevention is very difficult; it is in the hands of the local headmen and four watchers, but the watchers are not at all trustworthy.

## VIII.—PUBLIC WORKS.

1. No important works were carried out during the year. The roads to Gunwharf salt stores were track metalled. A new flagstaff of laminated teak was erected at Fort Frederick. The sea still continues to encroach on the Coast road, and a portion about 300 feet long was washed away near Uppar ferry.

2. Mr. J. M. Adam readily gave advice on all matters affecting his sphere.

3. The most urgent needs of the district are provision of dispensaries at Gomarankadawala and Ichchilampattai. The necessity for these has been mentioned before.

4. Other works needed are :—

- (1) Extension of North Coast road to Kokkilai.
- (2) Improvements to dangerous corners at Uppuveli, Kanchimadam, and at the 63½ mile of the Batticaloa-Trincomalee road.
- (3) A jetty at Back Bay.
- (4) A masonry boat-house at the inner harbour.
- (5) A new resthouse at Trincomalee.
- (6) Provision of galas on the Kandy road.
- (7) Rebuilding Jail Guards' quarters.
- (8) Re-roofing Kachcheri with Calicut tiles.

## IX.—SALT.

1. *Manufacture*.—The quantity of salt collected during 1919 was 9,786 cwt. This compares very unfavourably with the collection of most years. The reason for the failure was the fall of rain during the early part of the season which destroyed the deposits. Later on in the year the supply of water in the lagoon failed. This would seem to show that the removal of the windmill was not altogether a good step.

2. There is, however, ample salt in store for the normal needs of the district and to meet the usual demand for export. The district consumed 8,235½ cwt., 9,101 cwt. was sold to other districts, and 15,000 cwt. transported to Batticaloa. There has been a considerable fall in the export as compared with 1918. Probably this was due to the fact that some of the salt sold was of poor quality and failed to find a ready market. I note that the quality of salt in the second and third collections is considerably below that of the first collection. Possibly, however, the fall of export may be explained by a smaller consumption of salt due to the food shortage.

3. *Spontaneous Formations*.—Owing to the unfavourable season little salt was formed spontaneously. These formations were destroyed by trampling them with buffaloes. Six cases of illicit possession were reported from Koddiiyar district, and all were prosecuted and convicted.

## X.—EXCISE.

There is little to report under this head. The consumption of arrack was considerably greater than the previous year. This is said to be due to the fact that arrack was considered to be a good preventive against influenza. There has been less drunkenness on the whole, though the Koddiiyar Vanniya reports that it is on the increase in his division. The rents for 1919–20 realized a sum of Rs. 87,640, as compared with Rs. 70,049 for the previous year. Few illicit practices were detected.

## XI.—FORESTS.

1. There was little of note to record under Forest Administration in 1919. In the previous year there was a proposal to raise the Trincomalee Subdivision, which forms part of the Batticaloa Division for forest administration purposes at present, to the status of a division, and place it in charge of a separate Assistant Conservator of Forests, but the idea seems to have been given up for the present.

2. The total forest revenue credited at the Kacheheri in 1919 amounted to Rs. 7,100·92. Timber to the value of Rs. 6,403·55 was granted free of royalty mostly for agricultural purposes and to impecunious villagers, and Rs. 11,406·02 worth of timber was supplied by the Forest Department to other Government Departments.

3. Forty-five acres of land were allowed for chena cultivation in Koddigar pattu on re-afforestation agreement.

4. Six cases were instituted in court during the year, only one of which ended in conviction, and twenty minor offences were compounded by the Department on payment of compensation.

#### XII.—CONCLUSION.

The Chief Headmen have worked well during the year, but special mention may be made of the energy shown by Mr. K. Vyrarnuttu, the Vanniya of Koddigar pattu. The Kacheheri staff has also done good work, and I would like to place on record the ability and energy shown by Mr. A. Visvanadhan, the Chief Clerk, and Mr. K. Somasundaram, the Land Clerk.

Trincomalee Kacheheri,  
January 31, 1920.

N. IZAT,  
Assistant Government Agent.

#### APPENDIX.

##### I.—REPORT OF THE CHAIRMAN, LOCAL BOARD, TRINCOMALEE, FOR 1919.

THE members of the Board on December 31, 1919, were Mr. N. Izat, Assistant Government Agent, Chairman; Mr. J. M. Adam, District Engineer; Dr. A. Chellappa, Medical Officer; Mr. M. M. Subramaniam, Mr. S. Visuvalingam, and Mr. S. Tyagaraja, Unofficial Members.

2. The usual annual statements are appended :—

##### Comparative Statement of Revenue and Expenditure for the Years 1918 and 1919.

| 1895 ..                            | 3,000 0                  |                         |                       |                   |   |                                     |                                      |
| 1904 ..                            | 12,000 0                 |                         |                       |                   |   |                                     |                                      |
| 1909 ..                            | 8,000 0                  | 8,000 0                 | 2 per cent.           | 4½ per cent.      | 160 0                                   | 360 0                               | Nov. 29, 1929                        |

3. The revenue for the year amounted to Rs. 20,125.74, which was Rs. 687.36 in excess of that for 1918. There were increased collections under all the heads of revenue, except under "Rents, Other," and "Fines." The falling off under "Fines" is due to fewer cases being instituted during the year, and that under "Rents, Other," is attributable to less slaughter-house fees collected.

4. The expenditure amounted to Rs. 19,701.23, which exceeded that of the previous year by Rs. 332.32. The pension of Rs. 420 paid to the late Inspector, Local Board, the travelling allowance of Rs. 84.60 paid to the Sanitary Inspector for coming here from his last station, and the transport allowance of Rs. 240 paid to the Secretary for supervision of works were charged to the "Cost of Administration," and hence the increase under this head. The increased cost of stationery and printed forms is responsible for the increase under head "Office Contingencies."

5. The scavenging of the town and the conservancy of the public and private latrines were carried on satisfactorily during the year.

6. All the roads, drains, and buildings in charge of the Board were maintained in good order.

7. Main street was track metalled on rubble foundation, and tiled roofs were provided to four public latrines on Back Bay beach. The esplanade seats, the conservancy carts, and all the five scavenging carts were overhauled and thoroughly repaired and re-painted during the year.

8. Margosa plants were planted round the esplanade in the vacancies in the row of *suriya* trees. The gala grounds were planted up with *ingasaman* trees.

9. 226 dogs and 1,018 rats were destroyed and reward paid during the year.

10. The town survey is in progress, and encroachments have either been removed or settled in half the divisions of the town.

11. The Peace in connection with the great war was celebrated on July 19, 1919, at which the Board contributed a sum of Rs. 220 towards clothing the poor.

12. The health of the town was satisfactory during the year.

Trincomalee, January 31, 1920.

N. IZAT,  
Chairman.

## II.—REPORT OF THE CHAIRMAN, DISTRICT ROAD COMMITTEE, TRINCOMALEE, FOR 1919.

THE Committee during 1919 consisted of the following :—Mr. W. K. H. Campbell, Chairman, January to July, 1919, and Mr. N. Izat, from August 1, 1919; Mr. J. M. Adam, District Engineer; Rev. E. T. Selby, European Member; Mr. S. Visuvalingam, Burgher Member; and Mr. S. Tyagaraja, Tamil Member. An election of European Member for the years 1920 and 1921 was fixed for December 6, 1919, and as no candidates came forward Rev. E. T. Selby was re-nominated.

2. There was no change in the staff during the year under review.

3. Two meetings were held during the year. At other times minute papers were circulated to members, as there was not enough business to justify a meeting.

4. A comparative statement of the working of the Thoroughfares Ordinance for 1918 and 1919 and a statement of revenue and expenditure for 1919 are annexed :—

## Comparative Statement of the Working of the Thoroughfares Ordinance for the Years 1918 and 1919.

|   |                   |                  |  |                   | 15,620 86        |
|   |                   |                  | Balance on December 31, 1919 ..                          | —                 | 5,726 97         |
|   |                   | 21,347 83        |  |                   | 21,347 83        |

5. The percentage of those who discharged their liability under the Ordinance in 1919 was 91·16, as compared with 90·6 in 1918. The collection of commutation money for the year has been very satisfactory, Rs. 8,887·53, as against Rs. 8,590·43 in 1918.

6. *Roads.*—During the year under review the minor roads in the district were maintained in fairly good order with the available funds at the disposal of the Committee.

7. The policy followed in previous years, of concentrating the annual expenditure on two or three roads, taking them in order of importance and improving them thoroughly, instead of scattering it over all the roads on makeshift works, was continued, and sections of the following roads were improved :—

(1) On Kuchchaveli-Tiriyai road gravelling was done for one mile, and two causeways, one of 120 feet and the other of 90 feet span, were constructed, and a ferryboat for the Pudavaikkaddumalai Mugaththuvaram ferry is in course of construction, and will be launched soon. The completion of this road up to the above ferry obviates three distinct fords and numerous low swamps along the old road, and the villagers beyond Kuchchaveli, who used to be practically cut off from communication with the town for about three months in the year, will now be able to travel during any time of the year. Beyond Pudavaikkaddumalai Mugaththuvaram ferry side drains have been cut, and the road formed for three miles. Of this, two miles will be gravelled during 1920.

(2) An additional one mile of new gravelling was done, and three permanent culverts of 4 feet and a bridge of 10 feet span were constructed on the Shell Bay-Mutur road. The remaining one mile of this road is in course of construction, and will be completed early. The whole length of this road, from the junction of the Batticaloa road close to the 66th mile up to Foul Point, will then be fit for all traffic.

8. *Resthouses.*—The resthouses in the district were well maintained and equipped during the year.

9. Visitors to Trincomalee resthouse are yearly increasing, while the accommodation remains the same. An entirely new resthouse is required to suit the present requirements.

Trincomalee, February 2, 1920.

N. IZAT,  
Chairman.

## ADMINISTRATION REPORT OF THE GOVERNMENT AGENT, NORTH-WESTERN PROVINCE, FOR 1919.

### I.—HISTORY OF ADMINISTRATION.

*Civil Service Changes.*—(a) Mr. V. P. Redlich, Police Magistrate, Kurunegala, was transferred to Kegalla as District Judge there in October, 1919, and Mr. A. N. Strong succeeded him.

(b) Mr. T. D. Perera, Local Division Civil Service, was appointed Cadet, Kurunegala Kachcheri, in August, 1919. He was transferred to Jaffna Kachcheri in December, 1919, and Mr. R. Jones-Bateman was appointed in his place.

### II.—PRINCIPAL EVENTS.

A Fancy Fair held at the Maligawa on March 8 in aid of the Disabled Ceylon Men's Fund realized Rs. 6,325.

Peace Celebrations on July 19, 1919.

Village Show at Ibbagamuwa School on August 23, 1919.

Village Show at Kuliapitiya School on August 30, 1919.

### III.—REVENUE.

The revenue of the financial year 1918-19 amounted to Rs. 735,223.50, as against Rs. 558,179.63 collected in previous year. The chief items of increase are : Rs. 158,314.49 under Arrack and Toddy ; Rs. 1,451.16 under Fines and Forfeitures ; Rs. 2,305.36 under Hospital and Dispensary Receipts ; Rs. 2,362.25 under Medical Aid Dues. There is a decrease in the revenue collected under Land Sales.

### IV.—FOOD SUPPLY.

The food supply of the district was sufficient, and there was no distress, although a large number of people among the bazaar population had to content themselves with less rice than they had been accustomed to. Both maha and yala crops were fortunately good, and practically every field possible was cultivated, and as a result sufficient rice was grown locally to feed the village population, except in certain areas in Dambadeni and Katugampola hatpattus, together with a small surplus, part of which was removed from the district before control was established, while the balance went towards relieving the situation in the bazaars, and assisted in feeding the Sinhalese and, in the case of some estates, Tamil coolies on estates.

Control for paddy and rice, though suggested previously, was established on June 10, but prohibition being by some mistake confined to removal by rail, an amended notice was issued on June 19, by which date considerable quantities had been removed.

Control for kurakkan, though suggested previously, was established on July 10, by which date there is evidence that many tons had been removed. After the establishment of control removal of paddy and rice in large quantities was stopped, and, except where paddy was required for seed purposes, removal was confined to two bushels of rice, or four bushels of paddy at a time, where the applicant was certified to have fields of his own or on lease and required the rice or paddy for his own consumption. In this way some 4,000 bushels of rice and paddy were removed mainly to Colombo, Negombo, and Kalutara Districts on permits between June and December, when it was decided that it must cease in view of the uncertain situation as regards imported rice, and the fact that the allocation had been reduced 50 per cent., while it was palpable that the stocks of local grown rice were getting very low. This action has been freely criticised, but it is difficult to see how it could have been avoided without leading to worse trouble, namely, a serious shortage in the district. For a large number of applications were received, and more doubtless would have been received had not applicants been deterred by hearing that all applications were being refused, and although doubtless "the heavens would not have fallen," as a writer in one of the local papers put it, if M or N had been allowed to remove two bushels of rice, unfortunately M and N were not the only people anxious to send rice to their relations elsewhere, and if some hundreds of them had been allowed to remove rice at that time, a very serious situation would have arisen in this district. It was, on the other hand, impossible to make distinctions between the applicants, and obviously the only fair arrangement was to stop removal by any one. With the coming in of the new crop removal in small quantities is again being allowed.

As regards kurakkan, removal on a commercial scale was confined to grain collected, but not removed, before the notice as regards prohibition issued, but removal of limited quantities was allowed throughout, and it will now be possible to allow removal of larger quantities.

As regards imported rice, the situation in June was very serious in some of the bazaars, and was only partially relieved by the receipt of the "Tuticorin" rice.

The writer, with the view of helping the people of Kurunegala town, got down some hundred of bushels of rice and paddy from Galgamuwa and Ganewatta, and made a small profit by selling a

slightly over the cost price. Some of this profit was expended on distribution of the Tuticorin rice, for which no provision was made by Government, and the balance will be devoted to some charitable object, if not required in connection with rice distribution.

The allocation of imported rice was at first 3,600 bags. This was obviously too much, and was reduced at my suggestion to 2,000 bags, but, as a matter of fact, for part of the year no more than 1,000 bags or half the nominal allocation was received, and one week the allowance was reduced to 750 bags for the whole district.

When control was first introduced, a system devised by the Food Controller of sending dealers to Colombo with "chits" authorizing the purchase of so many bags of rice was tried, but, as was to be expected, it broke down at once, and the system which had been originally suggested by the writer was adopted, of sending the whole consignment to Kurunegala and distributing it thence. This system has its disadvantages, not the least of which is that it gives a large amount of extra work to the Government Agent and the Kachcheri staff, but it undoubtedly gives better control, both over payments and distribution; the dealers prefer it, and the public has been well served by it. There have, of course, been many complaints: the public has complained of profiteering, but a number of fairly stiff fines at the inception of control discouraged that vice; and the dealers have complained of short measure in the bags. A number of bags have been measured as they were taken from the railway trucks, and where they came straight from the wharf, they were usually correct measure; but where they came from some dealer's store, they were frequently  $\frac{1}{2}$  bushel short, and occasionally more. It was suggested that a further shortage was brought about in the Kurunegala store, and a charge in that connection is now under investigation. No money is received at the store, but all money is paid into the Kachcheri and orders for rice are issued in exchange, while the whole retail distribution is in the hands of the dealers. No Government servant is, therefore, in the position of having to receive cash and issue rice in return, and thus temptation is minimized. Ration cards have, so far, been found necessary only in Kurunegala town and Kuliapitiya Sanitary Board area, but it will probably be necessary to introduce them into other bazaars. As regards food production, a Committee was set up on the orders of Government, which has had a number of meetings, and made various useful suggestions, and induced various public-spirited persons to make experiments in improved cultivation. Two very successful village shows were held under its auspices, and were useful demonstrations of what can be grown in the district, and possibly a means of encouraging the growers. The weakness of these Committees is, however, that they are necessarily formed by busy men, who are able to devote very little time *personally* to the matter, and they have no staff and no funds with which to conduct demonstrations and experiments.

In addition, the writer has constantly put pressure upon the headmen to encourage and induce all manner of cultivation, and as a result, either of all these efforts, or possibly only of the high prices obtainable, practically every available paddy field was cultivated, and a considerable extension of vegetable cultivation was also made.

The area of chenas for which permits issued was 1,084 acres and 17 perches, and permits to asweddumize 224 acres of land for paddy were also issued.

#### V.—HOSPITALS, SANITATION, AND DISEASE.

In the early part of the year there was a serious outbreak of malarial fever, which, following upon the influenza epidemic at the end of 1918, resulted in serious mortality. 6,514 patients were treated in the hospitals, as compared with 5,029 in 1918; and 226,167 were treated at dispensaries, as compared with 16,483 in 1918.

No new dispensaries or hospitals were opened during the year, but six additional itinerating apothecaries were employed during the height of the fever epidemic, and proposals have been submitted for establishing one new permanent dispensary and converting five itinerating dispensaries into permanent stations for apothecaries. The mandate for acquisition of a site for Rambodagalla hospital has now been received, and sites have been selected for hospitals at Galgamuwa and Anamaduwa.

#### VI.—CATTLE.

Rinderpest was introduced into the district (Alawwa and neighbouring districts) from the Kegalla District in March 23, 1919, and no sooner were these outbreaks stamped out than further infection came from the Colombo District, resulting in a chain of infected areas all along right bank of the Maha-oya. The Stock Inspector and headmen have worked well, and as a result the district, in spite of frequent re-infections, is now free from rinderpest, except for two centres near Narammala, to which place infection came probably from another centre near Dambadeniya. The measures found to be most effective, in addition to the usual inoculation and disinfection, are these:—

- (1) Kraal all sick animals not shot.
- (2) Kraal all contacts.
- (3) Tie up all other animals within, say, a mile.

Kraals must be of manageable size, stoutly built; where these measures are properly carried out, it is impossible for the disease to spread, but the trouble is to get them carried out, more especially (2) and (3). In this district it may be said that they have, on the whole, been carried out, thanks to the energies of the Stock Inspector and the efforts of the headmen, stimulated by frequent visits by the Government Agent. A few contacts have been concealed, a few stray cattle have wandered into an infected area, and as a result further cases have occurred, but the disease is well in hand, and can undoubtedly be stamped out if there is no re-infection from outside, and similar remarks doubtless apply to the rest of the Island. One curious feature of the recent outbreak is its comparative mildness, quite a large number of buffaloes having recovered, whereas in the outbreak in Uva ten years ago practically all buffaloes attacked died.

|                    |    |    |    |    |     |
|--------------------|----|----|----|----|-----|
| Total attacks were | .. | .. | .. | .. | 241 |
| Recoveries         | .. | .. | .. | .. | 42  |
| Shot               | .. | .. | .. | .. | 13  |

Probably it would be better to shoot at once every animal attacked, as is done in England, except that it would, perhaps, lead to further concealment of cases.

## VII.—EDUCATION.

Two District School Committee meetings were held during 1919. There are 152 schools in the district :—

| Government Schools. |    |    | Grant-in-Aid Schools. |    |    |
|---------------------|----|----|-----------------------|----|----|
| Boys'               | .. | 53 | Boys'                 | .. | 8  |
| Girls'              | .. | 10 | Girls'                | .. | 8  |
| Mixed               | .. | 8  | Mixed                 | .. | 61 |
| Carpentry           | .. | 4  |                       |    |    |
| Total               | .. | 75 | Total                 | .. | 77 |

The total attendance on the last day of the year was 14,343·78, as compared with 17,000 in the previous year. The decrease in the attendance was said to be due to sickness in the year.

## (a) Works sanctioned during the Year 1919.

| New Schools.                                  |    |    | Rs.   | c. |
|---|----|----|-------|----|
| Kobeyigane school                             | .. | .. | 2,500 | 0  |
| Ehetuwewa school : latrine                    | .. | .. | 76    | 84 |

| Re-voted for Moragane boys' school             | .. | .. | 102    | 0  |
| Re-voted for Nakkawatta girls' school          | .. | .. | 3,200  | 0  |
| Diwullegoda boys' school                       | .. | .. | 2,450  | 0  |
| Ibbagamuwa carpentry school                    | .. | .. | 500    | 0  |
| Narammala boys' school : extension             | .. | .. | 1,500  | 0  |
| Pilessa boys' vernacular school : extension    | .. | .. | 730    | 0  |
| Ibbagamuwa boys' vernacular school : extension | .. | .. | 3,000  | 0  |
| Balalla girls' school : conversion             | .. | .. | 4,250  | 0  |
| Awulegama                                      | .. | .. | 3,200  | 0  |
| Kankaniyamulla                                 | .. | .. | 4,000  | 0  |
| Total  | .. |    | 38,332 | 0  |

Special prizes for home gardens were given by the writer at the village shows held during the year, and further special competitions in connection with home and school gardens are proposed.

An interesting experiment in the shape of a "farm school" was projected and commenced during the year by Mr. H. L. de Mel, though it was actually opened in 1920. If it can be worked on the lines laid down, it promises to be a very useful institution.

#### VIII.—REGISTRATION OF DOGS.

|                              | 1918.    |    | 1919.    |
|------------------------------|----------|----|----------|
| Number of dogs registered .. | 6,508    | .. | 5,066    |
| Amount recovered as—         | Rs. c.   |    | Rs. c.   |
| Registration fees .. ..      | 735 70   | .. | 1,328 95 |
| Value of collars .. ..       | 1,718 60 | .. | 1,255 65 |
| Total ..                     | 2,454 30 |    | 2,584 60 |
| Number of dogs destroyed ..  | 1,796    | .. | 4,135    |
| Reported deaths .. ..        | —        | .. | 1,607    |
| Prosecutions .. ..           | —        | .. | 1,170    |

The problem of the reduction in the number of stray dogs is, I fear, almost insoluble, except, as was urged by the writer many years ago, on the lines of the reduction of the number of bitches. An enormous number of dogs were, it will be seen, reported to have been destroyed during the year, but without any apparent result as regards the number of stray dogs to be found in any village or bazaar. Every possible precaution is taken by having the tails produced for inspection and certificate by some reliable official, but it is still possible that dogs alleged to be shot are not shot. The number of dogs licensed is less, but the fees amount to more. This arises out of the fees having been increased to 25 cents a head by Mr. B. Hill, instead of being as formerly 10 cents for a dog and 25 cents for a bitch.

#### IX.—ADMINISTRATION OF ESTATES.

Rs. 14,266 was recovered in 1919, as compared with Rs. 8,494 in 1918.

#### X.—POSTAL FACILITIES.

No new Post Offices or Receiving Offices were opened during the year. Telegraph business was added to the Dandagamuwa (Kuliapitiya) Post Office, a long-felt want, and it was also provided with a telephone call office. Several additional telephones were provided in Kurunegala, notably for the Police Court and Magistrate's house, and the Hospital and Provincial Surgeon's and Medical Officer's quarters.

#### XI.—POLICE AND CRIME.

*Serious Crime.*—1,091 cases were reported, of which 655 were considered to be true cases, as compared with 1,215 cases and 716 true cases in 1918.

*Homicide.*—42 cases were reported, of which 20 were classified as true cases, as compared with 25 cases and 12 true cases in 1918. This is a very serious increase, but a large proportion of the cases were knife and club cases, and where a knife or club is used, it is largely chance whether the injuries are fatal or otherwise.

*Grievous Hurt.*—20 true cases were reported, as compared with 65 in 1918.

*Hurt with a Knife.*—37 true cases were reported, as compared with 45 in 1918.

It will be seen that, except for homicide, there has been an improvement as regards violent crime against the person.

*Offences against Property.*—The figures are :—

|                   | 1918.  |             |            | 1919.  |             |            |
|-------------------|--------|-------------|------------|--------|-------------|------------|
|                   | Total. | True Cases. | Convicted. | Total. | True Cases. | Convicted. |
| Arson ..          | 53     | 24          | —          | 38     | 21          | —          |
| Burglary ..       | 335    | 259         | 24         | 270    | 201         | 22         |
| Cattle theft ..   | 191    | 109         | 29         | 205    | 156         | 26         |
| Robbery ..        | 138    | 44          | —          | 116    | 30          | 11         |
| Theft over Rs. 20 | 218    | 143         | —          | 242    | 155         | 52         |
| Total ..          | 935    | 579         | 53         | 871    | 563         | 111        |

With the exception of cattle theft and theft of over Rs. 20, the figures show a material decrease. It is probable that the increase in the price of all foodstuffs is to some extent responsible for the increase in these forms of theft.

Nine rape cases were reported, of which only one was classified as true. There were no convictions. The relations between the police and headmen were satisfactory, and many headmen were rewarded for assistance given to the Police.

#### XII.—SANITARY BOARD TOWNS.

The following constituted the Sanitary Board, Kurunegala District, for the year 1919:—Government Agent, North-Western Province (Chairman); Provincial Engineer, North-Western Province; Provincial Surgeon, North-Western Province; L. Nugawela, Ratamahatmaya, Katugampola hatpattu; O. M. P. Perera, Proctor, Kuliapitiya; and L. Bogahalanda, Ratamahatmaya, Dewameddi hatpattu.

Meetings were held, but a large amount of work was done by circulation of papers.

There are two Sanitary Board towns in the district, and their revenue and expenditure are as follows:—

| <i>Kuliyapitiya.</i>                 | Rs. c.   | <i>Polgahawela.</i> | Rs. c.   |
|--------------------------------------|----------|---------------------|----------|
| Balance brought forward from 1918 .. | 339 34   | Revenue ..          | 1,803 31 |
| Revenue, 1919 .. Rs. 2,272·90        |          | Expenditure ..      | 987 53   |
| Expenditure, 1919 .. Rs. 1,080·38    |          |                     |          |
|                                      | 1,192 52 |                     |          |
|                                      | 1,531 86 |                     | 815 78   |

As will be seen, the revenue is at present so small that very little can be done beyond keeping these small towns clean, and scavenging is done daily, with good results. Steps are also being taken to acquire a site and build markets at Polgahawela, money being borrowed for the purpose, and a latrine will also be built; and a site is being acquired for a latrine at Kuliyapitiya.

#### XIII.—VILLAGE TRIBUNALS AND VILLAGE WORKS.

There are six Presidents of Village Tribunals. One for each hatpattu, each of whom has two courts, between which he itinerates. Three of these Tribunals, namely, Weuda, Hiriyala, and Dambadeni, were inspected during the year.

Institutions in the Village Tribunals during the year amounted to 8,070 civil cases and 9,202 criminal cases, including balance left over from 1918. 7,642 civil cases and 8,254 criminal cases were disposed of during the year, leaving a balance of 428 civil and 948 criminal cases pending on December 31, 1919. 616 civil cases and 945 criminal cases were amicably settled. There were 135 appeals to the Government Agent in civil cases and 220 in criminal cases. 300 in all were affirmed and 55 set aside. Appeals to His Excellency the Governor in Executive Council were made in 7 civil cases and in 5 criminal cases; and of these, the Government Agent's judgments were upheld in 6 civil cases and in all 5 criminal cases. Most of the criminal cases were for non-attendance of children at schools, neglect to clear Gansabhawa roads, petty thefts, and assaults.

The revenue from all sources was Rs. 43,509·74, making with the balance of Rs. 39,968·20 from 1918 a total of Rs. 83,477·94. The expenditure amounted to Rs. 39,847·31, leaving a balance of Rs. 43,630·63. This expenditure includes Rs. 6,500, being annual contributions to the District School Committee Funds, Rs. 1,563·23 for repairs to Village Tribunals, Rs. 1,833 for improvements and building culverts on Gansabhawa roads, Rs. 300 for building a temporary market at Nikaweratiya in Wannī hatpattu, Rs. 1,206 for stationery and printed forms for the use of the Presidents of Village Tribunals and minor headmen. The balance expenditure includes not only payment of salary of staff, but cost of repairs to ambalaris, circuit bungalows of Ratamahatmayas, dispensaries, wells, &c.

#### XIV.—KANDYAN MARRIAGE ORDINANCE.

The number of Kandyan marriages registered was 1,000, as compared with 1,433 in 1918. The number of divorces was 112, as against 141 in 1918. There is evidence that polyandry still continues to exist.

#### XV.—LAND SALES AND SETTLEMENTS.

The total area of land alienated by the Government Agent during the year 1919 was 110 acres 1 rood and 15 perches, of which 45 acres 3 roods and 3 perches were sold or settled at an average price of Rs. 41·45 per acre. The total area sold and settled (otherwise than under the Waste Lands Ordinances) by the Settlement Officer in the Kurunegala District during the year 1919 was 2,823 acres 2 roods and 29 perches at an average price of Rs. 26·99 per acre.

#### XVI.—RAINFALL AND IRRIGATION.

The rainfall registered at the Kurunegala observatory during the year was 86·48 inches, as compared with 93·65 inches in 1918 and an average of 78·94 inches. This rain fell on 192 days, and was well distributed through the year.

There are seven irrigation works upon which irrigation rate is recovered. The amount due is Rs. 8,843·44, and the amount recovered was Rs. 11,316·37, of which Rs. 2,636·80 represents arrears, leaving Rs. 163·87 still to be recovered at the end of the year. 213 irrigation cases were tried, and the fines amounted to Rs. 1,694. Rs. 1,385·47 was paid from Irrigation Fine Fund on account of salaries, and Rs. 58·75 was paid for repairs to village tanks, &c. There are 1,616 village tanks, of which 275 are still under restoration.

#### XVII.—PUBLIC WORKS AND BUILDINGS.

No large works were undertaken, operations being confined to maintenance and minor improvements. A site for a new house for the District Judge, Chilaw, was selected, and it is to be hoped that the building will be completed as soon as possible.

#### XVIII.—FOREST ADMINISTRATION.

Timber, &c., sold realized Rs. 16,824·69, as against Rs. 20,245·15 in 1918. Timber supplied to Government Departments was valued at Rs. 108,223·18, as compared with Rs. 149,082·25 in 1918. 206 acres was added to forest plantation during the year, making the total 940 acres, as compared with 734 acres in 1918.

#### XIX.—ARRACK AND TODDY.

Three meetings of the Excise Advisory Committees were held during the year: one District area and two Local Board area. No arrack taverns were abolished, but one toddy tavern was abolished, and no additional taverns were opened, making a total of 60 arrack taverns and 23 toddy taverns, as compared with 60 arrack taverns and 24 toddy taverns in 1918.

Polls were demanded as regards five arrack taverns, and in no case was the percentage higher than 57·81.

Kurunegala, February 28, 1920.

C. R. CUMBERLAND,  
Government Agent.

## APPENDIX.

## I.—REPORT OF THE LOCAL BOARD, KURUNEGALA, FOR 1919.

*Constitution of the Board.*—During the period under review the Local Board, Kurunegala, consisted of the Government Agent (*ex officio*), Chairman; the Provincial Engineer; the Provincial Surgeon; and the following Unofficial Members: Messrs. F. N. Daniels, W. A. C. de Silva, and P. Tambiraja.

2. One special meeting and twelve ordinary meetings of the Board were held during the year. The biennial election of the Unofficial Members was held in December and resulted in the re-election of the sitting members unopposed.

3. *Finances.*—The following comparative statement shows the revenue and expenditure of the Board for the years 1918 and 1919:—

| REVENUE.        | 1918. |         | 1919. |    | EXPENDITURE. | 1918. |                | 1919. |         |    |    |         |    |

| (i) Imprisoned   | ..    | 3     | ·09                                | —     |       | —                                  |
| (j) Left local area  | ..    | 101   | 3·14                               | 242   |       | 6·94                               |
| 6. Total failed to discharge obligation within local area                              | ..    | 236   | 7·35                               | 553   |       | 15·87                              |
| 7. Unaccounted for   | ..    | —     | 5·27                               | 145   |       | 4·16                               |

5. *Sanitation.*—The health of the town was satisfactory during the year, except for an outbreak of malaria. The Principal Civil Medical Officer was approached through the Provincial Surgeon, and the services of a special Medical Officer were requisitioned to make house-to-house inspections and treat poor patients who were unable to come to the hospital for treatment. Minor anti-malarial measures were also adopted.

6. *Hoof-and-Mouth Disease.*—Several cases of hoof-and-mouth disease occurred among cattle and none proved fatal.

7. The scavenging and latrine conservancy of the town were carried out departmentally and proved satisfactory.

8. *Public Works*.—Roads, drains, and culverts in the town were maintained in good order, and all buildings were kept in proper repair.

9. The following new works were carried out during the year :—

- (1) The beef and mutton markets were altered to meet present requirements, and a new latrine on modern lines was also built.
- (2) The cattle shed and the sheep slaughter-house were extended.
- (3) A shelter was erected at the entrance to the cemetery.
- (4) A screen wall was built at the female bathing place at the tank.
- (5) A new well was sunk at the Negombo road.
- (6) The Rajapihilla road was metalled, and a retaining wall built along Saunders street.
- (7) A latrine was built at the Rajapihilla watcher's quarters.

10. *Notable Events*.—Peace celebrations were held on July 19.

Office of the Local Board,  
Kurunegala, March 2, 1920.

C. R. CUMBERLAND,  
Chairman.

## II.—REPORT OF THE PROVINCIAL ROAD COMMITTEE, NORTH-WESTERN PROVINCE, FOR 1919.

THE Provincial Road Committee during 1919 consisted of the Government Agent as Chariman, the Provincial Engineer, the Provincial Surgeon, and the following Unofficial Members : Messrs. J. S. Patterson, C. P. Markus, and A. de Silva.

2. *Meetings*.—Four meetings were held during the year, and, as usual, much business was done by circulating papers among the members.

3. The resthouses throughout the Province were maintained in good order. It is proposed to hand over to the District School Committee for a girls' school the Balalla resthouse, which is situated about 3 miles from the railway, and to build a new resthouse closer to the Maho Railway Station and the Yapahuwa ruins.

4. The following improvements were effected in the resthouses in the course of the year :—

- The stables at Kuliapitiya resthouse were converted into a motor garage and chauffeurs' room, and earth closet for servants built.
- A new culvert was built at the junction of the Giriulla resthouse approach road with the Public Works Department road.
- A plan and estimate was sanctioned for altering the stables at Nikaweratiya resthouse into motor garages, and work ordered to be put in hand.
- Wooden trellis was fixed along kitchen verandah and passage, and ceiling were put up in the kitchen and resthouse-keeper's room at Chilaw resthouse.

5. *Branch Roads*.—No difficulty was experienced in the recovery of the planters' moiety for the maintenance of the branch roads in the district.

6. *Principal Roads*.—The usual contributions was paid to the Colonial Treasury in terms of the apportionment.

7. A statement of revenue and expenditure and a statement of the expenditure on principal roads are annexed :—

January 30, 1920.

C. R. CUMBERLAND,  
Chairman.

## III.—REPORT OF THE DISTRICT ROAD COMMITTEE, KURUNEGALA, FOR 1919.

THE District Road Committee of Kurunegala in 1919 consisted of the Government Agent as Chairman, the District Engineer, and the following Unofficial Members: Messrs. A. Kennedy, F. N. Daniels, and E. G. Goonewardene, and Mr. A. de Silva as Additional Member.

2. *Meetings.*—Four meetings were held during the year, and, as usual, papers relating to all work which required the approval of the Committee were circulated among the members.

3. *Working of the Thoroughfares Ordinance.*—A comparative statement showing the working of the Thoroughfares Ordinance in the District of Kurunegala for 1918 and 1919 and the statement of revenue and expenditure are annexed:—

Comparative Statement showing the Working of the Road Ordinance in the Kurunegala District for the Years 1918 and 1919.

|   | 1918.  |        | Percentage<br>on Number<br>under<br>Head 2. | 1919.  |        | Percentage<br>on Number<br>under<br>Head 2. |
|---|--------|--------|---|--------|--------|---|
| 1. Population of local area by latest Census ..   | —      | 29,186 | —   | —      | 29,186 | —   |
| 2. Number of resident males by division officers' lists reported liable to labour ..      | —      | 84,816 | —   | —      | 84,850 | —   |
| 3. Discharged obligation within local area by—  |        |        |   |        |        |   |
| (a) Paying single commutation ..  | 77,737 |        | 91.65                                       | 74,944 |        | 88.32                                       |

| Contribution from estate proprietors on account of minor roads .. |          | 4,525   | 0  |
|   |          | 128,836 | 55 |
| Balance on January 1, 1919 ..                                     |          | 51,714  | 95 |
|   | Total .. | 180,551 | 48 |

| EXPENDITURE.   |          | Rs.     | c. |
|--|----------|---------|----|
| Payment made on account of principal roads and resthouses .. |          | 51,488  | 75 |
| Amount expended on minor works ..                            |          | 61,749  | 92 |
| Establishment and commission to division officers:—          |          |         |    |
| (a) Cost of District Road Committee establishment ..         | 13,895   | 66      |    |
| (b) Commission to division officers ..                       | 12,829   | 68      |    |
|  |          | 26,725  | 34 |
| Miscellaneous charges ..                                     |          | 3,282   | 95 |
|  |          | 143,246 | 96 |
| Balance on December 31, 1919 ..                              |          | 37,304  | 52 |
|  | Total .. | 180,551 | 48 |

There was much sickness, fever and influenza, prevailing in the district during the early part of the year.

4. In addition to the usual upkeep of minor roads, the following improvements were effected during the year :—

*New Gravelling.*

6th mile of Kadawalagedara-Witikule road.  
1st and 2nd miles of Rangama-Gonagama road.  
Three-fourths of 3rd, 4th, and half of 5th miles of Hiripitiya-Kumbukgete road.

*New Culverts.*

One of 2 ft. by 2 ft. by 14 ft. on 2nd mile, Mahakeliya-Katupota road.  
Three of 3 ft. by 3 ft. by 14 ft. on 10th mile, Danikitawa-Ambanpola road.  
Seven of 2 ft. by 2 ft. by 14 ft. on 5th, 7th, and 8th miles, Ambanpola-Ehetuwewa road.  
One of 2 ft. by 2 ft. by 14 ft. }  
One of 3 ft. by 3 ft. by 14 ft. } on 6th mile, Galgamuwa-Siyambalewa road.  
One of 3 ft. by 3 ft. by 14 ft. (double) }  
One of 2 ft. by 2 ft. by 14 ft. }  
One of 2 ft. by 2 ft. by 14 ft. (double) } on 2nd and 3rd miles, Ambale-Mahagalkadawala road.  
Three of 3 ft. by 3 ft. by 14 ft. }  
Three of 3 ft. by 3 ft. by 14 ft. on 1st and 2nd miles, Rangama-Gonagama road.  
Three of 3 ft. by 3 ft. by 14 ft. on 5th, 6th, and 7th miles, Muttettugala-Hiripitiya road.  
One of 3 ft. by 3 ft. by 14 ft. on 7th mile, Kadahapola-Rambawewa road.

*Retaining Walls.*

1·20 cubes of retaining wall were built on 2nd mile of Muttettugala-Hiripitiya road.

*Thalgodapitiya-Maduragoda Road.*—As in the previous year, much difficulty was experienced in collecting the contributions from mine owners towards the upkeep of the first 7½ miles of this important minor road, serving a considerable area and plumbago mines and estates. Of the nine persons interested in the road, only four persons contributed their full share, one reduced his contribution considerably, and leaving four defaulters. A meeting of those interested in the road was convened to discuss the question of the apportionment of the contributions towards the upkeep of the road, but only two gentlemen attended. A further attempt will be made to induce those interested to carry out their promises.

The question of opening up the remaining portion of the road, from Maduragoda to Yatawatta, has received the consideration of the Committee, and a sum of Rs. 1,600 has been voted to do up this section of the road.

January 31, 1920.

C. R. CUMBERLAND,  
Chairman.

REPORT OF THE PUTTALAM-CHILAW DISTRICT FOR 1919.

ADMINISTRATIVE CHANGES.

MR. W. E. WAIT was in charge of the district until April, when he was transferred to Colombo, and succeeded by Mr. G. F. Forrest, District Judge of Chilaw. Mr. J. D. Brown acted as Assistant Government Agent for the month of August, during the absence of Mr. Forrest on leave.

Mr. N. J. Martin, Crown Proctor of Chilaw, was appointed to act as District Judge, Chilaw, on Mr. Forrest's transfer in April. This post was subsequently filled by Mr. A. W. Seymour, who returned from war service in August.

Mr. M. Prasad, Police Magistrate of Chilaw, was transferred to Panadure in April. Mr. C. J. S. Pritchett, who succeeded him, was transferred to Galle in September, and was succeeded by Mr. L. L. Hunter.

Dr. S. L. Navaratnam was appointed Medical Officer, Puttalam, in March, *vice* Dr. C. F. Nugara, dismissed.

Dr. L. Anandappa was appointed Medical Officer, Kalpitiya, in succession to Dr. V. Kadirgamer-tamby, who left to join the Indian Medical Corps.

IMPORTANT EVENTS.

The signing of the Peace Treaty was duly celebrated on July 19 in the towns of Puttalam and Chilaw by ceremonial parades, band, music, displays of fireworks, and distribution of rice among the poor. Similar celebrations were held in several other parts of the district.

The first anniversary of the signing of the Armistice was celebrated on November 11 by the observance throughout the district of the two minutes' silence ordained by His Majesty the King.

Another important event was the acquisition of land, which was begun in November, for the railway extension from Chilaw to Puttalam. This is a work which is calculated to produce a great development of this district.

## FESTIVALS.

The usual March festival at St. Anna's, Talawila, was not held owing to the prevalence of influenza in the southern part of the district and the Western Province.

The July festival was celebrated on a much smaller scale than usual owing to the shortage of rice. Attendance was not permitted unless each pilgrim possessed a sufficient quantity of rice for his journey and stay. The festival lasted from July 17 to 27. About 7,000 pilgrims were present on the last day.

The annual festival at Munnessaram, which took place from August 14 to September 10, was also more sparsely attended owing to the rice scarcity. The number of pilgrims was about 5,000.

## RAINFALL.

|          |    |    | Total, 1919.<br>Inches. | Average Rainfall.<br>Inches. |
|----------|----|----|-------------------------|------------------------------|
| Puttalam | .. | .. | 47·02                   | 44·77                        |
| Chilaw   | .. | .. | 57·44                   | 49·38                        |

The north-east monsoon started remarkably early in September, and the rainfall was exceptionally heavy, resulting in the temporary flooding of a good part of the district. The main road from Puttalam to Wennappuwa was impassable at several places for some days. The late rains of the south-west monsoon and the phenomenally early burst of the north-east monsoon defeated all efforts made at salt manufacture.

## REVENUE AND EXPENDITURE.

The revenue of the district for the financial year October 1, 1918, to September 30, 1919, amounted to Rs. 1,436,273·98, showing a large increase of Rs. 563,035·94 over that of the previous year. This is mainly due to the exceptionally large quantity of salt sold during the year. There was also a rise in stamp duties, opium sales (due to the price of opium being raised), and forest revenue.

Arrack rents dropped heavily, and produced over a lakh less than they did two years ago. This may be attributed to the prohibition of off sales and the growing tendency for toddy in preference of arrack. There was also a large decrease in revenue from land sales, very little land having been disposed of.

The expenditure for the corresponding financial year shows an increase of Rs. 158,010·05 over that of the previous year. This is almost entirely due to the record quantity of salt manufactured in 1918, and the working of Palavi saltern on Government account for the first time in 1919.

## CONDITION OF THE PEOPLE.

On the whole, I consider that the general state of affairs in the district has improved since the declaration of peace. The rise in the price of copra and other coconut products has given a remarkable stimulus to coconut cultivation, which is the staple industry of practically the whole of Chilaw District and most of the coast line of Puttalam District. There are a number of coconut, fibre, oil, and desiccating mills already in the Chilaw District, and new ones are likely to be established shortly. The trade in coconut products is undoubtedly flourishing at present, and owners of estates and mills must be making large profits. The benefit, however, of the improvement of the copra market is considerably discounted by the scarcity and high prices of rice, and by the fact that the wages of labour have certainly not increased in proportion to the cost of living.

The rice shortage resulted in a noticeable increase of paddy cultivation, more particularly in Chilaw District, where a number of fields were cultivated that had been lying fallow for many years. The Chilaw District, however, owing to its flatness, its sandy soil, and the precarious nature of its rainfall is not suitable for extensive paddy cultivation, and can never be self-supporting in that respect.

The tobacco industry, which is carried on mainly in the Kalpitiya Division, was a success, and good prices were realized for the crops. The fishing population, which comprises the majority of the inhabitants of the sea coast, also had a successful season.

The health of the people was not satisfactory, but I gather that it seldom is. In the early part of the year there was a reflux of influenza cases in the south of the district and in Demala hatpattu, which resulted in heavy mortality. No other diseases, however, of an epidemic nature were reported, except a few isolated cases of measles and chickenpox. During the period of the north-east monsoon, which started early in September, ordinary malarial fever was extremely prevalent throughout the district. I believe this is the normal state of affairs.

## FOOD SUPPLY.

The food supply is not satisfactory. The only part of the district which is self-supporting is Demala hatpattu, in which a small and scattered population cultivates paddy and fine grain sufficient for its own consumption. Even this is dependent on the vagaries of the weather and the health of the inhabitants. In the rest of the district the people have to rely for their rice mainly on imported supplies. In May it became necessary to establish Government control over the distribution of rice throughout the greater part of the Island. The amount with which the Food Controller was able to supply this district was quite inadequate to provide even the minimum ration of one and a half measures per head per week. The results would have been disastrous had there not been a larger yala crop than usual (owing to increased activity in paddy cultivation in Chilaw District), and a certain quantity of paddy and kurakkan available from the adjoining districts.

The distribution of the rice consigned from Colombo to this district was carried out under my general supervision as follows:—Consignments of various quantities—according to the population of the area concerned—were sent weekly by rail to the following stations in Chilaw District: Lunuwila, Nattandiya, Madampe, and Chilaw. The consignment for Puttalam District was also sent by rail to Chilaw, and transported thence by paddy boat.

Each consignment was received by the Chief Headman of the area in which it was to be distributed and sold by him to the leading dealers for cash, the prices having been duly notified to me by the Deputy Food Controller, Chalmers Granaries.

The dealers were required to sell part of their stock by retail, and the remainder in fixed quantities to smaller dealers in the neighbouring villages. All dealers were given a license, without which it was an offence to deal in rice.

The retail prices were fixed, a certain amount being allowed for reasonable profit, cost of transport, and average shortage. Every dealer was required to show a list of these prices outside his boutique, and any dealer selling at a higher rate was liable to prosecution.

A card system was instituted, by which each householder received a ticket from the headman of his village stating the number of his household and the boutique from which he should get his rice. On production of this the dealer was authorized to issue rice at the current ration for the number mentioned. The dealer was also required to keep a list of his customers, and to note on it the date and quantity of each issue. The sales and recoveries were daily checked by the headman or some other responsible person.

In parts of the Chilaw District certain gentlemen volunteered their assistance in controlling the distribution, and their services were gratefully accepted. In other parts the headmen were responsible. This system of distribution, which is still in force, has, on the whole, worked well. A great deal of extra work was thus imposed on the headmen, who, with few exceptions, handled it successfully. I desire particularly to commend the conduct of the Chief Headmen. They were called upon to take up a trying and difficult task, involving much energy, discrimination, and responsibility, and their work has been of valuable assistance. Few complaints were received in regard to the distribution of rice, and most of them, on inquiry, proved to be unfounded. Complaints, however, as to the shortness of rations, the high prices, and, on occasion, the bad quality issued have been not infrequent. These are inevitable, and it is difficult to find a remedy as things are at present.

A certain amount of cassava was cultivated in Chilaw District, which somewhat alleviated the scarcity of food.

#### SALT.

Salt was manufactured in all the salterns in the district during the year, except at Kompumunai and Karaitivu. Owing to the high prices of foodstuffs, especially of rice, and the abnormal state of the weather, the greater portion of the waykkals was not cultivated. Nearly one-fourth of the total area of all the salterns was manufactured, and the outturn was not a success, as it began to rain just at the time when salt was being formed in most of the pans. The total collection according to the estimates furnished by the supervisors amounted to 32,280 cwt.

A quantity of 1,444 cwt. of self-formed salt was collected from the beds of waykkals at Karaitivu saltern, and 202 cwt. at Kanakkankaliyodai, near Kalpitiya, and these quantities were received into store.

The retail price of salt was from 5 to 6 cents per pound. The restriction for the transport of salt to other Provinces was removed by order of Government in January, 1919, and salt was issued in large quantities to padda boats for transport to the Western Province.

The sale price of salt was again reduced from Rs 3.75 to Rs. 3 per cwt. at Puttalam and Kalpitiya stores, and to Rs 3.40 at Udappu store.

The Palavi saltern, which was purchased by Government in 1918 from the heirs of the late Dr. P. S. Brito, was worked for the first time during the year under review, after a lapse of eight years. As the waykkals had been neglected and filled with earth, and the bunds of the reservoirs were quite worn out, a considerable amount of labour and materials had to be requisitioned for putting the same into working order. A staff consisting of one supervisor, one overseer, and six patrols was appointed, and necessary operations for working it were started early in February and continued till July. A hundred coolies who had previous experience of the work were brought down from Southern India for the purpose of improving and manufacturing the saltern. A quantity of 5,189 cwt. of salt was collected up to September 10. The progress of manufacture was stopped by the unusual fall of rain early in September, and further collection was found impracticable.

Mr. F. W. Gooch, Salt Adviser to the Government of Ceylon, who visited Puttalam during August for the first time, inspected the various salterns in the district and collected information with regard to the system of manufacture adopted. He also paid two subsequent visits during the year in connection with the re-organization of the Department under a new system.

The Department was under the control of an Inspector, assisted by a Sub-Inspector, three Storekeepers, six Supervisors, five First Class Constables, six Second Class Constables, 56 Patrols, and five Searchers. The temporary staff at Udappu, Kalpitiya-Tilliyadi, and Nachchikalli comprised one Storekeeper, one First Class Constable, nine Patrols, and a caretaker.

A record of the work done during the last five years is herewith annexed :—

|                      | 1914-15.   | 1915-16.   | 1916-17.   | 1917-18.   | 1918-19.    |

| Revenue ..           | 991,227 10 | 976,880 20 | 400,061 98 | 317,722 50 | 839,588 10  |
| Expenditure ..       | 132,799 12 | 95,292 54  | 86,751 97  | 158,516 34 | 303,557 71* |

\* This includes a sum of Rs. 13,363.76 incurred in working the Palavi saltern for the first time.

## OTHER INDUSTRIES.

The coconut and fibre mills in Chilaw District were in full swing during the year, and afforded employment to a large number of coolies, local and imported. Other minor industries exist, such as carpentry, pottery, brick manufacture, goldsmith work, &c., but only for local uses and on a small scale.

## MEDICAL AID AND SANITATION.

There are three hospitals in the district, at Puttalam, Chilaw, and Marawila, and a qualified Medical Officer at Kalpitiya. A small field hospital is very desirable at the latter place, in view of the difficulty of transporting patients in case of necessity to Puttalam hospital, which is 28½ miles by land and about 20 miles by sea.

There are also eight permanent and eleven outdoor permanent dispensaries. The Nattandiya dispensary, which was opened last year, would be more useful if shifted a short distance in the direction of Dunkannawa, where it would serve a large number of villages near the district boundary. Nattandiya itself contains several private dispensaries run on cheap lines.

The health of the population was unsatisfactory in the early part of the year. Fever and dysentery prevailed in Pitigal korale south, more particularly among the inhabitants of the sea coast. In Pitigal korale north, Puttalam pattu, and Demala hatpattu a severe type of influenza was experienced, mainly in the interior villages. In Kalpitiya division only the Mudaliyar reports a marked decrease in fever cases as compared with those in 1918.

Parangi is prevalent in Demala hatpattu and Rajakumarawanni pattu. There is an increasing tendency among these patients for European treatment, and they are attended to by an itinerating apothecary. Most of them, however, do not continue the treatment long enough to effect a permanent cure. A parangi hospital at Anamaduwa is very necessary.

The latter part of the year was more healthy than usual. This was probably due to a fairly evenly distributed rainfall instead of the ordinary continuous drought.

## SANITARY BOARD AND SANITATION.

In the Puttalam District Kalpitiya is the only Sanitary Board town. The Board consisted of the Assistant Government Agent as Chairman; and Messrs. A. E. Wijesinghe, District Engineer, Puttalam; G. K. Swaminathan, District Mudaliyar, Kalpitiya; D. J. R. de Vasz of Kalpitiya; and Dr. V. Kadirama-thamby of Kalpitiya, who was transferred during the middle part of the year, and was succeeded by Dr. N. Anandappa.

The sanitary condition of the town is fair. There are two scavenging carts working in the town.

The chief sources of the revenue are derived from the taxes, licenses, and rents of the fish and green markets.

The total revenue for the year was Rs. 3,832·01 and the payments Rs. 3,480·74, leaving a balance of Rs. 351·27 on December 31, 1919.

The town is supervised by the District Mudaliyar, Kalpitiya. Only one meeting was held during the year.

In the Chilaw District there are four Sanitary Board towns, viz., Madampe, Marawila, Nattandiya, and Udappu.

The Board consisted of the Assistant Government Agent as Chairman; and Messrs. A. H. Nathanielsz, District Engineer, Chilaw; J. E. Corea, Mudaliyar, Pitigal korale north, Chilaw; C. G. de Alwis, Mudaliyar, Pitigal korale south, Wennappuwa; C. P. de Silva of Moratuwa; Dr. J. Fernando of Marawila; and Mr. J. P. Pandittesekera of Madampe.

The sanitary conditions of the above towns are fair.

The revenues of these towns are derived from the taxes, licenses, and markets.

Madampe is the largest and the most important town among the four in the Chilaw District.

The following works have been started for the improvement of the following towns :—

Madampe is being surveyed for the improvement of the drainage system.

Two sites in Madampe, one in old town and the other in new town, are being surveyed for the acquisition of sites for two public latrines.

To bring the conservancy of the Madampe latrines to a proper footing, the householders have been noticed to erect latrines on sanitary lines, and the people have already started the work.

The public latrine in Marawila was completed in October at a cost of Rs. 1,200. There were no other improvements during the year.

Nattandiya is being surveyed for the improvement of the drainage system. No other improvement was done.

*Revenue and Expenditure of the Four Towns.*

The total revenue of Madampe was Rs. 27,252·97 and the payments Rs. 11,054·48, leaving a balance of Rs. 16,198·49 on December 31, 1919.

The total revenue of Marawila was Rs. 2,113·59, and the payments Rs. 1,965·15, leaving a balance of Rs. 148·44 on December 31, 1919. During the year a loan of Rs. 450 had to be taken from the Madampe Sanitary Board owing to shortage of funds. I propose to revise the assessment and extend the limits of this Sanitary Board area.

The total revenue of Nattandiya was Rs. 6,090·34 and the payments Rs. 2,947·66, leaving a balance of Rs. 3,142·68 on December 31, 1919.

The total revenue of Udappu was Rs. 2,130·63 and the payments Rs. 1,684·18, leaving a balance of Rs. 446·45 on December 31, 1919.

There are two inspectors, one for Madampe and one for Marawila and Nattandiya. Udappu is supervised by the Udaiyar.

During the year there was only one meeting, which was held on February 3, 1919.

#### EDUCATION.

There are separate School Committees for the two districts of Puttalam and Chilaw. The Rev. Father F. Bougarel of the Puttalam Committee was transferred in the latter part of the year, and was succeeded by the Rev. Father G. Guesnon. There were no changes in the personnel of the Chilaw Committee.

There are 11 Government schools, 2 new schools having been erected during the year at Andigama and Galawewa, and 28 grant-in-aid schools in Puttalam District. In Chilaw District there are 17 Government and 75 grant-in-aid schools.

The various Village Committees of Chilaw District, Puttalam pattu, Kalpitiya division, and the Sanitary Boards of Udappu and Nattandiya contribute to the School Committee funds. The villagers of Demala hatpattu contribute unskilled labour towards the repair of the schools.

The Etiyawala Girls' School and the Dikwella Girls' School were extended, and in the case of the rest of the schools the usual repairs were carried out.

\*The funds of the two Committees stand as follows :—

|                 |        | Puttalam District. |    | Chilaw District. |    |
|-----------------|--------|--------------------|----|------------------|----|
|                 |        | Rs.                | c. | Rs.              | c. |
| Opening balance | .. ..  | 2,578              | 35 | 12,970           | 0  |
| Receipts        | .. ..  | 1,576              | 43 | 5,638            | 30 |
| Expenditure     | .. ..  | 3,197              | 52 | 3,908            | 22 |
| Closing balance | /.. .. | 957                | 26 | 14,700           | 8  |

#### POLICE AND CRIME.

Chilaw District is a "policed area," with four stations: Chilaw, Madampe, Marawila, and Wennappuwa, all on the main road from Colombo to Chilaw.

There is a small force of constables in charge of a Sub-Inspector in Puttalam town. In the rest of the Puttalam District the headmen are responsible for the police work. Puttalam is, on the whole, a peaceable place, and the majority of cases of grave crime are committed in the Chilaw District.

The statistics are not very satisfactory. They show a considerable increase in every class of crime, except burglary. The most noticeable increase is in cases of grievous hurt and robbery, the figures for the former class of crime being 100 per cent. above those of last year. A comparison of the crime statistics with those of 1917 leads to the impression that there is a growing tendency to lawlessness in the Chilaw District, which can hardly be accounted for by the natural increase of population. The large increase in crimes of violence is somewhat startling, and it is difficult to say what is the cause. The figures for cases of cattle theft and theft of coconuts are also considerably higher than last year. The former is undoubtedly due to the food shortage, and the latter may be attributed to the enhanced price of coconuts.

Twelve murders were reported during the year, as against 8 in 1918. Three of them were the result of callous and unnecessary violence, and the Tettapalai murder was a particularly savage crime. The Assistant Superintendent of Police reports a marked increase in drunkenness, much greater than is represented by the "drunk and disorderly" returns.

The only satisfactory point in the statistics is the percentage of convictions to true cases, which has risen from 31 per cent. in 1918 to 38 per cent. The percentage in police cases only has risen to 40 per cent. The minor headmen did good work in assisting the police, and the Assistant Superintendent records that the improvement in the number of convictions is due in some measure to their co-operation.

The Police Force in the district was throughout the year in charge of Mr. M. H. Ratton, Assistant Superintendent of Police, who displayed much energy and interest in his work.

#### VILLAGE COMMITTEES AND TRIBUNALS.

Village Committees exist throughout the district, except in Akkarai pattu north of the Kalpitiya division. The commutation in lieu of labour is optional, and the rate is Re. 1 per every male resident in Pitigal korale north, Pitigal korale south, Puttalam pattu, and Pomparippu pattu in Kalpitiya. In Demala hatpattu, where the roads require more days' labour from each man owing to the scanty population, the commutation is fixed at Rs. 2·50.

There are Village Tribunals for all the Village Committees, except in Pomparippu pattu, where breaches of rules are tried by the Mudaliyar as Chairman of the Village Committee. There are two Presidents: one for Chilaw and one for Puttalam. The former holds sessions at Madampe, Marawila,

Lunuwila, and Rajakadaluwa ; and the latter at Anamaduwa and Maturankuli alternately. The work done by the President of Chilaw is heavier than that of the President of Puttalam.

The figures for the two districts are as follows :—

|  | Puttalam. |           | Chilaw. |           |
|--|-----------|-----------|---------|-----------|
|  | Civil.    | Criminal. | Civil.  | Criminal. |
| Cases pending on January 1, 1919 ..          | 3         | 33        | 62      | 260       |
| Instituted during 1919 ..                    | 544       | 308       | 929     | 4,977     |
| Decided during 1919 ..                       | 547       | 341       | 939     | 4,915     |
| Pending on December 31, 1919 ..              | —         | —         | 52      | 322       |
| Appeals to the Assistant Government Agent .. | 1         | 5         | 2       | 21        |

#### IRRIGATION.

**Major Works.**—Maha Uswewa in the Puttalam District is the only major work at present under cultivation. It now irrigates an area of 412 acres, but is capable of irrigating a good deal more. A cadastral survey has been made, and there is some prospect of a larger acreage being opened up in paddy.

The restoration of Tabbowa tank was resumed in November after a lapse of several years. This is a very ancient tank, which is capable of irrigating a large area of Crown land either for coconuts or for paddy. Its restoration is expected to be of great benefit to the district, as it is also intended to provide from this tank a sufficient water supply for the Railway and for Puttalam town. Construction of masonry works is now being carried out by pioneers from Unnichchai under the direction of Mr. J. H. Fraser, Divisional Irrigation Engineer.

**Minor Works.**—The village tanks are supervised by two Irrigation Sub-Inspectors stationed at Anamaduwa and Chilaw. The former is in charge of 204 tanks, of which 123 are restored. The latter has 111 tanks, of which 91 have been restored. The rainfall in the last four months of the year was very good, though somewhat excessive, and nearly all the irrigable land was cultivated, which should result in a much larger crop than was gathered last year. Most of the village tanks depend on local rain for their water supply, and a certain amount of paddy fields in Chilaw District are cultivated by rain water without the aid of tanks.

#### LAND.

Practically no land was sold during the year under review. The total extent was 4 acres 1 rood and 30 perches, which realized Rs. 408·66. An extent of 3 acres and 25 perches was settled on certificates of quiet possession.

#### WORKING OF WASTE LANDS ORDINANCE.

In Puttalam District the extent brought under Waste Lands Ordinance was 54A. 0R. 31P. The whole of it was declared Crown property. Of lands brought under the Waste Lands Ordinance during past years, an extent of 194A. 0R. 26P. was sold to the claimants for Rs. 2,912·50, and an extent of 2,639A. 0R. 18P. was declared to be the property of the Crown. In Chilaw District an area of 106A. 2R. 1P. was brought under Waste Lands Ordinance. Of this, 43A. 0R. 3P. was declared Crown property, and the remainder of the lands are awaiting settlement. Of lands brought under Waste Lands Ordinance in previous years, an extent of 86A. 1R. 18P. was declared Crown property, and 15 acres were sold to the claimants for the sum of Rs. 225.

#### ACQUISITION.

An extent of 29A. 0R. 30·5P. required for the construction of the first five miles of the Chilaw-Puttalam Railway was acquired during the year at a cost of Rs. 34,110·09. The rest of the acquisition will be completed in the current year. Two small areas—for a latrine site at Marawila and a Gansabhawa road at Haldanduwana—were also acquired.

#### EXCISE.

The arrack rents for the two districts are sold separately. The Chilaw rent for the year ending September 30, 1920, was bought by Mr. Philip Cooray for Rs. 230,184 ; the Puttalam rent was bought by Messrs. L. S. and F. B. H. Fernando for Rs. 82,902. The figures for the previous financial year were Rs. 190,000 and Rs. 72,990, respectively.

The toddy rents are sold tavern by tavern, the aggregate amounts being—

|                  | 1918-19. |    | 1919-20. |    |
|------------------|----------|----|----------|----|
|                  | Rs.      |    | Rs.      |    |
| Chilaw .. .. .   | 91,350   | .. | 115,450  | .. |
| Puttalam .. .. . | 7,995    | .. | 4,290    | .. |

The number of licenses issued for both districts is as follows :—

|                 | Arrack. | Toddy. | Foreign Liquor. |
|-----------------|---------|--------|-----------------|
| 1918-19 .. .. . | 88      | 44     | 26              |
| 1919-20 .. .. . | 86      | 43     | 23              |

The comparative figures of arrack and toddy consumption are as follows:—

|             |    | <i>Arrack.</i>          |         |
|-------------|----|-------------------------|---------|
|             |    | Consumption in Gallons. |         |
|             |    | 1918.                   | 1919.   |
| Chilaw ..   | .. | 34,727                  | 39,416  |
| Puttalam .. | .. | 10,500                  | 12,207  |
|             |    | <i>Toddy.</i>           |         |
| Chilaw ..   | .. | 222,361                 | 229,350 |
| Puttalam .. | .. | 17,008                  | 12,242  |

The increased consumption of arrack is due to the rise in the copra market.

It is difficult to gauge the results of the prohibition of "off sales" in Chilaw District, with the exception of Chilaw, Nattandiya, and Madampe. This was an experiment started in 1918, and another rent period is required before any definite decision can be arrived at. The measure, I am given to understand, is not popular in the district.

The Excise Department has exercised an effective control, and the relations between the officers of that Department and the headmen have been entirely satisfactory. Only 106 prosecutions were entered in the course of the year.

#### PUBLIC WORKS.

*Chilaw-Puttalam Railway.*—The first five miles of this line have been acquired and handed over to the Chief Construction Engineer. The acquisition of the remainder of the land will be taken up in the current year.

*Public Works Department Roads.*—These were maintained for the most part in good order. The main road from Chilaw to Puttalam was badly washed away in two places between the 3rd and 4th miles during the heavy rain in the north-east monsoon.

*Bridges.*—A proper steel bridge in place of the existing ramshackle wooden bridge over the lagoon at Chilaw is an urgent requirement. It is a proposal of long standing. The present bridge appears to require repairs two or three times yearly, and during these intervals a ferry has to be used, which causes a good deal of inconvenience. I trust that, now the war is over, some steps will be taken to get on with this very necessary improvement.

*New Buildings.*—A start has been made at building new quarters for the District Judge at the back of the old Assistant Government Agent's bungalow, which is now in a state of decay.

#### LICENSES, &C., UNDER THE VARIOUS ORDINANCES.

*Opium.*—The number of registered consumers and vedaralas at the end of 1919 was 1,269, and the total monthly consumption was 820 ounces. The decrease is due to the death of certain consumers and the cancellation of certain licenses.

*Guns.*—There are 674 licensed guns in Puttalam District and 1,735 in Chilaw District. Five licenses for repairing guns were issued.

*Elephants.*—Seven licenses at the reduced rate of Rs. 50 were issued to capture elephants in Puttalam District, where they are a considerable nuisance. Three rogue elephants were proclaimed and free licenses were issued. Only one, however, was taken up for an elephant disturbing the Public Works Department lines on the Kurunegala road. This was issued to a Malay gentleman of Colombo, who came up and shot a number of other animals in the most sensational manner, but unfortunately failed to observe the elephant. Twenty game licenses were issued, but none for shooting buffaloes, owing to the shortage of buffaloes.

*Vehicles.*—Cart licenses outside Local Board limits numbered 3,446, and boat licenses 80.

*Dogs.*—6,178 dogs were registered during the year. More than half of this number belonged to Pitigal korale south.

*Kandyan Marriages.*—Twenty-five Kandyan marriages were registered in 1919, and 4 applications for divorce were received.

#### MISCELLANEOUS DEPARTMENTS.

*Forest Revenue.*—The forest revenue for 1919 from timber sold to private parties amounted to Rs. 5,376·69. Apart from this, 17,053 cubic yards of firewood were supplied to the Railway, and a quantity of palu timber and other woods to the Public Works Department. The following agreements were entered into for chena re-forestation in the Chilaw District:—

|               | Acres. |               | Acres. |
|---------------|--------|---------------|--------|
| Korakahawa .. | 20     | Nugahakele .. | 60     |
| Kotakanda ..  | 30     | Medagama ..   | 60     |
| Kalimulla ..  | 50     |               |        |

*Customs.*—There is a very small port at Kalpitiya, where a few vessels carry on a coastwise trade in the north-east monsoon. No import duty was collected, import from India being prohibited. The export duties amounted to Rs. 123·70.

Puttalam Kachcheri,  
March 19, 1920.

G. F. FORREST,  
Assistant Government Agent.

## APPENDIX.

## I.—REPORT OF THE LOCAL BOARD, PUTTALAM, FOR 1919.

The Board consisted of the following members :—

*Official* : Mr. W. E. Wait, Assistant Government Agent (Chairman), who was succeeded in April by Mr. G. F. Forrest ; Mr. A. E. Wijesinghe, District Engineer ; Dr. S. L. Navaratnam, Medical Officer.

*Unofficial* : Mr. W. S. Strong ; Mr. A. E. Abeyakoon ; Mr. S. A. Mohamado Haniffa Marikar.

*Staff*.—Mr. E. A. Wijesinghe, Secretary ; Mr. C. W. Brito, Inspector.

*Meetings*.—Eleven meetings of the Board were held during the year.

*Peace Celebrations*.—These were successfully celebrated on July 19, 1919. The Board contributed a sum of Rs. 300 towards this fund. A Union Jack with a fly rope costing Rs. 60 was purchased for a temporary flagstaff erected for the occasion. This will be replaced by a permanent one during the current year.

*Public Health*.—The health of the town was satisfactory, except for the usual outbreak of malaria in the north-east monsoon, which, however, was not so bad as in the previous year. There were two cases of enteric fever in Chenakudirippu. One proved fatal, the patient dying in hospital. All necessary preventive measures were taken to check the spread of the disease.

*Lighting*.—Twelve petrol lamps and 25 kerosine oil lamps were lit daily, except on moonlight nights.

*Sanitation*.—A sum of Rs. 3,142·18 was spent during the year by the Board on scavenging the town, and a further sum of Rs. 1,071·56 was spent for conserving the public and private latrines.

*Water Supply*.—The town is urgently in need of a proper water supply. The residents have to depend entirely on the present supply from Chenakudirippu, which runs very low for three or four months during the usual drought. The revival in the latter part of the year of the restoration of Tabbowa tank affords a prospect of relief from this long-standing difficulty. This tank, which is about 8 miles from Puttalam on the Anuradhapura road, is calculated to be capable of not only irrigating a large area of cultivable land, but also of supplying an adequate quantity of water for the town.

*Drains*.—The existing drains in the town are most unsatisfactory, and steps are being taken to improve the whole drainage system, for which I expect to address Government for some help.

*Roads*.—A sum of Rs. 1,044·80 was spent during the year for maintaining all the gravel roads, and a further sum of Rs. 886·45 was spent for metalling the Church road and Kanganikulam road for the first time.

*Public Buildings*.—All the Local Board buildings were kept in good repair.

The following statements are annexed to the report :—

Comparative Statement showing the Working of the Thoroughfares Ordinance during 1918 and 1919.

|   | 1918. |       | Percentage<br>on Number<br>under<br>Head 2. | 1919. |       | Percentage<br>on Number<br>under<br>Head 2. |

## -REVENUE.

*Assessment Tax.*—The tax of 5 per cent., the maximum allowed by the Ordinance, is levied on the assessed annual value of tenements, &c. The increase in revenue under this head is due to the extension of the town limits and the collection of arrears of the preceding year.

*Commutation Tax* was satisfactorily collected.

*Other Taxes.*—The increase under this head is due mostly to increased revenue from motor car taxes. More cars are now plying for hire than in 1918.

*Liquor Licenses.*—The fall in revenue under this head is small, due to the reduction in stamp duty. This is probably due to smaller consumption of foreign liquor consequent on the rise in price since the armistice.

*Carts and Boats.*—The increase is due to a larger number of carts licensed.

*Other Licenses.*—The decrease in revenue under this item is negligible.

*Markets.*—The increase is due to higher tenders for the rents.

*Other Rents.*—The increase is due to higher bids obtained at the auction.

*Fines.*—The increase is due to a larger number of prosecutions.

*Miscellaneous.*—The increase under this head is due to increased revenue from all other sources. The withdrawal of Rs. 3,500 from the bank is shown under this head.

#### EXPENDITURE.

*Establishment.*—The Secretary, who was doing dual duties as Secretary and Inspector, was allowed to resign from sanitary work, retaining the supervision of public works on an additional payment of Rs. 360 to his pay as Secretary. The overseer was discontinued, and a qualified Sanitary Inspector was employed on a salary of Rs. 720, with Rs. 120 bicycle and Rs. 50 uniform allowances. The difference in the expenditure is due to these changes.

*Office Contingencies.*—The increase in expenditure under this head is due to increased cost of stationery, printed forms, &c., consequent on general rise in the price of commodities since the end of the war.

*Revenue Services.*—The increase is due to payment of more commission for better collection of taxes.

*Sanitation.*—The increase under this head is due to the purchase of a night soil cart at a cost of Rs. 636·92 and increased cost of buckets and disinfectants.

*Lighting.*—The decrease is not due to less lighting. On the contrary, the lighting was probably better than in previous years. The last year's expenditure was abnormal owing to the purchase of four new lamp columns. There are forty-two lamps lighting nineteen days per month for four hours each day.

*Public Works: Maintenance.*—Most of the roads were maintained in fairly good order. The increase in cost is due to (1) taking over one mile of road of the Cemetery road, which was kept up by the Public Works Department; (2) purchase of two hand carts; (3) purchase of a road roller; (4) purchase of a water cart; (5) renewing the painting of street plates; (6) renewing the cement floor of markets; (7) repairing the market drains; and (8) getting zinc piping frames with polished steel hooks to hang up in the meat market. Owing to the heavy north-east monsoon rains the gravel pit at Kokkawila was filled with water, and the gravelling of the roads had to be stopped. The usual difficulty of getting a satisfactory metal contractor was again experienced in 1919.

*New Works.*—The expenditure under this head is mostly spent on the two new latrines built (for the women of Pitipana and barbers' quarters) out of the four latrines sanctioned by the Board. The work of the other two latrines was stopped for want of bricks. The heavy north-east rains interfered with burning of bricks.

*Miscellaneous.*—The increase under this head is due (1) to payment of Rs. 195 to the lessee of the cattle gala, who was not allowed to keep on the Saturday Fair sheds at the gala premises; and (2) to payment of Rs. 200 for Peace Celebrations.

*General Remarks.*—Chilaw is a town of growing importance owing to its position as an agricultural centre and an outlet for the produce of the fishing industry and for coconut produce, largely on account of being favourably situated in the matter of communication by rail, canal, road, and sea with the rest of the Island and Colombo.

An index of the growing prosperity of the town is the increase in revenue paid in during the year at the local Government Treasury and the rise in rents and acute shortage of houses.

Government is taking steps to build a Residency for the District Judge, and a site has been marked out for quarters for the Assistant Superintendent of Police. This has involved a deviation of the roads on the beach portion of the town, and will probably require a further re-distribution of the street lamps.

Sanitation was much improved in the year under review by the measures taken by the Board, under the leadership of Mr. Forrest, to (a) demolish certain insanitary and overcrowded dwellings in Pitipana quarters, evacuation of which, however, was not effected without recourse to the penal provisions of the Housing Ordinance (No. 19 of 1915); (b) erect adequate latrine accommodation, no less than four new public latrines being commenced during the year.

Sites for further latrines are being acquired.

The surface drains are now in need of repair, and steps have been taken to put the matter in hand. A difficulty in this connection arises out of the low-lying position of the bazaar, when the average level of the drains is less than a couple of inches above the level of the lagoon.

Steps have been taken to form a nursery for shade trees to be planted out along the beach roads.

Pension rules for the staff have not yet obtained the sanction of the Attorney-General's Department, but a Select Committee is dealing with the matter.

A ruinous and insanitary boutique at the cattle gala, which formerly produced a food rent to the Board, has been demolished, and will be replaced by a more modern structure.

Moved by the rapid rise in land values noticed during the year, the Board decided to acquire the parcel of land belonging to Mr. T. M. Asmoon on the Colombo road, in extent 5 acres, for a new General Cemetery, owing to objections to the existing site, chief of which is its distance from the town, and the exposed and difficult approach to same along the shore. This item will absorb a great part of the balance of revenue in hand.

The chief wants of the town are:—

(a) A good water supply, all drinking water at present being transported in carts from the Beach road over the lagoon to the main part of the town.

(b) A permanent bridge over the lagoon to connect both portions of the town.

Two schemes to supply these wants received the approval of Government, and money was voted for the same before the critical period of the great war, but the projects were abandoned in the later years of the war.

*Public Health.*—The health of the town during the year was poor compared with other years. Malaria to a great extent prevailed during the latter part of the year.

There were 164 births and 432 deaths, against 197 births and 210 deaths in 1918.

The total rainfall for the year was 57·49 inches, against 47·01 inches in 1918. The unusually heavy rain in the first four months produced much sickness.

*Meetings of the Board.*—There were ten meetings of the Board during the year: seven ordinary meetings and three special meetings.

*Working under the Thoroughfares Ordinance.*—A comparative statement showing the working of the Thoroughfares Ordinance is annexed :—

|   | 1918. |       | Percentage on Number under Head 2. | 1919. |       | Percentage on Number under Head 2. |
|---|-------|-------|------------------------------------|-------|-------|------------------------------------|
|   |       |       |                                    |       |       |                                    |
| 1. Population of local area by latest Census ..   | —     | 5,034 | —                                  | —     | 5,034 | —                                  |
| 2. Number of resident males by division officers' lists reported liable to labour ..      | —     | 2,358 | —                                  | —     | 2,299 | —                                  |
| 3. Discharged obligation within local area by—  |       |       |                                    |       |       |                                    |
| (a) Paying single commutation ..  | 1,847 |       | 78.33                              | 1,880 |       | 81.77                              |
| (b) Paying double commutation ..  | 40    |       | 1.69                               | 47    |       | 2.044                              |
| (c) Labouring six days ..   | —     |       | —                                  | —     |       | —                                  |
| (d) Labouring twelve days ..  | —     |       | —                                  | —     |       | —                                  |
| 4. Total discharged obligation ..   |       | 1,887 | 80.03                              |       | 1,927 | 83.81                              |
| 5. Failed to discharge obligation within local area, but otherwise accounted for as—      |       |       |                                    |       |       |                                    |
| (e) Exempted on account of age, death, disqualification, or physical inability to work .. | 59    |       | 2.502                              | 51    |       | 2.22                               |
| (f) Paid or laboured elsewhere ..   | 151   |       | 6.403                              | 178   |       | 7.74                               |
| (g) Double entries or entries by mistake ..   | 46    |       | 1.95                               | 26    |       | 1.13                               |

Chilaw, March 10, 1920.

A. W. SEYMOUR,  
Chairman.

### III.—REPORT OF THE DISTRICT ROAD COMMITTEE, PUTTALAM, FOR 1919.

THE Committee consisted of the Assistant Government Agent (Chairman); the District Engineer; and Mr. J. H. Ilangantilleka, Ratemahatmaya, Demala hatpattu, as Additional Member; and three Unofficial Members, viz., Messrs. W. A. Muttukumaru; W. R. H. Wijesinghe, Mudaliyar, Puttalam pattu; and Mudaliyar S. M. P. Vanderkoen, representing the European, Burgher, and Native communities, respectively.

*Staff.*—Mr. Frank de Costa continued to be clerk to the Committee during the year.

One meeting was held in the year.

The usual apportionment of Rs. 3,838 towards principal roads was paid into the General Treasury.

The finances of this Committee are deficient for the work involved, and only permit of the ordinary upkeep of roads. The works were carried out under the supervision of the Chief Headmen.

Statement A annexed shows the working of the Thoroughfares Ordinance during 1919, and Statement B the revenue and expenditure for the year :—

#### A.—Statement showing the Working of the Thoroughfares Ordinances during 1918 and 1919.

Puttalam, March 19, 1920.

G. F. FORREST,  
Chairman.

## IV.—REPORT OF THE DISTRICT ROAD COMMITTEE, CHILAW, FOR 1919.

THE Committee was composed of the following members:—The Assistant Government Agent (Chairman); the District Engineer, Chilaw; and Mr. J. E. Corea, Mudaliyar, Pitigal korale north (Official Members); and Messrs. F. C. Gedge, N. J. Martin, and T. M. Fernando, Unofficial Members, representing the European, Burgher, and Native communities, respectively.

2. One meeting was held at Chilaw during the year.

3. A sum of Rs. 10,576 was paid into the Colonial Treasury in last May on account of principal roads in the Chilaw District.

4. The Bangadeniya-Mandalana road was maintained as usual by the District Road Committee at the joint expense of the Committee and the estate proprietors who were interested in it.

5. Statement A in the following table shows the working of the Thoroughfares Ordinance during 1918 and 1919, and Statement B shows the main heads of revenue and expenditure during 1919:—

## A.—Statement showing the Working of the Thoroughfares Ordinances during 1918 and 1919.

Puttalam, March 19, 1920.

G. F. FORREST,  
Chairman.

# NORTH-CENTRAL PROVINCE.

## ADMINISTRATION REPORT OF THE GOVERNMENT AGENT, NORTH-CENTRAL PROVINCE, FOR 1919.

Area, 4,080½ square miles ; Population in 1911, 86,269.

### I.—GENERAL REMARKS AND ADMINISTRATIVE CHANGES.

THE Government Agent and the Senior Chiefs of the Province attended a conference at Kandy in January, at which measures were decided on with a view to encouraging the development of land for food production. These measures have resulted in a marked increase of cultivation.

Influenza continued its ravages in the early part of the year, and was responsible for a high mortality.

Peace Celebrations were held throughout the Province in July.

Mr. H. R. Freeman, C.C.S., who had administered the Province since 1913, retired in August, and was succeeded by the writer.

Mr. F. C. Gimson, C.C.S., succeeded Mr. L. L. Hunter as Police Magistrate and Office Assistant in September.

### II.—REVENUE AND EXPENDITURE.

*Revenue.*—The revenue for 1919 collected at the Kachcheri was Rs. 187,517 as compared with Rs. 173,828 in 1918, an increase of Rs. 13,689, in spite of a decrease of Rs. 14,400 owing to the discontinuance of the arrack rent in September. Stamp Duties, Fines, Irrigation Recoveries, Land Revenue, and Land Sales all show increases indicative of the increase in general prosperity. The revenue derived from the Railway and Post and Telegraphs is not credited here.

The recoveries under the chief heads for the last two years were as follows :—

|                               | 1918.  |    |    | 1919.  |    |
|-------------------------------|--------|----|----|--------|----|
|                               | Rs.    | c. |    | Rs.    | c. |
| Arrack .. .. .                | 72,749 | 52 | .. | 58,334 | 59 |
| Stamp Duties .. .. .          | 12,042 | 95 | .. | 17,463 | 95 |
| Irrigation Recoveries .. .. . | 15,385 | 66 | .. | 25,723 | 88 |
| Rent of Lands .. .. .         | 10,554 | 72 | .. | 12,784 | 54 |
| Forest Department .. .. .     | 10,675 | 11 | .. | 12,314 | 23 |
| Land Sales .. .. .            | 29,050 | 4  | .. | 36,563 | 82 |

*Expenditure.*—The expenditure from Government Agent's votes, representing but a fraction of the total expenditure of the Province, for the financial year 1918-19 was Rs. 16,301·67, as compared with Rs. 17,191·42 in the previous year. The Province suffered from the continued necessity of retrenchment due to war conditions. Money was not available for any but the most urgent needs. No new works were undertaken, and expenditure on upkeep and maintenance was reduced to the minimum.

### III.—CONDITION OF THE PEOPLE.

The year was one of great prosperity in the North-Central Province. The rainfall was plentiful, the village tanks filled well, and excellent meda and yala paddy crops were obtained. The liberal chena policy of my predecessor was triumphantly vindicated, and, while the greater part of the Island was suffering from food shortage, this Province was able to export large stocks of surplus grain to less fortunate districts, and the villager reaped a rich harvest owing to the high prices ruling. Kurakkan reached the record figure of Rs. 9 a bushel, while other chena produce, such as chillies, gingelly, vegetables, &c., as well as paddy, sold at two or three times the normal rates. While large profits were made by the middlemen in Anuradhapura and the larger bazaars, there is no doubt that a good share of the profits went to the village producer, and a general rise in the standard of living has resulted. The villager, who normally lived by bartering grain for the necessities of life, has now money to spare for the luxuries of imported foodstuffs, cloths, land, and cattle. The number of applications for land received in 1918 was 879, and in 1919 1,321. Valuable cart bulls worth from Rs. 100 to Rs. 200 are now far more common in the villages than heretofore.

*Food Supply.*—The local food supply of the villager consists of paddy, kurakkan, and other chena produce, coconuts, tank fish, and game. The addition of imported articles to his diet depends upon his having surplus grain to barter or money to buy from the itinerant trader.

*Health.*—The mortality from influenza in the early part of the year was very large. The deaths for the first four months were 4,028, as compared with 815 in the same period of the previous year. In the affected villages the people were largely unable to attend to their cultivation and the watching of their crops, with the result that many chenas were damaged by cattle or wild animals and abandoned.

Special measures were taken to supply food and treatment to the sick. It is no doubt due to the abundance of the food supply already referred to that the incidence of the disease was not more widespread and its effect on the general prosperity more lasting.

The health of the people was good throughout the remainder of the year. Parangi and fever were less prevalent than usual.

*Agriculture.*—The chief industry of the Province is paddy cultivation. There was an increase in the extent cultivated, due to official pressure and the stimulus of high prices. The opening of fresh land in paddy does not necessarily mean an increase in the extent cultivated owing to the lack of population. The ordinary villager has as much land as he can cultivate. He likes to open new land as the yield is better, but the opening of new land often means that the old land is left uncultivated.

The state of cultivation generally is backward. The conservatism of the villager is notorious. New methods do not appeal to him. Transplanting is hardly known. Manure is not used. The average yield in the district is 10 to 15 fold (paddy chenas yield 30 to 40 fold; hence their popularity as compared with field cultivation). Improved methods are followed and better results are obtained under the Anuradhapura city tanks. The chief hope of improvement in the district is in the influx of more enterprising cultivators from other districts. In some parts of the Province cultivation suffered from the shortage of buffaloes for ploughing and their rise in price owing to the export to Colombo for slaughter.

*Chena Cultivation.*—Both the maha (kurakkan) and yala (gingelly) harvests were good. Advantage was taken by some of the exceptional facilities granted for chena cultivation to fell high forest illicitly, but the total damage done thereby was not great, and the benefit of the liberal grant of chenas both to this Province and the Island proved immense.

The village fallacy that a good crop of chillies can only be secured by felling high forest has been disproved at the Dry Zone Experiment Station, where successful experiments are also being made in the rotation of chena crops. The villager, however, will be hard to convert to more economical and scientific methods as long as the population to be supported is so infinitesimal compared with the area of waste and forest land available.

The number of chena permits issued was 2,250, covering an extent of 7,549 acres. Fines recovered for illicit chenas amounted to Rs. 1,756, and the number of prosecutions for non-payment of fine was 89.

#### IV.—MUNICIPAL OR QUASI-MUNICIPAL GOVERNMENT.

Statements showing the working of the Local Board and of the Provincial and District Road Committees are annexed.

The following is a statement of cases dealt with by the Village Tribunals :—

|                  |    | Pending on<br>January 1, 1919. | Instituted<br>in 1919. | Decided. | Pending on<br>December 31, 1919. |

| Kalagam Palata   | .. | 19                             | 1,187                  | 843      | 283                              |
| Tamankaduwa      | .. | —                              | 198                    | 198      | —                                |

The number of appeals to the Government Agent during the year were 80. In 63 cases the judgments were confirmed and in 17 set aside. The number of appeals to the Governor in Council were 10, and in two of these cases the judgment was set aside.

#### V.—EDUCATION.

As regards education, the Province is backward. The number of schools is 58, of which 37 are Government vernacular schools, 8 Gansabhawa schools in Tamankaduwa, and 13 grant-in-aid schools. Female education is yet in its infancy. The convent school in Anuradhapura is the only girls' school in the Province. Efforts are being made to encourage the attendance of girls at village schools, but at few schools is this sufficient to justify the employment of a woman teacher.

Owing to "war retrenchment" no new schools were built during the year.

#### VI.—POLICE AND CRIME.

The Province is remarkably free from serious crime. 133 cases of serious crime were investigated during the year, mostly offences against property, theft, and burglary. Crimes of violence are not common. Four homicides occurred, twelve cases of hurt with knife, and five of grievous hurt. Cattle stealing is negligible.

The only body of regular police is stationed in Anuradhapura. Their conduct and efficiency was good. Crime in the district is dealt with by the headmen. Their work generally ends in reporting the case to court. As their divisions are large and their duties manifold, cases are not properly investigated before coming to court. It is only the absence of crime that makes the system workable. The North-Central Province Kandyan is peaceful and law-abiding. Drink and gambling are unknown in the greater part of the district. The opening up of the Province and the influx of settlers from the low-country is bound to send up the crime statistics, and will necessitate more regular police as well as a more systematic training of the headmen in their police duties, and an increase in their number.

#### VII.—EXCISE.

On the expiry of the arrack rent at the end of September the Province became "dry," the three existing arrack taverns being abolished by local option. The North-Central Province villager is not accustomed to intoxicating drink, and there is no demand for arrack or toddy, except in the town of Anuradhapura and among the immigrant population, coolies, and carters.

There are two licensed places for the sale of foreign liquor in Anuradhapura town. The sales at these places increased largely after the closing of the taverns, and there was a certain amount of illicit sale on the borders of the Province, arrack being imported from neighbouring Provinces.

## VIII.—IRRIGATION.

*Major Works.*—No new works were undertaken. Owing to retrenchment the expenditure in this Province was confined to ordinary maintenance. Surveys of the irrigable land under Nachchaduwa and of the channels were practically completed, and the survey of the Nuwarawewa extension scheme was proceeded with.

*Village Tanks.*—The condition of the village tanks was not altogether satisfactory. Owing to bad seasons and the prevalence of sickness in 1917 and 1918 it had been necessary in the case of many tanks to grant exemptions from the ordinary maintenance work or liberal extensions of time for its performance. In 1919 when the need for such exemptions no longer existed, and a double quantity of work was required to make up for the arrears, the villager did not appreciate the situation. Wholesale default was made in the earthwork called out, and the state of many of the tanks at the end of the year was discreditable to the fieldowners, who are responsible for their maintenance, and the Irrigation Sub-Inspectors, whose duty it is, under the Government Agent, to call out the necessary work from the fieldowners and see it performed. These Sub-Inspectors have a large number of tanks in their charge, scattered over a wide area, and the task of supervision and of persuading the villager that the work is in his own interest is no sinecure, but an active and zealous officer can effect a great improvement in his district, and no work is of greater importance for the well-being of the people.

The number of tanks on the working list was 1,554. Of these, 760 are uncompleted tanks, still in process of restoration, the balance are exempted tanks, i.e., tanks which have been completed, and for which only a slight amount of annual labour for maintenance is required. Rs. 670 was spent on the manufacture of cement pipes for sluices, and 37 tanks were provided with sluices during the year. The amount spent on improvements to masonry works in village tanks was Rs. 1,323·78. This expenditure is insufficient for the ordinary maintenance requirements of 1,500 tanks, many of which were completed over thirty years ago, and are now needing repairs to masonry, which it is false economy to neglect.

The following is the statement of the Irrigation Fine Fund account :—

|  | Rs.   | c. |  | Rs.   | c. |
|--|-------|----|--|-------|----|
| Balance on January 1, 1919 ..                    | 1,189 | 79 | Salaries of Assistant Irrigation Clerks, peons, messengers to Ratamahatmayas, &c. .. | 1,632 | 61 |
| Receipts from January 1, to December 31, 1919 .. | 2,880 | 53 | Stationery and printing ..   | 107   | 25 |
|  |       |    | Remission of fines ..  | 9     | 0  |
|  |       |    | Incidental expenses ..   | 82    | 77 |
|  |       |    | Cost of repairs to channels, &c. ..  | 382   | 44 |
|  |       |    | Balance on January 1, 1920 ..  | 1,856 | 25 |
| Total ..   | 4,070 | 32 | Total ..   | 4,070 | 32 |

## IX.—PUBLIC WORKS.

The new works completed during the year were quarters for the Provincial Surgeon, two additional clerks' quarters, Anuradhapura, and the Post Office at Maradankadawala. The track metalling of the road from Madawachchi to the Mannar boundary was continued.

Works required are :—

Quarters for clerks, Anuradhapura.

Extension to the hospital, Anuradhapura.

Widening and improving the main roads.

Improvement of causeway at Kalawewa spill.

Improvements and extensions at Railway Station, Anuradhapura, including increased passenger platform accommodation and additional goods sheds.

Goods shed for Talawa station.

## X.—FORESTS.

The revenue derived from forests was Rs. 103,249·46, of which Rs. 19,461·94 was received in cash for the sale of timber and forest produce, and Rs. 83,787·52 represents the value of services rendered to other departments, mainly sleepers and firewood to the Railway.

152 acres were clear felled during the year and planted up with teak. The area of forest plantations in the Province is now 280½ acres. Reserved forests comprise an area of 89,968, and a further area of 1,027,187 is proposed to be reserved. These proposals are, however, very rough, and it is essential that the question of proposed reserves be taken up and the boundaries of future reserves accurately defined with a view to the requirements of existing villages, as well as in the interests of the Forest Department. The present vagueness and uncertainty hampers development, applications for land adjoining existing cultivation being sometimes opposed by the Department on the ground that the land forms part of a proposed reserve. The boundaries of the future reserves should be drawn clear of existing villages, leaving ample room for legitimate expansion.

## XI.—LAND SALES.

I annex the figures for 1918 and 1919 :—

|         |    | Extent Sold. |    |    | Amount Realized. |    | Average Price per Acre. |    |
|---------|----|--------------|----|----|------------------|----|-------------------------|----|
|         |    | A.           | R. | P. | Rs.              | c. | Rs.                     | c. |
| 1918 .. | .. | 962          | 0  | 7  | 26,322           | 88 | 27                      | 49 |
| 1919 .. | .. | 1,369        | 2  | 39 | 34,315           | 62 | 25                      | 5. |

In addition, 328 acres were sold by the Settlement Officer at an average price of Rs. 17·05. The demand for land is increasing, and the Survey Department has difficulty in coping with the work caused by the number of applications, which is, I believe, greater in this Province than in any other. The applications are mainly for small lots by village applicants:

The figures of leased lands are as follows :—

|              | Number of<br>Lease Permits. | Rent recovered.<br>Rs. c. |
|--------------|-----------------------------|---------------------------|
| 1918 .. .. . | 1,360 ..                    | 7,649 0                   |
| 1919 .. .. . | 1,843 ..                    | 8,992 92                  |

Some 2,000 acres, including the former experimental garden at Maha Iluppallama, was leased for the experimental cultivation of hemp. Hitherto the demand for land has been restricted to the areas which can be made irrigable, and the success of this experiment will prove an important factor in developing the Province by introducing a profitable cultivation for unirrigable land, of which the Province mainly consists.

Settlement operations were continued by the Land Settlement Department. The whole of Nuwaragam palata has now been settled, and good progress has been made with parts of Hurulu and Kalagam palatas.

The Kachcheri,  
Anuradhapura, September 14, 1920.

F. G. TYRRELL,  
Government Agent.

## APPENDIX.

### I.—REPORT OF THE PROVINCIAL ROAD COMMITTEE OF THE NORTH-CENTRAL PROVINCE FOR 1919.

THE Provincial Road Committee of the North-Central Province consisted of the following members :—Mr. H. R. Freeman from January to August, 1919, and the writer from August to end of December, as Chairman ; Mr. E. W. Cade from January to August, and Mr. A. Rothwell from August to end of December, Provincial Engineer ; and Unofficial Members : Messrs. S. D. Krisnaratne, L. P. Emerson, G. H. R. Jayamanne, and D. S. Arumukkam.

2. Four meetings were held during the year ; most of the business was carried out by circulating papers.

3. There were no changes in the staff.

4. Resthouses were white and colour washed and other repairs attended to.

5. The following statement shows the receipts and expenditure of the Provincial Road Committee for 1919 :—

| REVENUE.   | Rs. c.    | EXPENDITURE.  | Rs. c.    |
|--|-----------|---|-----------|
| Amount received from District Road Committees on account of two-thirds commutation for principal roads, resthouses, &c. :— |           | Payments made from two-thirds commutation during the year under the provisions of Ordinances Nos. 10 of 1861, 31 of 1884, and 10 of 1902 on account of— |           |
| From Nuwarakalawiya District Road Committee ..   | 13,210 90 | (a) Principal roads ..  | 9,932 0   |
| Government grant-in-aid of pay of resthouse-keepers ..   | 250 0     | (b) Resthouses ..   | 3,278 90  |
| Resthouse collections :—   |           | Upkeep, repair, and improvement of resthouses from funds other than two-thirds commutation ..   | 2,310 9   |
| (a) From Nuwarakalawiya District Road Committee ..   | 884 51    | Pay of resthouse-keepers ..   | 1,925 85  |
| (b) From Tamankaduwa District Road Committee ..  | 882 27    | Provincial Road Committee's establishment ..  | 589 98    |
| Contributions from District Road Committees on account of Provincial Road Committee establishment :—                       |           | Miscellaneous charges, including refund of advances ..  | 302 74    |
| From Tamankaduwa District Road Committee ..  | 274 25    |   |           |
| Miscellaneous receipts ..  | 591 33    |   |           |
|  | 16,093 26 |   | 18,339 56 |
| ● Balance on January 1, 1919 ..  | 9,050 40  | Balance on December 31, 1919 ..   | 6,804 10  |
| Total ..   | 25,143 66 | Total ..  | 25,143 66 |

Provincial Road Committee's Office,  
Anuradhapura, February 5, 1920.

F. G. TYRRELL,  
Chairman.

### II.—REPORT OF THE DISTRICT ROAD COMMITTEE, NUWARAKALAWIYA, FOR 1919.

THE members of this Committee are the same as those of the Provincial Road Committee, with the exception of the Provincial Engineer ; the District Engineer is an Official Member.

2. Mr. K. J. Sithamparanather, Superintendent, Minor Roads, reports as follows :—

(1) *Expenditure.*—The total amount expended during the year was Rs. 19,822 30, of which Rs. 12,927 55 and Rs. 4,281 06 was on upkeep and improvement respectively of minor roads, Rs. 2,080 40 on resthouses ; and Rs. 533 29 on District Road Committee buildings other than resthouses.

(2) *Upkeep of Roads.*—The usual maintenance of minor roads was carried out during the year, and the roads were kept up in fair order.

- (3) *Improvement of Roads.*—The following improvements were carried out during the year :—
- (a) Ottapuwa-Andarawewa road: 2½ miles opening side drains, forming road, reducing hills, and filling the low places. Graveling 2 miles of new road for the first time, and 2 miles of last year's improvement second time.
- (b) Eppawala-Timbiriwewa road: Building one 3 feet by 3 feet permanent stone masonry culvert over stream, filling and forming four approaches on both sides of culverts. Rocks were blasted and removed from the side drains to permit free flow of rain water through culverts.
- (c) Eastern Minor road: A permanent rubble stone masonry culvert 3 feet by 3 feet was built over a stream on the 20th mile, and approaches were improved on both sides of all permanent culverts.
- (d) Maradankadawala-Kunchikulama road: 20 chains of road was improved by opening side drains, and filling and forming road.
- (e) Madawachchiya-Horowpotana road: Earthwork in filling, forming, and widening road where the road was narrow by washaway of spill water from Madawachchiya tank.
- (4) All resthouses and outhouses were white and colour washed, tarred, tiles shifted, and all necessary repairs attended to. Temporary cattle and car sheds were thatched with cadjans.
- (5) All the District Road Committee buildings other than resthouses were white and colour washed, and the necessary repairs attended to. A permanent latrine to the Chief Clerk's quarters was built at a cost of Rs. 280.

3. The usual comparative statements of the working of the Thoroughfares Ordinances for 1918 and 1919, together with receipts and expenditure for 1919, are annexed :—

Comparative Statement showing the Working of the Thoroughfares Ordinances for 1918 and 1919.

|   | 1918.  |        | Percentage on Number under Head 2. | 1919.  |        | Percentage on Number under Head 2. |
|---|--------|--------|------------------------------------|--------|--------|------------------------------------|
|   |        |        |                                    |        |        |                                    |
| 1. Population of local area by last Census ..   | —      | 74,137 | —                                  | —      | 74,137 | —                                  |
| 2. Number of resident males by division officers' lists reported liable to labour ..      | —      | 21,805 | —                                  | —      | 22,110 | —                                  |
| 3. Discharged obligation within local area by—  |        |        |                                    |        |        |                                    |
| (a) Paying single commutation ..  | 19,826 |        | 90·92                              | 18,662 |        | 84·40                              |
| (b) Paying double commutation ..  | 95     |        | ·44                                | 86     |        | ·39                                |
| (c) Labouring six days ..   | 30     |        | ·14                                | 15     |        | ·07                                |
| (d) Labouring twelve days ..  | —      |        | —                                  | —      |        | —                                  |
| 4. Total discharged obligation ..   |        | 19,951 | 91·50                              |        | 18,763 | 84·86                              |
| 5. Failed to discharge obligation within local area, but otherwise accounted for as—      |        |        |                                    |        |        |                                    |
| (e) Exempted on account of age, death, disqualification, or physical inability to work .. | 991    |        | 4·54                               | 2,269  |        | 10·26                              |
| (f) Paid or laboured elsewhere ..   | 456    |        | 2·09                               | 602    |        | 2·72                               |
| (g) Double entries or entries by mistake ..   | 46     |        | ·21                                | 49     |        | ·22                                |
| (h) Fined ..  | —      |        | —                                  | —      |        | —                                  |
| (i) Imprisoned ..   | —      |        | —                                  | —      |        | —                                  |
| (j) Left local area ..  | 361    |        | 1·66                               | 421    |        | 1·91                               |
| 6. Total failed to discharge obligation within local area ..                              |        | 1,854  | 8·50                               |        | 3,341  | 15·11                              |
| 7. Unaccounted for ..   | —      | —      | —                                  | —      | 6      | ·03                                |

Statement of Receipts and Expenditure, District Road Committee, Nuwarakalawiya, for 1919.

| REVENUE.   |           | EXPENDITURE.   |           |
|--|-----------|--|-----------|

District Road Committee's Office,  
Anuradhapura, February 5, 1920,

F. G. TYRRELL,  
Chairman.

## III.—REPORT OF THE DISTRICT ROAD COMMITTEE, TAMANKADUWA, FOR 1919.

THE District Road Committee, Tamankaduwa, consisted in 1919 of the following members :— Mr. H. R. Freeman from January to August, and the writer from August to end of December, as Chairman ; Mr. D. C. de Silva, Revenue Officer ; and Mr. S. M. S. Rajasooriya, District Engineer, Maradankadawala, as Official Members ; and Messrs. P. L. Adirian Appuhamy, K. V. Varitamby, and M. A. Allis Appuhamy as Unofficial Members.

\*2. The correspondence was attended to by the Revenue Officer in his capacity as Additional Chairman, and all funds were administered by him under the direction of the Chairman.

3. Business was transacted by circulation of papers.

4. The members went out of office this year, and they were re-appointed by the Provincial Road Committee for the years 1920, 1921, and 1922, with the exception of Mr. P. L. Adirian Appuhamy, whose place was filled up by Mr. G. P. H. Simon de Silva.

5. There were no encroachments reported during the year.

6. Poll tax collections were Rs. 2,721, and the total amount standing at the beginning of the year to credit was Rs. 3,105.74.

7. The road connecting Minneriya and Alut-oya was cleared.

8. The works of metalling the road from resthouse approach road junction to the Topawewa gala and building permanent stone culverts in the first 2 miles of the road from Polonnaruwa to Magantota were sanctioned, but the contractors failed to commence work this year. The usual comparative statement of the working of the Thoroughfares Ordinances for 1918 and 1919, together with receipts and expenditure for 1919, are annexed :—

## Comparative Statement showing the Working of the Thoroughfares Ordinances for 1918 and 1919.

|   | 1918. |       | Percentage on Number under Head 2. | 1919. |       | Percentage on Number under Head 2. |
|---|-------|-------|------------------------------------|-------|-------|------------------------------------|
| 1. Population of local area by last Census ..   | —     | 6,778 | —                                  | —     | 6,778 | —                                  |
| 2. Number of resident males by division officers' lists reported liable to labour ..      | —     | 1,992 | —                                  | —     | 1,876 | —                                  |
| 3. Discharged obligation within local area by—  |       |       |                                    |       |       |                                    |
| (a) Paying single commutation ..  | 1,826 |       | 91.66                              | 1,702 |       | 90.72                              |
| (b) Paying double commutation ..  | 7     |       | .35                                | 18    |       | .96                                |
| (c) Labouring six days ..   | —     |       | —                                  | —     |       | —                                  |
| (d) Labouring twelve days ..  | —     |       | —                                  | —     |       | —                                  |
| 4. Total discharged obligation ..   |       | 1,833 | 92.01                              |       | 1,720 | 91.68                              |
| 5. Failed to discharge obligation within local area, but otherwise accounted for as—      |       |       |                                    |       |       |                                    |
| (e) Exempted on account of age, death, disqualification, or physical inability to work .. | 62    |       | 3.11                               | 109   |       | 5.81                               |
| (f) Paid or laboured elsewhere ..   | 32    |       | 1.60                               | 12    |       | .64                                |
| (g) Double entries or entries by mistake ..   | 32    |       | 1.60                               | 26    |       | 1.38                               |
| (h) Fined ..  | —     |       | —                                  | —     |       | —                                  |

| Balance on December 31            | .. | —                 | 8,797 36         | —                 | 5,690 73         |
| Total                             | .. |                   | 34,257 67        |                   | 34,254 70        |

2. The revenue of 1919 shows a decrease of Rs. 1,850·50, due partly to the abolition of the foreign liquor tavern by local option, and partly to the inclusion in 1918 of revenue of arrears of compensation for loss of opium revenue.

3. It will be seen that the expenditure exceeded the revenue by Rs. 3,039·33. The Local Board has to provide for the sanitary needs of a large immigrant population of pilgrims, who visit the town in large numbers at the chief Buddhist festivals of the year, and also to upkeep a large mileage of roads, which are mainly used by tourists and visitors to the ruins, from whom the Board derives no revenue.

4. The chief wants of the town are an improved water supply system, additional and improved latrine accommodation, new and improved markets, the completion of the town drainage system.

5. The usual work of maintenance of roads and buildings was carried out during the year.

6. In the way of improvements, the following works were undertaken and completed during the year:—

- (a) The Crown land adjoining the cemetery was cleared for its extension.
- (b) A cement side drain was constructed along Cameron's road.

7. There were three cases of chickenpox and three cases of enteric during the year. Some of these cases were removed to the Infectious Diseases hospital. A sum of Rs. 13,237·30 was spent on sanitation.

8. *Lighting.*—This was maintained as far as possible. Owing to the difficulty of replacing damaged parts of petrol lamps, the lighting of these had to be discontinued.

9. Eleven meetings were held during the year. The Official Members were Mr. H. R. Freeman from January to August, when he was succeeded by Mr. F. G. Tyrrell, as Chairman; Mr. E. W. Cade from January to August, and Mr. A. Rothwell from August to December, Provincial Engineer; and Dr. A. Rajasingham, Provincial Surgeon. Unofficial Members were Messrs. S. Navaratnarajah, V. Ramasamy, and D. L. C. Jinadasa.

10. The comparative statement showing the working of the Thoroughfares Ordinances for 1918 and 1919 is annexed:—

Local Board Office,  
Anuradhapura, February 5, 1920.

F. G. TYRRELL,  
Chairman.

## PROVINCE OF UVA.

### ADMINISTRATION REPORT OF THE GOVERNMENT AGENT, PROVINCE OF UVA, - FOR 1919.

#### I.—INTRODUCTORY.

THE conclusion of peace with Germany was celebrated throughout the Province. At Badulla there were sports and tea for the school children, and a parade attended by the Ceylon Light Infantry, Police, and Boy Scouts. Rice and cloth were distributed to the poor, and a big perahera held at night, the town being illuminated, and prizes offered for the best decorations. Mr. Chelliah, Shroff of the Uva Bank, won the first prize.

#### II.—CHANGES OF OFFICIALS.

Mr. F. Bartlett went on furlough, and was succeeded by Mr. L. W. C. Schrader on June 19, and he by Mr. W. L. Kindersley on September 16.

On March 10 Mr. F. Marshall was succeeded by Mr. A. E. Christoffelsz as Office Assistant.

Dr. L. Brohier, the Provincial Surgeon, went on leave in September, and Dr. F. Keyt was in temporary charge until relieved by Dr. J. C. Cooke in December.

Mr. D. de Kretser, Assistant Superintendent of Excise, was succeeded by Mr. T. V. Saravanamuttu on August 26.

Mr. P. J. May, Superintendent of Surveys, was succeeded by Mr. P. McC. Thornhill in February, and he by Mr. F. L. Baker in December.

Mr. D. J. T. Bandara, Ratamahatmaya of Buttala, retired from service, and was succeeded by Mr. J. G. Rambukpota in May.

Mr. K. B. Kadurugamuwa, Ratamahatmaya, Udukinda, retired at the close of the year.

#### III.—REVENUE AND EXPENDITURE.

For the financial year 1918-19 the revenue collected was Rs. 677,678, showing an increase over the previous year of Rs. 132,133. The principal increases were under the heads of Salt, Arrack and Toddy, Stamp Duties, Medical Aid, and Opium. There were decreases under Fines and Forfeitures, Survey Fees, and Railway Receipts. I annex a comparative statement showing details for the two years :—

| Land Sales .. ..                                   | 32,828 94       | 21,920 84       | 10,908 10           | —                   |
| Total .. ..  | 677,678 98      | 545,545 79      | 135,043 69          | 2,910 50            |

The expenditure was Rs. 256,614, showing an increase of Rs. 33,598 over the previous year.

## IV.—CONDITION OF THE PEOPLE.

The principal industries are agricultural, there being practically no manufactures, save here and there of bricks and tiles. Tea in the higher and rubber and tea in the lower areas are the staple products, and afford opportunities to villagers to earn ready cash. These industries are almost entirely under European management. The Sinhalese villagers cultivate rice where possible, supplementing it with chena products, such as Indian corn and kurakkan, those owning no lands obtaining Crown lands on permit to cultivate. The rice grown is insufficient for the support of even the Sinhalese population, and the additional area available for wet cultivation is small, and, as is generally the case, is situated in malarious districts in which the population is too sparse and enfeebled to take up more land, while outsiders fight shy of entering such unhealthy areas. It is thus impossible to extend the rice area except by slow degrees, and the only way to increase production would be by inducing the villager to improve his methods of cultivation by manuring his fields and transplanting. This he is reluctant to do, partly from sheer conservatism, and partly from lack of labour, and he also does not regard the production of rice as a commercial undertaking, but is content if he can grow enough for his own immediate needs.

The food shortage affected different divisions in different manners. In some areas, such as Bintenna and Wellassa, the people found but little difference, while in Udukinda and Yatikinda much hardship resulted, which increased as villagers consumed their supplies. The price of foods was greatly increased by the action of estate superintendents, who bought up supplies of locally-grown foods at rates previously unheard of, the short-sighted villagers selling even their seed paddy in order to realize these high prices, and finding themselves a few months later disastrously short of food. I had to forbid the purchase of locally-grown food by estates, in order to try and reduce to reasonable figures the prices of local foods, which were quite beyond the purses of the poorer folk.

## V.—CHENAS.

Chena permits for 4,749 acres were issued in the year, an increase of 1,000 acres over 1918, and twenty-eight permits were issued to asweddumize Crown lands. Applications are still coming in, but several have to be refused, as the areas asked for contain springs that feed other fields.

In many cases areas far larger than those allowed on the permits were cleared, and in many cases chenas were cleared without the formality of asking for a permit. The figures of areas allowed on permit and of illicit clearings are given below :—

|         | On Permit.<br>Acres. | Illicit.<br>Acres. |         | On Permit.<br>Acres. | Illicit.<br>Acres. |
|---------|----------------------|--------------------|---------|----------------------|--------------------|
| 1913 .. | 1,879                | 163                | 1917 .. | 3,624                | 1,880              |
| 1914 .. | 2,677                | 225                | 1918 .. | 3,750                | 4,768              |
| 1915 .. | 3,036                | 428                | 1919 .. | 4,749                | —                  |
| 1916 .. | 3,567                | 1,722              |         |                      |                    |

The illicit figures for 1919 are not yet available.

Among estates 951 acres have been opened in rubber, 1,086 in tea, and 400 in foodstuffs.

## VI.—HEALTH.

The health of the people, on the whole, was bad. There was a recrudescence in a milder form of the influenza epidemic of 1918, and in the less elevated parts of the Province malaria and its sequelæ are prevalent. Parangi is common in the remote districts, and the impossibility of procuring salvarsan during the war has probably increased its scope. A campaign was made against ancylostomiasis, and many estate labourers and villagers were treated. The villagers at first refused to take the treatment, but later gave way, and now recognize its benefits. A similar campaign might be inaugurated against parangi.

Cholera appeared at first in Badulla hospital and then in the town, with 20 cases and 16 deaths, the last case occurring on November 1. From Badulla it moved down the road to Taldena and Egoda-wela and on to Migahakiyula and surrounding villages, and even appeared at Pangaragamma and Alutnuwara. In all in this outbreak there were 131 cases and 92 deaths, including those in Badulla town. The place that suffered most was Migahakiyula and the neighbouring villages, where there were 78 cases and 53 deaths. Several villages had only a single case, and the checking of the disease among a panicky people prone to bolt and so spread infection at the first signs of trouble reflects considerable credit on the Medical Department. The last cases of all occurred on January 7, 1920, in a segregation camp, but most villages were free before Christmas.

At the other side of the Province cholera appeared at Kotamuduna, where there were 7 cases and 4 deaths, and then at and around Buttala, whence it spread as far as Wellawaya and Telulla. It was speedily checked at Kotamuduna, which never appears to have spread the infection; but gave more trouble around Buttala, where it appeared in isolated cases in village after village. In all on this side of the Province there were 34 cases and 28 deaths. No case occurred after December 29. In neither outbreak did infection spread to estates, and the Medical authorities proved themselves equal to the work of suppressing the disease.

The birth-rate was low, and the death-rate high. I give the figures for the last three years :—

|         | Births. | Deaths. |
|---------|---------|---------|
| 1917 .. | 10,194  | 7,763   |
| 1918 .. | 11,284  | 11,574  |
| 1919 .. | 9,058   | 11,842  |

The main contributing factors in the high death-rate are influenza, about 2,500 deaths, and infantile convulsions and pneumonia, each about 1,200; food shortage was probably a contributing factor

## VII.—RAINFALL.

Rainfall for the year was fair, especially in the last quarter. I annex a statement of rainfall for the last three years :—

| Month.    | 1917.<br>Inches. | 1918.<br>Inches. | 1919.<br>Inches. |
|-----------|------------------|------------------|------------------|
| January   | 16.24            | 9.20             | 4.57             |
| February  | 11.44            | 0.87             | 0.75             |
| March     | 11.16            | 4.30             | 6.19             |
| April     | 5.21             | 4.50             | 5.88             |
| May       | 1.85             | 1.80             | 7.08             |
| June      | 1.24             | 1.55             | 0.88             |
| July      | 3.90             | 2.78             | 4.90             |
| August    | 4.35             | 0.80             | 1.42             |
| September | 11.85            | 0.85             | 4.38             |
| October   | 5.06             | 13.54            | 14.95            |
| November  | 8.06             | 4.73             | 9.02             |
| December  | 7.94             | 9.56             | 11.97            |
| Total     | 88.30            | 54.18            | 71.99            |

## VIII.—CATTLE.

Rinderpest appeared at Udaveriya, Lyburn, and Bray estates, the origin of infection being five cattle brought from Gampola. In all there were 16 cases and 8 deaths. Several outbreaks of hoof-and-mouth disease occurred, involving 4,000 cattle, of which 50 died of black quarter; there were 15 cases, all fatal.

The number of buffaloes for cultivation is inadequate, and allows of no extension of rice cultivation at present.

## IX.—PILGRIMAGES.

The two pilgrimages to Kataragama were both stopped owing to cholera.

The Alutnuwara pilgrimage took place as usual, and was well supervised by the Dagoba Restoration Society in all respects, save that the latrine accommodation provided was insufficient. The Wesak festival at the Mutiyangana temple was largely attended.

## X.—EDUCATION.

There are 40 Government schools (37 boys and 3 mixed), 24 grant-in-aid schools (4 boys, 14 mixed, and 6 girls), and 182 temple and mosque schools.

The construction of a new school at Arawa was begun during the course of the year and was nearing completion. The construction of the Bibilegama school, which was undertaken in 1918, was completed and opened at the beginning of the year. The construction of a school at Malpota, which was undertaken by the villagers in 1918, was also nearing completion at the end of the year. The Wesleyan Mission School at Gampaha was handed over to be continued as a Government school.

A special grant of Rs. 500 was allowed to the District School Committee for the construction of pit latrines for schools, and the following schools were provided with pit latrines according to a type plan :—Badalkumbura, Kalupahana, Koslanda, Tuppititiya, and Alutnuwara.

The school building at Buttala was burnt down, and school is being held at present at a house rented out, pending the construction of a new building.

The owner of the land on which the present school at Hepola stands wishes to build a vihare on the site, and in consequence a new school building has been found necessary. A grant of Rs. 2,000 was received for this, and the construction of the building is to be taken in hand early.

A sum of Rs. 9,021.13 was spent on repairs to buildings, fences, new buildings, and salaries.

A statement of the revenue and expenditure is appended below :—

| REVENUE.                   | Rs.    | c. | EXPENDITURE.         | Rs.    | c. |
|----------------------------|--------|----|----------------------|--------|----|
| Balance on January 1, 1919 | 4,154  | 18 | Salaries             | 205    | 0  |
| School fines               | 1,802  | 10 | Repairs to buildings | 5,163  | 99 |
| Government contribution    | 4,253  | 25 | Fences               | 173    | 10 |
| Special contribution       | 4,215  | 0  | New buildings        | 3,684  | 4  |
| Miscellaneous              | 316    | 30 | Miscellaneous        | 1,008  | 50 |
|                            |        |    |                      | 10,234 | 63 |
|                            |        |    | Balance              | 4,506  | 20 |
| Total                      | 14,740 | 83 | Total                | 14,740 | 83 |

Extensions are urgently needed for the following schools :—Passara, Welimada, Palugama, Medawela, Udaperuwa, Maspane, and Medagama; at the same time a number of new schools are urgently required, but the funds at the disposal of the District School Committee are inadequate to take any of these in hand.

The attendance at Government schools was fairly satisfactory during the early part of the year, but decreased considerably during the latter part owing to the outbreak of cholera in many parts of the Province. The school at Migahakivula had to be kept closed for about four months owing to the serious outbreak of cholera there. The Chief Headman of Wellawaya took a great deal of interest in improving the attendance of schools within his division.

At the close of the year the Committee consisted of the following :—Mr. W. L. Kindersley, Government Agent, Uva (Chairman); Rev. W. H. Noble; Muhandiram D. H. Kotalawela; Mudaliyar J. G. de W. Tillekeratne; and K. B. Kadurugamuwa, Ratamahatmaya.

#### XI.—CRIME.

Serious crime is greatly on the increase, and there is a large increase in the number of undetected true cases of crime. The figures in the subjoined table indicate the serious nature of the increase. The reason for it is largely to be found in the food shortage, which compelled poorer people to realize that in jail they would at least be fed, whereas outside, however hard they laboured, they might go empty. This logic will always fill the jails in time of hunger. It is probable that criminals from policed Provinces make their way here, where the district is unpoliced, and successful evasion after crime committed is easier :—520 cases of serious crime were reported to court, as against 354 the previous year. Out of these 520 cases, 85 were found to be false, 101 resulted in convictions, 87 ended in acquittals, in 183 cases the evidence was insufficient to charge any one, 12 accused not apprehended, 2 accused dead or insane, 2 compounded, 1 otherwise disposed of, and 47 were pending at the end of the year. The number of burglary cases was 151 as against 93 last year, and 17 convictions as against 12. 118 cattle-stealing cases as against 45 last year, and 17 convictions as against 7. There were 34 cases of stabbing and 16 convictions, as compared with 37 cases and 21 convictions last year. There were 3 cases of homicide and 2 convictions, as compared with 8 cases and 4 convictions.

It will be noted that crimes of injury to the person are practically constant, and, in fact, show a slight decrease. A hungry man is not, as a rule, so quarrelsome as a full-fed one.

#### XII.—LOCAL GOVERNMENT.

The following towns are under the operation of the Small Towns Sanitary Ordinance :—Haputale, Koslanda, Lunugala, Passara, Haldummulla, and Welimada. At Haldummulla a cement drain was built at a cost of Rs. 520, and a pit latrine at a cost of Rs. 323. At Welimada a slaughter-house was constructed costing Rs. 686. The scavenging and conservancy of the towns was satisfactorily carried on by the Board's coolies. I annex a statement of revenue and expenditure :—

| <i>Haputale.</i> |           |           |                         |           |           |
|------------------|-----------|-----------|-------------------------|-----------|-----------|

*Village Committees and Gansabhawas.*—The improvements effected from the funds were repairs to the Village Tribunal building at Passara at a cost of Rs. 736.58, the repairs of Lunugala court at a cost of Rs. 105.82, and the erection of a Sunday market at Passara at a cost of Rs. 393.12. Besides this, a few minor repairs were effected to some village roads, but the funds available are quite insufficient to improve or even to maintain such roads in decent order. I append a statement of the income and expenditure of each Village Committee :—

There are four Village Tribunals for the Province. In all 3,059 civil and 3,455 criminal cases were instituted in the year, and on January 1, 1919, 216 civil and 486 criminal cases were pending. During the year 2,888 civil cases were decided and 207 were amicably settled, and 3,034 criminal cases were decided and 416 amicably settled. 111 appeals were received by the Government Agent, with the result that in 83 cases the judgment was affirmed, while in 23 it was reversed. There were 2 appeals to His Excellency the Governor in Executive Council.

### XIII.—LAND SALES AND SETTLEMENTS.

Thirty-two land sales were held, and a total area of 279 acres 1 rood and 32 perches was sold for Rs. 18,238.31, i.e., at an average price of Rs. 65.26 per acre. In 1918 205 acres 2 roods and 26 perches were sold at an average price of Rs. 50.07 per acre. Of the area sold, 83 acres were purchased by Europeans for tea and rubber, and the rest by natives. In addition to the above, the Settlement Officer sold 181 acres 1 rood and 11 perches for Rs. 5,092.84. Leasing under the new system resulted in the lease of 883 acres at a premium of Rs. 16,110. Of this area, 797 acres were taken by Europeans, and the rest by natives. I annex statement of lands settled under the Waste Lands Ordinance :—

| By whom settled.      | Declared<br>Crown. | Sold to<br>Claimants. | Amount<br>realized. | Declared<br>Private. | Total settled. |
|-----------------------|--------------------|-----------------------|---------------------|----------------------|----------------|
|                       | A. R. P.           | A. R. P.              | Rs. c.              | A. R. P.             | A. R. P.       |
| Government Agent ..   | 1 3 13             | —                     | —                   | —                    | 1 3 13         |
| Settlement Officer .. | 10,835 3 38        | 68 3 38               | 965 50              | 67 1 23              | 10,972 1 19    |

*Food Production.*—Twenty-eight permits to cultivate Crown land with paddy were issued to villagers for an area of 35 acres 1 rood and 2 perches. Applications are still coming in.

The following lands were acquired :—

Several encroachments were detected by the Chena Muhandiram, and steps are being taken to effect a settlement. Besides this, he inspected 55 settled villages, and reported about 500 acres of illicit chena clearing.

#### XIV.—IRRIGATION.

The Divisional Irrigation Engineer reports :—

*Major Works: Surveys and Investigations.*—The following works of survey and investigations were carried out during the year :—A survey for the extension of Hambegamuwa right bank channel, and five minor surveys to investigate proposed restorations of small works, &c.

*Maintenance.*—All the major works in the Province were maintained in fair order considering the limited funds available. No work calling for special mention was carried out under this heading during the year.

*Cultivation.*—A statement of the areas cultivated under the major works in the Province during the year is given below :—

|               | Acres. |                 | Acres. |
|---------------|--------|-----------------|--------|
| Kumbukkan     | 210    | Alut-ela        | 246    |
| Galoya        | 305    | Hingurugama-ela | 78     |
| Hambagamuwa   | 212    | Hanwella-ela    | 178    |
| Sudupanawila  | 221    | Mawela          | 64     |
| Soraborawewa  | 205    | Uma-ela         | 831    |
| Kudawewa      | 142    | Dehigola-ela    | 103    |
| Udawewa       | 151    | Taldena-ela     | 75     |
| Kehelandawewa | 34     |                 |        |
| Buttala       | 575    | Total           | 4,731  |
| Badulupitiya  | 430    |                 |        |
| Kendala-ela   | 171    |                 |        |

The above figures include both maha and yala crops, and some portions of the yala crops were not reaped at the end of the year.

*Construction.*—No construction work was done in the Province during the year.

#### XV.—PUBLIC WORKS.

Several roads have been widened and improved, and quarters provided for the Assistant Conservator of Forests at Haputale, for married surveyors at Diyatalawa, and for a Forest Clerk at Haputale. Some other roads are in course of improvement, and a Forest Office is being built at Moneragala.

#### XVI.—EXCISE, &c.

With one exception, viz., the Ratemahatmaya of Wellassa, the Ratemahatmayas of my Province agree that drunkenness is on the decrease, and all agree that the control of taverns and illicit practices is improved. The Magistrate reports a decrease in prosecution both for drunkenness and for illicit practices. These are supported by the figures for consumption, viz. :—

|                | 1918.<br>Gallons. | 1919.<br>Gallons. | Degrees.<br>Gallons. |
|----------------|-------------------|-------------------|----------------------|
| Arrack         | 44,251            | 41,654            | 2,597                |
| Toddy          | 140,296           | 136,581           | 3,715                |
| Foreign liquor | 14,323            | 11,818            | 2,505                |

From foreign liquor licensing the revenue has decreased from Rs. 7,436 to Rs. 5,356. That from arrack shows an increase from Rs. 338,960 to Rs. 392,972. From toddy from Rs. 46,554 to Rs. 54,576.

The relations between Excise Officers and headmen are generally good, but I fined one arachchi for giving away an intended raid. The reduction in consumption is probably due to high price of food.

*Cattle Branding.*—4,365 head were branded.

*Salt.*—The closing of the Hambantota road by cholera caused a considerable increase in the consumption of salt, of which 4,446 cwt. were sold for Rs. 30,870 at the Haputale store, in contrast with 908 cwt. sold in 1918 for Rs. 4,627. The wastage of salt was unduly high in the early part of the year, rising to 7 per cent.

*Opium.*—There are 360 registered consumers and 92 vedaralas. The revenue was Rs. 9,540, as against Rs. 8,008.20 in the previous year. The increase is due to the increase of 50 per cent. in the price, though it is clear that many consumers must have done without their full supply.

517 carts were registered in the year; in 1918 528 were registered.

4,397 dogs were registered, and 439 destroyed.

*Game.*—Ninety-nine game licenses were issued, of which 81 were taken by Europeans.

Four licenses to kill rogue elephants were issued, as well as 14 licenses to capture elephants and 6 to shoot dangerous buffaloes. Elephants are too numerous in the low-country, where they do much damage to crops. Three deaths were caused by elephants.

*Labour Ordinance.*—Monthly declarations were received from 220 estates, and medical aid dues regularly collected. There were no prosecutions.

*Registration of Business Names.*—Eighty-nine firms and 150 individuals were registered. None were foreign.

## XVII.—FOREST ADMINISTRATION.

The Assistant Conservator of Forests reports as follows :—

The result of inspections proves conclusively that the whole system of chena cultivation has once again been allowed to get badly out of hand in this Province. It will require considerable firmness on the part of the Revenue Officer before things can be expected to return to the normal. During the year under review 3,309 chena permits were issued from the Kachcheri, covering an area of 4,749 acres. The clearing of jungle for chena cultivation usually takes place in July, by which month permits should be in the hands of the people desirous of clearing, so that when the Forest Officers go round on their inspections, they can tell at a glance whether the area being cleared is illicit or in excess of the area granted. Up to July 31, 1919, only 411 duplicate permits had been received out of a total of 3,309. During August a batch of 2,014 permits were received. September brought in a further batch of 636, and even October brought forth 198. The belated issue of these permits thoroughly disorganized work, and made the detection of offences well-nigh impossible. In my opinion every chena application should be made so as to reach the Kachcheri by May 31, enabling permits to be issued in June. This, and this alone, will give the Forest Officer a chance of detecting and reporting on offences. At present inspections can only be made long after the forests have been cleared and burned.

*Protection of Forests.*—The amount of damage done annually in this Province by unrestricted fires is appalling. These fires sweep all over the Province, and it appears to be nobody's business to put a stop to them. Frequent reports have been made on the subject, but no real attempt has ever been made to seriously handle the subject. These fires, as in India, are started by villagers on patana lands, with the object of producing an early crop of young grass shoots immediately the rains commence for their cattle. The fires are started, and no attempt is ever made to control or prevent their spread. As long as this indiscriminate firing of patana lands is allowed to continue, we can never expect to get any forest growth on our patanas, and the area of waste patana land in the Province of Uva will increase annually.

I have ordered all permits to be received and reported on in May.

## XVIII.—HEADMEN.

The work of these men varies considerably, but some officers, notably the Town Arachchi of Haputale, have distinguished themselves in the detection of thefts and recovery of stolen property. All, however, were prone to delay the writing of their crime reports for a period of a day to a week, though the regulations in their book require them to write them at once. The only reason for delay, apart from the natural inclination to postpone a piece of work, is to see which side will pay most, and then write a report in accordance with the desire of that side. Thus, I find that, though convictions are the rule when reports are promptly written, they are rare in other cases, and the explanation given is that the evidence "became bad."

## XIX.—CONCLUSION.

The work in the Province is steadily increasing, as will be seen from the following table of correspondence :—

| To whom written.    | 1917. | 1918. | 1919. |
|---------------------|-------|-------|-------|
| Government Agent .. | 1,134 | 1,344 | 1,713 |
| Headmen ..          | 2,743 | 2,943 | 4,317 |

Badulla Kachcheri,  
March 9, 1920.

W. L. KINDERSLEY,  
Government Agent.

## APPENDIX.

## I.—REPORT OF THE LOCAL BOARD, BADULLA, FOR 1919.

THE revenue for 1919 amounted to Rs. 38,388·94, showing an increase of Rs. 3,109·32 on that of the previous year, this is accounted for by a sum of Rs. 3,813·37 having been realized by the sale of rice and paddy and treated as receipts during the year. The statement of revenue and expenditure of the Board for 1918 and 1919 is annexed :—

| REVENUE.                | 1918. |        | 1919. |    | EXPENDITURE. | 1918. |                           | 1919. |        |    |    |        |    |

|                         |       |        |       |    |              |       | Petty expenses ..         | ..    | 2,856  | 28 | .. | 1,341  | 85 |
|                         |       |        |       |    |              |       | Balance on December 31 .. | ..    |        |    | .. |        |    |
| Total ..                | ..    | 35,279 | 62    | .. | 41,245       | 22    | Total ..                  | ..    | 35,279 | 62 | .. | 41,245 | 22 |

The scavenging of the town was satisfactorily carried out by the contractor at a cost of Rs. 2,470.

*Sanitary Precaution.*—A sum of Rs. 1,170·08 was spent in connection with the outbreak of cholera, chickenpox, &c. The latrine conservancy of the town was carried out satisfactorily under the supervision of the Local Board Inspector at a cost of Rs. 4,406·34, and an additional piece of land was acquired at a cost of Rs. 515·24 for burying night soil.

*Street Lighting.*—All the street lamps were maintained in good order. The lighting was done departmentally at a cost of Rs. 1,821.

*Bakeries.*—All bakeries were periodically inspected and kept in good order.  
*Dogs.*—The following statement shows the number of dogs registered and destroyed within the Local Board town of Badulla :—

|      |    |             |            |
|------|----|-------------|------------|
|      |    | Registered. | Destroyed. |
| 1918 | .. | 90          | 146        |
| 1919 | .. | 77          | 145        |

*Weights and Measures.*—Weights and measures in the town were inspected and stamped during the year.

*Cemetery.*—The cemetery was maintained in good order at a cost of Rs. 360.

*Water Supply.*—The water supply was, on the whole, satisfactory, but the question of augmenting the supply will have to be considered in the near future.

*Roads, &c.*—The roads, drains, and culverts were kept in fair order at a cost of Rs. 4,066·66.

*Public Health.*—Influenza was prevailing in an acute form during the early months of the year, and continued in mild form during the rest of the year. In October there was an outbreak of cholera in Badulla town, the first known case occurring in the hospital. It was promptly stamped out, only 8 cases having taken place in the town outside the hospital. There were 12 cases in hospital, and 9 died. Outside the hospital there were 8 cases, with 5 deaths. In other respects the general sanitary condition of the people was unsatisfactory owing mainly to scarcity of foodstuffs. 248 births and 447 deaths were registered, as against 315 births and 460 deaths the previous year.

*Deviation of Badulla-oya.*—A sum of Rs. 3,157·35 was spent during the year. The Badulla esplanade was extended by acquiring a piece of land at a cost of Rs. 1,083·90.

*Constitution of the Board.*—The Official Members were Messrs. F. Barilett, L. W. C. Schrader, and W. L. Kindersley, Government Agents ; A. de C. Carson, Provincial Engineer ; Drs. L. Brohier and F. Keyt, Provincial Surgeons. The Unofficial Members were Messrs. D. H. Kotalawala, A. I. Jainudeen, and P. Packir Saibo. Six meetings of the Board were held during the year.

A comparative statement showing the working of the Thoroughfares Ordinances during the years 1918 and 1919 is annexed :—

|   | 1918. |       | Percentage on Number under Head 2. | 1919. |       | Percentage on Number under Head 2. |

|                          |        |    |        |    | Petty expenses ..         | 1,729  | 76 | 2,697  | 13 |
|                          |        |    |        |    | Balance on December 31    | 8,088  | 6  | 14,619 | 56 |
| Total ..                 | 31,935 | 92 | 51,909 | 57 | Total ..                  | 31,935 | 92 | 51,909 | 57 |

The scavenging of the town was carried out by a staff of five sweepers and also a contractor under the supervision of the Local Board Inspector at a cost of Rs. 1,431·32.

The latrine conservancy was carried out satisfactorily by a staff of six conservancy coolies at a cost of Rs. 1,410·50.

*Sanitary Precautions.*—A sum of Rs. 1,452·70 was spent in this connection.

*Bakeries.*—All the bakeries in the town were kept in good order.

*Street Lighting.*—The lighting was carried out by a contractor at a cost of Rs. 785·86.

*Dogs.*—The following statement shows the number of dogs registered and destroyed during the year :—

|               |    |
|---------------|----|
| Registered .. | 16 |
| Destroyed ..  | 89 |

*Weights and Measures.*—Weights and measures in the town were tested and stamped.

*Water Supply.*—The water supply was inadequate. A scheme for augmenting the supply by laying a 4-inch main in place of the 3-inch main has been sanctioned, and it is hoped that the work will be put in hand in 1920.

*Roads, &c.*—The roads and drains in the town were kept in good order at a cost of Rs. 894·81.

*Public Health.*—The health of the town was satisfactory.

*Constitution of the Board.*—The Official Members were Messrs. F. Bartlett, L. W. C. Schrader, and W. L. Kindersley, Government Agents; Dr. C. L. A. de Silva, District Medical Officer, Haputale; Mr. P. M. Norris, District Engineer, Diyatalawa. The Unofficial Members were Messrs. M. J. Peeris, S. J. Soris, and D. D. Abeyasakara. Six meetings of the Board were held during the year.

A comparative statement showing the working of the Thoroughfares Ordinances during the years 1918 and 1919 is annexed :—

| 1913                           | 6,000 0                  |                         |                       |                              |   |                                     |                                      |

The whole amount due as interest and sinking fund as shown above for the year 1919 has been duly paid to the Colonial Treasurer.

Local Board Office,  
March 9, 1920.

W. L. KINDERSLEY,  
Chairman.

### III.—REPORT OF THE PROVINCIAL ROAD COMMITTEE, PROVINCE OF UVA, FOR 1919.

#### I.—PROCEDURE.

A COMPARATIVE statement showing the results of the working of the Thoroughfares Ordinances for the years 1918 and 1919 is annexed :—

|  | 1918.  |         | Percentage on Number under Head 2. | 1919.  |         | Percentage on Number under Head 2. |
|--|--------|---------|------------------------------------|--------|---------|------------------------------------|
| 1. Population of local area by latest Census   | —      | 216,692 | —                                  | —      | 216,692 | —                                  |
| 2. Number of resident males by division officers' lists reported liable to labour      | —      | 35,907  | —                                  | —      | 34,570  | —                                  |
| 3. Discharged obligation within local area by—   |        |         |                                    |        |         |                                    |
| (a) Paying single commutation  | 31,266 |         | 87·07                              | 29,790 |         | 86·17                              |
| (b) Paying double commutation  | 189    |         | ·53                                | 175    |         | ·506                               |
| (c) Labouring six days   | 32     |         | ·08                                | 31     |         | ·08                                |
| (d) Labouring twelve days  | —      |         | —                                  | —      |         | —                                  |
| 4. Total discharged obligation   | 31,487 |         | 87·69                              | 29,996 |         | 86·76                              |
| 5. Failed to discharge obligation within local area, but otherwise accounted for as—   |        |         |                                    |        |         |                                    |
| (e) Exempted on account of age, death, disqualification, or physical inability to work | 2,127  |         | 5·92                               | 2,775  |         | 8·02                               |
| (f) Paid or laboured elsewhere   | 2,253  |         | 6·27                               | 1,756  |         | 5·07                               |
| (g) Double entries or entries by mistake   | 38     |         | ·105                               | 36     |         | ·104                               |
| (h) Fined  | 1      |         | ·002                               | 2      |         | ·005                               |
| (i) Imprisoned   | 1      |         | ·002                               | 1      |         | ·002                               |
| (j) Left local area  | —      |         | —                                  | 4      |         | ·01                                |
| 6. Total failed to discharge obligation within local area                              | 4,420  |         | 12·309                             | 4,574  |         | 13·23                              |
| 7. Unaccounted for   | —      |         | —                                  | —      |         | —                                  |

Appended is a comparative statement for the last ten years showing the percentage of the commutation recovered at single rate :—

| Year. | Percentage. | Year. | Percentage. |
|-------|-------------|-------|-------------|
| 1910  | 87·77       | 1915  | 85·90       |
| 1911  | 89·40       | 1916  | 85·75       |
| 1912  | 84·54       | 1917  | 86·21       |
| 1913  | 83·14       | 1918  | 86·19       |
| 1914  | 86·44       | 1919  | 86·17       |

A comparative statement of money collected as commutation tax and value of labour for the last ten years, inclusive of the year under review, is appended :—

| Year. | Amount collected in Money. | Value of Labour. | Total.    |
|-------|----------------------------|------------------|-----------|
|       | Rs. c.                     | Rs. c.           | Rs. c.    |
| 1910  | 46,206 66                  | 111 0            | 46,317 66 |
| 1911  | 47,538 18                  | 145 50           | 47,683 68 |
| 1912  | 46,321 70                  | 85 50            | 46,407 20 |
| 1913  | 46,117 76                  | 58 50            | 46,176 26 |
| 1914  | 46,053 0                   | 49 50            | 46,102 50 |
| 1915  | 45,988 16                  | 39 0             | 46,027 16 |
| 1916  | 46,361 93                  | 46 50            | 46,408 43 |
| 1917  | 47,689 28                  | 7 50             | 47,696 78 |
| 1918  | 47,466 29                  | 46 50            | 47,512 79 |
| 1919  | 45,210 29                  | 46 50            | 45,256 79 |

The decrease in 1919 is due to the great number of deaths of the tax-paying population from influenza in 1918.

## II.—REVENUE AND EXPENDITURE.

The revenue realized and expended is shown in the following statement :—

| RECEIPTS.                                 | Amount.<br>Rs. c. | PAYMENTS.                                  | Amount.<br>Rs. c. |

|   |                   |  | 56,554 91         |
|   |                   | Amount reserved for Badulla new resthouse  | 8,000 0           |
|   |                   | Balance on December 31, 1919 ..            | 208 46            |
| Total ..                                  | 64,763 37         | Total ..                                   | 64,763 37         |

The amount paid as two-thirds commutation towards principal roads for 1919 is Rs. 12,716.16.

*Branch Roads.*—There are three branch roads, viz., Haputale-Dambetenna, Liyangahawela-Punagala, and Koslanda-Punagala. A sum of Rs. 2,805 was recovered and remitted to the Colonial Treasurer as contributions from the estates for the upkeep of these roads for 1919.

*New Works.*—Conversion of 26 chains of the minor road No. 4, Welimada to Amherst Gap, into a natural surface cart road. Building a portion of a causeway at the 3rd milepost of the minor road No. 50, Dambagalla to Obbekota. Fixing milestones on minor roads Nos. 49, 52, 54, and 93.

*Constitution of Committee.*—At the close of the year 1919 the Provincial Road Committee was composed of the following:—The Government Agent, Uva (Chairman); the Provincial Engineer, Uva; and Messrs. J. Duncan, P. de P. Carey, D. G. Norman, and K. B. Kadurugamuwa.

*Staff.*—At the close of the year the staff composed of the following:—Mr. O. H. Amerasekera, Head Clerk; Mr. J. W. Gunasekera, Second Clerk; Mr. A. C. Wijeyekoon, Third Clerk.

W. L. KINDERSLEY,  
Chairman.

March 9, 1920.

# SABARAGAMUWA.

## ADMINISTRATION REPORT OF THE GOVERNMENT AGENT, PROVINCE OF SABARAGAMUWA, FOR 1919.

### I.—HISTORY OF THE YEAR.

This report deals mainly with Ratnapura District. Kegalla District is separately reviewed by the Assistant Government Agent.

The year 1919 will always be remembered for the shortage of imported rice. Owing to the uncertainty as to future supplies, May and June were very critical months; but ration tickets were started as soon as the shortage began, rice was evenly distributed, and the ration allowed to the district was sufficient. The people suffered most at the end of November and December, when locally grown food supplies were exhausted, and the ration allowed to the district was insufficient for the population. The year was also marked by great activity in paddy and chena cultivation, which materially helped to alleviate a situation which would otherwise have been more serious.

Five Agricultural Instructors were appointed for the district, and vel-vidanes were appointed for all the villages, and placed under their charge. They are doing most useful work, and a further extension and improvement in the methods of cultivation may confidently be anticipated. We shall have, for the first time since the grain tax was—very rightly—abolished, accurate returns of paddy cultivation and crops in 1920.

The year has been a severe test of the administration, and has, I venture to hope, proved the soundness of the Kandyan Headmen System as a whole. The headmen carried out the work of rice control intelligently; their fairness was unquestioned, and their orders were obeyed by all sections of the community. In the control of the estate districts of Balangoda and Rakwana, Messrs. E. C. Villiers, J.P., U.P.M., and E. R. E. Geddes, J.P., U.P.M., were associated with the Ratemahatmayas to consider and deal with applications for relief from estates. They carried out their voluntary duties in a very successful manner. My thanks are also due to Mr. T. Wallooppillai, Proctor, who spared himself no trouble in motoring round the district to keep me informed of the general situation, and to Mr. A. H. E. Molamure, Proctor, for his assistance in Kukul korale. A great many other gentlemen assisted by donations and in other ways to tide over the crisis. The brunt of the work fell on my Office Assistant, Mr. E. Rodrigo. The success of the system of control was largely due to him.

The chief event of the year was the visit of His Excellency the Governor to the district to open the extension of the railway to Opanake. His Excellency motored through part of the district, and his visit gave great encouragement to all those who are anxious for its development.

Peace Celebrations were held throughout the district with great enthusiasm on July 19, 1919. A Local War Memorial Fund was started to commemorate the officers and men of the district who sacrificed their lives in the war. With the liberal subscriptions already received, it is hoped to build a clock tower in Ratnapura town.

### II.—REVENUE AND EXPENDITURE.

The revenue collected from the Ratnapura District during the financial year 1918-19 amounted to Rs. 1,009,585.06, as against Rs. 764,393.02 for the preceding financial year, there being thus an increase of Rs. 245,192.04. The items calling for remarks are:—

#### *Increases.*

- (1) Arrack, Rum, and Toddy, Rs. 218,000, due to higher bids at the sales of the arrack and toddy rents.
- (2) Opium Sales, Rs. 6,569.15, due to increase of transfers of opium eaters from other provinces, and to regularity of purchase of opium by vedaralas.
- (3) Rent of Lands, Rs. 6,525.10, due to issue of chena permits.
- (4) Receipts—Forest Department, Rs. 6,598.81, due to demand for common timber for rubber and tea chests.
- (5) Land Sales, Rs. 9,652.85, due to more lands being sold.

#### *Decreases.*

- (1) Fines, Rs. 7,055.47. Decrease due to fewer Excise prosecutions. During the previous year there was a large number of prosecutions under the Excise Ordinance, in which heavy fines were imposed.

### III.—FOOD SUPPLY AND CONDITION OF THE PEOPLE.

The Village Committees have a useful rule that every field shall be cultivated annually if there is sufficient water, but the anxiety of the villagers to escape possible starvation acted as a still more efficient spur to make them cultivate all they could. Fields long since abandoned and in jungle and others, which they previously claimed to be unworkable owing to silt from estates, were brought under cultivation again. Still more remains to be, and will be, done.

The following table shows the number of permits issued to asweddumize new land, the extent of that land, and the number and extent of chena permits in 1919 as compared with 1918:—

|                                | 1919. |       | 1918. |       |
|--------------------------------|-------|-------|-------|-------|
|                                | A.    | R. P. | A.    | R. P. |
| Permits to asweddumize, 43 for | 647   | 3 32  | —     | —     |
| Chena permits, 808 for         | 3,160 | 2 12  | 1,004 | 3 14  |

The lease of 500 acres under Hingurp-ara tank to the Hon. Mr. J. H. Meedeniya, Dissawa, of the Province of Sabaragamuwa, will bring a most fertile area under cultivation in 1920.

Several other proposed schemes are engaging the attention of the Divisional Irrigation Engineer. The appointment of five Agricultural Instructors and the appointment of a large number of additional vel-vidanes under their immediate control have already been alluded to in Section 1. I allude to it again as marking the beginning of a prosperous era for the villagers. The Instructors are young and active, and their keenness is bound to infect the villagers with new ideas. New experiments in cultivation are being started in a great many villages.

The plumbago industry, which was moribund under the prevailing low market prices, was killed by the shortage and dearness of the price of rice, except in a very few places. This told severely on the local labour employed in the industry.

Fortunately labour on estates was not very much affected. Over 6,000 Sinhalese from outside the Province are employed in estates in the Province, and the estates employ several thousands of villagers of the Province. It was a bad year for the poorer classes. They saved themselves only by their exertions in growing foodstuffs.

#### IV.—PUBLIC HEALTH.

Notwithstanding the shortage of rice, there were no serious epidemics during the year. There was cholera in Hambantota and Badulla districts, but it fortunately did not cross our border.

The Inspectors of the Sanitary Board towns were subordinated to the District Medical Officers and apothecaries resident in such towns. The personal daily supervision and interest taken by the latter over the public health of their towns had a good effect.

#### V.—INDUSTRIES AND MANUFACTURES.

*Paddy Cultivation.*—A very large increase, but no reliable statistics.

*Chena Cultivation.*—3,160 acres 2 roods 12 perches on Crown permits in 1919, as compared with 1,004 acres 3 roods 14 perches in 1918, exclusive of chenaing on private land.

*Plumbago Mining.*—Only 21 pits registered, as compared with 98 in 1918, 325 in 1917, and 644 in 1916.

*Gemming Industry.*—217 licenses issued in 1919, as compared with 63 in 1918, owing to the high market price for sapphires and other precious stones. If the new regulations advocated by the Gemming Industry Committee, of which I was a member, become law, a great impetus will be given to the industry, to the benefit especially of the villagers.

*Tea and Rubber.*—About 4,000 acres, both in tea and rubber, were opened up during the year. No accurate figures are available as to the total extent of land under cultivation, but the acreage of the larger estates as given by the Honorary Secretary of the Sabaragamuwa Planters' Association is 54,555, against 50,480 in 1918.

More Land Settlement Officers and surveyors are required to keep pace with the development of the district. The want of land settlement is the chief bar to orderly and rapid progress, and causes friction with the villagers.

#### VI.—RAINFALL.

The following table shows the rainfall for various places in the district:—

| Month.       | Ratnapura. |       | Pelmadulla. |       | Keenagahala. |       | Keragala. |       | Godakawala. |       | Mahawala-tenna. |       | Maduwan-wala. |       | Carney. |       |
|--------------|------------|-------|-------------|-------|--------------|-------|-----------|-------|-------------|-------|-----------------|-------|---------------|-------|---------|-------|
|              | Inches.    | Days. | Inches.     | Days. | Inches.      | Days. | Inches.   | Days. | Inches.     | Days. | Inches.         | Days. | Inches.       | Days. | Inches. | Days. |
| January ..   | 8.62       | 14    | 7.72        | 11    | 11.35        | 18    | 5.72      | 10    | 6.45        | 10    | 7.30            | 9     | 7.83          | 11    | 7.83    | 10    |
| February ..  | 3.09       | 11    | 5.41        | 9     | 5.23         | 9     | 3.02      | 3     | 2.42        | 6     | 2.12            | 3     | 4.23          | 6     | 4.51    | 8     |
| March ..     | 12.77      | 18    | 12.35       | 11    | 10.92        | 14    | 11.63     | 15    | 7.58        | 8     | 12.19           | 8     | 4.32          | 8     | 7.51    | 13    |
| April ..     | 8.44       | 25    | 7.64        | 13    | 7.68         | 18    | 10.90     | 20    | 8.92        | 17    | 5.30            | 10    | 6.45          | 15    | 11.83   | 20    |
| May ..       | 26.40      | 26    | 18.78       | 23    | 10.10        | 16    | 30.25     | 26    | 8.50        | 21    | 4.81            | 8     | 6.00          | 15    | 49.43   | 30    |
| June ..      | 10.31      | 30    | 14.23       | 26    | 4.12         | 19    | 13.41     | 27    | 5.32        | 25    | 2.25            | 9     | 2.43          | 12    | 22.67   | 30    |
| July ..      | 18.85      | 26    | 15.17       | 21    | 3.34         | 10    | 16.74     | 26    | 7.91        | 17    | 2.34            | 7     | 1.81          | 14    | 21.11   | 28    |
| August ..    | 9.94       | 28    | 6.92        | 25    | 0.47         | 3     | 11.25     | 26    | 3.26        | 16    | 0.69            | 3     | 0.47          | 6     | 16.15   | 27    |
| September .. | 38.11      | 25    | 20.56       | 22    | 7.97         | 11    | 28.90     | 23    | 7.83        | 15    | 6.07            | 8     | 3.94          | 12    | 34.55   | 23    |
| October ..   | 13.20      | 28    | 10.20       | 21    | 13.35        | 17    | 14.67     | 25    | 6.55        | 14    | 14.19           | 10    | 2.35          | 12    | 16.46   | 24    |
| November ..  | 19.68      | 23    | 10.30       | 22    | 8.61         | 19    | 23.64     | 21    | 9.74        | 17    | 4.96            | 11    | 6.35          | 14    | 27.87   | 23    |
| December ..  | 8.80       | 21    | 7.38        | 22    | 16.90        | 21    | 9.60      | 19    | 11.04       | 15    | 5.98            | 6     | 15.22         | 16    | 9.83    | 18    |
| Total ..     | 178.21     | 275   | 136.66      | 226   | 100.04       | 175   | 179.73    | 241   | 85.52       | 181   | 68.20           | 95    | 61.40         | 141   | 229.75  | 254   |

The rainfall was well above the average, and evenly distributed. For paddy cultivation nothing could have been better, and all round excellent crops were obtained. In the Kalu-ganga valley the floods in September lasted ten days, and caused some damage. Many fields had to be re-sown, but the fields were well manured by the mud brought down by the floods.

The later season chena cultivation suffered because of the impossibility of burning chenas in many parts of the district in August and September. Where burning was possible, the crops were excellent.

## VII.—PILGRIMAGES.

The two important pilgrimages in the district are the Adam's Peak Pilgrimage and the Esala Perahera Festival of the Sabaragamu Maha Saman Dewala.

The Adam's Peak Pilgrimage commences in February and lasts till the end of April (from "Durutu" full moon to "Wesak" full moon). The sanitary work of this pilgrimage is attended to by a Sanitary Inspector, assisted by a patrol and four scavenging coolies. Medical aid is rendered to the pilgrims by an apothecary appointed by the Principal Civil Medical Officer and stationed at Heramitipana, about halfway from the Peak.

The principal halting places along the route are provided with ambalams by the Buddhist community. Pipe water service for Heramitipana, Andiyamalattenna, and Nilihela has also been provided.

The cost of this pilgrimage for the year was Rs. 444.56, of which Rs. 344.56 was paid out of the Government vote, and the balance Rs. 100, by the Buddhist Temporalities Committee of the district. The number of pilgrims from the Ratnapura route was estimated at 10,000.

The Esala Perahera Festival of the Sabaragamu Maha Saman Dewala begins in August and lasts for a fortnight. The large annual fair held on account of this festival attracts crowds of people from all parts of the Island.

Some of the less important pilgrimages are Kuragala Muhammadan Pilgrimage, Alutnuwara Dewale Perahera Festival, and Boltumbe Dewale Perahera Festival. These, too, attract people from several parts of the Island.

## VIII.—EDUCATION.

The Rural Schools Ordinance is in force throughout the district, except in Ratnapura town, which is under the Town Schools Ordinance. The number of Government schools in the district is—

|               |       |                |       |               |       |
|---------------|-------|----------------|-------|---------------|-------|
| Boys' schools | .. 47 | Girls' schools | .. 12 | Mixed schools | .. 12 |
|---------------|-------|----------------|-------|---------------|-------|

There are also 7 mission schools and 14 estate schools.

The District School Committee consisted of the Government Agent, the Director of Education, Rev. Father P. Wallyn, S.J., Rev. J. B. Radley, Mr. D. E. Jayatilleke, and Mr. H. A. Gunasekera, Ratemahatmaya.

The following new school buildings were constructed during the year—

|                              |            |                  |
|------------------------------|------------|------------------|
| Weligepola, Colombugama, and | Kalatuwawa | .. Girls' school |
| Karawita                     | Weddagala  | .. Mixed school  |

Of the above, the schools at Karawita and Kalatuwawa were first opened during the year under review. The girls' school at Kalatuwawa was put up by the villagers. During the year the villagers of Iddamal-goda, Mudunkotuwa, and Teppanawa began the construction of new girls' schools in their respective villages. These will be opened in the course of next year.

A statement of the revenue and expenditure of the District School Committee is annexed. This does not include the fairly large contribution which Village Committees make towards the maintenance of schools, both in money and in labour :—

| REVENUE.                          | 1918.  |    | 1919.  |    |
|-----------------------------------|--------|----|--------|----|
|                                   | Rs.    | c. | R.     | c. |
| Balance brought forward ..        | 11,414 | 85 | 9,384  | 94 |
| Government contribution ..        | 9,236  | 67 | 4,811  | 8  |
| Village Committee contribution .. | 5,881  | 90 | 3,108  | 74 |
| Fines in school cases ..          | 1,527  | 80 | 1,908  | 90 |
| Miscellaneous ..                  | 81     | 50 | 18     | 40 |
| Total ..                          | 28,142 | 72 | 19,232 | 6  |

| EXPENDITURE.                        | 1918.  |    | 1919.  |    |
|-------------------------------------|--------|----|--------|----|
|                                     | Rs.    | c. | R.     | c. |
| Salaries ..                         | 483    | 75 | 602    | 50 |
| Repairs to buildings ..             | 5,056  | 21 | 4,563  | 65 |
| Making and repairing fences, &c. .. | 1,014  | 26 | 462    | 19 |
| Furniture and school apparatus ..   | 16     | 50 | —      | —  |
| Erections of new buildings ..       | 11,577 | 32 | 6,791  | 84 |

## IX.—CRIME.

The Superintendent of Police furnishes the following abstract of true cases of serious crime in the years 1918 and 1919 and his remarks thereon :—

|                    | 1918. | 1919. |                          | 1918. | 1919. |
|--------------------|-------|-------|--------------------------|-------|-------|
| Nawadun korale ..  | 115   | 83    | Kukul korale ..          | 19    | 16    |
| Kuruwiti korale .. | 111   | 99    | Kolonna korale ..        | 16    | 12    |
| Atakalan korale .. | 26    | 39    | Kadawat and Meda korales | 44    | 51    |

There was a decrease of 10 per cent. in true cases of crime reported in 1919 as compared to 1918, the most noticeable decrease being a decrease of 25 per cent. in the case of theft of property worth Rs. 20 or more.

The most noticeable increase was an increase of 65 per cent. in cases of cattle theft, and I put this down as being due to the shortage of food. In several cases stray cattle were seized by estate coolies and killed for food purposes. Burglary also shows an increase of 8 per cent.

Offences against the person have increased in the case of murder : 10 cases in 1919, as against 7 in 1918, but have decreased by 51 per cent. in the case of grievous hurt, and 11 per cent. in the case of causing hurt with a dangerous weapon.

Convictions in police cases have increased from 36 per cent. in 1918 to 41 per cent. in 1919, but have decreased in headmen's cases from 31 per cent. to 23 per cent.

As regards minor statutory offences, there were 650, as compared with 681 in 1918. Cases of drunkenness dropped from 73 to 42, possibly due to the increased cost of foodstuffs. Petty thefts increased from 62 in 1918 to 123 in 1919, and I think the increase almost entirely due to the increased cost of food. There were a large number of petty thefts of vegetables and fruit.

The following is a list of arachchies who received rewards of Rs. 5 each for specially good work on night patrols with the police:—

| Gan-Arachchi of—    | Gan-Arachchi of— | Gan-Arachchi of— | Gan-Arachchi of— |
|---------------------|------------------|------------------|------------------|
| Imbulpitiya         | Ellawala         | Godigomuwa       | Hangomuwa        |
| Mahara              | Pathberiya       | Ellegedara       | Niriella         |
| Talawitiya          | Kiriporuwa       | Walandure        | Karangoda        |
| Walawita            | Kalatuwawa West  | Kuruwita         | Raddella         |
| Teppanawa           | Iddamaligoda     | Gilimale South   | Patagama         |
| Kalatuwawa East     | Kandangoda       | Marapona         | Dambuluwana      |
| Bulugahapitiya      | Pussella         | Hakamuwa         | Elapata          |
| Kendangamuwa Pahala | Poharabawa       | Batugedara       | Watuyaya         |
| Kendangamuwa Ihala  | Dewalegawa       | Muwagama         |                  |

The machinery for dealing with crime within the jurisdiction of Ratnapura Police Court works well; crime has decreased, and is comparatively light. The criminal work within the jurisdiction of Avissawella Police Court is not so satisfactory. Most of it lies in Three Korales in Kegalla District, but crime has also increased in the area covered by the police station at Kendangamuwa. Mr. C. E. de Pinto, Police Magistrate, Avissawella, reports that the police are doing excellent work, but are handicapped by inadequate strength to meet the requirements of the district. He advocates that the court should itinerate to Ruwanwella monthly, as witnesses are reluctant to travel so far as Avissawella.

The report of Mr. H. J. V. Ekanayake, Police Magistrate, Ratnapura, attributes the decrease in crime generally to the satisfactory co-operation of the police and headmen, and the revival of certain trades and occupations after the war. In spite of food shortage, his court returns show a decrease in thefts of cattle and prædial products, which "indicates efficient tackling of the food question in the district during the year." He complains that the headmen are not sufficiently prompt in bringing up the parties and as many witnesses as possible on the first day so as to avoid postponements. There were 296 cases of prosecution of coolies for bolting from estates, as compared with 235 in 1918.

#### X.—POLICE.

There were no changes in police stations during the year. One police sergeant and 4 police constables intended for the new station at Mahawala were added to the strength of the district. The following additional police stations have been recommended:—Mahawala, Kiriella, and either Pelmadulla or Kahawatta. It is hoped that a police station will be established at Mahawala before the end of 1920.

The Superintendent of Police has furnished a long list of headmen who have zealously co-operated with the police and assisted them on night patrols. I have received satisfactory testimony from all classes as to the increase in the efficiency and discipline of the Police Force. It is noticeable even to the most casual observer.

#### XI.—LOCAL GOVERNMENT.

A separate report on the Local Board town of Ratnapura appears in an appendix to this report. Three meetings of the Sanitary Board of Ratnapura District were held during the year, and on thirteen occasions papers were circulated among members and sanction obtained for necessary expenditure

##### Important Works done during the Year.

|  |            | Rs. | c. |
|--|------------|-----|----|
| Repairs to Post Office road                    | Balangoda. | 72  | 0  |
| Repairs to boys' vernacular school latrine     | Rakwana.   | 80  | 19 |
| Repairs to bridge on Courthouse-Resthouse road |            | 114 | 12 |
| Metalling cart gala                            | Dela.      | 240 | 0  |
| Constructing a shed for cart gala              |            | 109 | 11 |
| Improvements to wells                          | Welandura. | 174 | 71 |
| Acquisition of land for a market               | Kahawatta. | 101 | 0  |
| Total  |            | 891 | 13 |

##### Important Works to be done in 1920.

|   |               | Rs.   | c. |
|---|---------------|-------|----|
| Contribution from Sanitary Board towards the construction of side drains in bazaars | Kuruwita.     | 388   | 12 |
| Contribution from Sanitary Board towards the construction of side drains in bazaars | Kendangamuwa. | 517   | 50 |
| Contribution from Sanitary Board towards the construction of side drains in bazaars | Pelmadulla.   | 258   | 75 |
| Contribution from Sanitary Board towards the construction of side drains in bazaars | Dela.         | 258   | 75 |
| Metalling Post Office road  | Balangoda.    | 250   | 0  |
| Improvements to boys' vernacular school   | Rakwana.      | 600   | 0  |
| Total   |               | 2,273 | 12 |

The following statement shows the revenue and expenditure of the ten small towns in the district :—

|                    | Revenue. |    | Expenditure. |    | Balance on         |

| Opanake .. ..      | 632      | 94 | 48           | 86 | 584 8              |

\* The deficit of Rs. 79·05 is due to the Sanitary Board having to pay the whole of the salary of the Inspector.

## XII.—VILLAGE COMMUNITIES.

The Village Committees call out four days' labour each year, which may be commuted by payment of Re. 1·28. The revenues of the Committees are derived mainly from this commutation, but a large proportion of the villagers do actual work, and most of the jungle clearing on village paths is done by village labour under the supervision of the headmen. Works on which money was spent include the following :—

|   | Rs.   | c. |
|---|-------|----|
| (1) Construction of two edandas over Hangomu-ganga at Karangoda and Godawela (balance on the vote—see Administration Report for 1918) .. .. | 1,467 | 50 |
| (2) Repairs to the Gansabhawa bungalow at Pelmadulla .. ..  | 319   | 48 |
| (3) Clearing the Village Committee road from Karangoda to Weragama .. ..  | 75    | 0  |
| (4) Construction of three edandas on the Village Committee road from Karangoda to Weragama .. ..  | 307   | 0  |
| (5) Upkeep of Udawela-Weligepola Village Committee road .. ..   | 100   | 0  |
| (6) Upkeep of the Uggalkaltota-Weligepola Village Committee road .. ..  | 204   | 0  |
| (7) Construction of a Village Committee bungalow at Bulutota (vote on account) .. ..  | 150   | 0  |
| (8) Repairs to the Gansabhawa bungalow at Koppakanda .. ..  | 50    | 54 |
| (9) Repairs to the edanda over Palli-ela .. ..  | 197   | 0  |
| (10) Repairs to the edanda over Jamburaliya-ela .. ..   | 172   | 0  |
| (11) Repairs to the edanda over Petekerewa-ela .. ..  | 210   | 0  |
| (12) Repairs to bridge over Dawla-ela .. ..   | 274   | 0  |
| (13) Providing a double canoe for the ferry at Nawangoda .. ..  | 180   | 0  |
| (14) Construction of an edanda over Nirieli-ganga at Ginihiriya .. ..   | 851   | 10 |
| (15) Repairs to the edanda over Hangomu-ganga at Godawela .. ..   | 55    | 50 |
| Total .. ..   | 4,613 | 12 |

The sum of Rs. 3,108·74 was contributed from Village Committee Funds to the District School Committee. Among other works the following were carried out during the year :—

|  | Rs.   | c. |
|--|-------|----|
| (1) New school at Karawita (half contribution) .. ..   | 242   | 5  |
| (2) Extension of the new school at Nivitigala .. ..  | 766   | 30 |
| (3) Constructing a kitchen for the Emitiyagoda boys' vernacular school .. ..                               | 225   | 77 |
| (4) Maintenance of the existing schools of Kuruwiti, Nawadun, Kadawata, and Meda korales during 1919 .. .. | 1,410 | 10 |
| (5) Putting up a fence round the Kella school garden .. ..   | 80    | 0  |
| Total .. ..  | 2,724 | 22 |

The following statement shows the revenue and expenditure of each Chief Headman's division :—

| Name of Village Committee.        | Balance on December 31, 1918. |    | Revenue. |    | Expenditure. |    | Balance on December 31, 1919. |    |
|-----------------------------------|-------------------------------|----|----------|----|--------------|----|-------------------------------|----|
|                                   | Rs.                           | c. | Rs.      | c. | Rs.          | c. | Rs.                           | c. |
| Kuruwiti korale .. ..             | 1,395                         | 63 | 3,144    | 93 | 3,631        | 56 | 909                           | 0  |
| Nawadun korale .. ..              | 5,970                         | 79 | 4,187    | 20 | 6,551        | 52 | 3,606                         | 47 |

| Kolonna korale .. ..              | 1,078                         | 41 | 1,252    | 72 | 1,641        | 58 | 689                           | 55 |
| Kukul korale .. ..                | 385                           | 81 | 1,670    | 98 | 2,606        | 46 | —                             | *  |
| Meda korale .. ..                 | 4,390                         | 18 | 1,956    | 86 | 2,807        | 35 | 3,539                         | 69 |
| Kadawata korale .. ..             | 637                           | 43 | 1,163    | 17 | 976          | 15 | 824                           | 45 |
| Godakawela Experimental garden .. | —                             | .. | 67       | 62 | —            | .. | 67                            | 62 |
| Balangoda Experimental garden ..  | —                             | .. | 16       | 93 | —            | .. | 16                            | 93 |
| Total ..                          | 22,990                        | 53 | 16,051   | 27 | 20,527       | 41 | 19,064                        | 6  |

\* Deficit Rs. 549·67.

There are two Village Tribunals in the district : one for Nawadun korale, sitting at Marapona, Pelmadulla, and Karangoda ; and one for Kuruwiti korale, sitting at Kendangamuwa, Kuruwita, and Kiriella. I annex a statement showing the number of civil and criminal institutions in each Village Tribunal for the last five years :—

| Name of Village Tribunal. | 1915. | 1916. | 1917. | 1918. | 1919. |
|---------------------------|-------|-------|-------|-------|-------|
| Kuruwiti korale ..        | 1,727 | 2,159 | 2,240 | 2,034 | 2,235 |
| Nawadun korale ..         | 1,739 | 1,842 | 1,627 | 1,570 | 1,692 |
| Total ..                  | 3,466 | 4,001 | 3,867 | 3,604 | 3,927 |

There were 80 appeals during the year from the judgments of the two Presidents to the Government Agent, of which 13 were successful. Appeal was made to His Excellency the Governor in Council in 4 cases, the judgment of the Government Agent being affirmed in 3 cases, and set aside in 1 case on his recommendation after further inquiry.

The following statement shows the revenue and expenditure of the two Village Tribunals in Ratnapura District :—

|                    | Balance on December 31, 1918. | Revenue. | Expenditure. | Balance on December 31, 1919. |
|--------------------|-------------------------------|----------|--------------|-------------------------------|
|                    | Rs. c.                        | Rs. c.   | Rs. c.       | Rs. c.                        |
| Kuruwiti korale .. | 84 37                         | 2,842 95 | 2,293 68     | 633 64                        |
| Nawadun korale ..  | 618 4                         | 1,980 50 | 2,565 24     | 33 30                         |
| Total ..           | 702 41                        | 4,823 45 | 4,858 92     | 666 94                        |

### XIII.—WORKING OF SPECIAL ORDINANCES.

*Kandyan Marriages.*—The following figures show the working of the Ordinance :—

|  | 1918. | 1919. |
|--|-------|-------|
| Marriages under the Kandyan Marriage Ordinance ..  | 585   | 686   |
| Marriages under the General Marriage Ordinance ..  | 358   | 320   |
| Muhammadan Marriages ..                            | —     | 12    |
| Divorces ..  | 86    | 70    |
| Causes of divorce :—                               |       |       |
| Adultery ..  | 3     | 3     |
| Desertion or inability to live happily together .. | 7     | 7     |
| Mutual consent ..                                  | 76    | 60    |

*Waste Lands Ordinance.*—There are 21 cases of lands, in extent 3,421 acres 3 roods 38 perches, for which notices have been issued under the Waste Lands Ordinance, still awaiting settlement. Most of them are incapable of settlement pending the settlement of the villages by the Land Settlement Department. The Government Agent has neither the time nor the staff to deal with them satisfactorily. Notice No. 5,784 for 1,482 acres 3 roods 32 perches has been referred to court, and is awaiting judgment in appeal.

### *Excise Ordinance.*

|                          | 1918.    | 1919.    | Increase. | Decrease. |
|--------------------------|----------|----------|-----------|-----------|
|                          | Gallons. | Gallons. | Gallons.  | Gallons.  |
| Consumption of liquor :— |          |          |           |           |
| Arrack consumed ..       | 37,100   | 33,711   | —         | 3,389     |
| Toddy consumed ..        | 101,297  | 101,415  | 118       | —         |

The fall in the consumption of arrack is due to—

- Higher selling price of arrack and of rice.
- Depression in some industries.
- Higher cost price of arrack.
- Higher price of rice and other foodstuffs, leaving less spare cash for drink.

*Dog Registration.*—The number of dogs registered was 2,211, against 2,504 in 1918, and 2,699 in 1917.

*Firearms Ordinance.*—The stamp duty on the village cap gun was reduced to 50 cents from Re. 1. The number of guns licensed was 2,187, against 2,180 in 1918, and 2,405 in 1917.

*Opium Ordinance.*—During the year 23 consumers were transferred to this district from other districts, 2 were transferred to other districts, 7 died, and 7 were struck off the register for failing to draw opium for six months. The number now stands at 474, as against 467 in 1918. The number of vedāralas drawing opium had been increased by 4, and is now 151. The issues were 1,723,149 grains, as compared with 1,916,453 grains in 1918.

### XIV.—IRRIGATION.

The following sums were recovered on account of irrigation rate for 1919 :—

|                       | Rs. c. |                         | Rs. c.   |
|-----------------------|--------|-------------------------|----------|
| Panamure channel ..   | 500 0  | Embilipitiya channel .. | 201 86   |
| Tunkanewewa ..        | 21 87  | Walalgoda channel ..    | 107 44   |
| Alutwewa ..           | 8 0    | Rakwana-ganga scheme .. | 344 59   |
| Epitagodawewa ..      | 8 0    | Malwatta channel ..     | 175 84   |
| Beliatia anicut ..    | 17 50  | Batugedara channel ..   | 175 92   |
| Opanake spout ..      | 61 58  | Uggalkaltota channel .. | 662 18   |
| Hinguruarawewa ..     | 194 16 |                         |          |
| Mulgama tank ..       | 30 44  | Total ..                | 2,579 50 |
| Kinchigune channel .. | 49 12  |                         |          |
| Kirigalkatuwa tank .. | 21 0   |                         |          |

The amount of arrears due at the close of the year was Rs. 10·61.

Two lands under Uggalkaltota channel, in extent 5 acres and 38 perches, were sold for default of payment of irrigation rate for 1918 and purchased on behalf of the Crown. 500 acres under Hinguruara channel were leased, and 58 acres given out on permits to asweddumize. 34 acres and 38 perches under Uggalkaltota channel were also given out on permits to asweddumize.

A sum of Rs. 41.40 was paid out of "Major Works Fine Fund" for a cattle crossing on Batugedara channel, and Rs. 65.25 out of "Village Works Fund" for certain repairs to the same channel. The balance at the end of the year under Irrigation Fine Fund: Rs. 37.75 under Major Irrigation Works; Rs. 2,096.05 under Village Irrigation Works.

#### XV.—PUBLIC WORKS.

The principal public works carried out in 1919 were :—

- (1) New hospital at Aranayaka.
- (2) Additions to Balangoda hospital.
- (3) Cattle pound, Balangoda Police Station.
- (4) Extending drain, Undugoda hospital.
- (5) Improvements to Karawanella hospital.
- (6) Kegalla town drainage.
- (7) Side drains along Parussella road.
- (8) Widening Kahawatta-Rakwana road.
- (9) Improvements, Ellearawa-Pinnawala road.

The extension of the railway to Opanake was completed, and the line opened for passenger traffic by His Excellency the Governor on May 1.

The principal wants of the district are :—

#### (A) Those repeated from last Year's List.

- (1) Cart roads to connect the Ratnapura-Avissawella and Ratnapura-Nambapana roads. (The survey of a trace for the road from Karandana to Yatipauwa has been sanctioned.)
- (2) Waterworks and drainage for Ratnapura town.
- (3) Quarters for public officers in Ratnapura.
- (4) Inter-district roads connecting Sabaragamuwa with the Southern and Central Provinces.
- (5) New police stations at Pelmadulla or Kahawatta, Mahawala, and Kiriella.
- (6) Post and Telegraph Offices at Kalawana and Kiriella.

The bridge over the Kalu-ganga at Ratnapura, mentioned in last year's list, has been sanctioned. The post and telegraph office at Mahawala (Nivitigala) has been built.

#### (B) Additional Requirements.

- (7) Telephone exchange in Ratnapura District.
- (8) Railway feeder road from Opanake to Uggalkaltota—now being traced.
- (9) Extension of Malwala Ferry-Wewelwatta Factory road to link up with Balangoda-Rassagala road (now being traced).
- (10) Extension of estate road from Mahawala to Houpe on to Madampe and its conversion into a branch road (now being traced).
- (11) A road from Ratnapura through Elapata along the valley of Nirieli-ganga to Karawita (now being traced).
- (12) A dispensary at Kalatuwawa.

The following works have been sanctioned in addition to the bridge over the Kalu-ganga at Ratnapura :—

Extension of first section of 7 miles of the Kukul korale road from Karawita.

Bridge over the Gomai-oya on the Bevila-Digowa road.

The construction and maintenance by the Public Works Department of a new trace of the section of road between Woodend and Algoda causeway.

A special grant of Rs. 15,000 has been allowed for new school buildings in Ratnapura District. Government has also sanctioned a grant of Rs. 14,000 for minor village works, and Rs. 1,000 for the bridge at Bowatta on the Lankabarana-Uggalkaltota District Road Committee road.

I heartily endorse the remarks of my predecessor as to the need for the survey and settlement of Crown lands.

#### XVI.—FORESTS.

The Acting Divisional Forest Officer reports as follows :—

(1) The total revenue recovered in cash and credited to revenue during the year amounted to Rs. 29,138.87.

(2) *Works done during the Period.*—Demarcation: 250 chains artificial boundary lines 10 feet wide round Marakele reserve were cleared at a cost of Rs. 115.20. 50 chains artificial boundary lines were cleared and five new boundary pillars were erected in Masimbula reserve at a cost of Rs. 54.75. Plantation: A total sum of Rs. 149.25 was spent on works under "sowing and planting" for maintenance and upkeep of nurseries and plantations in the district.

(3) *Forest Offences.*—(a) Prosecution: Four cases were instituted during the year, 3 resulted in convictions, carrying a total fine of Rs. 280; in the other case accused were acquitted. (b) Compensation: Ten cases were compounded. The compensation amounted to Rs. 149.80.

(4) *Miscellaneous.*—Seventeen land applications and preliminary plans, covering an extent of 1,512 acres, were inspected and reported on.

Apart from the action taken by the Forest Department, the following statement shows the action taken by the Government Agent with regard to forest offences :—

|  |    |            |
|--|----|------------|
| Number of forest offences reported                         | .. | 212        |
| Number of cases in which compensation was recovered        | .. | 91         |
| Amount of compensation recovered                           | .. | Rs. 940.75 |
| Number of prosecutions                                     | .. | 49         |
| Number of convictions                                      | .. | 36         |
| Fines inflicted by court                                   | .. | Rs. 2,835  |
| Number of acquittals                                       | .. | 8          |
| Number of cases withdrawn                                  | .. | 4          |
| Number of cases pending                                    | .. | 1          |
| Number of cases not prosecuted, nor compensation recovered | .. | 16         |
| Number still under correspondence                          | .. | 56         |

## XVII.—MISCELLANEOUS.

*Work of the Land Department of the Kachcheri.*—There were 11 land sales during 1919, as against 10 of the previous year. The results were as follows :—

|  | A.           | R. | P. |
|--|--------------|----|----|
| Extent offered for lease, sales, and settlement ..         | 279          | 2  | 4  |
| Extent sold by public auction ..                           | 63           | 0  | 22 |
| Extent leased under the new leasing system ..              | 142          | 3  | 17 |
| Total amount realized by leases, sales, and settlements .. | Rs. 9,754·04 |    |    |

The average rate per acre at which lands were sold in 1919 was Rs. 95·50 per acre. This is the same as the average for 1918. The maximum in 1919 was Rs. 150 per acre ; in 1918 it was Rs. 323·01.

During the year 131 applications for the purchase or lease of Crown lands were received for an aggregate extent of 1,455 acres and 8 perches, of which 10 applications for an extent of 1,062 acres 1 rood and 36 perches were from European applicants. In the previous year there were 47 applications for an extent of 660 acres 3 roods and 27 perches, of which the extent applied for by European applicants was 240 acres.

The following is a statement of private applications received during the last five years :—

| Year.   | Number of Applications. | Extent Applied for. |    |    | Year.   | Number of Applications. | Extent Applied for. |    |    |
|---------|-------------------------|---------------------|----|----|---------|-------------------------|---------------------|----|----|
|         |                         | A.                  | R. | P. |         |                         | A.                  | R. | P. |
| 1915 .. | 35 ..                   | 644                 | 3  | 17 | 1918 .. | 47 ..                   | 660                 | 3  | 27 |
| 1916 .. | 32 ..                   | 2,139               | 3  | 4  | 1919 .. | 131 ..                  | 1,455               | 0  | 8  |
| 1917 .. | 31 ..                   | 1,776               | 1  | 30 |         |                         |                     |    |    |

The demand for land did not improve till about September, 1919. This was due to the fact that up to that time Government had prohibited the sale of blocks of over one acre in extent, and the villagers who desired to acquire larger extents had to do so on the new leasing system. This system has so far not found favour with villagers, who are accustomed to, and prefer, a freehold system.

In September, 1919, Government relaxed the 1-acre limit, and allowed sales up to 10 acres. This concession was gladly availed of by villagers, who sent in a large number of applications, which will receive attention in the coming year.

Though the new leasing system has not appealed to the villager, capitalists, both small and large, have taken advantage of it, and have sent in a fairly large number of applications for leases.

During the year under review two claims comprising an extent of 668 acres 1 rood and 1 perch situated in Akarella and Batadura villages of Meda korale were inspected, and preliminary inquiry held. One claim is now awaiting a further report from the Forest Department, and the other was found to be a suitable case to be dealt with under the Waste Lands Ordinance, and will accordingly be brought under the Waste Lands Ordinance in the coming year.

A certificate of quiet possession claim, comprising an extent of 64 acres 1 rood and 29 perches at Yaddehikanda, was also inquired into and settled during the year.

Forty-three permits to asweddumize Crown lands were issued during the year for an aggregate extent of 647 acres 3 roods and 32 perches. Further applications from villagers continue to be received. This shows that the villagers are keen on getting Crown lands for asweddumizing on the very liberal terms now offered by Government.

*Acquisition of Land for Public Purposes.*—During 1919 50 allotments of land, aggregating in extent 37 acres and 5·90 perches, were acquired by the Crown, of which an extent of 28 acres 1 rood 5 perches was on account of the Pelmadulla Railway. The total amount paid in compensation was Rs. 5,596·76, of which a sum of Rs. 3,123·54 was on account of Railway acquisition.

The following is a statement of cases under the Land Acquisition Ordinance referred to court :—

|   |   |   |   |
|---|---|---|---|
| Number of cases pending on January 1, 1919 .. | 6 | Number of cases tried ..                      | 5 |
| Number of cases referred to court ..          | 1 | Number of cases pending at the end of 1919 .. | — |
| Number of cases settled ..                    | 2 |   |   |

The Land Department had a very strenuous period during the year. Besides its usual heavy work, it had to report, after reference to papers and plans, on no less than 808 chena applications, and also on a very large number of forest offence reports.

During the rice crisis, the Department was further handicapped by one of the Assistants having to be employed for several days as a storekeeper at the jail rice depôt.

The following extracts are taken from the report of the Chena Surveyor Muhandiram :—

(a) The number of final villages in the district is 58, in 15 of which there are no Crown lands. I inspected 19 of the more important villages covering an area of 4,500 acres, and located 13 encroachments made by the villagers. The number of cases instituted was 3. In two of these, convictions were obtained. In one case the accused was acquitted by the Police Magistrate. Six cases were departmentally dealt with by the Government Agent. Two cases are under reference to the Ratamahatmayas, and the remaining case has been surveyed with a view to settlement.

(b) Inspected and located chena applications in 22 villages which had been finally settled.

(c) Inspected 27 villages on report made by the Ratamahatmayas with regard to illicit clearings and fellings of timber and illicit gemming, and located some encroachments in closed villages at the request of the Settlement Officer.

(d) Besides inspections, attendance at court in connection with encroachments, and forest offence cases, I was engaged on tracing a 6-foot road through the newly proclaimed small town of Opanake.

*Experimental Gardens.*

The following extracts are taken out from the report of Mr. L. A. D. Silva, Agricultural Instructor :—

*Balangoda.*—Work confined chiefly to the cultivation of vegetables, fruit trees, and other products.

The distribution of vegetable seeds in large quantities free of charge among the villagers has given a great impetus to the cultivation of vegetables in the district. A large number of new vegetable gardens have been opened, and consequently the supply of vegetables has increased.

Several good varieties of fruit plants have been established in the garden, and it is hoped that it will be of immense benefit to the locality.

Onion cultivation, which was introduced through this garden, has made great progress in this part of the district.

*Coffea robusta* experiment in this garden has proved a great success, and plants and seeds have been distributed among the cultivators. The increasing demand for seed leads one to hope that the future of this cultivation will be a bright one. I have taken care during my periodical visits to give the necessary instructions as to the method of cultivation.

The frequent visits of teachers and others to the garden have drawn much public attention to the work that is being done here.

*Godakawela*.—This was opened last year. The first attempt was made with vegetables, onions, ground nuts, yams, such as kukul-ala, kiri-kondol, hinguru-ala, and rata-ala. Careful treatment in these cases has proved very successful. In consequence of these experiments the villagers are deeply interested in the cultivation of onions, yams, and chillies.

As at Balangoda, vegetable seeds were distributed. This has given great encouragement to the cultivation of vegetables.

In the economic section, *Coffea robusta*, cacao, cinnamon, and garden dhall have been planted, and they are thriving well. If these experiments prove successful, there can be no doubt that they will not only give employment to a large number of people, but also will open up the whole district.

A large quantity of *Coffea robusta* berries was put in a nursery, and seedlings were sold to the neighbours at Rs. 5 per 100. Necessary instructions were given to them as to the method of cultivation, with the hope of popularizing the growing of *Coffea robusta*.

In the fruit section several good varieties have been planted.

*School Gardens*.—These gardens have had close supervision, and the teachers have been given instructions periodically. Seeds and plants for these gardens were procured from time to time from the Balangoda and Godakawela Gardens.

*Tobacco Growing Experiment at Pallewela*.—Experiment with tobacco at Pallewela has been very successful. The people in that locality have taken up the cultivation of tobacco. About 10 acres are already planted. In order to encourage this cultivation further, I have taught two villagers how to cure tobacco.

*Staff*.—In the course of this year I have been provided with four assistants, and the vel-vidanes have been placed under our control.

E. B. ALEXANDER,  
Government Agent.

Ratnapura, March 1, 1920.

## APPENDIX.

### I.—REPORT OF THE LOCAL BOARD OF RATNAPURA FOR 1919.

The following comparative statement shows the revenue and expenditure for 1918 and 1919 :—

|  | REVENUE.          |                  |                   |                  |

| 7. Unaccounted for ..   | —     | —     | —  | —     | —     | —  |

*Sanitation.*—The health of the town was satisfactory. There has been no epidemic during the year under review. The number of births and deaths in the town during the year is as follows :—

Births .. 187      Deaths .. 325

The shortage of food supplies during the second half of the year did not cause extreme hardship, mainly because of the manner in which both the traders and the general public co-operated in securing a fair distribution of the limited quantities available.

The Board has decided to take up without any delay the construction of surface drainage outlets emptying into the river. The Provincial Engineer is preparing estimates for the outlets at the Warakatota end of the town.

The unhealthy swamp near the railway station was acquired by the Board at a cost of Rs. 359.34. It is proposed to fill it up.

*Public Works.*—The following are the most important public works carried out during the year :—

- (1) Improvement of the public bathing well at Batugedara.
- (2) Rebuilding of the second bridge over the Katugas-ela.
- (3) An edanda on the Mahawala path.
- (4) Cement drain below Cross street.
- (5) Water supply to the Infectious Diseases Hospital, the Board contributing only half the cost.
- (6) Improvement of the esplanade by drainage and by the removal of the old clump of bamboos from the centre. With the removal of the town tennis court from its present position to the north end of the green, a good playground will be available for the children of the town.

*Water Supply.*—The present water supply is liable to be exhausted during the draught at the beginning of each year, nor can any house connections be established until there is a larger supply. The Provincial Engineer has not yet completed the preliminary investigations in connection with the proposed reservoir near Umandola in Batugedara Hill.

*Miscellaneous.*—The Board held eleven meetings in 1919. There was no election of new Unofficial Members during the year. The members who had been elected in the previous year and held offices during the year under review were Messrs. D. E. Jayatilleke, T. Walloppillai, and A. H. E. Molamure.

The following changes took place amongst the Official Members : Mr. B. Constantine, Government Agent, was succeeded by Mr. E. B. Alexander in April ; Mr. A. N. Robertson, Provincial Engineer, was succeeded by Mr. O. T. Nettleton in October.

There was a flood in September. Some of the poorer dwelling houses in low-lying areas were damaged. Some distress prevailed amongst the inhabitants of those houses. Relief was given in the form of money and free timber.

Ratnapura, March 1, 1920.

E. B. ALEXANDER,  
Chairman.

## II.—REPORT OF THE PROVINCIAL ROAD COMMITTEE OF THE PROVINCE OF SABARAGAMUWA FOR 1919.

Six meetings were held during the year. Papers were also circulated among members for approval.

2. The following works were carried out during the year :—

|   | Rs.   | c. |
|---|-------|----|
| (1) General repairs to Ratnapura resthouse, extending outlet drain, repairing water pump, and fixing wooden putties to glass panes of doors and windows .. .. | 1,530 | 35 |
| (2) Repairs to Pelmadulla resthouse .. ..   | 88    | 28 |
| (3) General repairs, Balangoda resthouse .. ..  | 451   | 0  |

|--------------------------------|------------------|--------------------------|----------------------|
|                                |                  | Rs. c.                   | Rs. c.               |
| <i>Ratnapura District.</i>     |                  |                          |                      |
| (1) Ratnapura-Malwala ferry .. | 5                | 3,500 0                  | 3,570 0              |
| (2) Balangoda-Chetnole ..      | 3                | 1,100 0                  | 1,122 0              |
| (3) Elleyarawa-Pinnawala ..    | 6.50             | 3,150 0                  | 3,213 0              |
| <i>Kegalla District.</i>       |                  |                          |                      |
| (4) Glenalla-Havilland ..      | 3.50             | 1,750 0                  | 1,785 0              |
| (5) Dehiowita-Algoda ..        | 1.50             | 500 0                    | 510 0                |
| (6) Parakaduwa-Hemingford ..   | 1.48             | 600 0                    | 612 0                |
| (7) Gewilipitiya-Hatgampola .. | 1.65             | 600 0                    | 612 0                |

## 7. All estate contributions were paid during the year.

8. *Estate Roads Department, Ordinance No. 12 of 1902.*—These roads comprise the following :—

Ratnapura District : Malwala ferry-Wewelwatta factory.

Kegalla District : (1) Bevilla-Digowa, 5½ miles ; (2) Morontota-Arandara, 2.21 lines ; (3) Yattagoda-Yattawala, 43 lines.

## 9. There were no changes in the staff. The work of the office was increased considerably by several applications from estate proprietors under the Branch Roads and Estate Roads Ordinance. The following is the list of roads :—

- (1) Ellearawa-Pinnawala extension.
- (2) Karandana estate-Labugama.
- (3) Arachchikade-Watapota.
- (4) Malwala ferry-Wewelwatta.
- (5) Balangoda-Bombuwa (Estate Roads Ordinance).

E. B. ALEXANDER,  
Chairman.

## III.—REPORT OF THE DISTRICT ROAD COMMITTEE, RATNAPURA, FOR 1919.

THE District Road Committee, Ratnapura, consisted of the following members :—The Government Agent, Mr. B. Constantine, up to April 11, thereafter Mr. E. B. Alexander (Chairman); Mr. C. W. Dias, District Engineer; Mr. W. E. Peiris; Mr. J. Vandenberg; Mr. J. Hawke up to April, thereafter Mr. H. F. Pearson; and Mr. E. E. Megget, Additional member under section 23 of Ordinance No. 10 of 1861 up to July, thereafter Mr. E. C. Villiers.

2. Three meetings were held during the year. Papers were also circulated among members for approval.

3. I append a statement showing the working of the Thoroughfares Ordinances for the years 1918 and 1919 :—

|   | 1918.  |         | Percent-<br>age on<br>Number<br>under<br>Head 2. | 1919.  |         | Percent-<br>age on<br>Number<br>under<br>Head 2. |

Ratnapura, March 1, 1920.

E. B. ALEXANDER,  
Chairman.

## REPORT ON THE KEGALLA DISTRICT FOR 1919.

## I.—HISTORY OF THE YEAR.

*Administrative Changes.*—Mr. C. W. Bickmore succeeded Mr. H. E. Beven as District Judge in June, and was in turn succeeded by Mr. V. P. Redlich in October. In November Captain T. G. Salmon, Temporary Assistant Superintendent of Police, reverted to civil employment, and was succeeded by Mr. B. Langran. Captain T. G. Salmon left behind him an admirable record of four years' work, and his departure was much regretted by all communities. The death of Mr. L. B. Nugawela, the Senior Ratamahatmaya, in July was a distinct loss to the district. He had been Ratamahatmaya of Beligal korale for twenty-five years. A Kandyan gentleman of the good old type, he was regarded with affection and esteem by all who knew him. He was succeeded by Mr. P. C. Dedigama.

2. *Events.*—The outstanding feature of the year was the shortage of imported rice, with the consequent control of sale and distribution. This added very greatly to the volume of Kachcheri work. It is dealt with in more detail below.

3. In February a successful Agri-Horticultural Show was held at Rambukkana, and was opened by His Excellency the Governor. The prevailing drought interfered somewhat with the quality of the exhibits, but the general arrangements and buildings left nothing to be desired, and reflected great credit on Mr. H. W. Boyagoda, Ratamahatmaya, and his committee.

4. On July 19 the signing of Peace was celebrated throughout the district. The writer visited several centres, and was much impressed with the enthusiasm displayed by the whole population. At night a chain of bonfires was lighted on the commanding hills.

5. On November 25 the district was honoured with a visit by His Excellency the Governor, who was entertained to luncheon at the Talduwa Club by the Kelani Valley Planters' Association. He received addresses from the associations, as well as from the headmen of the Three Korales. The latter also provided a perahera.

## II.—REVENUE AND EXPENDITURE.

6. The revenue for the financial year ended September 30, 1919, was Rs. 450,890·51, as against Rs. 386,729·74 in 1918 and Rs. 368,455·23 in 1917. This considerable increase is a satisfactory indication of the progress of the district. The chief heads under which increases were shown were Arrack and Toddy, Rs. 37,016·66; Stamp Duties, Rs. 6,124·70; Opium Sales, Rs. 4,403·13; Forest Department Revenue, Rs. 3,273·87; and Land Sales, Rs. 16,001·46. There was a decrease of Rs. 3,966·66 under Fines and Forfeitures. It may be mentioned that the revenue from the arrack rent of the Three Korales, which properly belongs to this district, is for the convenience of the renters credited at the Ratnapura Kachcheri. The expenditure was Rs. 57,083·02, as against Rs. 47,966·53 for the previous year, the increase being chiefly due to the payment of temporary allowances to Government officers.

## III.—CONDITION OF THE PEOPLE.

7. *Public Health.*—The health of the district was good throughout the year. Deaths numbered 6,808, as against 8,624 in 1918. Estimating the population at 280,000, this roughly represents the low death-rate of 20·7, which would certainly appear to indicate that the food shortage had no adverse effect on the public health. On the contrary more work and smaller rations seem to have rendered the people harder and fitter than usual. Births decreased from 12,996 to 11,007. This may be attributed to the less satisfactory conditions prevailing in 1918. With a view to coping with the problem of infantile mortality, a trained midwife was appointed in January for the town of Kegalla and the surrounding villages. Her salary is paid half by the Local Board and half by the Village Committees. From the returns of work rendered by her it is evident that her services are becoming appreciated.

8. *Food Supply.*—The prospect of a rice shortage was in view from the beginning of the year, but it was not till June that difficulties actually arose. Rice became unobtainable in Colombo, and for a short time the situation was grave. From this time the district was strictly rationed, and while supplies were never adequate, there was no serious distress. The situation was always worse in the Three Korales, where paddy fields are few, and the people are dependent on the estates for a livelihood. The normal requirements of this area are 1,600 bags a week, but it was for a considerable period reduced to 750. It was found necessary to introduce ration cards in this part of the district as early as July. In the Four Korales, on the other hand, there are large areas of paddy fields, and little difficulty was experienced till November, by which time local stocks had become almost exhausted. Ration cards had then to be introduced within this area also. The ration was the lowest minimum possible, but even so it is to be feared that many had to go without. In December the allotment for the district was 1,800 bags, i.e., 144,000 measures a week, which was obviously inadequate to supply a population of at least 180,000 dependents at this time on imported rice. One of the most satisfactory features of the situation was the patient way in which the people faced their difficulties. Even the prejudice against Bangkok rice soon disappeared, and inferior qualities of rice were also readily accepted without demur.

9. The Assistant Government Agent was appointed Deputy Food Controller for the district in June. The retail prices of rice were fixed by him, and various orders published to secure the proper conservation of local stocks. Occasionally it became necessary to commandeer supplies of paddy for the use of the town. As regards distribution to the dealers, they were at first sent to Colombo with orders on the Granaries, but this method proving unsatisfactory, the local allotment was sent direct from Colombo to the different railway stations in the district. The dealers then attended the Kachcheri, paid for the rice they required, and removed it from the stations. This threw much extra work on the Kachcheri staff. My thanks are due to Mr. A. F. Gunaratna, the Kachcheri Mudaliyar, for his careful supervision of the details. In the Three Korales the brunt of the work fell on Mr. Meedeniya, Ratamahatmaya, and he carried it out very ably.

10. *Industries.*—The rice situation focussed attention on food production as the most vital industry of the year. A Durbar was held at Kandy in January, and, as a result of its deliberations, it was decided to give out on easy terms all available Crown lands. The people readily took advantage of this concession, and applications came in fast. Unfortunately very large areas in this district have to be reserved either for the protection of rivers and paddy fields or for the railway fuel supply, and many applications had to be rejected on these grounds. However, 31 applications covering an area of 185 acres were allowed for dry cultivation, and 13 applications covering an area of 154 acres for conversion into paddy fields. Owing to the steep and broken nature of the country, little extension of paddy cultivation is possible. Intensive methods are therefore necessary. Transplanting, seed selection, and manuring were made the chief points in our agricultural propaganda. In addition to the Kegalla Agricultural Instructor, four Assistant Instructors were appointed. A local Food Production Committee was constituted, and its efforts were certainly not without success. For the maha harvest of 1920 every available patch of paddy field was put under cultivation, and thanks to favourable rains the harvest gave every prospect of being one of the best on record for many years. The advantage of transplanting became very obvious, and it is hoped that this practice may become universal. Very large extents of chena also gave excellent promise. The cultivation of vegetables was adopted widely; gold and silver medals were awarded for the best garden in each korale. The garden which won the first prize in Paranakuru korale would have done credit to any market gardener. But the strongest incentives to increased production were, on the one hand, fear of hunger, and, on the other, high prices. So far, as it has contributed to this end, the rice shortage has not been an unmixed evil.

11. With the exception of plumbago, which again had a bad year, other local industries prospered. Large extensions were made in rubber cultivation. Coconuts and plantains realized very high prices.

12. Among minor industries may be mentioned the manufacture of rubber chests, pottery gold, silver, brass and iron work, carts and furniture, and a certain amount of gemming. Mr. Boyagoda, Ratamahatmaya, has started an interesting experiment in the shape of a weaving school at Pinnawala. Six hand looms have been provided. It is hoped this will catch on as a village industry.

13. Owing to increased activity in nearly all industries the demand for labour was good.

14. *Co-operative Credit Societies.*—There are four societies in the district, but owing to abnormal conditions little progress was recorded.

15. *Health of Cattle.*—There were two slight outbreaks of rinderpest in October: one at Makura on the Kegalla-Undugoda road, and the other at Walagama on the Polgahawela road. The source of infection was the North-Western Province. Thanks to the prompt steps taken, which included the closing of the roads to cart traffic for ten days, the outbreaks were very promptly checked, and did not spread beyond the original contacts. Otherwise the health of cattle was excellent. In the interests of agriculture, the export of buffaloes from the district was prohibited.

16. *Pilgrimages.*—The chief centres in the district are Alutnuwara Dewale, Deraniyagala Maha Saman Dewale, and Wattarama Vihare. Sanitary measures were effectively carried out by the headmen.

#### IV.—EDUCATION.

17. The District School Committee consisted of the Assistant Government Agent, the Director of Education, the Rev. Father A. M. Verstraeten, the Rev. C. B. Weerasinghe, Mr. L. Krasse, Mudaliyar A. F. Gunaratna, and the late Mr. L. B. Nugawela, Ratamahatmaya.

18. The revenue and expenditure of the Committee were as follows:—

| REVENUE.                        |    | Rs.    | c. | EXPENDITURE.                   |    | Rs.    | c. |
|---------------------------------|----|--------|----|--------------------------------|----|--------|----|
| Balance of previous year        | .. | 12,382 | 74 | Erection of new buildings      | .. | 17,234 | 12 |
| Government contribution         | .. | 17,841 | 50 | Repairs to buildings           | .. | 4,123  | 33 |
| Village Committee contributions | .. | 4,200  | 0  | Fences and wells               | .. | 1,463  | 85 |
| School fines                    | .. | 1,979  | 31 | Garden implements              | .. | 100    | 0  |
| Miscellaneous                   | .. | 76     | 75 | Furniture and school apparatus | .. | 50     | 0  |
|                                 |    |        |    | Salaries                       | .. | 941    | 25 |
|                                 |    |        |    | Miscellaneous                  | .. | 327    | 93 |
|                                 |    |        |    | Balance on December 31, 1919   | .. | 12,239 | 82 |
| Total                           | .. | 36,480 | 30 | Total                          | .. | 36,480 | 30 |

19. Works of importance completed during the year were the reconstruction on new sites of the Hatnagoda mixed school and the Deraniyagala boys' school, a new school at Magala on the edge of the Peak Wilderness, and permanent extensions to the schools at Kahambiliyawala and Dedigama.

20. The larger works in progress at the end of the year were the reconstruction on new sites of the Mawatugoda, Molagoda, and Dombemada boys' schools, and new schools at Rangalla and Malalpola.

21. The needs of the district as regards boys' schools are approaching finality, but the necessary facilities for the education of girls are still inadequate. Progress was, however, made in this direction. It was decided during the year to open seven girls' schools. The sites and buildings for five of these schools are being given free by the villagers. In the case of the other two, existing buildings rendered vacant by the building of new boys' schools will be utilized. These seven schools will be opened during 1920.

22. *Attendance.*—The percentage average attendance in all schools was 65, as against 66 in 1918. The only reason which can be assigned for the decrease is the rice shortage, which certainly made it more difficult for parents to send their children to school. A new system of prosecution of defaulters is being given a trial, but it is to be feared that there can be little improvement without the appointment of salaried attendance officers. This would be too severe a strain on the funds of the Committee.

#### V.—POLICE AND CRIME.

23. Crime does not show any tendency to decrease. On the contrary, there has been an increase of 16 per cent. in "true" cases over 1918, which year showed an increase of 12 per cent. over 1917. That the police have worked well is shown by the fact that they have increased the percentage of convictions in "true" cases from 34 to 35.

24. The comparative figures of true cases under certain heads of crime for 1918 and 1919 are as follows :—

|                 | 1918. | 1919. |                   | 1918. | 1919. |
|-----------------|-------|-------|-------------------|-------|-------|
| Arson           | 17    | 8     | Hurt by knife     | 44    | 60    |
| Burglary        | 181   | 217   | Rape              | 1     | 5     |
| Cattle stealing | 39    | 75    | Robbery           | 29    | 25    |
| Grievous hurt   | 40    | 41    | Theft over Rs. 20 | 107   | 112   |
| Homicide        | 12    | 9     |                   |       |       |

The chief increases were under Burglary and Cattle Stealing, and this was no doubt a result of the prevailing economic conditions.

25. The Police Magistrate of Avissawella (Mr. C. E. de Pinto) in reporting on crime in the Three Korales attributes the difficulty in obtaining convictions partly to the police being inadequate in numbers, and partly to the reluctance of witnesses to attend court. "Travelling in this district is so notoriously expensive and tedious, especially to those in the more remote villages in Three Korales, that it is scarcely surprising if the villagers avoid attending courts of justice as far as possible." He makes the interesting suggestion that a circuit court should be held at Ruwanwella, the centre of the Three Korales.

26. The police and headmen co-operated satisfactorily in the suppression and investigation of crime. Credit is due to Mr. Mapitigama, Ratamahatmaya, Paranakuru korale, for the reduction of crime in his division, which in 1918 had the two most criminal villages in the district, viz., Talewala and Hettimulla. The Assistant Superintendent of Police brought to my notice all cases of good work by the minor headmen, and they received rewards amounting to Rs. 5,205, as against Rs. 3,394 in 1918.

#### VI.—LOCAL GOVERNMENT.

27. The Local Board of Kegalla is dealt with in a separate report.

28. *Sanitary Board.*—There are three towns worked under the Small Towns Ordinance, viz., Dehiowita, Yatiyantota, and Rambukkana. There is a Sanitary Inspector in charge of each with a force of scavenging coolies.

29. The revenue and expenditure of each town was as follows :—

##### *Rambukkana.*

|                              | Rs.   | c. |                              | Rs.    | c. |
|------------------------------|-------|----|------------------------------|--------|----|
| Balance on December 31, 1918 | 7,273 | 48 | Expenditure                  | 10,823 | 37 |
| Revenue                      | 9,680 | 6  | Balance on December 31, 1919 | 6,130  | 17 |

##### *Yatiyantota.*

|                              | Rs.   | c. |                              | Rs.   | c. |
|------------------------------|-------|----|------------------------------|-------|----|
| Balance on December 31, 1918 | 5,793 | 86 | Expenditure                  | 7,350 | 44 |
| Revenue                      | 3,564 | 31 | Balance on December 31, 1919 | 2,010 | 73 |

##### *Dehiowita.*

|                              | Rs.   | c. |                              | Rs.   | c. |
|------------------------------|-------|----|------------------------------|-------|----|
| Balance on December 31, 1918 | 7,074 | 98 | Expenditure                  | 6,142 | 31 |
| Revenue                      | 4,111 | 64 | Balance on December 31, 1919 | 5,044 | 31 |

30. The above statement indicates the considerable amount of work done at each town. At Rambukkana a set of lines for the Board coolies was built at a cost of Rs. 1,191.50, and two wells at a cost of Rs. 620. Three new roads were constructed for Rs. 2,485: one to Werellapota, one to Dompe-mulla, and the other to the cemetery. Rs. 215 was spent on converting the old gala into a vegetable market, the unsightly booths in the main bazaar being done away with. The prosperity of the town is indicated by the large number of boutiques recently constructed or in course of construction. At Yatiyantota two new masonry latrines were completed at a cost of Rs. 2,000, and cement drains were built on the Parusella road. At Dehiowita a new latrine for males was built costing Rs. 1,000, a cattle pound at a cost of Rs. 250, and 500 feet of drain behind the bazaar was regraded and rebuilt at a cost of Rs. 500. Both Yatiyantota and Dehiowita were provided with new scavenging and street watering carts. The health of all the towns was good.

#### VII.—GANSABHAWAS.

31. *Village Committees.*—The revenue of the four Village Committees, including balances carried forward, amounted to Rs. 51,161.31, and the expenditure to Rs. 45,199.95. The salaries of all employees had to be raised to meet the higher cost of living. Among the more important works undertaken were the following :—

- (1) Construction of one mile of the Alpitiya-Hemmatagama road.
- (2) Construction of a dispensary at Deraniyagala.
- (3) Construction of a new Village Tribunal at Mawatugoda.
- (4) Conversion of part of the Hettimulla-Ussapitiya path into a cart road.

32. *Village Tribunals.*—A new court was established at Mawatugoda to deal with cases from Tumpalata pattu and to relieve the Rambukkana court, the work of which was heavy. Later in the year Government sanctioned my recommendation for the appointment of an additional President. Previously there were only three Presidents and six courts for the four Ratamahatmayas' divisions. There is now one President and two courts for each. This measure has tended to the equalization of work among the Presidents and to the convenience of the public. For the new post Mr. B. M. Kiri Banda Polgasdeniya was selected.

33. The following is a statement of the number of institutions, civil and criminal, for the last three years :—

|                                      | 1917. | 1918. | 1919. |
|--------------------------------------|-------|-------|-------|
| Galboda and Kinigoda Korales ..      | 5,717 | 5,078 | 5,849 |
| Beligal Korale ..                    | 2,906 | 2,872 | 2,728 |
| Paranakuru Korale ..                 |       |       | 2,591 |
| Three Korales and Lower Bulatgama .. | 2,350 | 2,217 | 2,622 |

34. There were 120 appeals to the Assistant Government Agent. In 108 cases the judgments of the Presidents were affirmed and in 12 set aside. There were 6 appeals to His Excellency the Governor. In all of these the decisions of the Assistant Government Agent were affirmed.

#### VIII.—LAND SETTLEMENT.

35. The following statement shows the extent of Crown land disposed of during the year :—

|                 | Sold.               |                   | Settled.            |                   | Total.              |                   |
|-----------------|---------------------|-------------------|---------------------|-------------------|---------------------|-------------------|
|                 | Extent.<br>A. R. P. | Amount.<br>Rs. c. | Extent.<br>A. R. P. | Amount.<br>Rs. c. | Extent.<br>A. R. P. | Amount.<br>Rs. c. |
| To Europeans .. | 35 0 29 ..          | 3,315 29 ..       | 511 2 15·46 ..      | 25,038 10 ..      | 546 3 4·46 ..       | 28,353 36         |
| To Natives ..   | 125 2 7 ..          | 6,943 20 ..       | 42 3 24·56 ..       | 1,662 54 ..       | 168 1 31·56 ..      | 8,605 74          |

36. Thirty-seven lots covering an extent of 110 acres and 3½ perches were leased out under the new leasing scheme. The amount realized in premia was Rs. 5,757·37. The majority of the leases were bought by capitalists. The scheme has not proved popular with the villagers, and it is satisfactory to note that it has been modified. Except in the case of lots over 50 acres, it is now left to the option of the applicants to state whether they wish to lease or purchase outright.

37. *Waste Lands Ordinance*.—No fresh villages were closed by the Settlement Officer during 1919. Four villages have been released from closure, but no final plans have yet been issued.

38. Three certificates of quiet possession, involving an extent of 50 acres 1 rood and 4 perches, have been issued during the year. There are in hand 18 plans awaiting settlement and covering an extent of 2,487 acres. Applications for a settlement with the Crown by the purchasers of unsettled chena lands were very numerous. In the absence of any definite principles of settlement, each case has to be treated on its merits, and involves much investigation and correspondence.

39. *Land Acquisition*.—An extent of 15 acres 1 rood and 28 perches was acquired in 1919 at a cost of Rs 11,273·24.

#### IX.—WORKING OF ORDINANCES.

40. *Excise*.—Owing partly to the closure of several taverns, and partly to the increased cost of arrack, the two arrack rents of the district realized a considerably lower figure than in 1918, viz., Rs. 421,488, as against Rs. 621,009. The toddy rents also dropped from Rs. 43,380 to Rs. 38,915. The fees for the foreign liquor taverns show a slight increase from Rs. 4,136 to Rs. 4,461.

41. Twelve arrack taverns, viz., at Deraniyagala, Madola, Panawala, Yogama, Asgangula, Pahala Kadugannawa, Moradana, Karandupone, Opatha, Ampe, Yattattawala, and Dewalegama, were closed as from October 1, 1919. Also five toddy taverns and two out of the three foreign liquor taverns in Kegalla town.

42. *Local Option*.—Pollings were held in October and November for four toddy taverns and resulted as follows :—

|                 |                            |                 |                            |
|-----------------|----------------------------|-----------------|----------------------------|
| Gevilipitiya .. | 76 per cent. for abolition | Yatanwala ..    | 82 per cent. for abolition |
| Hungampola ..   | 80 do. do.                 | Hapugastenna .. | 77 do. do.                 |

To what extent these results express the real feelings of the people is doubtful. The impression gained is that the average villager is more or less indifferent, but is constrained to vote by one or two influential organizers. The renter being merely a “bird of passage,” there is no one to work on the other side. It is to be regretted that the organizers were on occasions not averse from improper methods; several cases of false personation occurred. If there were any possibility of stopping illicit sales, the closure of any tavern would be welcome, but it is far from being the case that such closure results in much decrease of consumption.

43. *Opium*.—The number of registered consumers was 405, as against 423 in 1918. The quantity of opium sold decreased from 195 to 182 pounds.

44. *Registration of Cattle and Dogs, &c.*—The number of cattle branded was 5,745. The number of dogs registered was 6,311, as against 6,290 in 1918. The number of carts licensed was 818, as against 795 in 1918.

45. *Kandyan Marriage Ordinance*.—The number of marriages registered was 901, as against 822 in 1918; the applications for divorce were 248, as against 205.

#### X.—PUBLIC WORKS.

46. The principal roads were well maintained. The Public Works Department took over another 2½ miles of the Pindeniya road, and Government has undertaken to take over the rest of the road eventually and to construct a bridge at Arandara in place of the present causeway. Government has also decided to convert the Algoda-Woodend District Road Committee road into a main road; Rs. 30,000 has been provided on this account in the Estimates for 1919–20. Negotiations were in progress for constructing a new road from Dehiowita to Deraniyagala under the Branch Roads Ordinance.

47. The following works were in progress or completed during 1919:—

- (1) Track-bottoming 38 to 45 miles, Colombo-Kandy road.
- (2) Cement drains, Kegalla town.
- (3) Water supply, Karawanella hospital.
- (4) Additional buildings, Karawanella hospital.
- (5) Cement drains, Parussella road, Yatiyantota.

48. The chief works required are :—

- (1) Railway Extensions, Ambepussa to Kegalla and Morontota.
- (2) A new Kachcheri.
- (3) Clerks' quarters, Kegalla.
- (4) Telegraph Office at Aranayaka.
- (5) Post and Telegraph Office at Ambepussa.
- (6) Telephones.

## XI.—FOREST ADMINISTRATION.

49. The total number of offences under the Forest Ordinance reported by the headmen was 99, as against 112 in the previous year. In 65 of these cases, compensation amounting to Rs. 316 was recovered at the Kacheheri. Thirteen cases were reported to court, and resulted in 11 convictions and 2 acquittals, the fines imposed amounting to Rs. 435.

50. The revenue recovered by the Forest Department was Rs. 7,982·59.

## XII.—METEOROLOGICAL CONDITIONS.

51. The first three months of the year were hot and dry. The remainder was remarkable for the almost continuous wet weather which prevailed, the rainfall at Kegalla amounting to 120 inches, as against an annual average of 105 inches. Floods in October caused considerable damage to growing crops, and paddy fields also suffered by silt from new clearings. But generally the crops benefitted by the regularity of the rain and gave promise of a record harvest.

Kegalla Kachcheri,  
February 27, 1920.

**G. F. R. BROWNING,**  
**Assistant Government Agent.**

## APPENDIX.

## I.—REPORT OF THE LOCAL BOARD OF KEGALLA FOR 1919.

## I.—INTRODUCTION.

*Composition of the Board.*—The following members held office during the year 1919:—Officials: The Assistant Government Agent (Chairman); Dr. Hinton de Silva, Medical Officer; and Mr. H. E. de Kretser, District Engineer. Unofficials: Mr. A. A. Wickramasinghe, Mr. A. F. Molamure, and Mr. K. B. Nugapitiya.

## II.—REVENUE AND EXPENDITURE.

2. Comparative statement of the revenue and expenditure of the Board for the years 1918 and 1919 is annexed :—

|                         |        | 1918. |    | 1919.  |    |
|-------------------------|--------|-------|----|--------|----|
| REVENUE.                |        | Rs.   | c. | Rs.    | c. |
| <b>Taxes :—</b>         |        |       |    |        |    |
| Property rate ..        | 2,277  | 17    | .. | 2,272  | 23 |
| Thoroughfares ..        | 1,386  | 50    | .. | 1,418  | 50 |
| Ordinance collection .. | 717    | 25    | .. | 1,012  | 25 |
| Other ..                |        |       | .. |        |    |
| <b>Licenses :—</b>      |        |       |    |        |    |
| Liquor ..               | 350    | 0     | .. | 1,843  | 25 |

| Total ..                         | 12,143 | 58    |    | 12,722 | 43 |

3. *Taxes, Other.*—The increase was due to a larger amount being recovered as tax on motor cars during the year.

4. *Licenses, Liquor.*—The figures for 1918 represent only the refund of stamp duty on liquor licenses issued from December 1, 1917, to August 31, 1918, whereas the figures for 1919 represent the stamp duty on licenses issued from October 1, 1918, to November 30, 1918, and also on licenses issued from December 1, 1918, to November 30, 1919.

5. *Rents, Other.*—The increase was due to the license to sell refreshments near the court-house fetching a higher figure for 1919 at the auction sale.

6. *Fines.*—The increase was chiefly due to fines, erroneously credited to revenue, being refunded to the Local Board during the year.

7. *Cost of Administration, Establishment.*—The increase was due to temporary increase of salaries being given to the peon, cemetery-keeper, and cooly in charge of public grounds.

8. *Cost of Administration, Office Contingencies.*—The increase was due to a larger amount being expended on printed forms and receipt books during the year.

9. *Lighting.*—The decrease was due to the street lamps being lighted for shorter hours.

10. *Public Works, New Construction.*—A new well was excavated on a field opposite to Wewala-deniya Pansala.

11. *Advances.*—The Board contributed a sum of Rs. 1,035 as its share for the construction of side drains in the town. The work was done by the Public Works Department, and has effected a great improvement to the town. It will be continued during 1920.

### III.—THOROUGHFARES ORDINANCE.

12. A comparative statement of working of the Thoroughfares Ordinance in the years 1918 and 1919 is appended:—

Local Board Office,  
Kegalla, February 24, 1920.

G. F. R. BROWNING,  
Chairman.

## II.—REPORT OF THE DISTRICT ROAD COMMITTEE, KEGALLA, FOR 1919.

## I.—INTRODUCTION.

THE District Road Committee of Kegalla during 1919 consisted of the Chairman, Mr. G. F. R. Browning; the District Engineer, Mr. H. K. de Kretser; Mr. E. G. T. Ward Simpson, European Member; Mr. E. O. C. Vandergert from January to February, Mr. L. E. Markus from March, Burgher Member; Mr. A. A. Wickramasinghe, Native Member; Mr. A. W. Cantlay representing the Kelani Valley Planters' Association; Mr. M. B. Blount for January, and Mr. H. A. Trail from February, representing the Dolosbage and Yakdessa Planters' Association as Additional Members appointed under Ordinance No. 10 of 1887.

2. One meeting was held during the year on January 23, 1919, and the opinion of the members was taken by circular at other times.

## II.—COMMUTATION.

3. A comparative statement showing the results of the Committee's efforts to call out labour and to collect commutation money is annexed:—

|   | 1918.  |         | Percent-<br>age on<br>Number<br>under<br>Head 2. | 1919.  |         | Percent-<br>age on<br>Number<br>under<br>Head 2. |
|---|--------|---------|--|--------|---------|--|
| 1. Population of local area by latest Census ..   | —      | 180,674 | —  | —      | 180,674 | —  |
| 2. Number of resident males by division officers' lists reported liable to labour ..      | —      | 51,267  | —  | —      | 52,606  | —  |
| 3. Discharged obligation within local area by—  |        |         |  |        |         |  |
| (a) Paying single commutation ..  | 47,198 |         | 92·06  | 48,256 |         | 91·73  |
| (b) Paying double commutation ..  | 329    |         | ·64  | 301    |         | ·57  |
| (c) Labouring six days ..   | —      |         | —  | —      |         | —  |
| (d) Labouring twelve days ..  | —      |         | —  | —      |         | —  |
| 4. Total discharged obligation ..   |        | 47,527  | 92·70  |        | 48,557  | 92·30  |
| 5. Failed to discharge obligation within local area, but otherwise accounted for as—      |        |         |  |        |         |  |
| (e) Exempted on account of age, death, disqualification, or physical inability to work .. | 1,801  |         | 3·51   | 1,753  |         | 3·33   |
| (f) Paid or laboured elsewhere ..   | 1,640  |         | 3·20   | 1,901  |         | 3·61   |
| (g) Double entries or entries by mistake ..   | 65     |         | ·13  | 65     |         | ·12  |
| (h) Fined ..  | 8      |         | ·01  | 10     |         | ·02  |
| (i) Imprisoned ..   | —      |         | —  | —      |         | —  |
| (j) Left local area ..  | 226    |         | ·44  | 320    |         | ·61  |

| Miscellaneous charges ..   | .. | 15,386  | 46 |
| Balance on December 31, 1919 ..  | .. | 12,155  | 1  |
| Total ..   | .. | 106,960 | 8  |

5. The report of the Superintendent of Minor Roads, Kegalla, is as follows:—

## MINOR ROADS AND RESTHOUSES.

The roads in this district in charge of the District Road Committee have been maintained in as satisfactory condition as possible with the meagre funds at its disposal, notwithstanding the adverse climatic conditions due to the abnormal rainfall for practically three-fourths of the year. 1919 was unusually wet in this very wet District.

There were several floods since October, and many bridges and culverts were washed away, and also much scour, slips, and washaways occurred. The repairs to these washaways and erosions, especially on the natural portions of the roads, will be costly to repair satisfactorily.

Except for a big bridge and half a mile of the Hatgampola-Hettimulla road, which were rendered impassable for cart traffic, there was no interruption to traffic in any of the other roads, as temporary bridges were erected, and urgent repair works done immediately. A large expenditure will be required to repair all the damages.

*Pindeniya Road.*

This road has been well maintained. After our completion of the maintenance work, a further 2½ miles was given over to the Public Works Department.

The causeway at Arandara was impassable frequently owing to floods.

*Warakapola-Ruwanwella Road.*

The metal portion of 5½ miles was re-metalled and maintained, and also half a mile beyond Niyadurupola was track-metalled and several new culverts built. Portions of this road get under water often, especially the 4th and 5th miles, which are also badly silted from the neighbouring estates. The road beyond Niyadurupola is getting badly silted up from the adjacent estates. A good number of waterways are absolutely necessary.

The road was kept fit for traffic in spite of the damages.

*Nelundeniya-Dedigama Road.*

The whole of this road is now maintained as a metalled road.

*Hingula-Alupotha Road.*

This connecting road has been greatly improved. One mile is kept up as a track-metalled road, and a further ½ mile has been track-metalled as a preliminary improvement. Some additional culverts were also built. This road is much used now.

*Mawanella-Alpitiya Road.*

This natural and fair weather road requires much work to be done. The last year's track-metalled portions of 3 miles were kept up satisfactorily. But funds being limited, sufficiently satisfactory work cannot be done to meet the heavy traffic put on it. Two new culverts were built. The natural portion of this road, about 2½ miles in length, is getting badly scoured for want of waterways. Owing to this year being so wet, there has been very little chance for the road to dry up. It is anticipated that sufficient funds will be available for improvement and metalling another mile. Otherwise, the Government will have to be approached for help. This road is important as it runs into the heart of the interior.

*Rambukkana-Katupitiya Road.*

The metalled portion of 3 miles was kept up very satisfactorily. Extensive damage occurred during rains to several bridges, and the natural portion towards the end was washed away in many places. The damages in the more important section were immediately repaired and temporary bridges erected, and there was no interruption to traffic.

*Kansalagamuwa-Dunukewatta Road.*

Half a mile of this was track-metalled, and additional culverts were built and improved. The rest of the road is kept up as a natural road. A big bridge, near ¾th milepost, was seriously damaged, and is being repaired. Traffic has been kept up without interruption.

*Hatgampola-Hettimulla Road.*

Nearly three-fourths of this road has now been brought to a very satisfactory state of repair, compared with what it was some time back. The natural portion crossing the jungle is being gradually improved by way of track-metalling and additional waterways. A good length of this road was fit for heavy traffic and motors, but unfortunately a big bridge and nearly half a mile of road was practically washed away during the recent heavy floods, which rose higher than ever known before. Traffic was interrupted, as repairs done immediately after could not stand owing to the subsequent higher floods, which occurred at quite an unusual period. However, repairs are being effected, and the road is now practically ready for traffic again. It is proposed to deviate the portion of road subject to annual flood damages to a higher level, and the question of funds awaits decision.

*Heenabowra-Galagedera Road.*

This road, too, suffered much by the floods. Temporary repairs were effected at once. Traffic is greatly increasing, as the section under the District Road Committee, Central Province, has been improved.

*The Other Roads.*

The other roads have been maintained satisfactorily, but with difficulty.

*Labour.*

The scarcity of rice is affecting our labour, and the better pay and rates offered by other departments are attracting it elsewhere.

*Resthouses.*

The resthouses have been well maintained. The three new bedrooms, &c., so much needed for the Kitulgala resthouse, were completed at a cost of Rs. 9,629.86.

6. *Encroachments and Damage to Roads.*—Twenty-eight prosecutions were instituted during the year under review, viz., 27 for building without permission and one for damage done to a road; of these, 13 resulted in convictions, 3 in acquittals, and 10 were withdrawn, as the parties removed the encroachments; 2 cases are pending.

7. 127 permits for building houses have been issued during the year.

District Road Committee,  
Kegalla, January 29, 1920.

G. F. R. BROWNING,  
Chairman.

# SURVEY DEPARTMENT.

## REPORT OF THE SURVEYOR-GENERAL FOR 1919.

FOR the first half of the year under review this Department was still very short of supervising officers owing to the non-return of those who left on war service; by the end of the year, however, fourteen officers out of those who had left on war service had returned. As regards the field surveyors' staff, the Departmental Training School, which had been closed in consequence of the war, was re-opened. Thirty-nine students have been under training during the year, of which eight will receive appointments from January 1, 1920, the remainder will complete their training during 1920. The vacancies in this grade now stand at seventy-seven.

2. The following officers returned from war service during the year :—

|              |    |  |
|--------------|----|--|
| March 7      | .. | Mr. K. W. S. Mitchell, Assistant Superintendent of Surveys.  |
| June 17      | .. | Mr. T. Y. Price, Assistant Superintendent of Surveys.  |
| June 25      | .. | Mr. H. O. Clark, Assistant Superintendent of Surveys.  |
| July 22      | .. | Messrs. H. P. Harrison and C. C. S. Stephenson, Assistant Superintendents of Surveys.  |
| August 4     | .. | Messrs. L. G. O. Woodhouse, Superintendent of Surveys; S. Easton, L. E. S. Mitchell, and A. R. Watson, Assistant Superintendents of Surveys. |
| August 16    | .. | Mr. C. W. F. Wavell, Assistant Superintendent of Surveys.  |
| September 4  | .. | Mr. W. C. de Zylva, Grade II. Surveyor (from Mesopotamia).   |
| September 15 | .. | Mr. G. K. Thornhill, Superintendent of Application Surveys.  |
| November 21  | .. | Mr. P. Moriarty, Assistant Superintendent of Surveys.  |
| November 25  | .. | Mr. F. J. Salmon, Superintendent of Surveys.   |
| December 1   | .. | Mr. R. W. E. Ruddock, Assistant Superintendent of Surveys.   |
| December 4   | .. | Mr. H. W. Johnson, R.E., Assistant Superintendent of Surveys.  |

The following officers are expected to return to the Island shortly :—

Mr. E. B. Manson, Superintendent of Surveys.  
 Mr. A. J. Bamford, Superintendent, Observatory.  
 Mr. J. Ferguson, Assistant Superintendent of Surveys.  
 Mr. R. J. Johnston, Assistant Superintendent of Surveys.  
 Mr. W. S. Maddams, R.E., Assistant Superintendent of Surveys.  
 Mr. C. A. Copland, Assistant Superintendent of Surveys (date not known).  
 Mr. W. H. Crutchley, Assistant Superintendent of Surveys (date not known).

This brings the Assistant Superintendents' staff up to nineteen officers out of a total of thirty-seven, to fill which only four are expected to return in the near future. Ten Assistant Superintendents have been indentured for from England to fill existing vacancies. Four vacancies have been reserved for returning men.

3. As survey officers return from the war zones, much useful information regarding survey methods resorted to under fire is brought to light, the use to which aerial photography can be put in connection with mapping being of paramount interest. Very fine specimens of such photographs are now available, and though they would prove valuable over entirely unmapped country, they cannot compete with theodolite or plane table work, but would be of great assistance in survey operations of any nature. The day may be looked forward to when reliable aerial photos of this Island will be available, and perhaps this Department may be supplied with a "Blimp," or whatever machine is considered most serviceable. In this connection the following extract from the British Journal of Photography, Volume LXVI., No. 3,095, dated August 29, 1919, will be read with interest :—

From the purely photographic standpoint the war-created art or craft of aerial photography can too easily be regarded as having been brought to a high pitch of perfection. It is quite true that by the combined efforts of opticians, camera constructors, and emulsion makers the obstacles which sheer height, the movement of the aeroplane, or atmospheric conditions put in the way of obtaining well-defined negatives from the air have been almost completely overcome. Yet that, after all, is only half the battle. An aerial photograph is nothing except in so far as it fulfils a useful purpose. In the important work of map-making, the following paper by Lieutenant-Colonel M. N. MacLeod before the Royal Geographical Society is a timely reminder, by an authority, of the distance the aero-photographic method has still to traverse before it can dispense with the surveyor to supplement or check its results. To anticipate Colonel MacLeod, a general conclusion to which he comes is that "for accurate work we cannot, of course, dispense with the surveyor altogether, and in hilly country, until we can devise some satisfactory form of stereo-plotter, the air photograph will not help us very much." Other geographers who discussed the paper shared this view, that aero-photo survey is a branch demanding further research, and that more at the hands of surveyors and topographers than at those experienced in the purely photographic problems.

4. As I anticipated in my report last year, a fair number of officers have returned from the war during the year under review, but supervision has been short, and unfortunately some time yet must elapse before the Department can be brought up to a satisfactory state as regards close supervision, without which the work and *morale* of the field surveyors always suffers.

5. **The Town Guard, Survey Section.**—Early in the year ordinary drills were suspended. On July 19 the section paraded with the rest of the battalion on the occasion of the review of the local forces by His Excellency the Governor and behaved with commendable steadiness. The percentage of efficient for the year, based on the result of the musketry course, was ninety-four, and, in spite of the small amount of musketry instruction possible owing to the suspension of drills, some good scores were made.

6. **Town Surveys.**—In these days when schemes for improving the sanitary condition of large and small towns are continually under consideration, the question of town surveys becomes one of increased importance. Such surveys require a staff of specially trained surveyors, who should combine the qualifications of accuracy in the field with good draughtsmanship. Satisfactory progress with the staff available has been made with surveys in different parts of the Island. Large surveys include Colombo, Matara, Galle, Trincomalee, Batticaloa, and Nawalapitiya, whilst smaller ones of Madampe and Nattandiya in the North-Western Province and Panwila in the Central Province have been completed, and surveys of Anuradhapura, Hatton, Dikoya, and Bogawantalawa are under consideration.

The first sheets of the Colombo town survey are now available. This work is progressing well, and so far the estimate has been worked to. It is intended to supplement already existing levels by further data, from which close contours, say 2 or 5 feet, may be determined with precision. In course of time, as required, this skeleton survey can be converted into a cadastral town survey of great accuracy on any scale required.

7. **Topographical Surveys.**—Mr. P. J. May and the whole staff engaged on these surveys are again to be congratulated on the good outturn of work for the year. Some 2,401 square miles were contoured, averaging 7 square miles per mensem per surveyor. This good progress is partly due to the fact that a portion of the area was already covered by good flat maps with numerous spot heights and levels. For the same reason equally good progress may be expected in next year's programme, and, in addition, much useful information in the way of levels has already been compiled in advance from sections kindly supplied to me by the Director of Public Works and the Director of Irrigation, to whom the writer's thanks are due. The area covered may be conveniently considered as three distinct blocks described below, and reference may be made to the diagram attached to this report showing the areas modelled, mapped both flat and contour sheets), contoured during the year under review, and the programme to be carried out in 1920.

The following description of the three blocks referred to above is culled from the report of the Superintendent, Topographical Surveys, Mr. P. J. May :—

(a) The cultivated and thickly populated area in the Kegalla-Ratnapura Districts, which is easily accessible, the steep and rugged country covering the Peak wilderness extending up to the top of Adam's Peak range, and the abandoned coffee districts near Balangoda on the slopes of the Maskeliya-Bogawantalawa range (Doturagala, Detanagalla, &c.).

(b) The Uva portion, which includes the southern slopes of the Haputale and Namunukuli ranges right down to Monaragala Hill on the east and the Madulsima range on the north. About 200 square miles of this area is low, gently undulating, forest country, where intersection work is almost impossible except by staging, and most of the work was therefore done by traversing.

(c) The Colombo portion, which is all densely populated, gently undulating country, thickly planted with coconut trees, rendered intersection work almost impossible. Work in this area was simplified by the existence of a modern flat map with many lines of levels and numerous spot heights. Most of the work was done by traverses, and these were plotted direct on the flat map record sheets.

The area between the Peak district and Colombo was specially taken up with a view to providing early information in connection with the investigations now being undertaken by the Public Works Department regarding the feasibility of utilizing the water power for hydro-electric purposes, as well as providing a water supply to several towns and supplementing the Labugama reservoir supply.

The chief difficulty to be contended with this year was the shortage of rice, which at one time threatened to be so serious as to stop field work in some districts. This was particularly so in the case of Sabaragamuwa, which has only a small area of paddy land, and is densely populated, in addition to the many estates with large immigrant labour forces. The natives in these parts have, in many places, almost abandoned the practice of planting up gardens and foodstuffs in favour of the more profitable rubber tree, which is found in small patches everywhere. In many cases I noticed that even coconut and jak trees have been cut out to make room for rubber. Survey coolies, not being residents of the district, receive but little sympathy from the natives, and when trying to purchase foodstuffs were often told to go back to their own villages to buy them. The shortage of rice was severely felt, but I was occasionally able to relieve the situation by obtaining supplies from headquarters.

The health of the party was, on the whole, fair, there was no unusual amount of sickness among the coolies during the year.

8. **Mapping Room.**—This branch has again been very busy during the year, and has been hard put to it to meet all demands made. The work was carried on in the top room of the Mutual Life Insurance Buildings from July, 1914, to April, 1919, and at the time of writing is located in the old offices of Messrs. Aitken, Spence & Co., and will shortly be moved again into the new extension now being built behind the Headquarters Office. The half-mile contour surveys made in 1918 were all drawn up; this by itself entails a great deal of work. The drawing of the agricultural maps of the Southern, Sabaragamuwa, and Western Provinces on a scale of 4 miles to an inch was completed, so that agricultural maps of the nine Provinces will shortly be available for issue. The following one-mile contour sheets from the new surveys of 1918 and the revised sheet M/11 kept back last year were published :—J/6, J/7, J/12, J/17, J/21, and J/22. The following are being printed in the Process Department :—I/10, I/15, J/11, J/16, M/2, and M/16.

The greater part of the mapping staff was employed during the year on models, and, owing to the demand, has necessitated speeding up the work without increasing the staff to overcrowding, for it is realized that the office in the new extension will not be so commodious as the present temporary quarters. An attempt was made to expedite the colouring by means of masks, but these were not found workable owing to their flexibility when perforated, which made it impossible to register the colours accurately. The experiment of turning out printed maps suitable for pasting over models met with more success, and would seem to meet the requirements, where finely finished work is not altogether essential. With

the addition of paper models, it is estimated that the future demand will be conveniently met by hand-coloured plaster models, supplemented by paper models, mounted with printed maps. These latter will no doubt be very useful for educational purposes in all schools, and with this idea in view, Mr. E. Evans, the Acting Director of Education, was invited to visit the Mapping Room and discussed the question of supply and demand. The matter is now before Government.

The large scale model of the Diyatalawa Military area, commenced last year, was proceeded with as opportunity occurred. It consists of four matrices, all of which have been completed, and one cast made. The horizontal scale is 16 chains to an inch, or 5 inches to a mile, while the vertical scale is  $6\frac{1}{2}$  inches to a mile, with contours at 50-foot intervals. This model should be ready during 1920, and should prove of value from a Military training point of view, as well as from an Engineering standpoint, when extensions of roads and buildings are contemplated in Diyatalawa.

The following original cardboard matrices have been completed :—I/10, J/6, J/7, J/11, J/12, M/2, and M/16.

*Plaster of Paris Models.*—Thirteen sets of casts were prepared during the year from the 1918 survey, and out of these, twelve sets were coloured and eleven issued. The following are particulars of models issued :—

*Official Use.*

One set of contour models of 1918 surveys to His Excellency the Governor.

One complete set of contour models up to date to the Secretary of State for the Colonies.

One specimen set of models showing surveys prior to 1918 to be kept in the Mapping Department for inspection by visitors.

*To Private Parties.*

One set of contour models of 1918 surveys to Messrs. The Colombo Commercial Co., Ltd.; Aitken, Spence & Co.; J. M. Robertson & Co.; The Ceylon Chamber of Commerce; The Ceylon Association in London; Carson & Co.; George Steuart & Co.; Whittall & Co. (in January); The Planters' Association, Kandy (casts and edges compared); and one model of L/15 to Mr. P. Hirst, Nuwara Eliya.

The charge made for each set was Rs. 315 and the single model Rs. 30, which brings the total sum obtained to Rs. 2,550.

*Paper Models.*—Three full models of I/10, I/15, J/6, J/11, I/20, I/25, J/16, J/21, and L/5, L/10, M/1, M/6 were prepared, and detail drawings of I/20, I/25, J/11, J/16 completed and sent to the Process Department for reproduction.

Before leaving the subject of the models, it may be well to draw attention to the fact that the vertical scale has been exaggerated as compared with the horizontal scale, in order to bring out the relief, which would otherwise be practically lost if left on the natural scale, especially when the low-country is reached. The scale of 2 inches to the mile was therefore adopted to suit the one-mile horizontal scale.

The following special work was also carried out :—A copy of Galle Municipality map was prepared and issued to the Government Agent, Southern Province, and a 16-chain map of Hambantota town, for sanitary purposes, to the Assistant Government Agent; thirty copies of the 24-mile map of the Island, showing principal waterfalls in the Island, and three tracings on 20-chain scale, showing contours, for hydro-electric power scheme in the Maskeliya-oya and Hambantota-oya Valleys to the Director of Public Works.

The Ceylon motor map, school map, and Colombo Municipality map were revised, and a large number of tracings for the reproduction of the Colombo town skeleton survey were prepared.

The Store Department was supplied with 512 mounted ruled double elephant sheets and 455 mounted half sheets, with headings, certificates, &c., and 104 half-mile coloured blue prints of block survey areas and 16-chain record sheets with index tracings were supplied for topographical compilation.

As the work in the Mapping Branch progresses, every effort is made to cheapen, expedite, and improve the outturn of maps and models, and in this connection great credit is due to those in charge and many of those working in this branch, whose names I have mentioned in previous reports.

9. *Application Surveys.*—As explained in the reports for 1916 and 1917, the activities of this branch deal with surveys of a varied nature over the whole Island. The total number of applications received for revenue and special surveys in this branch amounted to 2,272, being 466 in deficit of those received for 1918. The figures for the past six years are as follows :—2,738 in 1918, 2,567 in 1917, 2,278 in 1916, 3,056 in 1915, 3,057 in 1914, and 3,208 in 1913.

Appendix I. shows the actual number of application and special surveys received and dealt with during the year. As a matter of public interest, a table has again been inserted in this report (Appendix II.) showing the lands surveyed on application during the year subdivided under the different cultivations and other requirements.

The closure system, which was explained at length in the report of 1911-12, continues to work satisfactorily. The demand for land has been below the normal, taken as a whole. It has been high in the Southern Province and the North-Central Province, followed closely by the Northern Province and the Western Province, the least demand being in the North-Western Province. It is satisfactory to note that the North-Central Province and the Northern Province figure well in this respect, and that lands are now being taken up more freely in the low-country. Appendix I. shows the applications received in each Province.

The outturn of work in the field during the year has been normal and calls for no special comment. The outturn of work in Head Office has been normal and quite up to standard.

Owing to the scarcity of rice, a special feature this year has been made of surveys for the increased local production of foodstuffs. These surveys have been treated as of primary importance, and expedited in every way possible; a fair amount of land has been surveyed and brought under cultivation for this purpose, covering 970 acres in the Western, Central, North-Central, and Uva Provinces.

Surveys of salterns of a special nature have been undertaken at the request of the Ceylon Government Salt Adviser in connection with the improved methods of manufacturing salt.

The miscellaneous surveys dealt with by the Application Staff during the year include the following :—

Survey of the small town of Agalawatta.

Survey of the Blomendahl Mills.

Survey of 325 acres at Embilipitiya for Waste Lands Ordinance settlements.

Survey for the improvement of the Madampe-Hambantota road.

Demarcation survey for a model farm and pasture grounds at Ragedara, Kurunegala District.

Survey of application for 300 acres at Ragedara for the same purpose.

Survey at Maha Iluppallama of 2,200 acres to be leased for hemp cultivation.

Kunittivu village survey.

Tamblagam survey for settling claims.

Survey of 100 acres at Sankattaravayal, Pachchilaippali, Jaffna, for cattle farming.

Survey of Lady McCallum's Drive, Nuwara Eliya.

Gampola-Pussellawa road survey.

Survey of Nuwara Eliya Park, for the Director of Agriculture.

**Road Contract Surveys.**—Contracts for the survey of the following roads were issued to two private surveyors, Messrs. K. Vale Muruku and S. Ehamperam. These surveys have been taken up and are still in progress. A large amount of detail is involved in connection therewith, which requires careful supervision :—Tellipallai-Batticotta and Punnalai roads by Mr. Vale Muruku ; Point Pedro-Kodikamam and Manipay-Kaitadi roads by Mr. Ehamperam.

**Acquisition Surveys.**—The demand for these surveys has decreased in the past year, and is now almost normal ; as previously reported, most of the questions are situated in the Western Province. The Chilaw-Puttalam Railway acquisition survey is nearing completion. The following are a few of the most important acquisition surveys attended to, which deserve special mention :—

Western Province : Acquisition surveys for the Kolonnawa Oil Installation ; for the deviation of the Pitumpe-Waga Village Committee road ; for the improvement to roads at Moratuwa ; for widening the Olimulla road at Kalutara South ; for widening the Mitotamulla road and for a rickshaw stand.

Province of Sabaragamuwa : For the deviation of Ellearawa-Pinnawala road.

Central Province : For widening Bailey road, Nawalapitiya ; for the protection of the Hatton-Dikoya road ; for raising above flood level the Gampola, Nawalapitiya, and Lantern Hill roads.

Northern Province : For providing for the future development of the port of Talaimannar ; for an experimental station and agricultural school at Tirunelveli, Nallur Division, Jaffna District.

Southern Province : For the beacon at Dondra ; for the bund and reservation for the Walawe right bank scheme.

While not entirely giving up the policy of leasing Crown lands, Government has decided to revert to outright sale as heretofore.

**10. Irrigation Surveys.**—Extensive surveys at Nachchaduwa were carried out. The survey requirements have been considerably increased since the work was commenced, and now covers an area of approximately 9,000 acres, on which eight surveyors and an Assistant Superintendent of Surveys have been engaged. The greater part of the field work has been completed, and plans are being drawn up in recess. In the meantime plans of 490 acres have been forwarded to the Government Agent, North-Central Province, for immediate disposal.

A survey under Giant's tank, 558 acres in extent, was completed and forwarded to the Government Agent, Northern Province.

**11. Land Settlement Surveys.**—Activities in this branch continue, unfortunately, to be much restricted owing to the staff of the Land Settlement Department being so greatly reduced. This is due to the great war, the after effects of which will no doubt continue to be felt for some years. Meanwhile the demand for lands in *unsettled districts*, often covered by claims, genuine and bogus, goes on, which demand it is not possible to meet by dealing piecemeal with certificates of quiet possession surveys, for the settlement of which the services of the Government Agents have to be requisitioned. The result is unavoidable delay, causing dissatisfaction and loss to the public. The remedy, of course, is obvious : increase of experienced officers in the Land Settlement Staff.

The following details are taken from the report of the Superintendent, Waste Lands Ordinance Surveys :—

**General.**—The staff was mostly engaged throughout the year on new block surveys and settlement surveys in the North-Central and North-Western Provinces.

**Cadastral Surveys.**—The area covered by new surveys was approximately 24,900 acres, consisting of 17,000 acres in Kanadara korale of the North-Central Province ; 2,500 acres in Giritalana korale, North-Western Province ; 2,300 acres in Neliyagama village, North-Western Province ; and a cadastral survey of 3,100 acres in Labugama and villages adjoining Labugama reservoir, for the settlement and better protection of the waterworks catchment area.

During the year forty-five block survey preliminary plans were issued to the Settlement Officer, containing 5,791 lots, and covering an area of 55,614 acres, i.e., 18,145 acres in the Province of Sabaragamuwa, 3,686 acres in the North-Western Province, 31,382 in the North-Central Province, and 2,401 in the Province of Uva.

**Forest Reserve Surveys.**—Seven plans of forest reserve surveys were issued to the Settlement Officer, covering an extent of 153,464 acres.

**Interim Villages.**—Two final reports on interim villages were received during the year, leaving a balance of eight interim villages outstanding.

**Closed Villages.**—Fifty-six villages were closed to the Revenue Officer, as the Settlement Officer was working in them, and 204 villages were released during the year. A total of 2,741 villages has been closed up to date, and 1,667 released, leaving a balance of 1,074 in the hands of the Settlement Officer.

**Settlement Survey Questions.**—There were 187 settlement survey questions outstanding at the end of 1918, and 113 were received from the Settlement Officer during the year. The completed questions forwarded to the Settlement Officer numbered 245, leaving a balance in hand of 55 questions. In addition to this, a large number of applications were attended to.

*Waste Lands Ordinance.*—During the year 2,142 Waste Lands Ordinance sketches to accompany Waste Lands Ordinance notices and final reports were examined and certified.

*Final Reports.*—The final reports of 171 villages were received from the Settlement Officer during the year, and 234 printed reports were issued, making a total of 2,303 final reports issued. This leaves a balance in hand of 118, of which 61 final reports are being prepared, 2 have been referred back to the Settlement Officer, 5 have been sent to Government for approval, 26 are with the Government Printer, and 24 are in this office awaiting distribution.

*Final Village Plans.*—The number of final village plans issued during the year was 167, bringing the total to 2,229, and leaving a balance of 74 under preparation.

*Village Forest Reserves.*—Crown requisitions for the demarcation of eighteen village forests in the Southern Province were received from the Assistant Government Agent, Matara. The survey of eight questions was completed, and ten questions are still unsurveyed.

*Irrigation Surveys.*—The field work of the survey for the Nachchaduwa irrigation scheme, comprising about 9,000 acres, which was commenced in 1918, is almost complete, and plans of 490 acres have been issued to the Government Agent.

*Tembichchiya.*—The survey of irrigable lands, which was commenced last year, was completed, 1,300 acres were surveyed, plans of which are being drawn up.

*Giant's Tank.*—Plans of 550 acres of irrigable lands were issued to the Government Agent.

12. *Inspections.*—During the year the Provinces were inspected by the writer; the Deputy Surveyor-General, Mr. A. J. Wickwar; the Acting Deputy Surveyor-General, Mr. A. H. G. Dawson; the Acting Assistant Surveyor-General, Mr. C. R. Lundie. In all inspections evidence was brought to light that the want of close supervision in the field leads to loss of efficiency in the field staff. In many reports on survey operations in other colonies this fact has been emphasized during the great war. The Surveyor-General of New Zealand states in his report dated March 31, 1919, that "The want of supervision led to surveyors getting careless, and showing remissness as well." Now that the supervising staff are returning, this fault will disappear.

13. *North-Western Province.*—The year opened unfavourably in this Province for the field staff, as the fever epidemic of 1918 was still in evidence. The health of the staff was very unsatisfactory until the end of March, when conditions were again normal.

*Settlement and Demarcation Surveys.*—These surveys constituted an important part of the work carried out. During the year 164 such surveys were in hand and received, of which 151 were disposed of. 5,458 acres were cut out in villages covering an extent of 19,206 acres.

*Cadastral Surveys.*—The only new work sent in was the survey of Nelliagama village, in extent 2,360 acres. In September a start was made to complete the 5,500 acres in the Giratalana korale left over from 1917. 2,500 acres were surveyed, and the balance, which will complete the whole of the Giratalana korale, will be finished early in 1920.

The Superintendent of Surveys, Mr. A. J. Stronach, reports as follows :—

The block survey of Kumariwanni pattu in Demala hatpattu, in Puttalam District—our fixed block survey programme—was to have been started this year, and I inspected the area for this purpose, but owing to the food shortage in rice, &c., and the want of water in the village tanks, no survey was possible, so we abandoned our fixed programme until after the north-east monsoon, when we propose to make a fresh start in January, 1920. This is a most uninteresting area in the dry zone, flat, and covered by low jungle, chena, with native gardens and paddy fields, sparsely inhabited, and very poor.

A further request for the survey of two isolated villages, Munamalagaswewa and Halmillagollewa, about 3,700 acres in extent, in the Puttalam District, was received from the Government Agent, but no action could be taken owing to the shortage of staff and the advent of the monsoon, so that the survey will not be taken up till early in 1920. This area does not form part of the Settlement Officer's programme.

*Application Surveys.*—The total area surveyed amounts to 656 acres, as against 460 in the previous year. There were only two large applications received for food production, amounting to 329 and 51 acres. Special surveys were carried out in connection with the definition of boundaries of old title plans, road reservations, town surveys, such as Madampe 405 acres and Nattandiya 80 acres, and a skeleton survey for the Sanitary Board of Polgahawela town, in extent 750 acres.

*Irrigation Surveys.*—Surveys were continued of Maha Uswewa lands, and 2,450 acres were dealt with. Further work has to be done here, but it is only intended at present to deal with a portion of this area likely to be taken up by the local population, as it is unlikely to attract capitalists.

*Railway Survey.*—The Chilaw-Puttalam railway survey was continued, and two sections were completed, leaving a balance of 6½ miles. It is estimated that this portion will be completed by the end of February next. Unfortunately one of the surveyors engaged on this work had to be transferred owing to ill-health, and this delayed the survey.

*Certificate of Quiet Possession Surveys.*—No improvement is shown in connection with private surveyors dealing with these surveys. In this connection the Superintendent of Surveys, Mr. A. J. Stronach, reports :—

There were 15 letters of instructions with surveyors at the beginning, and 7 issued during the year. Of all these 22 surveys, only 5 were attended to, and plans examined and forwarded for acceptance, leaving a balance of 17 surveys at the end of the year.

In this connection I may point out that the survey of 100 acres referred to in my last Administration Report has not yet been received back for final examination. This means that not only are all the instructions becoming out of date, but the surveyors keep me corresponding with them, and their clients are being put to great inconvenience.

Out of 17 letters outstanding at the end of this year, only 6 are 1919 questions. The rest are outstanding since 1914. Not a single private surveyor has sent in the plans on the date fixed for its completion and return to this office.

Plans of surveys of three years ago and of 1914 have not been received in this office yet.

There is no doubt that this class of survey necessitates a great deal of work. Claims generally occur in those parts of the country which are covered by very old surveys and title plans, old features have to be picked up and incorporated in the new survey, and many miles may be so surveyed in connection with a small claim. Again, the land often has to be visited more than once to obtain further data, and, finally, landmarks have to be transported and laid down with great accuracy before the final plan can be drawn up and accepted by this Department. Meanwhile the private surveyor may fall ill, or may not

wish to miss a chance of further work elsewhere, and the Surveyor-General has no powers to force him to complete his survey, but can only refuse to grant him permission to carry out further certificate of quiet possession surveys pending receipt of the outstanding one.

14. **Western Province.**—Applications for land have again decreased in this Province, the figures being 42 during 1919 and 80 during 1918. Many applications for land were made in the Kalutara District, some for large areas, which cannot be entertained, as no decision has yet been arrived at regarding the requirements of the Forest Department. The area consequently hung up is very large, possibly over 100 square miles of country.

*Special Surveys.*—Amongst the most important surveys carried out were the following :—

Seven surveys in connection with the site for rail connection to Kolonnawa Oil Installation, embracing in all 38A. 3R. 8P.

Eight surveys in connection with the Harbour Rail Connection with the Main line, embracing in all 19A. 2R. 36P.

A survey of the boundaries of the new small town of Agalawatta, 260A. 0R. 0P.

A survey of the Anti-Tuberculosis Hospital and quarters at Ragama, 0A. 0R. 38P.

A survey for the improvements to roads at Moratuwa, 2A. 3R. 30P.

A survey for the Kalawellawa Police Station, 0A. 3R. 39P.

A survey of Blomendahl Mills, 18A. 0R. 0P.

Eleven surveys in connection with foodstuffs, embracing in all about 660 acres.

*Colombo Town Survey.*—Good progress has been made with this work. The survey of the Wellawatta Ward is complete, and 38 sheets out of 49 have been sent to the Mapping Department. The survey of the Kollupitiya Ward is complete, and 6 sheets out of 22 have been sent in. The survey of Slave Island Ward has been commenced.

*Block and Settlement Surveys.*—Triangulation for the block survey of four villages near Labugama was completed in February, the main traverses were finished by May, and the field work was completed by the end of the year, when the surveyors came in to Colombo to plot their work. There was some very rough country to be covered in connection with this work, but the traverses closed remarkably well. Line plotting is complete, and detail plotting has been commenced.

15. **Southern Province.**—There was again a heavy programme of work in this Province, consisting of Waste Lands Ordinance surveys (comprising settlement, demarcation, Settlement Officer's applications, and landmarking of sold lots), Government Agent's applications and special questions, the Galle town Engineering survey, the Matara town survey, the Galle swamp survey, and surveys of Village Forest Reserves. No block surveys were carried out.

*Application Surveys.*—315 applications and special survey questions were outstanding at the beginning of the year, 505 were received during the year, 485 were completed or cancelled, leaving a balance of 302 applications and 33 special survey questions requiring attention, of which 81 of the former will shortly be forwarded to headquarters. The estimated number of applications expected in area 1 during 1920 is 475. Now that Messrs. Wavell and Watson have returned after war service and are stationed in the Southern Province in direct charge of applications and special question surveys, it is anticipated that the outstandings will be reduced, but, as frequently pointed out in former reports, no close estimate of the amount of work entailed in any one application or special question can be made, but estimates are based on averages obtained over a series of years. There were seven applications for purchase of land over 100 acres in extent, and one of 500 acres in Udamalagala village was under survey at the close of the year. Altogether in the Province 4,154 landmarks were laid down and 460 cut on solid rock.

*Settlement Surveys.*—Waste Land surveys were carried out in a total of twelve villages, covering an aggregate area of 44,969 acres.

*Galle Town Engineering Survey.*—This survey was taken up in two areas : (1) part of Galupiyadda Ward ; (2) part of Kaluwella Ward. Plans of the former, drawn to a scale of 1 chain to an inch, were completed on October 31, 1919 ; and preliminary work was commenced in the latter towards the end of the year. All primary and secondary traverses closed satisfactorily. The primary traverses were connected to three new triangulation stations, which were specially established last year for this survey.

All main and minor roads, cart tracks, footpaths, rights of way, road frontages, railway lines, streams, waterways, drains, and Municipal lands and buildings are shown on the plans ; and Municipal lands, indefinite edges of roads, and edges of cultivation along the sea coast were defined with landmarks. Several encroachments on roads and waterways were detected. Separate tracings showing these were prepared and forwarded to the Government Agent in order that he might deal with them.

Lines of initial levels were first run along all roads in the area, leaving bench marks at junctions of roads, &c. Spot levels along side drains and centres of roads were taken  $1\frac{1}{2}$  chains apart where the gradient was uniform and also at any change of gradient.

Longitudinal sections were taken along the middle of the beds of streams and waterways and carried out to sea to below mean sea level. These longitudinal sections were plotted to the scale of 132 feet horizontal and 20 feet vertical. The spot levels were shown on cloth skeleton tracings, together with all bench marks with their values.

*Matara Town Survey.*—The Superintendent of Surveys, Mr. D. Bloxham, reports as follows :—

It was hoped that all field work would be completed during this year, but excessively bad weather seriously hampered progress, especially in September, when floods occurred. About two weeks' field work will remain to be done in 1920. Besides this, there is the landmarking of indefinite edges of roads. Altogether twenty sheets require this definition, of which eight have still to await the Assistant Government Agent's inspection on the ground. Forty-one "one-chain" field sheets are required in all, of which thirty-nine have been taken up ; of these, thirty-four have been completely plotted and inked up, and out of the thirty-four, thirteen have been fully completed and sent in. Linen tracings of this survey, and also of the Galle town engineering survey, are being made in Matara Office.

An example of the great value of a survey of this nature was mentioned by the Assistant Superintendent of Surveys in charge in his diary for October. It occurred during the checking of the survey along the Tangalla road, where houthiques and huts, very closely situated and in great confusion, form the road boundary.

A certain boutique owner had encroached 1½ links on to the road by adding another course of bricks to his verandah. This was pointed out to the Assistant Government Agent, and the encroachment was at once removed. Without the help of the present survey such an encroachment would either not have been detected, or would be very difficult and troublesome to establish. Subsequent courses of bricks would doubtless be added to the first encroachment as time went on.

*Galle Swamp Survey.*—The purposes of this survey were to determine the extent of swampy land in Galle, and also the possibility of draining it. It originated from a request in a memorial presented to His Excellency the Governor by the Galle Association praying that steps might be taken to fill in or drain the swamps, and so improve the health of the town. A cadastral survey was made showing the swamps lying between the Colombo railway line and the Wakwella road. Spot levels were taken along both the above boundaries, cross sections were run over the swamps every chain apart, and longitudinal sections were obtained along the waterways. The result of the levels so taken showed that the beds of the waterways were, for the most part, below sea level, precluding any possibility of draining the swamps without pumping apparatus. Filling in appears to be the only remedy, and, in fact, since the survey was first started, a considerable portion of the swamps, which are privately owned, have been filled in by the owners and planted up with coconuts. Whether this was done from a fear of acquisition or in order to enhance the value of the land in case of acquisition, the result of the survey has to some extent been beneficial.

*Village Forest Surveys.*—These require little comment. Their object is to reserve portions of low forest in certain villages for the use of the villagers. They are straightforward, and are being carried out by a party of five surveyors. They are for the most part situated in Morawak korale in finally settled villages. Excessively bad weather has hindered progress to a considerable extent.

*Survey Office and Bungalow.*—Land has been acquired within the Municipal limits of Galle for the erection of a Survey Office and bungalow—a long-felt want, indeed, in this Province.

*Health.*—The Superintendent of Surveys reports :—

The health of the staff has, on the whole, been good throughout the year. An outbreak of cholera occurred at Hambantota; luckily only one surveyor was working there at the time. Two coolies of his gang died from the disease. Prompt measures on the part of the medical authorities prevented further casualties in the gang.

16. *Central Province.*—The surveys referred to in the 1918 report were completed, namely, Kandy waterworks catchment area, a very intricate piece of work from a revenue survey point of view; St. Margaret's-Kirklees road; the Peradeniya road; Kadugannawa town; Nuwara Eliya park; and the Riverside road. 137 applications and special survey questions were attended to.

*Settlement Surveys* were made in eight villages. Important demarcation surveys were carried out in Weliwita, Amunewala, Galgedewala, and Akarahediya villages; for this latter work the one-inch topographical survey was used.

*Town Surveys.*—The large scale survey of Panwila town was completed. The Nawalapitiya large scale town survey was continued. The Superintendent, Mr. L. G. O. Woodhouse, reports as follows :—

There is only another month's field work to be done for the town survey proper, but there are over thirty questions which involve re-plotting old work, title plan fixation, demarcation of title plans and settlements by the Government Agent. I am working as far as possible with the Government Agent direct, but as the railway have an interest in the majority of these lots, delay is unavoidable.

An advance plan of the road frontages was compiled and issued on the scale of one chain to an inch in March. This has been of great assistance to the Public Works Department in connection with the town improvements.

The drawing up of the plan will take three or four months to complete. Two surveyors were sent down to Colombo to be shown the latest methods, and were given a six weeks' course.

Bogawantalawa town survey was sanctioned, and a surveyor transferred from the North-Central Province to carry it out.

*Health.*—Several surveyors and their coolies underwent the ancylostomiasis treatment early in the year. The three surveyors and their coolies on the Weliwita demarcation surveys suffered from tick bites and fever. In November and December there was a recurrence of a mild form of influenza; the attack lasted for three or four days only, but apparently leaves no ill-effect. The experience of last year no doubt made the patients careful to take ordinary precautions.

17. *Province of Sabaragamuwa.*—No new block or cadastral surveys were carried out in this Province during the year, and only six settlement surveys were made. It is expected that settlement and demarcation surveys on an extensive scale will be called for by the Settlement Department next year. Application surveys were chiefly for rubber, tea, and the erection of buildings. The following surveys made for rubber cultivation may be mentioned as of interest: 141 acres in Nahalwatura, 444 acres in Karawita, and 1,475 acres in Niriella, all within the Ratnapura District. There is a growing tendency for investors to purchase small areas for rubber cultivation in the Ratnapura District, while the proposed continuation of the Kukul korale road through Karawita to Kalawana, and eventually onwards to Badureliya, is expected to open up a large area eminently suitable for this product. The total area covered by applications amounted to 1,695 acres.

*Special Surveys.*—These comprised a murder scene survey; acquisition for extension and deviation of roads; Government Agent's demarcation and acquisition questions; questions regarding re-definition of old preliminary and title plan boundaries and miscellaneous work. The following special surveys were made :—

Survey of the land to be acquired for the widening and extension of the Elleerawa-Pinnawala road (Balangoda district).

Survey for deviation and widening of portions of the Madampe-Hambantota road, near 84½ and 88½ mileposts.

Definition of Marakele forest reserve.

Re-definition of large forest lots within Dodampe and Kitulpe villages.

Re-definition of extensive lands claimed as private at Hatarabage.

Survey and definition of the catchment area for the proposed water supply to Ratnapura town.

The special question surveys carried out near Ratnapura town were generally of a complicated nature, involving much work, with little to show as a result.

*Certificate of Quiet Possession Surveys.*—Applications for instructions for certificate of quiet possession surveys were received from seven licensed surveyors during the year. The acreage dealt with amounted to 260 acres. Preliminary steps are being taken for the survey, by a licensed surveyor, of 5,400 acres in Delwela village. As already reported in Mr. Stronach's case, the Superintendent of Surveys, Mr. R. W. E. Ruddock, has a complaint to make of the difficulty in getting this class of survey pushed through. He reports as follows:—"Delay on the part of the licensed surveyors in carrying through their work is very marked. These men go from one survey to another putting in a few days at each, I presume in order to draw payment on account. When attention is drawn to the delay, sickness is invariably pleaded as an excuse."

*Buildings.*—A long-felt want in this Province was supplied this year in the shape of a new office completed by the Public Works Department and handed over to this Department on February 10, 1919. Great difficulty was experienced before in keeping valuable records dry, and the work of the clerical staff and draughtsmen often had to cease in the wet weather, which generally prevails in this station. The old rented building was an upstairs one, and was in a state of collapse, when temporary quarters were found in the old jail, until the new building was at last sanctioned and built.

Provision has been made for a bungalow for the Superintendent of Surveys, and it is hoped to have it erected in 1920. Ratnapura is a town where, if possible, all Government servants who are stationed there should have quarters provided. Residence in badly built, damp, rented houses does not tend to the efficiency of those officers who are forced to live in them.

18. *Province of Uva.*—As in 1918, no new block surveys were taken up in this Province during the year, but settlement surveys were continued in the Kandukara korale. The villages of Walasella, Talawa, Medegama, and Ettampitiya were completed and sent in. There is still one village in hand.

Wegam Pattu Korale: Plans of Maha Badullagammana were completed.

Kumbalwela Korale: Seven villages were completed and sent in. The Settlement Officer's requirements in one other village were received and are receiving attention.

*Applications.*—Sixty-nine applications and special survey questions were outstanding at the beginning of the year. 175 were received during the year, 142 were completed, leaving a balance of 55 applications and 47 special survey questions for attention. The applications included one of 264 acres for rubber cultivation, which was completed, and one of 1,000 acres for tea, which is under survey. Fourteen special survey questions for food production are also being attended to.

Eight acquisition surveys were made for various purposes. In addition to the above, applications were received for the survey of 100 acres for rubber in Galbokka village, 100 acres in Diyaluwa village, 500 acres in Kiruwanagama village for tea and rubber, and 100 acres at Lunugala for rubber.

Special surveys were also carried out for the definition of the boundaries of the reservations along the Bandarawela-Haputale road, and plans were sent in of the survey of the reservations on the old road from Haldummulla to Koslanda, 116th to 118th milepost, and the survey of railway land at Haputale.

*Ella Town Survey.*—The preliminary detail survey of Ella town was completed. The plans are now being drawn up in the Provincial Office, after which the boundaries of the private lots will be decided and demarcated. A rough survey of the proposed roads was made. The question of demarcating these roads and of cutting out building sites will be decided after the definition of private lots.

*Health.*—This was very satisfactory despite a serious outbreak of cholera in November in Badulla and district.

19. *North-Central Province.*—This Province continued to make great calls on this Department's energies during the year, and the work was of a very varied nature.

*Application Surveys.*—These surveys are unfortunately somewhat behind hand, due to two causes, the large number received from the Government Agent for disposal, and the abnormal sickness amongst the staff engaged on them. The year started with 530 in hand, and during the year 505 were completed, leaving a balance of 139 at the end of the year.

*Special Surveys.*—The most important of these surveys was that for the lease of lands under Maha Iluppallama for the cultivation of Sisal hemp, 2,048 acres were surveyed in eleven finally settled villages.

The health of the surveyors engaged on application and special surveys has not been at all satisfactory. Early in the year the principal cause of sickness amongst them and the coolies was influenza, which was very virulent in this Province, and, latterly, malaria, and its after effects has been the cause of quite a number of men having to go on sick leave, or having to apply for a transfer to a healthier district on medical advice.

I regret to have to record the death of Mr. V. Henry Pullai, Third Grade Surveyor, and Mr. S. Kanagasabai, Third Grade Surveyor. They were both useful men at their work.

*Block and Cadastral Surveys.*—The area covered by the season's operations was some 20,000 acres in twenty-three villages; this completes the block survey of Kanadara korale. In addition to this, two other villages left over from 1918 were completed. Preparations were made for the survey of 28,000 acres in the Kelegam korale next year. Prospecting was carried out for the necessary triangulation, seven new points were observed from, and orders for the supply of landmarks placed with local contractors, &c.

*Settlement Surveys.*—Three surveyors were engaged on these surveys, eleven questions were in hand at the commencement of the year, 17 received during the year, and 16 surveyed, leaving a balance of 12. As in the case of the staff engaged on application and special surveys, there was a considerable amount of sickness amongst the surveyors and coolies engaged on block and settlement surveys, especially in the early part of the year, when the influenza epidemic was raging over the North-Central Province—whole gangs of coolies went down with it; several coolies succumbed in the field, and a number of others died from its effects after going back to their villages. One surveyor (Mr. S. K. Pasupathy) had to be transferred in May to another Province on account of ill-health.

*Irrigation Surveys.*—The survey of lands under the Nachchaduwa tank was continued. The area to be dealt with, some 9,000 acres, was divided into three parts, known as the "upper," "middle," and "lower" blocks. The field work of the upper and lower blocks was completed during the year, and an advance extract plan of one of the lots in the lower block, 490 acres in extent, was completed, as it was desired to bring this lot on the market as early as possible. A certain amount of delay occurs in these surveys, as the policy is not always fixed ahead of survey, and when fixed is not always adhered to. The future of this scheme promises to be a successful one, and, considering the fact that a road and railway run through the land, and it is in close proximity to the capital of the Province—Anuradhapura being only 3 miles away—there should be no difficulty in attracting capitalists to take up the land.

20. *Northern Province : Forest Surveys.*—The large forest surveys referred in last year's report were finally completed. The work mostly consisted of plan drawing in recess; seven reserves were completed early in the year, and the survey and plans of the Madu forest reserve, over 50,000 acres in extent, were completed by the end of October. Advantage has been taken of the many miles of cut lines in these surveys to link up the Province as far as possible with main circuit traverses, as trigonometrical points are few and far between, owing to the low undulating nature of the country and dense forest and jungle growth.

*Application Surveys.*—Owing to the ill-health of some surveyors and other causes the outstandings in this Province rose from 63 to 143, though a varied amount of work was done. During the year 123 applications were dealt with and 197 new applications were received, against 151 in 1918. The Mullaitivu District sent in more than the other two districts together, which points to a more rapid development of this district. The lands applied for were chiefly for paddy cultivation.

In the Mannar District also the lands applied for were mostly for paddy, but there were a few applications for residential lots in the abandoned pearl fishery town of Silavatturai. Special surveys carried out included encroachments; salt pan surveys at Elephant Pass; acquisition surveys for schools, market sites, the opening up of lanes and roads, and the further development of the Talaimannar port.

*Irrigation Surveys* included the completion of a 650 acres cadastral survey under Giant's tank begun in 1918.

21. *Eastern Province.*—The calls for surveys in this Province have been few, and, as stated last year, the applications made are generally for lands already cultivated, that is, for encroachments. The Superintendent of the Province, Mr. K. W. S. Mitchell, states in this connection as follows:—

An interesting point is that a number of these applications are for cultivation up to twenty-five years old and older. These nearly always form parts of old preliminary plan lots on which title plans about, which greatly increases the time taken over the surveys and plans. In very many cases where I have asked to see the title deeds, the reply is that they are mortgaged. This, I think, will mean that many of these villagers will try to take up new land when the mortgagees foreclose.

The greater number of questions come at present from the Trincomalee District, the Batticaloa District being next, and Kalmunai last.

*Irrigation Surveys.*—The survey of land under the Tembichehiya scheme was completed, being 860 acres in extent.

*Town Surveys.*—The large scale town survey of Trincomalee was continued, and a system of immediate settlement of encroachments during survey has now been adopted, which is very satisfactory, though it naturally delayed the final completion of the work. 1920 should see the end of it. The large scale survey of Batticaloa town is showing rapid progress, and the Superintendent of Surveys reports as follows:—

The primary and secondary traverses have been mostly scored, and detail line plotting is in hand. With two surveyors on the work, the field work should not take very long. The survey is to be plotted on continuous sheets, and will require some 74 sheets, as compared with 52 sheets for the Trincomalee town survey.

*General Labour.*—The Superintendent of Surveys' remarks under this head are as follows:—

It is interesting to note that the majority of the coolies employed under the surveyors are Sinhalese from all over the Island; in fact, more than half the men and all the head coolies are Sinhalese. The Tamil, as a general rule, will only work where he can return to his home at night. There does not appear to be any likelihood of difficulty over labour here. With the increase in the survey coolies' pay, the locally recruited coolies are better off than in pre-war days, as the staple foods consumed by them are plentiful and relatively cheap, and those who come from other Provinces are able to remit a large proportion of their earnings to their homes.

22. *Triangulation.*—Field work was carried out—

(a) For the Labugama block and cadastral survey, fourteen trigonometrical stations were visited. The area covered is 45 square miles.

(b) The Kelegam Korale Scheme, nineteen stations were visited. The area covered is 225 square miles. Calculations were made for the above two schemes, and seventeen points were fixed and altitudes determined. Calculations were also made for the Galle and Batticaloa town surveys, and eleven points were fixed.

(c) Calculations for the determination of the altitudes of twenty points in the Nikaweratiya Scheme, North-Western Province, referred to in previous reports, were entered in the record books.

(d) Calculations of the altitudes of nine points (from existing observations) made this year, and of the altitudes of twenty-nine points were entered in the record books.

(e) A diagram of 4-mile sheets showing all known heights of trigonometrical stations and all lines of levels was prepared for the use of the Topographical Branch.

(f) Applications for trigonometrical information from officers of the Department and other work of a miscellaneous nature received attention.

Information concerning levels, &c., was supplied to the Director of the Public Works and Director of Irrigation. Mr. K. M. Brace, Assistant Superintendent of Surveys, was in charge up to June 17, when Mr. T. Y. Price, Assistant Superintendent of Surveys, took charge for the remainder of the year. Good

work has been done by both these officers, who are called upon for various duties, such as assisting in the Observatory Branch time ball work, supervision of the Survey Departmental Training School, licensed surveyors' class, and the conduct of all examinations—a no light task by itself.

**23. Training School.**—The following details are taken from the report of the Assistant Superintendent of Surveys, Mr. T. Y. Price :—

License Class No. 5: On the result of the final examination, referred to in last year's report, licenses in surveying and levelling were granted to six students at the end of December last year. The remaining four students were granted their licenses after further examination at the end of January.

License Class No. 6 was started in Colombo on January 13 with seven students. After six months' training in Colombo the students were transferred to Padukka for six months' field training in surveying.

Departmental Class No. 9 was started in Colombo on March 31 with nine students. After three months' training in Colombo the students were transferred to Padukka for six months' field training. Eight students have been recommended for appointments as Third Grade Surveyors to be dated January 1, 1920. The remaining student has been kept back for three months' further training with Class No. 10 on account of absence.

Departmental Class No. 10 was started in Colombo on July 2 with ten students. After three months' training in Colombo the students were transferred to Padukka for six months' field training. One student was dismissed for lack of progress three months after joining the school.

Departmental Class No. 11 was started in Colombo on October 1, and consists of twenty students. The class will be transferred to Diyatalawa early in January for its field training.

The course of training for Departmental Class No. 11 and future departmental classes is to be one year instead of nine months, in order that the students may be taught elementary mathematics and levelling. It is hoped that this extra instruction will help them to pass the Junior Departmental Examination for promotion when they become eligible for it.

At the annual examination for the Surveyor-General's license in surveying and levelling, five candidates presented themselves, and one candidate was granted a license in surveying and levelling.

At the annual examination for the Surveyor-General's certificate to practise as a draughtsman, seven candidates presented themselves, and two candidates were granted certificates.

The prospects of Grade Surveyors were improved, and the initial salary was raised from Rs. 600 to Rs. 720 per annum. The number in Second Grade was increased to 50, and Third Grade reduced to 215. Surveyors who passed the senior departmental examination are entitled to rise to a maximum salary of Rs. 4,400, by annual increments of Rs. 180, after a halt of three years on Rs. 3,900.

**24. Title Plan Department.**—During the year under review the Title Plan Department had to deal with 4,882 title plans, of which 4,102 were issued to the Controller of Revenue and 136 to the various Government Agents, making a total of 4,238 plans, or an average of 353 plans per month. A balance of 644 plans has been brought forward for the current year; of this number, 15 have been returned for verification, and 20 were referred for further landmarking, leaving a balance of only 609 outstanding, the greater part of which were received during the latter part of the year. The total area in acres of the issued plans amounted to 11,421. 4,238 plans in triplicate, i.e., 12,714 copies, were signed by me, an average of 1,059 plans per month. There has been a slight increase in the applications for title plans, viz., 1,132 more than the previous year. In addition to the foregoing, the following plans were also issued: 389 sets of lease plans in quadruplicate, and 12 sets of plans in triplicate for attachment to deeds of surrender and assignment grants for mining rights, &c., 16 plans for Fiscal's transfers in favour of the Crown, and 5 plans for exchange of lands. Fourteen certified copies of title plans and lease plans were supplied to the various Government Agents. The work of the Title Plan Department is practically up to date.

**25. Miscellaneous Department : Revision Work.**—This work was commenced with an outstanding of 23 "sixteen-chain" sheets for revision and 8 requiring new tracings. 916 sheets were received for revision, &c., during the year and they were attended to as follows :—

539 sheets revised for Government Agents and Assistant Government Agents.

311 sixteen-chain sheets revised for prints.

39 sixteen-chains new Vandyke tracings prepared.

16 one-chain Vandyke tracings prepared.

11 one-chain tracings revised for prints.

**Miscellaneous Work.**—Demands made on this branch under this head continue to be very heavy. Questions for Military and other Government offices were received and attended to; many questions from different Divisional Irrigation Engineers, &c., in connection with food cultivation were received and promptly dealt with.

The following maps were forwarded to the Royal Geographical Society, London :—

One copy of 4 miles to an inch map of Ceylon (in twelve sections).

One copy of 8 miles to an inch map of Ceylon.

One copy of 16 chains to an inch map of Colombo.

One copy of half mile to an inch map of Colombo and environs in six sections.

31 contour sheets, one mile to an inch, with a key map.

**Miscellaneous Applications for Tracings, Maps, and Diagrams.**—These slightly exceeded those of last year. This work was commenced with an outstanding of 55, during the year 5,146 fresh applications were received for attention, making a total of 5,201, of which 5,139 were disposed of, leaving a balance of 62 to be carried on to 1920.

The fees for work done, i.e., preparation of tracings, copies of plans, sale of maps, &c., during the year amounted to Rs. 18,411.98, of which Rs. 7,800.63 is not chargeable, being work done for Government officials. This is an increase of Rs. 1,087.41 over last year's total amount.

The work in the Miscellaneous Department is steadily increasing, and it will be necessary to strengthen the staff to cope with the increasing number of applications for tracings, &c.

**26. Lithographic and Process Departments.**—Again nothing but praise can be said in connection with this very important branch of this Department. The standard of work continues to improve. Very fine specimens of additional contour sheets were completed during the year. A specimen will be found in this report. The branch will be hard put to it in 1920 to cope with the large number of new

sheets to be printed consequent on the great progress of the Topographical Branch in the field. Agricultural maps of the Western Province, the Province of Sabaragamuwa, and the Southern Province, as stated elsewhere, will shortly be available for issue early in 1920. It is likely that the large camera required, referred to in 1918, will be obtained in 1920. The following statements show the work turned out during the year :—

|   | Copies.       | Pulls.        |
|---|---------------|---------------|
| For Colonial Secretary .. ..                      | 3,425         | 27,400        |

| Gas light prints .. .. | 157   |

The usual amount of bookbinding and mounting of maps was also done during the year.

27. **Office Staff, Clerks and Draughtsmen.**—The office staff consists of 234 clerks and draughtsmen on the Fixed Establishment, and 186 extra clerks and draughtsmen, totalling 420 in Colombo and outstations. Clerks and draughtsmen were granted the privilege of counting their supernumerary service as part of the eleven years' service necessary for promotion to Class II, Grade I. The initial salary of the extra clerks and draughtsmen was raised from Rs. 250 to Rs. 300 per annum, and the system of promotion of these men to the Fixed Establishment by selection was done away with, and selection from this grade, in future, will be made on the results of an annual competitive examination. The first examination held on December 15 and 16 was confined only to men drawing the maximum salary of the grade. Four extra clerks and draughtsmen were appointed to the Fixed Establishment during the year, three clerks and draughtsmen were appointed to Class I., and twenty-one to Class II., Grade I.

Mr. A. E. Weerapermall was appointed Storekeeper, in place of Mr. S. L. Dirckze, who retired after thirty-four years' satisfactory service. Mr. F. P. Peris, Clerk and Draughtsman, having been condemned by a medical board, also retired on May 8. Four extra clerks and draughtsmen resigned their appointments, and eight joined the Departmental Training School for Surveyors.

Seventeen extra clerks and draughtsmen were admitted after passing the prescribed examination.

The deaths of Extra Clerk and Draughtsman, P. Don James, and Clerk and Draughtsman, P. T. Perera, are recorded with regret.

Mr. A. V. B. Melder, an Extra Clerk and Draughtsman, who resigned his appointment to go to Mesopotamia, was re-admitted.

Mr. A. A. Carthelis, Clerk and Draughtsman, was discharged from the Army as permanently unfit for further service, but on medical advice he has not yet returned to Ceylon, as he is suffering from some form of concussion.

Messrs. G. D. Livera, Clerk and Draughtsman, and O. de Livera, Extra Clerk and Draughtsman, returned to the Island after active service. The former reverted to the establishment of Clerk and Draughtsman of this Department, and the latter obtained an appointment in the Excise Department.

Mr. B. de la Harpe, Extra Clerk and Draughtsman, who was lent to the Censor's Office in August, 1917, resumed civil duties. The Censor, in thanking the writer for the services of this officer, stated that he had performed his duties satisfactorily. The work was of an arduous nature, necessitating attendance day and night at various hours day after day, Sundays and Government holidays included.

Mr. S. de la Harpe, Extra Clerk and Draughtsman, who obtained a Commission in the Indian Army, returned to the Island and received an appointment in the Police Department.

The Survey Department cricket team did well this year in the Government Service Cricket Competition, defeating the Land Settlement Department, the Government Stores, and, in the final round, the Post and Telegraph Department, thus winning the Cup presented for the first time for the second division of this competition.

28. **Library.**—The library continues to be of great value to the clerks and draughtsmen, both from an educational and recreative point of view. The total number of books in the library is 2,279 volumes. Illustrated papers and magazines are received regularly, and, among other valuable books on Ceylon, the library possesses a complete set of the Encyclopædia Britannica, 11th edition; History of the Nations; Harmsworth History of the World; and Times History of the War. His Excellency the Governor, on his recent visit to the office, visited the library and the reading room.

29. **Field Staff : Leave.**—The following officers went on leave to Europe during the year :—

Mr. A. J. Wickwar, Deputy Surveyor-General, for seven months from May 16.

Mr. B. P. Stork, First Grade Surveyor, for one year from June 10.

Mr. L. M. Symes, Assistant Superintendent of Surveys, for nine months from June 19.

Mr. C. H. Vince, Superintendent of Surveys, for eight months from August 1.

Mr. W. A. Davis, Assistant Superintendent of Surveys, for nine months from September 16.

The following officers returned from leave of absence in Europe during the year :—

January 25 : Mr. C. F. W. Halliley, Superintendent of Surveys.

May 10 : Mr. F. L. Baker, Assistant Superintendent of Surveys.

December 18 : Mr. A. J. Wickwar, Deputy Surveyor-General.

*Promotions.*—February 1 : Mr. J. E. Evans, Assistant Astronomer, was promoted First Assistant Astronomer.

May 2 : Messrs. P. Patuwata Withana, D. W. Jayamaha, and V. Karthigesu, Third Grade Surveyors, were promoted Second Grade Surveyors.

October 1 : Mr. K. W. S. Mitchell, Senior Assistant Superintendent of Surveys, was promoted Superintendent of Surveys, Grade II.

October 1 : Mr. A. E. Dirckze, Junior Assistant Superintendent of Surveys, was promoted Senior Assistant Superintendent of Surveys.

October 1 : Mr. W. C. de Zylva, Second Grade Surveyor, was promoted First Grade Surveyor on one year's probation.

December 15 : Mr. R. W. E. Ruddock, Senior Assistant Superintendent of Surveys, who returned from war service, was promoted Superintendent of Surveys, Grade II., with effect from March 1, 1916.

*Appointments.*—March 16 : Mr. V. Kanagarajah was re-appointed Third Grade Surveyor.

September 15 : Mr. H. Jameson was re-appointed Assistant Astronomer.

*Retirements.*—April 18 : Mr. C. Speldewind, First Grade Surveyor, after thirty-seven years' service.

July 4 : Mr. J. Bell, Royal Engineers, Assistant Superintendent of Surveys, terminated his agreement.

*Resignations.*—May 6 : Mr. A. H. Felsing, Third Grade Surveyor, having secured an appointment as a surveyor in Mesopotamia.

May 15 : Mr. W. Sinnatamby, Third Grade Surveyor, on being appointed Superintendent of Works, Local Board, Jaffna.

August 1 : Mr. S. W. Chelliah, Third Grade Surveyor, owing to unsatisfactory work.

Mr. J. Moriarty, Assistant Superintendent of Surveys, having received a permanent commission in the Indian Army, resigned his appointment in this Department as from February 1, 1915.

December 12 : Services of Mr. J. F. S. Suppiah, Third Grade Surveyor, were dispensed with on his being condemned by a Medical Board.

*Dismissals.*—There were no dismissals during the year.

*Deaths.*—I regret to have to record the death in the field staff of Messrs. V. Henry Pillay, Third Grade Surveyor, on March 22, and S. Kanagasabai, Third Grade Surveyor, on November 30.

Mr. E. J. Whitehead, Assistant Superintendent of Surveys, who resigned his appointment, is reported dead.

*Miscellaneous.*—Mr. A. H. G. Dawson, Acting Deputy Surveyor-General, was appointed a J.P. and U.P.M.(P.), in place of Mr. A. J. Wickwar, who went on leave to Europe.

The Honorary rank of Muhandiram was conferred on Mr. D. Abeygoonewardane, First Grade Surveyor. This is the first time a surveyor has received this rank while in service.

Brigadier-General F. A. MacFarlan, Mrs. MacFarlan, and Miss MacFarlan visited this office on October 14.

His Excellency the Governor visited this office, attended by his Private Secretary, on October 28.

Sir Graeme Thomson visited this office, accompanied by Lady Thomson, on December 15.

*Temporary Accommodation at Headquarters.*—A new temporary office is being built on the grounds adjoining this office. The building is 216 feet long, and will accommodate the Mapping Department, &c. It will be completed early in 1920. This is only a portion of the urgently needed accommodation required by this Department.

*Observatory.*—The writer's report and that of Mr. J. E. Evans, the Acting Superintendent of this branch, will again be found embodied as an Appendix to this report.

*Conclusion.*—As stated by the writer last year, it has been his happy privilege as each year goes by to be able to place on record his sense of obligation to the staff officers, field officers, and clerks and draughtsmen for their whole-hearted support during each year of his administration, and the year under review again calls for similar mention. The whole Department desires to welcome back those officers who have returned from service at the great war.

Surveyor-General's Office,  
Colombo, January 8, 1920.

W. C. S. INGLES,  
Surveyor-General.

#### APPENDIX I.

##### Return of Applications and Special Questions for the Year ended December 31, 1919.

## APPENDIX VI.

## THE COLOMBO OBSERVATORY.

## REPORT OF THE SURVEYOR-GENERAL FOR 1919.

Mr. A. J. Bamford, Superintendent of the Observatory, was engaged on military service in Palestine until he demobilized in July last, and was on leave for the remainder of the year. While in Europe he attended the Conference of Meteorologists of the British Dominions in London in September, and the Congress of Directors of Independent Meteorological Services (Allied and Neutral) in Paris in October.

Mr. H. Jameson, Assistant Astronomer, returned from war service and resumed duties on September 15.

Mr. T. Y. Price, who returned to the Island on June 17, and was appointed Assistant Superintendent of Surveys in charge of the Trigonometrical Branch and Training School, assisted in the time work for the remainder of the year.

Mr. K. M. Brace, who was assisting until Mr. Price's arrival, reverted to his survey duties.

Mr. M. I. I. L. Marikar, one of the two retrenched surveyors detailed to assist in the work of the Observatory, returned to field work in the North-Central Province on March 1.

During the year nine clerks were trained in meteorology before being sent to outstations.

The curtailed time service commenced last year was continued to December 14. Of the daily time ball signals sent at 13 hours, there were eight failures. On the five days when these failures occurred the signal sent at 14 hours was successful, thus only on three days were there no time signals.

Anticipating that the Observatory staff would soon attain its full working strength, the original full-time service of three signals per diem was reverted to from December 15 for the convenience of shipping. Quite a large proportion of the ships calling at Colombo stay but a few hours, and this necessitates frequent time ball signals. The time ball is now dropped thrice daily at 9, 13, and 16 hours, except on Sundays and public holidays, when it is dropped at 9 hours only.

On my recommendation the Post Office authorities took over from the Observatory the control of the greater part of the synchronized clock service in Colombo from November 1. This important service is in time bound to be greatly extended, and its upkeep is likely to interfere with the legitimate work, time and meteorological, of the Observatory staff. It was advisable to adopt this procedure, as dual control of apparatus and overlapping of work is wrong in principle and prejudicial to efficiency.

Throughout the year the master clock at the Central Telegraph Office was daily synchronized at 12.55 P.M., to permit of the dissemination of the correct time at 13 hours to Post Offices all over the Island.

Owing to retrenchment no alterations or additions to the buildings were possible, but further extension is required, such as a new transit room to house the new transit instrument, now on order from England, and further storage accommodation.

The daily weather forecast issued from the Observatory is based on telegraphic information from observations taken at 9.30. A.M. at twenty stations in various parts of the Island. Up to November 20 this information was only available on the day of issue by the medium of the local evening papers. From that date, with the printing by the Government Printer of the "Post Office Daily List" in the afternoon previous, instead of the morning of the date it bears, the list reached outstations 24 hours earlier, and was available 4 hours earlier to the public in Colombo.

The following meteorological sheds were inspected either by the Acting Superintendent of the Observatory, Mr. H. Jameson, or by the various staff officers and Superintendents of Surveys or myself:—Anuradhapura, Badulla, Batticaloa, Diyatalawa, Galle, Hambantota, Jaffna, Kurunegala, Puttalam, Ratnapura, and Trincomalee.

It does not at present appear likely that Ceylon will be included in the main air routes of the world, but it still would appear desirable to make provision for the investigation of the upper air strata.

I again wish to thank the numerous voluntary observers who have kindly supplied me with rainfall statistics from the readings of the gauges, and to express my thanks to those gentlemen who have been kind enough to present the Observatory Branch of this Department with copies of periodicals.

W. C. S. INGLES,  
Surveyor-General.

#### REPORT OF THE ACTING SUPERINTENDENT, COLOMBO OBSERVATORY.

RETRENCHMENT still being necessary, this report, as in the two preceding years, is abridged.

2. A month by month descriptive summary is not given here, but, if required, a fairly full report will be found in the "Tropical Agriculturist." Also a more detailed tabular statement appears monthly as a supplement to the *Ceylon Government Gazette*.

3. Meteorologically the year was quietly interesting. For the year the air pressure was above normal, being especially high in March and August, and high in the remaining months, except November and December, when it was about normal.

During January and February the mean shade temperature was decidedly higher than usual, and, being immediately followed by months in which the temperature is normally high, had the effect of prolonging the hot season and thereby making it more trying.

The greater heat of the early months manifested itself in more numerous thunderstorms, in which, however, the consequent precipitation was, on the whole, less than is usually experienced. The temperature for the remainder of the year was about normal, and resulted in the mean for the year, being, on the whole, but slightly above the average.

Heavy rains were experienced in the hills towards the end of July, and again in September. As a result, flooding occurred in the adjoining low-country, with its usual attendant damage to property and dislocation of traffic. The flood warning system, as originally instituted, has not progressed of late years owing to the reduced working staff of the Observatory, and remains, as at its inception, in a practically experimental and undeveloped state. A more extensively organized and more effective service could, perhaps, be undertaken with much advantage in conjunction with the development of the water power resources of the Colony.

4. *Abnormal Phenomena.*—An electrical phenomenon, probably "globular ball lightning," occurred in Colombo on the night of January 22. The explosion—single, sharp, and without the reverberations usual in a thunderclap—occurred over a building in course of construction at the Training College, Cinnamon Gardens, Colombo. In its effects it was startling, but the ensuing damage inconsequential, merely damage to scaffolding, slight damage in various places to concrete floors of the verandahs of adjoining buildings, several disrupted holes in the earth at the base of the building under construction, and damage to the electrical installation of the College by blown fuses and lights.

Throughout the intermediate period, previous to the advent of the south-west monsoon, thunderstorms were much in evidence. Viewed from Colombo the distant lightning on many nights was almost continuous and most spectacular. The cause of this greater than ordinary electrical display may possibly be due to the high temperatures experienced throughout the early months, January to May.

In the first week of June, with the monsoon well over Ceylon and rapidly advancing north, cyclonic conditions prevailed, producing most unsettled and stormy weather all over Ceylon and adjacent areas. The continuous and heavy clouding experienced had the effect of depressing the day temperatures to a phenomenal degree. At Trincomalee the mean shade temperature was in defect 6.9° F. and 7.6° F. on the 2nd and 3rd, respectively, and at many stations, on both of these days, it was in defect over five degrees. For the insular and tropical climate of Ceylon differences from normal of this amount are most exceptional.

A succession of depressions, forming mainly to the east of the Island and dispersing to the north, from the end of October to the end of the year, resulted in much-prolonged and unsettled weather.

The cyclone of December 28–31, travelling across the Island on December 30, was the cause of heavy precipitation and extensive flooding to the north of the Island. This storm resulted in many washaways, with much disorganization of railway and other traffic both to the north of Ceylon and South India.

In the Ratnapura District a local windstorm at noon on November 9, lasting for about 10 minutes, caused damage by the uprooting of trees and to light roofing of buildings.

Reports of three hailstorms only were noted, all of which were stated to have occurred in the afternoon and in the Province of Uva : Demodara, July 14 ; Passara, October 2 ; Udagama, October 3.

5. The Milne type seismograph (set N-S) has been in good working order throughout the year. It was overhauled and cleaned on July 4. As in former years, the diurnal oscillation of the levels of the instrument have been very regular. During the year fifty-five shocks were recorded, besides a number of slight thickenings of the trace, which, without further evidence, might possibly, but cannot definitely, be set down as due to earthquakes. As in last year's report, the detailed list of shocks is withheld, but will be issued separately to those interested. The larger shocks have, as usual, been reported to the local press.

6. There has been great difficulty from the commencement of the war in procuring the requisite meteorological instrumental equipment. Only such instruments as thermometers, anemometers, and rain gauges which were urgently required for immediate issue to the various meteorological sheds and rainfall reporting stations were obtained. As conditions approach more closely to normal, it is hoped to secure better autographic self-registering instruments to enable the Observatory to make the advance in meteorology that was foreshadowed by the Surveyor-General in his introductory report last year.

#### Rainfall of Five Inches and over in the Twenty-four Hours during 1919.

## LAND SETTLEMENT.

### REPORT OF THE SETTLEMENT OFFICER FOR 1919.

*General.*—On return from leave on January 4 I resumed duties as Settlement Officer, relieving the Chief Assistant Settlement Officer, Mr. J. M. Davies, who had been acting for me. The Department was strengthened on August 6 by the re-appointment of Mr. M. T. Archibald as Assistant Settlement Officer on his return from Military Service. But as a result of the war the superior staff of the Department is still much below the sanctioned strength, viz., eight Civil Servants and four Additional Assistant Settlement Officers. Under the circumstances, the amount of work done was satisfactory. The chief event of the year was the amicable settlement of the claim of the Ruhunu Maha Kataragam Dewale to a very large area in Southern Uva. This claim had been investigated by Government on several occasions during the last fifty-eight years. The settlement was in large measure due to the advice given to the claimants by Advocates R. L. Pereira and C. Batuwantudawa and Proctor W. Sathasivam of the Colombo Bar. During the year several other large claims in Uva and in the Ratnapura District, as well as one at Welipita in the Matale District, were settled without recourse to litigation. Some of these claims were based on sappases. The disposal of most of them had been delayed owing to the depletion of my staff during the war. As the new offices of the Department in the Cinnamon Gardens are not large enough to admit of an increase in the number of Assistant Settlement Officers, the necessity for providing additional accommodation is under the consideration of Government.

2. *Districts under Settlement.*—The Department is working in the Galle, Matara, and Hambantota Districts of the Southern Province; the Province of Uva; the Kurunegala and Puttalam-Chilaw Districts of the North-Western Province; the North-Central Province; the Ratnapura and Kegala Districts of the Province of Sabaragamuwa; the Colombo and Kalutara Districts of the Western Province; the Jaffna, Mannar, and Mullaitivu Districts of the Northern Province; and the Kandy and Matale Districts of the Central Province.

3. *Topographical Plans under Settlement.*—The area of these plans under settlement at the beginning of the year was 159,643 acres 3 roods and 20 perches, of which 152,513 acres 2 roods and 7 perches comprised the claim of the Ruhunu Maha Kataragam Dewale in Southern Uva, the rest being the above-mentioned Welipita claim in the Matale District. Though these claims were settled during the year, the settlements have to be demarcated by the Survey Department before they can be brought to account as settled in my departmental returns. In one village of the former claim, however, no such demarcation was necessary. The area settled during the year was 6,847 acres 1 rood and 39 perches. No fresh topographical plans were received from the Surveyor-General. Therefore, the area awaiting settlement was 152,996 acres 1 rood and 21 perches at the end of the year.

4. *Forest Plans under Settlement.*—These plans cover proposed forest reserves in the Northern Province. At the beginning of the year 28,256 acres 2 roods and 19 perches were in hand. During the year the plans of 126,485 acres 2 roods and 39 perches were received from the Surveyor-General. The area settled during the period under review was 98,598 acres 2 roods and 22 perches, leaving 56,143 acres 2 roods and 36 perches unsettled at the end of the year. This area has been inspected.

5. *Settlement on Block Survey Preliminary Plans, &c.*—The settlement on these plans forms the greater part of the work of the Department. At the beginning of the year 154,597 acres 1 rood and 4.97 perches were outstanding, and plans covering 55,978 acres 2 roods and 30 perches were received from the Surveyor-General during the year. The area inspected during the year was 43,817 acres 1 rood and 25 perches, and the area settled was 47,936 acres and 26.64 perches. At the end of the year 162,639 acres 3 roods and 7.33 perches remained outstanding, of which 20,924 acres 3 roods and 18.32 perches awaited inspection.

6. The total area settled during the year was, therefore, 153,382 acres 1 rood and 7.64 perches.

7. *Clerical Service.*—On March 29 Mr. J. J. de Mel, Interpreter Muhandiram, was transferred to the Kalutara Kachcheri, after several years of useful service as Interpreter in this Department. On May 27 the services of Mr. W. A. Bennett were lent to the Controller of Estate Supplies. This officer remained with him during the rest of the year. On March 30 Mudaliyar D. A. Emilian resumed duties as Interpreter Mudaliyar after nearly four years' service under the Riots Special Commissioner of the Western Province. Mr. J. D. Phillips, Head Clerk of the Department, continued to act as Extra Office Assistant, Colombo Kachcheri, till the end of the year, when his connection with this Department terminated. Mr. K. D. Perera, Second Clerk and Acting Head Clerk, retired on pension on June 6, and was temporarily succeeded as Acting Head Clerk by Mr. J. A. Dharmakirti of the Audit Office. On August 1 Mr. H. W. Abeyawardena became Acting Head Clerk. Of the three clerks who had been working in the Censor's Office, two resumed duties on July 24, and the other on September 8. One clerk continued to work under the Private Secretary to His Excellency the Governor. At the end of the year there was one vacancy in the Clerical Staff.

8. *Leave of Absence.*—Mr. H. O. Fox, Settlement Officer, was on leave from January 1 to 3, and Mr. J. M. Davies, Chief Assistant Settlement Officer, and Mr. A. L. Crossman, Assistant Settlement Officer, from December 24 and December 12, respectively, until the end of the year. Mr. M. T. Archibald resumed duties on August 6 on return from leave after demobilization from the Army. Mr. H. C. Toller remained absent from the Island throughout the year, having obtained leave after his demobilization from the Army in May.

9. *Notices.*—The number of notices under the Waste Lands Ordinances prepared by the Department was 225. The number brought forward from 1918 was 22. During the year 238 notices were published in the *Government Gazette*. At the end of the year the number of notices in the hands of the Government Printer for publication was 9.

10. *Final Reports.*—The number of villages and forest and topographical areas, for which reports on completion of settlement work were forwarded during the year, was 182. These villages, &c., are situated in the Western, Southern, North-Western, North-Central, and Northern Provinces, and in the Provinces of Uva and Sabaragamuwa.

11. *Working of the Waste Lands Ordinance.*—The total area brought under the operation of the Waste Lands Ordinance since it was enacted in 1897 is over 3,058,000 acres, of which over 256,000 acres, covered by 422 notices, were awaiting settlement at the end of the year.

12. *Sketches.*—2,343 sketches for Waste Lands Ordinance notices and final orders and 232 rough sketches were prepared by the draughtsmen of the Department.

13. *Expenditure.*—The expenditure out of the departmental votes was Rs. 96,916·43 on Personal Emoluments and Rs. 27,934·79 on Other Charges, total Rs. 124,851·22. To this total must be added the salaries, station allowances, and temporary increases of salary paid by the Treasurer to officers of this Department, and from it must be deducted the salaries and station allowances of those officers of the Department who were temporarily employed in other Departments for the periods of such employment. It will then be found that the real expenditure on land settlement during the year amounted to Rs. 186,641·75.

14. *Sales under the Waste Lands Ordinances.*—The area for which purchase final orders under the Waste Lands Ordinances were published during the year was 1,382 acres 1 rood and 9·57 perches, the purchase amount being Rs. 44,478·39. Nearly two-thirds of this area and over three-fourths of this money relate to lands situated in the Kurunegala District.

15. *Sales otherwise than under the Waste Lands Ordinances.*—2,020 lots, covering an area of 5,384 acres 2 roods and 26·21 perches, were sold or settled for Rs. 131,593·24. Over half of this area and over five-ninths of this money relate to lands in the Kurunegala District.

16. *Perpetual Leases.*—Leases of 22 lots, covering 292 acres 1 rood and 11 perches, situated in the Kurunegala, Matale, and Ratnapura Districts, and in the Province of Uva, were sold during the year, the premia amounting to Rs. 10,609·96, of which over Rs. 10,000 relate to lands in the Kurunegala District.

17. *Applications to Buy or Lease Crown Land.*—These applications numbered 440, and covered 2,792 acres 2 roods and 30 perches, on account of which Rs. 8,587 were recovered. Nearly three-fourths of these applications relate to lands in the North-Central Province, where there is a great demand by villagers for small blocks of land.

18. *Waste Lands Ordinance Results.*—The area brought under the operation of the Waste Lands Ordinances by the Department during the year was over 145,000 acres. The area settled under these Ordinances during the same period was over 137,000 acres, and was covered by 580 final orders.

19. *Pending Notices.*—At the end of the year 249 Waste Lands Ordinance notices, covering an area of over 246,000 acres, were pending, of which 117, covering over 59,000 acres, awaited expiry or inquiry, and 10, covering over 17,000 acres, awaited reference to, or adjudication by, District Courts. The remainder awaited sanction of settlements, demarcation of settlements, or preparation or publication of final orders.

20. *Details of Work.*—Further details regarding the settlement operations of the Department in each of the districts mentioned in paragraph 2 of this report are given below.

#### SOUTHERN PROVINCE.

##### (A) Galle District.

21. *Operations of the Year.*—The final reports on the settlement of Neluwa village of Hinidum pattu and of Magedara and Wellandawa villages of Talpe pattu were forwarded. The area settled in this district during the year was 538 acres 2 roods and 19 perches. At the end of the year the area awaiting settlement was 349 acres 3 roods and 22 perches. Three Waste Lands Ordinance notices, covering 329 acres 2 roods and 24 perches, were carried forward to 1920. There was no litigation.

##### (B) Matara District.

22. *Operations of the Year.*—No village in this district is under settlement by the Department. The Assistant Government Agent having completed the settlement of Ginneliya village of Morawak korale, the final report on it was prepared in my office and was forwarded during the year. Five villages of the same korale await similar completion of settlement work. The Department having in 1918 assisted a purchaser from the Crown in his action against a counter-claimant, the case was decided in appeal during the year under review in favour of the former.

##### (C) Hambantota District.

23. *Operations of the Year.*—The work in this district was done by Mr. A. L. Crossman and Mr. F. Lewis, with some assistance from myself. The settlement of eleven villages was completed and final reports were forwarded. The area settled during the year was 4,387 acres 2 roods and 4 perches.

The area awaiting settlement at the end of the year was 9,100 acres 3 roods and 23·3 perches. Twenty-seven notices under the Waste Lands Ordinances, covering 3,247 acres 2 roods and 1·245 perches, were carried forward to 1920. The Assistant Government Agent having completed the settlement of Medagama village of Magam pattu, the final report on it was prepared in my office and was forwarded during the year. He has still to complete the settlement of Warapitiya village of Giruwa pattu west.

24. *Litigation.*—Tangalla Court of Requests case 9,141 was instituted by the Crown to obtain declaration of title to an allotment of land, 3 roods and 16 perches in extent, situated in Kadurupokuna village of Giruwa pattu west. The case was amicably settled by the sale of the land to the defendant.

#### PROVINCE OF UVA.

25. *Operations of the Year.*—The settlement of five villages was completed and final reports were forwarded. Of these, four are situated in Udukinda division and one in Yatikinda division. In August Mr. Davies inspected Gawarawela village of Kumbalwela korale of Yatikinda division on a new block survey plan. The area settled during the year was 7,724 acres and 37·08 perches on block survey plans, and 6,847 acres 1 rood and 39 perches on a topographical plan, total 14,571 acres 2 roods and 36·08 perches. The area awaiting settlement at the end of the year was 157,973 acres 1 rood and 26·1 perches, and consisted of 12,307 acres 1 rood and 18·1 perches of block-surveyed villages and 145,666 acres and 8 perches of topographically-surveyed land. The latter requires demarcation of 6,500 acres for settlement on the Ruhunu Maha Kataragam Dewale under the Waste Lands Ordinances. Thirty-seven notices under the Waste Lands Ordinances, covering 156,209 acres 1 rood and 26·25 perches, were carried forward to 1920. The Government Agent has still to complete the settlement of Pattiya Gedara and Karagastenna villages of Udukinda division.

26. *Litigation.*—The Bodagama and Sittarama reference cases, referred to in the report for 1918, were amicably settled in court in connection with the settlement of the claim of the Ruhunu Maha Kataragam Dewale to these and several other villages. During the year a reference case was instituted in the District Court concerning a large area situated in Kirawanagoda village of Kandukara korale of Buttala division, and was amicably settled in court.

#### NORTH-WESTERN PROVINCE.

##### (A) Kurunegala District.

27. *Operations of the Year.*—The work in this district was done chiefly by Mr. J. M. Davies and Mr. N. A. Hampton. The settlement of 96 villages was finished and final reports were forwarded. Of these, 39 are situated in Dewamedhi hatpattu (36 in Baladora korale and 3 in Giratalane korale), 31 in Dambadeni hatpattu (15 in Udukaha korale south, 8 in Udukaha korale east, 5 in Udukaha korale west, and 3 in Rekko pattu korale), 14 in Katugampola hatpattu (8 in Kiniyama korale, 4 in Yatikaha korale south, 1 in Meda pattu korale east, and 1 in Katugampola korale), and 12 in Hiriya hatpattu (8 in Mahagalboda Egoda korale, 2 in Ihalawisideke korale, and 2 in Diwigandaha korale). In addition, the settlement of 22 scattered claims, each covering part of one or more villages, was completed, and final statements of settlement were forwarded for incorporation hereafter in final reports on these villages, when the rest of the area in them has been surveyed and settled. Of the areas concerned, 7 are situated in Katugampola hatpattu, 6 in Weudawili hatpattu, 5 in Dewamedhi hatpattu, 3 in Hiriya hatpattu, and 1 in Wannu hatpattu. In April Mr. Davies inspected Gurussa village of Ihala Otota korale of the Hiriya hatpattu on a new block survey plan. Further progress was made with the settlement of the claims, scattered throughout the district and covered by preliminary plan surveys, which this Department took over from the Government Agent in 1918. During the year the Department settled in this district 11,907 acres and 8·25 perches. The area awaiting settlement at the end of the year was 28,841 acres and 33·62 perches, of which 2,306 acres 2 roods and 30 perches await inspection. Eighty-one notices under the Waste Lands Ordinances, covering 10,196 acres 2 roods and 36 perches, were carried forward to 1920.

28. *Litigation.*—In the connected Timbiripokuna and Danwila reference cases, brought forward from 1918, the District Judge gave judgment in favour of the Crown. The claimants appealed, and the appeals were pending at the end of the year. Two reference cases were instituted in the District Court during the year concerning areas in Magurudeniya and Kurikkulam villages, respectively. The former was decided in favour of the Crown, and the latter (D.C. 7,512) was pending at the end of the year. In connection with the work of the Department, one Police Court case and two Court of Requests cases were brought forward from 1918. During the year ten District Court cases and ten Court of Requests cases were instituted. In the Police Court case, which related to the clearing of Crown land, the accused were convicted. Of the District Court cases, 5 were amicably settled, 2 resulted in judgment for the Crown, 1 in judgment in favour of the party supported by the Crown, and the other 2 were pending at the end of the year. Of the Court of Requests cases, 4 were amicably settled, 4 resulted in judgment for the Crown, 1 in judgment in favour of the party supported by the Crown, and the other 3 were pending at the end of the year.

##### (B) Puttalam-Chilaw.

29. *Operations of the Year.*—The settlement of Potukulama, Ihala Tammana, Pahala Tammana, and Koralewila villages of the Kumara Pallam pattu of the Demala hatpattu was completed and final reports were forwarded. In September and October considerable progress was made by Mr. Davies, Mr. Hampton, and myself in the settlement of most of the remaining villages of the pattu. As regards Podidelpota village of the same pattu, which is under settlement by the Assistant Government Agent, he has instituted a reference case against the claimant, which was awaiting trial at the end of the year. The area settled during the year was 2,732 acres 1 rood and 9·5 perches, and that awaiting settlement at the end of the year was 5,174 acres and 33 perches. Sixteen Waste Lands Ordinance notices, covering 5,131 acres 1 rood and 9 perches, were carried forward to 1920. No litigation was initiated by this Department during the year.

## NORTH-CENTRAL PROVINCE.

30. *Operations of the Year.*—Final reports on the settlement of thirty-six villages, one topographically-surveyed area and one area covered by a Waste Lands Ordinance survey, were forwarded. During the year Mr. Davies and Mr. Hampton inspected 39,672 acres and 5 perches on new block surveys of villages situated in the Kanadara korale. The total area settled during the year was 13,135 acres 3 roods and 23 perches, situated within block-surveyed villages. The area awaiting settlement at the end of the year was 33,071 acres 2 roods and 15 perches of block-surveyed villages. It has all been inspected. Twenty-eight notices under the Waste Lands Ordinances, covering 24,824 acres 2 roods and 4·5 perches, were carried forward to 1920. In March, July, and December Mr. Davies made preliminary inspections of villages in Kelegam korale to determine the nature of the survey to be made for settlement purposes. There was no litigation during the year.

## PROVINCE OF SABARAGAMUWA.

## (A) Ratnapura District.

31. *Operations of the Year.*—My return from leave at the beginning of the year and that of Mr. Archibald in August enabled work in this district to be resumed on a larger scale than was possible in 1918. The settlement of Delgoda village of Kukul korale, Handurukanda, Maraliya, and Millawitiya villages of Nawadun korale, Godakumbura, Henegama, Pubbarapota, and Panane villages of Meda korale, and Helwala village of Kolonna korale was completed, but the settlements under the Waste Lands Ordinances in these villages have to be demarcated by the Survey Department before final orders can be published and final reports on the villages can be prepared. Some progress was made in the settlement of other villages. Block survey plans, covering an area of 18,144 acres 2 roods and 16 perches, were received from the Surveyor-General, but had not been inspected by the end of the year. The final report on Gangulwitiya village of Nawadun korale was forwarded. The area settled in this district during the period under review was 1,721 acres 3 roods and 37 perches, and that awaiting settlement at the end of the year was 62,079 acres and 32·25 perches, inclusive of nearly 23,000 acres in the above-mentioned villages, which cannot yet be brought to account as settled for the reason stated above. Twenty-one notices under the Waste Lands Ordinances, covering 35,001 acres and 12 perches, were carried forward to 1920.

32. *Litigation.*—Though no litigation was initiated by this Department during the year, it assisted the Government Agent in his Waste Lands Ordinance reference case, D.C. 3,154, Ratnapura, in which judgment was entered in accordance with the settlement that had been offered by him and had been refused by the claimant. The latter appealed against the judgment, and the appeal was pending at the end of the year.

## (B) Kegalla District.

33. *Operations of the Year.*—Mr. Lewis was in charge of the work in this district. The settlement of Godagampola, Kadawattiya, Medagaladeniya, and Siyambalangomuwa villages of Walgam pattu of Kinigoda korale was finished and final reports were forwarded. The area settled during the period under review was 749 acres 3 roods and 6 perches. The area awaiting settlement at the end of the year was 2,256 acres 3 roods and 12 perches. Eighteen notices under the Waste Lands Ordinances, covering 1,065 acres 2 roods and 20 perches, were carried forward to 1920. There was no litigation.

## WESTERN PROVINCE.

## (A) Colombo District.

34. *Operations of the Year.*—The only areas under settlement by this Department are railway reservations along the Colombo-Kandy line, which are situated in sixty-three villages, and cover 758 acres 3 roods and 35·22 perches. Owing to the shortage of Assistant Settlement Officers no work in this district was done during the year.

## (B) Kalutara District.

35. *Operations of the Year.*—The settlement of sixteen villages in the Wallallawiti pattu of Pasdun korale west was completed and final reports were forwarded. During the year 3,867 acres and 15 perches were settled by Mr. Hampton, who had charge of the work in this district. The unsettled area at the end of the period under review was 1,013 acres and 32 perches, situated in the villages of Ittapana, Katadora, Madawita, Wallallawita, and Welipenna of the same pattu. Four notices under the Waste Lands Ordinances, covering 1,002 acres 2 roods and 11 perches, were carried forward to 1920. There was no litigation.

## NORTHERN PROVINCE.

## (A) Jaffna District.

36. *Operations of the Year.*—Pallai proposed forest reserve, the forest survey of which had been received from the Surveyor-General in 1918, was inspected by Mr. Davies in September, and was settled before the end of the year. During the period under review similar plans of Akkiriyankilinochchi, Chunnivil, Mandakaluru, and Nakapaduvan proposed forest reserves were received. The areas covered by them were inspected by Mr. Davies in May and September, and were settled before the end of the year. As regards Nakapaduvan, it was surveyed together with the adjacent area of the same proposed reserve in the Mannar District. The area settled during the year was 69,279 acres 3 roods and 6 perches. There was no area awaiting settlement at the end of the year. There was no litigation.

## (B) Mannar District.

37. *Operations of the Year.*—A final report on the forest area covered by topographical preliminary plan 9 of the Northern Province and now situated in Musali South of the Musali division was forwarded. This area was transferred from the North-Central Province, in which it had been surveyed and shown on topographical preliminary plan 2 of that Province, to the Northern Province by a Proclamation dated May 27, 1914, and published in the *Government Gazette* of May 29, 1914. The settlement

of that part of Toddakkadu, which is covered by preliminary plans 3,667, 3,684, and 3,710, was completed and a final statement of settlement was forwarded. Vannivilankulam proposed forest reserve, the forest survey of which had been received in 1918, was inspected by Mr. Davies in April, and was settled during the year. This area was surveyed with the adjacent area of the same proposed reserve in the Mullaitivu District. During the year similar plans of Nintavil and Mavillu proposed forest reserves and of that part of Nakapaduvan proposed forest reserve, which is situated in this district, were received. The areas covered by them were inspected by Mr. Davies in May, and the Nakapaduvan area was settled before the end of the year. The area settled on forest surveys during the year was 4,168 acres 3 roods and 22 perches. The area awaiting settlement on these surveys at the end of the year was 56,143 acres 2 roods and 36 perches, situated in Mavillu and Nintavil proposed forest reserves. The area settled during the year in Mannar town and in Toddakkadu was 328 acres 2 roods and 17·19 perches, and that awaiting settlement at the end of the year was 37 acres 2 roods and 18·6 perches, situated in Mannar town. Three notices under the Waste Lands Ordinances, covering 36 acres 3 roods and 39·29 perches, were carried forward to 1920. There was no litigation.

(C) *Mullaitivu District.*

38. *Operations of the Year.*—The final report on Puvarasankulam proposed forest reserve was forwarded. That part of the Vannivilankulam proposed forest reserve, which is situated in this district, was inspected in April by Mr. Davies, and was settled before the end of the year. No area awaited settlement at the end of the period under review. There was no litigation.

CENTRAL PROVINCE.

(A) *Kandy District.*

39. *Operations of the Year.*—Only two villages are under settlement. They are Balana and Amunupura, both of Kandupalata korale of the Yatinuwara Division, and are situated on the Kaduganawa incline. The area settled during the year was 9 acres 1 rood and 12 perches, and that awaiting settlement at the end of the year was 140 acres 1 rood and 20 perches. One notice under the Waste Lands Ordinances, covering 123 acres 1 rood and 9 perches, was carried forward to 1920. There was no litigation.

(B) *Matale District.*

40. *Operations of the Year.*—Preliminary plan 6,989, which covers 94 acres of Rattota, Bodikotuwa, Dikkumbura, and Mausagolla villages, was received from the Surveyor-General, and the area covered by it was inspected by Mr. Lewis in November. The area settled during the year was 833 acres 2 roods and 38·62 perches on block survey and other preliminary plans. In March Mr. Davies settled a large claim on a topographical survey at Weliwita in Matale East Division. At the end of the year this settlement was under demarcation by the Survey Department. The area awaiting settlement at the end of the year was 14,868 acres 3 roods and 5·24 perches, of which 7,330 acres 1 rood and 13 perches are covered by a topographical plan, and the remainder by block survey and other preliminary plans. Ten notices under the Waste Lands Ordinances, covering 9,094 acres 1 rood and 15·8 perches, were carried forward to 1920. There was no litigation.

February 27, 1920.

H. O. FOX,  
Settlement Officer.

## REPORT.

## PREFACE.

THE Vital Statistics of the Island are treated in this report under five heads as follows:—Population, Marriages, Births, Deaths, and Causes of Death. The two most outstanding features this year are (a) the exceptionally high mortality, in fact the highest recorded; and (b) almost the lowest birth-rate since 1897. The marriage-rate, too, is unusually poor, being the lowest but one on record. The salient facts under the several heads are:—

**Population.**—The estimated population of the Island on December 31, 1919, was 4,757,596, showing an increase of 71,213 over the previous year. The reason for this increase is not, however, to be sought in an excess of registered births over deaths, the balance this year being heavier on the side of mortality, but in the excess of arrivals over departures of Indian coolies.

**Marriages.**—18,869 marriages were registered during the year, of which 14,422 were among the general community and 4,447 among the Kandyan. A distinct drop is noticeable in the number of marriages this year, the rate (8·6) being, as I have said, the second lowest yet returned, only higher than the rate (8·2) for 1885. Divorces among the general community decreed by the District Courts throughout the Island numbered 79, while the Kandyan divorces granted by Provincial Registrars and Assistant Provincial Registrars totalled 549. The number of marriages among the Muhammadans, a community indifferent to registration, was 813; but of divorces among them, which are allowed by their Levvais or priests, no statistics are available.

**Births.**—161,403 births were registered in the Island, equal to a rate of 34·2 per 1,000 persons living, as against 39·2 in the previous year and 38·0 the average for the ten years 1909 to 1918. With the exception of 1907 and 1912, the rates for which were 33·6 and 33·3 respectively, the year under review shows the lowest proportion since 1897, when the improved scheme of registration under Ordinance No. 1 of 1895 was introduced. Of the various districts, Ratnapura shows the highest birth-rate (49·5), and Puttalam the lowest (24·3). The proportion of male to female births was 104 to 100, much the same as in England for the past ten years.

**Deaths.**—The deaths of 168,323 persons were registered in 1919, of whom 84,144 were males and 84,179 females. This total is the highest hitherto recorded, and corresponds to a rate of 35·6 per 1,000 of the estimated population, or 3·7 higher than that for 1918 and 6·1 per 1,000 higher than the average in the ten years 1909–1918. The chief cause of this high mortality has been the influenza, principally in the Districts of Kurunegala and Anuradhapura, where the rates are 75·4 and 72·9, respectively. The healthiest district this year is Kegalla, with a death-rate of 25·9.

To infant mortality also there has fallen an undue share this year. Of the total deaths registered, 35,941 (21 per cent.) were of children under one year of age, corresponding to a rate of 223 per 1,000 births. This is considerably higher than the previous year's rate (188) and the average (193) for the decade 1909–1918.

**Causes of Death.**—As has already been observed, the influenza levied the heaviest toll in the Island, no fewer than 22,814 deaths being attributed to this cause; while pneumonia, its next neighbour, claimed 10,752 lives. Deaths from other causes were: 22,878 from pyrexia (fever), 3,875 from dysentery, 3,519 from phthisis, 15,402 from diarrhoea, 2,608 from ancylostomiasis, and 3,664 from diseases of the puerperal state. Cholera, which broke out in Hambantota about July, accounted for 419 deaths, while the plague killed 79. 243 deaths were due to suicide, 229 to homicide, and 39 to judicial hanging. Deaths attributed to accidents of all sorts totalled 2,026.

## POPULATION.

**Estimated Population.**—The estimated population of the Island, exclusive of the military and the shipping, on December 31, 1919, was 4,757,596. This is an increase of 71,213 persons, due entirely to the excess of arrivals over departures of Indian coolies and not to any excess of births over deaths, for there have been 6,920 more deaths than births this year. The population is estimated on the natural increase method, i.e., by adding to the last Census population the subsequent increase as ascertained by the balance between registered births and deaths and between the arrivals and departures of Indian labour. The estimate of the population of the principal towns is based on the intercensal increase. Table I. in the Appendix gives the population of the Island at the middle of each year since 1867.

2. **Indian Coolies.**—The arrivals of Indian coolies during the year were 112,401 and the departures 34,268, as against an average of 91,351 and 59,963 respectively for the ten years 1909–1918. Compared with this average the arrivals during the year have risen by 23 per cent., while the departures have fallen by 43 per cent. The months of April, May, and June saw 48 per cent. of the arrivals and 37 per cent. of the departures during the year. This year's excess of arrivals is the largest since 1906. It is more than four times the average (17,600) for the two previous years, and more than twice the average (37,023) in the ten years 1909–1918.

3. **Constitution of the Population.**—The various races, their number at the end of the year, and the proportion of each to 1,000 of the total population were as follows:—

| Race.                  |               | Number.   | Proportion per 1,000 of the<br>Total Population. |
|------------------------|---------------|-----------|--|
| Sinhalese              | { Low-country | 1,890,073 | 397·3  |
|                        | { Kandyan     | 1,099,307 | 231·1  |
| Tamils                 | { Indigenous  | 522,932   | 109·9  |
|                        | { Indian      | 901,717   | 189·5  |
| Moors                  | ..            | 276,631   | 58·1   |
| Burghers and Eurasians | ..            | 29,336    | 6·2  |
| Malays                 | ..            | 14,105    | 3·0  |
| Europeans              | ..            | 7,349     | 1·5  |
| Others                 | ..            | 16,146    | 3·4  |

4. **European Population.**—The estimate (7,349) of the number of European residents in the Island does not include the 956 men who left on war service prior to 1918 within the knowledge of the Military authorities. In the absence of any reliable record of arrivals and departures of the Europeans, which since the outbreak of the war have been abnormal, the present estimate can hardly be taken as approximating to the actual number. This must be left to be ascertained at the Census next year.

5. **Increase of Population.**—The population of Ceylon between March 10, 1911 (the date of the last Census), and December 31, 1919, is estimated to have increased by 651,246 persons, or 15·8 per cent. Of this increase, 6·7 per cent. was due to the excess of births over deaths, and 9·1 per cent. to that of immigration over emigration. The increase of population in the decennium 1891–1901 was 18·6 per cent. and in 1901–1911 15·1 per cent. The estimated increase for the period 1911–1921 is in the neighbourhood of 18 per cent.

6. **Estate Population.**—The term “estate” for purposes of this report means any land of ten or more acres under cultivation in a district proclaimed under the Medical Wants Ordinance, No. 9 of 1912. This Ordinance has been brought into operation mainly in districts containing tea, cacao, rubber, and other plantations, viz., those in the Central, Uva, and Sabaragamuwa Provinces, the Colombo and Kalutara Districts of the Western Province, Galle and Matara of the Southern Province, and Kurunegala of the North-Western Province. The Colombo District comprises the estates in the Avissawella division. The estimated estate population on July 1, 1919, was 847,643; of these, 458,674 were males and 388,969 females. The population on the estates in 1919 represents about 18 per cent. of the total population of the Island, while at the Census of 1911 the percentage was 12. The estimated mid-year population of the various races on the estates was as follows:—

|                 |    |        |                 |    |         |
|-----------------|----|--------|-----------------|----|---------|
| Europeans       | .. | 2,327  | Tamils (Indian) | .. | 777,885 |
| Burghers        | .. | 1,597  | Moors           | .. | 5,503   |
| Sinhalese       | .. | 35,693 | Malays          | .. | 1,193   |
| Tamils (Ceylon) | .. | 19,243 | Others          | .. | 4,202   |

7. **Urban Population.**—This includes the population of the 33 principal towns proclaimed under sections 31–36 of the Ordinance No. 1 of 1895. The estimated population of these towns was 649,472, or about one-seventh of the total population of the Island. The population of Colombo (285,795) was more than three-fourths of the population of all the other towns taken together (363,677).

#### MARRIAGES.

8. **Marriages.**—In Ceylon marriages are governed by three separate Ordinances: one for the Kandians, another for the Muhammadans, and the third for the general community. Exclusive of Muhammadan marriages, there were registered 18,869 unions, of which 14,422 were among the general community and 4,447 among the Kandians. The number of persons married, which is the lowest recorded since 1907, corresponds to a rate of 8·6 per 1,000 of the population (exclusive of the Muhammadans). This rate is the second lowest on record, the minimum being 8·2 in 1885. Compared with the rate of the previous year and with the average for the past ten years, 1919 shows a decrease of 1·6 and 3·1 respectively per 1,000 of the population. The considerable falling off in the number of marriages during the year is again attributable to the epidemic of influenza coupled with the distress among the bulk of the population consequent on the shortage of food supplies in the Island and the enhanced cost of living. Fuller details will be found in Tables I.–VIII. of the Appendix.

9. **Racial Marriages and their Rates.**—Table II. in the Appendix shows the marriages registered among the various races (exclusive of Moors and Malays) and their rates. Compared with the number of marriages in 1918, there is a decrease this year of 3,317, which is due to the decline of the marriages among the Sinhalese and the Burghers. The drop in Sinhalese marriages is 18 per cent., and among the Burghers 28 per cent. The marriages among the Europeans, Tamils, and “Others” number more than in the previous year. The marriage-rate for the Europeans was 16·3, for the Burghers 12·0, the Sinhalese 10·5, the Tamils 4·1, and “Others” 5·3. The very low marriage-rate among the Tamils, who are mostly Hindus, is probably due to the fact that an appreciable number of their marriages, which are solemnized according to custom or religion, escape registration. No account is here taken of such unions, which, however, are legally valid. The European marriage-rate, which declined materially during the later years of the war, shows a distinct improvement this year, though still far less than the average rate (25·0) for the preceding ten years. Among the several communities in the Island the Europeans show the highest marriage-rate, which is, perhaps, accounted for by the fact that in that community is found the largest proportion of persons of marriageable age. It has also to be borne in mind that a fairly good number of marriages takes place in Ceylon of non-resident Europeans passing through the Island. The proportion of marriageable persons not being the same for the various races, a more accurate method for comparative purposes would be to compute the marriage-rate in terms of the marriageable section of the population only. Thus calculated the marriage-rates are 26·2 for the Europeans, 35·1 for the Burghers, 38·4 for the Sinhalese, and 18·0 for the Tamils. For all the races in Ceylon, exclusive of the Muhammadans, the rate was 32·4.

10. **Seasonal Distribution of Marriages.**—The number of marriages registered in each of the four quarters of the year as compared with the figures for the corresponding quarters of the previous year and with the average number of marriages in each quarter of the past decade are given below:—

|                | 1919. | 1918. | Average, 1909–1918. |
|----------------|-------|-------|---------------------|
| First Quarter  | 4,549 | 5,988 | 5,570               |
| Second Quarter | 3,987 | 5,321 | 5,018               |
| Third Quarter  | 5,401 | 6,152 | 6,660               |
| Fourth Quarter | 4,932 | 4,724 | 6,133               |

It will be seen that the number of marriages in each quarter of 1919 shows a marked decrease on the average for the corresponding quarters of the decade 1909–1918. Compared with 1918, too, the figures show a decline, except in the last quarter. The favourite quarter for marriages appears to be the third, the largest number being usually registered in that period. As is almost always the case, the marriages in the second quarter are the fewest.

Of the 14,422 marriages under the General Marriage Ordinance, the largest number (1,505) was registered in November, the month of February coming a very close second with 1,502. April, as usual, contributed the fewest (581), a little over one-half of the next lowest number (1,006), which was in January.

11. **Mixed Marriages.**—The number of mixed marriages registered was 163, as against 182 in 1918. Subjoined is a statement showing the mixed marriages registered during the last two years and the average for the ten years 1909–1918 :—

|                                    | 1919. | 1918. | Average, 1909–1918. |
|------------------------------------|-------|-------|---------------------|
| Between Europeans and Burghers ..  | 5     | 7     | 8                   |
| Between Europeans and Sinhalese .. | 5     | 4     | 2                   |
| Between Europeans and Tamils ..    | —     | 1     | 1                   |
| Between Burghers and Sinhalese ..  | 44    | 63    | 48                  |
| Between Burghers and Tamils ..     | 15    | 7     | 10                  |
| Between Sinhalese and Tamils ..    | 66    | 76    | 71                  |
| Other mixed marriages ..           | 28    | 24    | 20                  |

12. **General Marriages.**—The marriages registered during the year under the General Marriage Ordinance numbered 14,422, as against 16,628 and 18,865 respectively in the two previous years. The number in 1919 was equivalent to a rate of 8·9 per mille of the population, exclusive of Kandyan and Muhammadans. The number of general marriages, which showed a steady increase till 1916, has declined during the last two years. For detailed statistics of general marriages see Tables VII. and VIII.

13. **Kandyan Marriages.**—4,447 Kandyan marriages were registered during the year, the lowest since 1893. Though the number of marriages registered among the Kandyans, who, as a rule, are indifferent to registration, varies with the amount of pressure applied by Government officials to secure registration, yet the decrease in the number this year cannot be said to be entirely due to any relaxation of such pressure, for, like the other communities, the Kandyans, too, have doubtless been affected as well by the influenza epidemic as by the adverse conditions of life attendant on high prices of food and clothing.

14. **Muhammadian Marriages.**—Registration of Muhammadian marriages is regulated by the Ordinances Nos. 8 of 1886 and 2 of 1888. During the year 813 marriages were registered, being 25 in excess of the previous year, and corresponding to a rate of 5·0 per 1,000 of the Muhammadian population, as against 5·1, the average for the ten years 1909–1918. The number of Muhammadian marriages registered during the last ten years ranged from a minimum of 631 in 1909 to a maximum of 879 in 1917, averaging 771 per annum. This figure, which shows no small increase on the average (548) for 1898–1908, is clear evidence of the growing popularity of registration among the Muhammadans, though it is no measure of the actual number of marriages contracted among them, of which no statistics are available. In the districts the highest rate (25·2, as against 20·3 in 1918 and 24·6 the average for 1909–1918) was recorded in Puttalam. The next highest rate (24·1, same as in the previous year, and as against 28·5 the average) was in Jaffna. Apparently the Muhammadans in these two districts appreciate the advantages of registration more than their co-religionists in other parts of the Island. In the other districts the rate ranged from 11·1 in Hambantota to 0·2 in Kegalla. The Colombo District shows a rate of 10·9; while the Batticaloa District, which contains by far the largest Muhammadian population, records a rate of only 1·3.

15. **First Marriages and Re-marriages.**—Of the 14,422 marriages registered under the General Marriage Ordinance, 11,782 or 82 per cent. were between bachelors and spinsters, 412 or 2·9 per cent. between bachelors and widows, 1,822 or 12·6 per cent. between widowers and spinsters, and 314 or 2·2 per cent. between widowers and widows. Forty marriages were contracted between divorced men and spinsters, 32 between bachelors and divorced women, 2 between divorced men and widows, and 18 between widowers and divorced women. There was one marriage between a divorced man and a divorced woman. Among 1,000 males married in the general community, 848 were bachelors, 149 widowers, and 3 divorced men; and among the females married, 946 were spinsters, 50 widows, and 4 divorced women.

Of the 4,447 Kandyan marriages registered, 3,475 or 78·1 per cent. were between bachelors and spinsters, 115 or 2·6 per cent. between bachelors and widows, 492 or 11·1 per cent. between widowers and spinsters, 118 or 2·7 per cent. between widowers and widows, 114 or 2·6 per cent. between divorced men and spinsters, and 83 or 1·9 per cent. between bachelors and divorced women. There were 26 marriages between widowers and divorced women, 16 between divorced men and divorced women, and 8 between divorced men and widows. Of 1,000 men married, 825 were bachelors, 143 widowers, and 32 divorced men. Of 1,000 females married, 918 were spinsters, 54 widows, and 28 divorced women. While the proportion of marriages of widowers in the general community has been greater than in the Kandyan, that of widows has been less. Marriages of widows are far less common than those of widowers, though in Ceylon there is no strong prejudice against such unions. Tables V. and VII. in the Appendix give detailed statistics.

16. **Age at Marriage.**—Among the general community this year the mean male age at marriage was 27·5 (as against 26·9 in 1918 and 27·0 in 1917) and for females 20·8 (as against 20·5 in 1918 and 20·6 in 1917); among the Kandyans the mean age for males was 26·6 and for females 19·5, as against 26·7 and 19·5 respectively in 1918. The lowest age at marriage (both among the general community and among the Kandyans) was 16 for males and 12 for females. The highest age at marriage for males in the general community was 80 years and for females 65 years, and among Kandyans for males 76 years and for females 67 years. These high ages at marriage may be accounted for by the fact that instances are not rare of parties resorting to registration years after they had begun to live together as husband and wife, having previously contracted marriage according to custom or religion. Though according to the law in Ceylon such marriages are valid without civil registration, the parties not infrequently seek registration in view of the evidentiary advantages it affords.

17. **Divorce.**—Divorces among the general community are granted by the District Courts; among the Kandians by the Provincial Registrars and Assistant Provincial Registrars. The number of divorces granted by the several District Courts of the Island was 79 (as against 53 in 1918 and 63 in 1917), equivalent to a rate of 5 per 1,000 marriages registered in the year. It is interesting to note that of the 79 divorces pronounced among the general community throughout the Island, as many as 40 were in the Jaffna District. In previous years, too, the proportion was nearly as large. This seems strange, indeed, seeing that among Hindus, who form the bulk of the population of the Jaffna District, marriage is deemed a sacrament, and no divorce is permitted. An explanation of this seeming indifference to the sanctity of the marriage tie is, perhaps, to be found in the fact that in the case of a goodly number of marriages in this district, civil registration, which is effected at the instance of the parents (the contracting parties being still minors), only marks the betrothal, while the religious ceremony which seals the union is put off indefinitely. As a result some of these marriages are dissolved before they are consummated.

In the Kandian community marriages are more frequently dissolved owing to the greater facilities which the law affords, divorce being procurable in their case even on such weak and easy grounds as "mutual consent" and "inability to live happily together." There were 549 divorces among Kandians, which were in the proportion of 123 per 1,000 marriages, or 25 times as large as in the general community, and the largest number of Kandian divorces, viz., 139 was in Kegalla. Muhammadan divorces are not subject to official control, and statistics in regard to them are not available.

18. **Literacy.**—Information about the ability of the parties to sign their names in the marriage registers was collected for the first time in 1887 for the general community and in 1888 for the Kandians, and is of interest, as being an indirect means of gauging the progress of elementary education in the Island. During the year 14.9 per cent. of the males and 48.3 per cent. of the females in the general community were unable to sign their names in the register. For the past quinquennium the average was 17.2 for males and 56.3 for females. The highest proportion of illiterates among males was 32.1 in Kurunegala, and among females 83.9 in Hambantota. The lowest was 6.9 in Jaffna for males, and 34.3 in Negombo for females. Among the Kandians, who usually show a higher proportion of illiterates, the percentage for males was 24.1 and for females 85.7. This, however, is an improvement on the quinquennial averages 25.9 and 90.2, respectively. For detailed statistics see Tables V. and VII.

19. **Registered Buildings.**—The number of buildings registered for the solemnization of Christian marriages and still in use at the end of 1919 was 892, as against 885 in the previous year. Details of registered buildings will be found in Table X.

## BIRTHS.

20. **Island Births and Birth-rate.**—The births registered during 1919 numbered 161,403 (82,463 males and 78,940 females), and were 21,981 less than the number registered in the previous year and 1,536 less than the average for the ten years 1909–1918. In proportion per 1,000 of the estimated population the registered births yield a rate of 34.2, as against 39.2 and 40.1, respectively, for the two preceding years, and against 38.0 the average for the decade 1909–1918. With the two exceptions of 1907 and 1912, when the rates were 33.6 and 33.3, respectively, the year under review shows the lowest birth-rate since 1897, when the improved scheme of registration under the Ordinance No. 1 of 1895 came into force.

21. **Racial Birth-rates.**—Statistics of births according to the principal races in the Island will be found in Tables II., XI., and XII. The number of births registered among the several races was less in 1919 than in 1918. The birth-rate per 1,000 of the estimated population of each race was 20.2 for Europeans, 32.1 for Burghers, 37.0 for Sinhalese, 28.2 for Tamils, 33.9 for Moors, 39.1 for Malays, and 34.7 for "Others." These are crude rates, which may, however, be taken as fairly accurate, when the statistics compared are either of the same community for a series of years, or of different communities, the constitution of whose population in respect of age and sex is more or less identical. In communities where there is a disparity in the proportion of women of conceptive age (i.e., roughly between the ages of 15 and 45), the birth-rates per 1,000 such women would be more reliable for purposes of comparison. Calculated on this basis the rates for the years 1919 and 1918 are as follows:—

|           | 1919. | 1918. |           | 1919. | 1918. |
|-----------|-------|-------|-----------|-------|-------|
| Europeans | 83.4  | 98.6  | Moors     | 169.3 | 191.8 |
| Burghers  | 132.5 | 141.4 | Malays    | 193.1 | 242.5 |
| Sinhalese | 179.4 | 201.3 | Others    | 208.9 | 241.9 |
| Tamils    | 115.5 | 140.6 | All Races | 158.4 | 181.8 |

22. **Provincial and District Births.**—In all the provinces and districts the births registered in 1919 showed a decrease when compared with the figures for 1918. But compared with the average for 1909–1918, an increase is noticeable in the Western and the Central Provinces, and in the districts of Colombo, Kalutara, Kandy, Nuwara Eliya, Batticaloa, Ratnapura, and Kegalla. The provincial rates for 1919 and 1918 and the average for the period 1909–1918 are as follows:—

|               | 1919. | 1918. | Average, 1909–1918. |
|---------------|-------|-------|---------------------|
| Northern      | 32.4  | 37.0  | 37.3                |
| North-Central | 32.8  | 49.5  | 40.7                |
| Western       | 33.1  | 33.9  | 34.8                |
| North-Western | 34.6  | 43.4  | 37.9                |
| Southern      | 36.9  | 42.3  | 41.2                |
| Eastern       | 40.0  | 44.2  | 41.7                |
| Central       | 40.2  | 45.9  | 41.0                |
| Uva           | 41.0  | 50.3  | 42.9                |
| Sabaragamuwa  | 44.9  | 50.8  | 41.0                |

It will be seen from the above that the Provinces of Sabaragamuwa and Uva, which were credited with the highest birth-rates in 1918, have maintained their places this year. The North-Central Province, which showed the third highest rate in 1918, has dropped to the last place but one. The lowest rate, which is usually recorded in the Western Province, is found this year in the Northern Province. Among the various districts, Ratnapura leads with a birth-rate of 49·5, and is followed by Kegalla and Matale with rates of 41·9 and 41·1, respectively. Rates above 40 per 1,000 were recorded in three other districts, viz., Badulla, Batticaloa, and Kandy. In the remaining districts they ranged from 39·3 in Nuwara Eliya to 24·3 in Puttalam. Detailed statistics will be found in Tables III., IV., XI.-XV.

23. **Estate Births.**—The total number of births registered on the estates in 1919 was 21,851, or 4,934 less than that in the previous year. They were distributed as follows:—41 Europeans, 55 Burghers, 1,035 Sinhalese, 20,257 Tamils, 235 Moors, 57 Malays, and 171 "Others." The total number corresponds to a rate of 43·0 per 1,000 of the estate population at the last Census. This, however, is much below the estimated population on estates, which was 847,643 at the middle of the year. Calculated on this population the birth-rate is 25·8 per 1,000, as against 33·6 in 1918. In the estate districts the birth-rate was highest in Matara (67·7). Ratnapura was a near second with 67·2, followed by Galle with 62·8. In the remaining districts the rate ranged from 48·7 in Kalutara to 27·2 in Kurunegala. These rates again are calculated on the Census population of 1911. No reliable estimate of the estate population in each district is possible owing to the absence of information as to the arrivals and departures of Indian coolies separately for each estate district.

24. **Urban Births.**—The births registered in the 33 principal towns proclaimed under sections 31-36 of the Ordinance No. 1 of 1895 numbered 16,479, of which 8,455 were males and 8,024 females. The births correspond to a rate of 25·4, as against 27·0 in the previous year. The urban birth-rate in 1919 is the lowest for the last ten years, and, as is usually the case, lower than the Island rate. Kalmunai, as in the previous year, has to its credit the highest birth-rate in the towns, viz., 50·4, Batticaloa and Moratuwa rank next with rates of 44·1 and 36·1, respectively. In the other towns the rate varied between 35·4 in Kegalla and 9·2 in Vavuniya. In the city of Colombo, which registered 5,915 births, or 5 less than in 1918, the rate was 20·7. The birth-rate of the city has declined during the last few years, owing, perhaps, to lack of employment for the lower classes and the increasingly high cost of living, which force the city population into the country. The birth-rate of the towns of Jaffna, Kandy, and Galle was 28·7, 29·6, and 27·3, respectively. Detailed statistics will be found in Table XVIII.

25. **Sex Proportion at Birth.**—Births of males in Ceylon numbered 82,463 and of females 78,940, showing a proportion of 1,045 male births to 1,000 female births, the same as the average for the last five years.

26. **Plural Births.**—There were 702 cases of twins (1,404 children) and 8 triplets (24 children) during the year, as against 1,000 and 14 respectively in 1918. Seeing that the total number of children born has been 161,403 and that the number of mothers works out to 160,685, it would appear that on an average one mother in every 240 gave birth to twins or triplets. The proportion of cases of plural births per 1,000 of the total cases of births was 4·4.

27. **Stillbirths.**—Stillbirths are registered only in the urban area, i.e., the 33 principal towns proclaimed under sections 31-36 of the Ordinance No. 1 of 1895. During the year there were 956 stillbirths (516 males, 439 females, and 1 whose sex was not distinguishable), as against 1,086 in 1918. (*Vide* Table XVIII.)

28. **Birth-rate for each Quarter.**—The birth-rate of the Island for each quarter of the year compared with the corresponding rates for 1918 and the average for the years 1909-1918 is shown below:—

|                      | 1919. | 1918. | Average, 1909-1918. |
|----------------------|-------|-------|---------------------|
| First Quarter .. ..  | 43·7  | 46·1  | 42·3                |
| Second Quarter .. .. | 35·2  | 36·8  | 37·1                |
| Third Quarter .. ..  | 26·2  | 35·5  | 34·3                |
| Fourth Quarter .. .. | 32·4  | 38·1  | 37·9                |

The rate for the third quarter, which is usually the lowest, shows a more marked decline this year than in any of the preceding ten years. This low rate is undoubtedly the aftermath of the influenza epidemic. The highest birth-rate is found in the first quarter as usual.

#### DEATHS.

29. **Island Deaths.**—The deaths of 168,323 persons were registered in the Island during 1919, 84,144 of these being males and 84,179 females. This total, the highest yet returned, exceeds by 18,916 that of the preceding year, which is the second highest on record. The remarkable increase in the number of deaths during these two years is the result of the epidemic of influenza which prevailed in the Island from the latter half of 1918 down to the close of the year under report. The death-rate in 1919 was 35·6 per 1,000 of the estimated population, and is 3·7 per 1,000 higher than the rate in 1918 and 6·1 per 1,000 higher than the average for the ten years 1909-1918. The rate is the highest on record, and is ·5 higher than the second highest rate (35·1) in 1906.

30. **Racial Deaths.**—The number of deaths, the rates in each of the years 1918 and 1919, and the average for 1909-1918 are given for the various races in Table II. of the Appendix. Every race, except the Burghers and the Tamils, presents a higher death-rate than the average for the past decade: the Burgher rate (22·1) is ·1 per 1,000 less than the average, and the Tamil rate (32·5) shows an improvement of 1·1 per 1,000. A comparison of the figures for 1919 with those of last year leads one to infer that these two races, together with the Malays, have improved in health, while the others have deteriorated. The Sinhalese rate (37·0), which has risen by 9·2 per 1,000 over the average and 8·3 over the rate of the previous year, was the chief factor in the enhanced mortality during the year. Excluding the miscellaneous class of "Others," which shows a death-rate of 52·5, the highest rate (40·0) is found among the Malays, followed by the Moors, whose rate (37·4) is 7·5 above the average and 2·5 higher

than in the preceding year. Even the European death-rate (13·6), which is usually the lowest, shows an increase of ·7 on the average, and ·9 on the rate for 1918. These rates are calculated per 1,000 of the total estimated population at all ages, and are fairly trustworthy, when the comparison lies between two or more communities with the same age and sex constitution. Where this is not the case, the better method to adopt is the "standardized rates," which are calculated on the hypothesis that the age and sex constitution of the population of the several races is the same as it was for the total Island population at the Census of 1911. The standardized rates of the principal races in 1919 and 1918 are as follows:—

|           | 1919.   | 1918.   |        | 1919.   | 1918.   |
|-----------|---------|---------|--------|---------|---------|
| Europeans | .. 14·8 | .. 13·7 | Tamils | .. 36·3 | .. 43·0 |
| Burghers  | .. 22·9 | .. 24·9 | Moors  | .. 39·3 | .. 36·6 |
| Sinhalese | .. 36·7 | .. 28·5 | Malays | .. 41·0 | .. 41·2 |

31. **Provincial and District Deaths.**—The number of deaths registered in each of the Provinces of the Island, excepting the Central, the Northern, and the Sabaragamuwa, has been greater this year than in 1918. The largest increase was in the North-Western Province, where the number showed an increase of 13,957 on 1918, being in fact twice as large. The death-rate in the Provinces ranges from 72·9 in the North-Central to 27·8 in the Western. In the North-Western Province the rate was 65·3. These abnormally high death-rates in the North-Central and North-Western Provinces are due to a particularly virulent type of influenza which swept those parts, especially during the first quarter of the year, when a larger number of deaths occurred than during the subsequent three quarters. The following figures show the death-rate per 1,000 in the different Provinces for 1919 and 1918 as compared with the average of 1909–1918:—

|               | 1919.   | 1918.   | Average, 1909–1918. |
|---------------|---------|---------|---------------------|
| Western       | .. 27·8 | .. 25·9 | .. 23·7             |

Among the districts the lowest rate (25·9) was in Kegalla, Colombo, Kalutara, Jaffna, and Galle, closely followed with rates of 28·0, 28·1, 28·1, and 28·6, respectively. The highest rate (75·4) was in the Kurunegala District. There were only two districts, viz., Kegalla and Jaffna, which showed an improvement on the average rate of the past ten years. Detailed statistics will be found in Tables III., IV., and XII.–XV.

32. **Estate Deaths.**—The total number of deaths registered on the estates in 1919 amounted to 24,127 (9 Europeans, 23 Burghers, 933 Sinhalese, 22,735 Tamils, 200 Moors, 35 Malays, and 192 "Others"), and was 6,870 less than in the previous year. The number of deaths corresponds to a standardized rate of 58·5 per 1,000 of the estate population at the Census of 1911. But if the rate were calculated on the estimated mid-year population on the estates, viz., 847,643, it would be 35·0, as against 47·9 in 1918. The rate for the estate districts is calculated on the population at the Census of 1911 for the reason explained in paragraph 23 above. The mortality was highest, as usual, in the estates of Ratnapura, where the crude death-rate was 74·5, as against 77·9 in 1918 and 67·3 the average. The next highest death-rates, viz., 68·9 and 65·2, were returned from the estates of Matara and Kurunegala, respectively. The lowest death-rate, 24·9, was in Kegalla, as against 57·1 in 1918 and 36·8 the average. Detailed statistics will be found in Tables XVI. and XVII. in the Appendix.

33. **Urban Deaths.**—The deaths of 22,844 persons (12,630 males and 10,214 females) were registered in 1919 in the 33 principal towns proclaimed under sections 31–36 of the Ordinance No. 1 of 1895. There were among them 17,709 deaths of residents, equivalent to a standardized rate of 29·8, as against 31·5 in 1918. The urban rate for 1919 is distinctly better than the Island rate (35·6). The highest rate in the towns was in Hambantota, viz., 126·4, as against 42·5 in the previous year. The abnormally high rate in that town is chiefly due to an epidemic of cholera which broke out there in the early part of July and within three months killed 248 persons, or about 66 per cent. of the total deaths registered in the year. The healthiest town this year, as before, was Nuwara Eliya, with the low rate of 12·2. In the city of Colombo 7,826 deaths were registered, of which 6,765 were of residents. The number of deaths corresponded to a standardized rate of 27·5, as against 27·3 in 1918 and 27·5 the average for the ten years 1909–1918. The subjoined list places the towns in the descending order of their standardized rates:—

|              |          |              |          |                   |         |              |          |
|--------------|----------|--------------|----------|-------------------|---------|--------------|----------|
| Hambantota   | .. 126·4 | Puttalam     | .. 43·2  | Kandy             | .. 29·0 | Kalutara     | .. 24·1  |
| Anuradhapura | .. 56·5  | Kalpitiya    | .. 39·0* | Hatton and Dikoya | .. 27·9 | Weligama     | .. 21·3  |
| Kalmunai     | .. 51·3* | Badulla      | .. 37·6  | Colombo           | .. 27·5 | Ratnapura    | .. 19·2  |
| Mullaittivu  | .. 49·7  | Matale       | .. 36·2  | Trincomalee       | .. 27·1 | Kegalla      | .. 18·6  |

| Moratuwa     | .. 43·5  | Jaffna       | .. 29·4  |                   |         |              |          |

\* Crude rates, standardized rates not being available.

It will be seen that towns along the south-western seaboard have had much lower death-rates than those elsewhere. Moratuwa, however, where the death-rate was 43·5 in 1919, and even higher in 1918, is a notable exception.

34. **Seasonal Influence on Mortality.**—The death-rate of the Island for each quarter in 1919 and 1918 and the corresponding average rates for 1909–1918 are given below :—

|                      | 1919. | 1918. | Average, 1909–1918. |
|----------------------|-------|-------|---------------------|
| First Quarter .. ..  | 50·6  | 26·4  | 32·6                |
| Second Quarter .. .. | 34·5  | 20·6  | 26·8                |
| Third Quarter .. ..  | 31·5  | 22·4  | 27·7                |
| Fourth Quarter .. .. | 26·8  | 57·6  | 30·8                |

The mortality-rate of the Island was highest in the first quarter as usual. It is most markedly so in the year under report, chiefly owing to the incidence of the influenza having been most severe during that period. The second quarter, generally the healthiest, has yielded its place this year to the fourth quarter, which records an improved rate as compared with the average for the corresponding quarters of the years 1909–1918. It is noticeable that the death-rate has gradually decreased in the course of the year, no doubt as the result of the subsidence of the epidemic in the various parts of the Island. Owing to abnormal conditions prevalent in 1919 it has been difficult this year to determine the unhealthiness indicated by seasonal influence.

35. **Ages at Death.**—Of the 168,323 total deaths at all ages, 70,059 or 42 per cent. were of children under five years, 72,213 or 43 per cent. were of persons between 5 and 55 years, and 25,923 or 15 per cent. of persons over 55 years. In 128 instances the age at death was not stated. The mortality in each of these age groups was higher than in the preceding year, the percentage of increase being 17, 5, and 24, respectively. Among the deaths registered during the year, there were 256 of reputed centenarians, 110 of whom were males and 146 females. Their numbers for the past three years were 263, 225 and 223, respectively. Little reliance can be placed upon these figures, for in the majority of cases the informants are ignorant villagers naturally prone to exaggeration.

36. **Sex Proportion at Death at different Age Periods.**—The deaths of 84,144 males and 84,179 females were registered in 1919, the proportion of the former to the latter being nearly equal, as against 979 to 1,000 in 1918. The death-rate per 1,000 persons living was 33·6 for males and 37·9 for females. The mortality in the first five years of life is usually very high, the average rate per 1,000 persons of each sex for the years 1909–1918 being 78·3 for males and 81·4 for females. In 1919 the rates have been still higher, being 97·0 for males and 103·5 for females. The death-rate for persons of either sex in this age group was 100·2. In the next period (5–10) the death-rate declined to 16·2, a very considerable improvement, and still further to 9·4 in the next quinquennium 10–15. The rate then rises in the next age period (15–20) to 14·1, and continues to mount in each succeeding period up to 55 years and upwards, when the mortality is again very high (87·4), being only second to that of childhood. The mortality rate for males was lower than that for females in each age group, excepting the decennium 45–55. The mortality for females, which is usually higher than for males, is more so this year, being 3·6 per 1,000 above 1918 and 7·3 above the average, and was specially marked at the extreme periods of childhood and old age. Had the population of the Island consisted of an equal number of males and females, the death-rate would have been 35·6 for both the sexes. Detailed statistics will be found in Tables XXI.–XXIII.

37. **Infant Mortality.**—The infant mortality of a population is calculated on the annual number of deaths of infants under one year of age to every 1,000 births in the same year. Of the total deaths registered in the year, 35,941 (21 per cent.) were of infants under one year of age, corresponding to a rate of 223 per 1,000 births, as against 188 in the previous year and 193 the average for the years 1909–1918. The following table shows the death-rate for infants under one year since 108, together with the average for the two decades 1888–1897 and 1898–1907 :—

Deaths of Children under One Year per 1,000 Births registered.

| Year.        | Complete Year. | First Quarter. | Second Quarter. | Third Quarter. | Fourth Quarter. |
|--------------|----------------|----------------|-----------------|----------------|-----------------|
| 1888–1897 .. | 163 ..         | 192 ..         | 151 ..          | 150 ..         | 158             |
| 1898–1907 .. | 178 ..         | 192 ..         | 164 ..          | 175 ..         | 180             |
| 1908 ..      | 183 ..         | 189 ..         | 154 ..          | 169 ..         | 216             |
| 1909 ..      | 202 ..         | 237 ..         | 179 ..          | 196 ..         | 189             |
| 1910 ..      | 176 ..         | 178 ..         | 152 ..          | 185 ..         | 188             |
| 1911 ..      | 218 ..         | 193 ..         | 177 ..          | 270 ..         | 240             |
| 1912 ..      | 215 ..         | 262 ..         | 197 ..          | 190 ..         | 200             |
| 1913 ..      | 189 ..         | 214 ..         | 158 ..          | 175 ..         | 210             |
| 1914 ..      | 213 ..         | 264 ..         | 192 ..          | 187 ..         | 197             |
| 1915 ..      | 171 ..         | 232 ..         | 165 ..          | 158 ..         | 180             |
| 1916 ..      | 184 ..         | 207 ..         | 118 ..          | 194 ..         | 188             |
| 1917 ..      | 174 ..         | 200 ..         | 156 ..          | 162 ..         | 177             |
| 1918 ..      | 188 ..         | 211 ..         | 140 ..          | 147 ..         | 240             |
| 1919 ..      | 223 ..         | 303 ..         | 176 ..          | 165 ..         | 187             |

The considerable increase in the mortality among infants during the year is not altogether due to the excess of infant deaths as compared with previous years, since the infants of one year and under who died in 1919 were not all born during that year. A large proportion of them, indeed much more than usual, was born during the previous year. "As a rule, the births registered during each year bear a fairly constant relation to the infant lives at risk, and so can be used in place of the latter in measuring infant mortality; but this is not the case when a great decline in birth occurs" (R.-G., E and W). There were 21,981 more children born in 1918 than in 1919, a number of whom dying in the latter year at ages of less than twelve months have gone to swell the infant mortality of this year. Hence it happens that these young children's deaths are taken into account, but not their births, in determining the mortality rate for 1919, which consequently to that extent overstates the mortality of infants during the year.

38. **Mortality of Infants of either Sex at different Periods of the First Year and of Children under Five Years.**—The mortality of male infants was equal to a rate of 228 per 1,000 births, and that of females to a rate of 218. Mortality is usually heaviest in the first year of infant life, the number of children who die under 1 year being in excess of the deaths between the ages of 1 and 5 years. Again, in the first year itself the mortality is not spread evenly, but occurs mostly within the first three months, about 48 per cent. of the children not surviving the first week. In this period the male mortality exceeds the female. The following table shows the deaths registered of infants under one year at the different periods, and of children under five years according to sex :—

|          |           | Number of Deaths. |                              |                              |                     |                      | Total Births. | Total Deaths at all Ages. | Mortality of Infants under 1 Year to 1,000 Births registered. | Deaths under 5 Years per 1,000 Deaths at all Ages. | Deaths under 5 Years per 1,000 Persons living in the Age Period. 0—5. |
|----------|-----------|-------------------|------------------------------|------------------------------|---------------------|----------------------|---------------|---------------------------|---|--|---|
|          |           | Under 1 Week.     | Between 1 Week and 3 Months. | Between 3 Months and 1 Year. | Total under 1 Year. | Total under 5 Years. |               |                           |   |  |   |
| 1914     | Male ..   | 8,740             | 5,284                        | 4,079                        | 18,103              | 28,587               | 82,653        | 68,819                    | 219.0   | 415.4  | 88.5  |
|          | Female .. | 7,071             | 4,986                        | 4,321                        | 16,378              | 28,313               | 79,524        | 68,012                    | 205.9   | 416.3  | 92.4  |
| 1915     | Male ..   | 7,525             | 4,202                        | 2,897                        | 14,624              | 22,585               | 82,591        | 55,793                    | 177.1   | 404.8  | 68.3  |
|          | Female .. | 6,164             | 3,817                        | 2,953                        | 12,934              | 22,015               | 78,359        | 54,025                    | 165.1   | 407.5  | 70.1  |
| 1916     | Male ..   | 8,546             | 4,979                        | 3,595                        | 17,120              | 26,178               | 89,648        | 61,150                    | 190.9   | 428.1  | 76.9  |
|          | Female .. | 7,057             | 4,390                        | 3,561                        | 15,008              | 25,477               | 85,282        | 59,012                    | 175.9   | 431.7  | 78.8  |
| 1917     | Male ..   | 8,826             | 5,160                        | 3,244                        | 17,230              | 26,236               | 93,784        | 57,812                    | 183.7   | 453.8  | 75.3  |
|          | Female .. | 7,244             | 4,427                        | 3,076                        | 14,747              | 24,978               | 90,192        | 55,577                    | 163.5   | 449.4  | 75.5  |

| Average, | Male ..   | 8,536             | 4,970                        | 3,557                        | 17,063              | 26,777               | 88,415        | 63,499                    | 193.2   | 422.4  | 78.9  |
| 1914-18  | Female .. | 6,982             | 4,494                        | 3,581                        | 15,057              | 26,046               | 84,668        | 62,422                    | 178.1   | 419.0  | 80.8  |
| 1919     | Male ..   | 8,109             | 5,298                        | 5,378                        | 18,785              | 34,790               | 82,463        | 84,144                    | 227.8   | 413.5  | 97.0  |
|          | Female .. | 6,610             | 5,110                        | 5,436                        | 17,156              | 35,269               | 78,940        | 84,179                    | 218.3   | 419.0  | 103.5   |

39. **Provincial and District Rates of Infant Mortality.**—Of provincial rates, the lowest was, as usual, in the Western Province, viz., 162, against an average of 151, and the highest in the North-Central 487 (average 276). The rate in the North-Western Province (377) was also considerably higher than the average (243). In the other Provinces, too, except in Sabaragamuwa, the rate of infant mortality has exceeded the average. Among the districts, the lowest rate (134) was in Kalutara. Galle and Kegalla followed not far behind with rates of 151 and 156, respectively. The others, with the three exceptions of Colombo, Negombo, and Matara, all record rates over 200, the highest being in Mannar 574 (average 347). Again, the districts of Mannar, Mullaitivu, Puttalam, and Anuradhapura also show especially high rates. In these districts a third of the children die every year. The number was still more in 1919, when almost half the children born died during the year. Added to the disadvantages of an unhealthy climate and lack of trained medical aid, there is the prevailing ignorance of the masses, which doubtless in a measure contributes to the high mortality in these districts. Detailed statistics are given in Tables XIII.-XV., and XIX.

40. **Causes of Infant Mortality.**—The principal causes of death of infants under one year and the number attributed to each are given below :—

| Causes.                                | 3 Months and under. | Over 3 Months and under 1 Year. | Total. |
|--|---------------------|---------------------------------|--------|
| Convulsions ..                         | 6,855               | 3,320                           | 10,175 |
| Tetanus ..                             | 89                  | 1                               | 90     |
| Diarrhoea and Enteritis ..             | 280                 | 859                             | 1,139  |
| Bronchitis ..                          | 108                 | 135                             | 243    |
| Pneumonia ..                           | 148                 | 416                             | 564    |
| Debility ..                            | 5,414               | 754                             | 6,168  |
| Premature Birth ..                     | —                   | —                               | 1,502  |
| Disease of the Integumentary System .. | —                   | —                               | 9,649  |

That a very large proportion of infant deaths is usually ascribed to indefinite causes as convulsions and diseases of the integumentary system is principally due to the vagueness of the certification of causes of death in the rural areas.

41. **Infant Mortality by Race.**—The deaths of children under one year to 1,000 registered births among each of the principal races in the Island for the five years 1915 to 1919 are shown below :—

|              | 1915. | 1916. | 1917. | 1918. | 1919. |
|--------------|-------|-------|-------|-------|-------|
| Europeans .. | 45    | 50    | 46    | 58    | 47    |
| Burghers ..  | 162   | 145   | 148   | 123   | 148   |
| Sinhalese .. | 149   | 165   | 150   | 168   | 207   |
| Tamils ..    | 229   | 229   | 228   | 234   | 259   |
| Moors ..     | 218   | 223   | 224   | 229   | 265   |
| Malays ..    | 198   | 193   | 169   | 209   | 235   |
| All Races .. | 171   | 184   | 174   | 188   | 223   |

An analysis of the figures of the past five years shows that the infant mortality among the Tamils and the Moors has always been the highest, the rates ranging well over 200, while the lowest is found among the Europeans, whose rates, with one exception, have not exceeded 50. The most noticeable rise this year has been among the Sinhalese, whose rate (207) is 39 per 1,000 births higher than in 1918.

42. **Infant Mortality on Estates.**—On the estates the deaths of 5,517 infants under one year were registered in 1919, corresponding to a rate of 252 per 1,000 births. The rate on estates is usually higher than the Island rate, the excess per 1,000 births this year being 29, as against 43 in 1918. The rate for each estate district in 1919 is as follows :—

|                      |     |                    |     |
|----------------------|-----|--------------------|-----|
| Kandy .. .. .        | 269 | Colombo .. .. .    | 213 |
| Matale .. .. .       | 246 | Kalutara .. .. .   | 192 |
| Nuwara Eliya .. .. . | 281 | Galle .. .. .      | 198 |
| Badulla .. .. .      | 264 | Matara .. .. .     | 245 |
| Ratnapura .. .. .    | 265 | Kurunegala .. .. . | 421 |
| Kegalla .. .. .      | 166 |                    |     |

The principal causes of infant mortality with the ages at death are as follows :—

| Causes.                         | 3 Months<br>and under. | Over 3 Months<br>and under<br>1 Year. | Total. |
|---------------------------------|------------------------|---------------------------------------|--------|
| Convulsions .. .. .             | 771                    | 283                                   | 1,054  |
| Tetanus .. .. .                 | 2                      | 1                                     | 3      |
| Diarrhoea and Enteritis .. .. . | 41                     | 132                                   | 173    |
| Bronchitis .. .. .              | 50                     | 51                                    | 101    |
| Pneumonia .. .. .               | 70                     | 119                                   | 189    |
| Debility .. .. .                | 2,559                  | 478                                   | 3,037  |
| Premature Birth .. .. .         | —                      | —                                     | 556    |

More than half the children under one year who die on the estates annually are reported to have succumbed to debility.

43. **Infant Mortality in the Principal Towns.**—In the 33 principal towns of the Island 4,263 deaths of children under one year were registered in 1919, equivalent to a rate of 259 per 1,000 births, as against 252 in the previous year. The rate for the towns was even higher than on the estates. The comparatively high infant mortality in the towns, in spite of the numerous opportunities for medical aid and similar conveniences, is perhaps due to the prejudicial effect of urban surroundings on infant life. The highest rate in the towns (excluding Vavuniya and Lunugala) was 500 in Mullaittivu. Anuradhapura came next with a rate of 443, Puttalam showed 423, Kalpitiya 412, Hatton and Dikoya 402, Chilaw 396, Kurunegala 378, Mannar 371, Moratuwa 327, Hambantota 323, and Nuwara Eliya 317. The lowest rate (116) was in Kalutara. In the city of Colombo the infants under one year who died in 1919 numbered 1,611. The mortality rate per 1,000 births was 272, as against 266 in 1918. The deaths of infants under one year in the 33 principal towns have been classified under six age groups as follows for each month of 1919 :—

| Month.            | 1 Week<br>and under | Over 1 Week<br>and under<br>1 Month. | 1-3<br>Months. | 3-6<br>Months. | 6-9<br>Months. | 9-12<br>Months. | Total under<br>One Year. |
|-------------------|---------------------|--------------------------------------|----------------|----------------|----------------|-----------------|--------------------------|
| January .. .. .   | 163                 | 82                                   | 78             | 62             | 51             | 44              | 480                      |
| February .. .. .  | 128                 | 65                                   | 58             | 43             | 42             | 45              | 381                      |
| March .. .. .     | 132                 | 59                                   | 65             | 56             | 45             | 25              | 382                      |
| April .. .. .     | 98                  | 42                                   | 64             | 58             | 41             | 32              | 335                      |
| May .. .. .       | 114                 | 64                                   | 54             | 43             | 40             | 36              | 351                      |
| June .. .. .      | 85                  | 51                                   | 54             | 39             | 56             | 32              | 317                      |
| July .. .. .      | 82                  | 45                                   | 58             | 62             | 61             | 37              | 345                      |
| August .. .. .    | 84                  | 34                                   | 42             | 53             | 54             | 30              | 297                      |
| September .. .. . | 77                  | 40                                   | 36             | 37             | 45             | 27              | 262                      |
| October .. .. .   | 105                 | 41                                   | 44             | 27             | 34             | 23              | 274                      |
| November .. .. .  | 134                 | 60                                   | 67             | 52             | 38             | 33              | 384                      |
| December .. .. .  | 146                 | 73                                   | 70             | 58             | 58             | 50              | 455                      |
| Total .. .. .     | 1,348               | 656                                  | 690            | 590            | 565            | 414             | 4,263                    |

The principal causes were :—

| Causes.              | 1 Week<br>and under. | Over 1 Week<br>and under<br>1 Year. | Total. |
|----------------------|----------------------|-------------------------------------|--------|
| Prematurity .. .. .  | 280                  | 27                                  | 307    |
| Debility .. .. .     | 621                  | 705                                 | 1,326  |
| Convulsions .. .. .  | 330                  | 838                                 | 1,168  |
| Diarrhoea .. .. .    | 2                    | 172                                 | 174    |
| Enteritis .. .. .    | 1                    | 196                                 | 197    |
| Tetanus .. .. .      | 61                   | 33                                  | 94     |
| Bronchitis .. .. .   | 1                    | 117                                 | 118    |
| Pneumonia .. .. .    | 3                    | 321                                 | 324    |
| Other causes .. .. . | 49                   | 506                                 | 555    |

44. **Proportion of Deaths to Births.**—There were registered in the Island during the year 959 births to every 1,000 deaths. In the past two years the proportion of births to 1,000 deaths was 1,228 and 1,623 respectively. Though there has been an excess of births in the districts of Colombo, Negombo, Kalutara, Kandy, Nuwara Eliya, Galle, Matara, Jaffna, Ratnapura, and Kegalla, it has not been large enough to counterbalance the increase of mortality in the remaining districts, particularly in the North-Western and the North-Central Provinces. The death-rate for the Island (35·6) in 1919 exceeded the birth-rate by 1·4 per 1,000. But for the excess of arrivals over departures of the Indian coolies, the population at the end of 1919 would have diminished by ·14 per cent.

## CAUSES OF DEATH.

45. **General.**—Causes of death in the Island classified according to the International or Bertillon system are given in detail in Tables XXVII. and XXVIII. Table XXIX. gives similar details for the estates, Table XXX. for the city of Colombo, and Table XXXI. for the principal towns. Except in the case of the principal towns and the estates, where the causes of death are certified by qualified medical practitioners, statistics of causes of death in Ceylon are not altogether reliable, being based on information supplied by men, a large majority of whom are not versed in Western medicine. Diagnosis of diseases by those qualified in the Western system of medicine is rare in the rural areas, and instances are frequent of causes expressed in vernacular language either being ill-defined or having no exact equivalent in English. Thus it happens that the vast majority of deaths in the Island is usually attributed to pyrexia, a term embracing symptoms of various diseases, such as malaria and enteric, which are not distinguished as such in the returns of rural registrars. If the figures relating to causes of death in the Island are to have any statistical value for scientific inquiry, the causes in the rural areas also should be certified by qualified medical practitioners.

46. **Principal Causes of Death.**—Corresponding to an enhanced death-rate, the number of deaths registered under most of the principal causes of death was greater in 1919 than in 1918. The number of deaths in 1919 and 1918 registered under some of the principal causes is given below :—

| Causes.                                      | 1919.  | 1918.  |
|--|--------|--------|
| Pyrexia .. .. .                              | 22,878 | 18,367 |
| Influenza .. .. .                            | 22,814 | 19,102 |
| Convulsions .. .. .                          | 15,598 | 14,013 |
| Diarrhoea .. .. .                            | 15,402 | 9,982  |
| Diseases of Skin and Cellular tissue .. .. . | 10,950 | 10,102 |
| Pneumonia .. .. .                            | 10,752 | 16,770 |
| Diseases of early Infancy .. .. .            | 7,261  | 8,184  |
| Rickets .. .. .                              | 6,807  | 5,139  |

In the following paragraphs the numbers appearing in brackets next to the headings are the numbers against which the diseases appear in the detailed list of causes of death.

47. **Anchylostomiasis (106).**—2,608 deaths (5 Burghers, 593 Sinhalese, 1,880 Tamils, 112 Moors, 5 Malays, and 13 “Others”) were registered from anchylostomiasis, corresponding to a death-rate of 552 per million of the estimated population, as against 498 in 1918. 1,752 or slightly over two-thirds of the total deaths from this cause occurred on the estates. This accounts for the comparatively high mortality rate, viz., over 1,000 per million of the population in the districts of Matale, Kandy, Ratnapura, and Badulla, where the estates comprise a considerable immigrant population. No cases occurred in Mannar, while, among the other districts, Jaffna shows much the lowest rate (44). The growing menace of the disease in Ceylon resulted in the appointment of a Commission by Government, and a vigorous campaign is now afoot to combat the disease.

48. **Appendicitis (108).**—Sixteen deaths were registered under the head of “Appendicitis and Typhilitis,” as against 12 in the previous year and 10 the average for 1909–18. Of the number registered during the year, 2 were Europeans, 7 Sinhalese, 5 Tamils, and 2 Moors. Thirteen of the deaths were registered in the towns (including 7 in Colombo), 2 on the estates, and only 1 in the rural districts. There can be no doubt that the paucity of deaths registered under this head in the rural parts of the Island is due to the absence of opportunities for the correct diagnosis of such cases, and probably also to there being no exactly equivalent term in the Oriental nomenclature of diseases.

49. **Cancer (39–45).**—494 deaths from cancer, an increase of 13 on the previous year, were registered in 1919, as against an average of 387 for the ten years 1909–1918. The number corresponded to a rate of 105 per million persons living, which is 14 per million above the average for the ten years 1909–1918. Six Europeans, 9 Burghers, 310 Sinhalese, 136 Tamils, 30 Moors, 1 Malay, and 2 “Others” died of cancer. As the diagnosis of the disease is deplorably imperfect in the villages, a better idea of the prevalence of cancer may be had from the figures relating to towns only. In the towns 142 deaths were registered from this cause in 1919, representing a rate of 219 per million persons, which is appreciably more than the general rate for the Island. The following table shows the seat of cancer in persons who died from this disease in 1919 :—

|  | Males. | Females. | Total. |
|--|--------|----------|--------|
| Buccal Cavity .. .. .                        | 79     | 62       | 141    |
| Stomach, Liver .. .. .                       | 70     | 86       | 156    |
| Intestines, Rectum, Peritoneum .. .. .       | 2      | 2        | 4      |
| Female Genital Organs .. .. .                | —      | 17       | 17     |
| Breast .. .. .                               | 17     | 25       | 42     |
| Other Organs or Organs not specified .. .. . | 72     | 62       | 134    |

The ages of persons whose deaths were attributed to cancer were as follows :—

|                |    |    |    | Males. | Females. | Total. |
|----------------|----|----|----|--------|----------|--------|
| 0-5            | .. | .. | .. | 28     | 26       | 54     |
| 5-10           | .. | .. | .. | 4      | 2        | 6      |
| 10-15          | .. | .. | .. | 3      | 3        | 6      |
| 15-20          | .. | .. | .. | 4      | 2        | 6      |
| 20-25          | .. | .. | .. | 8      | 8        | 16     |
| 25-35          | .. | .. | .. | 18     | 29       | 47     |
| 35-45          | .. | .. | .. | 34     | 49       | 83     |
| 45-55          | .. | .. | .. | 44     | 58       | 102    |
| 55-65          | .. | .. | .. | 47     | 36       | 83     |
| 65-75          | .. | .. | .. | 28     | 29       | 57     |
| 75 and upwards | .. | .. | .. | 22     | 12       | 34     |

50. **Cholera** (12 and 13).—419 deaths were registered as due to cholera, as against 9 in the previous year, 3 in 1917, and 64 the average for 1909-1918. The largest number (326) occurred in Hambantota, mainly within its town limits. The outbreak, which occurred about July and showed no sign of abatement till the end of the following month, is believed to have been due to infection communicated by Indian pilgrims. The next largest number (63) was in Badulla. The village of Akurukaduwa was the most affected. The infection was most probably carried to Badulla from the neighbouring district of Hambantota. Besides these, 14 deaths were registered in Kalutara, 8 in Matara, 3 in Nuwara Eliya, 2 in Kandy, and 1 each in Galle, Mannar, and Ratnapura.

51. **Diarrhœa** (104, 105) (b) and (c).—The total deaths assigned to diarrhœa, including those of infants, numbered 15,402, as against 9,982 in 1918 and 13,891 the average for 1909-1918. The deaths in 1919 were equivalent to a rate of 3,260 per million persons living, showing an increase of 1,126 per million on the rate for 1918. There is reason to believe that the increase in the deaths referred to diarrhœa is in some measure traceable to the shortage in the regular supply of rice, the staple article of food in Ceylon. A good proportion of the people had in consequence to substitute other and, perhaps, less wholesome foodstuffs in their dietary. As in the previous year, Hambantota and Matara lead with the highest rates, 9,347 and 8,689, respectively. In the other districts the rate has ranged from 6,044 in Ratnapura to 743 in Jaffna, and was 805 in Colombo.

52. **Dysentery** (14).—Deaths from dysentery numbered 3,785, and were 1,359 more than in the previous year, but 611 less than the average for 1909-1918. This number represents a rate of 801 per million persons, as against 519 in 1918. The Mannar District records by far the highest rate 7,498, Batticaloa coming next with 2,699. The lowest rates are 179 and 116 respectively in Matara and Hambantota, which curiously enough return the highest rates for diarrhœa. Dysentery appears to be more prevalent on the estates, which have contributed more than half the total deaths registered from this cause.

53. **Diseases of Early Infancy** (151-153).—The deaths assigned to this class in 1919 were 7,261, as against 8,184 in 1918. This group includes the sub-heads of debility, which caused 5,414 deaths, premature birth 1,502, want of breast milk 156, injuries at birth 125, and lack of care 9. Other deaths of infants are distributed among the various causes, the majority being classified under convulsions, diarrhœa, and diseases of the integumentary system.

54. **Enteric Fever** (1).—The deaths were registered of 658 persons from enteric fever, as against 531 in 1918 and 1,622 the average for 1909-1918. The figures for 1919 correspond to a rate of 139 per million persons. The rate in the Colombo District (568) far exceeds that in any other. This comparatively high rate of the Colombo District is chiefly due to the inclusion of the deaths within the Municipality, where 267 deaths were registered during the year, or about two-thirds of the total deaths in the whole district. The rate for the Colombo Municipality alone is 938 per million persons. In the other districts (*i.e.*, excepting Colombo) the highest rate was 214 in Negombo. No deaths from this cause were registered in Mullaittivu or Ratnapura, while the number registered in Mannar, Batticaloa, Trincomalee, Puttalam, Chilaw, Anuradhapura, Badulla, and Kegalla is negligible, being in each case less than five. Since 1911 no death from enteric fever is classified as such in the list of causes of death prepared in this office, unless the cause has been certified by a qualified medical practitioner. Hence the rural areas, where cases of this nature rarely come under Western treatment, afford an erroneous impression of immunity from this disease.

55. **Influenza** (10).—In 1919 22,814 deaths in the Island were attributed to influenza, which, as I have already pointed out, has been prevailing in the Island in an epidemic form since the latter part of 1918. In the early months of 1919 the epidemic was acute, particularly in the North-Western and North-Central Provinces and in the Batticaloa District, but since September last, which showed a distinct improvement, the disease has been on the wane. The number of deaths from influenza registered during the year corresponds to a rate of 4,829 per million, as against 4,084 in 1918. The highest rate (21,407) was recorded in Anuradhapura. In the districts of Kurunegala, Batticaloa, and Badulla, too, the rates were especially high, being in each case more than 10,000 per million persons. The rates in the other districts vary between 9,315 in Puttalam and 1,181 in Kegalla. On the estates the deaths from influenza numbered 1,735. To obtain an accurate estimate of the death roll of this epidemic, the cases registered from influenza alone would not suffice; there must be added a very large number of the cases returned by the rural registrars as due to pneumonia, which, in most cases, is but a further and complicated stage of influenza.

56. **Pneumonia** (91-92).—The deaths assigned this year to pneumonia, including broncho-pneumonia, are 10,752, as against 16,770 in the previous year and 5,480 the average for 1909-1918. The

sudden increase in 1918 and 1919 was probably due to developments consequent on influenza. The mortality rate from pneumonia for the Island was 2,276 per million persons, and ranged from 10,888 in Mullaittivu to 276 in Galle. 5,657 or more than one-half of the deaths registered in the Island occurred on the estates. The following table shows the deaths registered from influenza and pneumonia in each district of the Island in 1919 and 1918, together with their rates per million of the population :—

| Districts.   | No. of Deaths from Influenza. |        | No. of Deaths from Pneumonia. |        | Mortality Rate from Influenza per Million Persons Living. |        | Mortality Rate from Pneumonia per Million Persons Living. |        |
|--------------|-------------------------------|--------|-------------------------------|--------|---|--------|---|--------|
|              | 1919.                         | 1918.  | 1919.                         | 1918.  | 1919.   | 1918.  | 1919.   | 1918.  |
| Colombo      | 2,381                         | 1,968  | 1,376                         | 1,780  | 3,374   | 2,795  | 1,950   | 2,528  |
| Negombo      | 642                           | 340    | 91                            | 78     | 3,353   | 1,792  | 475   | 411    |

| Kandy        | 1,108                         | 1,281  | 1,896                         | 3,714  | 2,516   | 2,901  | 4,302   | 8,410  |
| Matale       | 243                           | 1,102  | 454                           | 1,118  | 2,259   | 10,032 | 4,220   | 10,177 |
| Nuwara Eliya | 677                           | 633    | 1,563                         | 2,389  | 3,977   | 3,699  | 9,182   | 13,988 |
| Galle        | 1,080                         | 1,102  | 90                            | 431    | 3,313   | 3,407  | 276   | 1,332  |
| Matara       | 521                           | 607    | 72                            | 164    | 2,019   | 2,378  | 279   | 644    |
| Hambantota   | 635                           | 1,039  | 78                            | 93     | 5,674   | 9,236  | 697   | 827    |
| Jaffna       | 649                           | 2,042  | 804                           | 1,144  | 1,898   | 5,965  | 2,351   | 3,342  |
| Mannar       | 45                            | 444    | 95                            | 96     | 1,962   | 18,415 | 4,141   | 3,982  |
| Mullaittivu  | 62                            | 296    | 185                           | 123    | 3,646   | 16,977 | 10,888  | 7,055  |
| Batticaloa   | 2,848                         | 258    | 538                           | 198    | 17,392  | 1,566  | 3,285   | 1,202  |
| Trincomalee  | 131                           | 307    | 142                           | 71     | 4,290   | 9,962  | 4,650   | 2,309  |
| Kurunegala   | 5,538                         | 1,835  | 546                           | 472    | 18,020  | 5,763  | 1,777   | 1,482  |
| Puttalam     | 351                           | 32     | 192                           | 130    | 9,315   | 824    | 5,095   | 3,347  |
| Chilaw       | 311                           | 49     | 158                           | 75     | 3,235   | 508    | 1,644   | 778    |
| Anuradhapura | 1,813                         | 839    | 129                           | 140    | 21,407  | 9,551  | 1,523   | 1,594  |
| Badulla      | 2,241                         | 2,403  | 1,243                         | 1,655  | 10,132  | 10,706 | 5,622   | 7,374  |
| Ratnapura    | 502                           | 627    | 513                           | 913    | 2,915   | 3,636  | 2,979   | 5,294  |
| Kegalla      | 310                           | 793    | 276                           | 1,299  | 1,181   | 3,061  | 1,051   | 5,014  |
| Ceylon       | 22,814                        | 19,102 | 10,752                        | 16,770 | 4,829   | 4,084  | 2,276   | 3,585  |

57. **Malaria and Malarial Cachexia (4).**—The number of deaths registered in this class in 1919 was 1,555, as against 1,125 in 1918 and 2,040 the average for the years 1909–1918. The rate per million persons living was 329, a marked increase on the past year's rate (241). Strange to say, in those districts of the Island which are notoriously malarial the death-rate from this cause is fairly low. This is chiefly the result of such deaths being vaguely attributed to fever by the rural registrars. Hence the mortality from fever, or pyrexia, as it is technically termed in the international list of diseases, is usually very high in Ceylon, the rate in 1919 being equal to 4,842 per million persons living. The pyrexia rate stood highest in Kurunegala, viz., 18,697 per million persons. In Hambantota and Anuradhapura, too, the rates were excessive, being 12,644 and 12,144 respectively. This very high mortality from pyrexia in districts which are particularly malarial undoubtedly bears out the fact that several deaths assigned to pyrexia are really due to malaria. Taking the death-rate from malaria alone, Ratnapura shows the highest (2,903), and is followed by Puttalam (2,070) and Anuradhapura (2,065). Nuwara Eliya returns the lowest rates, viz., 18 and 928 respectively from malaria and pyrexia. The high mortality rates from pyrexia in almost all the districts of Ceylon are fair evidence of the prevalence of malaria in a greater or less degree throughout the Island.

58. **Parangi (Frambæsia Tropicum, Yaws) (37a).**—Under this head were classified 69 deaths (58 Sinhalese, 9 Tamils, and 2 Moors), as against 60 in 1918 and 90 the average for the ten years 1909–1918. About half the number of deaths were registered in the Southern Province.

59. **Plague (15).**—The total number of deaths from this cause registered in 1919 was 79, all of which occurred within the city of Colombo, with a single exception in Talaimannar. There were 9 deaths of Sinhalese, 40 Tamils, 24 Moors, and 6 "Others." During the first seven months of the year only five such deaths were registered (1 in February and 4 in March); all the rest having occurred later in the year, particularly during the last quarter. It was early in 1914 that the plague first appeared in the Island. The deaths from this cause registered in each year numbered 401 in 1914, 127 in 1915, 286 in 1916, 211 in 1917, 165 in 1918, and 79 in the year under report. Though the number of deaths has considerably decreased, cases of plague still occur here and there within the city, an indication that the disease is not yet altogether stamped out. It appears that the plague has come to stay.

60. **The Puerperal State, Diseases of (134–141).**—3,664 deaths were attributed to diseases of parturition, as against 4,010 in the previous year and 3,509 the average for 1909–1918. The number of children registered during the year as born alive was 161,403, so that the mortality of mothers to a thousand children born was 22·7, as against 21·8 in 1918. In other words, one mother died to every 44 children born alive. The death-rate of women in childbirth, which is calculated on the number of

deaths of parturient women per 1,000 births, is given below for the various races in the Island during 1919, as compared with 1918, and the average for 1909-1918 :—

|           | 1919. | 1918. | Average,<br>1909-1918. |
|-----------|-------|-------|------------------------|
| Europeans | —     | —     | 5·1                    |
| Burghers  | 6·4   | 13·9  | 4·13                   |
| Sinhalese | 22·7  | 20·6  | 18·6                   |
| Tamils    | 22·3  | 23·8  | 24·2                   |
| Moors     | 26·3  | 27·5  | 26·3                   |
| Malays    | 25·3  | 30·3  | 22·7                   |
| All Races | 22·7  | 21·9  | 20·3                   |

61. **Smallpox (5).**—Eight deaths from smallpox were registered in the Island in 1918, as against 37 in the previous year and 57 the average for 1909-1918. Of the deaths registered during the year, 5 were in the Colombo District, all occurring within the town, 2 in Badulla, and 1 in Jaffna.

62. **Tuberculosis (28-35).**—Deaths from all forms of tuberculosis numbered 3,819, showing a decrease on the number 4,144 registered in 1918 and on the average 4,277 for the ten years 1909-1918. Deaths from phthisis alone amounted to 3,529, or 259 less than in the previous year. The death-rate from tuberculosis per million persons was 808. The phthisis rate alone is 747, as against 810 in 1918, and ranged from 1,607 in Colombo to 157 in Batticaloa. It must be stated that tuberculosis in this country is generally of the pulmonary type (phthisis), and as often as not escapes proper diagnosis by village registrars, who are apt to return deaths from this cause as due to cough or other complaints of the respiratory system. In the principal towns, whose statistics of causes of death are the more reliable, the death-rate from phthisis was 1,891 per million persons. The number of deaths registered in the city of Colombo (702) exceeded the number registered in the other 32 towns, and was equivalent to a rate of 2,045 per million persons. Deaths from phthisis on estates numbered 293 (corresponding to a rate of 346 per million persons), and are less frequent than in other parts of the Island. This is most probably due to the open air life of the labourer. The number of deaths from phthisis during the year included 5 Europeans, 53 Burghers, 2,361 Sinhalese, 836 Tamils, 212 Moors, 17 Malays, and 45 "Others."

63. **Violent Deaths (Table XXXII.) : (a) Suicide (155-163).**—243 deaths (2 Europeans, 1 Burgher, 119 Sinhalese, 118 Tamils, 1 Moor, and 2 "Others") resulted from suicide, as against 210 the average, and were equal to a rate of 52 per million persons. In the previous year the number was 235, and the corresponding rate 50. The popular mode of suicide appears to be hanging, which was resorted to by no fewer than 148 persons. 39 deaths were attributed to drowning, 17 to poison, 8 to firearms, 4 to cutting or piercing instruments, and 27 to other causes.

(b) **Homicide (182-184).**—The number of deaths from homicide was 229, as against 204 in the previous year and 196 the average for 1909-1918. This is composed of 181 Sinhalese, 32 Tamils, 11 Moors, and 5 "Others." The death-rate per million persons, namely, 48, was 4 above the previous year's rate and 1 above the average.

(c) **Executions (186 (a)).**—39 deaths (37 Sinhalese and 2 Tamils) were registered as due to judicial hanging, as against 34 in the previous year and 34 the average for 1909-1918.

(d) **Accidents.**—Of the 2,026 deaths attributed to accidents and other external violence, 474 were due to drowning (154 in wells and 31 in pits). 452 deaths were caused by fall from trees and 224 by snake-bite. The average annual mortality from the latter cause is 210. 197 deaths were due to burns, as against 263 in the previous year and 192 the average. The deaths ascribed to "bottle lamp" accidents alone numbered 64, as against 73 in 1918. Among the 195 deaths caused by crushing, 94 were due to fall of heavy substances, 35 to carts and carriages, 32 to railway accidents, 15 to motor cars, 11 to land slides, 5 to motor vehicles (exclusive of cars), 2 to trams, and 1 to a bicycle. Injuries by animals accounted for the death of 80 persons, of whom 21 were attacked by elephants and 19 by crocodiles. Weather agencies were responsible for 17 deaths, 14 of which were due to lightning and 2 to sunstroke.

64. **Miscellaneous Diseases.**—29 deaths were registered from measles, average 99, 14 from diphtheria, average 9; 2 from croup, average 8; 75 from leprosy, average 79; 59 from hydrophobia, average 39. One death was attributed to beri-beri; 197 deaths were caused by syphilis, average 119; 58 by alcoholism, average 15; 87 by simple meningitis, average 91; and 28 by carbuncle, average 32, 1,160 deaths were registered from acute rheumatic fever, 234 from diabetes (mellitus) and 5,085 from senility. The average number of deaths from senility is 3,397. Detailed statistics will be found in Tables XXVII. and XXVIII.

65. **Causes of Death on Estates.**—Of the 24,127 deaths registered on the estates, 5,657 were attributed to pneumonia and 1,735 to influenza. In the previous year the numbers were 11,103 and 3,073, respectively. The number of deaths from these two kindred causes is this year a little above half the number in 1918. The virulence and extent of the epidemic on the estates, as in the towns, has doubtless abated considerably, seeing that the total number of deaths registered during the whole of this year is far below the number registered in the fourth quarter alone of 1918. Other principal causes of deaths in 1919 were debility (of children under three months), which accounted for 11 per cent. of the total deaths; diarrhoea 8 per cent.; dysentery and anchylostomiasis 7 per cent. each; infantile convulsions and debility (of persons over three months old) 6 per cent. each; senility 3 per cent.; premature birth 2 per cent.; and enteritis and phthisis 1 per cent. each. There were 48 deaths from suicide and 13 from homicide. See Table XXIX. for fuller details.

66. **Causes of Deaths in Towns.**—The mortality in the principal towns from pneumonia was equal to 15 per cent. of the total deaths. From influenza the percentage of deaths was 5. The number registered from each of these causes shows a sharp decline from the figures of 1918. Seven per cent. of the deaths was due to convulsions; 5 per cent. each to diarrhoea, phthisis, anchylostomiasis, and malaria and malarial cachexia; 4 per cent. each to dysentery and enteritis; 3 per cent. to Bright's disease and nephritis; 2 per cent. to enteric fever; and 1 per cent. each to bronchitis, premature birth, and puerperal septicaemia. For detailed statistics see Table XXXI. for all towns, and Table XXX. for the city of Colombo. Fuller information relating to the vital statistics of the city of Colombo will be found in the reports of the Medical Officer of Health.

## ADMINISTRATION.

67. **Staff.**—Mr. W. L. Kindersley, who was Registrar-General since 1914, was appointed to the Government Agency of Uva on September 15, 1919, when the writer assumed duties as Acting Registrar-General. Consequent on the above change, Mr. F. L. Anthonisz, the Second Assistant Registrar-General, was appointed to act as Assistant Registrar-General, and Mr. E. R. de Silva, the Chief Clerk, to act as Second Assistant.

68. **Registration Divisions.**—The boundaries of the following registration divisions were altered during the year, viz. :—

- (1) The birth and death registration divisions of Mawata pattu in Kegalla District on August 1, 1919; Puttalam pattu south and Mundel in Puttalam District, Munnessaram pattu south and Anaivilundan and Munessaram pattus south of Deduru-oya, in the Chilaw District, on October 1, 1919.
- (2) The marriage registration divisions of Puttalam pattu and gravets, and Mundel in Puttalam District, on October 1, 1919.

Since the general re-distribution of registration divisions proclaimed in 1897 on the coming into operation of the Ordinances Nos. 1 and 2 of 1895, their boundaries have from time to time undergone so many changes that a Proclamation consolidating them has become necessary, and steps are being taken in this direction.

69. **Validation of Irregular Registration.**—Two orders under Ordinance No. 3 of 1912 for the validation of irregular registrations were passed in Council during the year. They covered certain births and deaths registered by the Deputy Registrars of Hatton-Dikoya and Batticaloa, who were appointed before they had obtained the necessary qualifications under section 34 of Ordinance No. 1 of 1895, and certain events in Eravur pattu division in Batticaloa District, in the Puttalam town, and in the Kumara-vanni pattu of the Puttalam District, which had been erroneously registered by the registrars of the adjoining divisions.

70. **Inspection of Registrars' Offices.**—Apart from the inspections by the Registrar-General and his Assistant in the course of their circuits, 227 birth, marriage, and death registries were inspected during the year by the Inspecting Officers specially appointed for the purpose. These inspections, being of a surprise nature, have proved an effective means of keeping the Registrars up to the mark.

71. **Prosecutions.**—Apart from 6 bigamy cases, 5 of which resulted in conviction, 351 prosecutions were instituted by the Department during the year for various offences against the Marriages, Births, and Deaths Registration Ordinances, as against 310 in the previous year. Of these, 268 (or 75 per cent.) resulted in convictions and 19 (or 5 per cent.) in acquittals or discharges, 7 were withdrawn finally, and 3 struck off the roll. 54 cases remained undisposed of at the end of the year.

72. **Records.**—The number of duplicate registers of marriages, births, and deaths received at the Head Office and examined during the year amounted to 345,105. Before being stored, these duplicates are bound into volumes of about 400 documents each, but owing to the insufficiency of funds it is not possible to bind all the records received in the year, and arrears are accumulating.

73. **Inquiries on Applications under Sections 20 and 21.**—The provision in the Ceylon Education Code requiring the production of a proper birth certificate before a child can be admitted to a Government or aided school has resulted in a large number of declarations under section 21 of Ordinance No. 1 of 1895 for the insertion or alteration of names in birth registers. At the Head Office alone there were as many as 92 inquiries held this year in connection with these applications. Of inquiries into applications for registration of past births there were 21.

74. **Legislation.**—"The Kandyan Marriage Ordinance, 1870," which had undergone several amendments from time to time, was further amended by Ordinance No. 1 of 1919. The amendment provides for a fee to the registrar for copies of the marriage entry he is required to issue to the parties soon after registration, and also empowers the Provincial Registrar or the Assistant Provincial Registrar at the time of dissolution of a marriage to make order, in suitable cases, for maintenance of the children or alimony for the wife. Ordinances Nos. 23 and 24 of 1919—the former amending the Births and Deaths Registration Ordinance, and the latter the Medical Registration Ordinance—were the result of certain recommendations made by a Commission appointed by His Excellency the Governor in 1917 to report on the registration of births and deaths. The Ordinance No. 23 of 1919, while making some slight alterations in the form of certificate of cause of death, brings also within the meaning of "public servants" in the Ceylon Penal Code medical practitioners who are employed as Registrars of Births and Deaths in towns, the object being to render liable to punishment any person obstructing such Registrars in the performance of their duties. The Ordinance No. 24 of 1919 makes provision for the deletion from the Register of Medical Practitioners of the name of any practitioner who is found guilty under sub-sections (3), (4), (5) of section 48 of the Births and Deaths Registration Ordinance, and of any Medical Registrar guilty of dishonestly aiding and abetting the registration of a false cause of death. The Estate Duties Ordinance, No. 8 of 1919, has thrown some additional clerical work on the Registrar of Births and Deaths, who is now required, by rules framed under that Ordinance, to furnish a monthly return of deaths to the Government Agent or Assistant Government Agent.

75. **Registered Buildings.**—Seven new buildings were registered during the year : 3 by the Roman Catholic Church, 3 by the Church Missionary Society, and 1 by the Wesleyan Methodist. A detailed list of all the registered places of worship appears in the *Government Gazette* of April 23, 1920.

76. **Registrars.**—There were at the end of the year 652 Registrars of Births and Deaths, including the Medical Registrars appointed to the towns proclaimed under sections 31 to 36 of the Ordinance No. 1 of 1895. Of these, twelve are stipendiary, and the rest are paid by fees. The Registrars of Marriages numbered 658, of whom 291 were also Registrars of Kandyan Marriages. For registration of Muhammadan marriages, there were 22 Registrars and 53 Levvairs licensed to officiate as Registrars. Twenty-eight Registrars died during the year, 18 resigned office, and 5 retired. Four were dismissed and 3 discontinued.

77. **Revenue and Expenditure.**—The cost of the Marriages, Births, and Deaths Registration Department in 1919 (excluding the salaries of the Registrar-General, Assistant Registrar-General, and the Provincial and Assistant Provincial Registrars, who have also other Departments under their charge) was Rs. 219,624·25, viz. :—

|  | Rs.            | c.        |
|--|----------------|-----------|
| Salaries and allowances of the Clerical Staff ..   | 55,650         | 21        |
| Payment to Stipendiary Registrars of Births and Deaths ..  | 18,718         | 65        |
| Fees paid to other Registrars for registering births, deaths, and Kandyen Marriages ..                           | 81,620         | 25*       |
| Fees paid to headmen for reporting events for registration ..  | 24,096         | 60*       |
| Salaries to binders, peons, and sweepers ..  | 6,179          | 94        |
| Additional temporary staff and bonuses to Provincial Registrars' and Assistant Provincial Registrars' Offices .. | 7,848          | 77        |
| Tappal allowances to Registrars of Births, Deaths, and Marriages ..  | 634            | 70*       |
| Other expenses, including travelling, stationery, and office requisites, &c. ..                                  | 24,875         | 13        |
| <b>Total ..</b>  | <b>219,624</b> | <b>25</b> |

\* For the financial Year 1918-1919.

The revenue derived from the stamp duties payable under the Births, Marriages, and Deaths Registration Ordinances amounted to Rs. 28,462·30, and fees recovered for searches and copies to Rs. 10,456·60 (Head Office Rs. 2,271·62 and Branch Offices Rs. 8,184·98). Fees recovered in stamps in connection with registration of marriages by Provincial Registrars and Assistant Provincial Registrars in receipt of sterling salaries amounted to Rs. 921·50. The income from all sources was Rs. 39,840·40.

78. The staff worked extremely well, the compilation of the elaborate statistical tables for the periodical reports issued by the Department being done accurately, yet punctually. The services of the Head Clerk, Mr. Snell Supramaniam, deserve special acknowledgment.

Registrar-General's Office,  
Colombo, May 15, 1920.

N. W. MORGAPPAH,  
Acting Registrar-General.

APPENDIX.

I.—ESTIMATED POPULATION OF CEYLON, 1867 TO 1919.

Marriages, Births, and Deaths registered ; Yearly Increase of Population by Excess of Births over Deaths and by Immigration ; the Proportion of Persons Married, Births, and Deaths to 1,000 Persons living per Annum ; and the Number of Persons living to each Person Married, Born, or Dead in each of the Years 1867 to 1919.

| Year. | Estimated Popu-<br>lation in the<br>Middle of the<br>Year. | Marriages<br>registered. | Births regis-<br>tered. | Deaths regis-<br>tered.* | Excess of regis-<br>tered Births<br>over Deaths.† | Excess of Immi-<br>grants over<br>Emigrants.† | To 1,000 Persons<br>Living. |         |         | The Number of<br>Persons Living. |                  |                  |

\* The registration of deaths up to 1887 was imperfect, and the figures given cannot safely be compared with those of subsequent years, in which deaths have been registered with increasing efficiency every year.

† The sign minus (—) signifies that deaths exceeded births, and in column 7 that the number of emigrants exceeded the immigrants.

‡ The births and deaths here shown for 1867 were registered in the ten months commencing March 1, on which date the Ordinance No. 13 of 1862 came into operation.

§ The number of births and deaths for 1868 includes those registered in the first half-year under the Ordinance No. 13 of 1862, and those in the second half under Ordinance No. 13 of 1867, which repealed the former Ordinance and came into operation on July 1, 1868, and continued to be in force till July 1, 1897, when the Ordinance No. 1 of 1895 came into force.

II.—Number of Marriages, Births, and Deaths registered in the Island, with their Rates per 1,000 Persons living according to Race, in 1918 and 1919, and the Yearly Averages for 1909–1918.

# COLOMBO PORT COMMISSION.

## CONSTITUTION.

Chairman, or Chief Port Commissioner : The Hon. Mr. F. Bowes, C.M.G., C.C.S., Principal Collector of Customs (on leave).  
Acting Chairman, or Chief Port Commissioner : Mr. R. N. Thaine, C.C.S., Acting Principal Collector of Customs.

### Official Members.

Principal Civil Medical Officer : The Hon. Dr. G. J. Rutherford.  
General Manager of the Railway : Mr. G. P. Greene.  
Deputy Collector of Customs, Colombo : Mr. W. E. Wait, C.C.S.  
Master Attendant, Colombo and Galle : Lieutenant-Commander C. E. Stainer, R.N.  
Harbour Engineer : Mr. A. D. Prouse, M.I.C.E. (on special duty in England).  
Acting Harbour Engineer : Mr. A. H. M. Morgan.

### Unofficial Members.

Nominated by the Ceylon Chamber of Commerce : Mr. W. Y. Fleming, Mr. H. French, Mr. A. D. Skrine, Mr. E. R. Waldoek, and Mr. A. Warden.  
Nominated by His Excellency the Governor : Mr. C. Namasivayam.  
Secretary : Mr. H. K. Hillyer, O.B.E.

## DEPARTMENTS.

### General Administration.

Chairman, or Chief Port Commissioner : The Hon. Mr. F. Bowes, C.M.G., C.C.S., Principal Collector of Customs (on leave).  
Acting Chairman, or Chief Port Commissioner : Mr. R. N. Thaine, C.C.S., Acting Principal Collector of Customs.  
Secretary : Mr. H. K. Hillyer, O.B.E.  
Accountant and Cashier : Mr. C. W. Musgrave.

### Master Attendant's Department.

Master Attendant, Colombo and Galle : Lieutenant-Commander C. E. Stainer, R.N.  
Assistant Master Attendant : Lieutenant-Commander G. F. Hole, R.N.

### Harbour Engineer's Department.

Harbour Engineer : Mr. A. D. Prouse, M.I.C.E. (on special duty in England).  
Acting Harbour Engineer : Mr. A. H. M. Morgan.  
Assistant Engineer : Mr. A. H. M. Morgan (acting as Harbour Engineer).  
Assistant Engineer and Surveyor : Mr. C. W. Rice.  
Mechanical Superintendent : Mr. W. Whyte.

### Oil Installations Dept., Kolonnawa.\*

Controlling Engineer : Mr. A. D. Prouse, M.I.C.E. (on special duty in England).  
Acting Controlling Engineer : Mr. A. H. M. Morgan.

## REPORT OF THE CHAIRMAN FOR 1919.

THE year 1919 has not been noticeable for any special work of development in the port, as all activities have been chiefly devoted to getting back to normal conditions after the war. This, so far as internal conditions will permit, has, I think, successfully been attained, and the port is now ready to cope with all reasonable contingencies. There has been a great increase in the tonnage of exports in the year, and the question of increased warehouse accommodation must be considered in connection with the Estimates for 1920-21. Difficulty is likely to be experienced—if the port continues to progress as at present, as there is happily every reason to suppose will be the case—before many years are past in finding the necessary land on the harbour foreshore on which to erect further warehouses. When this stage is reached, consideration will have to be given to the provision of additional storeys to the existing warehouses, or to the provision of additional land for warehouses by the wet dock scheme, or in some other direction. In this connection, of course, experience has yet to be obtained of the effect which the Lake-Harbour Canal and lakeside warehouses will have on the work of the port. It is anticipated that the canal will be open to traffic early in 1921.

2. All experts are now convinced of the future of oil fuel, and the number of ships entering Colombo Harbour which are using oil fuel has shown a very large increase during the year. It is, therefore, a matter of congratulation that the scheme for the provision of a thoroughly up-to-date oil installation at Colombo, with bunkering and discharge berths, is now well in hand. As is explained later in this report, a conference was held in London with the representatives of the Oil Companies towards the end of 1919, at which both Mr. Bowes and Mr. Prouse were present. At this conference all outstanding questions were settled. Contracts have now been given for the construction of the bunkering and discharge berths by Messrs. Topham, Jones, & Railton, Limited, and for the laying of the oil pipe lines by the Anglo-Persian Oil Company, Limited, both to be under the supervision of the Harbour Engineer (Controlling Engineer, Oil Installations Dépôt, Kolonnawa).

### ADDITIONAL WAREHOUSE ACCOMMODATION.

3. There was no scheme for increasing the warehouse accommodation during the year. A slight increase, however, was gained by the joining up of Warehouse T 3 with the old export warehouses west of the Passenger Jetty. The additional floor area thus provided was 7,952 square feet.

## NEW CUSTOMS HOUSE AT THE PASSENGER JETTY.

4. The construction of this new building, which was postponed during the war, will be taken up in 1920. The negotiations with the Fort Land and Buildings Company in connection with the raising of York street were satisfactorily concluded at the end of 1919, and the work of raising York street and the construction of a new road from the corner of the Peninsular and Oriental Company's building in York street to the corner of Gaffoor's building in Leyden Bastion road will now be proceeded with to their completion. Church street is also about to be widened and improved.

## LAKE TO HARBOUR CANAL AND LAKESIDE WAREHOUSES.

5. As the result of representations made by the Port Commission, certain additions and modifications in the scheme for the development of the Colombo lake were sanctioned as follows :—

- (a) The alteration of the Main street, Norris road, and railway bridges so as to raise the underside of the girders to 11·34 feet above mean sea level ;
- (b) The deepening of the inverts of the two middle spans of each bridge to 10 feet below mean sea level for such width as will not endanger the piers ; and
- (c) Lowering the bed of the Lake to Harbour Canal and basin to 10 feet below mean sea level for a width of 80 feet in the middle.

The new Lakeside Warehouse now under construction will provide additional warehouse accommodation of 36,200 square feet.

Details of work carried out during the year are given in the report of the Chief Engineer, Colombo Lake Development Scheme (Appendix IV.).

## DEEPENING COLOMBO HARBOUR.

6. Owing to the urgent necessity for repairs to the dredger "Sir John Coode," dredging work had to be stopped in the middle of October, and for the remainder of the year the dredger was laid up. The progress made in dredging during the year has, however, been satisfactory, and from inquiries which have recently been made from the Suez Canal authorities, it is clear that the work of deepening Colombo Harbour is, if not ahead, well up to the work of dredging the Suez Canal. As will be observed from the report of the Harbour Engineer, which appears as an appendix, over 195,000 cubic yards of material were dredged and taken to sea in the year 1919.

Some alarm has recently been expressed in some quarters as to the amount of silting which is said to be taking place in the harbour, but the annual soundings which have recently been completed show that there is no cause whatever for this alarm. Though the silting in some places is a little more than in previous years, the general condition of the harbour has not been affected. In fact, the Colombo Harbour is well able to berth all ships which pass through the Suez Canal where the maximum draft of vessels is limited to 30 feet. In this connection the following figures showing the number of vessels with drafts of 27 feet and up to 28 feet, over 28 feet and up to 29 feet, and over 29 feet and up to 30 feet which entered the harbour during 1917, 1918, and 1919 are of considerable interest :—

|         | Number of Vessels with drafts of |                                    |                                    |
|---------|----------------------------------|------------------------------------|------------------------------------|
|         | 27 Feet and<br>up to 28 Feet.    | Over 28 Feet and<br>up to 29 Feet. | Over 29 Feet and<br>up to 30 Feet. |
| 1917 .. | 65 ..                            | 10 ..                              | 4                                  |
| 1918 .. | 80 ..                            | 15 ..                              | 3                                  |
| 1919 .. | 90 ..                            | 17 ..                              | 3                                  |

During the three years 1917-18-19 only 9 vessels of 30 feet and over have entered the harbour, as follows :—

| Name of Vessel.           | Draft.<br>Ft. in. | Name of Vessel.        | Draft.<br>Ft. in. |
|---------------------------|-------------------|------------------------|-------------------|
| ss. Caronia ..            | 30 0              | ss. Titan ..           | 30 0              |
| ss. Empress of Britain .. | 30 2              | ss. Talthybius ..      | 30 0              |
| ss. Ningchow ..           | 30 0              | ss. Keemun ..          | 30 0              |
| ss. Pesaro ..             | 30 0              | ss. Port Macquarrie .. | 30 0              |
| ss. Glenamoy ..           | 30 0              |                        |                   |

Urgent representations to Government were made by the Port Commission during the year with a view to the purchase of a new dredger at the earliest possible date, and, as a result, after tenders had been invited by the Crown Agents for the Colonies, an order was in October placed with Messrs. Fleming & Ferguson for the construction of a new dredger at a cost of £185,000. It is hoped that the new dredger will be received at the end of 1920 or early in 1921.

## OIL INSTALLATIONS SCHEME.

7. On receipt of further applications for sites from the Oil Companies, an area of 21 acres was purchased early in 1919, in addition to the 35 acres originally acquired in 1917. This was followed by a further acquisition of 31 acres towards the end of the year 1919, thus making a total of 87 acres, which was the area originally proposed for the Oil Installations Depot at Kolonnawa.

Major James Rush, Inspector of Explosives, India, arrived in the Island in January, 1919, and his expert advice was obtained on various matters connected with the transmission of oil and the working of the oil installations. But there still remained certain practical details connected with the laying of pipe lines and other important questions relating to the general scheme (e.g., the two bunkering and one discharge jetties), which it was not possible to decide locally, as the local agents of the Oil Companies concerned had to obtain the sanction of their principals in London with regard to any question relating

to local requirements. Accordingly, in September, 1919, Mr. A. D. Prouse, the Harbour Engineer and Controlling Engineer, Oil Installations Dépôt, Kolonnawa, went to England to confer with Messrs. Coode, Matthews, Fitzmaurice, & Wilson, Consulting Engineers, and with the principals of the Oil Companies concerned. The Oil Conference met at the offices of His Majesty's Petroleum Executive, London, and all the Oil Companies were represented. All outstanding points have now been settled, and the work will be proceeded with to its completion as rapidly as possible.

Estimates and plans for the construction of two bunkering jetties inside the North-east Breakwater and one discharge jetty on the northern side of the Graving Dock Guide Pier have been prepared by the Consulting Engineers, London.

The premises known as Bloemendahl Mills, situated about three-quarters of a mile from the harbour front, which were acquired in 1918, have now been allotted for the erection of the pumping station and measuring tanks required by the oil scheme. Pending the completion of the scheme at Kolonnawa, a portion of the area at Bloemendahl was given to Messrs. Shaw, Wallace & Company, the local agents of the Anglo-Persian Oil Company, Limited, to erect two temporary liquid fuel tanks, on the understanding that the provision of these additional storage facilities at Bloemendahl will not in any way delay the completion of the main scheme. This step was necessitated by the fact that it was considered a matter of extreme importance to provide larger storage than exists at present at Colombo at an earlier date than the middle of 1921, by which time, it is estimated, the Kolonnawa scheme will be completed.

#### OCEAN-GOING TUG.

8. It has been suggested that an ocean-going tug should be obtained for this port to meet the demands for assistance to disabled ships. Most of the ships built during the war were so hurriedly constructed that it has been found that they are subject to frequent breakdowns, and pre-war built ships have been worked so incessantly, without time for the usual overhaul and repairs, that owing to the excessive wear and tear they also are very liable to breakdowns. In fact, the experience of the last year has shown that a much greater number of ships than before the war have put in to the port with engine or other trouble or put back after having left owing to breakdowns.

The two tugs now belonging to the port are not considered suitable for sea-going towing work of the kind indicated, and were, in fact, never intended for this purpose. Moreover, it is very necessary in the interests of the port that a third tug should be available. At the present time when one of the tugs is under repairs, only one tug is available, and should that tug meet with an accident or be requisitioned for an urgent emergency call outside the harbour, a serious situation might arise, as happened in December last, when a cyclone in the harbour caused several ships to break their moorings, the one tug that was available met with an accident, and was unable to give the necessary assistance.

The matter has been under the consideration of the Port Commission for some time, and in view of the importance of providing a third tug for the harbour, inquiries are now being made through the Crown Agents for the Colonies with regard to the cost of a sea-going tug suitable for heavy towing, and fitted with wireless and up-to-date complete salvage and fire equipments.

#### DISPOSAL OF FLOATING CRAFT.

9. The steam trawler "Violet" of 150 tons gross, which was formerly used for the inspection of the pearl banks, was found to be in an unseaworthy condition. As one of the six trawlers released from mine-sweeping duties was available for the service, it was considered that there was no justification for incurring the heavy expenditure required to fit the old "Violet" for work, and the vessel was sold.

The hopper barge "Industry," which was obtained for work in connection with the construction of the breakwaters, was sold by public auction, as there is now no work on which a vessel of this type can be employed.

Four of the mine-sweeping trawlers were also sold by tender, on the termination of the mine-sweeping work.

#### PASSENGER MOTOR LAUNCHES.

10. With the great advance in motor transport, two companies applied for permission to run motor launches for passenger hire in the harbour. This service is one which deserves every reasonable encouragement, as the motor boat is a great improvement on the old row boat for conveying passengers to and from ships, and should also lead to the diminution of small craft in the harbour. The Commission, therefore, approved of twelve motor boats being run by one of the companies and four by the other company.

#### MOORING FOR LIGHTERS WITH EXPLOSIVES.

11. As the practice of keeping lighters loaded with explosives alongside the Block Jetty was considered to be unsafe, owing to the steam crane working in the vicinity, and to the number of steam launches that often come alongside this jetty, eight moorings 60 feet apart were laid for these lighters east of the Block Jetty, about midway between buoy No. 37 and the shore. No charge is being levied at present for these moorings.

#### LEADING LIGHTS.

12. The four leading lights in the port are now illuminated by electricity, the oil lamps hitherto used being retained as a stand by.

#### GOODS TRAFFIC ON THE PORT COMMISSION RAILWAY.

13. Rules regarding the working of goods traffic and the interchange of traffic between the Ceylon Government Railway and the Port Commission were issued at the beginning of 1919, and came into operation from February 17, 1919. These rules have since been revised and added to in the light of the experience gained so far.

## SUPPLY OF RICE TO HARBOUR LABOUR.

14. During the shortage of rice supplies from India, the importance of the labour force of the harbour as an essential unit in the arrangements for the import and distribution of foodstuffs was recognized, and, in order to avoid any possible breakdown due to labour troubles, which would jeopardize the food supply of the whole Island, special arrangements were made for the supply of rice to the labourers employed in the port. A system of permits was introduced from the middle of the year, and all landing and stevedoring companies, marine engineering firms, and the Master Attendant's and Harbour Engineer's Departments are being supplied from the allocation of rice made to this Department.

## PILOTS' NIGHT FEES.

15. As the result of an appeal made by the pilots for the grant of night fees, a Committee of the Port Commission was appointed to consider this matter in May, 1919, and, after consideration of the Committee's report, it was decided that the pilots should receive a night fee of Rs. 20 each vessel for bringing in or taking out vessels between the hours of 6 P.M. and 6 A.M.

## BOOKLET REGARDING THE PORT OF COLOMBO.

16. An illustrated booklet regarding the port of Colombo was prepared in 1916, but the publication was postponed on the advice of the Military authorities. The booklet has now been revised and added to; it is hoped to publish it shortly.

## MINE-SWEEPING DEPARTMENT.

17. The Mine-sweeping Department, which had been specially formed in February, 1917, was closed in April, 1919, and a report of the Mine-sweeping Officer of the Government of Ceylon detailing the work carried out by his Department since its inauguration in February, 1917, together with a connected report from the Harbour Engineer, was appended to the Administration Report for 1918. All the officers of the Port Commission, both on the administrative side as well as on the executive side, are to be highly commended for the manner in which they carried on the additional duties in connection with the Mine-sweeping Department, which were very considerable, during the period in question.

Four of the six mine-sweeping trawlers have been sold, and the greater portion of the stores which were suitable for marine purposes were transferred to the Harbour Engineer's Department. The remaining stores were transferred to the Colonial Storekeeper. The two remaining trawlers have been retained for use in connection with the pearl fisheries.

## MEMBERS AND STAFF.

18. *Members.*—Messrs. J. A. Ridge and E. S. Clark resigned in February, 1919; they were succeeded by Messrs. W. Y. Fleming and A. D. Skrine, respectively. Mr. R. S. Philpott, who tendered his resignation in May, 1919, was succeeded by Mr. E. R. Waldo. Messrs. J. Lochore and C. Namasivayam, J.P., completed their term of membership in June, 1919; the former was succeeded by Mr. A. Warden, and the latter was re-appointed for a further term of three years.

19. *Staff.*—The Chairman, the Hon. Mr. F. Bowes, C.M.G., proceeded on leave in April, 1919, and Mr. R. N. Thaine, Deputy Collector of Customs, Colombo, assumed duties as Acting Chairman. The latter was succeeded by Mr. W. E. Wait.

Mr. A. H. M. Morgan, who was acting as Secretary of the Port Commission during the absence on war service of Mr. H. K. Hillyer, having had to revert to his substantive appointment as Assistant Engineer, was succeeded by Mr. F. Marshall of the Ceylon Civil Service. Mr. Marshall acted only for a short period, when Mr. H. K. Hillyer, permanent Secretary of the Port Commission, returned from war service and resumed duties.

Mr. A. D. Prouse, Harbour Engineer, left for England in September, on duty in connection with the Oil Installations Scheme, and Mr. A. H. M. Morgan, Assistant Engineer, acted as Harbour Engineer and Controlling Engineer, Oil Installations Depôt, Kolonnawa.

On June 3, 1919, Mr. H. K. Hillyer, Secretary, Colombo Port Commission, was appointed an Officer of the Most Excellent Order of the British Empire.

## FINANCIAL.

20. Two statements are annexed as appendices showing the revenue and expenditure of the Colombo Port Commission for the financial year 1918-19. The sum allotted in the Estimates of Expenditure for the financial year was Rs. 2,399,037, inclusive of a supplementary provision of Rs. 368,800 for the Oil Installations Depôt at Kolonnawa, Rs. 19,956 voted under Head 3, Clerical Service, and Rs. 2,170 under Head 11, Government Stores. The actual expenditure during the period was Rs. 2,095,272·07, including Rs. 524,869·25 expended in connection with the Oil Installations Depôt. In addition, a sum of Rs. 369,293·18 was expended in connection with mine-sweeping operations, and Rs. 160,309·60 on account of other votes, making a total expenditure for the financial year of Rs. 2,624,874·85. The estimated revenue for the port for the financial year was Rs. 1,623,000, and the actual revenue Rs. 2,746,963·52. A sum of Rs. 3,018,322, inclusive of Rs. 1,000,000 for the Oil Installations Scheme, and provision under Head 3, Clerical Service, and Head 11, Government Stores, has been provided in the Estimates of Expenditure for the financial year 1919-20, the estimated revenue for the same period being Rs. 2,533,000.

21. Reports are attached from the Master Attendant; Harbour Engineer; Controlling Engineer, Oil Installations Depôt, Kolonnawa; Chief Engineer, Colombo Lake Development Scheme; Chief Construction Engineer, Railway Extensions (on the Harbour Rail Connection); and Secretary, Colombo Rivercraft Committee, Colombo.

\* Colombo, April 6, 1920.

R. N. THAINE,  
Acting Chairman, Colombo Port Commission.

## APPENDICES.

I.—REPORT OF THE MASTER ATTENDANT, COLOMBO AND GALLE,  
FOR THE YEAR 1919.

DURING my absence on sick leave from July 24 to August 9, 1919, Mr. H. Fisher acted as Master Attendant, and Mr. F. Marshall as Joint Police Magistrate. When I was away on leave from Colombo from September 2 to September 16, 1919, Mr. H. Fisher acted as Master Attendant, and Mr. R. G. Saunders as Joint Police Magistrate.

Lieutenant-Commander G. F. Hole, R.N., Assistant Master Attendant, acted as Private Secretary and Aide-de-Camp to His Excellency the Governor from March to September, 1919. He was away on leave from September 29 to October 15, 1919.

During the absence on leave of Mr. A. R. Drew from November 28, 1918, to November 26, 1919, Mr. H. Fisher acted as Senior Pilot.

The general health of the officers and employees of this Department was satisfactory.

The work of this Department has generally increased. The number of ships that entered the harbour in 1918 was 1,675, and in 1919 the total number was 2,805, showing an increase of 1,130. The total number of cases instituted in the Joint Police Court during 1918 was 687, and the number of cases in 1919 was 1,509, showing an increase of 822.

Owing to the control over the issue of rice, arrangements were made to obtain rice and issue it weekly to the employees of this Department. This has been under the direct supervision of Mr. P. S. Charawanamuttu, Chief Clerk, who has had to work after hours on many occasions, and it is needless to say this has given great satisfaction.

*Shipping.*—Statement showing number of arrivals and departures with their nationalities is hereto annexed. Owing to squally weather on June 3, 1919, and December 5, 1919, some ships broke their moorings, but the pilots re-moored them with commendable skill, and thereby averted any serious damage :—

## Statement of Arrivals and Departures during the Year 1919.

| Nationality.        | Arrivals. |                | Departures. |                |

| Total ..            | 2,543     | 8,603,643      | 2,538       | 8,585,621      |

This does not include sailing vessels of over 200 tons which paid pilotage and steam vessels which called outside the harbour.

*Tugs.*—Mr. Sheik Jainoo, who was selected for appointment as Mate, Tug "Goliath," in place of Sheik Mohamed Bawa, arrived and assumed duties on October 30, 1919. From February 2, 1919, till the arrival of the new Mate, Mr. M. A. Fernando, Master of the Pearl Fishery Trawler, acted as Mate of the "Goliath."

Tug "Goliath" went out on January 8, 1919, in search of a kaddumaram which was reported to be floating with a corpse tied to it. Tug "Samson" went out on July 13 and 23, 1919, to assist fishing craft in distress.

Tugs were sent out to assist vessels in distress on the following occasions:—Tug "Samson" to assist the ss. "City of St. Helens" in June, 1919. Tug "Goliath" to assist the ss. "Mitra" in October, 1919.

Owing to the unsuitability of the present harbour tugs for salvage or other work outside the harbour, I urged the necessity for an ocean-going tug, and the matter is under consideration. This tug, if provided, will, in addition, serve as third tug, to take the place of either harbour tugs when under repairs, and there will always be two tugs available for emergency calls.

*Lighthouses.*—All the Colombo lights have worked satisfactorily, and the leading lights having been converted into electric from June 1, 1919, give better results.

— *Signal Station, Colombo.*—Master Gunner C. W. Trickett continues to train the signalmen once a week. The progress made by them is not satisfactory.

*Time Ball.*—The original practice of dropping the time ball three times a day, i.e., at 9 A.M., 1 P.M., and 4 P.M., on working days, and at 9 A.M. only on Sundays and public holidays, was resumed on December 15, 1919.

*Coast Lights.*—All the lights have been satisfactory. The cost of maintenance of the lights has been very heavy owing to the abnormal cost of paraffin oil.

*Pearl Fishery.*—The last pearl fishery was held in 1907. As there was no inspection of the pearl banks since 1914, arrangements were made to resume inspection, and for the purpose the barque "Rengasamy Puravi" was chartered from October 1, 1919. The mine-sweeping trawler "Lilla" was fitted up as pearl fishery trawler, and the pearl fishery coxswains were re-engaged. The inspection staff under Dr. Joseph Pearson, Marine Biologist, and Lieutenant-Commander J. C. Kerkham, R.N.R., Marine Superintendent, left Colombo on December 20, 1919, with all the craft. As the result of a cyclone on December 31, 1919, the barque "Rengasamy Puravi" was stranded off Dutch Bay and became a total wreck, and the four inspection boats were lost, besides the beacon boat lost on the way from Colombo. Another mine-sweeping trawler, "Violet," was fitted up in place of the "Rengasamy Puravi," and the inspection party left again on March 1, 1920.

*Master Attendant's Department and Signal Station, Galle.*—I visited Galle in September, 1919. The old Signal Station building has been repaired. The work at Galle during the year has been satisfactory.

*Pilots.*—The pilots were allowed to draw night fees from July 1, 1919. Every ship entering or leaving harbour between the hours of 6 P.M. and 6 A.M. has to pay Rs. 20 as night fee.

Mr. W. E. Gordon-Brown, who was performing duties as a temporary pilot, was taken on the permanent staff of pilots from August 1, 1919, in place of Mr. R. Appleton, whose services were dispensed with.

On the return of Mr. J. J. Hamilton from war service on May 1, 1919, the services of Mr. H. V. Warner, who was employed as temporary pilot, were discontinued.

Mr. G. A. V. Howes returned to the Island after war service, and resumed duties on December 22, 1919. Mr. A. R. Drew, Senior Pilot, who was on leave, returned, and resumed duties on November 26, 1919.

Mr. W. C. McK. Martin was on leave from March 3 to October 27, 1919. Mr. G. E. Appelbe is on leave from November 11, 1919.

*Clerical Staff.*—On the transfer of Mr. F. C. Vannitamby as Storekeeper, Combined Stores of the Harbour Engineer's and Master Attendant's Departments, in February, 1919, Mr. V. Chinnappah was appointed Clerk and Timekeeper, Boathouse, and Mr. J. B. Ediriweerasinghe as Clerk, Subordinate Clerical Service, in the office in place of Mr. V. Chinnappah.

Mr. M. Chelliah, Second Clerk of this Office, was transferred to the Dandagamuwa Police Court as Chief Clerk from April 10, 1919, and Mr. P. J. Swampillai was appointed in his place from the same date.

Colombo, March 26, 1920.

C. E. STAINER,  
Lieutenant-Commander, R.N.,  
Master Attendant.

## II.—REPORT OF THE HARBOUR ENGINEER FOR 1919.

THE year under review immediately following that which saw the close of hostilities in Europe was not particularly noteworthy in any manner. Conditions existing during the year with regard to the labour and material market were very similar to those reported for 1918, and therefore no work on an extensive scale was carried out. The work done by the Department during the year was, with a few exceptions, confined to the completion of minor works.

*Changes.*—At the end of September, 1919, Mr. A. D. Prouse, Harbour Engineer, left Ceylon for England on six months' special duty, in connection with the Oil Installations Scheme for Colombo, leaving Mr. A. H. Morgan in charge during his absence. Mr. H. P. Heap, Assistant Engineer and Surveyor, having resigned his appointment in the early part of the year, was succeeded by Mr. C. W. Rice in July. Mr. A. Connal, Second Engineer, Dredger, severed his connection with the Department in July, and Mr. J. W. Todd, who was appointed in his place, took over his duties in December. Mr. T. Buckley resigned his appointment in February, and was succeeded by Mr. E. L. Wilson as First Engineer, Tugs. Mr. D. W. Carmichael, Docking and Slipping Master, proceeded home on ten months' leave, commencing from the latter part of July, and his Assistant, Mr. T. Mason, is acting for him, in addition to his own duties.

*Eight-hour Day.*—"The eight-hour day" or "forty-eight hour week" rule came into operation on October 1, and has worked satisfactorily. The working hours have, under the new arrangement, been reduced from 52½ to 48 hours a week.

*Sand Ballast.*—The demand for sand ballast during the year was very heavy, almost reaching the maximum output of 1901. 13,968 cubic yards of sand were issued to various vessels, and a sum of Rs. 30,513 was recovered in payment for same. The whole of this sand was obtained from harbour dredgings. In April it was found necessary to raise the charge for supplying sand to vessels from Rs. 1.50 to Rs. 3 per cubic yard.

*Two Minutes' Silence.*—In accordance with the desire of His Majesty the King to commemorate the signing of the Armistice in 1918 on November 11 at 11 A.M., a two minutes' silence was observed with cessation of all work carried on by the Department.

#### RECURRENT WORKS.

*Surveying and Sounding Harbour.*—The annual soundings taken during the year showed that little alteration had taken place in the bed of the harbour, except that due to dredging operations. No repairs were carried out on the breakwaters during the year, the structures being in a satisfactory condition.

*Jetties.*—The jetties in charge of this Department were all maintained in good working order. New and more efficient methods were adopted for securing the timber walings and fenders in position, thus minimizing the wear and tear on both vessels and jetties. At the King's Jetty reinforced concrete walings were substituted for the old timber walings, and new fenders were fitted throughout, and repairs to the concrete walings at the Passenger Jetty were carried out.

*Maintenance of Bed of Inner Harbour; Dredging Inner Harbour.*—The 10- and 5-ton diggers were employed continuously throughout the year maintaining the depth of water required at the various quays and jetties, the hopper barges being used for conveying the material to sea for dumping. A considerable quantity of clean sand which had silted into the harbour along the inner side of the South-west Breakwater was removed by these diggers, unloaded from punts on the Pettah quay, and sold as ships' ballast.

*Patent Slip.*—The Patent Slip was used on 56 occasions by vessels mostly of the schooner class. On 28 occasions out of the 56 departmental vessels and vessels belonging to the Police and Master Attendant's Department were slipped for repairs. The total earnings for the year were Rs. 11,435.12, while the expenditure on working the slip amounted to Rs. 10,044.51. During the latter part of the year a new multitubular boiler was installed in place of the old one, which was condemned as being unsafe for further use.

*Graving Dock.*—The Graving Dock was made use of on 46 occasions, two of which were to accommodate the dredger "Sir John Coode," which underwent considerable repairs during the latter part of the year. The total revenue for the year was Rs. 99,758.37, as against Rs. 92,701.02 for 1918. The cost of working was Rs. 102,013.98.

*Buoys and Moorings.*—All the mooring buoys were renewed, repaired, painted, and replaced twice during the year. The due proportion of mooring chains and shackles, 29 in number, were changed. A sum of Rs. 16,000 was expended on the provision of new chains with shackles and links for the harbour moorings.

*Workshop and Shop Machinery.*—The machinery, boilers, and engines were overhauled and repaired during the holidays. The transfer and re-erection of the machinery from the old to the new carpenter shop and the re-arrangement of the machinery for the new extension to the fitting shop were carried out.

A new radial drilling machine was fitted up in the boiler shop, and a new bolt and rivet forging machine was erected in the blacksmiths' shop.

The maintenance of the tugs, launches, locomotives, cranes, mooring buoys and chains, and the departmental plant was carried out by the workshops' staff.

In the latter part of the year the shops were kept very busy with the overhaul and repairs to the dredger "Sir John Coode." These repairs were of an extensive and urgent nature.

*Working of Colombo Port Commission Railway.*—The tonnage worked over this line during 1919 was as under:—

|                                | Tons.  |                   | Tons.   |
|--------------------------------|--------|-------------------|---------|
| Ceylon Government Railway coal | 57,251 | Coconut produce   | 8,785   |
| Manure .. .. .                 | 32,884 | Other goods .. .. | 2,430   |
| Rice .. .. .                   | 92,987 |                   |         |
| Bulk petroleum .. ..           | 7,257  | Total .. ..       | 213,484 |
| Liquid fuel .. .. .            | 11,890 |                   |         |

*Locos and Repairs to Rolling Stock.*—Locos No. 12 and No. 8 were re-wheeled, and all other locomotives kept in good working condition and repair. The steel block trollies were overhauled and painted, and other departmental trucks and wagons repaired and kept in running order.

*Roads, Buildings, Boundary Walls, &c.*—Several of the roads under the control of the Colombo Port Commission were tarred and repaired. The roadways on both sides of the Graving Dock were extended to the full length of the Dock. A new steam road roller has been obtained for the use of the Department. All the Port Commission buildings were painted, whitewashed, and otherwise repaired. Many of the warehouses were also repaired, whitewashed, and painted.

*Harbour Tugs "Samson" and "Goliath."*—The periodical survey, overhaul, and repairs to the machinery of the tugs "Samson" and "Goliath" were carried out.

*Fumigation.*—Forty-five vessels were fumigated with the Clayton apparatus as below:—26 steamships; 1 large sailing ship; 18 native craft. The total revenue for the year amounted to Rs. 8,850.69.

*Works for other Departments, &c.*—The bell buoy of the Galle Harbour was repaired for the Master Attendant, Galle, and the gas buoy for the Onagalla shoal was charged and adjusted for the Master Attendant, Colombo. The launches and gigs belonging to the Master Attendant's, Police, and Port Surgeon's Departments were kept in repair. The coaling ground of the Messageries Maritimes Company was levelled. A new water connection and meter was provided on the South-west Breakwater for the use of the Oriental Boat Company for supplies to shipping.

#### NEW WORKS.

*Deepening Colombo Harbour.*—The deepening of the harbour to 33 feet below low water ordinary spring tide was proceeded with during 9½ months of the year. On October 15 dredging work was stopped, as it was found necessary immediately to undertake extensive repairs to the dredger. She was docked on October 21, and a thorough overhaul of both hull and machinery was put in hand. Satisfactory progress was, however, made in deepening the harbour, over 195,000 cubic yards of material being dredged, taken to sea, and dumped in deep water.

The new dredger, which is now being constructed in England, has been specially designed for work in Colombo Harbour, and will be capable of dredging to a depth of 45 feet below light flotation level, with a hopper capacity of 24,000 cubic feet. This dredger is expected to be ready about the end of 1920.

*Sanitation.*—A new latrine for the use of coolies and clerks was constructed in the Customs premises. Work was started on a new latrine in the Delft area, which is to do away with the old Municipal latrine near the Passenger Jetty. Hydrants and meters were provided for flushing the passageways at the new Import and Delft warehouses. Two new washing troughs were constructed for the use of the men in the departmental workshops.

*Water Service to Port Commission Premises.*—No new mains were put down during the year. Connections to existing mains were made as required for new latrines, buildings, workshops, &c.

*Construction of Two Towing Launches.*—The construction of the two new timber towing launches for the Department was sanctioned. Indent for the necessary engines has been placed, and the timber work of the first launch is in hand.

*Mahara Quarry.*—The usual work was carried on at Mahara quarry for the supply of rubble, metal, and stone setts for the works of the Department. 1,028 tons of pitching stones, 464 tons of 2-inch metal, 785 tons of quarry chips, and 2,932 tons of cabook were sent out from Mahara to Colombo during the year. The average number of convicts employed at the quarry was 214 per diem.

*Mutwal Quarry.*—This quarry was used for metal breaking and storing of metal.

*Shortage of Rice.*—Considerable inconvenience was caused to the labour force owing to the scarcity and the inferior quality of the rice supplied. Arrangements were, however, made by the middle of the year with the Food Controller to ensure a sufficient supply of good rice for the workmen.

*Bungalows for Departmental Officers.*—Two new bungalows for the use of the officers of the Department are being erected on the site of the Warden's residence at Mutwal. The bungalows are expected to be ready for occupation early in the current year.

*Other Works.*—Among other works carried out may be mentioned the following :—

- (1) The joining of T 3 warehouse with the old export warehouse, to be used now for import cargoes, thus providing approximately 8,000 square feet of extra warehouse accommodation.
- (2) The transference of the carpenters' shop to the old mine-sweeping shed, and the extension of the fitting shop.
- (3) The construction of new boiler furnaces.
- (4) The removal of the hydraulic capstan from the head of the Graving Dock to the Guide Pier.
- (5) The construction of two new boats for the examination of pearl banks.

Colombo, March 26, 1920.

A. H. MORGAN,  
Acting Harbour Engineer.

### III.—REPORT OF THE CONTROLLING ENGINEER, OIL INSTALLATIONS DEPÔT, KOLONNAWA, FOR THE YEAR 1919.

#### SUMMARY OF WORKS CARRIED OUT AT KOLONNAWA AND BLOEMENDAHL DURING 1919.

*Oil Installations Depôt, Kolonnawa: Site.*—To meet the applications of companies interested in the oil trade, a further area of 54 acres was acquired by Government.

2. *Levelling Site.*—Excavation was carried out in the same way as in 1918, i.e., by means of small wagon parties and by broad gauge side and end tip wagons loaded by basket gangs, with a locomotive for traction of these wagons.

3. *Excavation and Levelling.*—An area of 16½ acres had been levelled and reclaimed by the end of 1919, a quantity of 201,000 cubic yards of excavation having been dealt with. The decrease in the area levelled as compared with the preceding year is due to the fact that excavation was practically confined to the hillside, having a cutting face of 62 feet, and the height of the filling was 18 feet throughout.

4. *Boundary Walls.*—A wall 8 feet high and measuring 725 lineal yards was built on the northern boundary of the depôt, together with a side drain, to catch all rain water flowing down the hill between the Colombo-Ratnapura road and the Depôt.

5. *Labour.*—The good health maintained by the labour force during the year is noteworthy. During the influenza epidemic prompt measures were adopted to avoid the spread of the disease. The few who fell victims to the disease were treated in the hospital of the camp, and as a result no deaths occurred.

6. *General.*—The Standard Oil Company of New York availed themselves of the earliest opportunity to commence work in connection with their installation. Two tanks for kerosine, each with a storage capacity of a million gallons, together with a settling tank, were erected by them. The connected buildings are in the course of construction.

7. *Bloemendahl Installation.*—An area of 19 acres was acquired at Bloemendahl for the erection of measuring tanks. An area of 2 acres and 12 perches of this site, with an access road, was assigned to the Anglo-Persian Oil Company for two temporary storage tanks, pending the completion of the works at Kolonnawa, to be served by a line of pipes from the Graving Dock Guide Pier.

8. *Mr. Prouse.*—The Controlling Engineer proceeded to England at the end of September on duty in connection with the Oil Installations Scheme.

Colombo, March 27, 1920.

A. H. MORGAN,  
Acting Controlling Engineer.

#### IV.—REPORT OF THE CHIEF ENGINEER, COLOMBO LAKE DEVELOPMENT SCHEME, FOR THE YEAR 1919.

##### APPROACH ROADS AND BRIDGES AT PARSONS ROAD.

ALL retaining walls and embankments of roads were completed.

2. All steel joists of the bridge over the low-level road were erected and the concrete decking begun.

##### COLOMBO LAKE DEVELOPMENT AND CANAL LAKE TO HARBOUR, INCLUDING LAKESIDE WAREHOUSES.

3. The east and west locks were completed and the bridges over the locks completed, with the exception of the roadway and parapets.

4. Very little work was done on the bridges carrying Norris road and Main street over the lake to harbour canal, besides minor preparations for resuming work.

5. In connection with the new bridge carrying Norris road over the connecting channel between the San Sebastian canal and the canal basin, which was constructed by the Railway Construction Department, a short length of wall was built to connect the west wall of the San Sebastian canal with the abutment of the new bridge.

6. The foundations for the pumping machinery of the San Sebastian pumping station were completed. Part of the machinery has been received from England.

7. *Lakeside Warehouses.*—After trial piles had been driven, it was decided to adopt reinforced concrete raft foundations for the warehouses, and a good deal of work was done in the preparation of the reinforcing steel, and a commencement was made with the raft foundations.

##### NEW CUSTOMS HOUSE AT THE PASSENGER JETTY.

8. Church street was re-graded for the full width to give access to the new bridge. York street was re-graded for half its width, but the other half could not be completed, as negotiations with the Fort Land Company were still pending.

9. The new Tide Waiters' Office and the entrance gates were completed and handed over for use.

10. All re-grading and widening of Wharf road and Customs yard were completed, with the exception of a small area occupied by the Municipal latrine, which is to be removed.

##### WHARF WALL AT MESSRS. HARRISON & CROSFIELD'S SITE AT DARLEY ROAD.

11. An extension of 61½ feet of this wall was approved by Government, and the work was completed.

##### QUAY WALL FOR MESSRS. THE COLOMBO COMMERCIAL CO., LTD.

12. The construction of a quay wall 130 feet long for this Company was authorized by Government, and the work was completed.

##### DIVERSION OF GENERAL'S LAKE ROAD.

13. The portion of General's Lake road, in front of Messrs. The Colombo Commercial Company's Works in Slave Island, was diverted, to follow the line of the new boundary of this Company's premises.

E. HUMAN,  
Acting Chief Engineer, Colombo Lake  
Development Scheme.

Colombo, February 2, 1920.

V.—REPORT OF THE CHIEF CONSTRUCTION ENGINEER, RAILWAY EXTENSIONS,  
FOR THE YEAR 1919.

HARBOUR RAIL CONNECTION.

THIS extension of the railway connects the original Harbour line east of the Graving Dock with the Main line at Urugodawatta, the chief object being to reduce the haulage of goods on the existing connections in the city of Colombo, and help to relieve the congestion in the Colombo goods yards. Included in the scheme is a new goods yard near Victoria Bridge road and transfer sidings at Bloemendahl, which will be utilized for transferring goods between the Ceylon Government Railway and the Port authorities. It also includes the extension of the existing harbour line over the new Lake and Harbour Canal near Main street, under the Passenger Jetty approach, joining up with the existing Wharf station, and allows for improved rail connections throughout the harbour frontage both north and south of the Graving Dock.

The work was estimated in 1918 to cost Rs. 2,777,351·84. This estimate may be slightly exceeded owing to the recent rise in cost of materials and labour. The scheme includes lowering the premises known as "Uplands" and "Summer Hill" to the level of the Graving Dock; this throws a new area of 8½ acres into harbour frontage. Work was started in November, 1918, and by the end of 1919 was about three-eighths completed.

All land has been acquired, including "Uplands," "Summer Hill," and "St. Thomas's College," as well as an ample area of land to provide for the new goods yard at Victoria Bridge road, the transfer sidings at Bloemendahl, and the necessary shunting yards at Urugodawatta.

The land through which the line passes, and on which the various yards are situated, is low-lying, necessitating a large quantity of filling. Up to November 30 139,483 cubic yards have been carried out. The south junction with the Main line is completed, signalled and interlocked, and opened for traffic.

Overbridges have been constructed or are in hand at Alutmawatta road, Tanque Salgadoe road, and Bloemendahl road, also the bridges carrying the new railway over the San Sebastian canal and the Hin-ela.

The work is being pushed forward as fast as circumstances will permit. The permanent way required is already in the Island. The total length of line and sidings is 9 miles 72½ chains, out of which length nearly three-quarters are sidings.

KOLONNAWA OIL BRANCH.

This branch leaves the Main line at Urugodawatta, and is about 1½ miles in length. The work was started in November, 1917, and is now completed, except for ballast and a few minor works. The branch at the junction with the Main line is fully signalled and interlocked. The only work of any note on this branch is a flood outlet, which is now finished.

Colombo, April 9, 1920

M. C. BOWEN, B.A.I., M.Inst.C.E.,  
Chief Construction Engineer, Railway Extensions.

VI.—RECRUITING OF STAFF FOR SERVICE IN MESOPOTAMIA, EAST AFRICA, &c.

DURING the year 1919 the recruiting of non-military personnel for service in Mesopotamia, East Africa, Egypt, and on the North-west Frontier was naturally considerably reduced owing to the cessation of the war. The number of men recruited during the year was 239, and since the commencement of this work in October, 1916, a total of 1,218 men have been recruited up to date, as follows :—

|  |    |    |    |       |
|--|----|----|----|-------|
| For service in Mesopotamia             | .. | .. | .. | 1,105 |
| For service in East Africa             | .. | .. | .. | 25    |
| For service in Egypt                   | .. | .. | .. | 11    |
| For service on the North-west Frontier | .. | .. | .. | 77    |
| Total                                  |    |    |    | 1,218 |

The numbers according to classes are as follows :—

|                                |    |     |                                  |    |     |
|--------------------------------|----|-----|----------------------------------|----|-----|
| Bricklayers and masons         | .. | 45  | Blacksmiths and boiler-makers    | .. | 45  |
| Carpenters                     | .. | 80  | Coppersmiths and tinsmiths       | .. | 21  |
| Engine and crane drivers       | .. | 75  | Railway guards and porters       | .. | 13  |
| Clerks and timekeepers         | .. | 132 | Chargemen                        | .. | 6   |
| Surveyors and draughtsmen      | .. | 11  | Electricians                     | .. | 5   |
| Fitters, turners, and moulders | .. | 236 | Firemen                          | .. | 32  |
| Overseers and supervisors, &c. | .. | 47  | Motor boat drivers and mechanics | .. | 246 |
| Motor lorry and car drivers    | .. | 77  | Marine ratings                   | .. | 140 |
| Machinists                     | .. | 7   |                                  |    |     |

Mr. H. K. Hillyer, O.B.E., Secretary, Colombo Rivercraft Committee, returned to the Island in June, 1919, and relieved Mr. C. W. Musgrave, the Accountant, who had been acting during his absence.

Colombo, March 31, 1920.

HERBERT K. HILLYER,  
Secretary, Colombo Rivercraft Committee.

VII.—STATEMENT SHOWING THE REVENUE OF THE COLOMBO PORT  
COMMISSION FOR THE FINANCIAL YEAR 1918-19.

# IMMIGRATION AND QUARANTINE.

## ADMINISTRATION REPORT OF THE CHAIRMAN, PLAGUE COMMITTEE, FOR 1919.

### MEMBERS.

The following were members of the Plague Committee during 1919:—The Principal Civil Medical Officer (the Hon. Dr. G. J. Rutherford, January to May 21 and from December 18 to 31; the Hon. Dr. E. L. Hunt, C.M.G., May 22 to September 22; the Hon. Dr. G. Thornton, September 22 to December 18); the Government Agent, Western Province (the Hon. Mr. J. G. Fraser, C.M.G.); the Chairman, Municipal Council (Mr. R. W. Byrde, January 1 to September 21; Mr. T. Reid, September 21 to December 31); the Master Attendant (Lieutenant-Commander C. E. Stainer, R.N.); the Chairman, Chamber of Commerce (Mr. J. Lochore, January to August; Mr. F. E. Mackwood, August to December); the Planting Representative (Mr. C. M. Gordon, January to October; Mr. Edgar Turner, October to December). The Plague Committee held eight meetings during the year.

### STAFF.

2. There were several changes during the year, for the most part the result of officers going on leave. The Hon. Mr. F. Bowes, C.M.G., the Chairman, went on leave in April, and was succeeded by Mr. R. N. Thaine. Mr. H. Gordon Cran, the Superintendent of the Mandapam Camp, who left the Island on war service in September, 1917, resigned his appointment in February, 1919, and was succeeded in August by Dr. V. van Langenberg, an officer of the Medical Department, who has had considerable experience of quarantine work both at Tuticorin and Colombo. Dr. D. Schokman, the Quarantine Medical Officer, who had been appointed to act for Mr. Gordon Cran, went on leave in August. Towards the end of the year the two Quarantine Medical Officers at Mandapam, Dr. T. K. Jayaram and Dr. C. D. Wickramasinghe, were succeeded by Dr. E. S. Godlieb and Dr. W. Samarasinghe. In the Port Surgeon's Department, Colombo, Dr. T. de Kretser was relieved in September by Dr. E. L. Christoffelsz.

### PLAGUE.

3. There was a slight increase in the number of plague cases in Colombo during the year. The only case detected outside Colombo was that of a man who died at Talaimannar whilst on his way from Colombo to India. In 1918, it may be remembered, there were 132 cases outside Colombo, of which 126 cases occurred at Nawalapitiya. A remarkable feature of the outbreak at Nawalapitiya is the fact that there was no recurrence of the disease after the town had been declared free. The further fact that it did not spread to the neighbouring villages also reflects much credit on the officers responsible for its suppression. As regards the incidence of plague in Colombo, Dr. W. Marshall Philip, the Medical Officer of Health, reports as follows:—

*Plague.*—87 cases of plague were recorded during the year, as against 70 during 1918, and an annual average of 224 during the five years 1914-18. The case mortality was 94·3 per cent., which is slightly lower than in 1917 and 1918, but is still very high. There were 50 cases of septicæmic plague, all of which proved fatal; while of 37 cases of the bubonic type, 5 recovered.

During the first seven months of the year only 4 cases occurred, this being much the lowest number recorded for that period of the year since plague appeared. No case occurred during the four months April to July. Two cases occurred in August, 5 in September, 18 in October, 34 in November, and 24 in December. The incidence of rat plague coincided closely with that of human plague as regards both time and place. The great majority of the cases occurred, as usual, amongst young adults, many more males being attacked than females. The disease was as hitherto confined almost entirely to the poorer and more insanitary tenement areas of the town, the principal centres being the Pettah, where the cases were more or less scattered, Kochchikade, and Pickering's road, where the cases were bunched in small areas.

Rat plague was distributed fairly evenly over the areas where the human cases occurred. 108,338 rats were trapped during the year, and 21,739 were examined in the Municipal Bacteriological Laboratory, 66 or 0·30 per cent. being found to be plague-infected. The bodies of 6,794 rats which were killed in known infected areas by the Clayton fumigator were found and examined bacteriologically, 27 or 0·4 per cent. of these being plague infected.

The same preventive measures as hitherto were carried out, reliance being placed chiefly upon isolation of patients in hospital, segregation of contacts, closure and improvement of insanitary dwellings, pestering of the floors of infected houses, fumigation of rat holes by means of Clayton machines, trapping and poisoning of rats, and filling up of all rat holes with cement after fumigation.

The annexed statements show the chief statistical features for the six years since plague appeared here:—

|                                | <i>Plague.</i> |       |       |       |       |       |
|--------------------------------|----------------|-------|-------|-------|-------|-------|
|                                | 1914.          | 1915. | 1916. | 1917. | 1918. | 1919. |
| Total cases                    | 413            | 139   | 291   | 207   | 70    | 87    |
| Total deaths                   | 381            | 128   | 273   | 196   | 69    | 82    |
| Septicæmic cases               | 247*           | 81*   | 159   | 124   | 41    | 50    |
| Septicæmic deaths              | 246            | 80    | 159   | 124   | 41    | 50    |
| Bubonic cases                  | 166            | 58    | 132   | 83    | 29    | 37    |
| Bubonic deaths                 | 135            | 48    | 114   | 72    | 28    | 32    |
| Total case mortality per cent. | 92·2           | 92·8  | 93·8  | 94·7  | 98·6  | 94·3  |
| Septicæmic mortality per cent. | 99·6           | 98·7  | 100·0 | 100·0 | 100·0 | 100·0 |
| Bubonic mortality per cent.    | 81·3           | 82·7  | 86·4  | 86·7  | 96·6  | 86·5  |

\* The cases for 1914 and 1915 each include one septicæmic recovery, but the diagnosis was not in either case confirmed bacteriologically, and may have been erroneous.

Annual average for the five years 1914 to 1918 = 224.

## CHOLERA.

4. Two serious outbreaks of cholera occurred during the year: one in July at Hambantota and Tissa, which resulted in 348 deaths out of 447 cases; and the other in October in the Province of Uva, which up to the end of the year had resulted in 120 deaths out of 170 persons attacked. The origin of the outbreak in Hambantota was never definitely traced. It is surmised, however, that the disease was introduced from a cholera carrier who had recovered from an attack. As regards the outbreak in the Province of Uva, the disease was probably introduced from the Hambantota District.

5. The occurrence of these outbreaks serves to emphasize the vital importance to this Island of the quarantine measures which are enforced to prevent the introduction of these fatal diseases. During the year there were 31 cases of cholera in the Mandapam Camp. In one outbreak amongst estate labourers in June the disease was of such a virulent type that the Medical authorities of the camp came to the conclusion that some of the gang were cholera carriers, and decided to send back the rest of them to their villages in India. It is not difficult to imagine the widespread danger to the population of this Island had no system of quarantine existed. It has to be admitted, however, that a few persons developed cholera after undergoing the full period of quarantine, but such cases are very exceptional, and when it is borne in mind that during 1919 there were only 4 such cases out of the total immigrant population of 165,555, there is no cause for alarm as to the efficiency of the present quarantine measures.

## SMALLPOX.

6. There were 35 cases of smallpox during the year; of these, 19 cases were imported.

## QUARANTINE CAMPS.

7. Three quarantine camps have been established for the protection of this Island from such diseases as plague, smallpox, and cholera. These camps are situated at Tataparai and Mandapam in South India, and at Ragama, a few miles from Colombo. There can be no question that the comparative immunity of Ceylon from these dangerous diseases is to a large extent attributable to the system of quarantine enforced at these camps. After the opening of the South Indian Railway connection with Ceylon *via* Talaimannar immigration was naturally diverted to the Mandapam route, and a question has been raised as to the further necessity or utility of the camp at Tataparai. It is, however, impracticable to consider the question of closing this camp. Not only do a comparatively large number of people, who are employed in the harbour and large industrial works in Colombo, still make use of this route, which is more convenient and less expensive to those coming from the Tinnevely District, but it is essential to have a reserve camp in India to meet any possible breakdown in the Mandapam Camp. Estate labourers, however, do not now pass through the Tataparai Camp; all labourers destined for estates are quarantined at Mandapam, where better facilities and a better organization exist for dealing with this very large class of immigrants. For similar reason, it is essential to maintain the Ragama Camp, which might also be required for the quarantining of estate labourers if any breakdown occurred at Mandapam, and can at very short notice be made available in the event of any serious outbreak of disease on ships in the port.

## TATAPARAI CAMP.

8. This camp is situated about 7 miles from Tuticorin, and is in charge of Dr. K. Eapen, Assistant Superintendent of Immigration. Before the opening of the South Indian Railway route to Ceylon, this camp was used as a forwarding dépôt for estate labourers, who, after undergoing registration and preliminary inspection, were despatched every day to Ragama Camp. After the diversion of estate labour to Mandapam, this camp has continued to be used as a quarantine station for ordinary passengers. The report of Dr. K. Eapen on the working of this camp during the year under review is given in Appendix A.

## RAGAMA CAMP.

9. Ragama Camp, which is about 7 miles from Colombo, is under the administration of the Government Agent, Western Province. No use was made during the year of this camp.

## MANDAPAM CAMP.

10. This camp was put to a very severe test this year by the abnormal increase of immigration, which lasted from April to the end of July. During each of the previous two years (the permanent camp had been opened in 1917), owing to the war and the restrictions on emigration, the number of immigrants did not much exceed 45,000. The removal of these restrictions, coupled with the food shortage prevailing in India, happened to coincide with the commencement of the busy recruiting season. The numbers rose from a previous average of 4,000 a month to 11,000 in April and 21,000 in May and in June. The result was that the quarantine accommodation was severely taxed. The occurrence of cholera at this critical period, and the fact that only one steamer was running between Dhanushkodi and Talaimannar, added considerably to the difficulties of the situation. As soon as it was realized that the accommodation might not prove sufficient if the increase continued, steps were taken to construct as temporary buildings ten quarantine wards and eight segregation wards. Thanks to the promptness with which the South Indian Railway consented to run an additional steamer whenever required, a very difficult situation was safely

passed. However, the experience gained has shown the necessity of increasing the permanent accommodation, and Government subsequently sanctioned funds for the construction of five additional permanent wards and eight segregation camps. These wards are now in course of construction, and should prove sufficient to meet all future demands on the camp.

11. Another difficulty which, in view of the exceptional number of persons undergoing quarantine, gave constant anxiety was the question of the water supply. The two previous north-east monsoons had been comparative failures, and in consequence the water supply was not abundant. Fortunately, however, the scheme for flushing certain buildings with sea water had just been completed, and by the exercise of very strict economy, it became possible to meet all demands during the driest months of the year. The question of increasing and improving the water supply is now receiving careful attention, and when certain schemes which are enumerated in paragraph 3 of the Superintendent's report have been investigated, the water supply should prove sufficient to meet all demands throughout the year. As regards the coming year (1920), the fact may be mentioned that, owing to the exceptionally heavy rainfall at the end of 1919, there is an ample supply of water, and that it is unlikely the experience of 1919 will be repeated.

12. The work of construction in the camp is not yet completed. It has been found necessary to provide increased accommodation, not only for persons undergoing quarantine, but also for the various administrative staffs. The most important works for which, it is hoped, funds will be provided next year are :—

- (a) Extension of hospital and erection of nurses' quarters.
- (b) Enlargement of Hindu kitchen and connected buildings.
- (c) A spare boiler for the Hindu kitchen.
- (d) Increased accommodation for the administrative and feeding contractors' staffs.
- (e) Railway siding at Mandapam Camp station.
- (f) Camp school and reading room.

13. The installation of electric light, which had been delayed owing to the difficulty of obtaining materials during the war, is now receiving attention. The power station has already been erected, and when it is in full working order, the working of the camp will be more economical and satisfactory. It is hoped that the power station will be working before the middle of 1920.

14. The report of the Superintendent, with full details of the administration of the camp during the year under review, is given in Appendix B.

#### GRANARIES.

15. The Chalmers Granaries, which were originally designed to provide permanent accommodation for the storage of rice separate from human dwellings with a view to preventing the dissemination of plague, proved to be of incalculable service when the establishment of food control became necessary. The existence of the Granaries undoubtedly facilitated the work of food control, both in controlling the price of rice and in its distribution to the various centres in the Island. During the early part of the year, in anticipation of the possibility of food control, a small office was built at a cost of Rs. 1,700. The general maintenance of these buildings during the year cost Rs. 3,978.57.

#### MANNING RICE MARKET.

16. Steady progress was made during the year in the construction of these markets, which are intended for the large retail rice trade. The full scheme comprises fifty-nine markets of various sizes and fifteen reserve godowns. At the beginning of the year thirty-one markets were completed and allotted to the large retail merchants. The remaining markets have been completed, but until the present system of rice control is removed or modified, it is not practicable to make any further allotment. At present rice is distributed in Colombo at Municipal depôts situated in various parts of the city, with the result that the trade of the large retail merchants is practically suspended. It is to be hoped that with the completion of these markets steps will be taken to prohibit entirely the storage of rice in the Pettah as soon as the rice control is removed. The persistence of plague in the Pettah area emphasizes the importance of storing rice in a locality apart from human dwellings. The total capacity of these markets is approximately 230,000 bags, whilst the Chalmers Granaries are estimated to be capable of holding 650,000 bags.

17. The report of the Port Surgeon with regard to the work of his Department in the Colombo Harbour is given in Appendix C.

March 1, 1920.

R. N. THAINE,  
Acting Chairman, Plague Committee.

#### APPENDIX.

##### A.—REPORT ON THE TATAPARAI IMMIGRATION AND QUARANTINE DEPÔT FOR 1919.

THE number passing through the camp during 1919 was in excess of the previous year by 1,128. In March the restrictions imposed on emigration by the Indian authorities were removed, and there was a marked increase in the numbers for the months of May and June. But there was a setback from July onwards, due to the acute scarcity of rice in Ceylon. This acted as a deterrent to many from crossing over. The close of the year showed some improvement. The numbers for July and December were 932 and 1,670, respectively. During the former month several that had registered themselves at the camp returned to their homes. But for this untoward circumstance, the numbers would have gone on increasing month by month, and the total for the year would have been anything between twenty-seven and thirty thousand. For Tinnevely, Travancore, and portions of the Madura district the steamer passage continues to be more convenient and cheaper than the Indo-Ceylon Railway.

**Immigration.**—The total number that passed through the camp during 1919 was 21,815 compared with 20,687 of 1918. With the return to normal conditions and the resumption of the daily steamer service, which may be expected at an early date now that the war is over, there is every probability that the numbers will increase. Of those that passed through, the majority were petty traders and miscellaneous passengers, with a fair amount of harbour and other Colombo coolies. The number of lascars that were passed on to join their steamers in Colombo was 119. Estate coolies still continue to go *via* Mandapam. The rejections were twenty in number, viz. :—

|                                 |    |    |    |    |
|---------------------------------|----|----|----|----|
| For insanity                    | .. | .. | .. | 3  |
| For leprosy in various stages   | .. | .. | .. | 16 |
| For advanced state of pregnancy | .. | .. | .. | 1  |

**Expenditure.**—The total expenditure for the year was Rs. 19,406·08, as compared with Rs. 17,687·29 of the previous year, being an increase of Rs. 1,718·79. Every possible economy was effected. But owing to the high price of almost every article and cost of labour the increase was unavoidable.

**Buildings** were all maintained in a good state of repair.

**Water Supply.**—The water supply is the most troublesome item in the working of the camp. The railway well at Tataparai and S. P. G. Mission well at Puthiamputhur, about three miles distant from the camp, continued to be the sources of supply. The latter is situated in the church compound, and is under the direct supervision of the clergyman in charge.

**Feeding.**—The feeding was carried on as in previous years. Both raw and cooked provisions are inspected by me every day. A Muhammadan kitchen is maintained for the use of the better class of people.

**Changes in the Staff.**—There were no changes in the staff. I must express my appreciation of the very satisfactory way that Mr. Ephraim, the Head Clerk, and Mr. Doraiyappah, the Registration Clerk, and the rest of the staff carried on their duties. The former two have, in addition to their own duties, discharged those of the overseer's and apothecary's, respectively. Both these posts were abolished in 1917, when restrictions on emigration under the Defence of India Act came into force.

#### MEDICAL REPORT OF THE TATAPARAI CAMP.

The health and sanitary conditions of the camp continued to be satisfactory. During the course of the whole year there was only one case of cholera, which, however, proved fatal. The patient came from Travancore, in which State, as well as the districts of Tinnevely, Madura, and Ramnad, cholera continued to prevail in an epidemic form throughout the year. During the last two months of the year the outbreak was very serious. There were no cases of smallpox, measles, or chickenpox.

**Vaccination.**—The total number vaccinated was 17,739 out of 21,815. Only those showing evidence of recent vaccination or those who had previously suffered from smallpox were exempted. Regular supplies of lymph from the Vaccine Institute at Colombo were received.

**Disinfection.**—The Manlove-Alliot high pressure disinfector worked satisfactorily. The boiler was examined and passed fit by the Madras Government Inspector of Boilers in November.

**Rainfall.**—The total rainfall for the year was 20·54 inches compared with 33·57 inches of 1918 and 33·74 inches of 1917.

#### QUARANTINE WORK AT TUTICORIN.

Owing to an outbreak of cholera at Tuticorin towards the end of 1918 the port remained closed till January 20. The town becoming free the port was re-opened, and as it continued to be practically free, except for isolated and imported cases, it was not found necessary to take any drastic action. The total number of attacks of cholera reported by the Municipality for the year was 32, with 21 deaths. That of smallpox was 33, with 8 deaths, cases of which continued to crop up all through the year.

The luggage of local passengers continued to be disinfected at the Madras Government disinfection shed on the foreshore under the direction of the Port Health Officer, Dr. Thomas.

Tataparai, January 20, 1920.

K. EAPEN,  
Assistant Superintendent of Immigration, Tuticorin.

#### Annexures.

Return showing Districts from which other than Estate Labourers arrived *en route* to Ceylon *via* Tuticorin during the Year 1919.

B.—REPORT OF THE SUPERINTENDENT, MANDAPAM CAMP, FOR 1919.

The total number of immigrants passed to Ceylon during the year 1919 is as follows :—

|                             |                |
|-----------------------------|----------------|
| Estate labourers ..         | 112,195        |
| Miscellaneous passengers .. | 53,360         |
| <b>Total ..</b>             | <b>165,555</b> |

No comparison with last year is possible, as the year under review constitutes a record, in that during the three months May, June, and July 59,247 estate labourers passed through the camp, as against 41,431 during the whole of the previous year. This enormous increase may be accounted for partly by the withdrawal of the restrictions on recruiting by the Madras Government, and partly to the dearth of foodstuffs prevailing at the time. The total number returned from Ceylon was 108,362.

2. All buildings and roads in the camp were maintained in a satisfactory condition. The following additions and improvements since 1918 have to be recorded :—

- (a) Construction of quarters for Public Works Department clerks and menials almost completed.
- (b) Cholera hospital completed, but awaiting construction of quarters for the attendants (male and female), which have been sanctioned, but have not yet been taken in hand owing to the difficulty of obtaining building materials.
- (c) Minor improvements to the Superintendent's bungalow and the quarters of the subordinate staff.
- (d) Erection of three temporary cooly wards and six sheds in segregation wards to meet the large number passing through the camp during the months of May, June, and July.

Government sanction has been obtained for the erection of five permanent cooly wards, with latrine accommodation, and eight segregation wards. When these are completed, which, it is hoped, will be before the next busy season, the temporary wards will disappear, and the increased accommodation should be sufficient to meet the demands of the camp for a considerable time. Five extra permanent latrines have also been sanctioned, and will serve as a "stand by" in case of necessity.

*Works under Consideration and waiting the Sanction of Government.*

A.—Major.

- (1) Extension of general hospital: two observation wards, two wards for measles, and two wards for chickenpox.
- (2) Building of quarters for nurses.
- (3) Improvement to the Hindu kitchen.
- (4) Increased accommodation for feeding contractors' clerks and menials.
- (5) Increased accommodation for camp clerks and sweepers.
- (6) Camp school with reading room attached.
- (7) Cement platforms with proper drains for menials' quarters.
- (8) Extension of seating accommodation in latrines in the cooly wards and provision of bathing troughs.

B.—Minor Improvements and Extensions to Buildings and Roads.

- (1) Building of latrine accommodation for attendants' quarters of present smallpox hospital.
- (2) Extension of registration office.
- (3) Signboards of various roads and buildings in camp.
- (4) Removal of mosquito-proof gauze from all buildings and substituting venetians.

3. *Water Supply.*—The fresh-water supply, except for its slight brackishness, is of fair quality, but the quantity has, as usual, fallen short at the time when it was most needed, namely, during the hot season, from April to July, when the numbers passing through the camp are at their highest, and this in spite of the fact that the strictest economy is exercised in the distribution of water throughout the year.

Proposals are before the Government for the improvement of the water supply, and it is hoped that this question, which is of vital importance to the health of the camp, will be decided in the near future. The following are among the schemes under consideration :—

- (1) Extension of the present water area.
- (2) Tapping of a new area on the eastern side of the camp.
- (3) Collection and storage of rain water.
- (4) The use of salt water for the flushing of all latrines in the camp, thereby saving a large quantity of water from the reservoir which is now used for this purpose.
- (5) The fitting up of pumps to the wells in the cooly and passenger wards, and the use of the water from them for bathing and washing purposes only.

4. *Sewage Disposal.*—The water-carriage system has been working satisfactorily. The main outlet of the sewage tank is now satisfactory, although there are occasional complaints from the residents near the foreshore of bad smells emanating from it, chiefly during the south-west monsoon. The small sewage tank which serves the segregation ward does not work satisfactorily, the outlet being continually blocked up with sand thrown up by the sea. This question has been gone into, and it is hoped that an improvement will be effected by the proposal to carry a pipe out to sea.

5. *Sanitation.*—The sanitary arrangements of the camp, although satisfactory and always favourably commented upon, are still open to improvement. The sanitary staff at present consists of two overseers with maistries, latrine coolies, and sweepers. Their work has been satisfactory, but taking into consideration the large area of the camp, it has been found necessary to recommend that the supervisory sanitary staff should be increased by the appointment of a Sanitary Inspector. He will exercise control over the large staff of latrine coolies and sweepers, and will be responsible for the disinfection of buildings and the arrangements for the disposal of rubbish, proposals for the improvement of which are now under consideration.

6. *Lighting.*—No progress has been made during the year owing to the difficulty of obtaining materials. It is hoped, however, that a start will be made early next year, and that the lighting up of the camp with electric light will soon be an accomplished fact.

7. *Feeding.*—Messrs. Spencer & Co. continue to be the contractors, and the food supplied by them has, on the whole, been satisfactory. Complaints are, of course, received from time to time, and are always fully inquired into and, if possible, remedied. Frequent inspections are made during the time of feeding in the cooly and passenger wards by myself and the medical officers. Raw provisions are also inspected.

8. *Rainfall.*—The total rainfall for the year was 47·74 inches, exceeding that of last year by over 15 inches. Heavy rain was experienced during the last three days of the year, causing breaches on the South Indian Railway between Dhanushkodi and Rameswaram and on the Ceylon side near Anuradhapura. In consequence coolies and passengers were held up in the camp for over three days, and the arrivals of the 25th, 26th, 27th, 28th, and 29th were despatched together on January 4. Appended below is a statement showing the rainfall for the four quarters of 1919 :—

|                        | Inches. |
|------------------------|---------|
| First Quarter .. .. .  | 0·84    |
| Second Quarter .. .. . | 3·03    |
| Third Quarter .. .. .  | 2·26    |
| Fourth Quarter .. .. . | 41·61   |
| Total ..               | 47·74   |

9. *Claimed and Refused Cases.*—1,708 cases were dealt with during the year, as compared with 284 cases in 1918. All coolies claimed or who refused to proceed to the estates were handed over in the majority of cases to the Assistant Ceylon Labour Commissioner, Mandapam, to be sent back to their village.

10. *Steamer Crews.*—3,007 lascars from Calcutta and Bombay were passed during the year, after disinfection and vaccination, to join their steamers in Colombo.

11. *Coolies for Irrigation Works (Ceylon Government).*—Twenty-one coolies for Karaichehi irrigation works (Iranaimadu) were passed on December 19, 1919. They were recruited by the Ceylon Labour Commissioner, and after full quarantine were passed on to Ceylon on railway warrants supplied by the Divisional Irrigation Engineer.

12. *Visitors.*—The following visitors inspected the camp during the year. A few extracts from their reports are appended below :—

*From Ceylon.*

The Chairman, Plague Committee.  
The Principal Civil Medical Officer.  
The Director of Public Works.  
The Chairman, Planters' Association of Ceylon.  
The Government Agent, Northern Province.  
The Assistant Government Agent, Mannar.  
The Provincial Engineer, Northern Province.  
The Government Analyst.  
The Electrical Engineer.  
The Hon. Mr. O. C. Tillekeratne, M.L.C.

*From India.*

The Collector of Ramnad District.  
The Superintendent of Police, Ramnad.  
The District Medical and Sanitary Officer, Ramnad.  
The Revenue Divisional Officer, Ramnad.  
The Ceylon Labour Commissioner.

Intimation has been received that His Excellency the Governor proposes to visit the camp early next year.

13. *General: (a) School.*—The Mandapam Camp School continues to serve a useful purpose. It was inspected and favourably reported upon by the Madras Government Inspector and received a grant of Rs. 72. The total number of pupils on the register at the end of the year was 60 :—

|                 |    |    |    |    |    |
|-----------------|----|----|----|----|----|
| First Standard  | .. | .. | .. | .. | 18 |
| Second Standard | .. | .. | .. | .. | 14 |
| Third Standard  | .. | .. | .. | .. | 13 |
| Fourth Standard | .. | .. | .. | .. | 15 |
| Total ..        |    |    |    |    | 60 |

The amount received in fees during the year was Rs. 181.51, which was credited to revenue. A permanent building for the use of the school is under consideration.

(b) *Reading Room and Library.*—This institution is popular, and all the departments of the camp are well represented on its roll of members. It is at present located in a room in the disinfecting station, which is too small for its present needs, and for obvious reasons undesirable. It is hoped that the Government will see its way to provide a suitable building for the use of this institution, which is deserving of every encouragement.

(c) *Sports Club.*—The Sports Club provides two tennis courts and a golf course of nine holes for the use of its members. I beg to take this opportunity of thanking the Government for its generous donation of nine iron tanks for the use of the Golf Club.

(d) *Planting.*—*Casuarina* plants have been planted about the camp, but it is too early yet to say whether they will turn out a success.

(e) *Cattle.*—All owners of cattle are registered, and are required to put up cattle sheds on an approved plan. The latter are frequently inspected to ensure their being maintained in a satisfactory sanitary condition.

(f) *Stray Cattle* from outside the camp are a continual source of annoyance, causing as they do considerable damage to the young growing trees. Sanction has been obtained from the Collector of Ramnad for the erection of a pound in the camp, and it is hoped that this will at least act as a deterrent.

(g) *Benevolent Fund.*—Seventeen stranded Ceylonese were passed through during the year at the expense of the fund at a cost of Rs. 29.36. The balance of the fund on December 31, 1919, was Rs. 67.34.

#### MEDICAL REPORT.

14. *Hospital.*—The hospital accommodation provided in the camp consists of—

(a) General hospital of twenty beds (twelve male and eight females).

(b) Smallpox hospital.

(c) Cholera hospital, at present temporary, but shortly to be replaced by a permanent structure.

The accommodation was sufficient, and there was no overcrowding to speak of. A surgical ward and a maternity ward are badly needed, and if the extensions to the general hospital are sanctioned, it is proposed to convert the present observation wards into surgical and maternity wards.

15. *Infectious Diseases: (a) Plague.*—No cases of plague occurred in camp during the year under review.

(b) *Cholera.*—There was an outbreak of cholera in the month of May, and it extended into the months of June and July. There were 31 cases, with 29 deaths: 27 cases among estate coolies, 1 miscellaneous passenger, and 3 in the camp staff. In this connection the Medical Department of the camp deemed it necessary to send back the contacts to their villages on the ground that they were cholera carriers, and that, in the interest of the Colony and the estates, it was safer they should return to an endemic area rather than be allowed to proceed to an area which was non-infected.

(c) *Smallpox.*—There were 26 cases of smallpox, with 1 death: 25 among estate coolies and 1 among miscellaneous passengers. All made a good recovery, except 1 case, which was of a virulent type.

(d) *Influenza.*—There was an epidemic of influenza, which was general throughout India. It attained its height of virulence in the month of June, July, August, October, and November. There were 108 cases of influenza uncomplicated and 110 cases complicated with pneumonia admitted into hospital; among these there were 64 deaths, all due to pneumonia. At the Outdoor Department 685 cases were treated, the grand total due to influenza being 795.

(e) *Chickenpox.*—26 cases of chickenpox occurred: 22 among estate coolies and 4 among passengers. There were no deaths.

(f) Fifteen cases of measles and 6 cases of mumps occurred, all of which recovered under treatment.

(g) *General Diseases.*—In the Out-patient Department the largest number seeking treatment was for scabies, ulcers, diseases of the eye, digestive troubles, such as indigestion, constipation, and diarrhoea. There was a large number of cases of influenza treated, totalling 685. The total number treated outdoor was 13,189.

16. *Mortality.*—The number of deaths for the year was 115. Influenzal pneumonia claimed 64, cholera 29, convulsions in children the remainder. Taking into consideration the number in camp and all other circumstances, the death-rate may be considered favourable.

17. *Births.*—There were 28 births during the year: 8 among the estate labourers and 20 among the camp staff.

18. *Vaccination.*—The total number vaccinated during the year was 111,910, comprising 27,111 miscellaneous passengers and 84,799 estate labourers. This was carried out regularly under direct supervision, and in no instance was any objection raised to the operation. The supply of lymph was regular and of good quality.

19. *Disinfection.*—This was carried out without any interruption throughout the year.

20. *Rejected Coolies.*—262 coolies and 12 passengers were medically rejected. The largest number of rejections was made owing to general debility, and the next in importance being those rejected for leprosy. The anæsthetic type of the disease was found in the majority of the cases.

21. *General.*—A re-arrangement of the Medical Department has been effected, which has already, I venture to think, shown itself in better working and greater efficiency. The Senior Medical Officer is now solely responsible for the administration of the Department, subject, of course, to my supervision and advice, and the duties of the subordinate staff have been more clearly defined. Efforts are being made to train the hospital attendants and instil into them a sense of their responsibilities, but they are ignorant and illiterate, and I doubt if much good will result in this direction. What is sadly and badly needed are two nurses, one of whom should be a trained midwife, and I think this fact is now recognized. I am glad to be able to report that there is every likelihood of these appointments being made when quarters are available.

22. *Staff.*—I assumed duties as Superintendent on August 12, relieving Dr. D. Schokman, who had been acting. In December Dr. Godlieb succeeded Dr. Jayaram as Senior Medical Officer, and Dr. Samarasinghe took the place of Dr. Wickramasinghe. I would like to record the good work done by the whole staff during the year. The work was particularly heavy, and it was carried out in a loyal, whole-hearted, and conscientious manner. The retirement of Mr. B. Paranjothy, Shroff of this Department, has to be recorded. He was a loyal servant of the Government, whom he served for forty-five years in various capacities, holding at one time the position of Assistant Superintendent of Immigration, Paumben.

January 22, 1920.

V. VAN LANGENBERG,  
Superintendent, Mandapam Camp.

#### *Annexures.*

##### *I.—Extracts from Visitors' Book.*

I visited the camp this morning and was shown round by Dr. Schokman. The camp was in excellent order. The food appeared to me to be ample and of excellent quality, and there were no complaints.

Augmentation of water supply is, I understand, in hand, as also extra quarantine accommodation. It was most satisfactory to see a camp so well conducted, more especially as the numbers have been abnormally large passing through of late.

July 8, 1919.

H. SCOBLE NICHOLSON,  
Ceylon Labour Commissioner.

1. T. Y. Wright.
  2. Chairman, Planters' Association of Ceylon.
  3. Morning of September 1, 1919.
  4. For the last four days the average number in camp has been about 3,000 per day.
  5. (a) The water supply during certain months of the year seems deficient, and at present it is only at the rate of 17 gallons per head. The average number in camp is usually, I understand, nearer 4,000 than 3,000, and about 30 gallons per head required. There are one or two proposals in view for increasing the supply, the best one appears to be the one of duplicating the supply by sinking wells on the east side of the camp and supplying the passenger half of the camp from here, while the present western installation will continue to serve the cooly huts. A new well is being sunk on the western side at present, but this will not make up the deficiency. A saving of drinking water would also be effected if all latrines in camp were flushed with sea water. At present this is only connected to the cooly wards.
  - (b) The food we saw being issued was of very good quality, and there seemed to be plenty of it, and it was very well served.
  - (c) The kitchens were very nice and clean, and all utensils were well kept and in order.
  - (d) There were so many coolies coming through a few months ago that some overcrowding took place. To be on the safe side the suggestions of increasing the number of permanent segregation wards and cooly wards should be carried out as soon as possible.
  - (e) The sanitary condition of the camp seemed to be in excellent order.
  6. Colonel van Langenberg.
  7. Dr. C. D. Wickramasinghe was on duty at the general hospital.
  8. It is proposed to erect a new reading room; this is required, the present one adjoins the disinfecting room. A nurse would, I think, be better for the hospital than the female attendant, who looks after the patients at present, and suitable quarters will have to be built if it is decided to engage one. Some alterations are going to be made at the hospital as regards buildings, &c. The present observation wards are rather close, and some wards are required for cases of milder infectious diseases.
- I think every effort should be made to improve the growth of the shrubs and trees in camp.  
The railway at present in the camp might be made more use of.  
We are much indebted to Colonel van Langenberg for so kindly showing us round the camp, which was well managed in every way.

I have on several occasions visited Mandapam Camp and inspected the arrangements. It has been a continual source of astonishment that so many thousands of passengers can be accommodated in any locality in India, and leave so few disagreeable traces of their passage behind them. The sanitation seems perfect, and every arrangement possible for the health and comfort of detainees has been made.

E. B. LOVELUCK,  
District Superintendent of Police,  
Ramnad, at Madura.

## II.—Statement of Estate Coolies and Miscellaneous Passengers who passed through Mandapam Camp to Ceylon during the Year 1919.

| Month.       | Estate Coolies. |        |           |          |         | Miscellaneous Passengers. |        |           |          |        | Grand Total. |

## C.—REPORT OF THE PORT SURGEON, COLOMBO, FOR THE YEAR 1919.

DURING the year under review 2,791 British and foreign steamers and 316 native sailing craft called at this port and were, as usual, inspected and dealt with. During the previous year there were 1,661 ships and 406 sailing craft.

2. In granting pratique the precautions initiated at the outbreak of plague in Colombo in 1914 were continued. There were 31 vessels placed in strict quarantine during the year, against 5 in 1918 and 8 in 1917. The details and ports of origin of the 31 vessels referred to are as follows :—

|            | Influenza. | Smallpox. | Plague. | Cholera. | Spotted Fever. | Total. |
|------------|------------|-----------|---------|----------|----------------|--------|

| Port Said  | ..         | 3         | ..      | ..       | ..             | 3      |
| Chittagong | ..         | 1         | ..      | ..       | ..             | 1      |
| Total      | 2          | 18        | 6       | 4        | 1              | 31     |

*Smallpox* cases occurred on board the following ships, viz. :—"City of London," "War Mastiff," "Chupra," "Port Sydney," "Eurypides," "Clan MacIntyre," "Karva," "Khyber," "Karoo," "Gujarat," "War Armour," "Swazi," "Jehangir," "Clan Matheson," "Lycaon," "Obra," "City of Canton," and "Scharnhorst."

*Plague* occurred on board the ss. "Kentucky," "Kashmir," "Chanda," "Sphinx," and "Celebes Maru."

*Cholera* occurred on board the ss. "Novara," "Chupra," "Chyebassa," and "Trewidden."

*Spotted Fever* occurred on the ss. "Port Hocking."

*Measles*.—Thirty-four cases were inspected on board; of these, 33 cases were well isolated on board ships carrying surgeons, and one case only sent to hospital.

*Chickenpox*.—Nine cases occurred on board vessels; and of these, 8 were well isolated by the surgeons of the ships, and one sent to hospital.

*Influenza*.—Twenty-four cases occurred on board the ss. "Osterley" and on board the R. I. M. S. "Northbrook"; both vessels worked in quarantine.

## Disinfecting and Vaccination Station.

## (a) Disinfection.

|               |    |        |              |    |        |
|---------------|----|--------|--------------|----|--------|
| Passengers    | .. | 45,971 | Coal coolies | .. | 43,801 |
| Cargo coolies | .. | 47,946 | Tally clerks | .. | 2,999  |

## (b) Vaccination.

Twenty-five persons only were vaccinated during the year.

*Fumigation*.—Cargo lighters were regularly fumigated, and rat destruction has been systematically carried out during the year; several ships from infected ports were fumigated before going into dock.

*Water Boats*.—The tanks of these boats were periodically cleaned and disinfected, and certificates issued by the Port Surgeon after inspection.

*Mental Unsoundness*.—One case was landed from each of the ss. "Karafola," "Lady McCallum," and "Clan Macdonald," with the necessary guarantee, and produced before the District Court.

*Revenue*.—2,227 bills of health were issued during the year, and the amount realized was Rs. 12,264. The amount realized from the disinfection of soiled linen was Rs. 745.04.

*Change of Staff*.—Dr. T. de Kretser, who has done good work as Assistant Port Surgeon, was relieved in September last by Dr. E. L. Christoffels, who returned to the Island after war service.

*Breach of Plague Regulations*.—There have been 361 prosecutions in the Joint Police Court, Colombo.

Annexed is a table showing arrivals of steamers and native craft and the usual statistics.

Port Surgeon's Office,  
Colombo, January 21, 1920.

G. A. RODE,  
Port Surgeon.

### THE BOOKWORK DEPARTMENT.

During 1919 a total of 22,089 pages of bookwork of different sizes were printed, as compared with 17,101 in 1918. Converted to a common size of foolscap folio, the comparison is: for 1918, 14,399 pages; for 1919, 17,601 pages, an increase of about 22 per cent. over the previous year, and a decrease of about 30½ per cent. on the outturn (25,276 pages) the year before the war.

Of the *Gazette*, 87 numbers, comprising 7,976 pages, were issued, equivalent to 92 pages per issue or 153 pages per week, the number of copies struck off ranging from 686 to 772 per issue. The sales amounted to Rs. 5,650, and payments for advertisements to Rs. 30,424, of which Rs. 6,748 was for *Fiscals' Sales notices*.

51 issues of the "Hue and Cry," or *Police Gazette*, comprising 762 pages, were published, the weight of copies despatched amounting to nearly 3½ tons.

Of "The New Law Reports," 416 pages were printed, Rs. 3,494 being realized by sales to the 111 subscribers, &c. 123 Officials were supplied with copies.

The Civil List (330 pages) was published on March 14, 1919, and the Post Office Guide for 1919 (188 pages) on April 30, 1919.

The Blue Book for 1918 (388 pages) was published on July 17, 1919. The reduction in the numbers of pages is due to the omission of three items from the volume, viz., "Legislation," "Civil Establishments," and "Officers who have given Security for the due Discharge of their Duties," which together made up 544 pages.

The volume of Administration Reports for 1918 (606 pages, against 940 pages in 1914) was issued on December 9, 1919.

Of school books, 85,067 readers, &c., varying in size from 34 to 104 pages and in price from 8 cents to 60 cents per copy, were printed and bound.

For the Land Settlement Department 1,278 pages of final settlement reports were dealt with, and 1,135 preliminary and final notifications prepared and published in the *Gazette*, for which 2,095 maps were engraved on metal.

The following statement shows the work of the Bookwork Branch for 1918 and 1919 :—

| Year.   | Pages of various sizes printed. | Equivalent in Foolscap Folio. | Cost of Composition alone.<br>Rs. | Total Cost.<br>Rs. |
|---------|---------------------------------|-------------------------------|-----------------------------------|--------------------|
| 1918 .. | 17,101                          | 14,399                        | 52,159                            | 111,386            |
| 1919 .. | 22,089                          | 17,601                        | 70,833                            | 129,851            |

During the past year 503 examination papers, in English, Sinhalese, and Tamil, were confidentially dealt with—the number of copies struck off ranging from 12 to 725 per paper—at an approximate cost of Rs. 1,290.

#### THE JOBWORK DEPARTMENT.

In 1919 the number of printed forms despatched amounted to 48½ million, against 76½ million in 1913, showing a reduction of about 37 per cent. on the outturn before the war. In 1913 the paper for the 76½ million forms cost Rs. 68,454, whereas the paper for the 48½ million forms in 1919 cost Rs. 156,612.

In line-ruling over 4½ million forms, involving 9½ million rulings, were dealt with; while the perforations made (5 or 6 sheets being treated at each perforation) totalled 4½ million, not taking into account the 10,000 letter cards and 393,000 registration labels which were perforated in the Stamp Printing Branch.

Letter paper and envelopes to the number of 91,630 were embossed with the royal arms, &c.

\*During the year 45 new printed forms were added to the standard files, 120 old forms were amended, and 20 forms were cancelled. The number of authorized forms now in use is about 5,525 the majority of which have been stereotyped; only a few are kept “standing in type.”

The following is a summary of the work of the Jobwork Branch for the past two years :—

| 1918.          | 1919.                              |
|----------------|------------------------------------|
| 47,219,800 ..  | Number of printed forms issued ..  |
| Rs. 69,760 ..  | Printing charges ..                |
| Rs. 148,910 .. | Cost of paper ..                   |
| Rs. 218,670 .. | Total cost of printed forms ..     |
| Rs. 4.64 ..    | Cost of printed forms per 1,000 .. |
| 3,964,700 ..   | Number of forms ruled ..           |
| 5,999,590 ..   | Number of rulings involved ..      |
| 3,515,850 ..   | Number of perforations made ..     |
| 85,470 ..      | Number of sheets embossed ..       |
|                | 48,491,530                         |
|                | Rs. 89,439                         |
|                | Rs. 156,612                        |
|                | Rs. 246,051                        |
|                | Rs. 5.07                           |
|                | 4,603,870                          |
|                | 9,121,800                          |
|                | 4,814,630                          |
|                | 91,630                             |

The following table, giving the number of “impressions” taken at the power letterpress printing machines and at the hand presses during the past three years, shows the volume of work dealt with in the Machine and Press Department :—

| Year.   | Number of “Forms” made ready. | Average Impressions taken of each Forme. | Average Impressions taken Daily. |             |        | Aggregate Number of Impressions taken during the Year. |             |            |
|---------|-------------------------------|--|----------------------------------|-------------|--------|--|-------------|------------|
|         |                               |  | At Machines.                     | At Presses. | Total. | At Machines.   | At Presses. | Total.     |
| 1917 .. | 24,150                        | 1,200                                    | 88,220                           | 3,530       | 91,750 | 26,025,690   | 1,041,220   | 27,066,910 |
| 1918 .. | 21,060                        | 1,090                                    | 76,060                           | 2,910       | 78,970 | 22,134,630   | 846,260     | 22,980,890 |
| 1919 .. | 21,680                        | 1,100                                    | 77,340                           | 3,460       | 80,800 | 22,737,450   | 1,018,080   | 23,755,530 |

The outturn and cost of Jobwork during the past three years are thus summarized :—

| Year.   | Printed Forms issued. | Cost of Paper alone.<br>Rs. | Total Cost.<br>Rs. |
|---------|-----------------------|-----------------------------|--------------------|
| 1917 .. | 55,300,300            | 106,864                     | 166,030            |
| 1918 .. | 47,219,800            | 148,910                     | 218,670            |
| 1919 .. | 48,491,530            | 156,612                     | 246,051            |

#### II.—THE MONOTYPE BRANCH.

\* During 1919 the Monotype machines worked well. The cost of repairs, replacements, and accessories (matrices, spare parts, &c.) for the year amounted to about Rs. 1,300. The whole of the new English bookwork and some of the jobwork dealt with was set and cast in this Branch.

Of the 22,089 pages printed in 1919, 7,015 foolscap folio pages of entirely new matter, weighing 35 tons, were cast at the Monotype machines, at a cost for supervision, wages of operators and casters, correcting the proofs, loss in melting and re-melting the metal, oil, fuel, power, &c., of Rs. 19,253. Adding Rs. 1,185, the cost of casting type for correcting the 7,015 pages, the total outlay works out at Rs. 2.91 per foolscap folio page of 10-point type, as compared with Rs. 2.94, which would be the amount now paid for composing and correcting a similar-sized page in the same type by hand.

In addition to the 7,015 pages turned out by the ten Monotype casting machines, they produced over 2½ tons of loose bookwork and display type for setting by hand in the Jobwork Branch and for correcting purposes.

The following is a summary of the work done in the Monotype Branch during the past three years :—

| Year.   | No. of Letters cast. | Total Weight in lb. | Total Cost.<br>Rs. |
|---------|----------------------|---------------------|--------------------|
| 1917 .. | 55,935,310           | 82,608              | 19,504             |
| 1918 .. | 49,199,550           | 71,342              | 17,859             |
| 1919 .. | 51,770,718           | 86,312              | 20,438             |

## III.—THE STAMP-PRINTING BRANCH.

Stamped stationery to the face value of Rs. 180,467 was manufactured and supplied to the Commissioner of Stamps during the year, as follows :—

|                                | Number<br>supplied. | Bearing<br>Face Value of<br>Rs. c. | Produced at<br>Cost of<br>Rs. c. | Rate per<br>1,000.<br>Rs. c. |
|--------------------------------|---------------------|------------------------------------|----------------------------------|------------------------------|
| 4-cent Local Post Cards        | 1,976,445           | 79,057 80                          | 6,557 74                         | 3 32                         |
| 6-cent Foreign Post Cards      | 8,100               | 486 0                              | 72 76                            | 8 98                         |
| 6-cent Letter Cards            | 10,000              | 650 0                              | 55 75                            | 5 57                         |
| 3-cent Commercial Envelopes    | 158,125             | 6,325 0                            | 1,274 43                         | 8 6                          |
| 6-cent Commercial Envelopes*   | 209,550             | 14,668 50                          | 1,758 99                         | 8 39                         |
| 6-cent cheap Envelopes         | 198,625             | 11,917 50                          | 1,138 6                          | 5 72                         |
| 6-cent square Envelopes        | 99,740              | 7,979 20                           | 1,849 2                          | 18 54                        |
| 3-cent Printed Matter Wrappers | 1,249,850           | 40,620 12½                         | 3,867 46                         | 3 9                          |
| Do. for the "Times of Ceylon"  | 347,350             | 10,420 50                          | 103 71*                          | 0 30*                        |
| 6-cent Printed Matter Wrappers | 133,478             | 8,342 37½                          | 543 77                           | 4 7                          |
| Total                          | 4,391,263           | 180,467 0                          | 17,221 69†                       |                              |

\* This is exclusive of the cost of the paper, which was supplied by the proprietors of the "Times of Ceylon."

† Includes Rs. 195, the cost of the printed labels used in packeting, &c., which amount is not shown in the departmental classification on page 1.

No comparison of costs with former years can be given here, owing to the face value of the different items having undergone change in almost every instance.

In addition to the above, the following were supplied to the Commissioner of Stamps :—

|  |           |
|--|-----------|
| 5-cent stamps overprinted "One Cent"           | 1,800,000 |
| 5-cent stamps overprinted "War Stamp One Cent" | 5,880,000 |
| 2-cent stamps overprinted "War Stamp"          | 1,440,000 |
| 3-cent stamps overprinted "War Stamp"          | 1,920,000 |
| 5-cent stamps overprinted "War Stamp"          | 1,440,000 |

The following statement gives the total number of stamped post cards, letter cards, envelopes, and wrappers manufactured by this Department during the past three years, with their face value and actual cost to the Colony :—

| Year. | Post Cards, &c.,<br>manufactured. | Face Value.<br>Rs. | Total Cost.<br>Rs. |
|-------|-----------------------------------|--------------------|--------------------|
| 1917  | 6,770,010                         | 173,789            | 19,251             |
| 1918  | 6,752,290                         | 193,844            | 25,506             |
| 1919  | 4,391,263                         | 180,467            | 17,221             |

## IV.—THE BINDERY.

The book-binding is almost wholly done by Convict labour. The work was prepared for the prisoners, and they were supervised by the Free Staff, but except where skilled labour was required in finishing off, &c., the whole of the output of the Bindery for 1919 must be placed to the credit of the Convict Establishment.

| 1918.      |   | 1919.      |
|------------|---|------------|
| 27,720     | Books bound in leather or cloth..             | 87,480     |
| 31,980     | Books bound in stiff covers                   | 29,190     |
| 213,340    | Books wire-stitched and bound in paper covers | 64,360     |
| 48,170     | Blocks of forms mounted                       | 44,710     |
| 945,530    | Envelopes made                                | 540,020    |
| 7,260      | Printed forms cloth-lined                     | —          |
| 112,080    | Other miscellaneous binding work              | 88,740     |
| 10,032,370 | Impressions at consecutive numbering machines | 10,594,400 |

The following tabulated statement shows the work of the Bindery during the past three years :—

| Year. | Books<br>bound. | Books<br>wire-stitched. | Consecutive<br>numberings. | Other<br>Work. |
|-------|-----------------|-------------------------|----------------------------|----------------|
| 1917  | 78,510          | 331,360                 | 11,693,420                 | 719,100        |
| 1918  | 59,700          | 213,340                 | 10,032,370                 | 1,113,040      |
| 1919  | 116,670         | 64,360                  | 10,594,400                 | 673,470        |

## V.—THE FOUNDRY.

The total outlay on the Foundry was Rs. 1,957. Small as the expenditure is on this Branch, it continues to be one of the most useful departments of the Office, without the aid of which it would not be possible, except with a very much larger annual expenditure on materials and wages than is now necessary, to grapple with the work which passes through the Jobwork Department.

**Stereotyping.**—The plates cast weighed 3,774 lb., their cost, including metal, working out at 40 cents per pound.

**Leads and Metal Furniture.**—The outturn in 1919 amounted to 4,097 lb., the cost, allowing for wastage of metal, being 27 cents per pound.

The following table summarizes the work of the Foundry during the past three years :—

| Year. | Total<br>Foundry<br>Expenditure.<br>Rs. | Stereotyping.<br>Weight of<br>Plates cast.<br>lb. | Cost per lb.<br>for Labour.<br>Cents. | Leads and Metal Furniture.<br>Weight<br>cast.<br>lb. | Cost per lb.<br>for Labour.<br>Cents. |
|-------|---|---|---------------------------------------|--|---------------------------------------|
| 1917  | 3,594                                   | 7,216   | 9.27                                  | 2,340  | 18.96                                 |
| 1918  | 1,597                                   | 9,123   | 13.75                                 | 2,516  | 13.64                                 |
| 1919  | 1,957                                   | 3,774   | 16.71                                 | 4,097  | 3.44                                  |

**Engraving.**—In addition to the usual miscellaneous work, 2,095 maps were engraved, at a cost of Rs. 2,875, for illustrating the Land Settlement Department notices published in the *Gazette*.

## VI.—CASH RECOVERIES.

The contributions to revenue, including the sales of forms and books at the Government Record Office and by the Government Agents, &c., were as follows:—

|  | Rs.              |
|--|------------------|
| Subscriptions to and sales of the <i>Gazette</i> .. .. .   | 5,650            |
| Advertisements in the <i>Gazette</i> .. .. .   | 30,424           |
| Subscriptions to and sales of the <i>New Law Reports</i> .. .. .                                     | 3,494            |
| Sales of the <i>Supreme Court Circular</i> .. .. .   | 45               |
| Sales of unserviceable articles, &c. .. .. .   | 65               |
| Fines for absence without leave .. .. .  | 30               |
| Sales of books at the Record Office, supplied by the Government Printer .. .. .                      | 5,298            |
| Sales of forms and books by the Government Agents, supplied by the Government Printer .. .. .        | 5,568            |
| Sales of books by the Railway Department, supplied by the Government Printer .. .. .                 | 538              |
| Sales of books in Post Offices, supplied by the Government Printer .. .. .                           | 2,582            |
| Sales of books in the Colombo Museum, supplied by the Government Printer .. .. .                     | 284              |
| Sales of books by the Department of Agriculture, supplied by the Government Printer .. .. .          | 485              |
| Sales of books by the Excise Department, supplied by the Government Printer .. .. .                  | 204              |
| Sales of books by the Director of Education, supplied by the Government Printer .. .. .              | 2,329            |
| Sales of school books by Mr. J. D. Fernando, supplied by the Government Printer .. .. .              | 15,907           |
| Receipts from Municipalities, Local Boards, &c., for work executed by the Government Printer .. .. . | 23,473           |
|  | <hr/> Rs. 96,376 |

## VII.—MISCELLANEOUS.

The expenditure on Plant and Machinery was Rs. 3,986.

The weight of printing paper, cardboard, &c., used during the year amounted to 227½ tons. Of this, 296 packages weighing nearly 6½ tons were sent to their destination through the Government Stores, 947 packages weighing nearly 19½ tons through the agency of the Railway, miscellaneous parcels numbering 83,849 and weighing 27½ tons were distributed by the Post Office, the balance 174 tons having been delivered by carts, tricycle carriers, &c., to Departments in Colombo: 613 carts were hired during the year at a cost of Rs. 1,083, while Messenger Boys made 1,078 journeys to the Fort and back by tramcar.

1,035 orders for advertisements were forwarded to the local newspapers through the medium of the Government Printer, who endeavours to allot to each approved paper an equal share of the Government advertising; of these orders, 166 were for notices under the Waste Lands Ordinances.

Letters and memoranda addressed direct to the Government Printer during the year numbered 16,850, while 4,505 were despatched, in addition to 34,872 advice notes, 1,315 bills, and 4,910 receipts for payments. As the advice notes are returned receipted, the total number of documents dealt with outwards and inwards, exclusive of papers passing to and from the Secretariat, amounted to 97,324.

No queries were raised by the Colonial Auditor on the accounts of the Office during the year.

The number of men and boys on the roll of the Office on December 31, 1919, was 288. In addition, a daily average of 206 prisoners from Welikada Jail were employed throughout the year. The prisoners work 8½ hours per day on five days of the week and 4½ hours on Saturday. During 1919 they made 9½ million red and blue rulings on printed forms; they perforated, consecutively numbered, and afterwards checked the numberings of 2½ million receipts, licenses, &c., in foil and counterfoil; they completely bound 95,985 books of all sizes; stitched and then paper-covered 85,087 school and other books; made over half a million envelopes; and handled about a quarter of a million other items of work. They were employed in folding sheets of bookwork, sewing, pasting, punching, and eyeletting. They attended to the whole of the receiving and despatching of the Office, unloaded the carts and stacked the blank paper, &c., took over the printed forms and books as they were completed, checked and counted them, made them into parcels according to indents, addressed, advised, and sent them away in carts to their destination; the material thus passing through their hands, first in the raw and then in the manufactured or finished state, weighing over 455 tons, or more than 1½ tons each working day. In addition, Prison Parties kept the Office floors, walls, and windows clean, and the extensive grounds free from weeds and rubbish. The results are satisfactory, the Free Staff having been reduced in number from 369 in 1911 to 288 in 1919.

Comparatively few fines for absence without leave and misconduct were imposed during 1919, the average amount deducted per month being Rs. 2.53. Of the Rs. 33.35 collected during the year, by far the greater part (Rs. 30) was for absence without leave.

It is my painful duty to have to record the death, on September 4, 1919, at the Nuwara Eliya Hospital, of Mr. H. M. Richards, First Assistant Government Printer, who had served this Department loyally and zealously for over twenty-seven years. His vacant place is not yet filled. I have also to record, with regret, the loss of Mr. W. J. Rodrigo, Second Reader and Foreman of the Machine Department, on September 9, 1919, who died in harness on the eve of retirement, after thirty-four years' labour in the Office.

Mr. H. C. Cottle, late Government Printer, highly respected by all who came into contact with him, retired on December 11, 1919, after three months' leave in England, with a service of thirty-four years to his credit. Since the date of his departure, September 11, 1919, I have borne the full responsibility of Head of the Department—now for nearly eight months; Mr. G. F. Lockhart, Third Assistant, has acted as First Assistant during the same period; Mr. E. Sellayah, Chief Clerk, has acted as Second Assistant; and Mr. B. G. Guinan, Head Reader, as Third Assistant; and I cannot speak too highly of the willing manner in which these and all other officers have assisted me, to the best of their ability, at a time when, with an ever-increasing demand for printed matter of all kinds, now that the war is over, the Department is more handicapped by loss of Supervising Staff than it has ever been before.

Government Printing Office,  
Colombo, May 7, 1920.

H. R. COTTLE,  
Acting Government Printer.

\* For three months ended December.

† For nine months ended September.

2. The total revenue shows an increase of Rs. 3,164,143·79 over that of last year—a marked improvement, indicating a return to more normal conditions. Owing to the imposition of export duties since the beginning of the war and the raising of import duties in 1914 and 1917, any comparison with pre-war years must be made with due allowance for the increased basis and scale of taxation. The largely increased cost of nearly every article and the rise in exchange also introduce factors which cause a superficial examination of such figures to lose much of its value. The increase in revenue during the last year, in spite of these factors, does, however, indicate a real measure of returning prosperity.

3. Comparing the main heads of the Customs revenue with those of 1918, there are two items only which show a decrease. The import duty on grain again showed a deficit, having dropped from Rs. 3,559,768·87 to Rs. 3,259,043·07 (—Rs. 300,725·80). The revenue from this source in normal years is about Rs. 4,000,000, and the deficit is due to the serious shortage in the supply of imported rice. There was also a considerable decrease in the duty on plumbago, which dropped from Rs. 145,907·10 in 1918 to Rs. 48,722·08 in 1919, a deficit of Rs. 97,185·02.

4. There were appreciable increases in the import duties on kerosine oil (+ Rs. 514,905) and “Other Goods” (+ Rs. 974,931).

Export duties on the principal agricultural products all showsatisfactory increases : Tea, rubber, cacao, and cardamoms (+ Rs. 208,832), and + Rs. 1,016,200, or approaching 200 per cent. on products of the coconut palm. In the latter case the large increase is partly due to the fact that during first half of 1918 the duty had been partly suspended.

5. Colombo Port and Harbour Dues also give a gratifying increase of Rs. 585,875, indicating renewed activity in shipping, while there was also a growth of Rs. 114,580 in warehouse rent.

6. *Refunds of Duty.*—The total amount of duty refunded was Rs. 472,673·52, a decrease of Rs. 115,620 on the figures of 1918. The principal items on which refunds were made are the following :—

Imports : Kerosine oil, Rs. 27,916·84 ; petrol, Rs. 27,401·89.

Exports : Rubber, Rs. 13,256·39 ; tea, Rs. 241,660·66 ; coconut oil, Rs. 14,054·89 ; copra, Rs. 17,463·80.

## STAFF.

7. There were several changes in the Supervising Staff during the year. On April 26 the Hon. Mr. F. Bowes, C.M.G., the Principal Collector, left the Island on ten months' leave, and Mr. R. N. Thaine, Deputy Collector, was appointed to act in this office. The post of Deputy Collector was filled by Mr. W. E. Wait. Mr. H. E. Newnham, Landing Surveyor, also left on leave on April 5, and was succeeded by Mr. W. E. Hobday, who assumed duties on May 7, on return to the Island after war service. During the interval Mr. F. Marshall attended to the work, in addition to his duties as Acting Secretary, Port Commission.

8. There were also several important changes amongst the Subordinate Staff: Mr. E. W. de Z. van Twest, who had held the post of Shipping Master for thirty-two years, retired on September 30, 1919, after forty-seven years of service under Government. By his retirement the Department has lost the services of a most valuable officer, whose long experience in all matters connected with the duties of the Shipping Master proved of incalculable benefit, and I desire to place on record my high appreciation of the great zeal, ability, and tact with which he carried out the difficult and often exacting duties of his post. The value of his services has been uniformly recognized by the long line of Principal Collectors under whom he worked, and his departure removes a landmark of the Customs Department. His place was filled by the appointment of Mr. H. W. Wendt, who for many years had held the post of Assistant Shipping Master. In addition, the retirement took place of three experienced and capable officers: Messrs. Sam Perera, Mudaliyar, T. Gnanam, and W. P. Silva. I regret also to report the death of two valuable clerks: Messrs. E. L. Seigertsz and A. Khan.

9. Mr. S. C. Moreton, Charges Officer, went on leave in April, 1919, and his duties at the Baggage Office of the Passenger Jetty were carried out by Mr. G. B. M. Finch, the Senior Assistant Charges Officer. On the formation of the Food Controller's Department early in June, the staff was largely supplied by this office. Mr. C. Suntheram, Chief Appraiser, was appointed Assistant Deputy Food Controller, Chalmers Granaries, in addition to his own duties, while Mr. J. de Vos, the Chief Statistical Clerk, became Chief Clerk to the Deputy Food Controller, and took with him four junior Customs officers as the nucleus of a subordinate staff.

10. The loss of such a large proportion of senior subordinate officers by death, retirement, or temporary transfer has made considerable demands upon the personnel of the Department, which has had at the same time to cope with an increase of work consequent on the revival in trade. On occasions there has been some difficulty in carrying on the daily routine smoothly and efficiently.

11. The total establishment charges for the year amounted to Rs. 304,677·10 (Personal Emoluments Rs. 285,288·76 and Other Charges Rs. 19,448·34), being a percentage of 1·31 of the total nett Customs revenue.

12. In the latter half of the year, owing to renewed difficulties in connection with exchange, Government again sanctioned the payment of export duty in sterling by demand drafts on London. The Tea Commissioner and thirty-six firms availed themselves of this concession. The total payments by this means amounted to Rs. 2,316,126·42, which is about 54 per cent. of the figure for similar payments during 1918.

13. *Fluctuations in Exchange.*—The year under review witnessed an extraordinary and constant rise in the exchange value of the rupee. At the beginning of the year the Customs rate of exchange for calculating the duty on sterling invoices stood at 1s. 6d. to the rupee. On May 28 the rate was raised to 1s. 8d., on August 15 to 1s. 10d., on October 10 to 2s., and on December 19 to 2s. 4d.

14. *Customs Tariff.*—A few minor changes in the tariff were made during the year. On March 7 the import duty on motor cars was reduced from 100 per cent. to 7½ per cent. *ad valorem*. On August 1 the personal effects (other than spirits and tobacco) of deceased soldiers and sailors who were British subjects were added to the table of exemptions from duty, and on August 29 a resolution was passed in the Legislative Council authorizing the Principal Collector to extend in special cases the time limit of two years within which articles taken out from the Colony may be re-imported free of duty. The main object of this amendment was to give relief to persons who, having left the Island on war service, were unable to return within the prescribed period of two years.

## ADMINISTRATION.

15. In the report for last year a full account was given of the multifarious duties cast upon the Customs in connection with the various Imperial or local restrictions imposed upon trade during the period of the war. A return to more normal conditions witnessed the gradual removal of most of these restrictions during 1919, with the important exception of rice and certain other foodstuffs. The shortage of supply, throughout the East, of the principal foodstuffs required for the indigenous population led to a drastic restriction in the amounts which the Island was allowed to import from India, necessitating the creation in June of a Food Controller's Department and the rationing of supplies.

16. Owing to the shortage in the world's supply of foodstuffs, raw materials for clothing, and various other articles, the trade of the Colony is still not without certain limitations, but a glance at the restrictions in force at the beginning and end of the year is instructive as showing the measure of relief afforded. In the early part of the year there was no trade with the late enemy countries, and no exports could be sent, except under special license from the Secretary of State, to any "destinations in European and Asiatic Russia and in other foreign countries in Europe and on the Mediterranean, except Belgium, France and French Possessions, Spain, Portugal, and Morocco, Italy and Italian Possessions, and Greece." In addition, there was a lengthy Black List of firms in certain other neutral countries with whom trade was forbidden. There were also restrictions which greatly affected several of our staple products. Coconut oil could be sent only to the United Kingdom; rubber only to destinations within the Empire; copra and various other products of the coconut palm only to the British Empire, France, and Italy. Lastly, there was a long list of manufactured articles and foodstuffs, occupying nearly two pages of the *Gazette*, which might not be re-exported to any destination. This list was largely composed of imported commodities placed on the list by the local "Indents Committee" owing to the necessity of conserving the stocks in the Island. Licenses to export such articles could only be obtained on application to the "Indents Committee."

17. In February the operations of the Indents Committee were discontinued as far as the control over exports was concerned, and the restrictions on the export of many articles were removed. On February 7 the export of rubber was allowed to all destinations, except to late enemy countries and neutral states bordering thereon. On April 28 the Imperial Black List was discontinued, and with it the scrutinizing of transit documents, and, with a few exceptions, the necessity of making out bills of lading to named consignees. The restrictions on the bunkering of neutral ships were not finally withdrawn in Ceylon until August 6, but for some time before that date they had in practice been gradually relaxed. General licenses authorizing trade under certain restrictions with late enemy countries were issued as follows:—

With Germany and Austria on August 8.

With Arabia on September 19.

With Hungary, Czecho-Slovakia, Jugo-Slavia, Bosnia, Herzegovina, Dalmatia, and Turkey on September 26.

The system of special green tickets and sealed bills of lading issued to vessels on taking clearance was discontinued early in September.
