STATISTICAL VIEW  
OF  
THE PROGRESS OF CEYLON.

NOTES.

The figures under the heads Population (exclusive of those for 1871, 1881, and 1891, when a Census was taken), Births, Marriages, Deaths, Schools, and Cultivation, are only approximative. The registration of Deaths is compulsory; registration of Births is optional. The figures under the head Schools and Scholars for 1882, do not include Private Schools unaided by Government.

The great difference in value of Exports for 1873, as compared with 1871 and 1872, arises from the average value of Coffee during 1873 in the local market previous to shipment being taken at £4 10s. per cwt. for plantation and £4 per cwt. for native, instead of £2 14s. and £2 as previously.

The money figures from 1874 to 1885 have been converted from rupées to pounds sterling at 1s. 10½d. to the rupee; for 1886 and 1887 at 1s. 7d. to the rupee; for 1888 at 1s. 4½d. to the rupee; prior to 1874 at 2s. to the rupee. From 1889 it is shown in rupees.

In making these inquiries the officer will remember that he is exercising a highly important function, and that his report may be the foundation of proceedings deeply affecting the interests of individuals. He must therefore most carefully endeavour to arrive at the truth, and should especially direct his attention whether the casualty happened from avoidable or unavoidable causes,—particularly as to the (a) unseaworthiness or insufficient equipment of the ship; (b) insufficient or improper manning; (c) improper loading, overloading, bad stowage; (d) misconduct, incompetency, or neglect of master, officers, or crew; (e) ignorance of lights, or navigation of the coast; (f) neglect of heaving the lead.

Clause 18.—This notice should be given when the wreck in custody exceeds the value of Rs. 50, and the particulars of all articles taken possession of by the Receiver will be entered in the Report Book No. 1, per form annexed.

4.—*Wreck arrested by order of Court of Law.*

When a derelict ship in the custody of a Receiver, or other wrecked property detained by the Receiver for the payment of salvage, is arrested by virtue of a warrant or other instrument of Court, the Receiver should not give up the claims to fees and to any expenses he may have incurred, but should send a copy of his account to the person taking such charge, giving notice of his lien, and that the property must not be restored until the amount of his claims be paid. A copy of the account and notice should also be forwarded to the Registrar or Secretary of the Court issuing the warrant; and in the event of property being restored without payment of Receiver's claims, he should report the circumstances to the Superintendent of Wrecks, and should resume possession of the property until his claims are satisfied.

Clause 19 provides for the disposal of wreck of small value, derelict, flotsam or jetsam, so constantly found on the coasts of this Island; and should the Receiver find it necessary to sell property under the provisions of clause 27, he will, if the property be claimed, endeavour in doing so, if possible, to act in concert with the owners and insurers.

All sales of importance and value should be advertised in the *Gazette* and local papers; and notice of intended sale affixed at the Custom House of the Port. The account of wreck sold is to be made in form No. 3 (annexed).

6.—*Salvage, clauses 21 to 26.*

The decisions of questions as to salvage, if the parties cannot agree, must be determined by the Court having jurisdiction in that behalf; but the Receiver has important duties in endeavouring to settle salvage claims amicably, in providing for what may be due by detaining the property saved; in releasing the property on proper security being given; in selling the property, when necessary, to satisfy the claim of salvors; and in apportioning money paid in satisfaction of such claims; and the Receiver will recollect that, whilst providing for the claims of *bona fide* salvors, he must, as far as he can, protect property against vexatious and improper claims.

The essentials of salvage service are—(a) the degree of danger from which the lives or property are rescued; (b) the value of the property saved; (c) the risk incurred by the salvors; (d) the value of any property by the use of which the services are rendered, and the danger it was exposed to; (e) the skill shown in rendering the service; (f) the time and labour occupied.

The salvage should be in proportion to the use of these essentials; but where scarcely any, or only the last exist, and the same is little more than mere work or labour, it should be rewarded accordingly.

The amount of reward should not however increase in direct proportion to the value of the property; and as a general rule it may be borne in mind that the Courts of Admiralty very seldom, if ever, give more than one-half the value of the property saved.

7.—*With a view to encourage salvors and finders of unclaimed wreck and drift goods sold and taken charge of by Receivers under provisions of clauses 19 and 28, the following rewards may be given, viz.:—*

Upon the net value of property of Rs. 25 or under (two-thirds)	-	-	-	Rs. 3
When it exceeds Rs. 25 and under Rs. 50 (one-half)	-	-	-	Rs. 2
When of Rs. 50 and above (one-third)	-	-	-	Rs. 1

8.—*Delivery of Property to Owners.*

On payment of all sums due for salvage, duties, fees, and expenses, the Receiver will deliver up all property which comes into his possession or custody, and the proceeds of such parts of it as may have been sold, to any person who proves himself to the satisfaction of the Receiver to be the owner of such property, or agent duly appointed by him, taking receipts for the same. The owner of the ship being responsible for the cargo, and the master of the ship having, as the servant of the owner, the legal custody thereof, the Receiver will treat the master, when present, as the agent of the owner—not only of the ship, but also of the cargo; unless and until it is clearly proved that the owners of either have put an end to such agency.

9.—*Accounts and Returns.*

The Receiver will keep a Report Book according to form No. 1, in which he will enter the particulars of every description of article taken into his custody. The reference numbers are to commence with No. 1 on January 1 of each year.

The reporting of goods taken possession of for the Receiver should be made according to form No. 2, and the sale account per form No. 3.

The Quarterly Returns, as per form No. 4, are to be forwarded through the Superintendent of Wrecks; and the net proceeds of all wreck, the property of Government as unclaimed, is to be paid into the General Treasury quarterly, the Treasurer being required to receive such moneys on account of wrecks.

By His Excellency's command,

Colonial Secretary's Office,  
Colombo, February 6, 1862.\*

<sup>2</sup> The Registrar has the management of all the business of the Court, Criminal and Appellate, and of his Office.

<sup>3</sup> The Deputy Registrars keep the Criminal and Appellate Minutes and assist the Registrar in the management of business of the Court and of the Office.

<sup>4</sup> The duties of the Attorney-General are not clearly defined, but are in many respects analogous to those of the Attorney-General in England, though in some respects they resemble those of the Lord Advocate in Scotland. He acts as Legal Adviser to the Executive and every Department of Government. All Contracts and Deeds affecting the Government are prepared or settled by him; and he prepares all the Legislative Enactments of Government. He acts as Public Prosecutor, and instructs Magistrates in criminal proceedings. All informations in the Supreme or District Courts run in his name, and he, or some one deputed by him, appears for the Crown in most civil cases.

## RETURN OF PRISONS AND PRISONERS.

*Replies to the Questions, compiled from the Returns of the respective Superintendents.*

## QUESTION I.

If the prison is on the separate system, is the separation complete? And if not, what is the separation enforced by day and night, respectively?

All the penal stage prisoners of the Island if sentenced to over a month are passed through one of the following jails:—Welikada, Kandy, Jaffna, Ratnapura.

In these jails the penal stage prisoners are worked on the separate system. They are confined in separate cells, and are worked in stalls. They are marched from their cells to the stalls in single file three paces apart, and are not allowed to speak or communicate with each other at all. Prisoners not in penal stage are not worked on the separate system.

## QUESTION II.

If not on the separate system, what provision is there for the supervision of the prisoners while in association?

The males are supervised by male officers of various grades, and the females by matrons, in all jails.

## QUESTIONS III. AND IV.

How many cells are there; and how many associated wards? Taking the average number of prisoners in jail, how many cubic feet of space are there for each prisoner during the hours of sleep?

## QUESTION V.

How are the prisoners classified?

The classification in the Ceylon Prisons is as follows:—

## (1) Males, convicted, who are subdivided as follows:—

a Penal stage, lasting for 3 months.

b Class IV. " 9 "

c Class III. " 12 "

d Class II. " 12 "

e Class I. rest of sentence.

f Road Ordinance defaulters.

g Simple imprisonment.

## (2) Females, convicted, in same class as males.

## (3) Males, unconvicted, who are subdivided as follows:—

a Debtors, Crown.

b Debtors, private.

c Persons committed in default of bail, witnesses, &c.

d Persons committed for further examination.

e Persons committed for trial by Superior Courts.

f Persons committed to await sentence and pending appeal.

g Accused persons arrested on warrants in transit to other stations.

h Suspected lunatics committed for medical observation.

[At Colombo, Kandy, Galle, Jaffna, and Batticaloa no lunatics are now committed to prison, proper and separate Houses of Observation having been provided, which are placed under the control of the Medical Department, except when such Houses of Observation are fully tenanted.]

## (4) Females, unconvicted.

## (5) In Welikada some prisoners of war, whose conduct has been bad in the camps, are also confined.

## QUESTION VI.

Is penal labour—that is, labour by treadmill, crank, or shot-drill—in force?

The penal labour consists of beating coir husk, metal-breaking; and pingo-carrying. Treadmill work is carried on in Welikada.

## QUESTION VII.

If so, during what periods of imprisonment, in respect of what classes of prisoners, and during how many hours, is such penal labour enforced? In stating hours of treadwheel labour, give, first, the total time on and off at the wheel, &c.; secondly, the length of spells and intervals of rest.

This penal labour is enforced during the penal stage, and also in the cases of prisoners reduced to the penal stage as a punishment. Total time on and off at the wheel are 5 hours 36 minutes and 1 hour 39 minutes respectively. Length of spells 15 minutes and interval of rest 5 minutes.

## QUESTION VIII.

\* What kind of labour, other than penal labour, is in use?

With the exception of a small number reserved for jail service, the prisoners were employed in the Harbour Works, and as carpenters, sawyers, blacksmiths, tinkers, masons, sweepers, tailors, fencing and weeding, hospital attendants, cabook-cutting, making brooms, building quarters for jail officers and making additions to jails, repairing jail officers' quarters, and twisting rope.

## QUESTION IX.

If the prisoners are employed beyond the walls of the jail, state—

(1) On what kind of work they are so employed?

At *Welikada*, the convicts were employed in conveying night soil, cabook-cutting, fencing and weeding, carting cabook, building, repairing, whitewashing, and thatching officers' quarters, &c.

At *Mahara*, in mining, sledging, stone-cutting, and loading wagons with rubble and metal.

At *Mutwal*, harbour extension works.

At *Nuwara Eliya*, in excavating ponds, levelling, weeding, &c., for the improvement of the grounds at the Queen's Cottage and Nuwara Eliya Plain.

(2) How are they supervised?

By Superintendent, Assistant Superintendents, Jailers, Deputy Jailers, Overseers, Sub-Overseers, and Guards.

(3) How many escapes of prisoners, while being employed beyond the jail, have taken place during each of the last three years?

Total escapes are as follows:—

None.

(4) How are the profits of their labour accounted for?

An account of the labour contributed to each work is kept, from which the reply to Query XI. is compiled, but no money passes, nor is the labour paid for, except where articles manufactured in prisons are sold, when the actual cash realized is paid into the nearest Kachcheri and brought to account as revenue. The amount recovered on account of metal is also credited to Government.

## QUESTION XIV.

Is there, or are there, any chaplain or chaplains of any, and what, religious persuasions?

There are no Prison Chaplains, but accredited ministers of all persuasions are admitted on application.

## QUESTION XV.

Are religious services regularly, or otherwise, performed for the benefit of the prisoners of any, and if any, what religious persuasion?

At Welikada, Borella Hospital, Mutwal, Bogambra, and other principal jails frequent services are held both by Protestant and Roman Catholic ministers on Sundays; and religious instruction is also given by catechists of various denominations regularly. At other prisons such services are held whenever any minister expresses a wish to do so. Religious services are also held by Buddhist priests in some of the jails.

## QUESTION XVII.

What provision is made for the education of prisoners?

At Welikada education is confined to the juveniles by paid teachers for three hours a day on week days.

## ANSWERS.

## WESTERN PROVINCE.

*Leper Asylum, Hendala.*—An ample supply. Town supply from Labugama; the Kelani river in the vicinity of the Asylum. The quality of the water from the town supply is pure and good; the river water serves the purpose of ablution, &c. There are nine bathrooms in connection with the Asylum supplied with hot and cold water, according to the requirements of the patients. The dry-earth system is in use in well-constructed latrines, in which metal pails are placed as receptacles for the excreta, and a quantity of coir-fibre dust reserved for the purpose of deodorization. The latrines admit of the utmost cleanliness and free ventilation, and are constantly whitewashed and disinfected. The sewage is removed twice a day and incinerated in the "Silchar cinerator" at a distance from the wards.

*General Hospital, Colombo.*—*Ad libitum.* The Labugama reservoir; this water is filtered for drinking purposes through Pasteur's chambaland filters. Excellent. There are bathrooms in connection with each set of wards; some of these bathrooms are old, and should be re-built on more modern lines. The dry-earth system is in operation. Dry coir dust is used to absorb and deodorize the excreta to some extent. A free use of coir dust will necessarily increase the bulk to be carted away with a corresponding increase in the cost of removal.

*Lady Havelock Hospital, Borella.*—The quantity of water available is unlimited. The reservoir at Labugama. Good. There are six bathrooms, and to each bathroom there is a tap three-quarter inch wide, and in some one inch, which conveys the water from the pipes. The dry-earth system is in use, and is carefully carried out. The night soil is removed daily, and buried in the jungle about two miles from town.

*De Soysa Lying-in Hospital, Maradana.*—Unlimited supply. Labugama water supply. Good water for drinking purposes is filtered before use in patent porcelain filters. There are two outhouses, one on each side, connected with the main building by corridors and verandah. In each range there are dry-earth latrines and bathrooms, the latter being used as lavatories. No sewers. Open cemented drains for surface water only. Dry-earth latrines emptied twice a day.

*Panadure.*—Unlimited. From a well in the hospital premises. Fair. There are two latrines, one for males and the other for females. Each of these has two cemented tubs. Patients also bathe in the lake close to the hospital. The dry-earth system is in use. The buckets are removed twice a day, and the contents buried far away from the hospital premises, each privy containing three zinc buckets.

*Kalutara.*—*Ad libitum.* Well in the premises. Good. There are two baths attached to the latrines, one for males and the other for females. The water to the baths for males is conveyed by pipes. Latrines, dry-earth system. Local Board coolies convey the excreta daily to a distant place out of the Local Board limits. The Local Board is paid by the Medical Department for this.

*Negombo.*—Sufficient for ablution and drinking purposes. A well in the vicinity supplies the drinking water. Two wells in the hospital grounds supply the bathing water. The drinking water is of good quality. Each ward has a bathroom furnished with a large tub. The tubs are filled daily from the wells in the premises, and all who are able to have their baths are bathed twice a week. The dry-earth system is used. The latrines are in very good condition, and can easily be kept clean. The excreta are removed twice daily and buried after disinfection.

*Avissawella.*—Unlimited. A well in hospital premises. Good. A bathroom in connection with each set of wards. Pipes laid to each bathroom from a cistern into which water is pumped from the well. Dry-earth system, latrine in connection with each set of wards; contents of buckets removed twice a day and buried at a distance from the hospital.

*Neboda.*—Unlimited. A well in the hospital premises. Good. Patients who are convalescent bathe in a stream adjoining the hospital. There are three bathrooms, two for males and one for females. Those who are not quite fit to bathe out in the open air at the stream have their baths in these rooms. System adopted, dry-earth. The contents of the buckets are buried at some distance from the hospital in the tea bushes.

## CENTRAL PROVINCE.

*Kandy.*—A gallon of filtered water for cooking and drinking and an unlimited quantity for baths and ablutions. Water is conveyed by pipes connected with the reservoir on Roseneath estate. Fresh and good. The drinking water is filtered through sand and charcoal in chatty filters before use. There are five bathrooms provided with tubs, which are always kept filled with water for the use of the European and native patients, house officers, and nurses. The dry-earth system is in use in the latrines, and the contents of the buckets removed twice a day to a distance from the hospital and incinerated.

*Katugastota.*—*Ad libitum.* A well in the hospital grounds for drinking purposes. Good. The patients bathe in the Mahaweli-ganga as before, which they prefer to the bathroom. The dry-earth system is in force. The night soil is removed twice daily or oftener and buried in the hospital burial ground, which is a good way off.

*Gampola.*—Unlimited. Spring well in the hospital premises fitted with a force pump and pipes to the reservoir, from which pipes are laid to the bathrooms. Pure and wholesome. Two bathrooms for males and two for females. A large tub in each; they are filled daily, and more frequently when required. Dry-earth system. Contents of the buckets are buried at a distance. Latrines kept extremely clean.

*Matale.*—*Ad libitum.* The water supply of the town is under the management of the Local Board. The water is from springs, and is conducted in pipes. Uncontaminated and pure but hard, as the springs are on soil containing limestone. One set of bathrooms for males with latrines, and a similar arrangement for females. Dry-earth; buckets removed twice daily and buried outside the hospital premises, and far away from the nearest habitation.

*Nuwara Eliya.*—The quantity of water is unlimited. Town water supply. Pure and wholesome, and is filtered before use. Each ward is supplied with a bath, and lavatory always kept clean. The condition of the latrines clean. Dry-earth system invariably adopted. Contents of buckets buried twice daily in forest lands behind the hospital grounds.

*Mulhalkele.*—Unlimited. From Mulhal-ela. Good. Boiled and filtered before use. One for the male wards and the other for the female wards. Dry-earth system; they are cleaned twice a day and removed at a distance by a cooly employed for the purpose.

*Dikoya.*—Unlimited. Mountain streams. Pure. Two bathrooms for male patients, one for female. Dry-earth stem in use. Contents of buckets removed and buried twice daily.

**Lindula.**—An unlimited supply. From two springs. Good and free from vegetable impurities. Four bathrooms are available, two for males and the other two for females. Dry-earth system. The excreta are daily removed and buried at a distance.

**Uda Pussellawa.**—*Ad libitum*. From a stream running by the hospital. Water is of doubtful quality, and liable to be polluted during the dry months. Water for drinking and cooking is boiled and filtered. There is a bathroom attached to each of the wards of the hospital, and water is conveyed by spouting to a tub. Two latrines, one for males and one for females. The dry-earth system is in use, and excreta are removed twice a day and buried at some distance from the hospital.

**Kelebohka.**—An unlimited supply. A stream from the hills. Good. Drinking water is filtered. Two bathrooms, one for males and the other for females. The dry-earth system. The privies are clean and in good order.

**Maskeliya.**—Water is obtained from a reservoir by means of pipes; the quantity available is *ad libitum*. A stream, the source of which is within view of the hospital. Pure, as it is direct from the spring, but, nevertheless, is filtered in the premises before use. One bathroom for males and one for females, with tubs for each. Water is conducted to the tubs by means of zinc pipes from the stream referred to. Dry-earth; good.

**Deltota.**—Unlimited. From a mountain stream connected by pipes to the hospital through filtering beds. Pure and good. Three bathrooms, two for males and one for females. Stone-paved open drains round the building. Latrines on dry-earth system.

**Nawalapitiya.**—Unlimited. Mountain stream in a reserved area and pipe supply from the reservoir. Frequently analyzed and found good. Baths; tubs and taps supplied to each tub. Latrines; dry-earth buckets frequently changed. No sewers nor privies.

**Teldeniya.**—*Ad libitum*. A well in hospital premises. Good. Boiled and filtered before being used for drinking purposes. Two bathrooms contain two wooden tubs in each of the wards. Patients who are able to walk bathe in the river running by the hospital premises. Dry-earth system. The excreta are removed as often as necessary and buried in a remote corner of the hospital ground.

**Ramboda.**—Quantity unlimited. From a mountain stream running along the boundary of the hospital. The water has been diverted from its course and conducted along zinc gutters to a cement cistern, whence it flows through a pipe. Pure and of excellent quality. It is also filtered before use. There are four bathrooms, two for males and two for females, connected to the wards by corridors. Each bathroom is provided with a tub daily filled with water. There are two latrines, one for males and the other for females, on the dry-earth system. The excreta are removed twice daily and buried some distance away from the hospital.

**Dambulla.**—*Ad libitum*. From the hospital well; but if it fails, water is carted from outside. Good and palatable. Patients bathe in bathrooms provided for the general and female wards. But patients who are able to walk prefer bathing in oyas (streams) or tanks which are close by. Dry-earth system is in use. There are two cemented latrines, one for each sex. The buckets are cleaned twice a day.

#### NORTHERN PROVINCE.

**Vavuniya.**—An unlimited supply. From two wells in the hospital grounds. Good. Boiled and filtered through chatty filters for drinking purposes.
