18/2/2014

Preface

It is with great pleasure and satisfaction that I present the Stistical Information 2009. The information in this issue has been revised and updated to cover the year 2008. This document would provide essential information to plan the development, rehabilitation, reconciliation, resettlement and reconstruction activities of the district by the Governmental, Nongovernmental and UN agencies for better planning of projects to the people of Jaffna district.

I wish to express my sincere thanks to Staff of Statistics Branch who had endeavoured hard to make this publication a success and the Local Heads of Departments who furnished the relevant information. Any constructive suggestions for improvement of this publication from the users will be greatly appreciated.

Information of Jaffna District is also obtainable by email on request to gajaffna@sltnet.lk

Notable events during this year			
The district was affected by Nisha Cyclone on 26 November 2008 and the heavy rain followed it for three days caused considerable damage to civilian properties			

Divisional Secretariat/Asstt Government Agent Divisions of Jaffna District

Chapter 1: Geographic Features

Location and Area

Jaffna District is the Northern end of the Northern Province of Sri Lanka, about 410 Km away from Colombo. It consists of the peninsula and seven inhabited Islands. North, East and west boundaries of the District are Indian Ocean, South is Jaffna Lagoon and Kilinochchi District. The total land area including Inland waters is 1,025 Sq.Km. Jaffna District is divided into four Sub divisions. They are Islands, Vallikamam, Thenmaradchi and Vadamaradchi. The Land in Jaffna District could be characterized as flat with less than 5% slope. There are over 631 ponds and 2,433 ditches scattered all over the District with connected channels to conserve rain water. Excess water easily drained into the sea/lagoon. The levels are Point Pedro 15.24m, Myliddy 10.8m. Chankanai 3.04 m, and Kokuvil 6.09m above the Sea level.

Climate

Jaffna District falls under dry zone. Peak rainfall is during the months of October to December during North East Monsoon and the Scattered during April to May. The inter Monsoon rain is uncertain. The District received 1,811.8 mm of rain during the year 2008. The average temperature during the year fluctuated between 21.40 and 32.40 centigrade with an annual average of 28.0 centigrade.

Soil

The soil and water resource of the Jaffna peninsula are both related to the lime stone geology of the land. The soils are formed on the marine deposits and sediments under the influence of sea waves and winds on lime

stones. The lime stone being a porous rock is the source of ground water for the peninsula.

Well drained and high productive calac Red Yellow latasol and Red Yellow latasol soil types are found in central areas (60,000 Ha). Alkaline salure soil and Regasol are found in costal areas (26000 Ha) and Alluvial soil is in Valukki Aru area (10000 Ha). In Certain areas coral lime stone is available. This different soil types offer scope for cultivation of Exotic as well as Local crops. The depth of soil varies from 90cm - 150cm.

Water

Jaffna peninsula has a source of Ground Water store in the Sub terrain layer of limestone. The limestone is the main aquifer. This aquifer has several isolated caves and caveins capable of storing ground water without evaporation losses. It is an excellent aquifer. The entire ground water is generated from percolated rainfall and it forms a fresh water lens beneath the peninsula. It is found that the fresh water lens do not extend below the base of the lime stone. The fresh water lens is sustained by the buoyancy of fresh water in relation to sea water. Difference in densities (1.0, 1.025) giving a ratio of 40:1. That is every meter of fresh water above the sea level requires a depth of fresh water lens of 40m when no mixing between fresh and sea water takes place. There is no sharp interface between fresh and sea water.

Ground water recharge has been viewed as a function of effective rainfall. In the Jaffna peninsula, this occurs only during the annual monsoon rainfall during the period September to January. After losses by direct run-off (about 10 - 15 percent), only 30 to 32

percent of the rainfall is left over for ground water recharge. In the past three decades the quality of water in the region has deteriorated due to various reasons. Variability of the rainfall over the region has directly contributed to this as rainfall is the only source of recharge.

The ground water in Jaffna peninsula is in danger due to salinity problem. A significant factor that has contributed to increased salinity in the well water has been the indiscriminate extraction of water from the underground aquifers. This has been exacerbated by the increase in population and the rapid rate of extraction using pumps both electric and kerosene driven for domestic and agricultural purpose. Because of low fresh water heads in the under ground aquifers large amount of withdrawals from wells cause heads to further decline and the fresh water salt water interface to rise resulting in salt intrusions in several areas in the peninsula. The intensive agricultural pattern adopted in the last three decades also led to the increase of salinity in the water. Several wells once used to supply potable water are not in use now due to the increase of salinity.

The unrestricted use of insecticides, pesticides and chemical fertilizers has led to the pollution of underground water.

It is an essential to study the ground water hydrology in the peninsula to provide suitable and sustainable potable water to the people in salinity prone area.

Valukai aru

The peninsula has a wet stream (seasonal river) in the western sector called Valukai aru. This surface stream is active only during the height of the monsoon. Valukai aru starts at Tellipallai west at 20 ft. above sea level in calcic soil. As it goes

down towards the sea at Araly it drops in level and its bed becomes clayey. This clay region gets wider and wider as Valukai aru goes down.

It is 15 Km. length and it is connected with 45 ponds and several channels. Around 1,300 hectares of paddy land and 150 hectares of high land from Tellipalai, Uduvil, Sandilipay and Chankanai DS Divisions are benefited by this seasonal river. Total population in the basin is around 60,000 persons comprising of 15,000 families in which 4,950 farm families. Around 5,000 farm labourers are involved in agriculture and the major crops cultivated in this area are Onion, chilly and vegetables.

Chapter 2: Administrative Divisions

Jaffna District is divided into 15 Administrative divisions (11 Divisional secretariat divisions and 4 Assistant Government Agent Divisions). There are 435 Grama Officers divisions in this District. Seventeen Local bodies (Municipal council-1, Urban councils - 3 and Predesihiya sabhas-13) are functioning in Jaffna district. Activities of the local bodies are water supply and drainage, Health and maternity clinics. Community centers, Public libraries and rural roads etc.

Other Institutions such as Education, Health, Postal, Registrar, Police, Fisheries etc., have their own divisions of the district. Education Department divided the district in 5 zones which are further divided into 14 education divisions, Health Department have 11 MOH divisions (out of which 7 divisions are functioning at present), Postal department have 20 Post office division which are further divided into several sub post office divisions etc.

Chapter 3: Demography

Population

According to the 1981 census the population of the District was 831,800 (Including Kilinochchi District which was part of Jaffna District in 1981) and based on the natural growth rate, it is projected that the population of Jaffna District would be more than 1,000,000 in 2006. But present population collected through DS/AGA divisions for 2008 is 560,181. The difference between projected population and present population is due to following reasons.

- * Migration to out of the district and foreign countries. Migration to foreign countries such as Canada, Britain, Germany, Norway, Switzerland, India, France etc.
- * The family size is reduced due to frequent displacements of the family members on

account of the unsettled conditions. Displacement out side the district but within Sri Lanka (Internal displaced persons) such as Mullaitivu, Kilinochchi, Vavuniya, Mannar and other districts of the country.

- * Decline in natural growth trend
- * A higher rate of abnormal death particularly among the youth
- * Delay of marriage among youth
- * Stagnation of economic developments
- * Unemployment

Population by Census year

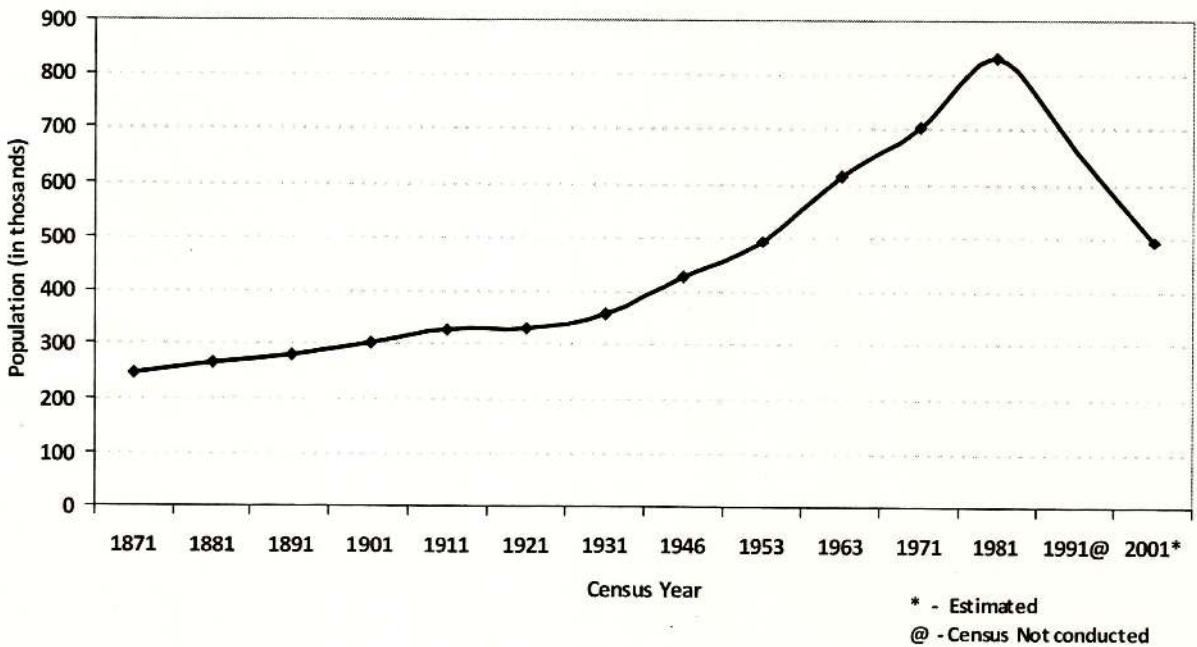

Table 3.1: Population by DS/AGA Division and year 1971,1981, 2001, 2007 and 2008

No.	DS/AGA Division	1971	1981	2001	2007	2008

Chapter 4: Agriculture, Livestock and Fisheries

Agriculture and Irrigation

Jaffna District is predominantly an agricultural area and always has been an area with high potential in agriculture. Crops such as red onion, chillies, potatoes tobacco, vegetables, banana and grapes cultivated for commercial purpose. Other crops such as paddy, pulses, coconut cultivation in subsistence level, palmyrah products also a subsistence source of income.

About 65,400 families and 30,000 farm Labourers are involved in agriculture and livestock in the District. In addition a large share of the population is involved in home gardens. Paddy is cultivated in 8,068 hectares and other field crops are also cultivated in Jaffna District. About 19,261 agro wells and 2,433 ditches are being used for agriculture purpose.

Paddy is produced during the Maha season under the rain-fed conditions while vegetables are produced nearly all year around under rain-fed or irrigated conditions. Mainly ground water resources are being used for agriculture purpose. There are two Lagoons in Jaffna district. One is Vadamradchi Lagoon and other is Upparu Lagoon. Vadamradchi Lagoon is situated

in a North South Easterly direction from Thondaimanaru in the North and Chundikulam in the South East. It is about 47 Km. sea water intruded the peninsula through Thondaimanaru in the North and Chundikulam in the South. The Upparu Lagoon is situated in Ariyalai. It is about 9 Km. Originally sea water intruded through Ariyalai at high tide and the lagoon became saline. The Valukkai Aru is the natural stream to drain flood from Thellipalai caused by the North East Monsoon rain through Araly into the sea. It is 13 Km long from starting point. There is the tidal well at Nilavarai in Valikamam East division. It is inter connected with underground caverns and solution channels. In addition over 631 small ponds are also in Jaffna district. (Department of Agrarian Development has listed 992 ponds in 2007)

The above irrigation schemes functioned satisfactory up to 1983 and there after most of in were damaged due to civil war. Such schemes need immediate reconstruction to safeguard the peninsula from intrusion of sea water and for purpose of agriculture.

Chapter 6: Education

The long tradition dedication to education and the resulting high priority given to Education from colonial period, Jaffna has been one of the districts with high literacy rate in Sri Lanka. Education is one of the major concern for the people of Jaffna. There are 700 pre schools serving for 18,016 children with 1,243 teachers who are working without proper facilities. The student population is 126,638 in 2008 (according Zonal education offices' figures). The number of teachers serving in schools in 2008 was 6,967 with a pupil Teachers ratio of 18.2. According to Zonal education office

figures in 2008, 413 schools are functioning in Jaffna District. Due to the protracted civil war and consequent displacements the education sector suffered set back in teaching, learning process and infrastructure. Still many schools are in high security zone. Major constraints in implementing the rehabilitation and development programme are lack of adequate financial resources, presence of land mines, inadequate infrastructure, acute shortage of skilled manpower resources, teaching aids and equipment.

Chapter 7: Health

Jaffna Teaching Hospital is the main public health and medical institution for the people of Northern Province and for teaching of medical students of the university of Jaffna and Nursing and midwife students. 42 public health care and medical institution are functioning under the Deputy provincial Director of health services (DPDHS). 40 Ayurvedic Dispensaries are under local bodies. One Ayurvedic Teaching Hospital is also available at Kaithady. The District is divided into 07 Medical Officers of Health Divisions (MOH) for preventive care services under whom 106 Public Clinics centers are functioning. In addition 45 private Medical

institutions and 78 pharmacies are functioning in Jaffna District.

The cancer unit, Tellipalai was commenced in 1983 and it served the whole population in the Northern Province. Unfortunately following the conflict situation the functions of this unit discontinued and people had to travel to Colombo to receive the cancer care services. After the Memorandum of understanding this cancer unit had been reconstructed with Government and foreign Agencies fund. Now the Cancer Unit, Tellipalai and Chest Clinic, Jaffna are functioning under the administration of Regional Director of Health Services.
