## P R E F A C E

THE first issue of the Statistical Pocket Book appeared in the year 1967. This is the eleventh issue.

The statistical information has been revised and brought up to date to cover as far as possible the year 1977.

It is felt that the summarised statistical information in this compact hand book will continue to be of interest to the general public, the administrator, the student and the tourist.

Any suggestions for the improvement of this pocket publication will be most welcome.

Acting Director of Census and Statistics.

Note.—The fluctuation in the figure of the No. of Schools from 1973 is due to—

- (a) Large schools which had a junior department and a senior department were treated as two separate entities in certain years and as one entity in other years.
- (b) Amalgamation of schools.
- (c) The drop in the number of pupils since 1973 may be due to the change in the age of admissions being raised from 5 years to 6 years.
- (2) Government Schools only.
- (3) Excludes expenditure in the Examinations Department and the educational publications department.
