Notification.—General Department.

No. 1,862.—In exercise of the power conferred by Act I. of 1870, the following rules for quarantine against plague have been made by the Government of Bombay, with the previous sanction of the Governor-General in Council: they have effect from the 3rd instant in the Ports of Aden, Perim, and the Somali Coast as a temporary measure:—

- I.—The Commander of every vessel, including buggalows or other native craft, arriving from Bassorah shall, before entering the harbour, indicate by signal the port from which such vessel has come.
- II.—Such Commander shall not, except as hereinafter provided, allow any communication, either with the pilot boat, except orally, or with the shore, or with any other vessel or boat in the harbour.

- III.—Immediately on any such arrival being signalled, the Health Officer of the Port shall go alongside the vessel and ascertain by inquiry from the Commander whether any person on board is suffering, or has during the voyage suffered, from plague, and if the Health Officer is satisfied by such inquiry that no person on board is suffering, or during the voyage has suffered, from plague, he shall direct the Commander to take the vessel to the quarantine anchorage, duly appointed and notified in that behalf by the Resident, there to remain for a period of seven days from the date of arrival in the harbour. The Health Officer shall also direct the Commander to prohibit, during the period for which the vessel remains at the quarantine anchorage as aforesaid, all communication, except such as is hereinafter provided for, between such vessel and the shore or other vessels and boats in the harbour.
- IV.—If the Health Officer shall have reason to believe at the time when the vessel arrives in the harbour that any person on board is suffering, or during the voyage has suffered, from plague, he shall direct the Commander to take the vessel to the quarantine anchorage as aforesaid, and there to remain for a period of fifteen days from the day of arrival in the harbour; and shall further direct that during such fifteen days intercourse between the said vessel and the shore or other vessels and boats in the harbour shall be prohibited as provided in rule III.
- V.—If during the period a vessel is at the quarantine anchorage aforesaid any case or cases of plague should occur on board, the said vessel shall remain in quarantine for a period of fifteen days from the date of the last case occurring, and be subject to all the prohibitions provided for in rules III. and IV.
- VI.—When any vessel has been placed in quarantine as aforesaid, the Health Officer may direct the removal of so many of the passengers and crew as may not be suffering from illness, and whose services may not be required on board the vessel, to such particular spots as may from time to time be selected by the Resident as places of quarantine, there to remain for a period of seven days, or if the vessel has been placed in quarantine for fifteen days, for a period of fifteen days. If a case of plague occurs among such passengers and crew during any such period, they shall remain in a place of quarantine for a period of fifteen days from the date of the occurrence of the last case of such illness.
- VII.—Any mails or cargo which may be brought by any vessel so arriving shall be landed under such precautions as the Health Officer may deem necessary to prevent the spread of the disease.
- VIII.—It will be the duty of the Port Officer to facilitate the conveyance to all vessels in quarantine of such supplies of provisions, stores, and other articles as may be required by those on board. Such supplies will be placed on the boats of the vessels in quarantine to be subsequently removed by members of their crews.
- IX.—All vessels arriving at Aden, Perim, and the Somali Coast which may have communicated with vessels coming from Bassorah shall be subjected to the same quarantine as vessels arriving at Aden, Perim, and the Somali Coast from Bassorah.

Heavy clouds with distant lightning and thunder during last [telegram dated 31st May] three days in the evening in north, north-east, and north-west; wind blowing yesterday in strong gusts from south-west.

MANNÁR DISTRICT.

Paddy.—Kalapokam crop on the mainland is still being threshed. A very small extent of land cultivated for sirupokam.

Remarks.—There was average rain in April, but none at all in May; and the sirupokam will fail if there is no rain shortly.

VAVUNIYA DISTRICT.

Paddy.—Sirupokam prospects poor owing to failure of expected monsoon rains. Small extent only sown as yet.—Idaipokam now in plants: will suffer if rain fails altogether.

Dry Grain.—Dry grain cultivation confined to small gingelly crops.

MULLAITTIVU DISTRICT.

Paddy.—Prospects for sirupokam poor owing to want of rain. Very small extent sown.

HAMBANTOTA DISTRICT.

Paddy.—Small second maha crop in West Giruwá pattu harvested. Growing yala crops good. East Giruwá pattu small extent sown for yala good. Mágam pattu, second maha. At Tissa good; smaller extent than usual sown for yala owing to scarcity of cattle for ploughing.

Remark.—Tanks contain good water supply.

PROVINCE OF UVA.

Paddy.—Crops reported good in Udukinda, Yatikinda, Wellawaya, Wiyaluwa, and Buttale. In Wellassa crop much damaged by flies and worms; in Bintenna also flies have done much damage, and the crops in both these divisions will be far below the average.

Sanitary Officer's Report for the Quarter ended March 31, 1892.

Public Health was on the whole good. Only two cases of smallpox were reported in Magalla: the first one was a young Tamil cooly who worked in the wharf. He boarded a native craft in January last, and a few days after developed the disease, proving conclusively of the introduction of the disease by the shipping. This boy, along with four others, lived in house No. 366 in Magalla, and he was concealed for ten days after development of the eruption before his condition was reported. The chief tenant was prosecuted for neglecting to report early the case; the patient was removed to the Smallpox Hospital; the other inmates were placed under observation for several days, and the house was thoroughly disinfected. Ten days after another boy of the same house took ill of the same disease. He was at once removed to hospital, and similar precautionary measures were adopted in this instance too, and no further cases occurred in the neighbourhood.

A severe epidemic of influenza prevailed to a considerable extent in the early part of the quarter. Several deaths occurred from neglect and exposure, and children and the old and feeble suffered most in this respect. No cases were specially reported.

Two cases of chickenpox and two of measles occurred during the quarter. During the latter part of February and during March several cases of fever occurred in the Fort. Whether these were solely due to the increased atmospheric temperature, or whether this atmospheric condition induced a greater elimination of noxious gases from the several cesspit latrines in the Fort, I will not venture to discuss now. But the fact remains, that with the advent of the hot season an outbreak of fever invariably occurs, in the Fort especially.

A case of death occurred from consuming the entrails of the fish known as "karambura."

Wards.—Their condition calls for no special comment.

Public Latrines.—Their condition was satisfactory: they were regularly attended to and cleanly kept.

Street Sweeping and Scavenging.—The former was unsatisfactorily done till within a few weeks of the quarter's end, and the same may be said of the scavenging that left much to be desired in its manner of execution. The scattering of house rubbish by the roadside and in front of houses, instead of being deposited in boxes for easy and rapid removal, still continues in several places in Wards 2 and 3.

Markets.—Their condition was good. The narrow boundary surface drain of the fish market requires widening as stated in my last report.

Drainage.—Most of the drains remain as before in Ward 1 and in China Garden. A new connected cement drain is being built around the vegetable and beef markets, and is a step in the right direction.

Cattle Slaughter.—During the quarter three bulls that were rejected as unfit were slaughtered, and on its discovery by the Police the matter was reported, and formed the subject of an inquiry by the Council.

Suggestions.—Before closing my report I wish to invite the attention of the Council to the following points in the matter of its sanitary legislation. These are matters that demand early consideration, and are of grave importance in the preservation of the public health. It is not enough that minor sanitary matters should receive treatment, as sanitary salvation is not obtainable by merely flushing drains and scavenging streets. Unless the root of all sanitary defects was primarily attacked, existing insanitary evils will continue to flourish in spite of operative measures directed towards their external aspect. First and foremost is the question of *overcrowding*. This exists to an alarming extent in the Fort, China Garden, Kaluwella, Magolla, Pettigolawatta, Welliwatta, Minuwangoda, and I have no doubt in several other parts of the Municipality. I know of houses that are rented to individuals who in turn sublet each room (and even screen large halls into rooms) to families consisting of from two to six members; and in a crowded place like the Fort, I need not state how undesirable and dangerous such a proceeding is. Again, in Kaluwella, there are a row of houses known as the "kitangies," of which each house contains from 50 to 100 individuals, excluding several cows and goats. The smells arising from these overcrowded localities infect the surrounding neighbourhood to an extent as to cause disease to others. Under these circumstances, I think that measures should be adopted early to render inoperative the attempt of landlords to deal with human lives from a commercial point of view.

2. The dry-earth system is urgently needed within the Fort. Most of the houses contain cesspit latrines, whose conditions are far from satisfactory, and are mainly instrumental in causing periodical outbreaks of fever. Wherever practical the dry-earth system, with the daily removal of night soil, to be buried or incinerated, as the case may be, should be introduced, and a reduction thus made in the large number of cesspit latrines at present existing in the Fort.

3. Opening of the covered side drains in the Fort, and rendering them unabsorbent by cementing their interiors. This is a matter I have frequently written about, and the urgency of this necessity is in no way diminished.

4. Closing of the present burial grounds, which are getting crowded, to those possessing no vested rights of burial in them, and establishing a large general cemetery, removed some distance from the town.

5. Preventing the dhobies from washing clothes in side drains and ditches in Hirimbure, Elliott road, and Norris road, by granting them the exclusive use of a well or two for the purpose of washing clothes (*vide* letter of March 5).

6. Enforcing the periodical limewashing of the bazaar, markets, and Moorish houses, also the whitewashing of large drains.

Sanitary Officer.
