Preface

Today Jaffna peninsula in Sri Lanka is fairly well known to people in several parts of the world due to the present political conditions in Sri Lanka. Another factor for Jaffna becoming widely known is the recent migrations of Jaffna Tamils to different parts of the world.

Jaffna peninsula is the most northern part of Sri Lanka, whose total area is about 950 square kilometres. There are several small islands adjoining the peninsula, whose total area is about 137 square kilometres. The use of the name 'Jaffna' came into vogue during the British rule. Before that, the name 'Jaffanapatam' prevailed among westerners, and its use is attested in early documents. The Tamil name of the peninsula is *Y a a l p p a a n a m*, and it has become *Yaapane* in Sinhala.

Tamils have lived for centuries in the northern and eastern provinces of Sri Lanka, and Tamil has been the predominant language in both these provinces. Sri Lanka Tamils consider these two provinces their traditional homeland.

In Sri Lanka, Tamil has been in close contact with Sinhala for long. Sinhala, one of the modern Indo-Aryan languages, is the major language in Sri Lanka, and it had, in course of time, become Dravidianized in some ways due to the influence of Tamil and Malayalam. Tamil borrowings, particularly lexical, are abundant in Sinhala.

There are several varieties of Tamil, geographical as well as social, within Sri Lanka. The variety of Tamil described in this book is that spoken in the Jaffna peninsula. The Jaffna variety of Tamil has some claim to being a

prestige dialect with approximately 700,000 speakers, and its history goes back very many centuries. It differs markedly from the Indian Tamil and other varieties in Sri Lanka. It has several archaisms and innovations.

In the past, Jaffna played a very important role in the development of Tamil studies. Scholars from Jaffna contributed significantly to the advancement of studies in Tamil literature, grammar, and Saiva Siddhanta. Some of them gained recognition as pioneers in certain branches of Tamil studies.

The present book, perhaps first of its kind on Jaffna Tamil, was written during the period October 1987 - September 1988, when I was in the University of Edinburgh, U. K. on a Commonwealth Academic Staff Fellowship. At Edinburgh, Professor R. E. Asher showed great interest in Jaffna Tamil, and urged me to write this book. But, regrettably, I could not reach my target, and this book remains incomplete without syntax. I hope to have it as part two of this work sometime in the future.

In writing this book, I have used the structured questionnaire that appeared in *Lingua* 42 (1977), 1 - 72, for descriptive studies of languages. But the descriptions are not exactly in the order of the questions found therein. Professor R. E. Asher's work on the Indian variety of Tamil, titled *Tamil* (North Holland Publishing Company - Amsterdam, 1982) was very useful in writing this book.

In working on the dialects of Tamil, I have greatly benefited from the initial training I had in research under many eminent teachers at the Annamalai University, South India. Herein, I wish to record my profound sense of gratitude to Professor T. P. Meenakshisundaran, Professor M. Shanmugampillai, Professor S. Agesthialingom and Professor S. V. Shanmugam.

Subsequently, over the years I gained new experience in collaborating with Professor James W. Gair (Cornell University, U. S. A.) and Professor W. S. Karunatillake (University of Kelaniya, Sri Lanka) in research on Tamil. I have had very useful discussions on Jaffna Tamil with Professor R. E. Asher. He has obliged me with a foreword to this book. I should express my indebtedness to all of them. Needless to say, they are not to be blamed for the faults that remain in the final version.

I am grateful to the Association of Commonwealth Universities for granting me a Fellowship that enabled me to write this book in its present form. I should thank the Publications Committee of the University of Jaffna for accepting my work for publication. I owe a special word of thanks to our Vice Chancellor, Professor A. Thurairajah for writing an introduction to this book.

I must record my appreciation of the work done by the Mahathma Printers, Erlalai. Most printers in Jaffna were hesitant to print this book, because of difficulties in obtaining paper, diacritic marks, electricity, etc., in the present war situation. However, Mahathma Printers have done their best in spite of several limitations. Certain adjustments had to be made in accommodating diacritic marks. For instance, more space had to be provided between letters in words, particularly when diacritic marks occurred. The press couldn't print the Tamil materials in italics, because they were not sufficiently available.

I am grateful to G. Robert for preparing the maps. I would express my thanks to Ratnamalar, Subathini, Sivarani and Jeyagowri who helped me with the correction of proofs.

Finally, members of my family too deserve my thanks for enduring the agony of the war in Jaffna when I was away in Edinburgh. They decided not to call me back abruptly.

Foreword

For some centuries - one might almost say, since time immemorial - Tamil has been the most widely studied and the most frequently described of all the Dravidian languages. It is nevertheless only in the second half of the twentieth century that there have been serious attempts to provide full and objective accounts of the colloquial language. Moreover, such descriptions as have been produced have most typically been of dialects spoken in Tamil Nadu, with the varieties prevalent in Sri Lanka being somewhat neglected. This is unfortunate, given the wide range of idiosyncratic features that are to be found in Tamil as spoken in informal contexts in, for instance, Jaffna and Batticaloa. There can be no doubt that there would be profound interest among Tamil scholars, both in South Asia and elsewhere, in reliable data on Sri Lankan Tamil dialects. It is also likely that the availability of such data would have a significant impact on work in the field of comparative Dravidian linguistics.

No scholar is better equipped to provide the much needed description of Jaffna Tamil than Dr. S. Suseendrarajah, whose intimate knowledge of the dialect is combined with a firm background in linguistics. From knowledge of his material gained when we had the pleasure of his attachment

to the Department of Linguistics at the University of Edinburgh in 1987 - 88, I am confident this first volume of his descriptive grammar, dealing with the phonology and morphology, will be seen as a major contribution to the field of Tamil linguistics. We shall look forward eagerly to the publication of a second volume on syntax.

R. E. Asher, DLitt, FRSE, FKSA, FRAS
*Vice - Principal and
Professor of Linguistics*

Scotland, UK
21 July 1993*

Introduction

JAFFNA TAMIL by Prof. S. Suseendrarajah is a work giving a synchronic description of the Tamil language as spoken in the Jaffna peninsula. The dialect has its own peculiarities probably due to its lesser exposure to South Indian and other influences. The author points out that it differs markedly from the Indian and other varieties in Sri Lanka. He also notes that it has several archaisms and innovations. A closer study of these peculiarities could lead to further valuable findings.

The present volume limits itself to the phonology and morphology of the dialect studied. A further volume on syntax would complete the description.

I hope that this book will be welcomed by all interested in the descriptive grammar of spoken Tamil.

Prof. A. Thurairajah
Vice - Chancellor

1. PHONOLOGY

Distinctive segments

The distinctive phonological segments in the speech of the monolinguals speaking Tamil only are as follows: k, c, t̪, ť̪, p, r, ñ, ñ̌, n, m, y, v, R, l, ľ, i, ii, u, uu, e, ee, o, oo, a, aa, ai, au, and in loan words b, s, s̪; æ. In addition to these the following segments occur in the speech of the bilinguals speaking Tamil and English - that too in loans mostly from English: g, j, d̪, b, h, f, z.

Realisation of segmental elements plosives and affricates

(1) k

[k] voiceless dorso-velar plosive in utterance initial position and in the medial position of a word after R and s: e.g. kaṭay 'shop' [kaṭai], teRku 'south' [teṭkɪ], paaskaran 'personal name' [pa:skaɾan]

[k:] long voiceless dorso-velar plosive as the realisation of the intervocalic sequence - kk - : e.g. akkaa 'elder sister' [ak:ai]

[x] voiceless dorso-velar fricative in intervocalic position: kaakam 'crow' [ka:xam]. Also in the medial position of a word after a consonant other than ñ, R or s: kalki 'name of a Tamil weekly' [kɛlxi], koḷkay, 'policy' [koḷxai], maarkaḷi 'December' [mɛ:rxaḷi]

[g] voiced dorso-velar plosive occurs medially in the sequence -ñk- : paṇku 'share' [paṇgɪ]

(2) c

[č] voiceless palatal affricate in utterance initial position. In the speech of some people it freely varies with voiceless apico-alveolar sibilant in some words: cattti 'vessel' [čaṭṭi], cari 'right' [čɛdi] ~ [sɛdi]

[c̥] voiceless palatal affricate when preceded by a retroflex plosive, r or R: ka ṭci 'party' [ka ṭç̣i], vii ḷci 'down-fall' [ṿɸ : ḷç̣i], muya Rci 'effort' [m u ỵɸ ṭç̣i] ku ḷir ci 'coolness' [ku ḷiṛç̣i]

[c̥̄] voiceless palatal affricate (with the stop element slightly prolonged) when doubled: paccay 'green' [p̣ɸ c̥̄ . ç̣̄ a i]

[s] voiceless apico-alveolar sibilant medially between vowels: pacl 'hunger' [p̣ɸ s i]

[j] voiced palatal affricate medially after n: pa ñ̃ cu 'cotton' [p̣ɸ ñ̃ j̣ɸ]. Voicing is not heavy.

(3) ṭ

[ṭ] voiceless retroflex plosive medially before c: a a ṭci 'rule' [a : ṭç̣i]

[ṭ:] long voiceless retroflex plosive as the realisation of the intervocalic sequence -ṭṭ-: pa ṭṭu 'silk' [pa ṭ : ɸ]

[ɣ] voiced sublamino-post alveolar fricative in intervocalic position: pa ṭa m 'picture' [pa ɣ a m]. In some words it freely varies with the voiced retroflex plosive: ta ṭa y 'obstacle' [ṭ a ɣ a i] ~ [ṭ a ḍ a i]

[ḍ] voiced retroflex plosive in the sequence -nṭ, -mṭ-: va n̄ ṭu 'beetle' [va n̄ ḍ ɸ], em̄ ṭa n̄ 'cunning person' [em̄ ḍ a n̄]. The word em̄ ṭa n̄ is a loan-word but occurs in the speech of all (monolinguals and bilinguals) alike.

(4) ṭ

[ṭ] voiceless lamino-dental plosive (i) utterance initially: ṭa m p̄ i 'younger brother' [ṭ a m b̄ i],

(ii) in the sequence -ṭm-, -kṭ-: pa ṭm a a 'personal name' [pa ṭ m a :], pa k̄ t̄ i 'piety' [pa k̄ t̄ i]

[t̄:] long, voiceless lamino-dental plosive as the realisation of the intervocalic sequence -t̄t̄-: pa t̄t̄ u 'ten' [pa t̄ : ɸ]

[ɣ̄] voiced inter-dental fricative in intervocalic position and in the sequence -yt̄-, -rt̄-: a t̄u 'that' [a ɣ̄ ɸ] ay t̄u 'sparseness' [a i ɣ̄ ɸ], t̄e e r t̄al 'election' [t̄e : r ɣ̄ a i]. In the speech of some people it is a voiced inter-dental plosive.

[d̄] voiced lamino-dental plosive in the sequence -nt̄-: pa n̄ t̄u 'ball' [pa n̄ d̄ ɸ]

(5) p

[p] voiceless bilabial plosive in utterance initial position and in the sequence -Rp-, -cp-, -lp-: puu 'flower' [p u :], ke R panay 'pregnancy' [ke ṭ p̣ɸ n̄ a i], a a c pa t̄ t̄ i ri 'hospital' [a : s pa t̄ : i r i], k a a l̄ p u 'prejudice' [ka : l̄ p̄ ɸ]. After a retroflex p is slightly long.

[p:] long voiceless bilabial plosive as the realisation of the intervocalic sequence -pp-: appam 'hoppers' [a p : a m]

[β] slightly voiced bilabial fricative intervocalically and in the sequence -rp-, -lp-: a a pa t̄ t̄ u 'danger' [a : β a t̄ : ɸ], ma ar pu 'chest' [m̄ ɸ r β ɸ], iya lpu 'nature' [i ȳ ɸ l̄ β ɸ].

[b] voiced bilabial plosive in the sequence -mp-, -np-, -ŋp-: ka m p̄ u 'stick' [ka m b̄ ɸ], a n p̄ u 'affection' [ɸ n̄ b̄ ɸ], pa n̄ p̄ u 'culture' [pa n̄ b̄ ɸ]. Voicing is not so heavy as in the Indian Tamil.

(6) R

[R] voiced apico-alveolar trill occurs word-initially, and intervocalically: Racci 'meat' [R̄ ɸ c̣ . ç̣̄ i], Rakku 'unload' [R̄ a ḳ : ɸ], Rap̄ par 'rubber' [R̄ a p̣ : ɸ r̄], ka Ri 'curry' [ka Ri], po Ri 'trap' [po Ri], kuu Ray 'bridal sari' [ku : R̄ a i].

[t] voiceless alveolar plosive in the sequence of another consonant: meeRku 'west' [m e : t k ɤ], keRpany 'pregnancy' [k e t p ɛ n a i], muyaRci 'effort' [m u y a t ʃ i]

[t:] long alveolar plosive as the realisation of the intervocalic sequence - RR - veRRi 'victory' [vet:i], paRRu 'affection' [p ɛ t : ɤ], oRRai 'single' [o t : a i], maRRa 'other' [m ɛ t : ə]. Words with medial - RR - are not many. Medial - RR - in words in the high variety is realised as -tt- in several words in the spoken Tamil

(7) g

[g] voiced dorso - velar plosive word - initially and word-finally in loans from English: geem 'game' [g e : m], mag 'mug' [m a g] (only in the speech of bilinguals)

(8) j

[ɟ] voiced palatal affricate (i) word - initially: juuri 'jury' [ɟ u : r i] (ii) intervocalically: kaju 'cashew nut' [k a ɟ ɤ]. In the speech of monolinguals initial j in loans is realised as y or c depending the word. Medial j is either s or c.

[j.ɟ] voiced palatal affricate with the stop element prolonged as the realisation of medial - jj - perhaps only in one word: bajji 'a savoury' [b a j . ɟ i]

(9) d

[ɖ] voiced retroflex plosive in word - initial position: daappu 'attendance register' [ɖ a : p : ɤ], daak kottar 'doctor' [ɖ a : k : o t : ɛ r]

(10) b

[b] voiced bilabial plosive in word-initial and in intervocalic position: baaba 'barber' [b a : b ə], bil 'bill' [bil]

Fricatives

(1) h

[h] voiceless glottal fricative in word-initial position - only in the speech of bilinguals: hinti 'Hindi' [h i n d i]

(2) f

[f] voiceless labio-dental fricative in word - initial and word - medial position: foom 'form' [fo:m], kofi 'coffee' [kofi]

(3) z

[z] voiced lamino - fricative word - initially, only in loans from English: zuu 'zoo' [z u :]

Nasals

(1) ñ

[ñ] voiced - velar nasal. Word - initially only when reference is made to the letter ñ : ñ a n a a 'the letter ñ'. Word - medially it always occurs with k, - ñ k - : pañku 'share' [p a ñ g ɤ]

[ñ:] long voiced velar nasal occurs only in the high variety of Tamil only in two words: iññanam 'in this way' [i ñ : ɛ n a m], aññanam 'in that way' [a ñ : ɛ n a m]

(2) ñ̃

[ñ̃] voiced lamino - palatal nasal occurs only in a couple of words word-initially: ñ̃ a p a k a m 'memory' [ñ̃ a : β a x a m]. Word - medially it occurs only in the sequence - ñ̃ c - : a ñ̃ c u 'five' [ɛ ñ̃ ɟ ɤ]

[ñ̃:] long voiced lamino palatal only in two words (perhaps borrowed in recent times from the high variety): viññanam 'science' [vi ñ̃ : a : n a m], a ñ̃ ñ̃ a n a m 'ignorance' [ɛ ñ̃ : a : n a m]

(3) η

[η] voiced retroflex nasal (i) in the intervocalic sequence - η t-, - η m-: η an η tu 'beetle' [η an η d η], a η m η ay 'valour' [η a: η m η i] (ii) word-finally: a η 'male' [η a: η], p η n 'female' [η o η]

[η :] long voiced retroflex nasal as the realisation of the intervocalic sequence - η η -: η an η i 'water' [η a: η :i]

[η] voiced retroflex nasal flap in intervocalic position: ka η ippu 'judgement' [η ka η ip: η]

(4) n

[n] voiced apico-alveolar nasal (i) word-initially: naan 'I' [η na: η] (ii) intervocalically can η 'saturday' [η ca: η i] (iii) word-finally η een 'honey' [η te: η] (iv) in the sequence - η m-, - η nr-: η an η m η ay 'nature' [η te: η m η ai], en η ay 'my' [η enda η i]

[n:] long voiced apico-alveolar nasal as the realisation of the intervocalic sequence - η η -: annam 'swan' [η ca: η am], kannay 'side as in a game' [η ka: η ai]

[η] voiced lamino-dental nasal in the intervocalic homorganic sequence - η t: pa η tu 'ball' [η pa η d η]

(5) m

[m] voiced bilabial nasal occurs (i) word-initially: ma η 'soil' [η ma: η] (ii) intervocalically umi 'husk' [η umi] (iii) in the intervocalic sequence -mp-, - η m-, - η nm-, - η nm-, - η lm-, - η mt-, rm: kampu 'stick' [η ka η mb η], pa η ma η 'personal name' [η pa η ma: η], nanmay 'benefit' [η na: η m η ai], a η m η ay 'valour' [η a: η m η ai], η a η lm η ay 'humility' [η ta: η lm η ai], em η an 'cunning person' [η em η da: η], oormam 'fortitude' [η o: η rm η am]-. em η an is a loan-word.

(6)

[m:] long voiced bilabial nasal as the realisation of the intervocalic sequence - η m-: ammi 'grinding stone' [η am: η i].

Liquids

(1) r

[t] voiceless alveolar plosive word-initially mostly in loan-words: raacaa 'king' [η ta: η sa: η], raaman 'Rama-name' [η ta: η man], re η tu 'two' [η te: η d η].

[d] voiced alveolar plosive (i) in intervocalic position: oru 'one' (adj.) [η od η], por η 'fry' [η pod η] (ii) in the sequence - η nr-: en η ay 'my' [η enda η i]. Voicing is quite light.

[r] short trill or a flap when it does not occur immediately after the first syllable: cakoo η ari 'sister' [η ca: η xo: η ari], caa η ttiri [η ca: η ttiri].

[r] an alveolar trill word-finally or word medially before another consonant: avar 'he, honorific' [η av η er], ka η nnir 'tears' [η ka: η nnir], poorvay 'cover' [η po: η rvai], caarmanay 'easy chair' [η ca: η rm η enai]. Long alveolar trill is heard due to sandhi operation in certain types of morphemes (verb): oorren 'I run' [η o: η ren] (oo η tu+ren); η eer η ram 'we search' [η te: η er: η am] (η ee η tu+ram); ceerren 'I join' [η ce: η ren] (ceer+ren).

Both r and R have plosive quality and R is taken under plosive.

(2) l

[l] voiced apico-alveolar lateral occurs (i) word-initially (in loan-words): la η ka η y 'Lanka' [η la: η ka: η], laapam 'profit' [η la: η pa: η] (ii) inter-vocalically: pa η 'sacrifice' [η pa: η li], pu η 'tiger' [η pu η li], (iii) finally: vaal 'tail' [η va: η l], paal 'milk' [η pa: η l], (iv) medially in the sequence -lp-, -lk-, -lv-:

(7)

iyalpu 'nature' [iyɛlβɸ] kalki 'a weekly magazine' [kɛlxi], toolvi 'defeat' [tɔ:lvɪ].

Monosyllabic words (only nouns) with short vowel ending in -l in the high variety have become -u ending words in spoken Tamil. kal 'stone' in the high variety is kallu in spoken Tamil. Also see nel 'paddy' > nellu, pal 'teeth' > pallu. But nil 'stay' > nil; vil 'sell' > vil.

[l:] long voiced apico-alveolar lateral occurs as the realisation of the intervocalic sequence -ll-: nalla 'good' [nɛl:ə], pallu 'teeth' [pɛl:ɸ]

(3) l

[l] voiced retroflex lateral occurs (i) word-initially in one loan word: laacci 'drawer' (ii) intervocalically: kali 'paste' [kaɭi], pilay 'error' [pɸɭai], (iii) word-finally: vaal 'sword' [va:l], teel 'scorpion' [tɛ:l] (iv) in the intervocalic sequence -lp-, -lk-, -lm-, -lv: iyalpu 'nature' [iyɛlβɸ], kol kay 'policy' [koɭxai], taa may 'humility' [ta:ɭmai], vee lvi 'animal sacrifice' [vɛ:ɭvi].

Monosyllabic words (only nouns) with short vowel ending in -l in the high variety have become -u ending words in Jaffna spoken Tamil. Other consonantal ending words in the high variety do not take an -u finally when used in speech: muɭ 'thorn' > muɭlu, eɭ 'gingely' > eɭlu but kan 'eye' > kan.

In the speech of bilinguals [l] occurs initially in cluster with another consonant in loans from English: glaas 'glass' [gɭa:s]

[ɭ:] long voiced retroflex lateral occurs as the realisation of intervocalic sequence -ll-: kaɭɭu 'toddy' [kaɭ:ɸ] muɭɭu 'thorn' [muɭ:ɸ].

Semivowels / approximants

(1) y

[y] voiced dorso-palatal semivowel occurs (i) word-initially: yaman 'God of death' [yamən], yaar 'yard' [yɛ:r], (ii) intervocalically: kaayam 'wound' [kɛ:yam], payan 'benefit' [pɛ:yən], (iii) word-finally: kay 'hand' [kaɪ], paay 'mat' [pɛ:y], (iv) as the first element of word-medial consonant clusters: ayɭu 'sparseness' [ɛyɸɸɸ].

Words with initial y are mostly loans.

In words ending in -aay the final y may optionally be dropped. When this happens the aa has the same phonetic quality [ɛ:] that it would have if the y is still there. It is thus different from a final aa where no y existed in the first place. The following pairs of words would bring out the difference:

vaay 'mouth'	vaa 'come'
[vɛ:y] ~ [vɛ:]	[va:]
taay 'mother'	taa 'give'
[tɛ:y] ~ [tɛ:]	[ta:]
caay 'lean'	caa 'death'
[ɕɛ:y] ~ [ɕɛ:]	[ɕa:]

In the speech of some speakers the final [ɛ:] in the variant form of these words may be heard as [æ:].

Final y may also be dropped following ee:

peey 'ghost'	[pe:y] ~ [pe:]
meey 'graze'	[me:y] ~ [me:]
teey 'rub'	[te:y] ~ [te:]

[y:] long voiced dorso-palatal approximant as the realisation of intervocalic -yy-: ayyaa 'sir' [ɛy:a:], koyyaa 'a kind of fruit' [ko:y:a:].

[v] voiced labio-dental approximant occurs (i) word-initially: vaa 'come' [va:], vaṇṭu 'beetle' [vaṇḍɪ], (ii) intervocalically: avan 'he' (non honorific) cevi 'ear' [ɕəvi] (iii) as the second element in word-medial consonant clusters: tōyvu 'a disease, asthma' [tōyvu], tōolvi 'defeat' [tō:lvɪ], veervay 'sweat' [ve:rvaɪ]

[v:] long voiced labio-dental approximant as the realisation of the intervocalic sequence -vv-: kavvu 'to take a thing with mouth' [kav:vɪ], avvay 'personal name' [av:ai], vavvaal 'bat' [vav:a:l].

[ɻ] voiced retroflex approximant does not occur in Jaffna Tamil speech. However, a distinction is made orthographically between [ɭ] and [ɻ] in written Tamil.

Syllabics

Vowels

Oral monophthongs

All vowels preceded or followed by nasal consonants have the colouring of nasality but only very lightly. Similarly when retroflex consonants follow, vowels get the colouring of this consonant lightly and may be somewhat centralised.

(1) a

[ɛ] lower mid front unrounded vowel occurs before alveolar consonants (r, n, l), palatal consonants (c, ṇ, y) and before R when it is double or followed immediately by another consonant: nari 'fox' [nɛdi], pani 'dew' [pɛni], valay 'net' [vɛlai], paci 'hunger' [pɛsi]

(10)

kaṇci 'rice gruel' [kɛṇji], ayyaa 'sir' [ɛy:a:], paRRu 'affection' [pɛt:ɪ], kaRpu 'chastity' [kɛtpɪ].

[a] low central vowel occurs in other environments: appa 'then, so' [ap:a], aṭu 'that' [aɻɪ], paṭam 'picture' [paṭam]. Word-final [a] freely varies with higher mid central vowel [ə] (with lips unrounded) in several words: appa 'so' [ap:a] ~ [ap:ə].

(2) aa

[ɛ:] long low front vowel before y and r: naay 'dog' [nɛ:y], aar 'who' [ɛ:r], paar 'look' [pɛ:r].

[a:] long low central unrounded vowel occurs in other environments: aaṭu 'goat' [a:ṭɪ], kaakam 'crow' [ka:xam], appaa 'father' [ap:a:].

(3) i

[ɪ] high central unrounded vowel before retroflex consonants (ṭ, ṇ, ḷ), ṣ and before a single R when immediately followed by a vowel: itiyappam 'string hoppers' [ɪṭiyap:am], kiṇṇam 'vessel' [kɪṇṇam], kiḷi 'parrot' [kɪḷi], viṣṇu 'God Vishnu' [vɪṣṇɪ], kiRukku 'scribble' [kɪRɪk:ɪ], niRay 'weight' [niRai].

[i] high front vowel occurs in other positions: ilay 'leaf' [ilai], vilay 'price' [vilai], cinna 'small' [ɕin:a], ini 'hence forth' [ini].

(4) ii

[ɪ:] long high central unrounded vowel occurs before retroflex consonants (ṭ, ṇ, ḷ) and R before a vowel: iitai

(11)

'mortgage' [ɛ̃:ɾɛ̃], viiṇ 'vain' [vɛ̃:ṇ], niiḷam 'length' [nɛ̃:ḷam], kiiRu 'incise' [kɛ̃:Rɛ̃].

[i:] long high front unrounded vowel in other environments: iir 'nit' [i:r], iikku 'rib of palm leaf' [i:kɛ̃], tiiivu 'island' [ti:vɛ̃], tampiḷ 'brother (vocative)' [tambɪ:].

(5) u

[u] high back rounded vowel occurs in the first syllable of a word: umi 'husk' [umi], kulay 'bunch' [kulai].

[ɛ̃] high central unrounded vowel in any other syllable: aṭukku 'arrange' [aɳɛ̃kɛ̃], kaaṭu 'forest' [ka:ɳɛ̃].

(6) uu

[u:] long high back rounded vowel occurs word-initially, medially and finally: uur 'village' [u:r], kuuṭay 'basket' [ku:ɾai], puu 'flower' [pu:].

(7) e

[ə] higher mid central vowel (unrounded) occurs before retroflex consonants (ṭ, ṇ, ḷ), p, k, m, v, ṇ and R followed by a vowel: eṭu 'take' [əɳɛ̃], eṇṇay 'oil' [əṇ:ai], vɛḷi 'open space' [vɛḷi], eppa 'when' [əp:a], vekkam 'bashfulness' [vɛk:aṃ], vempal 'prematurely ripe fruit' [vɛmbal], evay 'who (plural)' [əvai], veṇkaayam 'onion' [vɛṇṅɛ̃:yam], veRu 'hate' [vɛRɛ̃].

[e] mid front short vowel in other environments: eḷi 'rat' [eli], veRRi 'victory' [vetti].

(12)

(8) ee

[ə:] higher mid central long vowel occurs before retroflex consonants (ṭ, ṇ, ḷ), p, k, m, v, ṇ and R followed by a vowel: eeṭu 'ola manuscript' [ə:ɾɛ̃], eṇi 'ladder' [ə:ṇi], meeḷam 'drum' [mə:ḷam], eppam 'belching' [ə:p:aṃ], teekku 'teak' [tɛ:kɛ̃], veempu 'margosa' [və:mbɛ̃], tēevay 'need' [tɛ:vai], tēṇkaay 'coconut' [tɛ:ṇṅɛ̃:y], tēeRu 'piece' [tɛ:Rɛ̃].

[e:] mid front unrounded long vowel occurs in other environments initially, medially and finally: een 'why' [e:n], veer 'root' [ve:r], avanee 'he, emphatic' [avane:].

(9) o

[o] mid back rounded vowel initially and medially: oḷi 'ray' [oḷi], koti 'flag' [koɾi].

(10) oo

[o:] mid back rounded long vowel occurs word-initially, medially and finally: oolay 'palm leaf' [o:lai], koeyil 'temple' [ko:yil], noo 'pain' [no:], poo 'go' [po:].

(11) æ

[æ] front low vowel occurs in a few loans from English: bæṇk 'bank' [bæṇk].

In the speech of monolinguals and some bilinguals [ɛ:] pronounced without the y in word-final sequence -aay in Tamil words is heard as [æ].

(13)

Diphthongs

The Tamil letters ai and au are alternantly written as ay and av. The occurrence of au is infrequent. It occurs in a few personal names. In the speech of monolinguals only av occurs. For instance the monolinguals would pronounce the personal name Gowri only as [kavuri].

In the present analysis ai is treated as ay wherein a will have the phonetic quality [a ~ ɛ].

Restrictions of phonological segments to loan words

In the speech of the monolinguals loan words with foreign sounds have been maximally assimilated to the native phonological system. For instance punal 'funnel' [punɛl], iñcippat tar 'inspector' [iñcip:at:ɛr], kootu 'court' [ko:ɽɛ], ciRaappar 'shroff' [ɽɛRa:p:ɛr]. Even foreign personal names have been assimilated: laccumi 'Lakshmi' [lac.ɽmi], innaaci 'Ignatius' [in:a:si], kappiRiyal 'Gabriel' [kap:ɛRiyeɛl].

This situation is different from the Indian where monolinguals use loan-words with sounds foreign to Tamil in their day to day speech.

Any word with initial g, j, d, t, d, b, l, l or medial -gg-, -jj-, -dd-, -dd-, -bb- or final k, g, c, j, p, b is a loan-word. Similarly the presence of ɽ, h, f, z in any position of a word and the presence of s word-finally will indicate that the word is foreign.

Most of the words beginning in r or R are loan-words. A couple of native words begin in r or R having lost an

initial vowel, mostly i: reñtu 'two' [təñdɛ], Rakku 'unload' [Rak:ɛ]. These words are written and pronounced with an initial i in the high variety.

A consonant cluster word - initially or word - finally would indicate that the word is foreign. Words of this type occur only in the speech of bilinguals.

Vowels occurring only in loan words

The occurrence of æ before nasal is foreign to Tamil. It occurs in the English loan 'bank'. Monolinguals have this word assimilated as vañki 'bank' [vañgi].

Restriction of phonological segments by grammatical categories

Restriction by word - classes

In the speech of the monolinguals loan-words (maximally assimilated) occur only in the word class of nouns. The numeral laccam 'lakh' is an exception. Bilinguals may use words belonging to other word-classes depending their code-switching.

Borrowings are invariably in their root-form. But native suffixes are added to them: kaar 'car' kaarkaɽ 'cars', ravun 'town' ravunilay 'in the town'.

Phonotactics

Word - final consonants

The following consonants occur word-finally: r, n, m, y, l, ɽ.

Loans from English ending in consonants like k, c, t take a final u in the speech of the monolinguals: 'break' piReekku, 'watch' vaaccu, 'ticket' rikkeRRu.

Initial consonants

All consonants except *ṇ* occur word-initially. The initial occurrence of *ṭ* and *ḷ* is restricted to loan-words only.

Words with initial *ṭ*, *ṇ*, *ṁ*, *y*, *R*, *l*, and *ḷ* are not many. *ṇ* occurs initially but only in one word: *ṇānā* 'the letter ṇ'. *y* does not occur initially before front vowels or *o* in native words. *ḷ* occurs only in one word: *ḷāccai* 'drawer'. *r*, *R* and *l* occur initially both in native and loan-words. Their initial occurrence in native words is due to the loss of an initial vowel usually *i* which is retained in the high variety of Tamil: *iraṇṭu* 'two' (high variety) > *reṇṭu* (spoken); *iRakku* 'unload' > *Rakku*, *ilanṭay* 'a kind of tree' > *lanṭay*. *v* does not occur word-initially before back vowels in native words. It may occur in this position in loan-words: *voṭṭu* 'vote'.

Distribution of consonant clusters

Native words do not have initial or final consonant clusters.

In the speech of bilinguals consonant clusters occur word-initially and finally in loan-words from English: *skuul* 'school', *bReek* 'break', *milk* 'milk'. In the speech of the monolinguals such borrowings are assimilated to the native phonological system by adding a vowel initially or finally depending on the position of the cluster and sometimes inserting a vowel in between the medial cluster: *iskuul* 'school', *piReekku* 'break'.

Possible consonant clusters: initially and finally

All the possible clusters in English would occur in the speech of bilinguals who usually use a large number of English words in their Tamil speech.

Word-medial consonant clusters

Word-medial consonant clusters occur in both native words and loan words. Here only the clusters occurring in native words are given: *kk*, *cc*, *ṭṭ*, *ṭc*, *ṭṭ*, *pp*, *RR*, *Rk*, *Rc*, *Rp*, *ṇk*, *ṇc*, *ṇṇ*, *ṇṭ*, *ṇm*, *ṇṭ*, *nn*, *np*, *nR*, *nm*, *mm*, *mp*, *yy*, *yṭ*, *yp*, *vv*, *rr*, *rp*, *rṭ*, *rc*, *rm*, *rv*, *ll*, *lp*, *lv*, *ḷḷ*, *ḷk*, *ḷc*, *ḷm*, *ḷv*. Examples: *akkaa* 'elder sister', *paccay* 'green', *paṭṭu* 'silk', *kaṭci* 'party', *paṭṭu* 'ten', *appaa* 'father', *veRRi* 'victory', *teRku* 'south', *muyarai* 'effort', *keRpanay* 'pregnancy', *aṇkay* 'there', *paṇcu* 'cotton', *aṇṇay* 'elder brother', *paṇṭi* 'pig', *aṇmay* 'valour', *paṇṭu* 'ball', *teṇṇay* 'coconut tree', *anpu* 'affection', *ṭampiyanRay* 'younger brother's', *ṭaṇmay* 'nature', *ammaa* 'mother', *ampu* 'arrow', *payya* 'slowly', *ayṭu* 'sparsely', *kaypu* 'bitter', *vavvaal* 'bat', *oorraan* 'he is running', *maarpu* 'chest', *ayaṛṭi* 'forgetfulness', *kuḷirci* 'coolness', *oormam* 'fortitude', *veervay* 'sweat', *villu* 'bow', *iyalpu* 'nature', *ṭoolvi* 'defeat', *paḷḷu* 'a kind of verse', *koḷkay* 'policy', *viiḷci* 'down-fall', *ṭaalamay* 'humbleness', *veeḷvi* 'animal sacrifice'.

Words like *paḷṭi* 'devotion', *paṭmā* 'personal name', *kaṣṭam* 'difficulty', *viṣṇu* 'God Vishnu' occur commonly in the speech of a vast majority of speakers. These are borrowings from Sanskrit.

Some rural monolinguals with little literacy pronounce *kaṣṭam* and *viṣṇu* as *kayitṭam* and *vittuṇu* respectively.

The words *kaypu* and *kuḷirci* are written with three-consonant clusters in the high variety of Tamil as *kayppu* and *kuḷircci*.

In the Jaffna dialect of Tamil, inflected forms of nouns and verbs seldom create clusters that are not found within a word.

Distribution of vowels

Word - final vowels

All vowels occur word - finally except e, o and the diphthong au.

The short vowels i, u, e and a occur word - finally in a large number of words.

The long vowels occur word - finally but in root forms they occur mostly in monosyllabic words and such words are not many. ii occurs word - finally in ii 'fly', pii 'excreta', tii 'fire', cii 'an expression indicating negation, disapproval, disgust', nii 'you, impolite'; uu occurs only in one word, puu 'flower'. It also occurs in an onomatopoeic word: cuu indicating 'excess'. ee occurs word - finally with several words as an emphatic or as an interrogative marker. ee is also heard word - finally when y is dropped in the final sequence - eey. aa occurs word - finally in monosyllabic forms like vaa 'come', taa 'give', caa 'death', maa 'flour'. A couple of polysyllabic kin terms have aa word finally: akkaa 'elder sister', ammaa 'mother', appaa 'father', taataa 'grand father', etc. Also aa occurs word - finally as an interrogative marker with words: avanaa 'is he', oo occurs word - finally with only two monosyllabic words: poo 'go', noo 'pain'. Also it occurs as an interrogative marker (indicating slight doubt) with words: avanoo 'is he' (with slight doubt). In phrases like veyyiloo veyyil 'it is very hot', kuliroo kulir 'it is very cold', oo occurs word - finally indicating 'excess'.

Also long vowels occur in vocatives: tampii 'oh younger brother', appuu 'oh father', mannaee 'oh king' (in restricted contexts), mannaa 'oh king'. The root of the last two forms is mannan 'king'.

Word - initial vowels

The vowels a, aa, i, ii, u, uu, e, ee, o, oo all occur word - initially: akkaa 'elder sister', aal 'person', ilay 'leaf', iir 'nit', uppu 'salt', uur 'country', eli 'rat', een 'why', on tu 'one', oom 'yes'.

Sequences of syllabic vowels

In general, there are no sequences of syllabic vowels in Jaffna Tamil. But sometimes sequences of syllabic vowels are heard in the speech of rural monolinguals due to the loss of a consonant.

Word - medially ua, uua, oou, ooa, oaaa are heard as sequences: a t u a l 'they, non-human', puuaracu 'a kind of tree', p o o u t u 'it is going', pooan 'I won't go', pooaan 'he won't go'. In the second word the glide v is dropped. In all other words the consonant k is dropped.

Word - finally uua, ooa and oaaa are heard: kuua 'to whistle', pooa 'to go', pooaa 'she won't go'. In the first word the consonant v is dropped. In the other two, k is dropped. When questioned about these words, the speakers would pronounce the consonant too.

Suprasegmentals

Degrees of length

There are two degrees of contrasting length in vowels and consonants: short versus long.

Vowels

There are five contrasting pairs of short and long vowels: a/aa, i/ii, u/uu, e/ee, o/oo: a t i 'beat', aa t i 'July'; t i n 'eat', t i i n 'food'; ku t a y 'umbrella', ku u t a y 'basket'; keli 'greedy', keeli 'fun'; ko t i 'flag', ko o t i 'crore'.

Semivowels

The semivowels *y* and *v* contrast in duration: *ayar* 'thin layer of skin on a healing wound', *ayyar* 'a caste title'; *avay* 'they, human', *avvay* 'personal name'. Minimal pairs for the contrast of *y* and *v* in their duration are not many in the language.

Liquids

There is contrast between *l* / *ll* and *l* / *ll*: *pali* 'sacrifice', *palli* 'house lizard'; *pa l i* 'sin', *pa l l i* 'woman belonging to Palla caste'.

Nasals

Nasals *n* / *nn*, *n* / *nn* and *m* / *mm* also contrast: *a n a y* 'accommodate a being', *a n n a y* 'elder brother'; *cani* 'Saturday', *canni* 'coma'; *amay* 'take shape', *ammay* 'small pox'.

In the speech [*ñ* :] occurs only in two words and it is difficult to find a contrastive minimal pair for *ñ* / *ñ ñ*.

Fricative

In speech [*s* :] occurs only in two words: *bassilay* 'in the bus', *kissilay* 'echo form of *bassilay*'. The monolinguals use the form *vacu* [*vas* ±] instead of *bas*. The locative form of *vacu* is *vacuvilay*.

Stops and affricates

Examples for contrast between *k* / *kk*, *c* / *cc*, *t* / *tt*, *t* / *tt* and *p* / *pp*: *ma ka l* 'daughter', *ma k ka l* 'people'; *paca y* 'paste', *paccay* 'green'; *va t i* 'filter', *va t t i* 'interest'; *vi t a y* 'seed', *vi t t a y* 'knowledge'; *capay* 'assembly', *cappay* 'flat'.

Stress

Stress is not phonemic in Jaffna Tamil. However, the monolingual speakers have a phonetic stress. They usually pronounce words in isolation with a stress in the first syllable of the word.

In an utterance having a number of words, a particular word may be stressed, usually on the first syllable to indicate emphasis. The stress may be accompanied by a slight high pitch. Sometimes the stress can be on a syllabic segment, and in such instances the segment would be pronounced slightly longer. If a long vowel is involved in the segment, it would be made still longer. Geminated consonants may be also pronounced longer to indicate stress.

Intonation

Only some of the intonation patterns are described here. To date no systematic work has been made on the intonation patterns in Jaffna Tamil.

Statement type of utterances are characterised by a falling intonation.

naan pooRen
'I am going'

Interrogative utterances built around a 'question - word' such as *een* 'why' have the same intonation as that of the statement type.

nii een pooRaay
'Why are you going?'

But, if it indicates 'surprise', the intonation will rise at the end.

nii een pooRaay
'Why are you going?'

Interrogative utterances with the question marker - aa in the last word of the utterance allowing a 'yes' or 'no' answer have a rise - fall on the question marker.

avan ippa pa t i k k i R a a n a a
'Does he study now?'

It is possible to have the question marker on a non-final word in the sentence. In such an instance, the rise - fall will be on the question marker. There will be a fall at the end of the word.

avar na a l a y k k u k o l u m p u k k a a p o o R a a r
'Is he going to Colombo tomorrow?'

A declarative sentence can be used as a 'yes - no' question utterance. This type of utterance starts with relatively a low pitch, and the pitch gradually rises high. The whole utterance is usually uttered in a quicker sequence.

nii neeRRu va n t a a y
'Did you come yesterday?'

Imperative sentences are usually uttered with a falling intonation.

i n c a y v a a 'Come here'

Exclamatory utterances are usually uttered with a mid - level tone :

enna va t i v a a n a v i i t u
'What a beautiful house this (is)'

Utterances conveying a sarcastic sense have a drawl in every word in the utterance. Pitch level will be more or less the same throughout the utterance. This type of sarcastic utterance has a sustained terminal, finally falling down slowly.

nii nallaay pa t i c c a a y
'You studied well' (in the negative sense)

Contrary - to - fact utterances have a different pattern. The utterance starts with a relatively low pitch, rises to the mid high level and then falls down. It occurs with sustained terminal.

nii pa t t a n a m p o o n a a y

The meaning of this utterance is, 'you said that you would not go to town, but, having said so, you had gone'.

Assimilation

There are instances of progressive assimilation : among past tense markers -cc- and -ñc- are realisations of the basic markers -t t- and -n t- when preceded by a stem ending in a front vowel or palatal consonant : a t u -t t- en 'I accommodated', a t i -cc- en 'I beat'. There is only one word ending in -y whose past tense marker undergoes the progressive assimilatory process : (ma l a y) p e y -t - u t u 'it rained' > pe -ñc- u t u. Both forms p e y t u t u and p e ñ c u t u are in use.

Regressive assimilation takes place when a word ending in -m is followed by a word beginning in k - or c - in certain types of constructions: pa lam + caaRu is realised as [pa la c.ɕa: R ±] or [pa la ɲ̃ɕa: R ±] depending the meaning (or casual relation) of the words.

2. NOUN MORPHOLOGY

Inflection

Noun inflection

Means used to express functions of noun phrases

The basic means of expressing the function of a noun phrase is the use of a bound suffix (" case ending "). Bound suffixes are also used in derivational processes, and as markers of plurality. The order of these suffixes is derivational - number - case.

The different cases in Jaffna Tamil are exemplified by the following two paradigms for the singular of peṭiyan 'boy' and maram 'tree'.

Nominative	peṭiyan	maram
Accusative	peṭiyanay	marattay
Dative	peṭiyanukku	marattukku
Instrumental	peṭiyanaalay	marattalay
Comitative	peṭiyanootay	marattootay
Locative	peṭiyanilay	marattilay
Referential	peṭiyanittay	— —
Ablative	peṭiyanilay	marattilay
	iruntu	iruntu
Genitive	peṭiyanittay	— —
	iruntu	— —
	peṭiyaninray	marattinray

The dative case ending - ukku has an alternant -kku occurring after vowels: appaa 'father' appaakku, ammaa 'mother' ammaakku.

When -um is added to the locative case ending -ilay, the locative ending has a variant -il: oru itattila-yum ~ oru itattilum 'in no place', 'no where'.

Referential case ending -ittay has an alternant -ttay occurring only with nouns ending in -aa: appaa 'father' appaattay.

Genitive case ending -inray can be added to any stem. It has an alternant -ray occurring with nouns ending in -n and also with human nouns ending in -r: murukan 'Murugan' murukaninray ~ murukanray.

Genitive has -utaya also as a suffix particularly with pronouns: ennutaya 'my'. -atay is a variant of utaya: unkatay 'your'.

The locative marker -ilay occurs with both animates and inanimates: avarilay pilay illay 'There is no fault in him'; avayilay aar aar varuvina 'Who will come among them'; kallu kuurayilay viluntutu 'Stone fell on the roof'. The locative marker occurs in comparative and superlative expressions too: kannanil (paakka) ivan ketikkakaan 'He is clever than Kannan'; ellaarilum/ellaarilayum (paakka) ivar taan nallavar 'Of all, he is the best person', ellaa ttilum/ellaa ttilayum (paakka) inta niRam taan nallatu 'Of all, this colour is the best'.

Only animate nouns inflect for referential case. The referential case is usually used with verbs of 'asking' or 'taking': maamaattay keelunkoo 'Ask uncle', kannanittay maampalam etukkalaam 'We can buy mangoes from Kannan', avarittay collunkoo 'Tell him'. Possession and goal of motion

too may be expressed by using the referential case: avarittay kaasu irukku 'He has money', kannanittay poonkoo 'Go to Kannan'.

The ending that corresponds to -ittay in literary Tamil is -itam.

With some verbs either the referential -ittay or the accusative -ay can be used without any difference in meaning: maamaattay keelunkoo 'Ask uncle', maamaavayk keelunkoo 'Ask uncle'. Similarly, either -ttay or the dative -ukku can be used without any difference in meaning: avarittay collunkoo 'Tell him', avarukkuc collunkoo 'Tell him'. Instances of contrasts are: avaa kulantayittay kututtaa 'She gave (something) to the child', avaa kulantayayk kututtaa 'She gave the child', avarittay maampalam illay 'He has no mangoes', avarukku maampalam illay 'There aren't mangoes (left) for him'.

The locative marker -ilay and the referential marker -ittay may give the same meaning in some instances: antak kaacu avarilay irukkatum 'Let that money be with him', antak kaacu avarittay irukkatum 'Let that money be with him'; antap poruppay avarilay vita vecntaam 'Don't leave that responsibility with him / on him', antap poruppay avarittay vita vecntaam 'Don't leave that responsibility with him / on him'. (Here too, some speakers may feel a subtle difference in sense between the use of -ilay and -ittay. The use of -ittay may give a more 'specific' sense about the noun (location), whereas, the use of -ilay may give a general sense. On the

other hand, there are instances where sharp contrast could be seen between these two cases : avarilay veelay illay 'He is not the man to get the work through', avarittay veelay illay 'He has no work to offer'. The first example is an (idiomatic) expression commonly occurring in Jaffna Tamil.

For animate nouns, the ablative is expressed either with -ilay iruntu or -ittay iruntu. The use of -ilay iruntu is, however, infrequent.

In some contexts -ilay iruntu and -ittay iruntu can make a difference in meaning and cause a contrast: taay takappanilay iruntu pillaya! ellaarum vatantiyay parappinam 'All from parents to children are spreading the rumour', taay takappanittay iruntu pillaya! ellaarum vatantiyay parappinam 'All the children are spreading the rumour from their parents'.

With verbs such as etu 'take, get' and vaanku 'buy, receive, accept, take' the person from whom something is taken or received can appear in either the referential case + iruntu (i. e. ablative) or merely the referential case: avar naalayku cennattay (iruntu) kaacu vaankuvar 'He will get money from me tomorrow'.

It is possible to analyse iruntu as a postposition, instead of setting up a separate case as ablative.

The oblique form (of nouns that have a separate form before case endings) and the nominative form of nouns that do not have separate oblique form too may occur as genitive: maattu vaal 'tail of cattle', kannan katay 'Kannan's shop', petti muuti 'lid of box'.

Some adjectival forms too occur as genitive: mara ucci 'top of tree' (marattinray ucci, marattu ucci 'top of tree' are other possibilities).

Postpositions

Postpositions, some of which also occur as conjunctions or as adverbs, are used to express a wide range of syntactic and semantic functions. Some of them are bound, and others are free forms. They follow a number of different case forms. Postpositions (i) following a nominative: ceentu 'together', muulam 'through, with, by means of', varaykkum / varay 'upto, until', varayilay 'at about' (ii) following an accusative: cuRRi 'around', paRRi 'about, concerning', tavira 'except for' (iii) following a dative: meelay 'on, above', kiilay 'beneath', munnaalay 'before, in front of', munnukku 'before, in front of', pinnaalay 'after, behind', pinnukku 'afterwards, behind', -aaka 'for' (benefactive), ullay 'inside', pakkattilay 'in the vicinity of', etiray 'opposite', atiyilay 'at the bottom of'.

Ways in which different syntactic functions are expressed

The subject noun, or pronoun of an intransitive or of a transitive verb is usually in the nominative case. But a small set of defective verbs have to be considered exceptions to this general statement. The commonest of these defective verbs are veent - 'want, need', teri - 'know', puri - 'understand', piti - 'like', kitay - 'be available, obtain', vali - 'pain, hurt, ache'.

Three of these, veent -, kitay- and puri- may be said to have a nominative subject, because their arguments comprise an NP in the dative, and an NP in the nominative case. The nominative case NP can be a member of the non rational or rational class, but it is dominantly nonrational class.

eṇkaḷukku nalla caappaatu veenum
'We need good food'

eṇkaḷukku nalla cineekitar veenum
'We need good friends'

eṇkaḷukku iṇcay nalla caappaatu
kiṭaykkumaa

'Can we get good food here?'

uṇkaḷukku nalla maappiḷay kiṭayccaar
'You got a good bridegroom'

eṇkaḷukku intap paatam puriyeellay
'We don't understand this lesson'

Of the other three verbs, teri- has an NP (the person who knows) in the dative, and the other NP in the accusative if it is animate, and in nominative if it is inanimate:

aruḷukku maamaavayt teriyaatu
'Arul does not know uncle'

eṇkatay piḷḷayaḷukkuk koḷumpu
teriyaatu
'Our children do not know Colombo'

The verb piṭi- has an NP (the person who likes) in the dative, and the other NP in the locative (freely varying with the accusative) if it is animate, and in nominative if it is inanimate:

avaḷukkut tampiyilay piṭikkaatu
avaḷukkut tampiyayp piṭikkaatu
'She does not like younger brother'

avaḷukkut toocay piṭikkaatu
'She does not like dosai'

The verb vali- has an NP in the dative and the other NP (which is invariably an inanimate one) either in the nominative or in the accusative case, the nominative form being more dominant in use.

enakkut talay valikkutu
enakkut talayay valikkutu
'I have a head ache'

enakku vayiRu valikkutu
enakku vayittay valikkutu
'I have a stomach ache'

Another type of sentence where the verb does not have a surface subject in the nominative case is as follows:

enakkuk kaaccalaayk kiṭakku
'I have fever'

Subject of copular construction

The subject of a copular construction is a nominal in the nominative case.

Direct object

A human noun form occurring as a direct object will always have the accusative suffix -ay:

appaavayk kuuppitten
'I called father'

taṇkacciyayp peeca veentaam
'Don't scold younger sister'

If the accusative suffix is deleted in the above second sentence, it would give a totally different meaning:

taṇkacci peeca veentaam
'Let younger sister not speak'

An animate noun other than human may or may not have the accusative suffix depending on the intended meaning :

maattayk kattu

'Tether the cow'

viittayp paattuk kol

'Look after the house'

avan maatu katturaan

'He is tethering the cow'

avan maatu katturaanaa

'Is he tethering the cow?'

nii pooy aatu meey

'Go and graze the goats'

maatu vaan ku

'Buy a cow'

If the accusative suffix is deleted in the above first sentence, it would form a compound, maatu kattu and mean 'tethering of cow'. Usually the second sentence is not uttered without the accusative suffix. But, if someone were to say it, it would give the same meaning as the one with the accusative suffix.

All other sentences above could occur with accusative suffix, but, they would give a different meaning - the object noun would be particularized.

avan maattayk katturaan

'He is tethering the cow'

avan maattayk katturaanaa

'Is he tethering the cow?'

nii pooy aattay meey

'Go and graze the goat'

maattay vaan ku

'Buy the cow'

Generally for inanimate nouns the accusative marker is not suffixed, unless one wants to particularize or emphasize the object noun.

enkalukku oru viitu paar

'Look for a house for us'

avar anta viitu vaan kiRaar

'He is buying that house'

enkalukku oru viittayp paar

'Look a house for us'

avar anta viittay vaan kiRaar

'He is buying that house'

In Jaffna Tamil, the noun viitu 'house' plus the accusative suffix followed by either the verb poo 'go' or vaa 'come' give the dative meaning: viittay pooRen 'I am going home', viittay vaan koo 'Come home'.

Indirect object

The indirect object noun is usually in the dative case.

maamaa enkalukkuk kaacu tantaar

'Uncle gave us money'

The verbs kutu 'give', taa 'give' and collu 'say, tell' can have an indirect object noun, both in dative and referential case.

unray kaaRay avarukkuk kuṭu
 'Give your car to him' (change of ownership)

unray kaaRay avarittay kuṭu
 'Give your car to him'

aṭay enakkut taa
 'Give that to me' (change of ownership)

aṭay ennattay taa
 'Give that to me'

aṭay maamaakkuc collu
 'Tell that to uncle'

aṭay maamaattay collu
 'Tell that to uncle'

The dative case is used when a change of ownership is involved, and when giving takes place without a clear change of ownership the referential case is used. There is no such difference of meaning with regard to the verb collu.

Object of comparison

The object of a comparison will be in the accusative followed by viṭa, kaattilum, paakka, paakkilum 'than'.

kolumpu yaalpaanattay viṭap pericu
 'Colombo is bigger than Jaffna'

The locative case optionally followed by um or/and paakka is also used for comparison.

ennil (paakka) avan uyaram
 'He is taller than me'

ennilum (paakka) avan uyaram
 'He is taller than me'

Object of equation

There are two equative markers: poolay 'like, similar to' and maatiri 'like, similar to, manner'. The object of an equation will be either in the nominative or in the accusative case, if the equative marker is poolay:

cellayyaa poolay murukanum
 nallaayp paṭippar

cellayyaavayp poolay murukanum
 nallaayp paṭippar

'Murugan too will do well in studies like Chelliah'

maatiri can be used as an adjective of comparison. That with which something is compared will be in the direct case:

tampikku vaanṅkinatu maatiri
 enakku oru catṭay vaanṅkunkoo
 'Buy me a shirt like the one bought for younger brother'

maatiri can also form manner adverbials, that is, 'in such a manner, in such a way'. In this usage maatiri will be preceded by an adjective or verbal adjective:

naaṅkaḷ anta veelayay inta
 maatiric ceyyalaam
 'We can do that work in this manner'

naaṅkaḷ anta veelayayp ponnar
 ceyta maatiric ceyyalaam
 'We can do that work in the manner Ponnar did it'

Complement of copular construction

In copular sentences with nominal complement, Jaffna Tamil makes a difference between the defining and the role

type. A noun in the role type can optionally be preceded by *oru* 'one', whereas a noun in the defining type cannot be preceded.

avar (oru) vaattiyaar

'He is a teacher'

avan manitan

'He is a man'

In the identity type, the subject of the construction can be either (i) a noun or a pronoun, or (ii) a neuter pronoun (*atu*, *itu* or *utu*).

avan ponnann

'He is Ponnann'

itu ponnann

'This is Ponnann'

The complements of *aaku* 'become' are also nouns in the nominative case.

Subject - complement

The form of a subject complement would be in the nominative case:

*avar vitaanayaar aakkappaṭṭu ippa
rentu varucam*

'It is two years since he was made the village headman'

Object - complement

Object complements are usually in the nominative case

naaṅkal avarayṭ talayvar aakkinam

'We made him the president'

Objects governed by adjectives

Certain predicative adjectives can govern nouns. The noun in such cases is usually comitative or locative (but never the referential - *iṭṭay*).

*unray piḷḷayaḷooṭay avar anpaay
irukkiRaar*

*unray piḷḷayaḷilay avar anpaay
irukkiRaar*

'He is affectionate towards your children'

*avar ṭampiyooṭay cariyaana
koopamaay irukkiRaar*

*avar ṭampiyilay cariyaana
koopamaay irukkiRaar*

'He is very angry with younger brother'

*avan veelayaakkalooṭay
rampak kaṇṭippaay irukkiRaann*

*avan veelayaakkalilay rampak
kaṇṭippaay irukkiRaann*

'He is very stern with workers'

Agent in passive / pseudopassive / impersonal constructions

In a passive construction, the agent would be a noun in the instrumental case (suffix is - *aalay*):

anta veelay avaraalay ceypaṭum
'That work will be done by him'

Means of expressing nonlocal semantic functions: Benefactive

The benefactive is expressed by the postposing of - *aaka* or - *enttu* to a noun or pronoun in the dative case.

itayk kamalaakkaaka vaan_nkinen
'I bought this for Kamala'

itayk kamalaakken_tu vaan_nkinen
'I bought this for Kamala'

The use of -aaka can convey the meaning of 'on behalf of' too depending on the context of speech.

itay kamalaakkaaka vaan_nkinen
'I bought this on behalf of Kamala'

Source

Source is usually expressed by the use of the ablative case: -t_tay irun_tu for animate nouns (freely varying with -ilay irun_tu in some constructions) and -ilay irun_tu for non-animates.

en_nka_lukku makanittay irun_tu
innu_m tavaal on_tum vareellay
'We haven't yet received any letter from son'

avarittay irun_tu on_tum aRiya
mutiyaatu
avarilay irun_tu on_tum aRiya
mutiyaatu

'We can't find out anything from him'

en_nka_tay makan kolumpilay irun_tu
neeRRu vantittaar
'Our son has come from Colombo yesterday'

It is also possible to express source by the use of the instrumental case in constructions involving travel from one place to another. The use of the instrumental is very dominant in the speech of some speakers.

en_nka_tay makan kolumpa_alay
neeRRu vantittaar
'Our son has come from Colombo yesterday'

Instrumental

Instrumental is usually expressed by the case ending -a_alay.

marattayk kattiya_alay vet_ttina_n
'He cut the tree with a knife'

Negative instrumental is expressed by the use of illaama(l):

katt_i illaama(l) vet_tta mutiyaatu
'It is not possible to cut without a knife'

Comitative

Comitative is expressed by the case ending -oo_tay. Sometimes -ku_uta is combined with -oo_tay and the combination gives the sense of 'along with':

an_nkay appaavoo_tay poon_nkoo
'Go there with father'

an_nkay appaavoo_tay ku_utap poon_nkoo
'Go there along with father'

Negative comitative is expressed by the use of illaama(l):

an_nkay appaa illaama(l) taniyap
poon_n
'I went there alone without father'

Circumstance

Circumstance is usually expressed by the comitative suffix -oo_tay:

uuttayk kayyoo_tay nikkiRa
petiyan ponna_n
'The boy with dirty hands is Ponna'

veeṭṭi caalvayooṭay vantavar taan
ponnar

'The person who came in dhoti and shawl was
indeed Ponnar'

The second sentence above can give another meaning too :
'The person who brought dhoti and shawl was indeed
Ponnar'.

An alternative way of expressing circumstance is by
the use of participle construction :

paṭṭu veeṭṭi uṭuṭṭa oruvar pooRaar
'A person dressed in silk dhoti is going'

Negative circumstance is expressed by using an appro-
priate verb with -aama(1) :

caṭṭay pooṭaama(1) pooRaar
'He is going without (wearing) a shirt'

Possessive

Possessive in noun phrases is usually expressed by the
genitive suffix :

ivaa enray taṅkacci
'She is my younger sister'

itu rattinattinray kaar
'This is Ratnam's car'

Quality

Quality is expressed by an abstract noun followed by
-aana or -uḷḷa :

kunamaana peṭiyan
kunamuḷḷa peṭiyan
'boy of (good) character'

irakkamuḷḷa manitan
'man of compassion'

Negative quality is expressed by an abstract noun followed
by illaata (the relative participle of the negative verb
illay) or by keṭṭa (the participle of the verb keṭu
'spoil') :

kunan keṭṭa peṭiyan
'boy without character'
(literally, boy with spoilt character)

irakkamillaata manitan
'man without compassion'

Reference quality is expressed by the genitive case
suffix :

anta manitanray yookkiyam
'the integrity of that man'

Quantity

It is as in Indian Tamil (see R. E. Asher, Tamil
1982 : 113).

Material

It is as in Indian Tamil (see R. E. Asher, Tamil
1982 : 114) except in the figurative sense.

The expression of material in a figurative sense usually
involves the device of compounding :

kal neṇcu
'a heart of stone'

pon manam
'a heart of gold'

Manner

Manner is expressed either by a comitative case form or by the adverbialising suffix -aay or by -aaka. The use of -aaka is, however, infrequent.

avan anta veelayay nalla
ucaarootay ceytaan

'He did that work with a lot of enthusiasm'

avan anta veelayay nalla
ucaaraayc ceytaan

'He did that work very enthusiastically'

avan anta veelayay nalla
ucaaraakac ceyyiRaam

'He is doing that work very enthusiastically'

Negative manner is expressed by using illaama (l):

avan anta veelayayk
koncamum ucaar illaamal ceyyiRaam

'He is doing that work without even a little enthusiasm'

Cause

Cause is usually expressed by the instrumental case form:

avanray perumayaalay
avan kettaan

'He was ruined because of his pride'

kannan lantanukkup
poonataalay nallaayp paticcaar

'Kannan studied well because of his going to London'

Purpose

Purpose is expressed by a nominal in the dative case:

unkatay aayutanikalay
enray veelaykkup paaviccanaan

'I did use your instruments for my work'

Function

Function is expressed by the adverbialising suffix -aay:

peenayay uuciyaay paaviccen

'I used the pen as a needle'

Reference

Reference is expressed by adding the postposition paRri to a noun in the nominative or accusative case (a human pronoun will be always in the accusative).

enkatay naatu paRri

avarukkuc connen

enkatay naattayp paRri

avarukkuc connen

'I told him about our country'

atu paRRik keekka veentaam

atayp paRRik keekka veentaam

'Don't ask about that'

Essive

Essive is expressed by the use of the adverbialising suffix -aay

tampi kolumpilay

taakko ttaraay veelay ceyyiRaar

'Younger brother is working as a doctor in Colombo'

Translative

Translative is usually expressed by a noun in the nominative case or by the use of the adverbialising suffix -aay. The choice depends on the verb that follows. For instance, if the following verb is aakku 'make', the noun will be in the nominative case; if the following verb is either niyami 'appoint', or vay 'place', or teri 'elect' the noun will have the suffix -aay.

avaray caṅkaṭ talayvar aakkinam

'We made him the president of the society'

avaray caṅkaṭ talayvaraay
niyamiccām

'We appointed him the president of the society'

avaray caṅkaṭ talayvaraay teriñcam

'We elected him the president of the society'

Part - whole

Part - whole relationships are usually expressed by possessive noun phrases wherein the noun referring to the whole will mostly have the genitive case suffix:

naayinray talay

'the head of a dog'

marattinray nuni

'top of a tree'

Expressions like marattu nuni, mara nuni are also possible.

Partitive

Partitive numeral

Partitive numerals follow nouns in the locative case. A classifier, peer follows the partitive numeral when reference is made to human nouns.

maampalaṭṭilay pattu
'ten of the mangoes'

naayilay reṇṭu
'two of the dogs'

peṭiyaṅkaḷilay muṇṭu peer
'three of the boys'

Nonpartitive numerals

Nonpartitive numerals precede the noun they modify.

muṇṭu peṭiyaṅkaḷ
'three boys'

Partitive quantifiers

Partitive quantifiers follow nouns in the locative case.

maampalaṭṭilay koñcam
'some of the mangoes'

naayilay cilatu
'a few of the dogs'

peṭiyaṅkaḷilay cilar
peṭiyaṅkaḷilay cila peer
'some of the boys'

Nonpartitive quantifiers

Nonpartitive quantifiers precede the noun they modify. They are not specially marked.

cila peṭiyaṅkaḷ
'some boys'

koñcap peer
'a few persons'

poottalilay koṇca eṇṇay irukku
 'There is some oil in the bottle'

Partitive negative quantifiers

Partitive negative quantifiers occur in the following sequence depending on the type of the noun involved :

- (i) plural human noun in the nominative + oruvar + um + illay / verb with marker of negation

petiyaṅkaḷ oruvarum vareellay
 'None of the boys came'

veelayaakkaḷ oruvarum pookeellay
 'None of the workers went'

veelayaakkaḷ oruvarum aṅkay illay
 'None of the workers is there'

- (ii) singular nonhuman noun + oṇṭu + um + illay / verb with marker of negation

kaṭay oṇṭum tiRakkeellay
 'None of the shops is open'

- (iii) mass noun + a minimising quantifier like koṇcam + um + illay / verb with marker of negation

avar paal koṇcamum vaankeellay
 'He did not buy a drop of milk'

In (i) instead of oruvar the question word aar 'who' or evar 'who' too may occur. Similarly in (ii) instead of oṇṭu the question word eṭu 'which' too may occur. But their occurrence is infrequent.

The nonhuman noun (ii) may sometimes occur in the plural.

A partitive sense is also possible with the question word eṇṭa 'which' placed before the noun irrespective of the type. When eṇṭa occurs the numeral oruvar/oṇṭu is dropped. The noun form will be usually in the singular (but gives plural sense):

eṇṭap peṭiyanum vareellay
 'None of the boys came'

eṇṭak kaṭayum tiRakkeellay
 'None of the shops is open'

If the speaker intends to emphasize the noun, he may have it in the locative case:

peṭiyaṅkaḷilay oruvarum vareellay
 'Among the boys none came'

(This can suggest that in another category, say among girls, some came.)

kaṭayilay oṇṭum tiRakkeellay
 'Among the shops none is open'

paalilay koṇcamum vaankeellay
 literally, 'Of the milk, not a drop was bought'

eṇṭa ariciyilay naan koṇcamum
 avanukkuk kuṭukkeellay
 'In this rice I did not give him any'

Nonpartitive negative quantifiers

A nonpartitive negative quantifier occurs as follows:

oru + noun in the nominative + um + illay / verb with marker of negation

oru peṭiyanum vareellay
 'Not a single boy came'

oru kaṭayum tiRakkeellay

'Not a single shop is open'

Instead of oru, koṇcam occurs with mass noun:

koṇcap paalum vaankeellay

'Not a drop of milk was bought'

Zero quantifier too occurs with mass nouns:

poottalilay enṇay illay

'There is no oil in the bottle'

Price

Usually the dative case is used to express the price paid for a thing:

intap puttakattayp pattu

rupaaykku vaankinen

'I bought this book for ten rupees'

Sometimes the locative case is used when the speaker expresses the upper limit of the price which he would pay for a thing:

nuuRu ruupaayilay oru

ciilay eṭuppan

literally, 'Let us by a sari worth one hundred rupees'

Value

For value expressed as an attribute of a noun, usually an adjectivalised form of peRumatī 'worth' is used. The adjectival suffix is either -aana or -uḷḷa:

avaa muppataayiram ruupaay

peRumatīyaana vayiram

vayccirukkiRaa

'She has a diamond worth thirty thousand rupees'

aayiram ruupaay peRumatīyūḷḷa

manikkūtu

'a clock worth a thousand rupees'

Distance

Distance covered is expressed by the noun denoting the distance (like mayil 'mile', yaar 'yard', etc.) either in the nominative or in the dative case:

naan avanay oru mayilukku

vittut turattinen

'I chased him after for a mile'

naan avanay oru mayil

vittut turattinen

'I chased him after for a mile'

naankaḷ pattu mayil naṭantam

'We walked ten miles'

naankaḷ pattu mayilukku naṭantam

'We walked ten miles'

With some verbs the use of noun in the dative case is dominant, and with others the use of noun in the nominative case is dominant. However, the use of both cases is acceptable.

Sometimes the form tuuram 'distance' may be postposed to the noun phrase. When it is postposed, it alone (not the noun indicating the distance) occurs either in the nominative or in the dative case:

naan avanay oru mayil

tuurattukku vittut turattinen

'I chased him after for a mile'

Extent

For extent expressed as an attribute of a noun, commonly an adjective form of a noun containing the feature 'extent' is used (e. g. uyara 'high', niila 'long', akala 'wide') :

pattati uyara cuvar
'a wall ten feet high'

pattati niilac cuvar
'a wall ten feet long'

oru ati akalac cuvar
'a wall one foot wide'

Alternatively, an adjectivalised form of a noun containing the feature 'extent' is also used. The adjectival suffix is either -aana or -ulla :

pattati uyaramulla cuvar
'a wall ten feet high'

naalati akalamaana meecay
'a table four feet wide'

Concessive

Concessive is expressed by adding -um to a conditional form of verb with final -aal or to a past participle form :

avar kaacu tantaalum naan anta
veelay ceyyen

'I won't do that work even if he gives me money'

naankal puttimaati colliyum
avan tirunteellay

'Even though we advised him, he did not improve'

Inclusion

Inclusion is usually expressed by means of the past participle of the verb ceer 'join together (with)'. The noun included will be in the accusative case :

arulayum ceettu naalu peer
'four persons including Arul'

An alternative way of expressing inclusion is by using the form ulpaṭa 'inclusive of' with that which is included. That which is included will then be in the nominative case :

arul upaṭa naalu peer
'four persons including Arul'

Exclusion

Exclusion is expressed by the use of either the postposition tavira or by the use of one of the following past participle forms : tavittu, vilakki, niikki, vittu. When tavira occurs the noun may be either in the nominative case or in the accusative case. When a past participle is used, the noun will be in the accusative case.

mani tavira ellaarum vantaṇam
maniyayt tavira ellaarum vantaṇam
'All came except Mani'

maniyay vittu aaRu peer varuvinaṁ
'Six persons will come excluding Mani'

Addition

Addition is usually expressed by adding innum 'still, additionally' to a noun in the comitative :

maniyootay innum muuntu
peer varuvinaṁ

'Three people will come in addition to Mani'

Some speakers may use *meelatikamaay*, the adverbial form of *meelatikam*:

ĩncay irukkĩRa pattup
poottalootay meelatikamaay

aaRu poottal veenũm

'We need six more bottles in addition to the ten bottles that are here'

In an expression like the above one, the form *innum* 'yet, more' can optionally occur preceding either *meelatikamaay*, *aaRu* or *veenũm*.

The combination of the coordinator -um.....-um and *innum* can indicate some kind of addition:

maniyum innum naalu peerum
vantĩnam

'Mani and four more people came'

Vocative

In addressing someone by name the ordinary direct case form may be used. Sometimes, the final vowel of the name or term of address is lengthened. When a name ends in a consonant, the consonant is dropped, and the remaining vowel is lengthened.

Nominative	Vocative	
ponnan	ponnan	'Ponnan'
	ponnaa	
maĩi	maĩi	'Mani'
	maĩii	
maamaa	maamaa	'uncle'
	maamaa[:]	

There is no single vocative particle regularly used to precede a vocative form. There are, however, a number of

particles used for the purpose of drawing the attention of the addressee. Some of them are: *ĩeey*, *aĩa*, *eĩa* (only for males); *ĩiyeey*, *aĩi*, *eĩi* (only for females). These are used only with inferiors in rank. Forms like *ĩncaarappaa*, *keettũteey* are common for males and females, and are used with persons who are very familiar.

Citation and label forms

The normal citation form for a verb is the singular imperative form. Nominalised form of a verb is also used. A couple of verbs are nominalised by adding -al to the infinitive form: *kuťukkal* 'giving', *vaanĩkal* 'taking, accepting'. Others are nominalised by adding -atũ to the tense base form of a verb: *cey + iR + atũ* *ceyyiRaťu* 'doing', *po + R + atũ* 'going'. The normal citation form for a noun is the nominative singular.

The nominalised forms in -al or -atũ seldom occur on notices, shop fronts, etc. Instead, usually the high variety forms are used. For instance, a notice like 'eggs are available here for sale' will appear on notices in Tamil on shop fronts as *ĩĩkee mutťay viRpanaykku unťu*.

Local semantic functions

General location

General location is expressed by the locative case ('at rest'); the nominative or the dative case ('motion to'); the instrumental or the ablative case ('motion from').

When 'motion to' is involved, place names ending in -m may occur either in the nominative or dative case. All other nouns occur in the dative case.

tampi ippa kolumpilay irukkiRaar
'Younger brother is now in Colombo'

naan atutta aantu citamparam
pooven

naan atutta aantu
citamparattukkup pooven
'I will go to Chidambaram next year'

naanikai atutta maatam
kolumpukkup pooRam
'We are going to Colombo next month'

maamaa naaiaykkuk
kolumpaalay vaaRaar

maamaa naaiaykkuk
kolumpilay iruntu vaaRaar
'Uncle is coming from Colombo tomorrow'

For motion past, the past participle of taantu
'pass', or kata 'cross' is used:

inta bas mallaakattayk
katantu pookum

'This bus will go past Mallakam'

A noun in the dative case followed by either ankaalay
'that side' or antappakkam 'that side' will also
give the sense 'beyond' the location indicated by the noun:

inta bas mallaakattukku
ankaalay pookaatu

'This bus won't go beyond Mallakam'

Proximate location

Proximate location is expressed by the postposing of either
pakkatilay or kitta or arukilay, usually
following a dative case form:

enkatay viittukkup pakkatilay
oru kooyil irukku

'There is a temple near our house'

anta marattukkuk kittap
pooka veentaam

'Don't go near that tree'

antac cuvarukku arukilay
oru paampu irukku

'There is a snake near that wall'

There is a difference in the degree of nearness indicated
by these three forms: arukilay indicates very close proximity,
pakkatilay fairly close proximity and kitta indi-
cates close proximity.

Motion near to is expressed by the postposing of
pakkati-aalay (instrumental form of pakkam 'side')
to a noun in the dative case:

urvalam enkaiinray
urukkup pakkataalay pooccutu

'The procession passed near to our village'

Interior location

Interior location in a place is expressed by the use of
the locative case ending -ilay:

avar viiṭṭilay irukkiRaar

'He is in the house'

Interior location inside something and motion into are expressed by using uḷḷay 'inside' after a noun in the dative case:

avar viiṭṭukkuḷḷay irukkiRaar

'He is inside the house'

avar viiṭṭukkuḷḷay poonaar

'He went inside the house'

Motion from within is expressed by either the instrumental case or the ablative case followed by the postposition veliyilay or veliyay 'outside'.

avar viiṭṭaalay veliyilay vantaar

'He came out of the house'

vaattiyaar vakuppilay iruntu

veliyay vantaar

'The teacher came out of the class room'

For motion through, either valiyaay 'by way of' or uḷḷaalay is used. When valiyaay is used the preceding noun governed by it will be in the nominative case, and for uḷḷaalay the noun will be in the dative case:

uurvalam enkatay uur

valiyaay pooccutu

'The procession went through our village'

uurvalam enkatay uurukku

uḷḷaalay pookum

'The procession will go through our village'

Exterior location

Location outside is expressed by the use of either veliyaalay or veliyay following a noun in the dative case:

anta meecayay aRaykku

veliyaalay konṭaankoo

'Bring that table outside the room'

cayikkilay viiṭṭukku

veliyay vaykkaatay

'Don't keep the cycle outside the house'

Location upto is expressed by using either varay or varaykkum or maṭṭum following a noun in the nominative case.

naan incay iruntu

mannaar varay poonen

'From here, I went upto Mannar'

Location away from within is usually expressed by using vittu veliyay following a noun in the accusative case:

veelaykaaran viiṭṭay vittu

veliyay poṭṭaan

'The servant has gone away from home'

Movement past exterior location is expressed by the same means as general location.

Anterior location

Anterior location is expressed by means of having munnaalay, munnukku, munpuRattilay, munpakkattilay, munpuRamaay, or munnakkamaay following a noun in the dative case:

eṅkaṭay viiṭṭukku munnaalay oru
periya veeppa maram nikku

'There is a big margosa tree in front of our house'

uṅkaḷukku munnukku aar iruntatu

'Who was seated in front of you?'

viiṭṭukku munpuRaṭṭilay
toṭṭam irukku

'There is a garden in front of the house'

uṅkaṭay viiṭṭukku
munpakkatṭilay enna irukku

'What is there in front of your house?'

eṅkaṭay viiṭṭukku munpuRamaay
oru viiṭṭu kaṭṭalaam

'You can build a house in front of our house'

anṭak kaṭaykku munpakkamaay
oru kaṇi vaṅkuvam

'Let us buy a land in front of that shop'

Motion to in front of is expressed by munnaalay
or munnukku or munpakkatṭukku or
munpuRamaay or munpakkamaay following
a noun in the dative form:

avan viiṭṭukku munnaalay poonaan

'He went in front of the house'

The forms in -aay may give the sense 'toward', 'by
the front of' too

The instrumental or the ablative case is used to express
motion from in front of:

avar viiṭṭu munpakkatṭaalay

vantu koṇṭirukkiRaar

'He is coming from in front of the house'

kamala viiṭṭukku munpakkatṭilay
iruntu vaaraa

'Kamala is coming from in front of the house'

ponnar toṭṭa munpakkatṭaalay
pooraar

'Ponnar is going from in front of the garden'

Note that the noun preceding is usually either in the
oblique form or in the dative. Sometimes an adjectival form
of the noun (as in the last example above) too can occur.

Motion past in front of is expressed as follows:

ponnar toṭṭa munpuRaṭṭay

taṇṭip poonaar

'Ponnar went past the front of the garden'

ponnar toṭṭa munpuRaṭṭukku

aṅkaalay poonaar

'Ponnar went beyond the front of the garden'

Posterior location

Posterior location (at rest) is usually expressed by the
postposing to a noun of pinukku or pinnaalay
or pinpuRaṭṭilay or pinpakkatṭilay or
pinpuRamaay or pinpakkamaay:

eṅkaṭay viiṭṭukku pinnaalay

kana maamaram nikku

'There are many mango trees behind our house'

Motion to behind is expressed by pinnukku or pinnaalay or pinpakkam or pinpakkat-tukku or pinpuRattukku or pinpuRamaay or pinpakkamaay:

kuḷantay viiṭṭukkup pinnukkup
pookutu

‘The child is going behind the house’

Motion from behind is expressed by pinnukku iruntu or pinnaalay iruntu or pinpakkat-tukku iruntu or pinpakkattilay iruntu or pinpakkattaalay or pinpuRattukku iruntu or pinpuRattilay iruntu or pinpuRattaalay or pinpuRam iruntu or pinpak-kam iruntu:

kuḷantay viiṭṭukkup pinnaalay
iruntu pookutu

‘The child is going from behind the house’

Motion past behind is expressed by either pinpakkattay or pinpuRattay followed by taanṭi or kaṭantu.

maatukaḷ viiṭṭup pinpuRattay
taanṭip pookutu

‘The cows are going past behind the house’

The expressions pinpakkattukku ankaalay or pinpuRattukku ankaalay will give the sense ‘beyond behind’.

Superior location

The postposition meelay is added to a noun in the dative case to express superior location.

viiṭṭukku meelay oru paṭṭam
paRakkutu

‘A kite is flying above the house’

Motion to above is expressed by using meelay meelay:

piḷeen viiṭṭukku meelay meelay
pookutu

‘The plane is going up and up above the house’

The word meelay may be used only once but the sense will be ambiguous:

piḷeen viiṭṭukku meelay
paRantu pookutu

‘The plane is flying above the house’

‘The plane is flying (to) above the house’

Motion from above is expressed by the use of the ablative case:

eṅkaṭay viiṭṭukku meelay iruntu
piḷeen paṭṭentu uyarap pooccutu

‘All of a sudden the plane went
up from above our house’

Motion past is expressed by using the past participle of taanṭu ‘pass over’ or kaṭa ‘cross’ with a noun in the accusative:

antaṭ piḷeen eṅkaṭay viiṭṭay
taanṭip pooccutu

‘That plane passed over our house’

Superior – contact location

Jaffna Tamil does not make a distinction between superior and superior – contact location. Only the context of speech can indicate whether there is contact or not.

Inferior and inferior - contact location

Jaffna Tamil does not distinguish inferior and inferior - contact situation. For both, the postposition *kiiḷay* is used following a noun in the dative case.

intap paḷam marattukkuk

kiiḷay kiṭantutu

'This fruit was under the tree'

paampu kaṭṭilukkuk kiiḷay pookuṭu

'The snake is going under the bed'

paampu kaṭṭilukkuk

kiiḷalay varukuṭu

paampu kaṭṭilukkuk kiiḷay

iruntu varukuṭu

'The snake is coming from under the bed'

kiiḷay can also be used in a metaphorical sense:

avar unkaḷukkuk kiiḷay

veelay ceyyiRaaraa

'Is he working under you?'

Lateral location

Lateral and lateral - contact are both expressed by the postposing of *pakkattilay* or *arukilay* 'in the vicinity', 'close to' to a noun in the dative case:

tampi ammaakkup pakkattilay

nintukontiruntaan

'Younger brother was standing beside mother'

pantu unkaḷukkup pakkattilay

irukku

'The ball is beside you'

The adverbialised form of *ooram* 'edge' too can give the sense of 'beside' when the noun concerned is inanimate:

pantu veeli ooramaay kiṭakku

'The ball is beside the fence'

avar veeli ooramaay nikkiRaar

'He is (standing) beside the fence'

The comitative case form too may give the sense 'beside':

avar veeliyootay nikkiRaar

'He is (standing) beside the fence'

Motion to beside is expressed by using *pakkattukku* following a noun in the nominative:

tampi kaar pakkattukku poonaan

'Younger brother went beside the car'

The adverbialised form of *pakkam* too can indicate motion to beside:

avan cayikkiḷ pakkamaay poonaan

'He went beside / toward the cycle'

The form *aṭikku* following a noun (inanimates only) in the nominative too can give the sense 'beside'.

tampi kaaraṭiyilay nikkiRaar

'Younger brother is standing beside the car'

avan kaaRaṭikkup pooRaān

'He is going beside the car'

Motion from and motion past are expressed as follows:

avan kaar pakkattilay

iruntu vaaRaān

avan kaar pakkattaalay vaaRaān

avan kaaRaṭiyilay iruntu vaaRaān

avan kaaRaṭiyaalay vaaRaān

'He is coming from beside the car'

avan kaaRukkup pakkattaalay

vaaRaān

'He is coming by the side of the car'

avan kaaRayt taanṭi vaaRaān

'He is coming past the car'

The first four sentences have the same meaning. The second sentence may give the sense, 'He is coming by the side of the car' too.

Citerior location

A noun in the dative case followed by the proximate pronoun *intā* 'this' and by the locative form of *pakkam* 'side' indicates citerior location:

paḷḷikkuuṭam cantikku intap

pakkattilay irukku

'The school is on this side of the junction'

cantaykku intap pakkattukku

vaan̄koo

'Come to this side of the market'

cantaykku intap pakkattilay

iruntu oṭat̄ tuvāṅkuvam

'Let us start running from this side of the market'

Alternatives to *pakkattukku* are *pakkam* and *pakkamaay*. An alternative to *pakkattilay* *iruntu* is *pakkam iruntu*.

Uterior location

A noun in the dative case followed by the remote demonstrative *antā* 'that' and by the locative form of *pakkam* indicates ulterior location:

paḷḷikkuuṭam cantikku antap

pakkattilay irukku

'The school is on that side of the junction'

cantaykku antap pakkattukku

vaan̄koo

'Come to that side of the market'

cantaykku antap pakkattilay

iruntu oṭat̄ tuvāṅkuvam

'Let us start running from that side of the market'

A noun in the dative followed by *aṅkaalay* or *aṅkaalukku* can indicate ulterior location:

paḷḷikkuuṭam cantikku aṅkaalay/

aṅkaalukku irukku

'The school is on that side of the junction'

An alternative to *pakkattukku* is *pakkamaay*.

Motion past is expressed by the pastparticiple form of taaṇṭu or kaṭa as in earlier instances.

Medial location

There are three forms iṭay, naṭu and matti that may be used to indicate medial location. These forms can mean 'between', 'among' and 'in the centre'. Of these, iṭay is used to indicate medial location between two entities, and at times for location among three or more. The other two are used to indicate location only among three or more entities.

Medial location at rest is expressed by a noun in the dative or genitive followed by the locative of either iṭay, naṭu or matti.

anta reṇṭu marattukku iṭayilay
oru kiṇaRu irukku

'There is a well between those two trees'

reṇṭu kaṭayinray mattiyilay oru
kiṇaRu irukku

'There is a well between the two shops'

The noun in question may occur in its adjectival form or in its oblique form too:

niinka! anta reṇṭu viittu
mattiyilay / iṭayilay / naṭuvilay
innum oru viittu kaṭṭalaam

'You can build another house in between
those two houses'

Motion to and from are expressed as follows:

anta marañkaḷinray iṭaykkup
pooṇkoo

'Go to between those trees'

marañkaḷukku iṭayilay iruntu
veliyay vaaRaana

marañkaḷinray iṭayilay iruntu
veliyay vaaRaana

'He is coming out from among trees'

Motion past through may be expressed by the use of uṭaaka or uḷḷaalay:

marañkaḷukku uṭaaka pooRaana

'He is going through trees'

Circumferential location

Circumferential location is expressed by the postposing of cutti (past participle form of the verb cuttu 'surround') to a noun in the accusative case.

naaṅka! viittayc cutti matil
kaṭṭap pooRaama

'We are going to build a wall around the house'

Some speakers may use cuttivara instead of cutti alone.

maṇi viittayc cuttivara ooṭuRaana

'Mani is running round the house'

Citerior - anterior location

Citerior - anterior location (at rest) is usually expressed by the postposing of etiray or etirily or etiraaka or etiraay or etirpakkattilay or etirpuRattilay to a noun in the dative.

The forms usually used to express 'in front of' may be also used to express citerior - anterior location.

kooyilukku etiray muuntu
katay irukku

'There are three shops opposite the temple'

Motion to, from and past are expressed as follows:

kooyilukku etiray poonal
maniyinray viittukkup pookalaam

'You can go to Mani's house if you go
opposite the temple'

avan kooyilukku etirilay
iruntu vantaan

'He came from opposite the temple'

Motion past long object (in direction of its length)

Motion through a long (hollow) object in the direction of its length is expressed by valiya or valiyaay (vali 'way') or muulam 'through' or uutaaka (uutu 'means') or ullalay (ul, ullay 'in'). When ullalay is used the noun will be in the dative case. With all other forms the noun will be in the nominative case.

tanni kucinikku kulaay
valiya varukutu

'The water comes to the kitchen through a pipe'

tanni kulaaykku ullalay
tottikku pookutu

'The water goes to the tub through a pipe'

For motion along an edge or border of something ooramaay (ooram 'edge' + aay) is usually used:

malayt tanni viiti ooramaay
pookutu

'The rain water is flowing along the
edge of the street'

When the motion takes place on the upper surface of an object meelay or meelaalay is used:

antap paalattukku meelay
lori pookalaam

'A lorry can go on that bridge'

inta nilattukku meelaalay
natakka veentaam

'Don't walk over this floor'

Motion past long object

(at right angles to its length)

Motion across a long object can be expressed by the use of the postposition kuRukkay or kuRukkaa-lay following a noun in the dative case:

inta velikku kuRukkay naalu
mayil poonaal katal teriyum

'If you go four miles across this open space
sea will be visible'

inta aattukkuk kuRukkaalay oru
anay kattap pooyinam

'They are going to build a dam across this river'

Motion past a long object at right angles to its length is expressed by the past participle of taantu or kata 'cross':

mani Roottayt taantip poonaan
'Mani went across the road'

Other directional locations

Location in terms of directions (north, south, etc.) is expressed by the postposing of the accusative form of the directional marker to a noun in the dative case. The directions are vaṭakku 'north', terku 'south', kiḷakku 'east' and meerku 'west'.

antak kaṭay kooyilukkuk
kiḷakkay irukku
'That shop is to the east of the temple'

Location to the left or the right is usually expressed by the postposing of iṭatu pakkam ~ iṭap pakkam and valatu pakkam ~ valap pakkam appropriately to a noun in the dative or genitive case.

avar enakku iṭatu pakkam
iruntaar
avar enray iṭatu pakkam iruntaar
'He sat on my left'

An alternative of pakkam is pakkattilay.

avar enakku iṭatu
pakkattilay iruntaar

In certain contexts, pakkattukku can be yet another alternate form:

neeray pooy iṭatu pakkam /
pakkattilay / pakkattukku
tirumpunkoo

'Go straight and turn to your left'

Location in time

The commonest types of question about times of day are usually expressed as follows:

enna neeram
neeram enna
ettinay mani
mani ettinay
polutu enna

'What is the time?'

The time of day is usually expressed by the appropriate numeral indicating the time optionally followed by the word mani 'hour' when minutes are not involved in the expression:

ippa neeram aaRu (mani)
'Now the time is six o'clock'
ippa neeram aaReekaal (mani)
'Now the time is quarter past six'

When minutes are involved, the word mani does not occur — merely the appropriate numerals are expressed.

ippa neeram eḷu paṭinaṅcu
'Now the time is seven fifteen'

ippa neeram aaRu ampatu

'Now the time is six fifty'

Some speakers may use the words maṇi and nimiśam appropriately to express the hour and the minutes precisely:

ippa neeram aaRu maṇi

ampatu nimiśam

'Now the time is six o' clock (and) fifty minutes'

When the time at which something done is expressed, the numeral indicating the time will be in the dative case:

naalaykkuk kaalamay

eṭṭukkup poovam

'Let us go tomorrow morning at eight'

naalaykkuk kaalamay

eṭṭu maṇikku poovam

'Let us go tomorrow morning at eight o' clock'

avan neeRRu aaRu

iruvatukkut taan vantaan

'He came yesterday only at six twenty'

avan neeRRu aaRu maṇi

iruvatu nimiśattukkut taan vantaan

'He came yesterday only at six twenty'

Note that when the word maṇi or nimiśam occurs in the expression, it alone will be in the dative. If both occur in an expression only the word nimiśam will be in the dative.

Period of day

Expressions indicating a part of the day occur either in the nominative or in the locative case. There is a difference in

meaning between the use of these two case forms. When the locative case is used, it implies that it is the proper and usual or possible time for doing something. The direct case, however, implies a specific time on a specific day:

pinneerattilay vaankoo

'Come in the evenings'

naaṅkaḷ kooyilukkup

pinneerattilay pookalaam

'We can go to the temple in the evenings'

pinneeram vaankoo

'Come this evening'

naaṅkaḷ naalaykkup

pinneeram kooyilukkup poovam

'Let us go to the temple tomorrow evening'

Broadly, the parts of the day are as follows: kaalamay 'morning', mattiyaanam '(around) mid-day', pinneeram 'evening', raattiri ~ raa 'night', iravaykku 'night'.

The form raattiri or raa is used only to refer to past time, and may be preceded by an expression like neeRRu 'yesterday' or muntaṇaḷ 'the day before yesterday'. The form iravaykku is used only in context of future time. And note that it is in the dative case:

avar raattiri vantaar

'He came last night'

avar iravaykku varuvar

'He will come tonight'

Day of the week

The days of the week are: n̄aayiRRukkila-may, tinkakkilamay, cevvaaykkilamay, putankilamay, viyaalakilamay, velli-kila¹may, canikkilamay. These have alternative forms: n̄aayiRu, tinkal, cevvaay, putan, viyaalan, velli, cani.

Like the parts of a day, these forms too can occur either in the nominative or in the locative with the same semantic distinction :

naan in̄cay tinkal varuven

'I will come here on (next) Monday'

naan in̄cay tinkalilay varuven

'I will come here on Mondays'

In Jaffna Tamil, the form kilamay can indicate both the day and the week. Its use to indicate day is, however, restricted :

in̄taykku enna kilamay

'What day is today?'

vaaRa kilamay avar varuvar

'He will come next week'

Another word commonly used to indicate day is naal

in̄taykku enna naal

'What day is today?'

enta naal avar van̄tavar

'On what day did he come?'

en̄taykku avar van̄tavar

'On what day did he come?'

en̄taykku occurs as an alternative for entanaa¹l. An expression like entak kilamay van-tavar is seldom used, for, it will be very ambiguous : 'what day' or 'what week'.

Month of the year

Month - names are given usually with reference to the lunar calendar. They are as follows: cittiray (April-May), vaykaaci (May-June), aani (June-July), aati (July-August), aavani (August-September), purattaati ~ purattaaci (September-October), ayppaci (October-November), kaattikay (November-December), maarkali (December-January), tay (January-February), maaci (February-March), paṅkuni (March-April).

The same set of month - names in Tamil is used whether one is referring to the western calendar or the traditional lunar calendar. For official purposes, the months are as the present day English months, i. e. tay is January, maaci February, etc. Speakers may make a distinction as in̄killisukku ~ avanka-lukku 'for English ~ for them' and enkalukku 'for us'. Names of months can be used with a locative marker or followed by maacam ~ maatam with or without a locative marker :

avar tayyilay lan̄tanukku¹p. pooRaar

avar tay maatam lan̄tanukku¹p.
pooRaar

avar tay maatattilay
lanthanukkup pooraar

'He is going to London in January'

To express days of the month ordinal numerals (formed with -aam) followed by teeti are used. Some speakers may use teeti in the locative case. In order of sequence, the day follows the month:

naankal vaara maatam pattaam
teeti lanthanukkup pooram

'We are going to London on the
tenth of next month'

mutal teeti is an alternate form for mutalaam
teeti.

Year

Speakers make reference to a year A. D. usually by the last two digits of the number followed by the locative suffix:

naankal aruvatilay incay vantam

'We came here in 60'

The Hindu era is also followed but only in reference to rituals, religious ceremonies and traditional astrology.

Festivals

Locative expressions of time referring to festivals usually consist of the name of the festival followed by either naal 'day' in the locative case or by the form antu 'that day':

ponkal naalilay katay
tiranantu irukkumaa

'Will the shops be open on the Pongal day?'

tiipaavali antu maamaa
incay varuvar

'Uncle will come here on the Dipavali day'

Some speakers may use the form tinattantu (tinam 'festive occasion' + antu 'that day'), instead of antu alone.

ponkal tinattantu vaankoo
'Come on the Pongal day'

Seasons

Seasons fall into two broad divisions, kootay 'hot season' and maari 'cold season', 'rainy season'. The word kaalam 'time' is sometimes used with these two names. veyyil kaalam 'sunny period' is an alternate form for kootay; malay kaalam 'rainy season' and kulirkaalam 'cold season' are alternate forms for maari. Locative time expression of these forms have the locative suffix added:

kootayilay kaalamay pattumanikkup
piraku toottattilay veelay ceyya
mutiyaatu

'During the hot season it is not possible to work
in the garden after ten o'clock in the morning'

Frequentative

Frequentative time expressions are usually formed by having the time noun in question between ovvoru....um :

ovvoru maṇittiyaalamum
piḷeen irukku

‘There is a plane every hour’

ovvoru naaḷum maamaa varuvar
‘Uncle will come daily’

avar ovvoru tayyum
laṇṭanukkup poovar
‘He goes to London every January’

Some of the nouns may optionally take the locative suffix and give the same meaning:

ovvoru tiṅkaḷilum maamaa
iṅcay varuvar
(literally, Uncle comes here on every Monday)
‘Uncle comes here every Monday’

avar ovvoru tayyilum
laṇṭanukkup poovar
(literally, He goes to London in every January)
‘He goes to London every January’

But not

*ovvoru maṇittiyaalattilum
piḷeen irukku
*ovvoru naaḷilum maamaa varuvar

An alternative way of forming frequentative time expressions is by adding -toorum ‘every’ to a general time expression.

avan iṅcay naaḷtoorum vantaan

‘He came here daily’

avan iṅcay naaḷtoorum vaaraan

‘He comes here daily’

piḷeen naaḷtoorum irukku

‘There is a plane daily’

maari toorum maraṅkaḷ viḷum

‘Trees fall during every rainy season’

Punctual – future

The sense of punctual-future can be expressed by using the locative, the instrumental or the dative case form of a time-noun following the numeral indicating the duration of the interval envisaged. uḷḷay ‘in’ is postposed to the dative case form:

naan reṇṭu maṇittiyaalattilay

tirumpi vantaṭuven

‘I shall come back in two hours’

naan reṇṭu maṇittiyaalattalalay

tirumpi vantaṭuven

‘I shall come back after two hours’

naan reṇṭu maṇittiyaalattukku

uḷḷay tirumpi vantaṭuven

‘I shall come back within two hours’

Note that the use of different case markers convey subtle differences in meaning.

Punctual - past

The sense of punctual - past is expressed by adding *munnaalay* 'before', *munnam* 'before' or *muntī* 'before' to a noun phrase (consisting of numeral + time noun) in the dative case:

muuntū manittiyaalattukku
munnaalay avan cantaykkup
poonaan

muuntū manittiyaalattukku
munnam avan cantaykkup
poonaan

muuntū manittiyaalattukku
muntī avan cantaykkup poonaan

'He went to the market three hours ago'

When longer period of time is expressed in terms of years, the form *kaalam* 'time', 'period' may be used in the dative following the adjectival form of *varuṣam* 'year':

iruvatu varuṣa kaalattukku muntī
'twenty years ago'

Duration

Duration of an action in the past or future is expressed by the numeral indicating the period of action followed by the time - noun in the nominative:

avar koḷumpilay aaRu varuṣam
iruntaar

'He was in Colombo for six years'

maamaa laṇṭanilay aaRu maatam
iruppar

'Uncle will be in London for six months'

Duration of an action in the present tense is also expressed in the same way, but the adverbialising suffix - *aay* may be optionally added to the time noun:

avar koḷumpily aaRu varuṣam
irukkiRaar

avar koḷumpilay aaRu varuṣamaay
irukkiRaar

'He has been in Colombo for six years'

Some speakers may use the time noun in its adjectival form followed by *kaalam*. A sentence where - *aay* occurs will have the alternate form with the time noun in its adjectival form followed by *kaalamaay*. Note that the adverbialising suffix - *aay* is added to *kaalam*:

avar koḷumpilay aaRu varuṣa
kaalam irukkiRaar

avar koḷumpilay aaRu varuṣa
kaalamaay irukkiRaar

'He has been in Colombo for six years'

The extent of time that someone spent or would spend in a place is usually expressed by the appropriate numeral followed by the time noun in the nominative or dative:

naankaḷ iñcay oru kiḷamaykku
vanṭirukkiRaṁ

'We've arrived here for a week'

naankaḷ iñcay oru kiḷamy iruppam

naankaḷ iñcay oru kiḷamaykku
iruppam

'We will be here for a week'

The use of the dative form is more dominant.

Similarly the extent of time within which an action is done may be expressed by using either the nominative or the dative case:

naan neeRRu oru maṇittiyaalam
aṅkay veelay ceyṭen

'I worked there for an hour yesterday'

naan neeRRu oru maṇittiyaalatṭukku
aṅkay veelay ceyṭen

'I worked there for an hour yesterday'

Anterior - duration

Anterior - duration, both past and future, are expressed by the postposition varaykkum ~ varay 'until', 'as far as', 'up to' following a word or phrase referring to the point or period of time in question in the nominative case:

poona tiṅkaḷ pinneeram aaRu
maṇi varaykkum avar iñcayṭaan
iruntaar

'He was indeed here until last Monday evening
six o'clock'

vaara tiṅkaḷ varay oṇṭum
naṭavaatu

'Until next Monday nothing will happen'

Posterior - duration

Posterior - duration, both past and future, are expressed by the ablative case form of a noun phrase referring to the point or period of time in question:

tiṅkaḷilay iruntu oṇṭum naṭakkeellay
'Nothing has happened since Monday'

tiṅkaḷilay iruntu naan iñcay
iruppen

'I will be here from Monday onwards'

Also consider the following types of constructions

tiṅkaḷ toṭakkam oṇṭum
naṭakkeellay

'Nothing has happened from Monday onwards'

tiṅkaḷukkup piRaḱu oṇṭum
naṭakkeellay

'Nothing has happened after Monday'

Anterior - general

Anterior - general is expressed by the use of *muntī* 'before', *munnam* 'before', *munnu* *ku* 'before', *munnaalay* 'before' or *mutal* 'prior to' following a noun phrase in the dative case. The verb is usually marked for perfective aspect:

poona *tinkalukku* *muntī* naan
incay *vantittēn*

poona *tinkalukku* *munnaalay* naan
incay *vantittēn*

poona *tinkalukku* *mutal* naan
incay *vantittēn*

'I came here previous to last Monday'

Posterior - general

Posterior - general is expressed by using *piRaku* 'afterwards' or *pinnaalay* 'after' following a noun phrase in the dative case:

putanukkup *piRaku* *ankay* pooven

'I will go there subsequent to Wednesday'

Expressions with numerals indicating the period may have alternative expressions with the time noun in the instrumental case:

appaa *muuntū* *maatattukku*
piRaku varuvar

appaa *muuntū* *maatattaalay* varuvar
'Father will come after three months'

Point in period

Reference to a point in a period in the past or future is expressed by using the appropriate numeral followed by the time noun in the dative case and *ullay*. In some types of constructions the time noun can also be in the locative, but then *ullay* won't follow:

poona oru *manittiyaalat* *tukku*
ullay *taakkottar* *pattu*
varuttakkaa *Rarayc* *cooticcaar*

'The doctor examined ten patients within the last
(past) one hour'

poona oru *manittiyaalat* *tilay*
taakkottar *pattu* *varuttakkaa* *Rarayc*
cooticcaar

'The doctor examined ten patients in the past
one hour'

rentu *manittiyaalat* *tukku* *ullay*
vantituven

'I will return within two hours'

rentu *manittiyaalat* *tilay* *vantituven*

'I will return in two hours'

avar poona *pattu* *naalukku* *llay*
incay *vantavar*

'He had come here within the past ten days'

But not

* avar poona *pattu* *naalilay*
incay *vantavar*

Number marking system and its nature

Most count nouns can potentially have different forms for singular and plural. Mass nouns like taṇṇi 'water', kaattu 'wind' are never used in plural.

Extent to which number - marking system is obligatory

Human nouns are always marked for number if the reference is to more than one:

neeRRu naalu maniciya!

ĩncay vantĩnam

'Four women came here yesterday'

vaattimaarukku ini nalla campalam
kuṭupatumaam

'It seems that teachers will be paid good salary hereafter'

The plural of nonhuman nouns is commonly unexpressed, particularly when a numeral precedes. Usually the singular form is used with either singular or plural sense. In general, Tamil speakers use the plural in the nonhuman category only when they wish to emphasize plurality, that is, when a number of units are involved.

Nouns referring to foodstuffs, fruits, etc. do not generally occur in the plural even if a number of units of the same variety are referred to. Note that these are the nouns which may be replaced by the singular form ĩtu 'this', atu 'that' and utu 'that' even when plural in sense:

avay maatu vaankap pooyinamaa

'Are they going to buy a cow?'

'Are they going to buy cows?'

avay pattu maatu vaankap

pooyinamaa

'It seems they are going to buy ten cows'

naanka! naalaykkuk kaay kariya!
vaanka veenum

'We must buy vegetables tomorrow'

Manner of realisation of number distinctions

The basic form of the noun or the stem itself indicates the singular. Plural is formed by adding the plural suffix to singular forms. The plural markers are several, and they are mostly lexically conditioned. It may be, however, possible to give a partial phonological conditioning for their occurrences.

The distribution of the lexically conditioned allomorphs of the plural suffix may be shown in different classes as follows:

Class I

plural marker - ka

peṇ 'female'

peṇka! 'females'

aaṇ 'male'

aaṇka! 'males'

peṭiyaṇ 'boy'

peṭiyaṇka! 'boys'

maraṁ 'tree'

maraṇka! 'trees'

viitu 'house'

viituka! 'houses'

Word-final - n and - m are realized as ṇ before k. When -ka! occurs with nouns ending in -u, the k in -ka! is very often dropped in speech leading to -ua!.

Class II**tiivaal**

'lady from an island'

pannaalayaal'lady from the village
called Pannaalai'**ponnampalam**'personal name -
Ponnambalam'**plural marker - avay****tiivaalavay**

'ladies from an island'

pannaalayaalavay'ladies from the village
called Pannaalai'**ponnampalamavay**'Ponnambalam and
his family or people'

Note that personal names too occur in plural in this dialect of Tamil.

Class III**pettay** 'girl'**pillay** 'child'**miinkaari**

'woman who sells fish'

kay 'hand'**plural marker - al****pettayal** 'girls'**pillayal** 'children'**miinkaariyal**

'women who sell fish'

kayyal 'hands'

Final -y in a monosyllabic form with a short vowel doubles when a suffix beginning in a vowel follows.

Class IV**maan** 'deer'**nullaan**

'small reddish ant'

vaan 'van'**plural marker - ukal****maanukal** 'deer'**nullaanukal**

'small reddish ants'

vaanukal 'vans'

In this class only nonhuman nouns occur. In speech the k in -ukal is sometimes dropped,

Class V**enciniyar**

'engineer'

kilaakku

'clerk'

maneeccar

'manager'

taakkottar

'doctor'

plural marker - maar**enciniyarmaar**

'engineers'

kilaakkumaar

'clerks'

maneeccarmaar

'managers'

taakkottarmaar

'doctors'

In this class usually professional terms and borrowings from English occur.

Class VI**ammaan**

'uncle'

maccaan

'cousin'

tankacci

'younger sister'

tooli

'friend (female)'

plural marker - avay ~ -maar**ammaanavay****ammaanmaar**

'uncles'

maccaanavay**maccaanmaar**

'cousins'

tankacciavay**tankaccimaar**

'younger sisters'

tooliavay**toolimaar**

'friends (female)'

ayyar
'Hindu priest'

ayyaravay
ayyarmaar
'Hindu priests'

Class VII plural marker - a! ~ -avay ~ - maar

cineekiti
'friend (female)'

cineekitiyal
cineekitiyavay
cineekitimaar
'friends (female)'

cakootari
'sister'

cakootariyal
cakootariyavay
cakootarimaar
'sisters'

Class VIII plural marker - r

cineekitan
'friend'

cineekitar
'friends'

paattukkaaran
'singer'

paattukkaraar
'singers'

ennaykkaaran
'oil - seller'

ennaykkaaraar
'oil - sellers'

The -r ending plural forms in this class can also occur as masculine singular honorific forms. The concord with the finite verb would, however, indicate whether a form is singular honorific or epicene plural: if a finite verb with inflections of epicene plural occurs as predicate of the subject cineekitar, then cineekitar is plural as in cineekitar vantinam 'Friends came'. If cineekitar has concord in a finite verb inflected to masculine honorific singular, then cineekitar is honorific singular as in cineekitar vantaar 'Friend (honorific) came'.

Number - marking of foreign words

Foreign words have been assimilated into the language, particularly in the speech of the monolinguals, and usually such words take the Tamil number markers to form plural:

vaan 'van'

vaanukal 'vans'

enciniyar
'engineer'

enciniyarmaar
'engineers'

Bilinguals, speaking Tamil and English, may use the plural form of English words (as they occur in English) in their mixed speech of Tamil and English:

naalaykku rentu [ministə:s]

yaalpaa nattilay periya [skuuls ± kk ±]
pooyinam

'Tomorrow two ministers are going to the big schools in Jaffna'

Noun classes: their labels and meaning

In Tamil there are two major classes of nouns: human and nonhuman. Human nouns are further classifiable into two sub classes: masculine and feminine.

One can usually predict whether a noun is human or nonhuman by its meaning. If a noun or pronoun refers to a human being, it is human. If a noun refers to anything else it is nonhuman (some exceptions must be made for nouns referring to gods which can be either human or nonhuman). Thus nouns referring to animals and other beings, except humans, are nonhuman.

Gender in many of the nouns is lexically conditioned, and is definable syntactically in terms of concord: a masculine noun which occurs as subject of a sentence has concord with a finite verb inflected with masculine gender suffix. Examples of human nouns in the past tense are:

veelaykaaRan vantaan

'The servant (male) came (nonhonorific)'

veelaykaaRaṅkaḷ vantaanḱaḷ

'The servants (males) came (nonhonorific)'

veelaykaaRi vantaal

'The servant (female) came (nonhonorific)'

veelaykaaRiyaḷ vantaalavay

'The servants (females) came (nonhonorific)'

maamaa vantaar

'Uncle came (honorific)'

maami vanta

'Aunt came (honorific)'

contakkaaRar vantaṇam

'Relations came' (epicene plural)

The corresponding anaphoric pronouns are: avan, avaṅkaḷ, aval, avalavay,avar,avaa,avay.

There are a few nouns in which the masculine and feminine genders can be morphologically determined in terms of suffixes. There is no indication of gender in the non-human except in the demonstrative and interrogative pronouns where -tu occurs.

The distribution of the allomorphs of the gender suffix may be shown in different classes:

Class I

(a) masculine - an

avan 'he'

ivan 'he'

uvan 'he'

evan 'who (male)'

feminine - al

aval 'she'

ival 'she'

uval 'she'

eval 'who (female)'

(b)

feminine - i

kurutaṇ

'blind man'

kuruti

'blind woman'

vicaran

'mad man'

vicari

'mad woman'

cekitan

'deaf man'

cekiti

'deaf woman'

talayvan

'leader (male)'

talayvi

'leader (female)'

cineekitan

'friend (male)'

cineekiti

'friend (female)'

tunayvan

'assistant (male)

tunayvi

'assistant (female)'

(c)

feminine - atti

piraaṇaṇan

'brahmin (male)'

piraaṇaṇatti

'brahmin (female)'

nattuvan
'male in the drum -
beater community'

nattuvatti
'female in the drum -
beater community'

(d)

feminine - cci

kattayan
'short man'

kattaycci
'short woman'

petiyan 'boy'

peticci 'girl'

peeyan 'fool (male)'

peecci 'fool (female)'

Class II

(a) masculine - aan

feminine - aal

kattuvanaan
'male from the village
of Kadduvan'

kattuvanaal
'female from the
village of Kadduvan'

pirattiyaan
'male from a different
place'

pirattiyaal
'female from a
different place'

(b)

feminine - aatti

vannaan
'washer - man'

vannaatti
'washer - woman'

tattaan
'goldsmith (male)'

tattaatti
'goldsmith (female)'

(c)

feminine - aatti

ciimaan 'lord'

ciimaatti 'lady'

vituvaan
'learned man'

vituvaatti
'learned woman'

Class III

masculine - van

feminine - tti

kucavan
'male in pot maker
community'

kuca tti
'female in pot maker
community'

kuRavan
'tribal man'

kuRa tti
'tribal woman'

cin kalavan
'Sinhalese man'

cin ka latti
'Sinhalese woman'

oru van 'one man'

oru tti 'one woman'

Class IV

In this class some community names indicate masculine gender too:

feminine - tti

panaaram
'male belonging to a
community whose
profession is conch
blowing'

pana aratti
'female belonging to a
community whose
profession is conch
blowing'

panaaram has panaari as an alternate form to indicate masculine.

feminine - cci

ce tti
'male belonging to
Ce tti community'

ce tti cci
'female belonging to
Ce tti community'

There are a couple of forms that are common to both masculine and feminine: *viyaapaari* 'trader', *nooyaali* 'patient', *paavi* 'sinner'.

Pronouns

Pronouns can occur in answer to questions of the type, 'Who is that?'. Normally, the pronoun is followed by *taan* and the reply may also optionally contain the name of the speaker:

Spkr. A. *aar atu* 'Who's that?'

Spkr. B. *atu naan (taan) (mani)*
'that' 'I' emphatic Mani

'That's I, (Mani)'

Jaffna Tamil speakers usually use *atu* in replying.

Inclusion v. exclusion distinction

Jaffna Tamil does not make a distinction between inclusive and exclusive plural pronouns in the first person.

Degrees of proximity in the third person pronouns

proximate i -
intermediate u -
remote a -

ivan uvan avan 'he'

ival uval aval 'she'

ivay uvay avay 'they (human)'

Forms of pronouns

	nominative	nominative + -aa
1st person singular	<i>naan</i>	<i>naanaa</i>
1st person plural	<i>naankal</i>	<i>naankalaa</i>
2nd person singular (non hon.)	<i>nii</i>	<i>niiyaa</i>
2nd person singular (intermediate hon.)	<i>niir</i>	<i>niiraa</i>
2nd person singular (hon.)	<i>niinkal</i>	<i>niinkalaa</i>
2nd person plural	<i>niinkal</i>	<i>niinkalaa</i>
3rd person singular (masculine) (non hon.)	<i>avan</i> <i>ivan</i> <i>uvan</i>	<i>avanaa</i> <i>ivanaa</i> <i>uvanaa</i>
3rd person plural (mas.) (non hon.)	<i>avankal</i> <i>ivankal</i> <i>uvankal</i>	<i>avankalaa</i> <i>ivankalaa</i> <i>uvankalaa</i>
3rd person singular (fem.) (non hon.)	<i>aval</i> <i>ival</i> <i>uval</i>	<i>avala</i> <i>ivala</i> <i>uvala</i>
3rd person plural (fem.) (non hon.)	<i>avalavay</i> <i>ivalavay</i> <i>uvalavay</i>	<i>avalavayaa</i> <i>ivalavayaa</i> <i>uvalavayaa</i>
3rd person singular (mas.) (hon.)	<i>avar</i> <i>ivar</i> <i>uvar</i>	<i>avaraa</i> <i>ivaraa</i> <i>uvara</i>

3. VERB MORPHOLOGY

3rd person singular	avaa	avaavaa
(fem.)(hon.)	ivaa	ivaavaa
	uvaa	uvaavaa

3rd person plural	avay	avayaa
(epicene)	ivay	ivayaa
	uvay	uvayaa

3rd person singular	atu	ataa
(neuter)	itu	itaa
	utu	utaa

3rd person plural	atukal	atukalaa
(neuter)	itukal	itukalaa
	utukal	utukalaa

Noun declensions : case formation

For many nouns, case endings are added directly to the nominative case form. For others, the noun changes its form when the endings are added. This changed form is called the oblique base. These changes are generally quite regular and follow the rules below:

1. Nouns ending in -m replace -m by -tt-.
paḷam 'fruit' paḷatt-
2. Nouns ending in -tu double the -tu to -ttu when not preceded by a single short syllable.
viittu 'house' viittu-
3. Nouns ending in -Ru replace -Ru by -ttu.
cooru 'rice' coottu-

Voice

Passive

The passive construction is productive in the Jaffna dialect of Tamil. It is formed by adding paṭu to the base of a transitive verb: tavaal eḷutuppaṭukutu 'A letter is being written'; anta veelay ceypaṭum 'That work will be done'; kaacu kuṭupattutu 'Money was given'. In this type of construction an agent in the instrumental case is understood, and usually it is not overtly expressed.

The passive is also formed by adding the auxiliary verb un 'eat' to the following seven verbs, out of which one is intransitive, and others are transitive: vaaṭu 'wither', oṭṭu 'paste', taṭṭu 'knock', veṭṭu 'cut', koṭṭu 'pour', uuttu 'pour' and puuttu 'lock'. kay veṭṭunṭutu 'Hand got cut'. In these forms un can freely vary with paṭu except with the verb vaaṭu. kaal veṭṭuppaṭutu 'Leg got cut'.

Means of decreasing the valency of a verb

The means of decreasing the valency of a verb are very limited in this language. Intransitive verbs, for instance, are not made from a transitive verb by not indicating the subject of the transitive. But there are a couple of verbs that can be used as transitive, and also in a sort of passive sense. Examples: eṭṭu 'reach', viḷaṅku 'understand'.

naan antap paḷattay eṭṭinen
'I reached that fruit'

antap palam etticcutu

'That fruit was reached'

vaattiyaar conna paatattay

vilankinen

'I understood the lesson taught by the teacher'

vaattiyaar conna paatam

vilankiccutu

'The lesson taught by the teacher was understood'

In this construction the agent noun phrase will be in the dative.

antap palam enakku etticcutu

'That fruit was reached by me'

Means of increasing the valency of a verb

Means of forming causatives

The valency of a verb could be increased (from intransitive to transitive, and from transitive to causative) by adding a causative marker to the root of a verb.

Causativisation is a productive process in Jaffna Tamil.

Causative verbs are formed by adding -vi to the root of weak verbs and -ppi to the root of strong verbs: cey 'do' + vi ceyvi 'cause someone to do'; ati 'beat' + ppi atippi 'cause someone to beat'.

Usually -vi or -ppi is added to a transitive verb. A couple of intransitive verbs too take a causative marker exceptionally: alu 'cry' + vi aluvi 'cause someone to cry'; eeRu 'climb' + vi eeRuvi 'cause someone

to climb'. The verb nata 'walk' takes -tu and gives causal meaning. Similarly iru 'be, sit' + tu irutu 'cause to be' also gives causal sense.

A couple of verbs take double causative markers: cey 'do' + vi + ppi ceyvippi 'cause (someone) to cause (another) to do', teetu 'search' + vi + ppi teetuvippi 'cause (someone) to cause (another) to search', nata 'walk' + tu + vi natatuvi 'cause (someone) to cause (something) to happen'.

The causative marker -vi freely varies as -ii with verbs that take -in- for past tense: elutuvi ~ elutiii 'cause (someone) to write'.

An alternative way of forming causatives is by the addition of one of the following verbs to the infinitive form of a transitive or intransitive verb: vay 'place', cey 'do', pannu 'do'.

avaa enray tampiyayk kontu

eluta vaccaa

avaa enray tampiyayk kontu

elutac ceytaa

avaa enray tampiyayk kontu

elutap panninaa

'She caused my younger brother to write'

avan ankay nintaan

'He stayed there'

avanay ankay nikka vaccen

avanay ankay nikkac ceyten
 avanay ankay nikkap panninen
 'I caused him to stay there'

Of these, the use of *vay* is more common than *cey* and *pannu*. The use of causative in *-vi* or *-ppi* is more common than any others.

In the causative constructions the person who performs the action is in the accusative case followed by *konṭu*.

Also, there are numerous pairs of verbs in which one is a transitive and the other an intransitive verb. In some of them, the transitives and intransitives differ in their root form, whereas in others the difference is in the tense marker.

<u>tirunt</u> u 'improve'	<u>tiru</u> <u>t</u> tu 'improve something'
<u>tirump</u> u 'turn'	<u>tiru</u> ppu 'turn something'
curu <u>ṅ</u> ku 'shrink'	curu <u>k</u> ku 'shrink something'
aa <u>ṭ</u> u 'swing'	aa <u>ṭ</u> tu 'swing something'
uru <u>k</u> u 'melt'	uru <u>k</u> ku 'melt something'
ee <u>R</u> u 'go up'	ee <u>t</u> tu 'lift something up'

nimir 'be erect'	nimit <u>t</u> u 'straighten something'
pira <u>ḷ</u> 'turn'	pira <u>ṭ</u> tu 'turn something'
na <u>n</u> ay 'wet'	na <u>n</u> ayi <u>R</u> en 'I am getting wet'
	na <u>n</u> ak <u>k</u> i <u>R</u> en 'I am wetting (something)'

There are a few similar pairs in which both are transitives: *viḷaṅku* 'understand' *viḷakku* 'explain'. Such pairs are very limited in the language.

Ditransitive verb made causative

A ditransitive verb can be made causative by postposing the past participle of *vay* to the noun phrase referring to the causee:

naan enakkuc caappaaṭu camaccen
 'I cooked food for me'

veelaykaaRanay vaccu enakkuc
 caappaaṭu camaccen
 'I got a servant to cook food for me'

Some speakers use the causative form of the verb:

veelaykaaRanay vaccu enakkuc
 caappaaṭu camappiccen
 'I got a servant to cook food for me'

Instead of the form *vaccu*, the past participle of *kol* (*konṭu*) or *piṭi* (*piṭiccu*) too may be used:

veelaykaaRanayk konṭu enakkuc
caappaatu camaccen

veelaykaaRanayp piṭiccu enakkuc
caappaatu camaccen

Sometimes an indirect command is used instead of this type of causative.

naan appaakkut tavaal elutinen
'I wrote a letter to my father'

naan tampiyay appaakkut
tavaal elutac connen
'I told younger brother to write a letter to father'

Reflexive verb form

When *kol* is used following a past participle, it will have the sense 'to do for oneself'.

nallaay caappittuk kolḷunṅkoo
'Eat well (for yourself)'

ovvoru naalum vanṭu kolḷunṅkoo
'Come daily (for yourself)'

In some sentences past participle + *konṭu* may give the broad sense 'while doing the action (indicated by the past participle)' or 'simultaneously'.

ennaalay paṭiccuḱ konṭu
veelay ceyya muṭiyaatu

'I cannot work while studying'
taṭiyayp piṭiccuḱ konṭu vetṭunṅkoo
'Hold the stick and cut it'

Tenses

Morphologically there are three different tenses in Jaffna Tamil, and they may be termed 'past', 'present' and 'future'. But these tense forms do not have one to one correlation with past, present and future time. Consider the following:

(i) A: *keṭiyaay ceyyunkoo*
'Do it quickly'

Even when action is not over or not begun, one may say:

B: *itoo ceyten /*
itoo ceytitten
'Here, I have done it'

(ii) *naan naalaykku cetten*
I tomorrow dead
'I will be dead tomorrow'

(iii) *neeRRu inta neeram aṅkay*
yesterday this time there
nikkiRaar
he is
'Yesterday he was there at this time'

(iv) *avar naalaykku aṅkay nikkiRaar*
he tomorrow there he is
'He will be there tomorrow'

(v) *avar muntī nallaayk kuṭippar*
he before well would drink
'Earlier he drank heavily'

(vi) avar ippa ankay nallaayk
 he now there well
 kuṭippar
 would drink

'Now he will be drinking there heavily'

Use of formally distinguished tenses

Universal time reference

Usually, the future tense form is used to make generic statements or statements referring to all time:

pacu paal tarum
 cow milk would give
 'Cow gives milk'

avar muntik kuṭippar
 he before would drink
 'Earlier he drank'

avar ippa kuṭippar
 he now would drink
 'Now he drinks'

avar inik kuṭippar
 he henceforth would drink
 'Hereafter he would drink'

Reference to present time

Reference to present time action and action in progress is usually made by present tense forms:

avar ippa kolumpilay irukkiRaar
 'He is now in Colombo'

Reference to past time

Reference to past time is usually made by past tense forms:

avar neeRRu incay vantaar
 'He came here yesterday'

In some simple constructions the use of the lexical items munnam 'before' and munti 'before' makes a distinction between a recent past and a distant past. When used as time adverbs without a noun, munnam refers to more recent time, whereas, munti refers to the more distant past:

vaattiyaaar incay munnam vantaar
 'The teacher came here just a shortwhile ago'

vaattiyaaar incay munti vantaar
 'The teacher came here before'

Reference to future time

Reference to future time is made by (i) present tense forms, (ii) future tense forms, (iii) infinitive + poo 'go', (iv) infinitive + ninay 'think', (v) infinitive + paar 'look', and (vi) infinitive + (enttu) + iru 'be'.

If the speaker is certain about the action indicated by the verb, he would generally use the present tense form. If not certain (relatively), he would use the future tense form.

avar naalaykkuk kolumpukkup
 pooRaar
 'He is going to Colombo tomorrow'

avar naalaykkuk kolumpukkup
poovar

• He will go to Colombo tomorrow

An infinitive + poo (in present tense) is used to refer to an event that is about to take place in the future :

avar viitu kaṭṭap pooraar

• He is going to build a house •

This construction conveys an element of intention too.

An infinitive + paar (in present tense) is used to indicate one's effort to do an action in the future :

avar viitu kaṭṭap paakkiRaar

• He is trying to build a house •

An infinitive + ninay 'think' (in present tense) is used to indicate one's plan to do an action in the future :

avar viitu kaṭṭa ninaykkiRaar

• He is planning to build a house •

An infinitive + (eṇṭu) + iru 'be' (in present tense) is used to express one's intention to do something in future :

avar viitu kaṭṭa eṇṭu irukkiRaar

• He intends building a house •

In this type of construction eṇṭu is sometimes dropped.

The future tense form in Jaffna Tamil may also be used to indicate ability.

enray tampi malayaalam vaacippar

• My younger brother can read Malayalam •

With the first person plural subject the future tense form may indicate the sense of optative: poovam 'Let us go', caappituvam 'Let us eat'.

Aspect

Perfect aspect

Perfect aspect is formed with the past participle of a verb + the auxiliary verb iru 'be'. It is pluperfect or present perfect or future perfect depending the tense to which the auxiliary iru is inflected. iru takes person and number endings to agree with the subject.

Pluperfect

The pluperfect is the past participle of a verb + the past form of iru:

kaliyaana eluttukku munnamee
ciitanam ivvalavu eṇṭu
colliyirunten

• Even before the registration of marriage, I had said that the dowry would be this much •

vittiyum kuṭṭattukku vantiruntaar
• Vithi too had come for the meeting •

One common use of the pluperfect is to indicate the completion of an action in the past commonly suggesting

that the action took place before something else occurred. However, the use of pluperfect is not very common in Jaffna Tamil. Instead, the ordinary past tense of the verb is more commonly used.

Present perfect

The present perfect is the past participle of a verb + the present tense form of *iru*.

naan toocay caappittirukkiRen
'I have eaten dosai'

naan lan^{tan}anukkup pooyirukkiRen
'I have gone to London'

tampi pet^{ti}kkullay irun^{ta}
kaacay et^uttirukkiRaar
'Younger brother has taken the money
that was in the box'

ka^{ta}ykkuc ciini van^{ti}rukku
(literally, 'Sugar has come to the shop')
'There is sugar in the shop'

kolumpilay irun^{tu} kaalamay
velikkitt^a pil^{la}yal ippa taan
in^{ca}y van^{ti}rukkinam
'Children who set out from Colombo this morning
have come here only now'

The present perfect indicates (i) that someone has the experience of doing something (first two examples), (ii) that an action has been completed before the time of speaking.

Sentences like,

ma^{la}y pey^{ti}rukku
'It has rained'

pa^ampu pooyirukku
'A snake has gone'

naan^{ka}! vi^{it}tilay illa^{ta} neeram
aaroo van^{ti}rukkinam
'Some one has come when we were not at home'

may be taken as indicating a suppositional and/or a factual sense depending on extra linguistic factors.

Future perfect

The future perfect is formed with the past participle of a verb + the future tense form of *iru*.

maamaa in^{ca}y nikkiRaar en^{tu}
terin^{ci}run^{ta}al neeRRu van^{ti}ruppen
'I would have come yesterday, had I known that
uncle was here'

avar coo^{ti}nay paas panⁿⁱ iruppar
'He might have passed the examination'

The future perfect indicates (i) that an action could have taken place in the past but did not (first example), (ii) probability (second example).

There are a couple of verb forms that appear to be perfective in their structure, but in actual use they may not function as perfectives. One such form is the compound verb kaattiru (kaatt^u + iru) 'await'. The perfective form of kaattiru is kaattirun^{ti}ru - :

naan maamaakku ettinayoo naal
kaattiruntirukkiRen

'I have waited for uncle several days'

maamaa enkalukkuk
kaattiruntiruppar

'Uncle would have awaited for us'

The past perfective form of this verb does not occur in the language.

Aspect as different ways of viewing the duration of a situation

Aspects that are formally distinguished

The most commonly used perfective form is made of past participle + the auxiliary viṭu. viṭu may occur in any form that the sentence requires. As a 'full' verb viṭu means 'leave', 'give up'.

avan ellaa veelayum oru
manittiyaalattilay ceytu viṭṭaan
'He has done all the work in an hour'

vaattiyaaar inṇay vantu viṭṭu
viṭṭukkup poonaar
'The teacher went home after coming here'

Usually the v of viṭu is dropped in speech. If the past participle ends in u, the u is also dropped, and if it ends in i, a 'y' is inserted.

naalaykku vantitunṇkoo
'Surely come tomorrow'
naan colliyittēn
'I have already told'

Perfective of definiteness usually conveys (i) emphasis or certainty; or, (ii) the completion of an action.

Perfective of intent

Jaffna Tamil uses pootu more or less in the same sense of viṭu as explained above. But pootu is stronger in sense than viṭu, and often indicates more certainty or full completion.

avan ellaa veelayum oru
manittiyaalattilay ceytu pootṭaan
'He has done all the work in an hour'

nii inṇay vantu pootṭu maamaatṭay
pooka veenṭaam
'Don't go to uncle after coming here'

Unlike viṭu, pootu occurs only with certain verbs. It does not occur with all intransitives. For instance, it does not occur with kalaṇku 'agitate', whereas viṭu occurs:

taṇṇi kalaṇkiyiṭṭutu
'Water is agitated'
* taṇṇi kalaṇkippootṭutu

But in sentences like,

kuḷantaykkup paciccuppootṭutu
'Child is hungry'

naaṇkal kooyilukkup pookalaam,
toonṇcu pootṭu vaaṇkoo
'We can go to the temple, come after a head-bath'

ivvalavu neeramum ankay nintu
 poottu ippa taan vaaRaan
 'He is just coming after staying there all this time'
 avar cariyaay alutu poottaar
 'He had cried a lot'

poottu occurs with intransitive verbs.

Perfective of 'own action'

The perfective of 'own action' is formed by adding the auxiliary poo to the past participle form of an intransitive verb. poo may occur in any form that the sentence requires:

kuttuvilakku nuuntu pooccu(tu)
 'The oil lamp got extinguished'

malarinray kaliyaanam kulampip
 pooccu
 'Malar's marriage got messed up'

This perfective indicates that the action of the verb takes place 'on its own', and also adds a negative sense, that is, the speaker does not want the action to happen, or, is unhappy about it.

Consider the following two conversations to understand the sense of past participle + poo better:

I. A: kulirutu. cutac cutak kooppi
 kontaankoo
 'It is cold. Please bring (some) hot coffee'

B: intaankoo kooppi
 'Here (your) coffee'

A: itenna, aaRippoocutu
 'What is this?. It is cold'
 (Usually vitu (as in aaRiyittutu) won't be used in this context)

II. A: kooppi kontaankoo
 'Please bring (some) coffee'

B: intaankoo kooppi
 'Here (your) coffee'

A: itenna cariyaay cutukutu
 'What is this?. It is very hot'

B: illay aaRiyittutu kutiyunkoo
 'No, it is cold, drink'

(Change of state appears to be common for both vitu and poo - 'aaRiyittutu' and 'aaRippoocutu'. The action as in aaRiyittutu need not have taken place on its own - someone else too could have caused it unlike in aaRippoocutu, where the action could not have been caused by someone else.)

Jaffna Tamils usually use the past participle of an appropriate verb + poo to curse someone:

alincu poo 'May you be ruined'

In such cursing the sense 'on your own' (niiyaay) is implied.

Perfective of impatience

Perfective of impatience is formed with the past participle of a verb + tulay. The full verb tulay (common root for transitive and intransitive) means 'lose'.

antak kaacayk kututtut tulayunkoo
'Please give that money (and finish off)'

naan kannanay eppitiyoo
patippiccut tulaykkiRen

'I will somehow educate Kannan (and finish off)'

This perfective indicates a sense of impatience or disgust on the part of the speaker.

Sometimes the auxiliary viitu is added to a past participle + the past participle of tulay:

anta viittay makalukkuk kututtut
tulayccitunkoo

'Give that house to daughter (and finish off)'

Another way of expressing impatience is to add the transitive tiir 'finish', 'exhaust' to a past participle. The sense conveyed by tiir is not so strong as that of tulay.

appaa conna veelayayc ceytu
tiittēn

'I finished off doing the work assigned by my father'

eetoo colluRatay ellaam collitttiir
'Finish off saying what ever you want to say'

When the infinitive of the intransitive tiir precedes veenum, it makes the obligation indicated by the past participle stronger, and it does not convey any sense of impatience or disgust: nii pooyt tiira veenum 'You must go'.

Perfective of excess

The auxiliary tallu is added to a past participle of a transitive to convey the sense "excess" in an action.

appaa kaacay celavaliccut
talliraar

'Father is spending the money lavishly'

akkaa pulukit talliraar

'Elder sister is boasting too much'

A couple of intransitives too take tallu:

kulantay alutu tallutu

'The child is crying intensively'

In some contexts tallu conveys a notion of disposing of something:

ini enna ceyyiratu, intak
kaanaiyayk kututtut talluvam

'Now, what to do? Let us give away this land'

untap palan kaaray unkalukku een
vittut tallunkoo

'Why do you want that old car? Sell it away'

Sometimes an element of unwillingness may be present in this sense.

Perfective of utility

Past participle of a transitive + the auxiliary *vay* indicates prior action (action in advance) for future utility or benefit :

*paalukkuk kaacayk kuṭuttu
vayyunkoo*

‘Give money (in advance) for milk’

*naaṅkaḷ koḷumpukkup pooratuḷḷu
ippavee kaaruḷḷuc colli vayppam*
‘Let us book the car now itself for us to go to Colombo’

*maamaa vaṅkiyilay kaacu poṭṭu
vaykiRaar*

‘Uncle is depositing money in the bank (for future benefit)’

The auxiliary *vay* is sometimes pronounced as *vey*. The “full” verb *vay* means ‘put’, ‘place’, ‘set aside’.

Habitual aspect

The most common way of expressing habitual action in Jaffna Tamil is by adding the appropriate pronoun to the present verbal adjective to agree with the subject of the sentence.

ponnar taccu veelay ceyyiRavar

‘Ponnar does carpentry’

*naan ovvoru naalum kooyilukkup
pooranaan*

‘I go to temple daily’

The final *a* of the present verbal adjective is dropped before pronouns beginning in *a*.

The habitual usually indicates an action done habitually or consistently in the present. But it may also be used with past meaning where the context (such as a past adverb) indicates past time.

*naan muntī maamaa viṭṭay
pooranaan*

‘I used to go to uncle’s house before’

cuppar muntic cariyaayk kuṭikkiRavar
‘Cuppar used to drink heavily before’

Another common way of expressing habitual action is by adding the auxiliary *vaa* to the past participle of a verb. *vaa* may be in any form as the sentence requires.

*aravintan kaṇakku nallaay ceytu
vantaar*

‘Aravindan was (habitually) doing well in arithmetic’

*avar ovvoru naalum kooyilukkup
pooy vaaraar*

‘He goes to the temple daily’

*naaṅkaḷ ellaarum ini ovvorunaalum
cuuriyanayk kumpiṭṭu varuvam*

‘Let us hereafter habitually worship the sun daily’

The future form may give past meaning if the context indicates past time.

*ponnar muntī ovvoru naalum
kooyililay teevaaram paṭṭi varuvar*
‘Earlier Ponnar used to sing devotional songs in the temple daily’

The form koṇṭu may occur optionally between the past participle and the auxiliary vaa.

aravintan kaṇakku nallaay ceytu
koṇtu vantaar

‘Aravindan was (habitually) doing well in arithmetic’

The present tense form may be also used to indicate habitual action in the present.

ippa aravintan kaṇakku nallaay
ceyyiRaan

‘Now Aravindan is (habitually) doing well in arithmetic’

ṭaakkottar Ravi vaḷakkamaay
ovvoru tinkalum incay vaaRaar

‘Dr. Ravi habitually comes here on every Monday’

The future tense form of the verb may be also used to indicate habitual action especially when the reference is to past time.

naan paṅkaḷuurilay paṭikkeekkay
ovvoru naalum yookappiyaacam
ceyven

‘When I was studying in Bangalore, I used to do yoga exercises daily’

Habitual action in the past may be also expressed by the present verbal noun + illay, followed by the quotative particle eṇṭu, followed by the past form of iru ‘be’.

naan koḷumpilay kuṭumpattoṭay
irukkeekkay potuvaay yaalpaanam
pooRatillay eṇtu irunten

‘When I was in Colombo with my family, I generally intended not to go to Jaffna’

Habitual action in the future time may be also expressed with the future tense form of a verb or with infinitive + poo ‘go’.

ini ṭaakkottar Ravi ovvoru naalum
incay varuvar

‘Hereafter Dr. Ravi will (habitually) come here daily’

ini ṭaakkottar Ravi ovvoru naalum
incay varap pooRaar

‘Hereafter Dr. Ravi is going to come here daily’

Progressive form of a verb in all three tenses too can give habitual sense.

inimeel incay ṭaakkottar ovvoru
naalum pinneerattillay
vantukoṇtiruppar

‘Hereafter the doctor will be coming here daily in the evening’

Negative habitual aspect is indicated by adding illay ‘no’ to the present verbal noun.

maamaa eṅkaṭay viiṭṭay vaaRatillay
‘Uncle does not come to our house’

The negative habitual has a variant formed by adding llay to the present verbal adjective instead of the present verbal noun.

maamaa eṅkaṭay viiṭṭay vaaReellay
‘Uncle does not come to our house’

The final *a* in verbal adjectives + *i* in *illay* gives *ee*.

The negative habitual aspect may be also indicated by using an infinitive + future negative marker *maatt-*.

appaa etukkum kavalayp pata
maattaar

'Father won't worry for anything'

The negative habitual is generally used with present sense, but it may also be used with past or future meaning where the context (such as an adverb) indicates past or future time.

A negative formed by adding *illay* directly to a sentence with a present verb may also indicate negative habitual sense.

makan patikkiRaar illay
'My son does not study'

This type of construction conveys an implication that the speaker feels that the action should have taken place.

Progressive aspect

Progressive aspect is indicated with past participle of a verb + the imperfective auxiliary *konṭiru*. *konṭiru* may occur in any tense, past, present or future.

poona varucam naan kolumpilay
veelay ceytu konṭirunten

'Last year, I was working in Colombo'

inta varucam naan yaalpaanatṭilay
veelay ceytukonṭirukkiRen

'This year, I am working in Jaffna'

vaaRa varucam naan intiyaavilay
veelay ceytukonṭiruppen

'Next year, I will be working in India'

Jaffna Tamil speakers may also use the simple tense forms instead of the progressive forms to express progressive sense.

enna ceyyiRiinka!
'What are you doing?'

naan peeppar vaacikkiRen
'I read (or am reading) a paper'

Prior completion

Past participle + *aaccutu* indicates completion of action prior to the time of speaking. Thus it always gives a past sense.

naanka! ellaac caamaanum
vaankiyaaccutu
'We have bought all things'

makalukkuk kaliyaanam peeciyaaccu
'We have proposed marriage for daughter'

tuRappay ellaa itatṭilum
teetiyaccu
'We have searched the key everywhere'

niinka! ellaa veelayum ceytaaccaa
'Have you done all the work?'

aaccutu is the third person nonhuman singular past tense form of the "full" verb *aaku* 'become'. In *aaccutu* the final *-tu* is mostly dropped in speech.

In examples 2 and 3, the doer of action can be in any person, number or gender, although for convenience the translation has been given as 'we'.

Some speakers may use *mutin̄cu(tu)* 'over' in most contexts where *aaccutu* would occur.

Combination of different aspectual values

The following combinations of aspect markers are common in the language:

participle + *vacciru*

vaccitu

vaccaaccutu

talliyiru

talliyitu

tallippootu

tallittulay

talliyaaccutu

tulacciru

tulaccitu

tulaccuppoottu

tulaccaaccutu

*kolumpukkup pookak kaarukkuc
colli vaccirukkiRen*

'I have booked a car to go to Colombo'

*kolumpukkup pookak kaarukkuc
colli vaccitten*

'I have already booked a car to go to Colombo'

*kolumpukkup pookak kaarukkuc
colli vaccaaccutu*

'I have already booked a car to go to Colombo'

maamaa lan̄tanaalay vantu

pulukit talliyirukkiRaar

'Uncle has boasted after coming from London

maamaa lan̄tanaalay vantu

pulukit talliyittaar

'Uncle has boasted (completely) after coming from London'

maamaa lan̄tanaalay vantu

pulukit tallippooṭṭaar

'Uncle has boasted (completely) after coming from London'

*tampikkuk kaaniyay nankotayaay
elutit tallit tulaccen*

'I have transferred the land to younger brother as gift (and finished off)'

tampikkuk kaaniyay nankotayaay

elutit tallit tulaccaaccutu

'I have transferred the land to younger brother as gift'

appaa ammaakku eeto collit

tulaccirukkiRaar

'Father has told mother something (and finished off)'

tampikkuk kaaniyay nankotayaay

elutit tulaccitten

'I have transferred the land to younger brother as gift'

appaa teetina porul ellaattayum
annay aliccut tulaccuppoottaar

‘Elder brother has destroyed (spent) all the wealth
acquired by father’

tampikkuk kaaniyay elutit
tulaccaaccutu

‘I have finished off transferring the land to younger
brother’

Three markers too occur in a single combination:

avar kaaniyay aarukkoo elutit
tallit tulaccirukkiRaar

‘He has transferred the land to someone
(and finished off)’

The progressive konṭiru combines with iru, viṭu
tulay and aaccutu:

inta veelayay muuntu maatamaayo
ceytukonṭiruntirukkiRaar

‘He has been doing this work for three months’

makan neerattukkup pookeellay.
paticcukkonṭiruntittaar

‘Son did not go in time. He had been studying’

mantiri kuuttattukku neerattukku
vareellay. ataalay ellaarum
cattam poṭat totaṅki vittinam.
kuuttam kuḷampip poom enṭu
payantu naan mantiri varum
matṭum paatikkonṭiruntu tulaccen

‘The minister did not come for the meeting on time.
Because of that, all had started making noise. Fearing
that the meeting would get messed up, I kept on
singing (damn it) until the minister arrived’

mani enkaṭay makalayk kaliyaanam
ceyvar enṭu naalu varucam kaattuk
konṭiruntaaccutu. ini avaray
veenṭaam.

‘We have awaited for four years hoping that Mani
would marry our daughter. Now we don’t want him’

Among perfectives -tulay, -tallu, -tallittulay
and -vay combine with progressive and perfect yielding
the following compounds:

-tulaccukkonṭiru, -tulaccukkonṭirun-
tiru, -tallikkonṭiru, -tallikkonṭiruntiru,
-tallittulaccukkonṭiru, tallittulaccuk-
konṭiruntiru, -vaccukkonṭiru, -vaccuk-
konṭiruntiru.

appaa ammaakku eetoo collit
tulaccukkonṭirukkiRaar.

‘Father is telling something to mother (damn it)’

appaa ammaakku eetoo collit
tulaccukkonṭiruntirukkiRaar

‘Father has been telling something to mother (damn it)’

appaa ammaakku eetoo collit
tallikkonṭirukkiRaar

‘Father is telling something (excessively) to mother’

appaa ippa ammaakku ellaat_tayum
collit_tallikkon_tirukkiRaar

'Now father is telling mother everything (in excess)'

or

'Father (who did not say anything so far) is telling
(out) mother everything now'

appaa ammaakku eeto collit
tallikkon_tiruntirukkiRaar

'Father has been telling mother something (in excess)'

avar eeto elutittallittulaccukkon_tirukkiRaar

'He is writing something (much) (damn it)'

avar eeto elutittallittulaccuk -
kon_tiruntirukkiRaar

'He has been writing something (much) (damn it)'

avar kaacay potti vaccuk
kon_tirukkiRaar

'He is having the money tightly'

avar kaacay potti vaccirukkiRaar

'He has the money tightly'

avar kaacay potti vaccuk
kon_tiruntirukkiRaar

'He has been having the money tightly'

Mood Conditional

The past conditional is formed by adding -aal to the past base of a verb. It can be used to refer to any time, past, present or future.

maamaa naalaykku vantaal naanka!
canikkilamay kolumpukkup
pookalaam

'If uncle comes tomorrow, we can go to Colombo on
Saturday'

avar neeRRup poonaal in_taykkup
pinneeram vantaivar

'If he had gone yesterday, he would certainly come
today evening'

The final -l in -aal may be optionally dropped in speech.

Some speakers may use the perfective conditional pooyiruntaal instead of poonaal in the second example.

The past conditional is used in forming 'if' clauses.

Negative conditional

Negative conditional is formed by adding -aat_til to the infinitive of a verb. The final -a of the infinitive is dropped when -aat_til is added.

maamaa naalaykku varaat_til
naanka! kolumpukkup pooka
mutiyaatu

'If uncle does not come tomorrow, we cannot go to
Colombo'

kamalaa neeRRup pookaattil
 naalaykkaavatu kaṭṭaayam pooka
 veenum

'If Kamala did not go yesterday, she must surely go
 at least tomorrow'

nii paṭikkaattil naan unakku
 onṭum taren

'If you don't study, I won't give you anything'

For strong verbs there is an alternant form which adds
 -aattil directly to the roots.

nii paṭiyaattil naan unakku
 onṭum taren

-aattil has a variant form -aatṭaal.

niinkal varaatṭaal naan pooren
 'I am going if you are not coming'

The final -l of the negative conditional marker is
 optionally dropped in speech.

An alternate way of expressing negative conditional is to
 make the final -a of the infinitive long, optionally followed
 by -mal, and add the verb viṭu followed by -aal.

niinkal veelay ceeyaa(mal)
 viṭṭaal naan kaacu taren

'If you don't work, I won't give money'

-viṭṭaal has viṭṭil and viṭil as variants. The
 final -l in viṭṭaal or viṭṭil may be optionally
 dropped in speech.

The negative conditional forms 'if not' clauses.

Concessive

The concessive form of the verb is formed by adding
 -um to the conditional form with -aal. (It cannot be
 added to the conditional with -aa).

appaa poonaalum naan pooka
 maattēn

'Even if father goes, I won't go'

Negative concessive

The negative concessive is made by adding -um to the
 negative conditional form with -aattil or -aatṭaal.

maamaa ciitanam taraatṭilum naan
 avaRRay makalayt taan kaliyaanam
 ceyven

'Even if uncle does not give dowry, I will marry his
 daughter only'

An alternate way of expressing negative concession is to
 make the final a of the infinitive long, and add -um to
 the concessive suffix.

maamaa ciitanam taraaviṭṭilum
 naan avaRRay makalayt taan
 kaliyaanam ceyven

Optative

A wish for the happening of something is expressed in
 the case of a third person subject by -ṭṭum.

maḷay nallaayp peyyaṭṭum
'Let it rain well'

naaṭu ceḷikkattum
'Let the country prosper'

avan peecaamal irukkattum
'Let him be silent'

With the first person plural subject the future tense form may also indicate the sense of optative.

poovam vaan̄koo
'Let us go, come'

caappiṭuvam vaan̄koo
'Let us eat, come'

Similarly with the first person plural subject the -laam form too may indicate some kind of optative sense.

pookalaam vaan̄koo
'Let us go, come'

caappiṭalaam vaan̄koo
'Let us eat, come'

Infinitive plus veen̄um may also indicate some kind of optative sense.

kaliyaanaṇ kaṭṭip piḷḷay
kuṭṭiyootay nallaay vaala veen̄um
'May I / you / he etc marry and live well with children'

Intentional

Intention to do something may be expressed with the infinitive of a verb (indicating the action intended) plus the quotative eṇṭu and the verb iru 'be' or ninay 'think'. The verb iru can occur in any of the three tenses. The verb ninay does not usually occur in the future, but occurs in the past and present.

Instead of the infinitive, one may also use a verb in the form of the modal -laam, followed by eṇṭu and the verb iru or ninay.

naaṅkaḷ laṇṭanukkup pooka eṇṭu
irukkiRam
'We intend going to London'

naaṅkaḷ laṇṭanukkup pooka
ninaykkiRam
'We think of going to London'

In the first example eṇṭu may be optionally dropped.

naaṅkaḷ laṇṭanukkup pooka
irukkiRam

naaṅkaḷ laṇṭanukkup pookalaam
eṇṭu irukkiRam

Note that eṇṭu cannot be dropped when the modal -laam occurs.

Jaffna Tamil speakers may also use the modal veen̄um instead of -laam.

naaṅkaḷ laṇṭanukkup pooka
veen̄um eṇṭu irukkiRam

The use of veen̄um indicates some sort of seriousness in the intention.

Intention to begin an action and continue it from that time forward may be expressed by adding the present tense form of the verb *poo* to an infinitive.

*enray makal naalayilay iruntu
canikiitam patikkap pooraa*

'My daughter will begin learning music from tomorrow'

Negative intention is expressed by the infinitive of *iru* or *ninay* followed by *illay*.

*naankal lanthanukkup pooka entu
irukkeellay*

'We don't intend going to London'

*naankal lanthanukkup pooka
ninaykkeellay*

'We don't think of going to London'

*naankal lanthanukkup pookalaam
entu irukkeellay*

'We don't intend going to London'

The negative can be in reference to any time.

Debitive

Obligation to do something is usually expressed by *veenum* or *veent-* plus some other element. Negative obligation is usually expressed by *veentaa*, *kuutaatu* or *paataatu*.

Different degrees of obligation are indicated either by emphatic markers like *taan*, *ee* added to the infinitive preceding *veenum* or by forms like *tiira* (infinitive

of the intransitive 'full verb' *tiir* 'finish', 'end', 'exhaust'), *(v)ita*, *aaka* added to the past participle or to the past participle + *ee*. *aaka* does not usually occur with negative obligation.

The adverbial form *katṭaayam* too may be used in a construction to intensify the necessity of an action.

Examples are arranged from the weakest to the strongest in degrees of obligation.

niinkal kaacu kutukka veenum

'You must give money'

niinkal kaacu kutukkavee veenum

'You must certainly give money'

*niinkal kaacu kutukkatṭaan
veenun*

'You must certainly give money'

niinkal kaacu kututtita veenum

'You must definitely give money'

*niinkal kaacu kututtitavee
veenun*

'You must definitely give money'

*niinkal kaacu kututtitattaan
veenun*

'You must definitely give money'

*niinkal kaacu kututtuttiira
veenun*

'You must certainly give money'

niĩṅkaḷ kaacu kuṭuṭṭee tiira
veenṇum

‘You must definitely give money’

niĩṅkaḷ kaacu kuṭuṭṭeetaan tiira
veenṇum

‘You must definitely give money’

niĩṅkaḷ kaacu kuṭuṭṭaaka veenṇum

‘You must positively give money’

niĩṅkaḷ kaacu kuṭuṭṭee aaka veenṇum

‘You must positively give money’

There is another way of indicating positive obligation, namely by using *veenṭi* (past participle of *veenṭ-*) + *iru*. The verb *iru* may be in any of the three tenses with corresponding differences in meaning but will be always in the singular neuter form.

There is a difference in sense between the use of *veenṇum* and *veenṭiyiru*. The occurrence of *veenṇum* mostly indicates a self-desire or self-motivation to perform the obligation, whereas *veenṭi + iru* always indicates a need for the action due to circumstances.

Jaffna Tamil speakers may also use *veenṭi + vaa* in any of the three tenses, but only as a third person singular neuter form to indicate the necessity of doing an action.

naaṅkaḷ koḷumpukkuṭṭu pooka veenṭi
vanṭuṭu

‘We had to go to Colombo’

(It became necessary for us to go to Colombo)

naaṅkaḷ koḷumpukkuṭṭu pooka veenṭi
vareellay

‘We did not have to go to Colombo’

naaṅkaḷ kaacu celavalikka veenṭi
varum

‘We will have to spend money’

(‘It would become necessary for us to spend money’)

When *muṭiyaaṁal* ‘without being able’ is used dependent on *vaa-*, it conveys the sense that the situation comes about so that something cannot be done.

naaṅkaḷ koḷumpukkuṭṭu pooka
muṭiyaaṁal vanṭuṭu

‘It happened that we could not go to Colombo’

The negative obligation of *veenṇum* is mostly expressed by *veenṭaam*, or by the nominalised form of *veenṭ-* plus *illay*.

niĩṅkaḷ koḷumpukkuṭṭu pooka veenṇum
‘You must go to Colombo’

or

‘You have to go to Colombo’

naan koḷumpukkuṭṭu pooka veenṭi
irukkuṭu

‘I have to go to Colombo’

niĩṅkaḷ koḷumpukkuṭṭu pooka veenṭaam

‘You mustn’t go to Colombo’

or

‘You don’t have to go to Colombo’

naan koḷumpukku^p pooka
veenṭiyatillay

'I don't have to go to Colombo'

avar koḷumpukku^p pooka
veenṭiyiruntu

'He had to go to Colombo'

avar koḷumpukku^p pooka
veenṭiyirukkeellay

'He did not have to go to Colombo'

avar koḷumpukku^p pooka
veenṭiyirukkum

'He may have to go to Colombo'

avar koḷumpukku^p pooka
veenṭiyiraa(tu)

'He may not have to go to Colombo'

naan eṭṭaray maṇikku munnam
paḷḷikkuta^m pooka veenum. atukkup
piRaku pooka veenṭiyatillay

'I must go to school before half past eight. After that
there is no point in going'

Sometimes negative obligation is expressed by using
either kuuṭaa(tu) or paṭaa(tu) — forms most
commonly used as prohibitives — in a sense, as negatives of
the permissive -laam and -ttum forms.

uḷḷay pookalaam

'can go in'

uḷḷay pookak kuuṭaatu

'shouldn't go in'

uḷḷay pookap paṭaatu

'shouldn't go in'

Different degrees of negative obligation or prohibition
expressed by the use of veenṭaam, kuuṭaatu or
paṭaatu are illustrated with the following examples on
an increasing scale of negative obligation.

nii pooka veenṭaam

'You mustn't go' / 'You don't go' / 'You need not go'

nii pookavee veenṭaam

nii pookavee pooka veenṭaam

nii pooka veenṭavee veenṭaam

nii pookak kuuṭaatu

'You mustn't go'

nii pookavee kuuṭaatu

nii pookavee pookak kuuṭaatu

nii pookak kuuṭavee kuuṭaatu

nii pookap paṭaatu

'You mustn't go'

nii pookavee paṭaatu

nii pookavee pookap paṭaatu

nii pookap paṭavee paṭaatu

'You shouldn't go'

The forms veenum and veenṭaam also occur
in a different type of construction, with the sense 'want',
'need' and 'don't want', 'don't need' respectively. Both
have a noun in the dative case.

enakkuk kooppi veenum

'I want coffee'

enakkuk kooppi veenṭaam

'I don't want coffee'

Potential

Physical ability

Physical ability is indicated by either mutiyum or eelum, and the corresponding negative forms are mutiyaatu and eelaatu. The agentive noun phrase will be either in the direct or instrumental case. iyalum and iyalaatu are variants of eelum and eelaatu respectively. Final -tu may be optionally dropped in speech.

ennaalay intap petṭiyayt taniyat
tuukka mutiyum

naan intap petṭiyayt taniyat
tuukka mutiyum

'I can lift this box on my own'

ennaalay intap petṭiyayt taniyat
tuukka eelum

'I can lift this box on my own'

naan intap petṭiyayt taniyat
tuukka eelaatu

'I cannot lift this box on my own'

When the reference is to past time either mutiñcutu or iyañtutu is used for the affirmation of ability; for the denial of ability mutiyeellay or iyaleellay is used.

eppiṭi cootinay nallaay ceyya
mutiñcuta taa

'How? Were you able to do well in the examination?'

illay, nallaay ceyya mutiyeellay
'No, I couldn't do well'

neeRRu unkaḷaalay kaḷḷanayp
piṭikka iyañtutaa

'Were you able to catch the thief yesterday?'

illay, iyaleellay

'No, couldn't'

The forms mutiyeellay and iyaleellay may be also used when the reference is to present time. They are never used for reference to future time.

muntṭi ennaalay ellaa veelayum
ceyya mutiñcutu. ippa ennaalay oru
veelayum ceyya mutiyeellay / iyaleellay.

'Earlier I was able to do all the work. (But) now I am unable to do any work'

Another way of expressing physical ability is to use the future tense form.

avar maram eeRuvar
'He can climb tree'

The corresponding expression of inability is made by using the infinitive + maatt-

avar maram eeRamaattaar
'He can't climb tree'

The -laam form of a verb too may indicate some sort of physical ability.

pattup peer ennattukku naan
maṭṭum inta veelayay ceyyalaam
'Why ten persons? I alone can do this work'

If the speaker wishes to be more assertive in a given context, he would use *mutiyum* instead of *-laam* form. In general, the form *mutiyum* has more the sense of capacity, i. e., 'one has the power to', whereas *-laam* form has more the sense of possibility.

Permission

Permission is expressed by adding either *-ttum* or *-laam* to the infinitive form of a verb.

Usually *-ttum* occurs only with third person subjects. It may occur with first person pronouns too, but only in questions. *-laam* form can be with subjects of any person.

avan incay vantu veelay ce^yyattum
'He may come here and work'

naankal naalaykku varattumaa
'May we come tomorrow?'

naan koottaykkulay pookalaaam
'I can go into the fort'

or

'I am allowed to go into the fort'

or

'There is permission for me to go into the fort'

naan pookalaamaaam

'It seems that I can go'

niinkaa! pookalaaam

'You may go'

cineekitar incay varalaaam

'Friends may come here'

Jaffna Tamil may use a form in *-ttee* instead of *-ttumaa*, but only in the first person singular.

naan naalaykku varattumaa

naan naalaykku varattee

'May I come tomorrow?'

The *-ttum* form conveys a more positive and firm sense of permission than the *-laam* form.

Permission is also expressed by adding *vitu* to the infinitive form of a verb. It means 'allow someone to do the action of the infinitive'.

*vaattiyaar kannanay vakuppuk-
kullay vaa vittaar*

'The teacher allowed Kannan to come into the class'

Learned ability

Learned ability is usually indicated by the root *teri-* 'be known'.

aravintanukku kaar oottatteriyum

'Aravindan knows how to drive a car'

makanukku innum cayikkil oottatteriyaatu

'My son doesn't know how to cycle yet'

(Note that Jaffna Tamil usually uses the intransitive verb *ootu* to express the sense 'drive a vehicle'.)

With *teriyum* and *teriyaatu*, the one who knows is in the dative case. These forms are also used to express recognition or understanding of something. In general,

if something is known in the sense of recognition, as in knowing a person, it will be in the accusative case. If understanding is involved, such as knowing a language well, it will be in the direct case.

enakku unkaḷinray vaat_itiyaaray_t
teri_yum

'I know your teacher'

enakkuc ciṅkaḷam teri_yum

'I know Sinhala'

Familiarity in doing an action

Familiarity in doing an action is expressed by adding the form paḷakkam to the past participle of a verb.

naan kaar ooti_p paḷakkam

'I am familiar with driving a car'

naan kaar ooti_p paḷakkam illay

'I am not familiar with driving a car'

enakku maram eeRi_p paḷakkam

'I am familiar with tree-climbing'

Degree of certainty

Possibility or probability of something happening is expressed by (i) adding kuu_tum to the infinitive, (ii) a modal form in -laam, (iii) concessive + a modal form in -laam, (iv) concessive + a future tense form, (v) future tense form with an adverbial (oruveeḷay 'sometime', cilaveeḷay 'sometime', etc.) preceding it.

(i) appaa vaaRa kiḷamay
vara_kkuu_tum

'Father may come next week'

(ii) appaa vaaRa kiḷamay varalaam

'Father may come next week'

(iii) appaa vaaRa kiḷamay vantaalum
varalaam

'Father may come next week'

(iv) appaa vaaRa kiḷamay
vantaalum varuvar

'Father may come next week'

(v) appaa vaara kiḷamay oruveeḷay
varuvar

'Father may sometime come next week'

An adverb like oruveeḷay may optionally occur in other sentences (i, ii, iii and iv) too.

All the above constructions are stylistic variations, and do not usually make any difference in the degree of certainty.

Jaffna Tamil adds the form aakkum to an infinitive (or to an utterance) to indicate probability.

avarukku ip_pa kaacu een

'Why does he want money now?'

makanukku anup_pa aakkum

'Probably to send it to his son'

maamaa laṅṭanaalay vaaRa kiḷamay
vaaRaar aakkum

'Uncle is probably coming from London next week'

paḷamaa kaayaa

'Is it ripe or unripe fruit?'

kaayaakkum

'Probably (it is) unripe fruit'

Probability is also indicated by adding poolay irukku to an utterance. It can convey the sense 'it seems' too.

maamaattay rampak kaacu irukkup
poolay irukku

'Probably uncle has a lot of money'

Some speakers may use teriyutu instead of irukku. The forms irukku and teriyutu may be optionally dropped in speech.

Infinitive + veenum may be used to indicate more hope for the action to take place.

appaavaaRa kiḷamay vara veenum
'Father must come next week'

Both the present and the future tenses may indicate certainty. The difference between the two is that the present tense indicates more certainty than the future.

avar naaḷaykku vaaraaR
'He is coming tomorrow'

avar naaḷaykku varuvar
'He will come tomorrow'

Infinitive + present tense form of poo- too indicates certainty, but the certainty is less than that indicated by the present tense form.

anta veelayay avar ceyyap pooRaar
'He is going to do that work'

In some contexts it may give the sense 'one is about to do the action' indicated by the infinitive.

kuuṭiyataayiru- used with an infinitive indicates that the action of the infinitive is possible or can take place. iru can be in any tense.

ippa laṇṭanilay tamil paṭikkak
kuuṭiyataayirukku

'Now it is possible to study Tamil in London'

When reference is made to a past action, possibility or probability is expressed by the perfect infinitive of a verb followed by any of the same set of modals.

ṭaṅkacci koḷumpukku pooyirukkak
kuuṭum

'Younger sister would have probably gone to Colombo'

avar neeRRuk kuuttattukku
pooyirukka veenum

'Probably he had gone to the meeting yesterday'

The second example with veenum can convey a negative sense too, that is, 'He did not go for the meeting yesterday'. It also then conveys an expectation on the part of the speaker that the action should have taken place.

In the case of negatives, the range of possibilities is the same as for positive. If the proposition is negated, the verb will be in the negative adverbial participle form, and it will be followed by iru + modal.

tāṅkacci koḷumpukkuṭṭu pōkaamal
irukkak kuṭṭum

‘Probably younger sister may not have gone to Colombo’

If the modality is negated, either *muṭiyaatu* or *celaatu* is used.

neeRRu niṅkaḷ paṭaṭṭukkuṭṭu
pooyirukka muṭiyaatu

‘You can’t have gone to a film yesterday’

Authority for assertion

When one relies on someone else for the source of an information, he may add *-aam* finally to his utterance. This means that the speaker has no authority for the information that is being conveyed; it is rather based on hearsay.

celvi iṇṭaykku vareellayaam

‘It seems Chelvi is not coming today.’

celviyinray kaliyaanam vaara
putanaam

‘It seems Chelvi’s marriage is on next Wednesday’

An alternative way is to make use of *eṇṭu keelvi* (*paṭu-*). *paṭu-* is inflected to person / number / gender (*p/n/g*). Also *paṭu* may be optionally dropped. Then the sentence will give only a present sense.

caṇmukam laṇṭanukkuṭṭu pōRaar
eṇṭu naaṅkaḷ keelvippaṭṭam

‘We heard that Chanmugam is going to London’

caṇmukam laṇṭanukkuṭṭu pōRaar
eṇṭu naaṅkaḷ keelvi

‘We hear that Chanmugam is going to London’

Finite and nonfinite forms

Tamil makes a distinction between finite and nonfinite verbal forms.

Tenses of finite verbs

Positive indicative

Herein the three simple tenses—past, present and future are dealt with.

Morphemes in positive indicative forms have, for the most part, the following sequence: root + tense + person / number / gender.

Personal pronouns have corresponding *p/n/g* suffixes in the finite form. One exception is that the nonhuman plural finite form does not take plural suffix in any of the tenses, although its corresponding pronoun form always maintains the plural suffix.

The allomorphs of the tense morpheme are morphologically conditioned. Present and future are somewhat mutually predictable: present - *kir-* ↔ future - *pp-*; present - *iR-* or - *R-* ↔ future - *v-*. Future tense allomorphs are also predictable on the basis of the infinitive: if the infinitive has - *kka* finally, the future suffix would be - *pp-*; if the infinitive has - *a* finally, the future suffix would be - *v-*.

Paradigms for two representative verbs follow: *oṭu* ‘run’, *naṭa* ‘walk’. The pronoun subjects appropriate to the tense forms are given here in the order followed in

the paradigms : (i) first person singular : *na a n*; (ii) first person plural : *na a n ka!*; (iii) second person singular (nonhonorific) : *nii*; (iv) second person singular (intermediate honorific) : *nii r*; (v) second person plural : *nii n-ka!*; (vi) third person masculine singular (nonhonorific) : *ava n*; (vii) third person masculine plural (nonhonorific) : *ava n ka!*; (viii) third person feminine singular (nonhonorific) : *ava!*; (ix) third person feminine plural (nonhonorific) : *ava la va y*; (x) third person masculine singular (honorific) : *ava r*; (xi) third person feminine singular (honorific) : *ava a*; (xii) third person epicene plural : *ava y (a!)*; (xiii) third person neuter singular : *at u*; (xiv) third person neuter plural : *at u ka!*.

	<i>past</i>	<i>present</i>	<i>future</i>
(i)	<i>oot i n e n</i>	<i>oot u R e n</i>	<i>oot u v e n</i>
(ii)	<i>oot i n a m</i>	<i>oot u R a m</i>	<i>oot u v a m</i>
(iii)	<i>oot i n a a y</i>	<i>oot u R a a y</i>	<i>oot u v a a y</i>
(iv)	<i>oot i n i i r</i>	<i>oot u R i i r</i>	<i>oot u v i i r</i>
(v)	<i>oot i n i i n- ka!</i>	<i>oot u R i i n- ka!</i>	<i>oot u v i i n- ka!</i>
	<i>oot i n i y a!</i>	<i>oot u R i y a!</i>	<i>oot u v i y a!</i>
(vi)	<i>oot i n a a n</i>	<i>oot u R a a n</i>	<i>oot u v a n</i>
(vii)	<i>oot i n a a n- ka!</i>	<i>oot u R a a n- ka!</i>	<i>oot u v a n- ka!</i>
(viii)	<i>oot i n a a!</i>	<i>oot u R a a!</i>	<i>oot u v a!</i>
(ix)	<i>oot i n a a la- v a y</i>	<i>oot u R a a la- v a y</i>	<i>oot u v a la- v a y</i>

(xi)	<i>oot i n a a</i>	<i>oot u R a a</i>	<i>oot u v a a</i>
(xii)	<i>oot i c c i - n a m</i>	<i>oot i i n a m</i>	<i>oot u v i n a m</i>
(xiii)	<i>oot i c c u t u</i>	<i>oot u t u</i>	<i>oot u m</i>
(xiv)	<i>oot i c c u t u</i>	<i>oot u t u</i>	<i>oot u m</i>

	<i>past</i>	<i>present</i>	<i>future</i>
(i)	<i>na ta n t e n</i>	<i>na ta k k i R e n</i>	<i>na ta p p e n</i>
(ii)	<i>na ta n t a m</i>	<i>na ta k k i R a m</i>	<i>na ta p p a m</i>
(iii)	<i>na ta n t a a y</i>	<i>na ta k k i R a a y</i>	<i>na ta p p a a y</i>
(iv)	<i>na ta n t i i r</i>	<i>na ta k k i R i i r</i>	<i>na ta p p i i r</i>
(v)	<i>na ta n t i i n- ka!</i>	<i>na ta k k i R i i n- ka!</i>	<i>na ta p p i i n ka!</i>
	<i>na ta n t i y a!</i>	<i>na ta k k i R i y a!</i>	<i>na ta p p i y a!</i>
(vi)	<i>na ta n t a a n</i>	<i>na ta k k i R a a n</i>	<i>na ta p p a n</i>
(vii)	<i>na ta n t a a n ka!</i>	<i>na ta k k i R a a n- ka!</i>	<i>na ta p p a n- ka!</i>
(viii)	<i>na ta n t a a!</i>	<i>na ta k k i R a a!</i>	<i>na ta p p a!</i>
(ix)	<i>na ta n t a a - la v a y</i>	<i>na ta k k i R a a - la v a y</i>	<i>na ta p p a la v a y</i>
(x)	<i>na ta n t a a r</i>	<i>na ta k k i R a a r</i>	<i>na ta p p a r</i>
(xi)	<i>na ta n t a a</i>	<i>na ta k k i R a a</i>	<i>na ta p p a a</i>
(xii)	<i>na ta n t i - n a m</i>	<i>na ta k k i n a m</i>	<i>na ta p p i n a m</i>
(xiii)	<i>na ta n t u t u</i>	<i>na ta k k u t u</i>	<i>na ta k k u m</i>
(xiv)	<i>na ta n t u t u</i>	<i>na ta k k u t u</i>	<i>na ta k k u m</i>

In the first and second persons p/n/g endings of both strong and weak verbs are the same in all tenses.

In the third person, past and present forms of strong verbs have the same p/n/g endings. But past and present forms of certain types of weak verbs (not all weak verbs) take different endings either in the human plural alone, or in both the human plural and nonhuman. Compare the

p/n/g endings of the following weak verbs: *cey* 'do', *aļu* 'cry', *ooṭu* 'run', *taa* 'give'.

<i>past</i>	<i>present</i>
<i>cey-t-inam</i>	<i>cey-y-inam</i>
<i>cey-t-utu</i>	<i>cey-y-utu</i>
<i>aļu-t-inam</i>	<i>aļu-kinam</i>
<i>aļu-t-utu</i>	<i>aļu-kutu</i>
<i>ooṭ-icc-inam</i>	<i>ooṭ-iinam</i>
<i>ooṭ-ico-utu</i>	<i>ooṭ-utu</i>
<i>taa-nt-inam</i>	<i>taa-r-iinam</i>
<i>taa-nt-utu</i>	<i>taa-r-ukutu</i>

In the third person the feminine singular honorific future forms of both strong and weak verbs have the same p/n/g endings as in the past or present forms. The human plural future forms have the same p/n/g endings as in the past. The nonhuman ending is realized as zero in future forms. The endings in other categories of third person future forms differ, but only in the length of the initial vowel of the endings, that is, the initial *aa* of the endings in the past and present is realized as 'a' in the future.

A tense morpheme for a given verb remains constant in the first and second person forms of the paradigm.

In the third person forms, a tense morpheme may remain constant, or vary depending on the specific tense and the type of verb.

Past tense morpheme of strong verbs remains constant in the third person forms, that is, it remains constant throughout the paradigm. For instance, consider *kaṭi* 'bite'. Present tense morpheme in strong verbs is realized as zero in the human plural and nonhuman forms. Again consider *kaṭi* 'bite'.

Past tense morpheme in certain types of weak verbs remains constant in the third person forms, that is, it remains constant throughout the paradigm. For instance, consider -y ending weak verbs like *cey* 'do', or verbs of *aļu* 'cry' type. In certain other types the past tense morpheme varies in the third person human plural and nonhuman forms. For instance, consider verbs of *ooṭu* 'run' type where -in- for other p/n/g suffixes corresponds to -icc- for third person human plural and nonhuman.

Present tense morpheme is realized as zero both in strong and weak verb forms in the third person human plural and nonhuman forms.

Future tense morpheme is realized as -um in the third person nonhuman forms of all verbs.

Negative indicative

In Jaffna Tamil there is a nine-fold distinction in the set of finite negative forms:

- (i) infinitive + *illay*
- (ii) nominalised past tense + *illay*
- (iii) nominalised present tense + *illay*
- (iv) infinitive + present / future nominalised form of *poo* + *illay*
- (v) infinitive + *maatt-*

- (vi) root + p / n / g suffixes
- (vii) past / present finite + illay
- (viii) past verbal adjective + paatu + illay
- (ix) root + p / n / g suffixes + aam

The most commonly used form of negative is infinitive + illay. It can be used in any tense, but, in general, the basic meaning is past, that is, if the context or a clue in the sentence does not indicate present or future time, one can assume that past time is meant: e. g. naan poo-keellay 'I did not go', naan naalaykkup pookeellay 'I am not going tomorrow'.

Note that the final -a of the infinitive + i of illay becomes ee.

Nominalised past tense + illay may be termed as past emphatic negative. It conveys a sense that one has never done the action indicated by the verb, or has not had the experience of doing it.

naan lantanukkup poonatillay
'I've never been to London'

The corresponding emphatic verb is formed in Jaffna Tamil by adding the appropriate pronoun to agree with the subject of the past verbal adjectival.

naan lantanukkup poona naan
'I did go to London'

Nominalised present tense + illay indicates habitual negative sense, that is, one is not in the habit of doing something.

appaa kutikkiratillay
'Father does not drink'

Infinitive + present / future tense nominalised form of poo + illay conveys future emphatic negative sense.

kannan malarayk kaliyaanam
ceyyap pooRatillay
'Kannan is not going to marry Malar'

Infinitive + maatt- gives a future negative sense. maatt- takes p / n / g suffixes, and agrees with its subjects in the same way as verbs.

The p / n / g suffixes are the same as those for the future tense except that the third person singular masculine suffix is -aar, rather than -ar, and the nonhuman suffix is -utu.

maatt- conveys the sense of inability too, and in the nonhuman it always indicates 'inability', that is, it seldom gives the simple negative sense.

paatta caappita maattaar
'Grand father won't eat'

'Grand father won't be able to eat'

a tu itayc caappita maattutu
'A goat won't be able to eat this'

The negative formed by adding p / n / g suffixes directly to the root may be termed direct (inflectional) negative.

For all forms, but the second person honorific, the third person human plural and the third person non-human, the p / n / g suffixes of the present tense are added directly to the root. If the root ends in -u, the -u is dropped. e.g. caappiten 'I won't eat', caappitam 'We won't eat', caappitaar 'He won't eat', caappitaa 'She won't eat'.

For the second person honorific, third person human plural, and third person nonhuman, the p/n/g suffixes of the present tense are added to a negative base formed by adding -aa to the root, and the p/n/g suffixes are added as follows:

(i) for the second person plural, -ya! is added to the negative base in -aa, e.g. caappiṭaaya!

(Note that there is no negative form of this type in the second person singular intermediate honorific category corresponding to a subject in niir).

(ii) for the third person human plural -yinam is added to the negative base in -aa, e.g. caappiṭaayinam 'They won't eat'.

(iii) for the third person nonhuman, -tu is added to the negative base in -aa, e.g. caappiṭaatu 'It won't eat'.

The (irregular) verbs poo, taa, vaa and koṇṭaa take the forms pook-, tar-, var-, and koṇṭar- respectively before p/n/g suffixes.

The direct negative conveys a strong and more definite sense of negative than that conveyed by maatt-.

There is a negative formed by adding illay directly to a sentence with a present/past verb. The negative generally implies disapproval. That is, the speaker feels that the action should have taken place.

makan paṭikkiRaar illay

'My son does not study'

(with the implication that he should study)

The past verbal adjective + paaṭu illay indicates that there is little chance of the action of the verbal adjective taking place. It also suggests that the speaker would like the action to take place, even though he does not believe it will.

kaaccal kuRayṇca paaṭillay

'The fever is not subsiding'

(The speaker would like the fever to subside.)

Earlier the negative form (root + p/n/g suffixes) was given. When -aam is added to the p/n/g suffixes, the form, that is, root + p/n/g suffixes + -aam suggests that one is not doing the action indicated by the verb but the speaker would like the action (affirmative) to take place.

avar kaacu taraaraam

'He is not giving the money'

(with the suggestion that he should give)

In the same form, -aam may give the quotative sense too. Context has to be taken into consideration in deciding the meaning.

Tenses of nonfinite verbs

Infinitive

Infinitives do not distinguish tenses.

Strong verbs form the infinitive by adding -kka to the verbal root, and the weak verbs by adding -a to the root. e.g. paṭi 'study' paṭikka; aaṭu 'dance' aaṭa. A number of irregular verbs (usually weak verbs) change their root before adding the infinitive -a. e.g. poo 'go' pooka; koṇṭaa 'bring' koṇṭara.

Infinitive is used to express purpose and simultaneity. It occurs in the following constructions:

Infinitive + modal auxiliaries

- + forms of *poo* 'go'
- + forms of *viṭu* 'leave'
- + forms of *paar* 'look'
- + forms of *ninay* 'think'
- + *illay* 'no'
- + (*enṭu*) past / present forms of *iru* 'be'
- + forms of *veeṇṭiyiru* 'have to', 'it is necessary that ...'

Also infinitive may be used to form a when clause. e.g. *niṅkaḷ ataye collaṭ taan enakkut teriyum* 'It was only when you told me that that I came to know (of it)'. An infinitive may be doubled to form an adverb meaning 'as the action of the verb of the infinitive continued' or 'the more one does such and such', e.g. *naan kaacu keekkak keekka avar taaraar* 'He gives as I continue to ask for money', *niṅkaḷ kuuppiṭak kuuppiṭa avar varaar* 'He won't come as you keep on calling (him)'.

Aspects can occur in infinitival forms. e.g. *elutittalla*.

Adverbial participle

The adverbial participle, or past participle does not distinguish between past, present and future tenses.

Weak verbs that take -in- in the past tense drop the -n- of the past tense to form the past participle. e.g. *kaatṭu* 'show', past tense base *kaatṭin-*, past participle *kaatṭi*. Strong verbs and all other weak verbs

form the past participle by adding -u to the past tense base. e.g. *cey* 'do', past base *ceyṭ-*, past participle *ceyṭu*; *naṭa* 'walk', past base *naṭant-*, past participle *naṭantu*. The verbs *poo* 'go', *collu* 'tell' have the past participles *poo y*, *colli* respectively.

Past participles of perfective forms are similarly composed of the past tense base of this complex form + -i or -u as explained earlier. e.g. *cey* 'do' + *viṭu* + *pp* > *ceyṭuvitṭu* ~ *ceyṭitṭu*. Past participles of progressive forms consist of the past tense base of a verb + *koṇṭu*.

The negative adverbial participle is formed by adding -aamal to the root of a verb. Strong verbs optionally add it to the infinitive. The final -a of the infinitive is then dropped. e.g. *paṭu* 'sing' *paṭaamal*; *paṭi* 'study' *paṭiyaamal* ~ *paṭikkaamal*. The final -l in -aamal may be optionally dropped in speech - but not when suffixes follow.

Relative participles

Positive relative participles make a two-way distinction in tense, between past and present, and are formed by adding -a to the past tense base or present tense base. e.g. *paṭi* 'study' *paṭicca*, *paṭikkiRa*; *poo* 'go' *poo na*, *poo Ra*.

Relative participles of aspectual forms are similarly formed. e.g. *cey* 'do' *ceyṭa* (past), *ceyyiRa* (present), *ceyṭirunṭa* (pluperfect), *ceyṭirukkiRa* (perfect), *ceyṭiṭṭa* (past perfective of certainty), *ceyṭiṭuRa* (present perfective), *ceyṭukoṇṭirunṭa* (past progressive), *ceyṭukoṇṭirukkiRa* (present progressive).

Negative relative participles do not distinguish tense. They are formed by adding -aa to the root of a verb. Strong verbs optionally add -aa to the infinitive. e.g. cey 'do' ceyyaa; paṭi 'study' paṭiyaa ~ paṭikkaa.

Nominalised forms

Nominalised forms consist of the tense base form + the nominalising suffix -au. They usually occur in the past or present tense: e.g. collu 'say' connau, collu-Rau; poo 'go' poonau, pooRau.

There is, however, one construction where the nominalised form of poo 'go' occurs in the future form: ceyya + poo ceyyap poovau.

naan ceyyappoovau enna entu
oruvarukkum teriyaau

'No one knows what I am going to do'

Classification of verbs

There are a number of tense markers, particularly in the past tense. It will be rather difficult to predict fully (perhaps except in the future tense) which marker will occur with a given verb.

The infinitive form can be used to predict whether the future marker will be -pp- or -v-. If the infinitive ends in -kka, -pp- is substituted for -kka to form the future base. For other verbs, -v- is added to the root.

Different groups of verbs form their present tense in slightly different ways. Strong verbs form the present tense base by adding -iR to the infinitive. The final -a of the

infinitive will be dropped: paṭi 'study', infinitive paṭikka, present base paṭikkiR-. Weak verbs that end in -y too add -iR to the infinitive to form the present base: cey 'do', infinitive ceyya, present base ceyyiR-; caay 'lean', infinitive caya, present base cayiR-. Note that the final -a of the infinitive is dropped. Weak verbs like aḷu 'cry', uḷu 'plough', aRu 'be ruined' add -kiR to the root to form the present base: aḷukiR-. Other weak verbs add -R to the root to form the present base: poo 'go' pooR-, koṇṭaa 'bring' koṇṭaaR-, naṭu 'plant' naṭuR-.

For strong verbs a past tense marker is substituted for the -kka of the infinitive.

Strong verbs have past tense in either -tt- (~ -cc-), -nt-, -tt- or -nt-. The choice between -tt- or -cc- is phonologically conditioned: root-final front vowel or -y requires -cc-, nonfront (other than -a) requires -tt-: vaaci 'read', infinitive vaacikka, past base vaacicc-; kaṭay 'converse', infinitive kaṭaykka, past base kaṭaycc-; uṭu 'dress', infinitive uṭukka, past base uṭutt-. Strong verbs ending in -a and the verb iru 'be' have the past marker -nt-: naṭa 'walk', infinitive naṭakka, past base naṭant-.

There are relatively few strong verbs with roots ending in consonants, and the changes that take place when the past tense markers are added are very complicated.

root	infinitive	past base
ke <u>ḷ</u> 'ask'	ke <u>ḷ</u> ka	ke <u>ṭ</u> <u>t</u> -
ni <u>ḷ</u> 'stand'	ni <u>ḷ</u> ka	ni <u>n</u> <u>t</u> -
vi <u>ḷ</u> 'sell'	vi <u>ḷ</u> ka	vi <u>t</u> <u>t</u> -
pa <u>a</u> r 'see'	pa <u>a</u> ka	pa <u>a</u> <u>t</u> <u>t</u> -

Tense bases of strong verbs are given below in the following order - singular imperative, past base, present base, future base, gloss:

kuṭu	kuṭutt-	kuṭukkiR-	kuṭupp-	'give'
piṭi	piṭicc-	piṭikkiR-	piṭipp-	'grasp'
naṭa	naṭant-	naṭakkiR-	naṭapp-	'walk'
keel	keetṭ-	keekkiR-	keapp-	'ask'
nil	nint-	nikkiR-	nipp-	'stand'

A major division within the set of weak verbs is between those having -in- (~ -n) for past and others. One can partially predict which marker a verb will take. Exceptions may have to be given.

Among others, the following types of weak verbs take -in-: (a) verbs ending in two consonants + u, or a double consonant + u (except collu 'say'): kaattū 'show', ināṅku 'agree', (b) verbs ending in a consonant + u preceded by a long vowel (pootu 'drop' is an exception): teetu 'search', paatu 'sing', (c) verbs of three short syllables ending in -u: kaḷuvu 'wash', eḷuṭu 'write'.

The verbs collu 'say' and poo 'go' are also members of this category, but both have -n- for past: conn-, poon-.

-in- is the most common past tense marker for weak verbs.

Other weak verbs form their past tense base with -t-, -nt-, -nt- or -ñc-.

-t- is taken only by a few (about ten) verbs: cey 'do', koy 'pluck', aḷu 'cry'

-t- is taken by about fifteen weak verbs. These verbs have -ttu finally preceded by a short vowel: caappiṭu 'eat' caappitt-; viṭu 'leave' viṭt-. The verb pootu is an exception that takes -t- (and not -in-) to form the past base. The final -u of the verb is dropped when past marker is added.

About twenty verbs ending in -r- and the verbs viḷu 'fall', vaaḷ 'live', taa 'give', vaa 'come' and konṭaa 'bring' take -nt- to form the past base: ceer 'join' ceent-; taa 'give' tant-. Final consonant of the root is dropped when -nt- is added. (The language does not usually allow a sequence of three consonants in colloquial speech).

A set of about twenty weak verbs take -nt- to form their past base. Most of them end in -l. A couple of verbs end in -l. One verb ends in -n and two in -n: aaḷ 'rule' aant-; piraaḷ 'turn' pirant-; vel 'win' vent-; tin 'eat' tint-.

Weak verbs ending in a front vowel have -ñc- for past tense. Of the weak verbs ending in -y, some may take -ñc- (a few others take -t-) for past: aRi 'know' aRiñc-; nanay 'wet' nanañc-. The verb (maḷay) pey 'rain' may take either -t- or -ñc- for past.

Verbs made causative by the addition of -vi or -ppi are strong verbs, and they form the past base by adding -cc-: cey 'do', ceyvi 'cause to do', ceyvicc-; naṭi 'act', naṭippi 'cause to act', naṭippicc-.

Imperative

Positive imperative

Imperative forms occur in singular and plural. There are two types of singular forms: one is nonpolite, the use of which indicates the subordinate position of the addressee, or speaker's familiarity with the addressee, and the other is polite form, the use of which indicates some degree of respect to the addressee. The plural form too can be used in the singular to indicate politeness and greater degree of respect to the addressee. These verb forms correspond to the three second person pronouns, namely, *nii* singular nonpolite, *niir* singular polite and intermediate respect form and *niin̄kaḷ* plural or singular polite and respect (greater degree) form.

Verb root is used as the singular nonpolite form. *-um* is added to the root to form the singular polite form. And the plural imperative is formed by adding the suffix *-n̄koo* to verb roots ending in a vowel other than *-i* and *-a*, and by adding *-uñkoo* to roots ending in consonants and the vowels *-i* and *-a*.

<i>nonpol. sing.</i>	<i>pol. sing.</i>	<i>plural</i>
<i>paṭi</i>	<i>paṭiyum</i>	<i>paṭiyuñkoo</i> 'study'
<i>cey</i>	<i>ceyyum</i>	<i>ceyyuñkoo</i> 'do'
<i>eṭu</i>	<i>eṭum</i>	<i>eṭuñkoo</i> 'take'

The verbs *vaa* 'come', *konṭaa* 'bring' and *tāa* 'give' change their root form to take *-um*: *vaarum*, *konṭaarum*, *tāarum*. The verb *poo* 'go' takes *-m* instead of *-um* to form the singular polite: *poom*. Note that certain morpho-phonemic changes take place when suffixes are added to some types of roots. For instance, when *-uñkoo* is added to a monosyllabic verb ending in a consonant, that consonant doubles if the preceding vowel is short.

The second person plural imperatives of *vaa* 'come' and *tāa* 'give' have the alternates *vaaruñkoo* and *tāaruñkoo* respectively. The second person plural form in *-(u)ñkoo* has an alternate form in *-(u)ñkaḷ* which is less frequent: *colluñkoo* 'say' *colluñkaḷ*. The plural imperatives *tāa* *va* *konṭaa* have *tāaruñkaḷ*, *vaaruñkaḷ* and *konṭaarun̄kaḷ* as alternate forms.

In Jaffna Tamil *-en* is added to an imperative form to express some sort of request: *vaa* 'come' + *en* *vaaven*, *cey* 'do' + *um* + *en* *ceyyumen*, *poo* 'go' + *ñkoo* + *en* *poon̄kooen*, *paar* 'look' + *uñkaḷ* + *en* *paaruñkaḷen*.

Negative imperative

All the positive imperative forms have parallel negative forms, and the negative is formed by adding *-aataṭay* to either the infinitive (with loss of final *-a*) or to the root. The verbs *vaa* 'come', *tāa* 'give', *konṭaa* 'bring' and *poo* 'go' add *-aataṭay* to the infinitive only.

<i>nonpol. sing.</i>	<i>pol. sing.</i>	<i>plural</i> (and <i>pol. sing.</i>)
<i>paṭikkaataṭay</i>	<i>paṭikkaa-tayum</i>	<i>paṭikkaa-tayun̄koo</i>
		<i>paṭikkaa-tayun̄kaḷ</i>
		<i>paṭikkaa-tiinkaḷ</i>
		'don't read'

<i>nonpol. sing.</i>	<i>pol. sing.</i>	<i>plural</i> (and <i>pol. sing.</i>)
paakkaatay	paakkaa- tayum	paakkaa- tayunkoo paakkaa- tayunkal paakkaa- tiinkal 'don't look'
ceyyaatay	ceyyaa- tayum	ceyyaa- tayunkoo ceyyaa- tayunkal ceyyaatiiinkal 'don't do'
eṭaatay	eṭaatayum	eṭaatayunkoo eṭaatayunkal eṭaatiiinkal 'don't take'

In Jaffna Tamil - en 'why didn't you' may be added to the negative imperative to give the sense that the speaker is asking the hearer why he did not do something that the speaker feels he should have done. It also implies that he had the opportunity to do so.

paṭiyaaatayen 'Why didn't you study?'
 paṭiyaaatayunkalen (with the implication that the action could have been done, that is, the hearer could have studied)

Defective verbs

A certain number of verbs in Tamil lack many of the forms that the majority of verbs have. They are defective verbs. Of them the more important ones in common use are :

<i>positive</i>	<i>negative</i>
veeṇum 'want'	veeṇṭaam
muṭiyum 'possible'	muṭiyaa(tu)
eelum 'possible'	eelaa(tu)
kuuṭum 'possible'	kuuṭaa(tu)
ṭeriyum 'know'	ṭeriyaa(tu)
piṭikkum 'like'	piṭikkaa(tu)
	piṭiyaa(tu)
kiṭaykkum 'be available'	kiṭaykkaa(tu)
	kiṭayaa(tu)
	paṭaa(tu)

Forms associated with these defective verbs are as follows :

veeṇum	veeṇṭiya (past verbal adjective)
	veeṇṭa (infinitive)
	veeṇṭiyatu (positive nominalised form)
	veeṇṭiyiru-
	veeṇṭivaa-
	(can occur in any tense, but only as third person neuter singular)
veeṇṭaam	veeṇṭaata (negative verbal adjective)

veeṇṭaatatu
(negative nominalised form)

muṭiyum muṭiñca
muṭiyutu (past verbal adjective)
(present finite) muṭiyiRa
 (present verbal adjective)

muṭiñcutu muṭiya
(past finite) (infinitive)
muṭiyeellay muṭiñcatu
(past, present (past nominalised form)
negative finite) muṭiyiRatu
 (present nominalised form)

muṭiyaa(tu) muṭiyaata
 (verbal adjective)
 muṭiyaatatu
 (negative nominalised form)

Infinitive of muṭi- occurs only in the emphatic construction muṭiyavee muṭiyaatu 'absolutely impossible'.

eelum ~ iyalum iyaṇṭa
iyaṇtu (past verbal adjective)
(past finite) iyaliRa
iyalutu (present verbal adjective)
(present finite) iyaṇtatu
 (past nominalised form)
iyaleellay (past, present neg. finite)
 iyaliRatu
 (present nominalised form)
 iyala ~ eela
 (infinitive)

eela ~ iyala occurs only in the emphatic eelavee eelaatu, iyalavee iyalaatu 'absolutely not possible'

eelaa(tu) ~ iyalaa(tu) eelaata ~ iyalaata
 (negative verbal adjective)
kuutum kuṭiya (verbal adjective)
 kuṭa (infinitive)
 kuṭiyatu
 (nominalised form)

kuṭa occurs only in the emphatic kuṭavee kuṭaatu 'absolutely mustn't'.

kuṭaa(tu) kuṭaata
 (verbal adjective)
 kuṭaatatu
 (nominalised form)

teriyum teriñcutu
(past finite) (past verbal adjective)
teriyutu teriyiRa
(present finite) (present verbal adjective)
teriyeellay teriya
(past, present negative finite) (infinitive)
 teriñcatu
 (past nominalised form)
 teriyiRatu
 (present nominalised form)

teriyaa(tu) teriyaata
 (verbal adjective)
 teriyaatatu
 (nominalised form)

piṭikkum piṭicca
piṭicutu (past verbal adjective)
(past finite) piṭicca
 (past verbal adjective)

piṭikkutu
(present finite)
piṭikkeellay
(past, present finite)

piṭikkaatu ~
piṭiyaaatu

kiṭaykkum
kiṭayccutu
(past finite)

kiṭaykkutu
(present finite)

kiṭaykkeellay
(past, present finite)

kiṭaykkaatu ~
kiṭayaaatu

paṭaatu

Infinitive paṭa occurs only with the emphatic ee:
(ceyya) paṭavee paṭaa(tu) 'absolutely not'.

piṭikkiRa
(present verbal adjective)

piṭikka
(infinitive)
piṭiccatu
(nominalised form)
piṭikkiRatu
(present nominalised form)

piṭikkaata ~
piṭiyaaata
(verbal adjective)
piṭikkaatatu ~
piṭiyaaatatu
(nominalised form)

kiṭaycca
(past verbal adjective)

kiṭaykkiRa
(present verbal adjective)

kiṭaykka
(infinitive)
kiṭayccatu
(past nominalised form)
kiṭaykkiRatu
(present nominalised form)

kiṭaykkaata ~
kiṭayaaata
(verbal adjective)

kiṭaykkaatatu ~
kiṭayaaatatu
(nominalised form)

paṭa (infinitive)

The verbal root en

The quotative particle entu is the past participle form of the verb en 'say'. It takes the past suffix -t- en + t ent -.

In colloquial speech, (and also in literary Tamil), en is one of the three verb forms, (others being kaan 'see', tin 'eat'), that take -p- to form the future tense base. All the three are weak verbs.

All three verbs have alternants with the suffix -v- in their future base: ennuv -, kaanv -, tinv -.

The past and present bases of en are ent- and enkiR- ~ ennuR- respectively. The conditional form is enta (1), and the concessive is entaalum.

Adjectival or nominalised form of this verb usually occurs only in the past: enta, entavan, entavar, entatu etc. Of these, the forms enta and entatu are used primarily for the embedding of factual statements.

The present verbal adjective or the present nominalised form of en seldom occurs in Jaffna Tamil speech. If some situation warrants the use of present forms, one may say entu colluRa (instead of enkiRa), entu colluRatu (instead of enkiRatu). Examples:

cantiran profecar aaki vittaar
'Chandran has become a professor'

cantiran profecar aaki vittaar
entatu unmay
'That Chandran has become a professor is true'

cantiran profecar aaki vittaar enta
unmay
'the fact that Chandran has become a professor'

cantiran profecar aaki vittaar
enta cantioocam

'the joy that Chandran has become a professor'

avar ippa mantiri entatay
maRantittēn

'I completely forgot that now he is a minister'

kunam entavaray unkalukkut
teriyumaa

'Do you know a person called Gunam?'

This quotative verb occurs as finite form, but usually only in the past tense. It can occur in all three persons.

naan vaaRen entēn

'I said that I would come'

avaa pooka maattēn endaa

'She said that she won't go'

niir vaaRen enṭiir

'You said that you would come'

Jaffna Tamil speakers usually use the present and future finite forms of *entū collu-* instead of the present and future finite forms of the verb *en-*.

naaṅkaḷ vaaRam enṭu colluRam

'We say that we are coming'

naaṅkaḷ vaaRam enṭu colluvam

'Let us say that we are coming'

Occasional action

The defective verb *unṭu* is added to present or past nominalised form of a verb to express that the action indicated by the nominalised form is done from time to time or occasionally.

avar kuṭikkiRaṭu unṭu

'He drinks (occasionally)'

avar kuṭiccatu unṭu

'He drank (occasionally)'

Try to do an action

The verb *paar* 'look' used with a dependent infinitive gives the sense 'try to'.

antaṭ puttakaṭṭay vaaṅkaṭ

paarunṅko

'Try to buy that book'

Questioning an action (with disgust)

Jaffna Tamil has a verb form made by adding the suffix *-aan* to the future tense base: *varuv + aan*, *cēyv + aan*, *pōov + aan*. (Note that the third person masculine nonhonorific singular suffix in Jaffna Tamil is *-an*).

The future base *+aan* is always used with a 'why' interrogative like *een* 'why', *ennaṭṭu* 'for what'. It indicates that the speaker is surprised that such a thing should happen, and wonders 'why it did, that is, why on earth'. This form does not change whatever the number, gender, and person of the subject may be:

niṅkaḷ een avarukku ellaattayam

colluvaan

'Why on earth should you tell him everything?'

avaa enakku een tavaal elutuvaan
'Why on earth should she write a letter to me?'

'While an action is done'

'While or when an action is done' is expressed by adding -eek_kay ~ -eek_killay to the infinitive. The final -a of the infinitive is dropped.

poo_keek_kay 'while going'
colleek_kay 'while saying'

alla, illay

Jaffna Tamil makes a distinction between the use of alla and illay.

illay is the negative of irukku:

ciini irukku 'There is sugar'

ciini illay 'There is no sugar'

Jaffna Tamil uses alla to emphasize that something is one thing, and not another.

atu ciini alla 'That is not sugar.'

avar taakkottar alla 'He is not a doctor'

illaattil is the conditional form of illay but only when illay is used in the sense of nonexisting, (that is, when it is the negative of irukku). Thus, it has the sense 'if not there'.

toocay illaattil vatay taankoo
'If there is no dosai, give me vadai'

allaattil is an alternant for allatu.

toocay allaattil vatay taankoo
'Give me dosai or vadai'

kutu 'give' taa 'give'

Jaffna Tamil makes a distinction between the use of kutu and taa.

taa is used when either the speaker or the hearer is the recipient. If a third person, that is neither speaker nor hearer is recipient, the verb kutu is used.

intap palatattay enakkut taankoo
'Give me this fruit'

intap palatattay unkalukkut
taralaam
'(I) can give you this fruit'

intap palatattay avarukkuk kutunkoo
'Give this fruit to him'

Frequent or continuous action

When a past participle is doubled it has the sense that the action is frequent or continuous.

niinkal pintip pinti vaariyal
'You are always coming late'

avarayp pooyp pooyp paarunkoo
'Go and see him frequently'

'As soon as'

To express the sense 'as soon as', -um is added to past verbal noun. It would imply that the action has just been completed when something else happened.

tampi viluntatum alutaar
'Younger brother cried as soon as he fell'

Bibliography

Besides the following, there are several publications in Tamil too. For information on them see Kirupananth, P., (1990).

The Author

Dr S. Suseendrarajah was educated at the University of Madras and at the Annamalai University, South India. He has taught Linguistics in the Annamalai University, and in the Universities of Colombo and Kelaniya, Sri Lanka. He is now the Professor of Linguistics and head of the Department of Linguistics and English in the University of Jaffna, Sri Lanka. He was a Commonwealth Academic Staff Fellow at the University of Edinburgh, U. K. in 1987 - 88. His publications in learned journals including Anthropological Linguistics, International Journal of Dravidian Linguistics (IJDL), and Indian Linguistics range over a wide field - applied Linguistics, Dialectology, Sociolinguistics, and Tamil language, both as the mother tongue and as a second language. He is also co-author of the book: An Introduction to Spoken Tamil (with James W. Gair and W. S. Karunatillake, 1978). Apart from Linguistics, his academic interest includes Tamil literature and Hindu religion as currently practised.

'No scholar is better equipped to provide the much needed description of Jaffna Tamil than Dr S. Suseendrarajah, whose intimate knowledge of the dialect is combined with a firm background in linguistics I am confident this first volume of his descriptive grammar dealing with the phonology and morphology, will be seen as a major contribution to the field of Tamil linguistics.'

*R. E. Asher
Professor of Linguistics
The University of Edinburgh*
