N. Theivendrajah
Zonal Director of Education,
Zonal Education Office,
Jaffna.

'Words Worth', the school magazine is a symbol of pride and a miniature representation of the school. Any individual going through the magazine would clearly gauge the principles, values and ideology of the institution. The benefits of a school magazine are immense. The magazine promotes creativity and nurtures the latent skills of young minds. Any article, poem or artwork published in the magazine serves as a source of encouragement for the budding author or artist.

Education is the most powerful weapon one can use to change the world. For over one hundred and twenty five years, Jaffna Hindu College has been a leader in delivering that potent weapon here in the Jaffna peninsula. The School has earned an enviable reputation as a center of academic excellence. This institution has set many adorable students on the path of professional success by implementing a rigorous academic scheme which subjects students to the highest national and international standards. You have the opportunities and continue to provide opportunities for young students of Jaffna to learn to live together and to achieve the understanding and unity by excelling in languages which is badly needed on this continent.

You have met the challenge with determination, strength, and total confidence!

Bravo! strike up the band! and honour 'Words Worth'!

The future is a rainbow of beautiful tomorrow with more Wordsworths with the collection of **Words Worth!**

Hold a dram in your heart!

Congratulations!

K.Subramaniam

Assistant Director of Education - English,
Zonal Education Office,
Jaffna.

Jaffna Hindu College is the most reputed educational institutions in the northern horizon of the country with a vision to excel in all spheres. Set up over one hundred twenty five years ago it has journeyed through all these years and gained the trust and appreciation of thousands of students, including myself and their parents alike. It is a proud moment and a pleasure to pen a few words to Jaffna Hindu's -my Alma Matter's English day magazine "Words Worth"

The philosophy of education has always been meeting the needs of the individual child. Children acquire skills and knowledge easily if we can make the surrounding stimulating and purposeful. In the 21st century, the Digital Revolution affects us all. Quite simply, it is changing everything: a brilliant barrage of information, entertainment, companionship and education is speedily available. In such a surrounding when work and effort is valued, the child's self-esteem is heightened, and from this results self-motivation. JHC tries to understand and work with each child, and the institution firmly believes that it is its responsibility to enable the child in the school's care to develop as a whole.

The school dreamt, planned, believed, worked, and today the school made it materialize. Congratulations for achieving this milestone. Bringing out the English Magazine 'Words Worth'.

Dear students, you are truly a living proof that beauty and brains can go together well. Congratulations for garlanding your English Day with the worthy release of Words Worth! I am really proud of it!

May, the Almighty continue to be your guide as you go through the next challenges in life. He has seen you through your challenges and has brought you to this point of completion.

Wish you success!

I. Thayanandarajah
Principal,
Jaffna Hindu College,
Jaffna.

English Language today has become very important to all. It is needed for higher studies and to know what happens day to day in all parts of the world .

In the modern and advanced world the books of Science, Computer Science, Medical and Space researches are all in English.

Therefore without the knowledge of English one can not refer and learn what he needs for his higher studies.

Today our English Union launches a magazine by the name "Words Worth". Though these two words belong to a poet as his name yet it tells us the importance and values of words of English for our life.

I am indeed very happy in giving this message to "Words Worth" and my best wishes for a great success of it.

Mrs. J. Kumarathas
Teacher Incharge,
English Union,
Jaffna Hindu College.

I take great pleasure and pride to pen this message to the magazine "Words Worth" published by the English union of the Jaffna Hindu College which has celebrated 125 years of excellence recently.

My greatest joy is this institution has made a tremendous and remarkable progress all through out the years in all activities such as educationally culturally, religiously etc.

This magazine is being published for the first time within a short period which consists of many useful and valuable reading materials through their pain taking labour to enhance the knowledge.

With great sense of satisfaction and pleasure. I extend my warmest wishes and appreciation for the hard work and untiring efforts of the English union and I wish every success towards their future efforts and endeavors.

S. Sivapriyan
Editor,
English Union,
Jaffna Hindu College.

From the Editor's pen,

Our school in 125 years history, I am proud to release this magazine "words worth".

A magazine is essential to support the development of school activities also this magazine guides students for their personality development and creativity.

Celebration like English Day provides a fantastic opportunity to celebrate formally the abundance of talent that exists within the College in a diverse range of areas. Today's release of 'Words Worth' in Jaffna Hindu College reflects on our past achievements, but looks to the future.

I thank the persons who involved with the release of this magazine and expect such magazine blossom in the future.

Protecting the Environment

In this running world
every thing turning up and down
The thing that lifts all
is our gift environment

It is the prize of nature
which decides our future
It is our duty
to protect its beauty

Human builds buildings
and makes fuel fillings
It burns in the air
and destructs nature's fair

Garbages from the factory, as well
dead bodies from the cemetery
dilute our favourable sand
and destroy our fruitful land.

Nuclear bomb testings, and
underwater voyage visitings
minimize our pure water
which turns very shorter

We have to join together
to build up, our environment brother
In is our only wealth
which will support for our body health

We have to live in this world
for long and long years old
before our life's retirement
we have to join for protecting the environment.

The miracles of nature

Sunrising in the east, setting in the west.
Flowers bloom in the morning dry in the evening.
man can make paper flowers which will have no smell.
Any thing beyond control of man is miracles.

Most of us know there a village known as.
"Maan Kupaan" in kayts you found heap of sands like mountain
People remove sand always but does it seen to be decreasing.
No one so far tried to find when it began and how it has happened.

Not only sand several wealth like Gold,
Petroleum, Gems, Coal
So it is a miracle of nature.
We don't know the route cause of it.

Man discovered, found out and enjoyed them.
No one is the owner of those things.
So that must be a miracle of nature.
Man cannot make any of it.

Man spends so much money for A/C rooms.
For his convenience and happiness.
If you sit under a
banyan tree you will enjoy better than A/C rooms.

You don't know who made them and
how they function
So they must be
"miracles of nature"....

AN EYE FOR AN EYE
MAKES THE WHOLE WORLD
BLIND

MAHATMA GANDHI

Many of life's failures
are people who did not
realize how close they
were to success when
they gave up.

- Thomas A. Edison

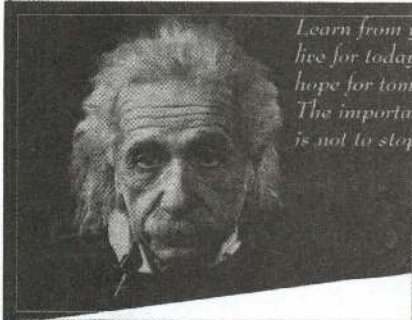

BE STRONG
WHEN YOU ARE WEAK,
BRAVE
WHEN YOU ARE SCARED,
AND HUMBLE
WHEN YOU ARE
VICTORIOUS

EVERYBODY HAS
PROBLEMS.
EVERYBODY HAS
BAD TIMES.
DO WE SACRIFICE ALL THE
GOOD TIMES BECAUSE OF
THEM?

*Learn from yesterday,
live for today,
hope for tomorrow.
The important thing
is not to stop questioning.*

ALBERT EINSTEIN

Give me six hours
to chop down a
tree and I will
spend the first
four sharpening
the axe.

Abraham Lincoln

"Great minds
discuss ideas;
average minds
discuss events;
small minds
discuss people."

- Eleanor Roosevelt

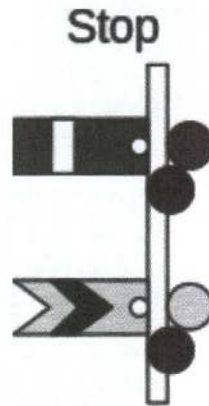

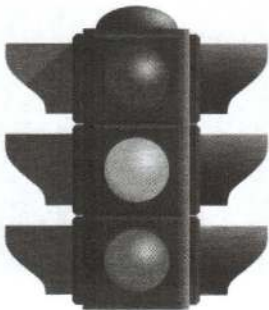

Signals

As the round fire glowed on
I stopped my move on
My mind planned for a long journey
For few seconds, without money

A green world which I have never seen
That's a day there I had been
I felt little better in my mood
Mind was relaxed by dense wood

A yellow beam passed through my eye
Reflecting from glancing river near by
Enchant water fall made many tones
My sleep splashed out by vehicle horns

A green stimuli made me to accelerate
To escape from the pure coverage
I back from my apparent reality
As I know, I'm back to impurity

The Art

Art is found in all
In playing, In teaching even In cooking
Every man can make his life
As an art....

Art is an essential factor to
Revolution of race.....
Our ancient kings made their
Statues on rock....

Our ancestors, of art.....
They spent their wealth for art.....
Art is attractive now a days
For all of us in the world.

A good teacher must have
The art of teaching.....
Art is not only a hobby
It is a good source of in come too.....

In every aspect of life
art is essential
Any one can sing but a person who
Knows art of singing will do better.

In every field of the world
Art essential. In pottery, in architecture
So not only yesterday and today but tomorrow also
Art will be useful to all.

STAMPEDE

In a field of green far and wide
A huntsman and his wife were on a horse ride
Not far away with their fearful horns
A herd of cows chew in the lawns
"Snake! snake! " suddenly cried the wife
"Snake! snake! run for your life".
With a hiss it went to the cattle.
A bite, a hiss and a terrible rattle.
Poor old snake with eyes of jade.
That was the last sound it ever made.
The cattle were coming with terrible haste.
The hunter had to move or he'd be chased.
He took out his gun, glared at the sun.
And pulled the lever. Boom! went the trigger.
It shot the bull on its head.
And it fell to the ground completely dead.
All the cattle ran away in fear.
And the huntsman's wife was full of tears.
" All the creatures god made " said she,....
" Let them all live equal as we"

Mother & Child

The first relationship always
Starts with mother
After that the father
She shares her life with child.

Mother is a god,
We are the bud care inside it.
For the birth of child,
She shares her food, blood & her life.

After birth, mother takes care of child.
Like a soft flower.
She changes her life as meaning less.
And helps to the child for meaningful life.

She bears the child in hand,
And throws away her pain & sad.
Mother is the person who shows
True caring & sharing with us.

In the speed world all goes fast,
But the mother goes slow.
Because she is cared the child
To build up strong life for the child.

She shows us true love
And protects us as glove.

If I were a Robot

Hello! I'm Yuthisthiran , I am a robot in the city of robots. I was born there by the hard work of scientists in the human city.

They made me by using wires, and my outer body is made of stainless steel.

I can do many works such as cleaning, talking, playing, and many others which can't be done by humans. In the working time we need to go to the human city to help them. And I'm very happy to do my work in a school as a security in the school entrance. I go there at 7.00a.m and then I return to my city at 4.00p.m. Some children ask me "how can you do all the activities that the human can do?", and I'll say "the wires in my body lead me to do these work" and sometimes I'll need to be a teacher too. I teach them many new things.

After finishing my work, I come back to my city and I have a rest after drinking some droplets of oil. And then my friends and I play in the playground of robots. We play many different games.

Some times I need to change the battery If I feel weak. at that time I can buy battery in the battery stall and then I put it to my body. And then I feel comfortable.

But some times I think If I would be a human I am not being controlled by wires and I do not need to change the batteries or I donot need to put batteries to my body.

But I'm also happy to be a robot in the city of robots by living with other robots.

English Riddles

- 1) What starts with a "P" and ends with an "E" and has thousands of letters?
- 2) What has to be broken before you can use it?
- 3) What begins with "T", ends with "T" and has "T" in it?
- 4) How many letters are in the English Alphabet?
- 5) What's Full of holes but still holds Water?
- 6) Why is an island like the letter "T"?
- 7) What is faster, hot or cold? why?
- 8) What gets wet when drying?
- 9) What is so Fragile, even saying its name can break it?
- 10) What comes once in minutes, Twice in a moment, but never in a thousand days?
- 11) What can you hold without ever touching or using your hand?
- 12) In a circular Shaped home, one day a costly bracelet had been stolen. In that time there were 3 Workers only. When the owner enquired them, They said like this:-
Ruwan:- I was sweeping the corners of the house.
Ravi:- I was watching the sky.
Seetha:- I was cleaning the cobwebs.
Find the thief.
- 13) What is the similarity between God and lady's heart?
- 14) Ravi's mother has 4 Children. First one named January, Second one named February, Third one named March. So what could be the Fourth one's name?

Answers

1. The "Post office"
2. An Egg
3. Tea pot
4. 15
5. A sponge
6. because both of them are lying middle of the water.
7. hot's Faster, because you can catch a cold.
8. A towel
9. Silence
10. The Letter "M"
11. Your breath.
12. Ruwan, because a circular shaped house has no corners.
13. Both of them confuse us whether they're true or not.
14. Ravi

A. Abbinanthan
Grade - 10^f

"All the birds find shelter during rain, But eagles fly over the clouds to avoid rain. Problems are common, but attitudes make it different" - Abdul Kalam

"When you stand to judge the people You fail to love them" - Mother Theresa

Self restraint

In our day to day life, we have to meet persons with various personalities So we should be as a self restrained.

" To handle your self, use
your head
To handle others, use
your heart"

- Eleanor Roosevelt.

So, We have had an opportunity to face others polite.

"You have power over
your mind not outside events
Realize this, and you will find strength"

- Marcus Aurelius

"The best fighter is ne'er angry"

- Luo Tzu

The above quotes tells the nature of a man with self - control. Whatever, William Blake says

"Those who restrain desire, do so. Because there is weak enough to
be restrained"

" The enemy within the gates, it is with our own Folly, our own
luxury, our own criminality that we have to contend"

- Marcus Thullius Cicero

The saint Mahavira says,

" Eating consititutes the greatest obstacle to self - control, it gives rise
to indolence."

So not being able to govern events. Try to control yourself.

J. Kirushikan

Teachers are the back bone of a Society.

As how a backbone is fundamental for the strength of a human body, a loftiest and aristocratic vocation plays an animate role in our sect. That profession is none other than the teaching job.

Teachers, the keys that open the latch of the doorway to a respectful alliance of good citizens, a suitable guide to the students, persons full of dedication and sacrifice are instrumental in building a lot of great individuals. They have been bestowing the students what they have studied, what they have experienced and what they have understood of the world. Teachers are the holder of a different, wonderful artistic sense which carves us like a sculptor making a sculpture from a useless stone.

Teachers take a lot of perseverance not only to make an educated citizen but also to mould personal traits and characteristics. That means Teachers are the ones who improve our personality. After the care of our parents, we depend on teachers. They influence us next to parents. They makes us understand the inter relationships in the environment.

Because of their dedicated service, teachers are kept in a high esteem in every body's heart. One can forget his first friend, first love but he/she can never forget his first teacher. This selfless service cannot be described in words. As a token of love we, the students celebrate "Teachers day" on October 6. We should respect them always so let us make a promise to obey them every day. Shall we?

Why English is important in one's life?

Life long learning is the concept that is never too soon or too late for learning. It is attitudinized that one should be opened to the new ideas, decisions, skills or behaviors.

As we all know that English is an international language. It is necessary for our life long learning. English is very important for us to live in the world. When we are young we speak only in our mother tongue. It is only when we go to school we learn English, but at homes when the parents speak English, then their children are able to speak English.

English is necessary for many reasons. Most of the science books are in English and only if we know English we can refer many books and good knowledge of the subject we study. So it is very helpful to our higher studies. English is an international language and many of the science and literature books of other languages are translated into English. If we know English, we can learn about the different cultures and it will improve our general knowledge. When we graduate, we can get a good job and this will help us to have a bright future.

English is also an important key to success of business. In business we have to contact with people from other countries. If we learn English only we can do our business successfully. We can chat with them about our products and transport. English also helps us to make new friends from abroad. We can contact with them in English. We will be able to gather more knowledge about culture, history, education, mode of living and important festivals with our pen friends. So we can share our ideas if we know English.

Many tourists come to our country from foreign countries. Though they have their own language, they know English therefore we can speak with them in English. Tourism is a good foreign exchange earner which improves the economy on, especially the financial sector becomes better.

In internet all the information are in English. Besides if you want to learn information technology the knowledge of English is very essential. Therefore, it is obvious that if we want to progress in our life, we must have a sound knowledge of English. So that it will help us to achieve our goals. Thus it is understood that English is very essential to our life.

R.Paviram
Grade 10^F

The aim of Education

The main aim of education is the all round development of students. If our purpose is to develop student into a full, whole and integrated person, the objective is to be achieved through education. Education and training are very comprehensive. Education helps us in achieving and developing skills, ability insights and scientific temper. Besides literary and aesthetic appeal of education, there are utilitarian aspects as well and they are equally important. Education aims at developing and bringing out the best of a student's inner personality, but the same time it does not leave out the material aspects. Education also means that a student is made capable to stand on his own feet, to earn his bread and butter. An educated person is supposed to face the challenge of life brave and successful in the fields of money, material and social unit.

The purpose of education is to strike a proper balance between inner and outer emotional and practical aspects of one's personality and life. If it is not done, then it would prove lopsided education resulting in an imbalanced development of personalities. All round development and enfolding of innate qualities means the growth and development of mind, spirit and body. All these three are internal and interdependent aspects of man's personality. It only means that there should be intergrated development and none of these aspects should be neglected. Man is both emotional and rational being and both of these should properly developed so as to form parts of an intergrated and organic whole. The development of one at the expense of other would result in disaster.

*Love is the thing which takes least
time and makes more trouble - unknown*

The monkey and it's desire.

Once upon a time a monkey lived in a tall tree near the big pond. On the other side of that pond there was a big banana farm with much banana trees. Monkey was not fulfilled about the food that got from it's place. It wanted to go to other side of the pond. But, monkey didn't know the route to go for the big farm. There was one way, that was it should cross the big pond. After few days monkey got a tortoise as its friend. They both developed good relationship among them. One day monkey asked a favour for tortoise. That is the monkey wanted to go to other side and asked the help to go other side from tortoise. Due to the good relationship among them, the tortoise quickly accepted its favour.

Tortoise planned to land the monkey to the other side. Monkey accepted the plan of the tortoise. Monkey stood on the shell of the tortoise and landed on the other side. The monkey without saying "Thank you" to the tortoise, left the tortoise lonely and ran away from that place. Tortoise was shamed because, of the monkey's behavior and it too left the place.

Death

In this world Death is common to all
No one is aware of death day
So far no scientists could say
The date of Death.....

No creatures could be
Escaped from Death.....
Departure of soul is
Death....

Some religions say
Death is not an end for life.....
They believe in rebirth
They are always ready for death.....

Atrocities will not happen
'when considering Death
It is the end of breath
All have Fear for Death.....

Every things has postponed
Except Death.....
No One will accompanied with you.
When you are in Death.....

It occurs at any time.
Any where, any form, any age etc.
Our journey after death
Nothing come with us
We will go with empty hands.

We are dying from overthinking. We
are slowly killing ourselves by
thinking about everything. Think.
Think. Think. You can never trust
the human mind anyway. It's a death
trap. - Anthony Hopkins

WATER

Water is the god's gift. Water is one of the basic needs. It is the most essential commodity for all living things. There is water in every part of this world. Now a days water resources are in danger. We can store water in tanks, drums, cans, buckets, and bottles. We can use water for drinking, bathing, cooking, irrigation purpose and to fertile the soil. We can do fishing too. people are wasting the water. We can stop wasting of water in many way. When we see water running from a tap we must close the tap tightly, by doing we can save the water.

Water is useful for humans, animals and even plants too. We need water for transportation. Water is a precious thing. We must not waste the water at anytime. Without water no life can exist. Fresh and pure water is very essential for survival and there is no substitute for it. Unlike energy, which has many alternative forms there are no alternative ones to water. Most of the farmers need water. They depend on monsoonal rains for farming. During the dry seasons they water the crops, mostly vegetables on their farms from the wells. Human body has 75% of water. Water is the special gift of God.

Now a days people in Chunnakam are suffering without pure water from well. The Water pollution in Chunnakam is because of the adding of oil to the underground water. This was leaked by a Northern power company. People can live without current but they can't live without water. It can spread to all parts of Jaffna district too. The leakage causes many diseases too. The engineer of Northern power company can make a another way to remove oil. The mistake of the engineer affected the area and will affect the whole Jaffna too. Under these circumstances if there is danger to the existing water resources in the area, it is a serious problem. Government is responsible for ensuring that the water is safe and available to the people in sufficient quantities. So we want to protect the water reservoirs carefully and handover it to the next generation.

Globalization

Globalization is the fact that different cultures and economic systems around the world are becoming connected and similar to each other because of the influence of large multinational companies and of improved communication. Now all of us heard about the word "global village" with the concept of globalization. Global village is the whole world looked or as a single community that is connected by electronic information systems. Globalization brings the whole world to our door step.

Globalization is a historical process. The start of globalization could be dated back to the 5th and 6th centuries.

"Globalization is a fact that keeps on repeating itself"-Arnold Toniby.

Communication, environment, technology, making relationships, almost everything come under the globalization. Globalization connects various kinds of global relation such as sharing ideas, opinions, and cultures. The most obvious is the use of "things", clothes, furniture, crockery, cutlery and vehicles etc. There fore the world has become a global village.

At present greater attention is drawn towards globalization. The development of the Internet and other communication technologies have played major role in creating a great interest in globalization. Through contacts made across the world, countries make these contacts through satellites. A satellite is an electronic device that is sent into space. It moves around the earth or another planet. The radio or television will receive messages through satellites. Things happening all around the world or the globe are known through satellites.

Some People see globalization as a positive factor. They say it links cultures around the world, It promotes unity and understanding among the people of different culture following societies. Others have a negative attitude towards globalization. They believe that stronger nations impose their cultures on weaker societies, and some time that will lead to a cultural deterioration in our mother country Sri Lanka. People believe that stronger nations impose economic sanctions to the weaker nations when all of them are intermingled through globalization. There are also some people who have mixed feelings about globalization.

The developing countries tend to fear globalization seeing it as westernization. But globalization is not only from the West to East. But also from the East to West. There are two views on the future of globalization. Will the 21th century continue with the high rate of globalization or will it slow down once it has reached the climax?

Even globalization happen continuously in the world, it is our duty and responsibility to follow the good side and don't get dragged to its bad side and gain maximum advatages from globalization to lead a happy and thoughtful life in this global village.

The living planet

Our planet earth is very special because it's the only planet in our solar system known to have life. It is exactly in the right distance from the sun to receive the right amount of light and heat. There is air to breath, and there is plenty of water. These are essential for plants and animal to live. There isn't any planet where we know for sure that there is life.

It is the only planet known till date where living being including intelligent creatures like man exists. The other planet where probability of life surmised is the mars.

The Earth is a minute dot in a vast universe of stars, galaxies and empty space satellites can circle right round it just a few hours.

The earth appears to be flat, but in reality it is almost spherical it is a little flattened at poles and pulges out a little at the equator. The Earth went through a period of catastrophic and intense formation during its earliest beginnings 4.6 billion years ago. The solar system was created from gas clouds and dust that remained from the sun's formation some 6-7 billion years ago.

There 365 days in an year because that's the amount of time it takes for the earth to orbit around the sun once. We have night and day because the earth is titled and it spins on it's axis is 24 hours making it one day.

There are other natural disasters like earthquakes, hurricanes, tornadoes, global warming, epidemic diseases, pollutions, over pollution, deforestation and nuclear weapons.

The Earth is a planet teeming with vitality and in home to pillion of plants and animals that share a common evolutionary track.

Unlike other planets, the earth has a strong magnetic field of its own, it is the densest planet. It shows evidences of erosion, that is change of landform by actions of air and water which is completely lacking in other planets.

One of the environmental problems that threatens the earth is the amount of pollutions peewing into the air, water and ground without any laws or regulations to prevent long term damage. Current laws regulate emissions from factories and vehicles to some extent and the use of chemical pesticides and fertilizers of hazardous materials like batteries and electronic.

Without the earth we have no where to live ,along with many other organisms if we don't save the earth now, may be our children or grand children might not be able to see it for long. Our atmosphere is weakening and we have to do something about it fast.

We could plant more trees to create more oxygen to keep bad airway from the atmosphere, or we could just stop cutting down the rain forest. We are living and we need the space but we aren't the only species on the earth. Saving the rain forest is not only good for us and the atmosphere but also good for the many different species that it homes.

We could try to get as many people as possible to switch on to energy saving methods to use less fossil fuel for energy and relying more on solar and wind energy. Fossil fuels are destroying our earth and we need to limit the use of it.

The recycling is a great and easy way to help our precious planet. Everyone can help, all have to follow three simple rules, reduce, reuse and recycle.

The Earth is resplendent with its beautiful scenery therivers, mountains, warm beaches, the green vegetation, animal, fishes birds etc. There cannot be any other planet in solar system as beautiful as earth the world is precious and we need to keep it that way.

Try And Try You Can Fly

Narrator : Once, there lived a poor girl called Leslie who was only eleven. She lost her parents, and her aunt & uncle. Mr & Mrs Chatwick punished and kept her as their servant. but she successfully passed all these messes and achieved her goal.

Mrs.Chatwick : Leslie! Leslie wake up! clean all the plates. Sweep the home get up you idiot (Mrs. Chatwick throws the broomstick over her)

Ginny : Leslie! where are my socks? Didn't you wash them!

Mr. Chatwick : Why didn't you wash all her stuffs?

Leslie : Uncle I thought those socks were Kevin's

Mr. Chatwick : Hurry up! It's already late! Go and get ready you nasty girl (Leslie got ready and both Ginny and Leslie got into the bus)

Narrator : Leslie went to school for few months. But Ginny was not happy with Leslie as all the teachers praised her. So she made a plan to stop Leslie going to school. When Leslie was out, she took Alex, a boys file and kept it on Leslie's bag. (In Class room)

Ginny : Hey! Alex on which topic are you going to submit the assessment?

Alex : About plants

Ginny: Oh! that's cool. Can I have a look at it?

Alex: Yeah! Sure!

Narrator: Alex opened his desk and searched for that file but it wasn't there, and he started crying.

Alex: Somebody has stolen my file. All my documents about the assessment are in it.

Teacher: Well, check everyone's bag and desk.

Narrator: While teacher was checking all the bags, Leslie, the poor girl didn't know what's going to happen. The teacher started checking Leslie's bag too.

Teacher: So You are the culprit who has stolen all the documents. Aren't you?

Leslie: Madam, I know nothing about this.

Teacher: I don't want any explanations!, You are dismissed! Get out of the class.

Narrator: From that day onwards Leslie didn't go to school. She stayed at Mr. Chatwicks house and did all the work. She composed many pieces of music. But never tried them. The summer holidays are over and now it's winter. Leslie started thinking

Leslie: I wonder I could be a bird, flying over the grasslands, trees, smelling of sweet flowers without any of these people-

uncle Chatwich or Aunt Rosy and Gunny around me.
How would it be!

I hate this life! I can't go on like this! I must do something
and get rid of this place.

Narrator : Then she took a paper and began to write a piece of music
called "Wallet". She wrote and wrote and finally she did it.
One day as usual she did all the work and went to work in a
hotel. She began to work in that hotel. One day a turn came
to Leslie's life. Mr.Sherolock who is the director of Walt
Disney movie productions came there.

Mr.Sherolock : Two portions of rice, and a portion of beef

Leslie : Yes Sir, and do you want any dessert

Mr. Sherolock : Mmmmm.. I will be so pleased If I could have a bowl of
soup too.

Leslie : Yeah sure!

Narrator : When Leslie went to work inside she forgot and left her
manuscript on the table where Mr. Sherolock was waiting.
Mr. sherolock was reading a book but then he took a notice
of the manuscript. He started turning the pages. He was
really shocked to see those wonderful pieces of music. At
last he saw the music of "Wallet" It was terrific. At the mean
time Leslie came with Mr. Sherolock's orders.

Leslie : Here's Your rice, beef and soup.

Mr. Sherolock : Thankyou very much! I'm very glad

Leslie : It's my pleasure

Mr. Sherolock : Well, I want to speak something with you.

Leslie : I'm very glad to speak with you.

Mr. Sherolock : Is this your manuscript?

Leslie : Oh! I have forgotten. That's mine. I wrote all those pieces of music but I had never tried them.

Mr. Sherelock : They are wonderful I have never seen a great composer like you before

Leslie : Oh! thank you.

Mr. Sherolock : If you don't mind, can I ask you some thing?

Leslie : Yeah!

Mr. Sherolock : Will you publish your music of "Wallet" in our Walt Disney production?

Leslie : What! I can't believe my ears!

Mr. Sherolock : I mean what I say

Narroter : From that day onwards she worked with Walt Disney movie producers. She composed lots and lots of pieces of music. She became rich. Ultimately she became a great composer. So that's the story of the brave girl Leslie. Try and try one day you can fly.

Positive Thinking

Positive thinking is a mental attitude that admits into mind thoughts, words and images that are conducive to growth, expansion and success. Positive thinking brings inner peace, success, improve relationships, gives better health, happiness and satisfaction. Mental moods of people are affected accordingly,

- Thinking about happiness
- Good health
- Success
- Helping

Effective positive thinking that brings result is much more than just repeating a few polite words or telling you that everything is going to be all right.

Few actions and tips that help to develop the power of positive thinking.

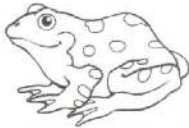

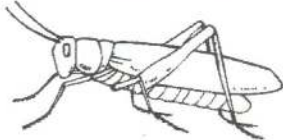

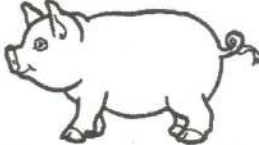

- Always use positive words in your dialogues or when talking with others.
- Allowing in to your awareness only feelings of happiness, strength and success.
- Read at least one page of inspiring book every day.
- Watch moves that make you feel happy.
- Minimize the time you listen to the news and read the papers.
- Associate yourself with people who think positively
- Always sit and walk with your back straight. This will strengthen your confidence and inner strength.
- Walk, swim or engage in some other physical activities. This helps to develop a more positive attitude.
- Smile a little more, as this helps to think positively.
