الله

PROPHET ISA (ALAI

Isa was the last prophet appointed by Allah for Bani Israil. They defied his teachings and denied his legitimacy. In collaboration with the Roman governor of Palestine, the Jews had him framed for treason, that was punishable by crucifixion. However Allah saved him from death by crucifixion. His teachings were adapted by other subjects of the Roman empire which laid the foundations of Christianity.

The Birth of Isa

Maryam, the mother of Isa was dedicated in the service of Bait-ul Muqqadas and used to live in a cubicle assigned to her for her residence. One day an angel of Allah appeared to her in her cubicle and told her that Allah had willed that she be the mother of a great prophet. Maryam was frightened at seeing the angel in front of her in the form of a young man, and more so on learning that she would be a mother without ever having been married. The angel told her not to be afraid and to trust in Allah. He is the Creator of all things, and has ways and means of creating any thing whenever He wills.

When Maryam found herself to be pregnant, she left her cubicle in the grand mosque and made her way into the desert. Isa was born in

the solitude of the desert. The new mother sat under a palm tree with the baby son, feeling distraught and dejected at her predicament. The angel appeared to her again and told her that she should not feel so low at her present condition, for Allah is the greatest Provider and Sustainer. He told her to shake the palm tree and enough dates would fall in her lap for her sustenance, and she could drink fresh water from a spring that came out by her side. The angel also told her, "When the people ask you about the baby, say nothing; point towards him and he will bear witness to the Will of Allah and he will talk on her behalf."

The Miraculous Speech by the Infant Isa

As Maryam returned to Bait-ul Muqqadas, the rabbi blocked her way saying that she had no room in the place of worship. When she turned around, a crowd had gathered around her. Curious and agitated, they wanted to know who was the father of the baby. She did as instructed by Allah, and pointed towards the infant. They all laughed at this and said how could a new born answer their questions.

However, Isa spoke up with the permission of Allah and said, "I am a servant of Allah.

He has appointed me as prophet amongst you and am the bearer of the Book (Injeel).

Allah has granted me bounties of benevolence and made me obedient to my mother. I will worship Allah and obey all His laws for as long as I live. " He became quiet after that. The people were dumb founded at this miracle and they dispersed. The stories of this supernatural event remained in circulation for a long time.

The controversies over the Virgin Birth of Isa

The Jews consider Isa to be an illegitimate child of Maryam. The Christians consider him the son of God. Allah says He is neither a husband nor a father. He is the Creator and Sustainer of all things. He settled the controversy over the birth of Isa in al Qur'an: " Verily, for Allah the circumstances over the birth of Isa are no different from those surrounding the origin of Adam. He created Adam from no parents at all, while Isa had a mother. He just has to will something to happen; and it materializes at once. He would raise the dead from their graves on the Day of Judgment by His Divine Will, for He is All Powerful and Magnificent. "

The Prophet hood of Isa and his Miracles

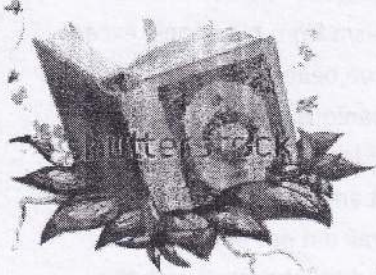

Isa was thirty years of age when he began to receive Divine Revelations and started to teach Banu Israil the commandments of Allah. He showed them great miracles that indicated the grandeur of Allah. He made birds from the mud and made them fly. He healed the lepers, he gave vision to the blind, he brought back life to the dead and fed thousands from a mere loaf of bread, all with the permission of Allah. He confirmed the truth of Torah and affirmed the ordinances of halal (permitted) and haram (prohibited) and revised certain canonical laws to suit the circumstances of that society. He called upon the rabbis of Bait-ul Muqqadas to

clear it from all trading activities and clean it up for the worship of Allah. He met with the stubborn antagonism from his people except for a handful of true believers. He had twelve disciples, or companions (also known as the twelve apostles of Jesus) who followed him wherever he went and assisted him in his teachings. Bani Israil did not approve the teachings of Isa and collaborated with the Roman governor of the land to get rid of him.

The Occultation of Isa

One of the companions of Isa betrayed him and handed him over to the government agents who were seeking to arrest Isa for treason. The Roman governor and Banu Israil believed that they had crucified Isa. Some of his followers thought that he was taken down from the cross before he actually died on the cross. The controversy still continues. Allah clarifies this in al Qur'an that it is a waste of time even to conjecture on the nature of Isa or what happened to him after his arrest by the Romans. He was neither crucified nor did he die on the cross. Allah withdrew him from amongst his blood thirsty enemies and raised him to the heaven.

The sense of the holy book

www.4mat.org.uk

- *Eat and drink, but waste not by extravagance [Surah al-A'raf; 7:31]*
- *And take a provision (with you) for the journey, but the best provision is al-taqwa (piety, righteousness) [Surah al-Baqarah; 2:197]*
- *And whosoever fears Allah and keeps his duty to Him, He will make a way for him to get out (from every difficulty) [Surah al-Talaq; 65:2]*
- *And whosoever puts his trust in Allah, then He will suffice him [surah al-Talaq; 65:3]*
- *He who obeys the Messenger has indeed obeyed Allah [Surah al-Nisa'; 4:80]*
- *By no means shall you attain al-birr (righteousness) until you spend (in Allah's cause) of that which you love [Surah al 'Imran; 3:92]*
- *Allah (Alone) is Sufficient for us, and He is the Best Disposer of Affairs (for us) [Surah al 'Imran; 3:171]*
- *And walk not on the earth with conceit and arrogance [Surah al-Isra'; 17:37]*
- *And turn not your face away from men with pride [Surah al-Luqman; 31:18]*
- *And be moderate (or show no arrogance) in your walking, and lower your voice [Surah al-Luqman; 31:19]*
- *And give not a thing in order to have more (or consider not your deeds of obedience to Allah as a favor to Allah) [Surah al-Muddaththir; 74:6]*
- *Watch your Thoughts, they become Words! Watch your Words, they become Actions! Watch your Actions, they become Habits! Watch your Habits, they become Character! Watch your CHARACTER! ..It becomes your DESTINY!!!*
- *And whenever you give your word, say the truth [Surah al-An'am; 6:152]*
- *And seek help in patience and prayer [Surah al-Baqarah; 2:45]*
- *And speak good to people [Surah al-Baqarah; 2:83]*
- *And fulfill the Covenant of Allah when you have covenanted [Surah al-Nahl; 16:91]*
- *Verily! Allah commands that you should render back the trusts to those to whom they are due [Surah al-Nisa'; 4:58]*
- *And let not your hand be tied (like a miser) to your neck, nor stretch it forth to its utmost reach (like a spendthrift) [Surah al-Isra'; 17:29]*

Hathees, the words of prophets

Parents

- **Looking at Parents**

The Messenger of Allah (peace be upon him and his family) said: "Every righteous child who casts a look of mercy and affection upon his parents shall be granted, for every look of his, rewards equivalent to that of an accepted Hajj." Those around the Prophet questioned: "O' Prophet of Allah! Even if he were to look at them a hundred times a day?" The Messenger of Allah (peace be upon him and his family) replied: "Indeed! Allah is the Greatest and Most Kind."

Biharul Anwar, Volume 74, Page 73

- **Kindness to Parents**

Imam as-Sadiq (peace be upon him) has said: "Goodness towards the parents is an indication of a person's excellent cognizance of Allah. This is because there is no worship that can take a person towards the happiness of Allah faster than exhibiting respect towards his Muslim parents for the sake of Allah."

Biharul Anwar, Volume 74, pg.77

- **Pleasing Parents**

The Messenger of Allah (peace be upon him and his family) said: "One who pleases his parents has verily pleased Allah, and one who has angered his parents has verily angered Allah."

- **Fragrance of Paradise**

The Messenger of Allah (peace be upon him and his family) has said: "Beware of become disowned by your parents, for verily the fragrance of paradise which can be smelt from a distance of a thousand years, shall never reach the nostrils of one who has been disowned by his parents and one who has severed the bonds of kinship (with his relatives)."

Biharul Anwar, Volume 74, Page 62

- **The Grave Sin**

Imam as-Sadiq (peace be upon him) has said: "A sin that darkens the skies is being disowned by one's parents."

Biharul Anwar, Volume 74, Page 74

- **Acts without Benefits**

The Messenger of Allah (peace be upon him and his family) has said: "One who has been disowned by his parents is told: 'Act as you please, for I shall not forgive you.' Whereas one who is good towards his parents is told, 'Act as you please. I will be forgiving towards you.'"

Biharul Anwar, Volume 74, Page 80

- **Forgiveness of Sins**

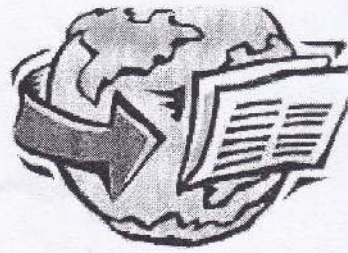

Imam Zainul `Abidin (peace be upon him) relates: "Once a person approached the Messenger of Allah (peace be upon him and his family) and said: 'O' Prophet of Allah! I have committed every known evil act. Is there a chance that I may be forgiven?' The Messenger of Allah asked him: 'Are any of your parents still alive?' The man replied: 'My father.' He said to him: 'Go and be good and kind to him.' When he left, the Messenger of Allah muttered: 'If only his mother had been alive.'"

Biharul Anwar, Volume 74, Page 82

- **Obedience Towards One's Parents**

The Messenger of Allah (peace be upon him and his family) said: "One, who follows the orders of Allah with regards to obeying parents, shall have two doors of Paradise opened up for him. And if there happens to be only one parent, one door of Paradise shall open up for him."

Sri Lanka ups protectionism in autarkist budget

Nov 09, 2012 - Sri Lanka has upped protectionist taxes in foods and building materials allowing more profits for producers allowing producers as citizens try to eat and build homes for themselves.

Raising import duties allows producers to engage in tax arbitrage, the act of collecting as profits the equivalent of amount of tax by turning out an item within a national border without actually engaging in competitively priced production.

A budget for 2013 said import taxes or cesses would be raised on dairy products, edible products of animal origin, fresh, preserved, dried vegetable and fruits, edible oils, margarine, sausages or preserved meat products, honey and jiggery, confectionary, bakery products, mineral water, vinegar and salt.

On September 18 Sri Lanka raised import cesses on potatoes were raised to 50 rupees a kilogram and to sprats (dried herring) to 75 rupees. Import cess taxes were also raised on steel, a vital material for building new homes by citizens.

Earlier in the year, Sri Lanka had raised taxes for ceramic articles and steel rods.

Sri Lanka has been on a path to autarky for several years with targets for 'self-sufficiency' and placing an emphasis on an ideology of 'saving foreign exchange'.

Raising taxes on steel in particular would increase the costs of home building. A day before the budget, science minister Tissa Vitharana said high taxes on foods seem to be contributing to persistent malnutrition among children. President Mahinda Rajapaksa said in his budget speech that he would give a free pair of shoes to school children in difficult areas as well as milk and cereal. He said he met many children with broken shoes. Shoes are highly protected with import duties.

Christmas celebrations in Sri Lanka.

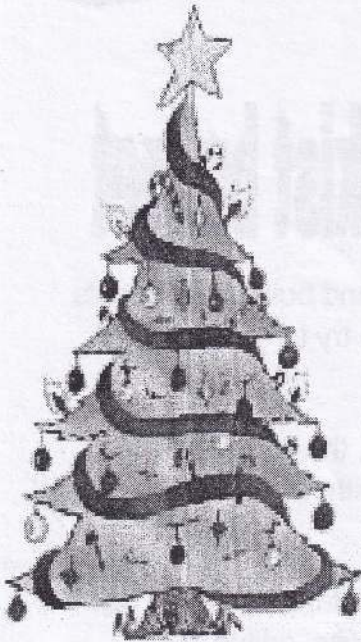

The Christian population in Sri Lanka is much less compared to Buddhist and Hindus. Christian make up only 7% of the total population, but preparation for this great day begin several weeks prior to the festival, and celebration with great enthusiasm in true Sri Lankan style.

The first sign of Christmas festival in Sri Lanka has an interesting history. When Sri Lanka was under European rules from the sixteenth century for twentieth century, that culture has been greatly influence by the culture of its European colonies.

Sound of fire crackers at dawn of 1st December and is the first sign of intimation that Christmas is round the corner .All most every home of Christian or Catholics wake up in first day and perform the first ritualistic task of merry making .By the time Christmas spirit can be seen everywhere .the hotels, shopping malls wayside boutiques are decorated by

Christmas trees bells angles & statues of Santa clauses lit up in most of the country sides. In December 25th the commemoration of the birth of Lord Jesus Christ .It's a public holiday on Christmas day Of Sri Lanka. The midnights of 24th December cathedrals, churches, and little chapels all over the country Christian attend Midnight Mass.

Sri Lankan peoples find Christmas as the perfect time to sharing kind, loving compassion hearts with others. Christians invite relatives, friends to their Christmas parties and share with them seasonal cakes, wines and other Christmas foods. That engages hearts of one and all. No one can feel that Christmas is a minority in the nation .Other Sri Lankan people treats the Christmas festival as their own festival

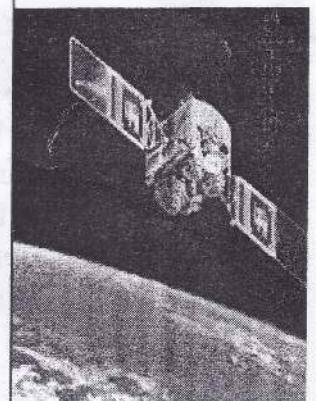

Sri Lanka Launches First Satellite into Orbit.....

Colombo, Nov 27 (Prensa Latina) Sri Lanka today completed the trio of South Asian nations with their own satellites when with the collaboration of China placed in geostationary orbit over the island its first artifact of that kind. At 36,000 kilometers above the Earth's surface, the device will start from June next year to provide data transmission services and communications, including broadband Internet, to the Middle East, Central and South Asia and Australia. The sophisticated device was propelled from the Satellite Launch Center of Xi Chang, in the Chinese province of Sichuan.

At a cost of approximately \$ 320 million dollars, the mission is financed by the Board of Investment of Sri Lanka and Supreme SAT private company, with state-owned China Great Wall Industry Corporation.

The multinational company in charge of the project is negotiating with the authorities in Afghanistan and Maldives to agree on terms for the eventual construction of satellites for these countries, from design to launch With this step, the Indian Ocean Island became the forty-fifth country with artifacts of that genre. In South Asia only India and Pakistan have satellites.

Whose is the sin?

Start of a problem

There were two neighbors' in a certain village. They were Martin and Scherbako. Martin was well off. He had three grown up sons, all able to work. The eldest had been married. Martin's daughter-in-law was quiet and hard-working. Martin's wife was still living. His father was an asthmatic old invalid who chose to lie down on the top of the warm brick-stove. Martin had three horses and a colt, a cow and a calf and fifteen sheep. He owned good fields as well. Nothing else was needed to make him happy.

Scherbako was a rich man. But his family was not proper for him. So, he had many problems.

For a long time there had been a big clash between Martin's family and Scherbako's family. The reason for the problem was Martin's mother. Long ago when Martin and Scherbako were small, they were playing in the terrace of Martin's house. That time Martin slipped and fell inside a

pond. But Martin's mother taught that it was Scherbako, who pushed her son inside the pond. So, she created a problem and this led to the fight between both the families. After this everything changed. Peace and friendship gave place to hatred and fight.

When Scherbako's father died and Martin's father became an asthma patient, their sons became the head of their family. From that day onwards quarrels and fights broke out every day between both the families.

It began like this:

A Quarrel for an Egg

Martin's daughter-in-law had a hen. It used to lay eggs in the cart shed and she used to collect the eggs from the shed. One day the hen flew across into the neighbor's yard and laid its egg there. In the evening when she went into the shed, there was no egg there. She searched for the egg here and there.

Her youngest brother-in-law Simon said that the hen has laid the egg in the neighbor's yard.

The daughter-in-law went to the neighbor's yard and began to search for the egg. Then Scherbako's mother asked her what she was looking for. The young woman told her about the egg. The old woman spoke impolitely. She said, "Our own hens lay eggs. We don't go looking for eggs in other people's yards!"

This insulting remark offended the daughter-in-law. She answered back in the same insulting way. The neighbor paid back with interest and the women began abusing each other. Martin's wife and Scherbako's wife came out of the house and joined in the quarrel.

Scherbako returned from the field just at that time and began to take his wife's side. When Martin heard Scherbako's voice, Martin and his son rushed out. Martin was a strong man. He began fighting Scherbako and pulled a handful of hair out of his beard. People gathered there to see the quarrel and fight. They separated the fighters with difficulty.

I Want Justice

Scherbako wrapped the hair, torn from his beard, in a paper and went to the District Court and complained.

Martin also gave a complaint against Scherbako. Martin said, "I never pulled his beard. He pulled it out himself. But his son has torn my shirt."

Martin's father advised his people not to quarrel and fight. He said, "If you nurse your anger it will be worse for you." But

the younger people would not listen to the old man.

Martin and Scherbako were tried by the Justice of the Peace and by the District Court. One day the coupling pin of Scherbako's card disappeared.

Scherbako's women folk accused Martin's son of having stolen it. And so they went to court about that too.

Not a day passed without a quarrel or a fight. Life became harder and harder for them. Their litigation multiplied. The judges themselves were tired of them. Scherbako got Martin fined or imprisoned. Then Martin did as much to Scherbako. This kind of fighting and litigation went on for six years.

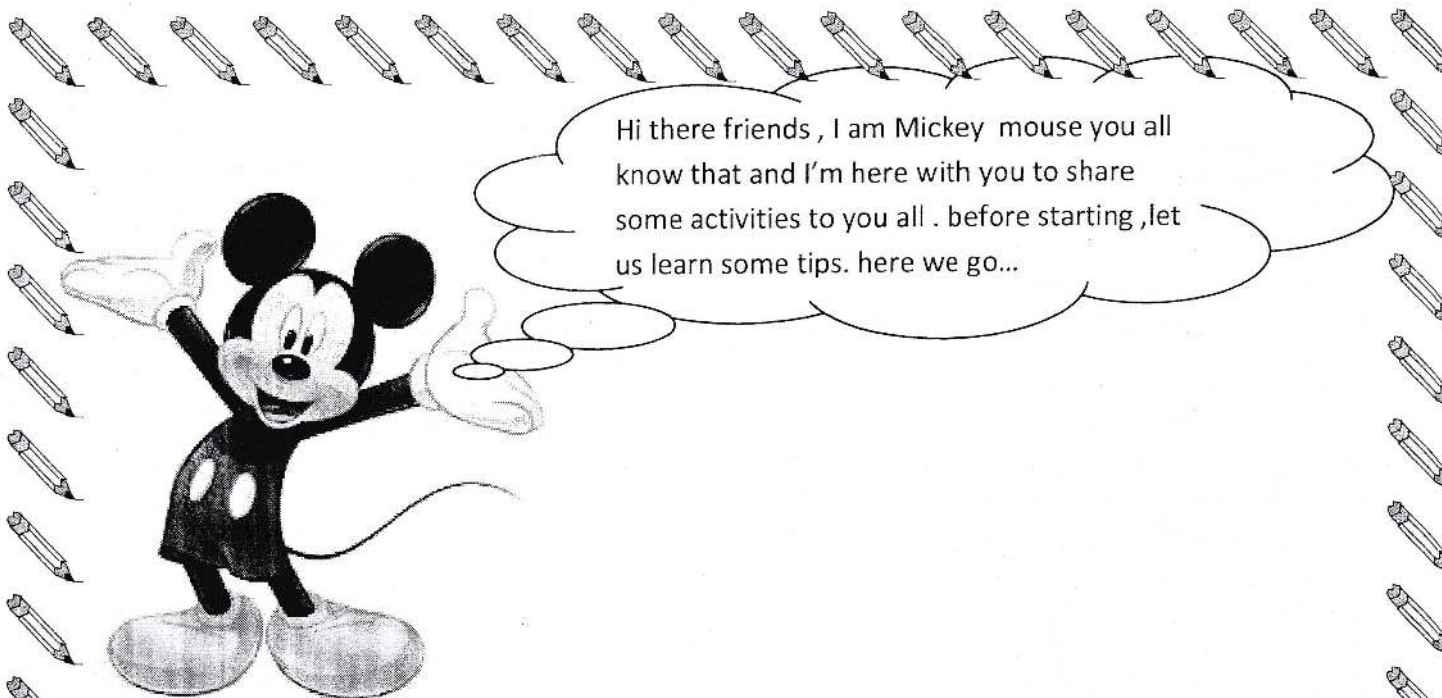

Martin realizes the mistake and a fresh quarrel arises.

Now Martin understood that what his old father said was true and his heart grew lighter. He had half a mind to make peace with Scherbako.

Just then the womenfolk came describing a fresh quarrel. They said that Scherbako was sending a petition to the Tsar himself about Martin. Martin's heart grew cold again and he gave up the idea of making peace with Scherbako.

Martin gave the cattle their food and let out the horses. Simon was to take them to pasture for the night. Simon was going out with the horses. Martin went down the steps and helped his boy to mount. Then Martin closed the gate and barred it. As he was coming in, he heard Scherbako's voice from beyond the fence, "what the devil is he good for? He's only fit to be killed."

Will be continued...

02. Put can or cant in the blanks

- We play because its raining.
- It's a fine day so we go out for a picnic.
- I love drawing but I draw.
- My dad plays with me when he is busy
- I read well
- I Drink all the water at a time.

Wow ! you did it well.
So I better hit the sack
now .lets meet next
time with more

Ettiquette all around

Assalamu allaikum friends, it's a great pleasure to meet you friends again. Now let's learn some etiquette of the country Mexico..

Mexico

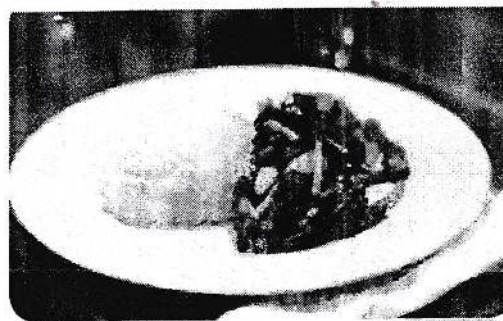

1. Gift Giving Etiquette

- . If invited to a Mexican's house, bring a gift such as flowers or sweets.
- . Gift wrapping does not follow any particular protocol.
- . Do not give marigolds as they symbolize death.
- . Do not give red flowers as they have a negative connotation.
- . White flowers are a good gift as they are considered uplifting.
- . Gifts are opened immediately.
- . If you receive a gift, open it and react enthusiastically.

2. Mexico dining etiquette

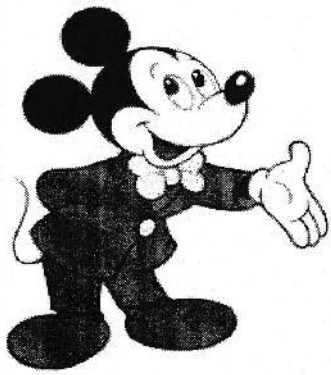

In Mexico, it is actually considered to be somewhat rude if you show up early for dinner, and even being on time is usually frowned upon. Instead, arriving thirty minutes late is considered to be the norm. The host may handle the introductions in smaller settings, or you may be expected to introduce yourself in larger groups. When invited to dinner, the host or hostess will let you know when it is time to sit at the table, and where you should sit. You should never begin to eat until the hostess does, and it is considered polite to leave a small amount of food on the plate at the end of the meal to show you had enough. Only men give toasts.

3. Etiquette When Meeting People

The use of a person's first name is not considered proper when first being introduced in Mexico, unless the person you are being introduced to insists upon it. When men first meet, handshakes are common. When two men know each other well, handshakes are generally dispensed with, replaced by back slapping and a hug. Women do not generally shake hands with each other, but instead give each other a pat on the right shoulder or forearm.

News papers in Sri lanka

The media plays a very important in the establishment of democracy in a state. It also provides the necessary knowledge to the citizens and there by, I believe that newspapers in Sri Lanka play an integral part in the development of our country.

There are few norms that a successful newspapers should adhere to. In my opinion, in order attraction the newspapers should be unbiased, truthful and should cater to all citizens.

Newspapers give an insight into many fields. Newspapers contain articles regarding local news, International news , Business news, Sports news and most important news of the world. I like to read articles regarding Sports, International affairs and politics around the world.

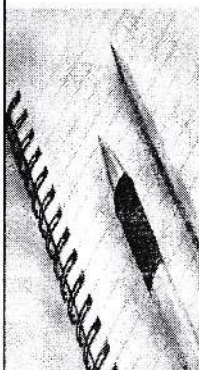

Even though I appreciate newspapers, one weakness I see, in Sri Lankan newspapers is that they are never unbiased. It is always seen that a certain authority always influence the media and I believe that it is the social responsibility of Sri Lankan newspapers to provide unbiased information to the public. Therefore, by considering all factors, I believe that it is highly important to develop the newspapers of Sri Lanka to a respectable standard.

HISTORY OF THE WORD ESSAY

The word essay has origins in the French word "exigere," which means to "to examine" or "to try." Michel Eyquem de Montaigne, a writer during the French Renaissance, was the first author to describe his work as an essay. Montaigne published a 107-page collection of short writings on specific topics, titled "Essais," in 1580. Seventeen years later, Francis Bacon published a series of essays in book form. Sir Thomas Browne, Jesuit Baltasar Gracián, Samuel Taylor Coleridge, Willa Cather, Virginia Woolf, James Baldwin and Charles du Bos are other famous essayist.

Value of water

Water, the precious compound for all the organism in this world where 1% of water is pure while the other are saline. Hence the water is less for human as well as animals we have to prevent the spoilage of water.

Such main wastage of water are:

- Taps are opened unnecessarily.
- Due to pollution of factory and soon this is discharge into water resources.

There are chances to live without water at all... So it is our responsibility to save water by :

- ❖ Open the taps only when necessary.
- ❖ Continue drinking filtered water is a good habit to protect us from diseases caused by polluted water.
- ❖ Polluted wastages from factory should be recycled and discharge out.

Teenage are mostly addict to internet than adults

The word internet are mostly used by adolescence at a high rate than the adults. It's all because of the interest of meeting new friends, sharing ideas, listening songs, uploading own photos and the main reason is chatting. Some of these websites are Facebook, twitter, Google plus and so on where teenagers are so fun on it. Some of the people go here to just get their relationship. By this, family or social problems may rise and get out of focus on their educations. So we say, keeping these habits are quietly good but not over because you know that the teenagers are the development stage, don't try to spoil that. All we got to save the studies and continue these stuff a little bit with one side of the brain.

Child Labour

Today, there are lakhs of children who works as wage-earners. They are deprived of childhood, love, nutrition and social association. Now a days child labour is a very serious problem. Extreme poverty, large families and ignorance of parents are the most causes of child labour. Children do not causes labour trouble and they are ready to accept lower wages. But sometimes, children are not paid for their labour and are kept as apprentices.

These children have no chances to attend to school and have no choice except to work as unskilled labour. These children are compelled to live below poverty line all their lives. There are many law against child labour but these laws alone cannot control the exploitation of children. We must get the support of all the people of the society to control this menace.

According to this law, no child below the age of fourteen can be exploited of child in any job. Another law states that the children should not made to work beyond their capacity and they should be given opportunities and facilities to develop in healthy manner.

My school

Children start their social life in their school. In that way I have started my studies at a lovely school which is named as Mahmud ladies school .My school is a government school which is situated in Kalmunai . There are about 2500students and about 200 teachers in my school well managed administration and infrastructure facilities can be seen in my school. There are many brilliant students in my school. My school is not only good at studies but also very good at sports. My school is awarded as a best school island wise and I am very proud to be a student in this famous school. I wish to continue my studies further in this school. I love my school very much.

Albert Einstein

Albert Einstein was a German American scientist. He is best known for his theories on relativity and theories of matter and heat. Einstein is considered one of the greatest physicists of all time because he is thought to have changed the way one looks at the universe. Einstein was born in Ulm, southern Germany, to Jewish parents. A year after he was born he moved to Munich, Germany. Einstein showed no signs of being a genius at an early age. He did not like to receive instructions in school, therefore his education had to begin at home. He would still have to attend school in Munich though, and would get exceptional grades especially in Mathematics; however, he hated it, a teacher suggested him to leave and just study at home because of his dislike toward the school. Merely his presence caused the other students to disrespect the teachers. A story that Einstein loved to tell was that he once saw a compass and saw that the needle had a northward swing. He knew there was something behind it and he wanted to know the hidden mysteries.

Einstein first learned algebra and the pythagora's theorem when his uncle taught it to him. His uncle would visit the family frequently and was Einstein's mentor. He would help him and encourage him to go on and never give up. Einstein loved to solve the algebraic and geometrical problems on his own. At the age of twelve he read a couple of books on Euclid Geometry and learned the whole thing on his own. At the age of fourteen he read a few science books and the books had an immense influence on his life.

At the age of fifteen his parents moved to Milan, Italy, Einstein took this opportunity to drop out of the school in Munich. He spent a year just living with his parents and reading. Albert then realized that he needed to do something in life. He decided to finish school in Aarau, Switzerland. In 1895, he tried to enter into the Swiss Federal Institute of Technology (a type of university). He took the entrance exam, failed it, and passed it the second time. In the institute Albert realized that his true love was Physics. Albert hated that school also, so much was his dislike toward the school, that he would not even attend the classes. He would rather stay home and do experiments and have his friend take notes for him, then he would just study the notes on his own and take the tests.

Albert graduated from the university with not so prestigious grades, he tried to get a job at a university as a professor, but failed to find one. He even became a Swiss citizen to find a job in Switzerland, but it did not work out either. In 1902 he found a job at the patent office at Bern. All he had to do was put applications in for patents. This gave him time to devote himself to the Physics questions that he had and do scientific papers. In 1903 he married Meliva Maritsch, he had two sons with her and discussed his ideas with her all the time.

Einstein started to draw attention to himself when he started to publish his papers. In 1905 he was hired as a professor in the University of Zurich for his Annus Mirabilis-the four major papers that he wrote in his life-. The first one was about the theoretical dissertations on the dimensions of molecules. The second was about the Brownian Motion; he made predictions about the motion of particles. The third one was about the Photoelectric Effect, which contained a revolutionary hypothesis on the nature of light. In this paper he wrote about the photon being proportional to frequency. His Fourth and most revolutionary paper was the one about Theory of Special Relativity, which contained the interaction viewed simultaneously by an observer at rest, and by an observer moving at uniform speed.

Albert did not really become world famous until some of the things in his Theory of Special Relativity proved to be true. In his theory he explained the unexplained variations in the orbital motion of the planets. This was proved in 1919 when there was an eclipse. After the eclipse, people realized that what he had stated was true. From that time on he became world known. He was invited to many special meetings; on one of them he met one of his favorite scientist Max Planck and others that he relished. It was in that same year that he married his cousin Elsa. In 1921, he won the Noble Prize for Physics for the research he did on the PhotoElectric effect.

Since Albert was a publicly declared Zionist, he was the target of many anti-semitics. He would be ridiculed in Germany because of his beliefs. Albert had moved to Germany to work at the University in Prague. When Hitler came to power, he immediately moved to Princeton, New Jersey. Albert later learned that some German scientist had discovered how to split the uranium atom. Albert and other scientist sent a letter to President Roosevelt and told him to start an atomic bomb project also. That is why the Manhattan project was started. Einstein helped to make the first two atomic Bombs.

Albert Einstein died in 1955, in Princeton, New Jersey. He was able to see his own people return to their homeland, something he wanted to see all his life. Einstein accomplished many things in life because of his hard work, and all his work has helped our world today.

some of his quotes

"Weakness of attitude becomes weakness of character."

"I never think of the future. It comes soon enough."

"God does not care about our mathematical difficulties. He integrates empirically."

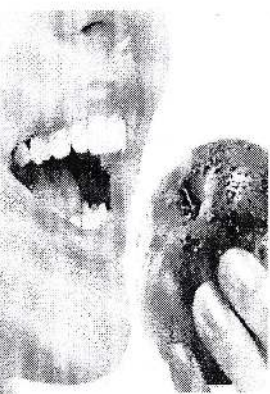

"The whole of science is nothing more than a refinement of everyday thinking."

"Peace cannot be kept by force. It can only be achieved by understanding."

"Education is what remains after one has forgotten everything he learned in school."

"The important thing is not to stop questioning. Curiosity has its own reason for existing."

"Do not worry about your difficulties in Mathematics. I can assure you mine are still greater."

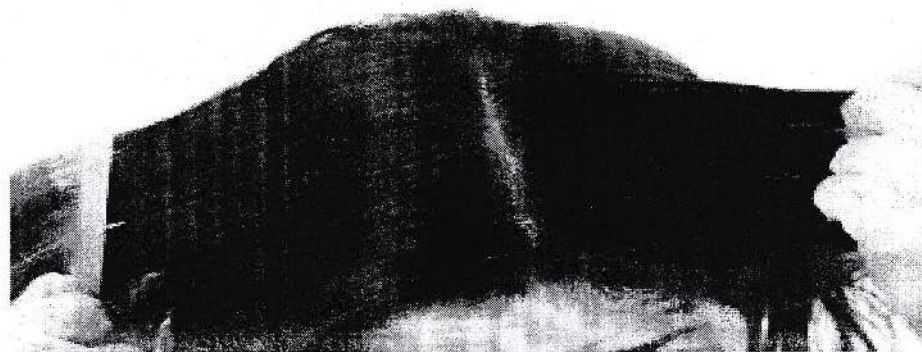

I Am Healthy

What Is Dandruff?

The flaking accompanying dandruff is caused by something called seborrheic dermatitis (sometimes just called seborrhea). Dandruff flakes may be white or light yellow and will usually rub off a person's head easily.

Someone who has dandruff may notice his or her scalp feels crusty, red, and raw in the areas where seborrhea is getting worse. If this happens, seborrhea can cause the scalp to itch pretty badly. In very rare cases, seborrhea may cause hair loss if it isn't treated. But any lost hair should start to grow back once seborrhea is treated.

For some people, seborrheic dermatitis just causes a relatively mild case of dandruff — a bit of flaking and itching in the scalp. Other people with seborrheic dermatitis have crusty, red, irritated skin that may spread to different areas of the body. Common locations to find seborrhea include inside the ear, the armpits, and even the belly button. Seborrheic dermatitis and dandruff aren't contagious. So you can't catch dandruff from (or give it to) another person.

What Is Alcohol?

Alcohol is created when grains, fruits, or vegetables are fermented. Fermentation is a process that uses yeast or bacteria to change the sugars in the food into alcohol. Fermentation is used to produce many necessary items — everything from cheese to medications. Alcohol has different forms and can be used as a cleaner, an antiseptic, or a sedative.

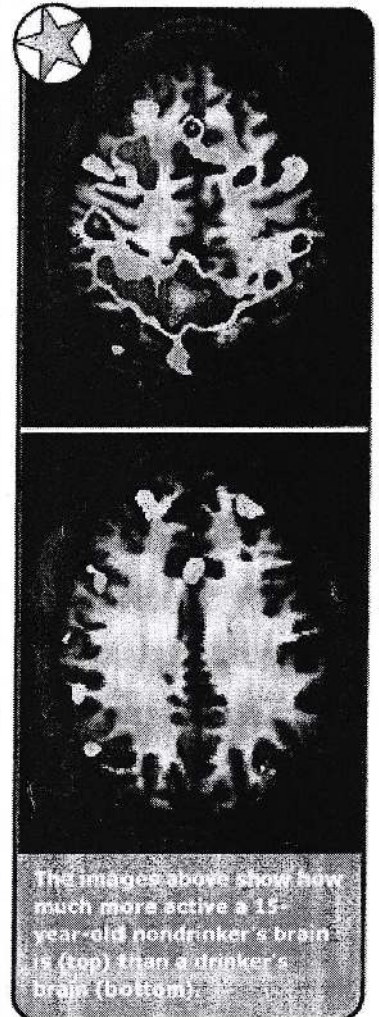

So if alcohol is a natural product, why do teens need to be concerned about drinking it? When people drink alcohol, it's absorbed into their bloodstream. From there, it affects the central nervous system (the brain and spinal cord), which controls virtually all body functions. Because experts now know that the human brain is still developing during our teens, scientists are researching the effects drinking alcohol can have on the teen brain.

How Does It Affect the Body?

Alcohol is a depressant, which means it slows the function of the central nervous system. Alcohol actually blocks some of the messages trying to get to the brain. This alters a person's perceptions, emotions, movement, vision, and hearing.

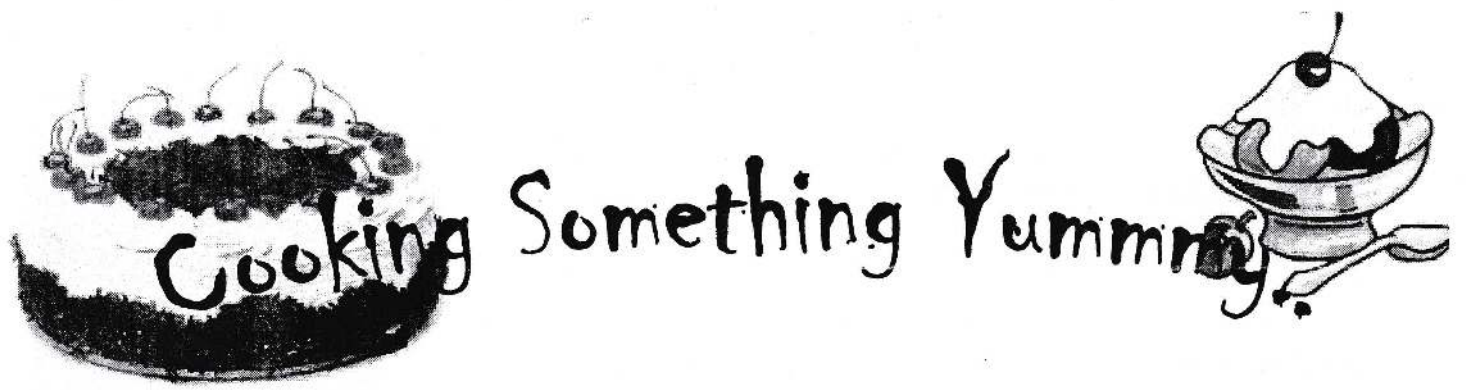

In very small amounts, alcohol can help a person feel more relaxed or less anxious. More alcohol causes greater changes in the brain, resulting in intoxication. People who have overused alcohol may stagger, lose their coordination, and slur their speech. They will probably be confused and disoriented. Depending on the person, intoxication can make someone very friendly and talkative or very aggressive and angry. Reaction times are slowed dramatically — which is why people are told not to drink and drive. People who are intoxicated may think they're moving properly when they're not. They may act totally out of character.

When large amounts of alcohol are consumed in a short period of time, alcohol poisoning can result. Alcohol poisoning is exactly what it sounds like — the body has become poisoned by large amounts of alcohol. Violent vomiting is usually the first symptom of alcohol poisoning. Extreme sleepiness, unconsciousness, difficulty breathing, dangerously low blood sugar, seizures, and even death may result.

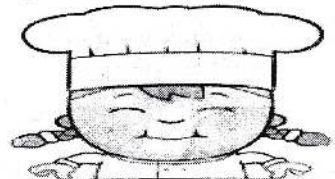

The images above show how much more active a 15-year-old nondrinker's brain is (top) than a drinker's brain (bottom).

Cooking Something Yummy

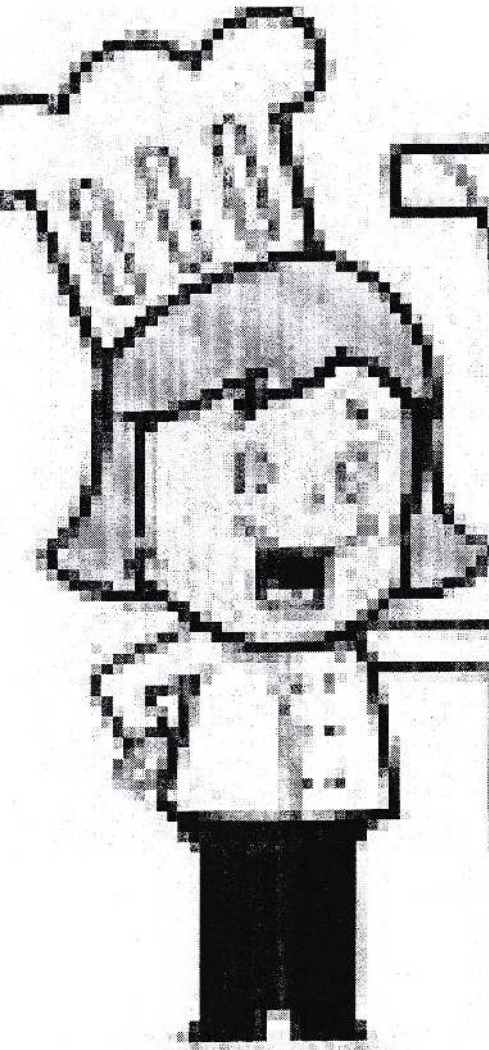

hi friends nice to meet you all again, Today i have brought the recipe of cookies. lets go on

COOKIES

All you need is,

1. 125g butter
2. $\frac{1}{2}$ cup sugar
3. $\frac{1}{2}$ cup brown sugar
4. One egg
5. $\frac{1}{2}$ tsp vanilla essence
6. $\frac{1}{4}$ tsp salt
7. $1 \frac{3}{4}$ self-raising flour
8. 150g milk chocolate chip

METHOD

Preheat oven to 180°C. Line three trays with baking paper and set aside.

In a mixing bowl, cream the butter, sugar and vanilla.

Add the egg and then flour and salt and combine.

Stir in the chocolate chips.

Roll into teaspoon-sized balls and place on prepared trays, leaving enough room for mixture to spread as it cooks.

Bake for 8-12 minutes. Leave on the tray for a few minutes before continuing the cooling on wire racks . you're done!

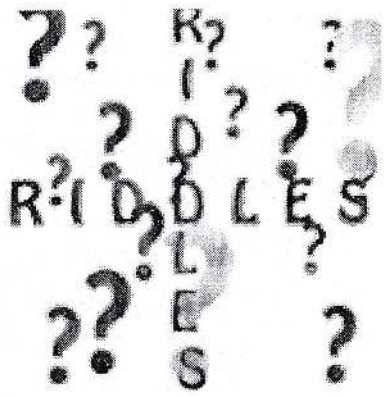

Oh bye! Can't wait to have this...

Riddles

1. It walks on four legs in the morning, two legs at noon and three legs in the evening. What is it?

*Man (or woman). Crawls on all fours as a baby, walks on two legs as an adult and uses two legs and a cane when they're old.

2. It is greater than God and more evil than the devil. The poor have it, the rich need it and if you eat it you'll die. What is it?

*Nothing. Nothing is greater than God, nothing is more evil than the devil, the poor have nothing, the rich need nothing and if you eat nothing you'll die

3. What has a head, a tail, is brown, and has no legs?

*a penny(coin)

4. What comes once in a minute, twice in a moment but not once in a thousand years?

*the letter m

5. What four letters frighten a thief?

*OICU

6. How is the letter T like an island?

*It's in the middle of waTer.

7. What kind of pet always stays on the floor?

*a carpet

8. People need me but they always give me away. What am I?

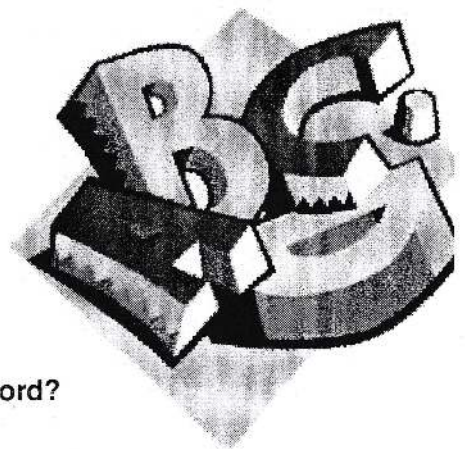

*money

9. Boys use it, girls like it, parents hate it. What is this 5-letter word?

*phone

10. I sit in a corner and travel around the world. What am I?

*A stamp

Competitions!

Age group 6-15(drawing)

WIN educational gifts by drawing amazing drawings with the given topic according to your age.

6-8My home

7-8.....My hobby

9-10.....My classroom

11-12.....The morning dawn

13-15....dream I had last night

16-17child labour.

The drawings have to be certified by your teacher or parents and post to 165, hospital road, Nintavur-15..Or hand over to grade 8 BLA student named M.FF. Nuha of Mahmud ladies college Kalmunai. And your drawings have to be post or hand over before 15th of January 2013

HAND WRITING CONTEST (age 13-14)

Try to win stationary prizes by writing the below paragraph in a grammatical manner

"The flower is a pure and beautiful creation of Nature. It is offered to Gods and presented to the dear and near ones, because of its beauty and purity. It may be of different sizes, species, colour and shapes. It grows on delicate plants. There are also small flowers like daisy and seasonal flowers of small and pretty sizes and colour planted in parks, lawns, etc. Flowers are sold in the market. They are used for decorating houses and temples, and allude in weddings and festivals. Flowers are loved and adored by all."

Post to 165 hospital road,nintavur-15

OR

Hand over to the student mentioned above before 13 of January

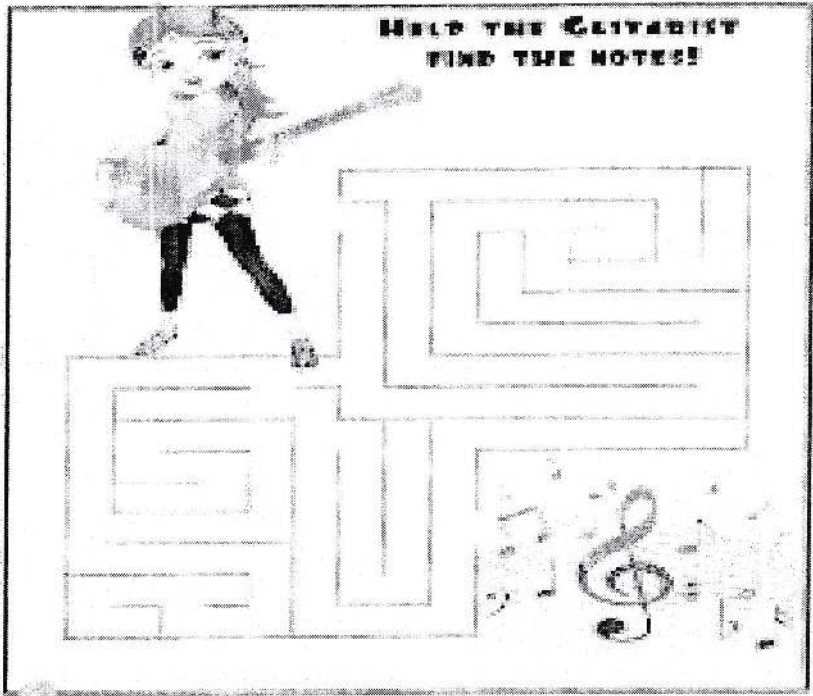

2013

Ricky Ponting says walking away from Australia 'easy decision'

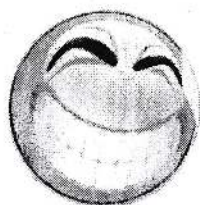

Ricky Ponting says he has no regrets about retiring after his final game for Australia ended in a heavy defeat to South Africa in Perth.

Ponting scored eight runs in his final appearance at the crease for his country to end a glittering Test career with 13,378 runs in 168 Tests. "The decision to walk away was a pretty easy one," said Ponting after South Africa's series-clinching 309-run win. Australia captain Michael Clarke said the game had lost a true great. "I'm a realist and I realise now that my best cricket is probably past me," added Ponting, the second highest run-scorer in Test history behind Sachin Tendulkar, after South Africa secured victory on the fourth day. "As hard as I have tried over the last couple of years to find my form again and re-establish myself, I haven't been able to do that." On a highly emotional day at the Waca, Ponting was given a guard of honour by the South Africa team as he walked to the crease, instigated by captain Graeme Smith. The 37-year-old, who **announced his retirement** before the match, lasted just 23 deliveries and 39 minutes before he was well held by Jacques Kallis as he attempted to force a shot off the back foot from Robin Peterson's bowling. The South Africa players shook Ponting's hand as he left the field, and he turned to wave his bat to the crowd as the big screen showed the words "Thanks Ricky". After the game, he received a standing ovation during a lap of honour as he was hoisted aloft by team-mates Michael Clarke and David Warner. Ponting's wife, Rianna, and daughters Emmy and Matisse, were among the crowd of 7,166. "It would have been nice to have played one more Test but the decision has been made and I'm disappointed not to have contributed more this week," added Ponting, who ended the match with a total of 12 runs. "It's probably been the toughest Test match I have played." Clarke urged Cricket Australia to use three-time World Cup-winner Ponting's vast knowledge and experience to help the country in the future. "He's one of the greatest players I've been lucky enough to play with," he said. "I've said before I hope Cricket Australia do everything in their power to keep him involved in this great game because he's one of a kind and I think the game needs him." Meanwhile, Smith explained the decision behind South Africa's guard of honour for Ponting. "It was just a sign of respect for someone who has given the game so much," said the South Africa captain. "I'm sure we're all going to miss Ricky as an opponent. "I just told him he deserved everything that comes his way and can be proud of everything he's achieved."
