established themselves in Ceylon.

PHENOMENA.

There will be two Eclipses of the Sun in 1858, neither of them visible in Ceylon; and two of the Moon, both visible at Colombo. First on the 28th of February, (civil time), begins at 2h. 29m. 16s. A.M., ends at 4h. 36m. 28s. A.M. Second on the 24th August, (civil time), begins at 6h. 22m. 46s. P.M., ends at 8h. 56m. 22s. P.M.

COLOMBO TIME.

Ceylon being so far towards the East or Sun-rising, it is already mid-day here when it is morning in England. The day here is farther advanced than at Greenwich 5 hours 19 minutes and 33 seconds, which must therefore be added to the time in England to give the time here.

The quantities given under the head "Sun's Declination" are to the nearest minute, and those under "Equation of Time" to the nearest second. By these data, with the use of a pocket sextant, the time may be readily obtained to within four seconds. Those whose objects require greater accuracy will most probably be provided with a Nautical Almanac.

Colombo.—The along-shore wind (a strong parching wind from the N. E.) often continues to blow the greater part of this month night and day. It carries off the moisture of the ground and the skin rapidly, and gives rheumatism, &c. to those who expose themselves incautiously to it. Therm. Max. 89. Min. 72·1. Mean 79·8.

TRINCOMALIE.—Fine weather throughout, wind N. E. but more moderate. Occasional land wind after midnight and very cold. Therm. Max. 83. Min. 72. Mean 79.

Colombo.—The dry earth now receives far more heat from the sun than it parts with by evaporation or terrestrial radiation. The weather is becoming very warm. Notwithstanding the alternate sea breezes by day and land winds by night, the heat is oppressive compared with that of the rest of the year. Therm. Max. 88.1. Min. 74. Mean 81.8.

TRINCOMALIE.—Fine weather throughout, wind more moderate and veers round to E. N. E. and East with morning land wind. Towards the end of the month the weather becomes warm. Therm. Max. 86. Min. 72. Mean 81.

Colombo.—Weather the same as July and August, but warmer in consequence of the smaller amount of evaporation. These months are usually cool, however, compared with March, April and May, and towards the end of this month heavy showers fall. Therm. Max. 85. Min. 75.4. Mean 80.9.

TRINCOMALIE.—Land and sea breezes, towards sunset lightning, thunder, and occasional showers, calm oppressive nights. Therm. Max. 89. Min. 75. Mean 82.

Account of the Calendar.

The Julian or common civil year* is that which is employed in chronology. This is in effect a solar year, commonly containing a certain number of whole days, the odd hours and minutes being set aside to render the computation of time in the common concerns of life more easy, and consists of 365 days or 13 months, 1 day; or 52 weeks, 1 day, for three years together; but every fourth year a day (or in the four years 6 hours for each year) being added to February, it then contains 366 days; this is called bissextile or leap year, consequently the mean Julian year, will be 365 days, 6 hours.

The MEAN SOLAR, ASTRONOMICAL, TROPICAL, NATURAL, OF EQUINOCTIAL YEAR is the true standard of time, and is the period of time in which the earth performs a revolution about the sun, or passes from the first point of Aries to the same first point of Aries again; and has been assumed, according to Bessel (see Connaissance des Temps. 1831, Additions, p. 154.), equal to 365°24'2218 mean solar days=365d. 5h. 48m. 47.6352s.

Although the Julian method of intercalation is perhaps the most convenient that could be adopted; yet, as the science of astronomy advanced, the length of the astronomical year was found to be shorter than the Julian correction supposes by 11m. 12:3648s., it could not, without correction, very long answer the purpose for which it was devised, namely, that of preserving always the same interval of time between the commencement of the year and the equinox, and thus would a degree of confusion be introduced into the relative divisions of the year, and be productive of great inconvenience: at length it was discovered that an error of one day too much would take place in 129 years (for as 1 m. 123648s: 1 year: : 1d: x); but in the time of Cæsar the length of the year was an astronomical element not very well determined. In the course of a few centuries, however, the equinox sensibly retrograded towards the beginning of the year in consequence of the precession of the equinoxes. When the Julian calendar was introduced, the equinox fell on the 25th of March; at the time of the Council of Nice, which was held Anno Domini 325, it fell on the 21st of March. This imperfection of the calendar was noticed as early as the time of the Venerable Bede; but the reformation of it did not take place till many centuries after: Petrus ab Alliaco and Cusa, two learned Cardinals, not only pointed out these imperfections to the Councils of Constance and Lateran, but suggested the means for its correction; and in A. D. 1474, Pope Sixtus the IVth engaged Regiomontanus, an eminent mathematician, in this task of reform, though from the circumstance of the death of Regiomontanus the project was not carried into effect. And when the reformation was made, in 1582, the equinox had retrograded to the 11th of March; therefore, in order to make the calendar more correct, Pope Gregory the XIIIth invited Clarius and Ciaconius, the most celebrated astronomers and mathematicians of the age, with others, to superintend the reconstruction of the calendar: they having found that by the introduction of the bissextile days, a difference had arisen of ten days between the calendar and actual time, owing to the odd minutes and seconds which the bissextile year occasioned the calendar to exceed the true period of the sun's progress, the Pope then issued a brief, in the month of March 1582, in which he abolished the use of the ancient calendar. And in order to restore the commencement of the year to the same place in the seasons that it had occupied at the time of the Council of Nice, Gregory directed the day following the feast of St. Francis, that is to say, the 5th of October, to be reckoned the 15th of that month. By this regulation the vernal equinox, which now happened on the 1!th of March, was restored to the 2!st. This last amendment of the calendar having taken place under the direction of Pope Gregory the XIIIth, was, out of respect to him, called the Gregorian or New Style, in opposition to the Julian or Old Style, and has been adopted by almost every Christian nation. The Gregorian Style was immediately acceded to by all those parts of Europe which were under the papal authority, but the Protestants adhered to the Julian Style with obstinate pertinacity; and the Protestants of Germany have the credit of having first rectified such inconsistency, by throwing eleven days out of their calendar in 1700; while it is worthy of remark, that the Russians, regardless of

[•] The first Julian year commenced with the first of January of the 46th before the birth of Christ, and 708 from the foundation of the city of Rome.

propriety, still adhere to the Julian style, and therefore, by another centurial leapyear having occurred, viz. in the year 1800, they now differ from us 12 days in their date of time. Now as the error of the Julian intercalation was found to amount to three days in 400 years, he ordered intercalations to be omitted on all the centenary years, excepting those which are multiples of 400. According to the Gregorian rule of intercalation, therefore, to know when it is bissextile or leap year, divide the year by 4, and the remainder shews how long it is after leap year; if nothing remains it is leap year, excepting the centurial years, which are only leap years when divisible by 4 after suppressing the two zeros. Thus 1600 and 2000 are leap years, because 16 and 20 are divisible by 4; but 1700, 1800, and 1900 are common years, and so on, because 17, 18, and 19 are not divisible by 4, but these would have been leap years by the Julian calendar. As the Gregorian method of intercalation has been adopted in all Christian countries, Russia excepted, it becomes interesting to examine with what degree of accuracy it reconciles the civil with the solar year; therefore the only thing in the correction of the calendar that requires a high degree of mathematical science is the determination of the length of the astronomical year; yet this has never been perfectly Had the mean astronomical year been more accurately determined in the time of Julius Cæsar, the Julian correction would, probably, have superseded the necessity of the Gregorian. Although the Gregorian calendar is far preferable to the Julian, yet it is not without its defects (perhaps, as Tycho Brohe and Cassini imagine, it is impossible ever to bring the calendar to a perfect justness). According to the latest determinations of modern astronomy, the mean solar year consists of 365 d. 5 h. 48 m. 47.6352 s., or 365.242218 d. Now the Gregorian rule gives 97 intercalations in 400 years; 400 years therefore contain 365 x 400 +97=146097 days, and consequently one year contains 365.2425 days or 365d. 5h. 49m. 12s. This exceeds the true solar year by 24.3648 seconds, which amount to a day in 3546 years; for as 24.3648 s.: 1 year: 1 d.: x. It is perhaps unnecessary to make any formal provision against an error which can only happen after so long a period of time; but as 3546 differs little from 4000, it has been proposed to correct the Gregorian rule by making the year 4000 and all its multiples common years. With this correction the rule of intercalation is as follows:—Every year, the number of which is divisible by 4, is a leap year, excepting the last year of each century, which is a leap year only when the number of the century is divisible by 4; but 4000, and its multiples, 8000, 12000, 16000, &c., are common years. Thus the uniformity of the intercalation by continuing to depend on the number 4, is preserved; and by adopting the last correction the commencement would not vary more than a day from its present place in 31250 years. For as the Gregorian intercalation gives 97 days in 400 years, consequently in 4000 years 970 days would be intercalated; but one day is now omitted at the end of every 4000 years, therefore only 969 days are intercalated, consequently the civil year will be $365 d. + \frac{969}{4000} = 365 24225 d = 365 d. 5h. 48m. 50.4 s$; but this exceeds the mean solar year by 2.7648 seconds, and it would require 31250 years to make the beginning of the civil and tropical year be a day apart, for as 2.7648s. : 1 year : : 1 d. : x.

From the year 1582 to 1700 the difference between the old and new style continued to be ten days; but 1700 being a leap year in the Julian calendar, and a common year in the Gregorian, the difference of the styles during the eighteenth century was 11 days. The year 1800 was also common in the new calendar, and consequently the difference in the present century is twelve days, and so will continue till the year 1900, and from 1900 to 2100 will be thirteen days, and at every centesimal year, which is not exactly divisible by 4, will be an increase of one day more, excepting 4000 and its multiples. In Great Britain the alteration from the old to the new style was for a long time successfully opposed by popular prejudice, but the inconvenience had been so generally felt in matters of history and chronology, that at length, in 1751, an Act of Parliament was passed for the adoption of the new style in the year following, in all public and legal transactions under the crown. The difference of the two styles, which then amounted to eleven days, was removed by ordering the day following the 2nd of September of the year 1752 to be accounted the 14th of that month, whereby that month consisted of only nineteen days: and in order to preserve uniformity in future, the

Gregorian rule of intercalation respecting the secular years was adopted.

The SIDEREAL OF ASTRAL YEAR is the time elapsed from the sun's quitting a particular fixed star to its return to the same fixed star again, and it exceeds the solar year by 20 m. 19.9561 s., making the sidereal year 365 d. 6 h. 9 m. 7.5913 s.; this difference is called the precession or retrograde motion of the equinoxes, by which

the fixed stars gain about 50.1 seconds in right ascension every year; consequently the length of a sidereal year can then be determined by no method more obvious or more correct than this:-

As 360 deg. 50 is. : 365 d. 5h. 48 m. 47.6352 s. : : 360 deg. : 365 d. 6 h. 9 m. 7.5913 8.

The ANOMALISTIC YEAR is the interval which is occupied by the sun in passing from apagee to apagee, or from perigee to perigee; it is greater than the sidereal year by the time required to describe the annual progression of the apogee : now the progression of the apogee (its increase of longitude) being 11.8 seconds, therefore the anomalistic year is complete when the sun has described 360 deg. 0 m. 118. s. Hence to find the length of an anomalistic year—
As 360 deg.: 365 d. 6 h. 9 m. 7.5913 s.: 360 deg. 0m. 11.8 s.: 365 d. 6 h. 13 m.

54.9263 s.

Therefore the anomalistic year is longer than the sidereal by 4 m. 47.335 s., and

longer than the equinoctial by 25 m. 72911 s.

Apparent or true time is that which is denoted by the sun-dial, from the apparent motion of the sun, and differs several minutes in certain parts of the ecliptic from the mean time, or that shewn by the clock. The difference is called the equation of time and is set down in the almanac in order to ascertain the true time. This irregularity is produced by two principal causes, viz. the obliquity of the ecliptic to the equator, and the eccentricity of the earth's orbit, and by the small deviations from elliptical motion produced by the moon and planets.

A lunar month or synodic revolution of the moon is the time between two consecutive conjunctions of the moon, called the change or new moon. This period varies considerably, in consequence of the variation of the eccentricity of the moon's orbit.

A mean lunation is, according to Laplace, 29d. 12 h. 44 m. 2.8032 s., and the excess in each year is 11 days, from which the epact or moon's age at the commencement of any year may be found; and this is used for finding the moon's

age at any time in the year.

A day is that portion of time in which the earth makes one complete revolution on its axis, and is measured by the interval between two successive transits of any fixed star over the same meridian. The civil day is reckoned from one midnight to another, being divided into two periods of hours counted from one to twelve, twice over, among the ancient Egyptians and Romans, with modern English, Dutch, Germans, Spaniards, and Portuguese; but in astronomical calculations, the day is always supposed to begin at noon, and to end at the noon of the following day, the hours being reckoned up to 24. Therefore, if civil time be P. M. it agrees with astronomical time; but if the civil time is A. M., add 12 hours to it, and the sum will be the corresponding astronomical time of the preceding day.

The Hebrew year is reckoned from the Creation, in lunar years consisting of 12 lunar months of $29\frac{1}{2}$ days each and from new moon to new moon. The Jewish year in general contains 354 days.

The Mahomedan era commences with the introduction of the Mahomedan religion by Mahomet. Their year, like that of the Jews, consists generally of 354

days.

The Chinese divide the night and day into twelve equal parts, beginning their reckoning from midnight. Hence their hours are double the length of ours.

The common Chinese year consists of twelve lunar months and their intercalary year has thirteen. Their months have no subdivision, that is, they have no weeks. Their common way of dating is by the day of the month and the year of the reigning Emperor. As for example, fifth of the sixth moon in the 12th year of

The moon with which their year commences, is that which falls nearest to the fifteenth degree of Aquarius, corresponding to the 3d or 4th of February.

The Chinese have no particular days for religious worship. Their great festival is the first of the year, on which day they shut up their shops, dress in their best

Explanation of Feasts and Festivals.

THE DAY of CIRCUMCISION, Or NEW YEAR'S DAY .- This day was kept as a festival by the Greeks in celebration of the completion of the Sun's annual course, and by the Romans in honor of their god Janus. The Day of Circumcision was instituted in the Christian Church A. D. 487, and introduced into the English Litergy in 1550 in commemoration of the Circumcision of our Lord Jesus Christ, eight days after

his Nativity.

EPIPHANY, TWELFTH-DAY, or OLD CHRISTMAS Day, - is kept as a festival throughout Christendom in commemoration of the manifestation of the Lord Jesus Christ upon earth. Antiently it was celebrated as the Feast of the Nativity during twelve days, namely, from Christmas unto the 12th day onwards. The first and last of these days were denominated the greater and lesser Epiphany. The first, on account of the Lord Jesus having on that day assumed the human form; and the second, on account of the appearance of the star which conducted the Wise men from the East to Bethlehem, there to worship the infant Saviour.

CANDLEMAS DAY, PURIFICATION of the VIRGIN MARY,—was antiently called the day

of Christ's Presentation; and is still kept as a solemn festival in memorial of the humiliation of the Blessed Virgin Mary, who whilst submitting to the Law that enjoined personal purification after childbirth, presented the infant Jesus in the

SEPTUAGESIMA, SEXAGESIMA, QUINQUAGESIMA, and QUADRAGESIMA SUNDAYS, are so called to signify in even and round numbers, the seventieth, sixtieth, fiftieth, and

fortieth day before Easter.

SHROVE TUESDAY .- This day, preceding the first day of Lent, is so called from the Saxon word Shrive, to confess; because in antient times, on this day, every person in England was obliged to confess to his own parish priest in his own parish church.

ASH WEDNESDAY, THE FIRST DAY OF LENT .- Originally so called from the custom that prevailed of penitents, when admitted to the Church to express humiliation on account of their sins, appearing clothed in sackcloth, and having Ashes sprinkled on their heads.

LENT, signifies spring. The forty days before Easter, therefore, being observed by Christians as days of humiliation, fasting and prayer, were called the Spring, or

Lenten Fast.

LADY DAY, - is celebrated throughout the Christian world under the title of The Annunciation of the Blessed Virgin Mary, or the day on which Almighty God sent the Angel Gabriel to announce to her the fulfilment in her person of the prophecies that foretelling the wondrous scheme of salvation, declared a Virgin should conceive and bear a Son, &c .- (See Gen. iii. 15: Is. vii. 14; ix. 6: Mic. v. 2, &c.) - Lady day is also in civil calculation, the 1st of the four quarter-days, as they are called, of the

PALM SUNDAY.—The Sunday before Easter, commemorated throughout the Christian Church, as the anniversary of our Saviour's last entry into Jerusalem, when the people took branches of Palm, and went forth to meet him and cried, Hosanna: blessed is the King of Israel, who cometh in the name of the Lord. This day is

also called Passion Sunday, as the first day of the Passion week.

Good FRIDAY, called also HOLY FRIDAY; is the day which from the earliest period in the Christian Church has ever been kept in solemn awful remembrance of the

Crucifixion of our blessed Lord and Saviour Jesus Christ.

EASTER SUNDAY .- The day on which the Lord Christ rose triumphant from the grave; and since then ever kept throughout all Christendom as a Great Day, a Feast of Feasts; and a Sunday of Joy. In secular transactions it is the most important of all the moveable feasts, as the day on which it falls regulates all the rest.

ROGATION SUNDAY,-the fifth Sunday after Easter, takes its name from the Latin word rogare, to beseech; the early Christians having appointed extraordinary prayers

and supplications on the Monday, Tuesday and Wednesday succeeding it.

HOLY THURSDAY OR ASCENSION DAY, is the day on which the Church celebrates the Ascension of our Lord into heaven.

WHIT SUNDAY, OR PENTECOST.—This day is held by the Christian Church as a solemn festival, in commemoration of the descent of the Holy Ghost upon the Apostles on the day of Pentecost. On this day in early times converts to Christianity were most usually admitted to the Church by Baptism; they were baptised clothed in white; hence it became termed White Sunday, from which in later times was derived the term Whit Sunday.

TRINITY SUNDAY .- This is the Sunday following Whit Sunday; and on this day, the Christian Church more particularly calls to mind the doctrine of the Holy Trinity.

ADVENT SUNDAY; -- commences the season set apart by the Church as preparatory to the festival of Christmas. On this season we are not only called upon to contemplate the inestimable blessings conferred on mankind by the coming of our Lord to "take away the sin of the world," but also to prepare for that second coming, when He will appear to "judge the world in righteousness."

CHRISTMAS DAY, OF THE FESTIVAL OF THE NATIVITY, -commemorates the birth

of our blessed Saviour-Gon manifest in the flesh-"to whom be glory and majesty

dominion and power, both now and ever. AMEN."

Principal Native Festivals.

SINGHALESE.

- 1.-AWURUDU-MANGALLE, the feast of the New Year, April 11.
- 2.-The day of anointing the head with oil after the New Year. This day is fixed by the Astrologer, and is generally celebrated a few days after the New Year.
- 3.-Full moon day of the month Wesak (April-May.) The ordination of Budhist Priests at the Establishments of Kandy and other places generally takes place on this day; as well as pilgrimages to the Budhist Temples at Kalany and other sacred places in the Island.
- 4. PERAHARRA, or the Procession, formerly celebrated exclusively in honor of the Indian deities Natha, Vishnu, Kotagram, and Pattini; but incorporated with the worship of Budha in the year 1775. It is held in Kandy and sundry other places in Udunuwera, Yatinuwera, Harispattoo Udupalata, Hewahetta, Matale, Four Korles, Saffragam, Ouvah and Seven Korles; commencing usually from the New and lasting to the Full moon in the month of July.
- 5.- KAARTKA-MANGALLE, the Festival of Lamps, celebrated in honor of Maha-Bali. the great mythological hero of India, and consisting of a general illumination for one night. This is a Kandyan Festival, and is not observed in the Maritime Provinces.
- 6.-ALOOTSAAL MANGALLE, the Festival of New Rice. This is also a Kandyan Festival, celebrated in the month of January.
- 7.-Pious Budhists also regard the Full, New, and First and Last Quarters of the Moon as holidays, and in general devote them to religious and devotional purposes.

Mile

Weights and Measures.

1. MEASURE OF LENGTH.

1 Foot 12 Inches 3 Feet 1 Yavd

5½ Yards 40 Poles = 1 Rod or Pole

80

Chains

= 1 Furlong 8 Furlongs = 1 Mile

69 1-9 Miles = 1 Degree of a Great Circle of the Earth.

An inch is the smallest lineal measure to which a name is given, but subdivisions are used for many purposes. Among mechanics the inch is commonly divided into eighths. By the Officers of the revenue, and by scientific persons, it is divided into tenths, hundredths, &c. Formerly it was made to consist of 12 parts called lines.

Particular Measures of Length.

			-	2 at the total of 200 at 1
A	Nail	=	21	Inches
	Quarter	=	4	Nails Used for measuring cloth of all kinds.
	Yard	=	4	Quarters (Osed for measuring cloth of all kings.
	EII	=	5	Quarters
	Palm	=	3	Inches
	Hand	=	4	Inches—Used for height of horses
	Span	=	9	Inches
	Cubit	==	1	Foot 6 Inches
	Military Pace	=	2	Feet 6 Inches
	Geometrical Pace	=	5	Feet
	Fathem	=	6	Feet—Used in measuring depths
	Link	=	7	Inches 92 Used in Land Measure to facilitate com-
				hdths. \ \ putation of the content, 10 square chains
200	Chain	=	100	Links being equal to an acre.

MEASURE OF SURFACE.

144 sq. Inches = 1 sq. Foot 9 sq. Feet = 1 sq. Yard sq. Inches = 1296 $30\frac{1}{4}$ sq. Yards = 1 Perch or Rod. $272\frac{1}{4}$ sq. Feet 4356 sq. Feet 16 Perches = I sq. Chain 21 10890 sq. Chains 1 Rood 43560 sq. Feet Roods 4 1 Acre 3097600 sq. Yards 640 Acres 1 Male

> Particular Superficial Measures. 100 sq. Feet Square of flooring, &c. = Rod of Brick-work 272.25 sq. Feet 600 sq. Feet Load of Inch boards = Yard of Land 30 Acres = Hide of do. = 100 Acres

In some places it is customary to allow 324 Sq. Feet to a Rod; sometimes a Rod=21 Feet long and 3 Feet high = 63 Sq. Feet.

NAUTICAL MEASURES.

6082.66 = 1 Nautical Mile Feet 3 Miles League =1Leagues = 1 Degree 20

Degrees = The circumference of the Earth.

A Degree of the Meridian in the latitude of England at the medium of 52° was found by Colonel Mudge in 1800, to equal 69.114 English Miles. A sea league is therefore 3.4557 English miles in the same latitude.

4. MEASURES OF SOLIDITY AND CAPACITY.

DIVISION 1.—SOLIDITY.

1728 Cubic Inches = 1 Cubic Foot 27 Cubic Feet 27 Cubic Feet = 1 Cubic Yard 648000 Cubic Yards = 1 Cubic Rod Pole or Perch 64000 Cubic Rods = 1 Cubic Furlong 10648000 Cubic Yards 512 Cubic Furlongs= 1 Cubic Mile

Particular Cubic Measures.

A Load of rough Timber = 40 Cubic feet Load of Squared Timber = 60 do. Ton of Shipping = 40do. Barrel bulk = 324do. Floor of earth

A Cord of wood=8 ft. long 4 ft. broad, and 4 ft. deep, 128 cubic feet; a stack of wood 12 ft. long, 3 ft. broad, and 3 ft. deep=108 cubic feet; a solid yard of earth=1 load. A cubic foot of water weighs 1000 ounces avoirdupois, or 911 oz. 9 dwts. 4 grs., troy.

DIVISION II.—CAPACITY. 4 Gills = 1 Pint = $34\frac{3}{4}$ - cub. ins., nearly. 2 Pints = 1 Quart = $60\frac{1}{3}$ 60\frac{1}{3} 277\frac{1}{4} 4 Qts. = 1 Gallon = 5545-2 Gall. = 1 Peck = $8 \text{ Gall.} = 1 \text{ Bushel} = 2218\frac{1}{5}$

8 Bush.= 1 Quarter = $10\frac{1}{4}$ cub. feet nearly. 5 Qrs. = 1 Load = $51\frac{1}{5}$ The four last denominations are used for dry goods only. For liquids several denominations have been heretofore adopted, viz:—For Beer the Firkin of 9 Gallons, the Kilderkin of 18, the Barrel of 36, the Hogshead of 54, and the Butt of 108 Gallons. These will probably continue to be used in practice. For Wine, and Spirits, there are the Anker, 10, Runlet 18, Barrel, 31½, Tierce 42, Hogshead 63, Puncheon, 84, Pipe or Butt, 126, and Tun, 252 Gallons; but these may be considered rather as the same of sidered rather as the names of the casks in which such commodities are imported than as expressing any definite number of Gallons: a Pipe of Claret containing 126; Port 138; Sherry, 130; Lisbon, 140; Bucellas. 140; Madeira, 110; and Vidonia, 120 Gallons. It is the practice to gauge all such vessels and to charge them according to their actual contents.

Flour is sold nominally by measure, but actually by weight, reckoned at 7lbs. Avoirdupois to a Gallon.

A load of corn=5 bushels; a cart load of corn=40 bushels, and 7922 wheat or barley-corns are supposed to fill a pint measure.

5. MEASURE OF WEIGHT

DIVISION 1.—AVOIR DUPOIS WEIGHT.

 $27\frac{11}{32}$ Grains = 1 Dram = $27\frac{11}{32}$ gr. Troy. 16 Drams = 1 Ounce = $437\frac{1}{2}$ — 16 Ounces = 1 Pound (lb.) = 7000 28 Pounds = 1 Quarter (qr.) Quarters= 1 Hundredweight (cwt.) 4

Cwt. = 1 Ton. 20

This weight is used in almost all commercial transactions, and in the common dealings of life.

The particular weights belonging to this Division are as follows:—

Pounds = 1 Clove cwt. qr. lb. Cloves = 1 Stone = 0 Used in the Wool Trade. Stones = 1 Tod = = 1 Wey 6½ Tods 0 = 1 Sack Weys = 1 Last 12

Several sorts of Silk are weighed by the Great Pound of 24 oz.

Particular Weights. A firkin of Butter 56 lbs. " ——— Soap 64 ,, "Barrel of Raisins 112 256 --- Soap Puncheon of Prunes = 1120Barrel of Anchovies 30 ,, = Fodder of Lead " London and Hull 19½ cwt. 22 ,, Stockton 99 $21\frac{1}{2}$,, Bawtry 33 Chester

20 ,, 221 ,, Derby 33 21 ,, Newcastle

The cwt. of Lead at Hull and Cheste	er =	120	lbs.
Stone of Iron or shot	=	14	59
Butcher's meat in London	n =	8	19
in Country	=	14	33
Clove of Butter or Cheese	=	8	99
Suffolk way, 32 Cloves	=	256	"
Essex way, 42 Cloves	=	336	33
Imperial Gallon of Train oil	=	9	"
Truss of Straw	=	36	
New hay	=	60 to	64
——— Old hay	=	56	
Load	=	36 tr	

DIVISION II.—TROY WEIGHT.

```
24 Grains = 1 Pennyweight = 24 gr.
20 Pennywts. = 1 Ounce = 480 —
12 Ounces = 1 Pound = 5760 —
```

These are the denominations of Troy weight, when used for weighing gold, silver, and precious stones (except diamonds.)

For scientific purposes the grain only is used; and sets of weights are constructed in decimal progressions from 10,000 grains downwards to 1-100 of a grain.

By comparing the number of grains in the Avoirdupois and Troy pound and ounce respectively, it appears that the Troy pound is less than the Avoirdupois in the proportion of 14 to 17 nearly; but the Troy ounce is greater than the Avoirdupois, in the proportion of 72 to 79 nearly.

The carat used for weighing diamonds, is 3 1-6 grains. The term, however, when used to express the fineness of gold, has a relative meaning only. Every mass of alloyed gold is supposed to be divided into 24 equal parts; thus the standard for coin is 22 carats fine, that is, it consists of 22 parts of pure gold, and 2 parts of alloy. What is called the new standard, used for watch-cases, &c., is 18 carats fine.

DIVISION III.—APOTHECARIES WEIGHT.

20	Grains =	1	Scruple	=	20 gr	
3	Scruples =	1	Dram	=	60 -	
8	Drams =	1	Ounce	=	480 -	
12	Ounces =	1	Pound	= 5	760 -

7. ANGULAR MEASURE;

OR, DIVISIONS OF THE CIRCLE.

60	Seconds	-]	Minute		4	Seconds of Diurnal motion of the Earth reduced to time.
60	Minutes	= 1	Degree	==	4	Minutes
15	Degrees	= 1	Sign of the Zodiac	==	1	Hour
30	Degrees	= 1	Sign	=	2	Hours
90	Degrees	=1	Quadrant	=	6	Hours
360	Degrees, or 12 Signs	= 1	Circumference	=	24	Hours.

Formerly, the subdivisions were carried on by sixties; thus the second was divided into 60 thirds, the third into 60 fourths, &c. At present the second is more generally divided decimally into 10ths, 100ths, &c. The degree is frequently so divided.

The Zodiac is an imaginary belt encompassing the heavens, divided into 12 equal parts of 30 degrees each, called the Signs of the Zodiac. It extends about eight degrees on each side of the Ecliptic, and within it all the motions of the Planets are performed, except those of the new discovered asteroids, Ceres, Pallas, etc.

Signs of the Zodiac, and the Days on which the Sun enters them.

60	Minutes	=		Hour
24	Hours	=	1	Day
	Days	=	1	Week
	Days	=		Lunar Month
28,	29, 30, or 31 Day	s=	1	Calendar Month
	Calendar Months			Year
365	Days		1	Common year
	Days	=	1	Julian Year
366	Days	=	1	Leap year

In 400 Years, 97 are Leap years, and 303 Common.

The same remark as in the case of Angular Measure applies to the mode of subdividing the Second of time.

THE NATIVE DRY MEASURE.

Cut Chundoos.

```
6 Additional Section 19\frac{1}{5} = 1 Cut Measure or Secting 19\frac{1}{5} = 4 4-5 1 Coornie.

48 = 12 = 2\frac{1}{2} = 1 Marcal.

96 = 24 = 5 = 2 = 1 Parrah.

768 = 192 = 40 = 16 = 8 = 1 Ammunam.

7200 = 1800 = 375 = 150 = 75 = 9\frac{3}{8} = 1 Last.
```

The English Bushel is equal to 34 Seers or 1 Parrah and 10 Seers.

THE NATIVE LAND MEASURE.

8 = 1 Coornie. 80 = 10 = 1 Peyla. 320 = 40 = 4 = 1 Ammonam.

Among the Natives the extent of Land is defined by the quantity of Seed required to sow it, computed at the Ammonam Measure, and its sub-divisions. In fertile Lands the Seed is not strewed half so thickly as in poor soil; an Ammonam of good ground therefore will sometimes measure twice as many square feet as an Ammonam of poor soil.

BRITISH INDIA.—GOVERNMENT WEIGHTS AND MEASURES.

1 tola = 180 troy grains; 80 tolas = 1 seer, $2\frac{1}{4}$ lbs. troy; 40 seers = 1 maund = 83 2-15th lbs. avoir. (or 100 lbs. troy.) Grain is usually sold by weight throughout India.

Calcutta.—The guz = 1 imp. yard; The Bengal common coss or mile = 2000 yards; $30\frac{1}{4}$ biggan = 10 imp. acres; the factory maund of 40 seers = $74\frac{3}{4}$ lbs. avoir. the bazaar maund = 82 2-15th lbs. avoirdupois.

Madras.—The covid in cloth measure = 18 3-5ths inches; but the English yard of 36 inches is generally used; the cawny in land measure = 57,600 square feet, or about 1 acre, 11 roods and $1\frac{1}{2}$ poles; the garze of 80 parahs or 400 marcals in corn or dry measure = about $16\frac{7}{8}$ imp. quarters or by weight $9256\frac{1}{2}$ lbs. avoir.; 20 ollocks = 1 English Gallon; the maund of 8 vis, in measures of weight = 25 lbs. avoir.; the candy = 20 maunds or 500 lbs. avoirdupois.

In Calcutta, Madras, and Bombay, accounts are kept in rupees, annas and pice, thus 12 pice = 1 anna; 16 annas = 1 rupee; $3\frac{1}{2}$ rupees exchange in account for 1 pagoda. In Ceylon accounts are kept in English currency; English weights are in use here, and the long and land measures are the same as in England; the covid

is $18\frac{1}{2}$ English inches.

Bombay.—The guz. = 27 inches; the maund of 40 seers = 28 lbs. avoir.; the candy of 20 maunds, each of 40 seers = 5 cwt., reckoned for grain at $24\frac{1}{4}$ imp. bushels;

the Surat candy of 20 maunds $=740\frac{2}{3}$ avoirdupois.

China.—Measures of Weight....100 catties = 1 pecul = $133\frac{1}{3}$ lbs. avoir.; 16 peculs and 80 chatties = 1 ton; 3 peculs = 400 lbs. avoir.; $\frac{3}{4}$ catty = 1 lb.; 3 catties = 4lbs. 84 catties = 1 cwt.; 12 taels = 1 lb. avoir. Cloth Measure...32 covids = 13 imp. yards. Itinerary Measure....Li, 180 fathoms =632 yards; 200 lis = 1 degree.

The Chinese have four different measures answering to the foot; viz.,-The foot of the mathematical tribunal, English inches. 13.125 The builder's foot, called konghee 12.7 The tailor's and tradesman's foot 13:33 The foot used by engineers

United States.—Same as Britain, with former English measures of capacity: a barrel of flour weighs 196 lbs. nett; a barrel of pickled beef or pork 200 lbs.

RULE—Multiply the principal by the rate, both in pounds; multiply the product by the number of days, and divide this last product by 100; then take from the above table the several sums which stand opposite the several parts of the quotient, and add them together for the interest required.

Example—What is the interest of 225l. 10s., for 23 days at $4\frac{1}{2}$ per cent.

principal	225.51.			1.	s.	d.	9.
rate	4.5	le	against 200 is	0.	10.	11.	2.03

			in the	last	place	e of d	ecimals.

To find what the amount of a yearly income or salary (from 11. to 1,000,0001.) will come to for one day.

Rule—Collect the tabular sums answering to the given annual income or rent, and add them together for the answer.

An estate of 376l. per annum; what is that per day?

$$300 = 0. 16. 5\frac{1}{4} \cdot 04$$

$$70 = 0. 3. 10 \cdot 11$$

$$6 = 0. 0. 3\frac{3}{4} \cdot 78$$

$$376 = 1. 0. 7 \cdot 53 \text{ Ans. 1/. 0s. 7d.}$$

The number of houses in the Gravets of Jaffna, according to the last return, was 4108. The area of the Town (i. e. Pettah) and Gravets, is seventeen square miles.

VARIATIONS OF TEMPERATURE CORRESPONDING TO

ALTITUDE.

As we ascend, the air becomes thin or rare, and as it becomes rare it also grows cold. No fact is better established than this, though, the rate of this cooling of the air as we ascend in it does not appear to be uniform, but to vary in different countries and even in the same country at different seasons. Were we to go by local data we might calculate it thus. The annual temperature of Colombo is probably about 80°5; that of Kandy is about 74°5; and that of Nuwera Ellia at an elevation of 6,210 ft: is about 59°; giving a fall of one degree for every 280 ft: in the former case, and for every 295 ft. in the latter; results which accord very well with observations made elsewhere, and particularly with those which may be deduced from the other sanataria of India.

ELEVATION above the Level of the Sea of the following Stations in the Island of Ceylon, determined from simultaneous Observations with the Mountain Barometer.

General Rules framed by the Board of Health and in force in the Western Province. *

SMALL POX CHOLERA, &c.

1. The Police shall make known to the Superintendent of Vaccination, with the least possible delay, the occurrence of any case of Small Pox or any other Epidemic or contagious disease. In the Rural districts such information shall be afforded by the Native Headmen.

2. The Medical Officer appointed to inspect such cases shall, in every instance of Small Pox, give information thereof to the Superintendent of Police, who shall forthwith affix to the door of the house in which the case is found, such mark as shall sufficiently denote the existence of the disease therein.

3. Before such mark shall be removed, the Superintendent of Police shall communicate to the appointed Medical Officer the result of such case or cases of Small Pox, whether in death or in recovery. In either case he will receive instructions from the Medical Officer as to the safety of removing the mark from the house or permitting persons who have been affected to go abroad.

4. The Superintendent of Police shall remove to the Small Pox Hospital established at Marandahn or elsewhere, any case of Small Pox in which he may be required so to do by the owner or occupier of a house or the head of a family, under the conditions of the 8th section of the Ordinance No. 10 of 1852, also all destitute persons affected with the disease, also all persons who may be found in the public streets or thoroughfares with the Small Pox disease upon them.

^{*} Similar Rules are also in force in the other Provinces.

5. In the execution of these duties the subordinate Officers of the Police are enjoined to use all possible tenderness and consideration for the sufferers, and for the

religious or other feelings of their relations.

The Superintendent of Vaccination shall furnish to the Board of Health such periodical Returns and Reports as shall seem advisable. These will in their principal features correspond with those which the Superintendent of Vaccination has to furnish the Head of the Medical Department.

7. In the event of Cholera becoming epidemic, the Board of Health will communicate to Government such measures as may seem likely to arrest the progress of the

The Board of Health will exercise supervision over the Hospitals for Small Pox at Marandahn, or in any other place where it may be deemed requisite to form a similar Establishment. The discipline and economy of such Hospitals shall rest as heretofore with the Frincipal Civil Medical Officer.

9. The financial arrangements of expenses incurred by Vaccinators shall continue as

heretofore to be made by the Principal Civil Medical Officer.

VACCINATION.

1. The Board shall solicit from Government such aid from the Medical Sub-Assistants, to be appointed for the duty by the Principal Civil Medical Officer, under the sanction of Government, and of Native Vaccinators, as may be judged necessary.

2. No person shall be employed in a public capacity, who cannot produce satisfactory evidence of having undergone Vaccination or small Pox. The Proprietors of Estates and Manufactories, Heads of Families, and of Mercantile Establishments, are urged to adopt a similar precaution.

3. All Government Schoolmasters shall ascertain, previous to the admission of any child to their Schools, that the like evidence exists. The same rule is recommended to

private Schoolmasters and all others who have the charge of children.

4. The Superintendents of Jails and Hospitals shall ensure the security of the inmates by the practice of Vaccination, in all cases wherein the Medical Officers may

deem necessary.

The Board, under the authority of Government, shall issue notifications setting forth the advantages of Vaccination, the dangers resulting from its neglect, and the penalties attached to disobedience of the law. They shall call for the support and aid of all Christian Ministers and Catechists, of Moorish and Budhist Priests, and of European and Native Practitioners. The vigilance and aid of the Native Headmen shall be secured by authority from Government.

RULES FOR THE GUIDANCE OF OFFICERS.

Superintendent of Vaccination and his Duties. - The Superintendent of Vaccination shall generally superintend the labours of the different Vaccinators. He shall, from time to time, during his inspection, satisfy himself that only genuine Lymph is employed by them, and that they perform the operation of Vaccination in a correct and satisfactory manner. He shall take care that the proper returns are forwarded at the periods specified. He shall furnish annually to the Board a detailed Report of the progress of

Vaccination in the Western Province.

Medical Sub-Assistants.-The Medical Sub-Assistants engaged in Vaccination duties shall make a Monthly Report to the Superintendent of Vaccination, specifying the number of persons vaccinated by the different Vaccinators employed under them, whose Vaccination they, the Medical Sub-Assistants, have personally inspected. The quality of the Lymph employed in their districts, whether it has suffered deterioration from any cause; and the nature and extent of assistance rendered by the Civil Authorities, particularly the rural Headmen. If they have any communication to make calculated to further the cause of Vaccination, or with releience to the activity and efficiency of the Native Vaccinators, it should be embodied in such Reports.

The Medical Sub-Assistants shall vaccinate twice in the week, other Civil duties permitting. Their Vaccination should not extend to the remote stations, but once a month they should visit all the stations of the Native Vaccinators under them, in order that they may be enabled to make the report above mentioned to the Superintendent of Vaccination. They shall forward to the Superintendent of Vaccination, a weekly numerical return of Vaccination performed by themselves and the Native Vaccinators in their districts, and also a monthly nominal return. All weekly returns should be forwarded to the Superintendent of Vaccination on Mondays, and all Monthly returns should be despatched so as to reach the Superintendent by the 10th of the month.

Native Vaccinators.—Native Vaccinators shall make themselves practically acquainted with the different matters connected with Vaccination, by embracing all opportunities for instruction and improvement. The Medical Sub Assistants under whose direction they are employed, shall report periodically upon their general usefulness, diligence and activity, to the Superintendent of Vaccination. They shall vaccinate four days in each week. They shall forward to the Medical Sub Assistant of their district, or to the Superintendent of Vaccination, where no Medical Sub-Assistant is employed on such duties, a weekly numerical return in the same form as that prescribed for the Medical Sub-Assistants. They shall have one or more Vaccine stations in a village, according to its extent, and shall use their best exertions to promote efficient Vaccination by uniform kindness of manner, by great care in the performance of their duties, and by exhorting the patients to protect the vesicles throughout all stages, so that crusts may be properly formed. At the end of the month the Native Vaccinators shall furnish the Medical Sub-Assistant or Superintendent of Vaccination with a nominal return of Vaccination, in the same form as that prescribed for the Medical Sub-Assistant.

RULES FOR VACCINATING.

1st.—All persons who have not been satisfactorily vaccinated or had the Small Pox are liable to the most severe form of that disease. The protection of all such persons by efficient Vaccination is the object pays correctly desired.

by efficient Vaccination is the object now earnestly desired.

2nd.—If a healthy child be properly vaccinated, by puncture at 8 o'clock on Monday, at the same hour on the following Monday the vesicles will be of a circular form and pearly appearance, well raised from the surface, with a flat top, not a pointed one, and with very little surrounding inflammation. Such a child, although liable to Small Pox before, is now safe; and such a case should be invariably chosen from which to vaccinate others.

3rd.—Four small punctures should be made, care being taken that the lymph is inserted under the thin skin.

4th.—The patients and their friends must be urged not to allow the vesicles to be rubbed at any time, so that they may dry and fall off of themselves.

5th.-Punctuality of attendance is essential, to avoid disappointment to patients, and

to enable you to judge of the success of your efforts.

6th.—Efficient Vaccination leaves on the arm a distinct though superficial scar, which looks as if pins had been stuck into it. If there are not at least three such marks, or if seven years have passed since the last Vaccination, the person should be re-vaccinated.

Minutes on Pensions.

MINUTE

FOR THE CIVIL SERVICE.

- 1. UNDER instructions from the Right Hon'ble the Secretary of State, His Excellency the Governor is pleased to direct that the following Rules by which it is proposed that the Civil Service of this Colony shall in future be regulated in respect to Classification, Salaries and Pensions, be published for general information.
- 2. The Service will be divided into two Branches, to be termed the Senior Branch and the Junior Branch, and the latter will consist of five Classes.
- 3. A list of the Offices comprised in the several Branches and Classes, and of the salaries attached to them is annexed to this Minute.
- 4. These Salaries will commence from the 1st July 1845, from which date also will be computed the service entitling the newly added Officers to the periodical increase of Salary incident to their respective Classes.
- 5. The Pensions of the Civil Servants appointed prior to 1832 will be regulated by the rules hitherto in force, which will remain unaltered.
- 6. A Civil Servant appointed subsequently to 1832 will be entitled to pension at the following rates and under the restrictions founded upon the Provisions of the Act 4 & 5 William 4. Cap. 24, hereinafter specified.

For 15 years' service and less than 20, a Pension equal to four-twelfths of the Salary of his Office.

For 20 years and less than 25, five-twelfths.

For 25 years and less than 30, six-twelfths.

For 30 years and less than 35, seven-twelfths.

For 35 years and upwards, eight-twelfths.

These rates are to be the maximum rates in respect of each period of Service, and may be subject to diminution.

- 7. No Pension will be granted without the authority of Her Majesty's Government, in order to obtain which Certificates of Service, Age, good Conduct and of the ground of retirement must be submitted to the Secretary of State.
- 8. No pension will be granted to any Civil Servant who shall be under fifty-five years of age, unless upon Certificate from the Head of the Department to which he may belong, and from two Medical Practitioners, that he is incapable from infirmity of mind or body to discharge the duties of his situation; nor unless he shall have discharged those Duties with diligence and fidelity to the satisfaction of the Head of his Department. And in case the Civil Servant claiming such pension shall be himself the Head of a Department, then such pension shall not be granted unless he shall have discharged the duties of his situation with diligence and fidelity to the satisfaction of the Governor, by whom the same shall be certified to the Secretary of State.
- 9. The Pension shall be computed upon the amount of the Salary enjoyed by a Civil Servant at the time of his retirement, provided he shall have been in the receipt of the same or in the same Branch and Class for at least three years; otherwise the Pension shall be calculated upon the average amount of Salary received by such person for three years next preceding the commencement of such Pension.
- 10. It will be competent to Her Majesty's Government, in cases of peculiar and extraordinary merit, to grant special and higher rates of Pensions than those laid down in the preceding Regulations.
- 11. No Civil Servant will be held to have an absolute right to compensation for past Services or to any Pension under this Minute, and Her Majesty's Government will retain their power and authority to dismiss any Civil Servant from the Service without compensation.

- 12. In consideration of the claim to pension hereby established, an abatement at the rate of five per cent, will be made from the Salary of every Civil Servant appointed since 1832, to commence from the 14th February last,
- 13. The claim of a Civil Servant to Pension will be considered to have commenced from his first permanent appointment to any of the Offices in the List annexed to this Minute.

By His Excellency's Command,

Colonial Secretary's Office, Colombo, 3d July 1845. P. E. Wodehouse,

Act. Col. Secy.

MINUTE

FOR THE CLERGY AND TEACHERS.

HIS EXCELLENCY THE GOVERNOR is pleased to announce that the Right Hon's ble the Secretary of State has authorized the benefits of the Pension Scheme for the Civil Service of this Colony, laid down in the Minute of 3d July 1845, to be extended to all the Clergy and Ministers of the Christian Religion in Ceylon receiving stipends from the Public Treasury, and to the Masters of the Superior Schools; with the following modification bowever, in regard to the period at which the claim to Pension should commence.

By the Minute above referred to, the Pension scale in the case of the Civil Servants is fixed to begin at 15 years' service. But as the considerations which led to that regulation do not apply to Clergymen and Schoolmasters, who must necessarily be of mature age before they are appointed, and would enter, immediately on their arrival in the Colony, on the efficient discharge of their respective duties, Her Majesty's Government has decided, that any Clergyman or Schoolmaster who may be compelled to retire after Ten years' service, but under Fifteen, shall be entitled, under the same conditions as are laid down for the Civil Service Pensions, to a Pension not exceeding three-twelfths of his Salary.—After 15 years' service, they will follow in all respects the rules laid down in regard to Pensions to the Civil Service.

His Excellency has further to announce that the following Schoolmasters come within the scope of the regulation hereby established.

Principal of the Colombo Academy,

Mathematical Teacher of do.

Classical Teacher of do.

Teacher of Drawing and Design of do.

Head Master of the Model School of do.

Rector of the Native Normal Seminary.

Head Master of the Central School of Colombo,

Head Master of the Central and Normal Schools of Galle.

Head Master of the Central and Normal Schools of Kandy.

In consideration of the claim to Pension hereby established, an abatement at the rate of five per cent, will be made from the Salary of every one of the functionaries described in this Minute, to commence from 1st July last.

By His Excellency's Command,

Colombo, 28th August 1846.

J. E. TENNENT, Col. Secy.

MINUTE

BY THE GOVERNOR,

HIS EXCELLENCY THE GOVERNOR desires to correct an omission in the above Minute of the 28th August, by inserting in the List of those entitled to Pension the Officer holding the appointment of Inspector of Schools.

By His Excellency's Command,

Colombo, 19th September 1846.

J. E. TENNENT, Col. Secy. by commission by abatement

MINUTE

FOR THE JUDGES OF THE SUPREME COURT.

HIS EXCELLENCY THE GOVERNOR is pleased to announce, that the Right Hon'ble the Secretary of State has authorised the establishment of a Scheme of Pensions for the Judges of the Supreme Court of this Island, under the following regulations.

A Judge who is unable, after 15 years' service as such, to continue efficiently to discharge the duties of his Office, will be entitled to a pension not exceeding one-half of his Salary; such pension will not however be increased in consequence of prolonged service beyond fifteen years.

In the event of a Judge being compelled by ill health to retire after a service of 7 years, but less than 15 years, he will be permitted, on producing a Medical Certificate of incapacity to continue in the discharge of his duties, to retire on a pension not exceeding one-fourth of his Salary.

To a Judge who should retire before completing 7 years' service no Pension will be granted.

No Judge will be held to have an absolute right to compensation for past services, or to a Pension under this Minute: and no Pension will be granted without the authority of Her Majesty's Government; in order to obtain which, Certificates of service, age, and the grounds of retirement will be submitted to the Secretary of State.

In consideration of the claim to Pension hereby established, an abatement at the rate of 5 per cent. will be made from the salaries of the Judges of the Supreme Court; to commence from the 14th September last.

bud see an employed an By His Excellency's Command,

Colonial Secretary's Office, Colombo, 5th December 1846.

J. E. TENNENT, Col. Secy.

MINUTE

FOR THE GOVERNMENT CLERKS.

- 1. His Excellency the Governor is pleased to direct the publication, for general information, of the following Rules, by which it is proposed that the pensions of all persons employed, or who may hereafter be employed on the Fixed Establishment and Provisional Establishment sanctioned by Her Majesty's Government, of the several Offices and Departments specified in the List annexed to this Minute, and not within the exceptions thereof, and not receiving a Salary less than £25 per annum, shall hereafter be regulated.
- 2. Every person so borne on the Fixed and Provisional Establishments as aforesaid, will be entitled to Pension at the following rates, and under the restrictions founded upon the provisions of the Act 4 and 5 Wm. 4, Cap. 24. hereinafter specified:

For 15 years' service and less than 20, a pension equal to four-twelfths of the Salary of his office.

For 20 years and less than 25-five-twelfths.

For 25 years and less than 30—six-twelfths.

For 30 years and less than 35-seven-twelfths.

For 35 years and upwards-eight-twelfths.

These rates are to be the maximum rates in respect of each period of service, and may be subject to diminution.

- 3. No Pension will be granted without the authority of Her Majesty's Government, in order to obtain which Certificates of service, age, good conduct, and of the ground of retirement must be submitted to the Secretary of State.
- 4. No Pension will be granted to any Person who shall be under fifty-five years of age, unless upon Certificate from the Head of the Department to which PART II.

0

he may belong, and from two Medical Practitioners, that he is incapable from infirmity of mind or body to discharge the duties of his situation; nor unless he shall have discharged those Duties with diligence and fidelity to the satisfaction of the Head of his Department,

- 5. The pension shall be computed upon the amount of salary enjoyed at the time of retirement, provided the claimant shall have been in the receipt of the same for at least three years; otherwise the pension shall be calculated upon the average amount of Salary received for three years next preceding the commencement of such Pension,
- 6. It will be competent to Her Majesty's Government, in cases of peculiar and extraordinary merit, to grant special and higher rates of Pension than those laid down in the preceding regulations.
- 7. No claimant for a pension will be held to have an absolute right to compensation for past services, or to any Pension under this Minute; and His Excellency the Governor will retain his power and authority to dismiss any Clerk or other Public Servant from the Service without compensation.
- In consideration of the claim to Pension hereby established, an abatement shall be made from the 1st instant, according to the respective rates following; (that is to say,)

From salaries not exceeding the sum of £100, an abatement after the rate of £2. 10s. per Centum;

And from salaries exceeding £100, £5 per Centum;

- 9. These abatements (which are only applicable to salaries drawn on the Fixed Abstracts, and Provisional Abstracts sanctioned by Her Majesty's Government) will be made by the respective Heads of Departments, and by them remitted monthly to the Treasurer, accompanied by a Statement in Duplicate, in the annexed form, to be attached to the Accounts of that Officer.
- 10. The claim of a Public Servant to pension will be considered to have commenced from the period of his first permanent appointment on the Fixed Establishment, or Provisional Establishment sanctioned by Her Majesty's Government, comprised in the Schedule annexed to this Minute.

By His Excellency's Command,

Colonial Secretary's Office, Colombo, 30th January 1847.

MINUTE

BY THE GOVERNOR.

WITH reference to the Minute of 8th September last, establishing a classification of the Salaries of the Masters of the superior Schools in this Colony, with a scale of periodical augmentations, His Excellency the Governor is pleased to notify that the Right Hon'ble the Secretary of State has sanctioned the addition of the following teachers as a Fourth Class to that Minute.

Teacher of the Female Seminary at Colombo ... £200 With an annual augmentation of .. £10 Do. of Consistorial Girls' School at till it reaches £300. Colombo £200

Do. of Government School at Ma- With an annual augmentation of .. £10 till it reaches £250.

These increases will commence to be reckoned from the 1st instant.

The Secretary of State has also been pleased to authorise these ladies being

admitted to the benefit of the Pension Scheme established by the Minute of the 28th August 1846.

By His Excellency's Command.

Colonial Secretary's Office. Colombo, 31st July 1848.

J. EMERSON TENNENT, Col. Secretary.

MINUTE

BY THE GOVERNOR.

HIS EXCELLENCY THE GOVERNOR having received instructions from the Right Hon'ble the Secretary of State, modifying in certain respects the rules under which Pensions to Public Officers of this Colony are now regulated, under the Minutes of the 3d July 1845, 28th August and 5th December 1846, and 30th January 1847, has directed that the same be published for general information,

1. In assigning superannuation or retiring allowances according to the scales specified in the above Minutes, the increased rates of allowance authorised by those scales after periods of five years' service shall not take effect immediately after the completion of each period; but the authorised rate shall be apportioned according as the service might exceed such completion and approach the next period of increase. Thus, for example, upon a Salary of £120 per annum the maximum allowance authorised by the Minutes after a service of twenty and not exceeding twenty-five years being 5-12ths or £50, the increase of £10 shall be

distributed by annual apportionments between the twentieth and twenty-fifth years of service as follows:

Service '	20	years	Allowance	£42
39	- 21	117	99	44
"	22	39	,,	46
25 5731 54	23	19	,,	48
ata smit	24	30	39	50

and in like manner the Minutes authorising the allowance of 6-12ths or £60 for service from twenty-five to thirty years, the apportionment shall be

For	25	years	£52
	26	,,	54
	27	,,,	56
ave to	28	33	58
	29	,,	60

and in the same ratio with reference to longer or shorter service.

- 2. Should the term of service not warrant the assignment of an annual allowance, a gratuity may be granted after the rate of one month's salary for each year of service.
- 3. The apportioned rates above-mentioned, giving the maximum allowance for the last year of each period to which the scales of the Minutes are adapted, are however only to be granted in cases of decidedly faithful and meritorious service; but where the testimony as to fidelity, diligence and merit, is in any respect defective, a deduction will be made from the apportioned rate, either of one-fifth or of greater or less amount; or the grant of allowance will be altogether withheld, where there has been obvious negligence, irregularity or misconduct.
- 4. But in cases of special merit, it will remain open to Her Majesty's Government to award the maximum allowance warranted by the scales of the Minutes to the shortest terms of service, or to give such extraordinary recompense as they may deem expedient.
- 5. The services in respect of which superannuations are granted, ought in all cases to have been continuous, unless interrupted by reduction of office, or other temporary suspension of employment, not arising from misconduct, or voluntary resignation of the party.
- 6. In case of suspension of employment on reduction or abolition of office, temporary allowances may be assigned according to the above rules; on condition however that the parties receiving the same will be liable to be recalled into service, and with the understanding that they are to be re-employed as opportunity may offer, in preference to new applicants for office.

Colombo, 12th September, 1849.

By His Excellency's Command,
J. Emerson Tennent,
Col. Secretary.

MINUTE

BY THE GOVERNOR.

With reference to the 12th clause of the Minute of the 3rd July, 1845, directing that an abatement at the rate of Five per cent, should be made from the salary of every Civil Servant whose claim to Pension was thereby established, His Excellency the Governor is pleased to direct, under instructions from the Right Hon'ble The Secretary of State, that from and after the first January next, in the case of Officers holding acting appointments, and drawing half of the salary of their fixed office, and half of that of their acting appointment, such abatement shall in future be paid on the amount of the salary actually received by them, instead of on the full salary of their fixed office, as has hitherto been the practice; and that officers absent on leave, shall also in future pay abatement at the above rate, on the half salary received by them.

His Excellency has further to announce, that in the case of all Officers hereafter appointed to the Public Service, taking leave of absence in the regular manner, with abatement of salary, the period of service upon which their superannuation allowance will be calculated, will be at the rate of one month for every two months of such leave.

Colonial Secretary's Office, Colombo, 1st September, 1852. By His Excellency's Command, C. J. MACCARTHY, Col. Secy.

Examinations in Native Languages.

MINUTE

BY THE GOVERNOR.

I HAVE had under my consideration the mode of examining parties desiring to pass an Examination in the Native Languages.

- It appears to me, that some fixed Rules should be established, defining the nature of the Examination required to be undergone. I therefore propose the following.
- The Student should be required to translate from two or three of the following works:

In Singhalese. - The Bala Prabhodena.

Histories published by the School Commission. The Singhalese Regulations of Government. The Dampiyawa-translated from the Pali. The Pansiye Panas Jateka. The Tupawansa. The Rajawallea.

In Tamil.-The Neethe Venpa.

The Kural,

The Thesavalame or Country Law of Jaffna.

Simon Casie Chitty's Tamil Version of Turnour's Epitome of the History of Ceylon,

The Calladakam.

The Government Ordinances.

The Kambaramayanum.

The Barathum.

- Translations should also be made from written Olas given by the examiners, also translations of some Cutcherry Papers, of some Leases, Mortgage or other Legal Documents, being usual in the Proceedings of Courts of Justice.
- All Translations should be fairly written, sealed and sent to the Colonial Secretary.
- The Student should then be required to translate a Fable from English into Singhalese or Tamil, as the case may be, and to translate part of an Ordinance.
 - The Student should be able to write the Native character well and with fluency.
- He should be able to write Letters and Orders in the Native language on Judicial and Revenue matters.
- 9. The Student should be able to read with ease original communications from Headman and Government Officers, on all Revenue matters, and on all Judicial Reports. Selections from each should be made for this purpose by the examiners.
- 10. The Student should shew a knowledge of the Grammar of the Language, and be able to parse in it.
- 11. The Student should be able to converse perfectly and fluently in the Language in which he is examined.
- 12. I further propose that the Examination should take place half-yearly in the middle of January and the middle of July.
- 13. That a Board of Examiners should be appointed, consisting of two European Gentlemen, one an Officer of Government, two Native Gentlemen, and a President to be named by the Governor.

The Board should declare whether they consider the Student qualified for the Public Service, and give the character of the Examination passed.

Pavilion, Kandy, May 27th, 1852.

G. W. ANDERSON.

MINUTE

BY THE GOVERNOR.

On the recommendation of the Board of Examiners, His Excellency the Governor is pleased to sanction the following modifications of the Rules laid down in the Minute of the 27th May, 1852, for the Examination of Candidates in the Native Languages.

There will in future be two Examinations: the first to qualify the successful Candidates for holding a first appointment in the Public Service; the second to qualify him

for promotion.

At the first Examination, the Candidates will be required to speak with fluency the colloquial language, to read and explain the printed books published by the School Commission, to read and write such documents as are received into, and issued from Cutcherries, and to understand such Notarial or other Deeds as are commonly produced in Evidence in Courts of Justice.

The reading of the Classical books, a knowledge of Grammar, and Translating from English Authors into Singhalese or Tamil, and of Government Ordinances, whether from English into the Native Languages, or vice versa, will form the subjects of a

second Examination; which will not be held until twelve months after the first.

Colombo, August 15th, 1853.

By His Excellency's Command, C. J. MACCARTHY, Col. Secy.

MINUTE

BY THE GOVERNOR.

1. Under Instructions from the Right Hon'ble the Secretary of State, His Excellency the Governor is pleased to notify, that Writers on the Civil Establishment of this Colony will in future date the commencement of their Civil Service, from the period at which they may obtain the Certificate required by the 19th clause of the Minute of the 14th February, 1845, as to their general attainments and proficiency in the Native Languages, and as to their competency to fill an appointment in the Service.

2. From the same period also they will date the commencement of their claim

to Pension.

3. The practice at present in force of Writers paying their contributions to the Pension Fund from the date of their appointment as Writers is to be discontinued; and such contribution will in future commence from the date of their obtaining the Certification.

cate referred to in the first clause of this Minute.

4. The Secretary of State has been pleased to direct the adoption of the above Rules respecting the commencement of the Civil Service of Writers, and of their consequent claim on the Pension Fund, in the hope that it will act beneficially in encouraging young gentlemen nominated to Writerships, in more speedily acquiring the knowledge necessary to qualify them for the duties they may be called upon to perform.

Colonial Secretary's Office, Colombo. 30th July, 1853. By His Excellency's Command, C. J. MACCARTHY, Cot. Secy.

MINUTE

BY THE GOVERNOR.

Under Instructions from the Right Hon'ble the Secretary of State, His Excellency the Governor is pleased to notify, that the Second section of the Minute of the 15th October, 1838, relative to the remuneration to be granted to an Officer appointed to perform the duties of an absent Officer in addition to his own, is to be considered as superseded for the future, by the following Rule laid down in the Book of Regulations for Her Majesty's Colonial Service:—

"If an office be vacated in any Colony, by the death or removal of the holder, or by his temporary absence, the person appointed by the Governor to act in his stead, if holding an inferior situation, may receive half the salary attached to the higher office,

together with half the salary of his own office.

"Should the person so appointed by the Governor to a vacant office, be required at the same time to perform the duties of his own office, he may be allowed half the salary of the temporary office, together with the salary of his own office."

Colombo, August 3rd, 1855.

By His Excellency's Command, C. J. MacCarthy, Col. Secy.

Justices of the Peace.

ART-UNION OF LONDON.

444, WEST STRAND.

PRESIDENT: -The Right Hon. the Lord Monteagle.

George Godwin, Esq., F. R. S., F. S. A., 24, Alexander-square, Brompton; and Lewis Pocock, Esq., F. S. A., 20, Upper Gower-street. - Honorary Secretaries. Thomas Simons Watson, Esq., B. A.—Assistant Secretary.

THE ART-UNION OF LONDON has for its object, to promote the knowledge and love of the Fine Arts, and their general advancement in the British Empire, by a wide diffusion of the works of native artists; and to elevate Art, and encourage its Professors, by creating an increased demand for their works, and an improved taste on the part of the Public. It is under the direction of a Council of the Members, whose services are honorary, and four of whom retire from office every year.

Subscribers of One Guinea are members of the Society for the year for which the subscription is paid. The subscriptions are devoted to the purchase of Pictures, Draw-

ings, Enamels, Sculpture, Medals, Engravings, and other works of Art.

Mr. GEO. A. BRACE, United Service Library, Honorary Secretary for Ceylon.

ART UNION OF GLASGOW.

(Instituted 1841.)

PATRON-HIS ROYAL HIGHNESS PRINCE ALBERT.

The object of the ART UNION OF GLASGOW is, briefly, to aid in extending amongst the Community a knowledge of the FINE ARTS, by the purchase and dissemination of meritorious Works amongst the Members.

A subscription of ONE GUINEA constitutes Membership for One Year. The whole Subscriptions, after deducting the necessary Expenses, are devoted to the purchase of PICTURES, DRAWINGS, SCULPTURES, ENGRAVINGS, and other WORKS OF ART.

Messrs. Brodie Bogue & Co.,

Hon. Secretaries for Colombo.

THE CITY OF GLASGOW FINE ART ASSOCIATION.

(Incorporated by Royal Charter 9th & 10th Victoria, Chap. 48.)

OFFICE OF THE ASSOCIATION, 11, WEST NILE STREET.

James Pearston, Esq., Secretary.

The object of this Association is to promote the knowledge and love of the Fine Arts, and their general advancement by an extensive distribution of the Works of Living Artists, and to elevate Art and its Professors, by creating an increased desire for their Works, and an improved taste on the part of the Public.

Subscribers of Ten shillings and Six pence, are members of the Association for the

year for which the Subscription is paid.

Messrs. MILNE CARGILL & Co., Hon. Secretaries for Ceylon.

ORIENTAL BANK CORPORATION.

No. of Subscribers 65-Pensioners 16-No. of Patients admitted into the Society's Hospital from 1st October 1856 to 1st October 1857, 75.

This Society is supported by Monthly subscriptions of residents of the town of Trincomalie, with the occasional liberal contributions of Officers of the Navy visiting the station, and further by an annual grant of £25 from Government.

The Society has a substantially built and commodious Hospital, with 12 beds, in which the indigent sick are gratuitously treated, fed and clothed, to which is attached a general Dispensary (established June, 1846,) in which medicines of all kinds are furnished gratis to pauper applicants recommended by any member of the Society, and medicines are further sold to the community at large, for a barely remunerative profit on their cost price at Apothecaries Hall, London, from which establishment fresh supplies are annually received.

The Medical Attendant and Dispenser resides on the Hospital premises, and is accessible at all hours of the day and night.

^{*} If more than one child under 3; one quarter of First class fare to be charged for each.

From Ceylon to Alexandria 751.; Do. to Malta, 851.; Do. to Marseilles, 901.; Do. to Gibraltar, 901.

The intermediate rates of Passage money between India and China and vice versa, for Reserved Cabins, will be regulated by the Company's Agents, according to the class of accommodation required.

The rates for reserved accommodation from Gibraltar and Marseilles to India and China, and vice versa, are 51. less for each First Class Passenger than the Southampton rates, and from Malta to India, &c., &c., and vice versa, 101. less for each First Class Passenger

N. B.—The rates fixed for Native servants from Suez and intermediate Ports to India and China, and vice versa, will include the passage back, should the First Class Passenger wish his servant to return to the Port of Embarkation. Two-thirds of these rates to be charged for the single passage only.

The Company do not undertake to convey Second Class Passengers in their Vessels from Southampton and Suez to India, &c., except under special circumstances. All Second Class Passengers by the Company's Steamers will have to Berth and Mess with the ser-

vants of the ship and those of First Class Passengers.

India and China. Intermediate Passages. Fares—Reduced rates for Return Passages within four months.-An allowance of one-fourth of the ordinary rate of passage money may be made to Passengers making the Return Voyage within Four months from the day of landing, on satisfactory proof being given as to the identity of the Passenger, and of having paid the full rates one way.

Baggage.

First class Passengers are allowed in the Company's Steamers only, on either side of the Isthmus, 3 cwt. of personal Baggage free of Freight, and children and servants 1 cwt. 56lbs. each.

The charge for extra baggage is at the rate of £1 per cwt. between Englandor Malta and Alexandria;

and £2 per cwt. between Suez and India.

Passengers for India and China will have to pay the Egyptian Transit Administration in Egypt 14s. per cwt. for conveyance of baggage, should it exceed 3 cwt. each for First class Passengers, and children and servants $1\frac{1}{2}$ cwt. each,

The Egyptian Transit Administration will not forward any package of baggage exceeding 80lbs. weight, and measuring more than length 3 feet-breadth 1ft. 3in.-depth, 1 ft. 2in., with the Passengers to Suez. A departure from this regulation will cause a detention in Egypt to such packages of a fortuight.

Every package of Baggage should have the owner's name and place of destination distinctly painted

Passengers taking Parcels or articles of merchandise in their baggage will incur the risk of seizure, by the Customs' authorities, and of detention for freight by the Company's Agents.

Freight.

PENINSULAR AND ORIENTAL STEAM NAVIGATION COMPANY'S PARCEL TARIFF FROM CEYLON TO MALTA, MARSEILLES AND SOUTHAMPTON.

Parcels under one-quarter of a cubic foot measurement, and 6lbs. weight, will be taken from 5s. to 7s. 6d. each, unless containing valuable articles; and above that measurement, at the following graduated scale, including all charges to the Port of Delivery: except Transit Duty, 4 per cent. on the value of Parcels exceeding £5, and Insurance

	lbs.					s.	d.

nd for every addition	al :	1			1 1000 20	18	0

and for every additional inch measurement, 1s. 6d. will be charged.

If the package weighs more than 20lbs, to the cubic foot, the additional weight will be charged for 6d. per lb.

Parcels should be delivered two days before each Steamer's departure.

No package should exceed 100lbs. in weight, or 5 cubic feet in measurement.

Jewellery, Silver, Watches, and other valuable articles, are taken on their value, the Company reserving to themselves the right to charge by value, or measurement.

Packages exceeding one cubic foot must be in strong wooden cases iron clamped at each end.

Merchandise is charged at the parcels rate, unless taken by special agreement.

Parcels under one quarter of a cubic foot will be taken at 3s. 6d. each, above that measurement at the following graduated scale.

^{**} The Peninsular and Oriental Company cuntract on requirement by the proper Officer, to convey to and from and between any of the places to which any of their vessels are to proceed, a limited number of Officers in the Navy, Army or Civil Service, with or without their wives and children, at rates never exceeding two-thirds of the rates charged for ordinary Passenger of a similar description.

Overland Route,—via Trieste.

The Austrian Lloyd's Steam Navigation Company despatch a first class Steamer direct to Trieste, after the arrival at Alexandria of Passengers by each Steamer from India.

Fares, 1st class (inclusive of all charges) £16 2d class 3d class (Deck) Half fares Children under 10 years, Children under 2 years...

Parties who engage passage in India thereby secure priority in the choice of accommodation.

There are now so many Railroads open through Germany that London may be reached from Trieste in 6 days with comfort, at a cost varying from £12 to £15, inclusive of Hotel charges, &c. &c.

To Travellers who proceed through the Continent without unnecessary stop-

pages, the following is the expense of the journey from Ceylon to London.

From Ceylon to Suez Expenses of Transit through Egypt ... 10 Alexandria to Trieste 16 Trieste to London ... 12 £103

Of these expenses all except the portion from Trieste to London may be paid

in Ceylon.

Under arrangements recently made with the Peninsular and Oriental Steam Navigation Company, such baggage as Passengers proceeding to England via Trieste, may not wish to carry with them across the Continent, will be forwarded to Southampton per P. & O. Company's Steamer at a charge of 10s. per cwt.

Except when there is a Plague or Cholera in Egypt, Passengers land at Trieste,

without detention for Quarantine.

The Revenue of 1857 was about £570,000 including £37,067 from Sales of Land. The total Sales of Land from 1834 to end of 1857 was, 361,430 acres. The Revenue of 1858 is estimated at £571,000, including £20,000 expected from a Pearl Fishery. Export duties of 2½ per cent., abolished in 1848, were re-imposed from 1st January, 1858. The Total Customs Revenue of 1858 is estimated at £200,000. As will be seen from the foregoing Table, the value of 601,000 cwts. of Coffee, exported in 1857, was close on 1½ million, sterling. The Tolls on the Kandy Road alone realized £28,588 in 1857, and sold for 1858 at £31,054.—Colombo Observer's Sheet Almanac for 1858.

* This month has been more healthy than the last, though a dry N. E. wind has been prevalent. The amount of rain but slightly differs from that of the two preceding years.

† This month has been very hot. The little wind there was usually rose about 2, A. M., and dropped again about 9, A. M. The Country round Colombo is quite parched, owing to the unusually small amount of rain. There has been no general sickness.

The weather during this month has been very oppressive, owing to the small amount of rain and wind, though not less than in March, 1856. There has not been any general

sickness.

§ This month has not been very healthy. Cases of rheumatism and fever have been rather frequent, owing to the damp cold nights. The days have been hot and still, except

when the rain was falling; the nights cool.

This month has been very cool and pleasant, owing to the frequent rains; the cases of fever have not been numerous; the rain usually commenced in the afternoon, and stopped towards the morning of the next day. All vegetation is green and flourishing.

This month on the whole has been a pleasant one and very nearny.

** This month has on the whole been very pleasant; the temperature during the day and night has been very similar. On the evening of the 22nd, at 7½ P. M, observed a blood red meteor, size of full moon, pass across the heavens from S. W. to N. W., was visible provided the provided by the provided provided the provided provided provided the provided about two minutes, gave a brilliant light for some seconds.

†† The weather during this month has been oppressive.

‡‡ This month on the whole has been very pleasant and healthy.

§§ The weather this month has on the whole been agreeable; there has been no prevalent sickness.

This month has on the whole been agreeable and healthy; there has been no prevalent sickness. During the severe gale on the 21st, two large and three small vessels were driven on shore, and several others dragged their anchors.

II Owing to the small fall of rain, the vegetation is very withered, but the month has

been very healthy.

Every Foot Passenger (children under 12 years excepted)			
yours excepted)	0	0	$0\frac{1}{2}$

Ports and Harbours.

PORT OF COLOMBO.

This part of the Coast of Ceylon is low, with some isolated hills at a distance in the country. On the northern side of the Town of Colombo the ground rises a little, and is covered with lofty Cocoanut and other trees, which are generally

seen coming from seaward before the Light house or Flag Staff.

The high mountain having on it a sharp cone, called Adams Peak, bears from Cotombo E. $\frac{1}{2}$ S. distant 46 miles. It rises 7,420 feet above the level of the sea, and in clear weather has been seen at the distance of 30 leagues. In the N. E. monsoon, it is generally visible in the morning, and sometmes throughout the day: but it is rarely seen in the S. W. monsoon through the humid atmosphere which prevails in that season.

A brilliant light is exhibited every night from a Lighthouse near the Flag Staff of the Fort. The height of the light above the sea is 97 feet, and it may be seen in clear weather until intercepted by the horizon. It is in latitude 6° 56' 6" North

and in longitude 79° 49' 48" East.

About 7 miles off shore there is a steep bank of coral and sand with 15 fathoms of water over it. It is not more than half a mile broad, but extends several miles in the direction of the coast. About two miles to the westward of the banks soundings are obtained in 28 fathoms water on greenish sand, and close to it there are 23 fathoms. After passing over the bank the water suddenly deepens to 25 fathoms on sand, and from thence the depth gradually lessens as the shore is approached. About three quarters of a mile S. W. by W, $\frac{1}{2}$ W. from the Lighthouse lies the northern and shallowest part of a bed of rocks called the "Drunken Sailor," on which the sea generally breaks, the depth of water being only 6 feet. This ledge is about 100 yards in length, but with the exception of about twenty yards of the northern part, there are 4, 5, and 6 fathoms on it. In the N. E. monsoon, when the sea is smooth and the breakers are not seen, it is prudent not to come within 9 fathoms water, as there are 8 fathoms close to the rocks. The passage within the ledge is clear with 7 fathoms on sandy bottom, but the position of these rocks is so near the shore and so much to the southward of position of these rocks is so near the shore and so much to the southward of the usual anchorage, that no advantage can be gained by steering near them at any time. The currents off Colombo are subject to considerable variation, particularly about the changes of the monsoon, when they are the strongest; but generally there is not so much current as to inconvenience shipping having to communicate with the shore without coming to anchor,

The greatest difference between high and low water recorded at Colombo is not more than 2 ft. 10 inches. In the S. W. monsoon when the mean level of the Ocean is the lowest, the difference between high and low water is from 5 to 15 inches. On those days when the difference between high and low water is not more than 6 inches, the rise and fall has been observed to take place four times

within 24 hours.

The anchorage ground is very good in Colombo roadstead, particularly in 7 and 8 fathoms, with the Lighthouse bearing S. S. E. and the Dutch Church E. by S. $\frac{1}{2}$ S. In the N. E. monsoon merchant ships frequently anchor in $6\frac{1}{2}$ fathoms with the Light house bearing S. $\frac{1}{2}$ E. and the Dutch Church E. by S. $\frac{3}{4}$ S.

Whenever a Pilot is required on board, the charge for his services is 15 shillings.

From the Custom House point a shifting sand bank, or bar, extends to the N. N. W. about 200 fathoms, on which the depth of water is sometimes not more protected by it and the Custom House point from the S. W. wind and sea. When the sea is high it breaks with great force on the bar and renders the passage to and from the shipping in the outer roads dangerous for small boats, ward of the breakers on the bar, by keeping as close as possible to the breakers ward of the breakers on the bar, by keeping as close as possible to the breakers on the rocky point, round which is the landing wharf. But this passage should then more safe to pass to the northward of the breakers. The anchorage off Colombo is so much frequented at all seasons of the year, that little need to be said about it. It may however be as well to mention, that in the S. W. monsoon it is prudent to ride with a long scope of cable, as sometimes the squalls are it is prudent to ride with a long scope of cable, as sometimes the squalls are

PART IV.

strong. Commanders of ships should take special care to secure the small iron pins in their chain cables, as the constant pitching motion caused by the S. W. monsoon swell, has very frequently worked out the small iron pins by the beating of the cables on sandy bottom. Hard wooden pins dipped in white lead have been used successfully, instead of iron ones, by some of the regular trading ships.

J. STEUART, Master Attendant.

PORT OF POINT DE GALLE.

Point de Galle Lighthouse in Latitude 6° 1′ 45″ N., Longitude 80° 16′ E. stands at the southern angle of the Fort, which is built on a rocky peninsula; several rocky islets lay off the Lighthouse, one of which (named Pigeon Island) has 3 Cocoanut trees on it: the harbour is to the eastward of the Fort; watering point at the opposite side of the entrance, bearing from the Lighthouse E. by S. 1 S. 1 mile; it is considered safe at all seasons, but many rocks having from 3 to 20 feet water are scattered over the entrance and inside, rendering it neces. sary for Vessels to take a Pilot: the outermost of these rocks having 12 feet water

on it, bears from the Lighthouse about S. by E. \(\frac{3}{4}\) E. \(\frac{5}{8}\) mile.

The best anchorage in the roads is to the S. W. of these rocks, in from 15 to 18 fathoms water, with the Lighthouse on with the Haycock, or the Church

with Pilot's tree; or, if the marks cannot be distinguished, the Lighthouse bearing from N. by E. to N. N. E. about 1 mile off shore:

S. W. by W. 3 miles from Galle Lighthouse there is a rocky Bank called Gallehoogalle Bank, nearly a mile in extent, having in one place only 16 fathoms water, the general depth on it being 18 to 22; inside this bank there is 29 fathoms and close to it outside, 30 to 35.

Bellows Rock which always breaks, bears from Galle Lighthouse S. 50 E. 21/3 miles, and from Danawatty Point (the extreme of the high land forming the East side of Galle Harbour) S. S. E. 3 E. a large 1 mile, there is 10 fathoms water close

to the Rock on the outside.

Gindura Rock, which is very dangerous, lies about 2 miles directly off the mouth of the Gindura River, and bears from Galle Lighthouse W. by N. 1/4 N. 4 1/8 m.: (it is called by the natives Medda Rock;) there is only 9 feet water on its shoalest part, 4 and 5 fathoms about a cable's length from it all round, and 15 fathoms 1 m. outside: Oonawatty Point kept open outside the breakers of the Whale, clears on the outside; or, the extreme of the land to the Northward kept open of some

The Whale bears from Galle Lighthouse W. 4° N. $2\frac{1}{2}$ miles, and is nearly $1\frac{1}{2}$ miles. from the shore; it always breaks, but in fine weather only once in 4 or 5 minutes, so that a good lookout is then necessary when passing it; there are 7 fms. water

close outside, 12 fms. \(\frac{1}{4}\) mile, and 20 fms. \(\frac{3}{4}\) mile off.

The Little Whale, a small rock above water with 7 fms. close to all round, lies the came line of about half way between the Whale and Galle Lighthouse on the same line of

The Haycock, a high conical mountain conspicuous from seaward is a good land mark for this part of the Coast; it bears from Galle Lighthouse N. by E.

J. H. TWYNAM, Master Attendant.

THE HARBOUR OF TRINCOMALIE.

TRINCOMALIE, situated on the east side of the Island of Ceylon, contains a most spacious safe harbour, and with its small bays and coves is perhaps superior to any in India. Every part of the harbour is land-locked, the anchorage good for

any number of Ships and of any burthen.

Back Bay from the 1st of April to the 25th October is also an excellent anchorage with from 10 to 5 fathoms water good holding ground, sea quite smooth, so that the smallest boats may land. Fort Frederick forms the S. E. point of the bay, the Flag-staff there is in Latitude 8° 35′ 38″ N. and Long. 81° 14′ 52″ E. A good light which can be seen 15 miles of the Flag-staff every A good light which can be seen 15 miles off is exhibited at the Flag-staff every night soon after sun-set; it is 206 feet above the level of the sea, and serves to shoals off Foul Point to the S. E., as well as to lead them to an anchorage in Back Bay. Pilots for the inner harbour are necessary, as there are dangerous

shoals outside and inside; but Back Bay is quite safe. Vessels may lie within 1-3d of a mile from the Custom House in 5 fathoms water. The Custom House is opened for business on the 1st of April and continues until 25th of October when all is changed to the Custom House in the Inner Harbour.

A New Light was exhibited at Flag-staff Point Trincomalie on the night of the 1st Oct. 1845, and is continued every night from sun-set until day light.

The Lantern having a fixed light with two powerful reflectors, when hoisted, is 206 feet above the level of the sea. The Light can be seen 15 miles off from any bearing between Pigeon Island and Foul Point comprehending an angle of 140 degrees.

Foul Foint bears from the Light S. 55° E. distant 5½ miles, and the extreme

of the reef off that point S. 60° E. nearly 5 miles.

Ships coming from the S. E. with a fair wind at night and having made the Light should on no account in passing Foul Point bring the Light to hear to the northward of W. N. W., that bearing will take a Ship more than half a mile to the northward of the reef and in not less than 14 fathoms water. If it is intended to anchor in Back Bay (which Ships may safely do between the middle of March and 25th October) and having brought the Light to hear W. N. W. they may steer directly for it rounding Flag-staff point close (the point being steep to) and anchor in 10 fathoms water with the Light bearing about S. b. E., small Vessels may anchor in 6 or 7 fathoms water with the Light bearing S. E. b. E.

From the Light the outside visible Rock of Pigeon Island, distant about 9 miles, is in a direct line with Elizabeth Point, bearing N. 15° W. Ships coming from the northward and wishing to anchor in Back Bay should be cautious not to bring the Light to bear to the eastward of south; that bearing will lead 2 miles to the eastward of Pigeon Island and nearly a mile to the eastward of the Lively Rocks. These Rocks lie half a mile to the eastward of Elizabeth Point having 4 fathoms water close to. When quite sure of being to the southward of the Lively Rocks, ships may bring the Light to bear S. by E. and anchor in

Back Bay as before directed.

After the 25th October the anchorage in Back Bay is not safe until the middle of March, as there is frequently towards the end of October before the North East monsoon sets in, a heavy swell with variable winds. Ships should not attempt the Inner Harbour during the night except under most favourable circumstances, such as good moon-light and having a person on board possessing local knowledge of the Harbour and the entrance to it. In such a case and being abreast of Flag-staff Point the Light kept N. N. W. 4 W. will lead clear of Chapel Rocks. The extreme Rock which is under water, bears from the Light S. 18° E. distant 2 miles.

JOSEPH HIGGS, Master Attendant.

INSTRUCTIONS FOR NAVIGATING THE GULF OF MANAAR.

Some few years since it was considered a hazardous undertaking for a Vessel of any size to proceed far up into the Gulf of Manaar, the more particularly during the S.W. Monsoon, when it was supposed to be impossible to beat out again. Later experience, however, has shewn that no dangers exist that may not be avoided by ordinary care and attention; and that as regards working to windward against the Monsoons, no difficulty will be experienced if the following instructions be attended to.

In the N.E. Monsoon, that is, from November to March inclusive, fine weather, with land and sea breezes, will be found to prevail on the Ceylon side of the Gulf, where good anchorage may always be selected between Colombo and Chilaw, at 1½ to 3 miles off shore, in 6 to 9 fathoms, sand. Vessels wishing to beat up during the first three months ought therefore to keep over on that side till they have advanced sufficiently far to make certain of their port if bound to the Indian coast, as the breezes there may be expected to blow steadily and strong N.N.E. with a strong lee current. In rounding the Cape Comorin at this

time the Indian shore may be kept on board till abreast of Manupaud Point. a high promontory, with a small white Church erected on its summit. A Vessel may then stretch across with advantage, and probably in the next tack fetch Tu-

ticoreen, the only port on the Indian coast frequented by large Vessels.

Small Vessels of light draught will also find this the easiest method of working up; and if bound to Paumben had better keep the Ceylon shore till abreast of Calpentyn, which they may know by the three long hills of Kodramallai, the only ones near the coast. They can then stand across, and make Paumben either by the eastern channel between the Island of Ramisseram and the Reef and Island south of that port, or by the western channel between Freshwater and

Anapaar Islands at Valinookum Point.

In the S.W. Monsoon a Ship ought to keep over on the Indian side till near Manapaud Point, when she will generally be able to fetch to windward of Colombo, and be clear of all dangers. The only safe place for Vessels of size to anchor in on the Ceylon coast, during this Monsoon, is at Colombo, where the current from the Kalany Ganga or Mutwall River, running to windward, takes much of the strain off the cables of Vessels riding there. Should one nevertheless part, or find it necessary to slip, she may seek safety by standing across the Gulf to Tuticoreen, which, being situated on the weather side, affords good shelter and anchorage. A fixed light, seen 8 or 10 miles off, was erected on Hare Island at this port last year with a view to facilitate the approach to the anchorage during the night; and the instructions relative to it are herewith republished.

Small craft working down from Paumben will do well to keep inside the Islands till they reach the Western entrance of the inland navigation at Valinoo-kum Point. They can now work down near the coast as f r as Manapaud Point, when their fetching Colombo on the starboard tack may be considered certain. Colombo Flagstaff, which is close to the lighthouse, is in 6° 56' 6" North

latitude, and 79° 56' 6" East longitude. The anchorage, as given by Captain Steuart, the Master Attendant, is in 7 to 8\frac{3}{4} fathoms during the S.W. Monsoon, with the lighthouse S.S.E. Easterly, and the Dutch Church, a large building in the bottom of the bay, the upper part of which having a thatched belfry may be seen over the houses of the Town, bearing E. by S. In the N.E. Monsoon Vessels may anchor farther in, with the light S. $\frac{1}{2}$ E. and the same Church E.S.E. in $6\frac{1}{2}$ to 7 fathoms, sand and mud in each position. The Drunken Sailor, a patch, of rocks about 100 wards large and 20 broad with only 6 feet over it in patch of rocks about 100 yards long and 20 broad, with only 6 feet over it in some parts, is situated 1,150 yards S.W. by W. ½ W. of the Flagstaff, and 1,000 yards off the nearest shore. It has from 6 to 9 fathoms close round it.

The Harbour, which is only used by small craft, is well protected during the S.W. Monsoon by the Custom House Point, behind which they anchor in $2\frac{1}{2}$ to $3\frac{1}{2}$ fathoms, sand, with it bearing from S.W. to W.S.W., and Mutwall Point N. by E. to N.N.E. A sandy spit extends from the first-named Point in a northerly direction, with $1\frac{1}{2}$ to $2\frac{1}{2}$ fathoms over it and 5 to 6 fathoms close outside. avoid this the Dutch Church ought to be kept E. by S. 1/2 S. till the Custom House bears S. by W.

Negombo Fort, off which Vessels may shortly have to anchor for the purpose of shipping Sugar the produce of estates lately brought under cultivation in its vicinity, is in 7° 12′ 9″ North latitude, and 79° 53′ East longitude. The best anchorage is a mile off shore, with the Fort about East, Northerly, just clear of Negombo rocky point, in 6½ to 7 fathoms, sand; but as this sand is not deep, and the stream of the Negombo Lake, which empties itself here, sets to the North, I would decidedly warn Vessels from anchoring here during the S.W. Monsoon, or from May 10 August inclusive. Rocks awash extend from the Point North, I would decidedly warn Vessels from anchoring here during the S.W. Monsoon, or from May to August, inclusive. Rocks awash extend from the Point N. by W. ½ W. for 400 yards, and the ledge may be then traced in the same direction, with 3, 4, and 5 fathoms over it for 2¾ miles further, till it terminates in a coral patch, having 9 to 12 feet over it, 2½ miles off shore. Small craft can cross this ledge, and anchor in 2 to 3 fathoms, with Negombo Point S.W. ½ W., and the Fort S.E. by E., from ¼ to ½ mile off shore.

Chilaw Bungalow, in 7° 34′ North latitude, and 79° 51′ 29″ East longitude, may be known by its high red tiled roof, seen 8 or 9 miles off in clear weather. On the Charts now extant some rocks are placed near this at some distance from the shore, but they were found to be not more than ¾ of a mile off, and consequently cannot be considered as forming any obstacle to general navigation.

consequently cannot be considered as forming any obstacle to general navigation. They are situated 5 miles due North of the Bungalow; and are in a line between it and the next Point. Twenty-one miles North of the Bungalow uneven soundings on rock, to as little as $3\frac{1}{4}$ fathoms are found from 3 to 4 miles off shore, with 6 and 8 fathoms immediately outside. Vessels of size therefore ought to be careful not to some within this distance of the land hereabouts, although to be careful not to come within this distance of the land hereabouts, although

small craft can at all times go over the shoal,

Dutch Bay, in 8° 19' North latitude, and 79° 50' East longitude, is well sheltered from all winds, but more particularly from the S.W., which are the strongest on the coast. Vessels can anchor here in 21 to 3 fathoms, stiff mud, close inside the neck of sand that forms the Western side of the Bay, with a Cocoanut tope and house called Paringethoray bearing S.S.W. The only dangers in the approach to it are a rocky patch, with $2\frac{3}{4}$ over it at low water, 2 miles W.S.W. of the North end of the neck of sand before mentioned, and some shoal water 3 miles N.N.W. off the same Point, and 21 miles West of some Palmyra trees, a few of which are leafless, on the Island of Karateevo. This last extends North and South about 2 miles, with an average breadth of one, having from 3 feet to 3 fathoms, with a small patch of sand, generally dry, due West of the above trees. There are 4 to 5 fathoms to the Eastward of this reet, but no person, without being well acquainted with the coast, ought to attempt the passage inside. From seaward the North end of the neck of sand ought to be brought to bear S.E. ½ E., when it can be steered for, and passed within 50 yards, carrying 3 to 4 fathoms, sand.

Very good anchorage in the S.W. Monsoon may also be found under the lee of Kodramallai Point, in 8° 32' North latitude, and 79° 56' East longitude, which may be known by the three long hills seen over the low land of Karateevo. In steering for this anchorage, the North end of the hills ought to be kept about E. by S. till well past the island, when the anchor may be let go in $2\frac{1}{2}$ to $3\frac{1}{2}$ fathoms, sand, with the rocky promontory bearing S.S.W. to S.W., $\frac{1}{2}$

to $1\frac{1}{2}$ mile off.

No Vessels ought to proceed on the Ceylon side further towards the head of the Gulf than this, as there are many shoal places at some distance from the shore, and no good holding ground. In the S.W. Monsoon a strong current is found setting to the Northward over Adam's bridge, which abates as the Indian coast is approached; and a confused sea is generally found to prevail near Manaar.

The Eastern entrance to Paumben is in 9° 15' 30" North latitude, and 79° 17' East longitude. Some small islets are situated at the East end of the reef between which and the island of Ramisseram the channel leads. has lately been erected on the Northern limit of the shoal water inside these islets, between which and Ramisseram deep water is to be found. The south end of the cut through the horse-shoe bank, by which Vessels have to pass in going through the Paumben channel, bears from this pole E. by N.

A fixed light has lately been exhibited at Paumben, seen 11 to 12 miles off in clear weather, respecting which directions have been separately published, and which are recommended to the notice of Mariners frequenting the port.

The Western entrance to Paumben is situated in 9° 9' North latitude, and 78° 40' East Longitude, lying between Valinookam Point, on the Main coast of India, and the small island of Anapaar, which last must not be approached nearer

than a mile till the South end bears South of East.

The passage will then be entered, when a straight course for Keelakarry at N.E. by E. may be kept, care being taken to avoid some reefs nearly awash which lie off Erawaddy Point, the easternmost limit of the deep bay opposite the entrance just described. Five and six fathoms will be found at this entrance, shoaling to 3 farther in, with an occasional cast of $2\frac{1}{4}$, sand. The best anchorage at Keelakarry is in $2\frac{3}{4}$ to 3 fathoms, stiff mud, with a detached ruin East of the town bearing North, and some large terraced houses N.W. Pilots here come on heard to take vessels to Pourphen, which lies 26 wiles for the contract to the Eastward. board to take vessels to Paumben, which lies 26 miles farther to the Eastward; but should a Vessel proceed without such assistance, the following directions must be followed.

Steer for a little outside the next Point (Naagimundel) till a small tope be. tween a hillock at the mouth of a rivulet and an old ruined temple bears North. Then stand across about S.E. 1/2 E. for a little outside the West end of the next island (Talliari). This leads over the deepest part of a spit in $2\frac{1}{4}$ fathoms, with 7 feet on each side, where a buoy will shortly be moored to indicate the channel. Two bungalows at the next Point on the Main will now be seen, and when the bar has a lead of the channel of t and when they bear N.E. $\frac{1}{2}$ E. steer E.N.E. till they are passed, when due East will take a Vessel to the buoys on each side of the passage at Ramasawmy's Choultry. To avoid a sandy knoll with only 7 feet over it, the Southern of these buoys ought to bear E. by N. when about $\frac{1}{4}$ mile off; and after passing between them steer about East, for a high beacon erected on a patch of rocks. Leaving this 50 to 100 yards to the Southward stand on for the North and of the past this 50 to 100 yards to the Southward, stand on for the North end of the next island, Pulleeteevo, and round it at about 1 mile off, keeping E.N.E. till the opening between Pulleeteevo and the next Island bears South; then steer East, and

anchor near the sand bank channel which has a buoy to mark its position. No Vessel drawing more than $8\frac{1}{2}$ feet ought to attempt this navigation without a Keelakarry Pilot.

Tuticoreen Light is in 8° 47' 17" North latitude, and 78° 14' 1" East longi-

tude. The following are the directions respecting it before adverted to.

A Vessel making the Port at night may anchor with it bearing from W.N.W. to W. by S. about $1\frac{3}{4}$ to 2 miles off shore, where good holding ground will be found in 6 to $6\frac{1}{2}$ fathoms. At $3\frac{1}{2}$ miles distance with the same bearings the ground is foul, on Pearl banks.

In approaching from the South, the light may be kept about N. N. W. till within 3 or 4 miles, when the above anchorage may be selected; but should a Vessel suddenly deepen her water from 7 or 8 fathoms to 12.15, or 20, she should immediately steer North till she makes the light, taking care to keep further to seaward if it bears North of N. N. W. The outer part of this deep water lies a little to the North of the head of the Coilnapatam reef, and bears S. by E. 10 miles from the Tuticoreen Light.

From the North a Vessel may keep the light about S. W. till within 3 or 4 miles, when she must steer more out for the anchorage; but in no instance ought the water to be shoaled under 6½ fathoms, excepting with the bearings on

for the anchorage, and then not under 6.

In the N. E. Monsoon Vessels should lie with a good scope of cable out, as although the seas are not heavy, they are sharp, and occasion a chain to jerk, The sea breeze at this time blows on the reef, and a second anchor, with chain

ranged, ought always to be kept ready for letting go.

In the S. W. Monsoon, which usually lasts from the middle of May to the middle of August, the Port may be made without fear, for although the winds are very violent, they are invariably off shore from W. to S. W. accompanied by smooth water. At this time Vessels may approach the reef to 5 fathoms; but should always have a stream anchor to seaward, as occasionally, during the lulls of the Monsoon, a light air comes in from the Eastward.

As a rule, Vessels of size ought not to approach the land above Tuticoreen nearer than 6 or 7 miles, as $2\frac{1}{2}$ or 3 fathoms are found 5 miles off in some places. When some large clumpy trees at Putnurmadoor, seen 10 miles off, and when no other object on shore is visible, bear North of West, the shoal water

is to the Northward.

There are two channels for small craft into Tuticoreen harbour, but that to the North is so intricate as to be seldom used. The Southern one leads between the southernmost island and the mainland, the reef connecting them being crossed in 12 to 14 feet at distance of $\frac{1}{2}$ to $1\frac{1}{2}$ mile of the island. This being passed, a course may be steered for Devil's Point on the Main, after closely rounding which a small Vessel may stand direct for the town of Tuticoreen, carrying 11 to 9 feet. Before passing Devil's Point $2\frac{1}{2}$ fathoms are found, sand and mud.

At the distance of $2\frac{1}{2}$ miles due East of the Pennacoil tope, a scanty tope to the south of a large ruined building. 9 miles from Devil's Point, is situated the inner edge of an extraordinary natural basin in the rocks, $4\frac{1}{2}$ miles East and West, and averaging $1\frac{1}{4}$ miles in breadth: the outer part being the broadest and deepest. The bottom is composed of fine sand and mud, in 7 fathoms on the Western, to 18 and 20 fathoms on the Eastern extreme, from which it suddenly shoals to 9, 8, and $7\frac{1}{2}$ fathoms on a Pearl bank. In standing up the coast during the night with a scant wind, this is good ground for ascertaining a Vessel's position, as no similar spot exists from Paumben to Comorin. From the outer part, in 15 to 20 fathoms, the anchorage off Tuticoreen bears N. by E. $9\frac{1}{2}$ miles.

Good anchorage in 3 to 4 fathoms, mud, with this tope bearing West 1 to $1\frac{1}{2}$ mile, is to be found here during the Southerly winds under the lee of a reef which commences $2\frac{1}{2}$ miles N. E. by N. of the next point (Coilnapatnam), and continues with little exception to Cape Comorin. As far as Manapaud Point this reef varies in its distance from the land from 1 to $2\frac{3}{4}$ miles, but thence to Comorin it seldom exceeds $\frac{1}{2}$ a mile. The head of this reef lies S. by W. $10\frac{1}{2}$ miles from Tuticoreen Light.

Trichendore Point, in 8° 29' 55" North latitude, and 78° 9' 51" East longitude is 18 miles S. by W. Westerly of Tuticoreen Light, and may be known by its having a high dark Pagoda on its extremity, seen in ordinary weather 12 to 18

miles off.

Manapaud Point, situated $8\frac{1}{2}$ miles S. S. W. $\frac{1}{4}$ W. of the Trichendore Pagoda, is a high sandy promontory jutting out boldly into the sea. It has a small whitewashed Church on its summit, visible in clear weather 12 to 13 miles off, which appears at first like a ship under sail. Some foul ground in 4 to 10 fathoms is

situated off this point, extending E. N. E. and W. S. W. 10 miles, with an average breadth of 1 mile.

The following are the bearings of the two shoalest parts:-

Inner shoal part.

Central shoal part.

Manapaud Church......N. 54° W. 8 miles Trichendore Pagoda......N. 12° W. $12\frac{1}{2}$,, } 4 fathoms sand.

There are many other patches with 51 and 6 fathoms over which Vessels might pass, yet the safest plan when going between the reef and the Point is not to bring the Church to the West of North till within 2 or 3 miles of it. An

E. N. E. course will then take a Vessel out clear.

Cape Comorin, which is placed by Colonel Lambton in his Trigonometrical survey in 8° 4' 35" North latitude, and 77° 34' 46" East longitude, rises in a gradual slope, is covered on the East side with Palmyra trees, and may be easily distinguished by the reddish appearance of the soil, and a large white Choultry situated near the beach. Two large rocks with a small one outside, on which the sea at all times breaks with much violence, stretch to the distance of $\frac{1}{4}$ mile from the shore. They are steep to and may with a fair wind be approached within $\frac{1}{4}$ mile in 8 or $8\frac{1}{2}$ fathoms, but with scant wind caution is necessary, as the current sets rapidly round the Point, and may drift a vessel into danger.

The breezes in the Gulf of Manaar are generally stronger than the adjacent coasts, the only moderate months being April and October; yet if the instructions already given be attended to, no difficulty will be found in working up or down against them. The N. E. Monsoon sets in with force about the middle of November, and lasts till the end of January, bringing with it a current of from 20 to 30 miles a day to the S. W. It blows steadily from N. N. E. along the Indian shore, but on the opposite side is modified into land and sea breezes, Indian shore, but on the opposite side is modified into land and sea breezes, with very fine weather. In February land and sea breezes commence on the Indian side; and by April the general set of the wind in the Gulf will be found to have drawn round to the Southward, the sea breezes being S. E. to S. W., according to the coast on which they prevail. These now increase in force till about the middle of May, when the regular S. W. Monsoon sets in, blowing with great violence from W.S. W. on the Indian coast, and S. W. on the Ceylon coast, where it commences rather earlier, and is attended with heavy falls of rain, thunder and lightning. In August the strength of the Monsoon abates, but strong Southerly winds are still experienced in this and the next month, becoming lighter as the winds are still experienced in this and the next month, becoming lighter as the season advances. Variable and gentle breezes, with smooth water, may usually be expected in October, lasting till the setting in of the N.E. Monsoon, which is ushered in on the Indian side by 15 or 20 days of heavy rain.

The current will generally be found to set with the wind in the strength of

the Monsoons; but this is not invariably the case. Care and attention must therefore be paid to the soundings, and unless a good Pilot be on board, a Vessel ought not to shoal her water during the night to less than 12 fathoms above or 18 or 20 fathoms below Manapaud on the Indian coast; or to less than 10 fathoms above and 20 below Colombo, increasing the depth to 40 till abreast of Point de Galle on the Ceylon coast; excepting of course her position be ascertained by the bearing of the light at Tuticoreen or Colombo.

Average high water occurs at 1 p. m. on full and change-ordinary rise and fall 18 to 24 inches-at springs 30 to 36 inches. The flood sets in about E. N. E., and the ebb about S. W., but their direction is greatly influenced by the wind. The variation of the compass may be stated at about 1° Easterly.

All the above longitudes are calculated on the assumption of the Galle Flagstaff

being in 80° 16' East.

JOHN J. FRANKLIN, Late in charge of the Manaar Surveys

Madras, May 21st 1846.

PAUMBEN LIGHT HOUSE.

The facilities for the passage of Vessels through the channels at Paumben, having been considerably increased of late, the following notice is published for general information:—

Paumben Light House is in

Latitude 9° 17′ 39″ N.

Longitude 79° 12' 34" E.

Assuming Galle Light to be in 80° 14' 20" E.

The light is placed on a column erected on a Hill to the Eastward of the Town of Paumben, is 84 feet above the level of the Sea, and in ordinary weather should be seen from the deck of a small craft, such as usually navigate the Gulf of Manaar and Palks Bay, from 11 to 12 miles off.

In making Paumben from the North during the night. Vessels may run for the light bearing S. W. to E. S. E., keeping rather out in coming from the Eastward, if under 6 fathoms, as the water shoals suddenly after that depth is obtained off the coast of Ramisseram.

The best anchorage is with the light bearing from S. E. $\frac{1}{2}$ E. to E. S. E., $\frac{1}{2}$ mile to 1 mile off, in $3\frac{1}{2}$ to 4 fathoms, sand and mud, good holding ground. The Northern entrance to the Channel, which is indicated by a Black Buoy, will then be from $\frac{1}{4}$ to $\frac{1}{2}$ mile off.

In approaching during the night from the South, care must be taken to avoid the 2 Fathom Rock, from which the light bears N. 14° W. 17 miles, and which has $3\frac{1}{2}$ to 5 fathoms in its immediate neighbourhood. If from the Westward, a vessel ought to bring the light North, and run with that bearing till about 5 miles off, which, after taking her over a rocky ledge having $3\frac{1}{2}$ to $5\frac{1}{2}$ fathoms on, will place her in $5\frac{1}{2}$ to $6\frac{1}{2}$ fathoms, mud and sand, about $1\frac{1}{2}$ mile from the reef extending Westward from the shingle Islets. She may then steer N. E. by E. $\frac{1}{2}$ E., till the light bears N. W. by W., when she can run for it till in smooth water, and anchor in 4 to 5 fathoms, sand and mud, between the land and shingle Islets before mentioned.

If the light is made from the Eastward, a vessel ought to keep it N. N. W. $\frac{1}{2}$ W., edging out or to the North a little as she shoals her water to 4 fathoms, to avoid the shingle Islets, the Eastern end of the Reef off which bears from the light S. 24° E. $3\frac{1}{4}$ miles. She may then anchor as before. This course would take her very near a patch of rock with 3 fathoms on, but as the Craft using the Channel are of light draught, no fear need be entertained of striking on it.

These instructions for the South Entrance are intended for the use of Vessels nearing the Port during the S. W. Monsoon. In the N. E. Monsoon the Island of Ramisseram, which may be approached on this side to within a cable's length, becoming a weather shore, the water is sufficiently smooth to allow of Vessels anchoring anywhere, and the bearings above given clearly shew the dangers to be avoided.

The least water in the Paumben Channel at the lowest spring tide is $8\frac{1}{2}$ feet, but as the average rise on this is 26 to 28 inches, and in October, November and December, 30 to 36, and at times even 42 inches, Vessels drawing 10 feet can safely make use of it. Native Pilots are always ready to carry Vessels through; and to obviate any inconvenience which might be felt by Commanders unable to speak their language, a Hindoo-Briton is employed as Head Pilot, whose services will be always available.

By order of the Marine Board, JOHN J. FRANKLIN, Secretary.

Madras, Marine Board Office, 23rd April 1852.

LATITUDES AND LONGITUDES,

LATITUDES AND LONGITUDES,	Remarks.	The Latitude is the mean from 348 altitudes, taken at Mr. Templeton's house, and reduced to the Flag Staff. The Longitude is derived from that of Madras, and other well fixed positions on the Coast, from runs of the Melville Curassao Benares and Royal Tiger. A comparison of very exact observations made during the year 1840 has required the Longitude formerly given to be increased 67.	Recent observations. Approximate. Recent observations. Do. Do. Place.	Matura-Belligam Bay—Galle——————————————————————————————————	

The Longitude of Madras has been taken from the table at p. 606 of the Nautical Almanac for the year 1854, and as this differs 2' 10" from that given in the Ceylon Almanacs for former years, it has been necessary to add this difference to the longitudes of the places included

The Officers of Her Majesty's Navy, and the Masters of Merchant Vessels, are earnestly requested to forward, under cover to the Colonial Secretary, any information they may collect, which can tend to increase the accuracy, or extend the limits of the preceding Table.

Shipping Entelligence.—Signals.

Figures 1 to 0 the same as in Marryatt's | C. Numeral Pennant. Code of Signals.

A. First distinguishing Pennant.

B. Second distinguishing Pennant.

D. Telegraph.

E. Rendezvouz.

LOCAL SIGNALS-COLOMBO.

a, Ship; b, Barque; d, Schooner; c, Brig; e, Sloop, cutter, or boat; f, Steamer; 3 masted at up-

g, one French Ship; h, two Barques; i, one masted Steamer and a Barque;

per yard, 2 masted at lower j, one Ship and an American Ship, both of War;

k, two Schooners and a Sloop; l, two American Brigs: m, one Schooner and a two

masted Steamer of War; n, 3 Sloops and an American Schooner.

GENERAL MEMORANDUM.

- The upper yard is used for notifying the approach of three masted vessels only.
- 2. Square flags represent ships and brigs; swallow-tailed, barques; and pendants, schooners and sloops.
- 3. The number of masts in the vessel approaching, corresponds with the number of colours in the flag.
- Foreign ships are known by the national colour hoisted above the flag denoting the nature of the vessel.
- A blue pennant over a flag signifies a ship of war, over the national colour a foreign one. 5.
- Balls only denote the number of vessels of the same kind in sight, they are never 6. hoisted above the flag they belong to: one denotes two, two three, &c.
- 7. A white pendant pierced with a red ball hoisted on the mast head indicates the Pigeon, or the arrival of the English Mail at Point de Galle; and a white flag pierced with a red ball indicates the arrival of the English Mail at Colombo.

LOCAL SIGNALS—TRINCOMALIE.

Blue Swallow Tail flag Strange Sail. Blue Pendant Ship or Barque. Red do. Brig. White do. Schooner. Black Ball Cutter. Steam Vessel. 2 Black Balls Union Jack over Blue Pendant Ship of the line. Union Jack over Red Pendant Frigate.

Sloop of War. Union Jack over White Pendant Union Jack over two Balls War Steamer.

Union Jack over one Ball Ship in Offing requires a Pilot.

When two or more vessels of the same rig are in sight the proper numeral flag over the Pendant or Balls will shew the number of Vessels.

4910 What ship is that?

3491 Shew your number.

3248 Name unknown.

3267 What nation do you belong to?

3915 Was the port you left healthy?

3760 What passage have you had?

3765 What passengers have you?

1326 What does your cargo consist of?

1304 Is the Captain on board?

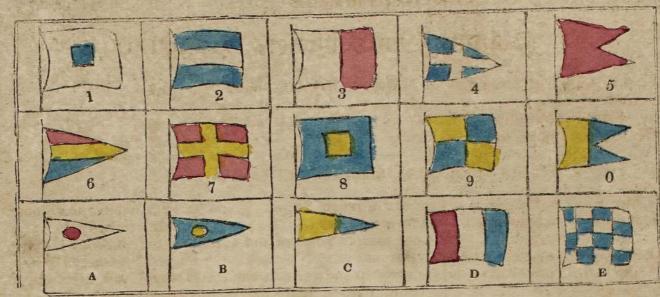

1057 Send a boat on shore.

7138 Arethere any people on board of her?

964 Have you a clean bill of health from whence you came?

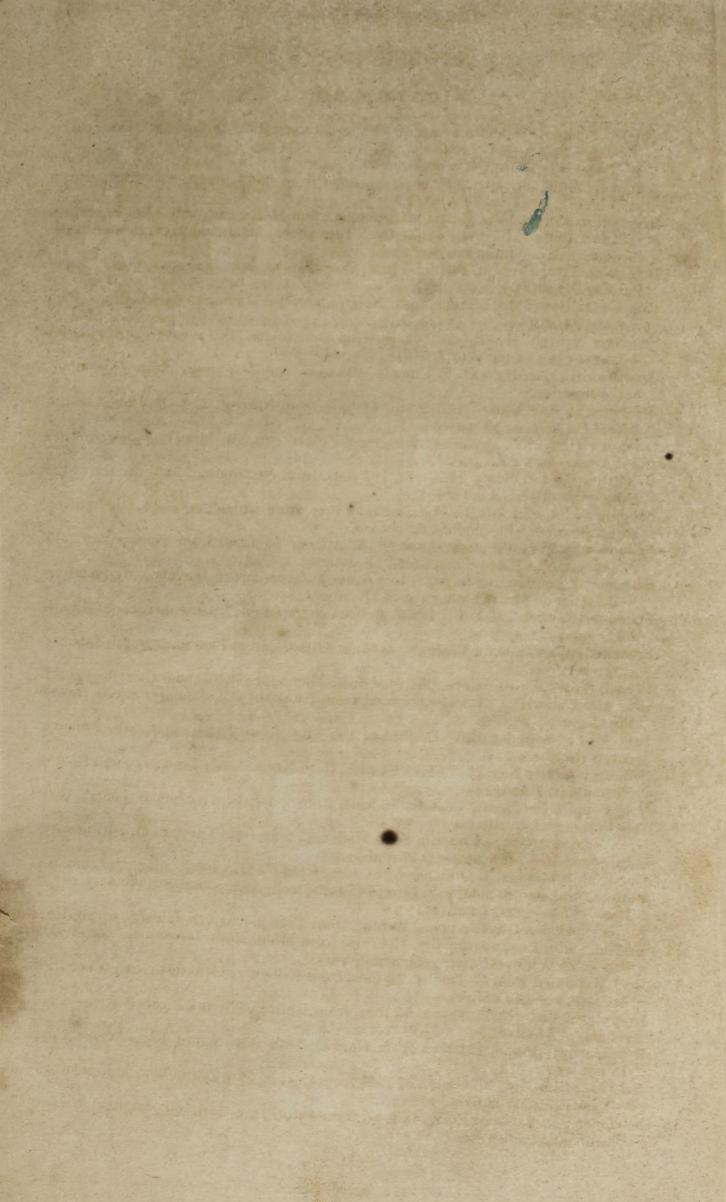

5018 Have you many sick on board?

SIGNALS.

Code of Local Signals, for notifying the approach of Vessels at the Flag Staff of Colombo.

Arrivals in 1857.

COLOMBO.

January 7-Schooner Jagades Passa, M. Pulle, 59 tons, from Quilon, 10th Dec., cargo Dry fish—Passengers, 2 natives.

Brig Hostel, Viagolan, 102 tons, from Mangalore, 22d Dec., cargo Rice.

Schooner William Robert, Manuel, 34 tons, from Tutocoreen, 6th Jan., cargo

sundries-Passengers, 34 natives.

8-Brig Sailors Friend, F. L. Rossignal, 146 tons, from Melbourne, 18th Oct., in ballast. Brig Ade Letchmy, Caytan, 84 tons, from Tutocoreen, 7th January, cargo sundries-Passenger, Mr. Winter and 8 natives.

Brig Wanderer, Rosairo, 93 tons, from Negapatam, 5th January, cargo Rice-

Passengers, 10 natives.

Brig Cader Box, Salis, 83 tons, from Negapatam, 3rd January, cargo Rice-Passengers, 24 natives.

Schooner Nymph, M. Francis, 33 tons, from Tutocoreen, 7th January, cargo sundries

-Passengers, 14 natives.

American Barque, Hayard, F. Lincoln, 403 tons, from Calcutta, 26th December, cargo sundries.

9-Schooner St. Ana Maria, Maslemany, 71 tons, from Karical, 21st December, cargo Rice—Passengers, 19 natives.

Schooner Henrietta. Madar, 49 tons, from Tutocoreen, 8th January, cargo sundries

-Passengers, 8 natives.

Brig Amorthe Letchemy. M. Pulle, 104 tons, from Negapatam, 5th January, cargo Rice—Passengers, 2 natives.

Schooner Mohodin Box, C. Mahomed, 58 tons, from Colesegrapatam, 8th January,

cargo sundries—Passengers, 60 natives.
10—Schooner St. Megal alias St. Michael, A. Appen, 85 tons, from Negapatam, 5th January, cargo Rice-Passengers, 18 natives,

Schooner Elizabeth, Santiago, 37 tons, from Tutocoreen, 9th January, cargo sundries

—Passengers, Mr. O'Flaherty, and 13 natives.

11-Schooner Emerald, S. Pulle, 101 tons, from Negapatam, 7th January, cargo Rice-Passengers, 12 natives.

French Barque Valle de Basle, V. Avogna, 429 tons, from Pondicherry, 7th January,

cargo sundries.

French Ship Louise, Belard, 381 tons, from Mangalore, 4th January, cargo general. 12-Brig Alle Cader Box, A. Pulle, 91 tons, from Karikal, 7th January, cargo Rice-Passengers, 5 natives.

Brig Mohodin Cader Box, D. Inasse, 106 tons, from Tranquebar, 8th January,

cargo Rice.

Schooner Ameer Box, M. Lebbe, 84 tons, from Karikal, 4th January, cargo Rice— Passengers, 7 natives.

13-Brig Comere Letchemy, Bastian, 92 tons, from Valagany, 7th January, cargo Rice —Passengers, 5 natives.

Grab Schooner Cottya Coderin, Sego Madar, 35 tons, from Tavepatam, 9th January,

cargo sundries-Passengers, 17 natives.

Dutch Ship Phænix, J. Johansen, 165 tons, from Cochin, 9th January, in ballast. Barque Mohoden Samdany, S. Dore, 148 tons, from Negapatam, 8th January, cargo Rice-Passengers, 4 natives.

Schooner Hyderally, T. Appen, 49 tons, from Tranquebar, 7th January, cargo Rice. 16-Brig Moyedin Box, Seeramally, 154 tons, from Mahe, 26th December, cargo Dry

fish and sundries-Passengers, 8 natives.

17-Brig Mahomed Box, C. Tamby, 72 tons, from Killicary, 15th Inst., cargo sundries -Passengers, 49 natives.

Brig Royal Victoria, P. Neyna, 55 tons, from Karical, 7th inst., cargo Rice-Passengers, 17 natives.

Brig Harriet, Roopo, 121 tons, from Karical, 10th inst., cargo Rice-Passengers, 15 natives.

Brig Mohodin Box, M. Casim, 67 tons, from Cochin, 29th December, cargo sundries -Passengers, 11 natives.

18-Schooner Fancy, Croos Pulle, 42 tons, from Tutocoreen, 15th inst., cargo sundries-Passengers, 5 natives.

19-Brig Waterloo, Teremale Pulle, 150 tons, from Negapatam, 14th inst., cargo Rice -Passengers, 15 natives.

20-Ship Lady MacDonald, S. O. Cloete, 678 tons, from Morton Bay, 14th November, in ballast.

Schooner G. A. Roche, C. Fonseka, 86 tons, from Cochin, 14th inst., cargo sundries - Passengers, Mr. F. Cummins and 7 natives.

21-Brig Hydroos, Maulo, 78 tons, from Quilon, 9th inst., cargo Dry fish-Passengers,

14 natives.

Brig Richard, H. W. Wales, 312 tons, from Calcutta, 8th inst., cargo Rice and sundries-Passengers, M. J. Simons and 2 natives.

Brig Mera Mohedin Samdany, Ibrahim Saib, 51 tons, from Mutopattoo, 15th inst.,

cargo Rice and Paddy-Passengers, 20 natives.

Schooner Rahamany, Poorna, 53 tons, from Tutocoreen, 17th inst., cargo sundries -Passengers, 53 natives.

22-Brig Mahomed Saduck Samdany, A. Pakeer, 86 tons, from Killicary, 19th inst., cargo sundries-Passengers, 22 natives.

Brig Maria, M. Pulle, 58 tons, from Negapatam, 19th inst., cargo Rice-Passengers, 27 natives.

Schooner Menachy Sangevey, Madar, 44 tons, from Killicarre, 21st inst., cargo

sundries-Passengers, 17 natives,

Schooner Mohodin Box, A Francisco, 43 tons, from Jaffna, 20th inst., cargo sundries-Passengers, Mrs. Kriekenbeck, Messrs. Langslow and son, Messrs. J. S. Kriekenbeck, Leembruggen, F. Toussaint, J. Koch and Master Koch, and 31

23-Schooner Saloe Maria St. Anthony, A. Marko, 60 tons, from Mutopatto, 21st inst. cargo Rice-Passengers, 2 natives.

24-Barge Surrey, R. Peek, 461 tons, from Cochin, 17th inst., cargo Oil and sundries. 25-Schooner Royal Family, Valtesar, 70 tons, from Negapatam, 21st inst., cargo Rice-Passengers, 19 natives.

Brig Ameed Box, Valtean, 102 tons, from Negapatam, 22nd inst., cargo Rice-

Passengers, 14 natives.

Schooner Hamido, Meya Pulle, 91 tons, from Colesegrepatam, 23rd inst., cargo sundries-Passengers, 80 natives.

26-Schooner Mohodin Box, M. Mohodin, 31 tons, from Tutocoreen, 21st inst., cargo sundries-Passengers, 31 natives.

Schooner Mahomed Cader Box, C. Rauten, 80 tons, from Colesegrapatam, 24th inst., cargo sundries-Passengers, 102 natives.

Brig Menachy Soondrum, S. Pulle, 105 tons, from Tranquebar, 20th inst., cargo

Rice-Passengers, 8 natives.

Barque Mahomed Samdany, M. Lebbe, 102 tons, from Adrampatam, 19th inst., cargo Rice--Passengers, 6 natives.

27-Schooner Prebunta Maria Joseph St. Anna, A. Pulle, 72 tons, from Negapatam, 24th inst., cargo Rice-Passengers, 9 natives. Schooner St. Anna Maria Catherina, A. Philip, 26 tons, from Belligam, 15th inst.,

cargo Sapan wood.

28-Schooner Cader Box, Navis, 40 tons, from Killicarre, 24th inst., cargo sundries-Passengers, 9 natives.

Ship Scutaria, Ed. Montgomery, 586 tons, from Cochin, 23rd inst., cargo Cocoanut Oil-Passenger, Lieut. Galbraith.

Brig Fattal Jebud, M. Tamby. 46 tons, from Quilon, 14th inst., cargo sundries-Passenger, I native.

Barque Vera Panchally, C. Mohodin, 69 tons, from Quilon, 14th inst., cargo Dry fish-Passengers, 18 natives.

Brig Hydroos, Pakeer, 73 tons, from Cochin, 10th inst., cargo sundries-Passenger,

1 native. Brig Thiraletchemy, J. Nicholan, 88 tons, from Cochin, 7th inst., cargo sundries-

Passengers, 4 natives.

29-Schooner Elizabeth, Santiago, 37 tons, from Tutocoreen, 26th inst., in ballast-Passengers, 72 natives.

Brig Parvady Pursad, M. Anthony, 47 tons, from Quilon, 19th inst., cargo sundries - Passengers, 4 natives.

Brig Fattel Barry, P. Cooty, 98 tons, from Cochin, 10th inst., cargo sundries-Passengers, 4 natives.

30-Brig Manikavally, Yavan Chetty, 91 tons, from Quilon, 10th inst., cargo Dry fish -Passengers, 10 natives.

Schooner Nymph, M. Francisco, 33 tons, from Tutocoreen, 24th inst., cargo sundries —Passengers, 33 natives.

Ketch Kaik Husro, E. Dosagee, 65 tons, from Cochin, 21st inst., cargo sundries-Passengers. 2 natives.

Schooner Pakia Letchemy, Valo Pulle, 32 tons, from Cochin, 19th inst., cargo sundries-Passengers, 3 natives.

Brig Hydrose, S. Abdoola, 106 tons, from Negapatam, 26th inst., cargo Rice-Passengers, 23 natives.

31—Barque Marion, E. F. Byrne, 192 tons, from Cochin, 28th inst., cargo Oil. Schooner Pauline, J. Trundle, 98 tons, from Bombay, 9th inst., cargo general.

February 1—Barque Eliza Penelope, J. B. Millar, 141 tons, from Pt. de Galle, 31st Jan., cargo Teak timber—Passenger, Mrs. Millar.

Brig Ameed, Viagolan, 111 tons, from Negapatam, 26th Jan., cargo Rice.

Brig Futty Gool Hydroose, A. Cader, 98 tons, from Cochin, 19th Jan., cargo

Schooner Dyria Letchemy, Coppyan, 42 tons, from Tranquebar, 27th Jan., cargo Rice.

3-Schooner William Robert, Manuel, 34 tons, from Colechy, cargo sundries-Passengers, 37 natives.

Schooner Susannah, Viagolan, 48 tons, from Tutocoreen, 31st Jan., cargo sundries -Passengers, 15 natives.

Brig Mahomed Samdany Raphael, 72 tons, from Adrampatam, 29th Jan., cargo Rice-Passengers, 15 natives.

Brig Amorthe Letchemy, M. Pulle, 104 tons, from Negapatam, cargo Rice-Passengers, 12 natives.

Brig Wanderer, Rosairo, 92 tons, from Negapatam, 29th Jan., cargo Rice-Passengers, 10 natives.

Brig Cader Box, Salis, 83 tons, from Negapatam, 29th Jan., cargo Rice-Passengers, 2 natives.

Brig Authy Vera Southey Rama Letchemy, M. Pulle, from Cochin, 27th Jan., cargo sundries-Passengers, 16 natives.

4-Brig Menachy Soondrum, Simon, 100 tons, from Negapatam, 15th Jan., cargo Rice-Passengers, 14 natives.

Brig Ameed, Vengeddesalam, 98 tons, from Negapatam, 30th Jan., cargo Rice-Passengers, 7 natives. Ship Indemnity, P. Sayers, 741 tons, from Melbourne, 16th Dec., in ballast -Pas-

sengers, Mrs. Sayers, 2 children, and servant.

Brig Vada Letchemy, Jaco Hendrick, 81 tons, from Karical, 31st Jan., cargo Rice. Schooner Virgin M. J. St. Ana, S. Anthony, 59 tons, from Cochin, 23rd Jan., cargo sundries-Passengers, 3 Roman Catholic Priests, and 12 natives.

French Ship Virginie, F. Moulin, 543 tons, from Havre de Grace, Oct. 2nd, in ballast. French Barque Tour d'Ago, V. Cardon, 290 tons, from Galle, 2nd Feb., in ballast. French Barque Amelie, P. Aubrie, 312 tons, from Bourbon, 17th Dec. 1856, in

Schooner Emerald, B. Pulle, 101 tons, from Negapatam, 31st Jan., cargo Rice-

5-Ship Euphrates, C. J. Beharill, 557 tons, from Port Fairy, Dec. 7th, 1856, in ballast. Barque Aletheia, R. Jackson, 412 tons, from Genoa, Oct. 16th, 1856, in ballast. 6-Schooner San Migael alas St. Michael, A. Chetty, 86 tons, from Karical, 31st Jan. cargo Rice-Passengers, 3 natives.

Schooner St. Anna Maria, Maselamany, 71 tons, from Valagany, 30th Jan., cargo

Schooner Fancy, C. Pulle, 42 tons, from Tutocoreen, 3rd Feb., cargo sundries-

Barque Neloyadatchy, A. Appen, 132 tons, from Karical, 30th Jan., cargo

Brig Susan Josephine, S. Pulle, 134 tons, from Negapatam, 31st Jan., cargo

Brig Salve Regina, Manuel, 93 tons, from Karical, 31st Jan., cargo Rice.

Brig Rangoon, D. Suse, 48 tons, from Tutocoreen, 5th Feb., cargo sundries-Pas-

7-Brig Maria, M. Pulle, 58 tons, from Negapatam, 3rd Feb., cargo Rice-Passengers,

Schooner Cottya Caderyo, Sego Madar, 38 tons, from Mutopatto, 1st Feb., cargo

Ship Poictiers, A. Sharp, 756 tons, from Cochin, 2nd Feb., cargo Oil and sundries. 8-Barque Maria Somes, E. R. Coleman, 786 tons, from Aleppe, 4th Feb., cargo Oil. Brig Alli Cader Box, A. Pulle, 91 tons, from Negapatam, 4th Feb., cargo Rice-Passengers, 6 natives.

Brig Hamido Box, S. Tamby, 131 tons, from Tranquebar, 3rd Feb., cargo Rice. Brig Menachy Soondrum, Ayadora, 97 tons, from Cochin, 4th Feb. cargo sundries

-Passengers 4 natives.

French Barque Alix, T. Orochet, 279 tons, from Nantes, 6th Oct. 1856, in ballast. Schooner Mohodin Box, Mahomado, 59 tons, from Colesegrapatam, 6th Feb., cargo sundries-Passengers, 84 natives.

Brig Hulhoosery Hameed, H. Moydin, 80 tons, from Colesegrapatam, 6th Feb.,

cargo sundries-Passengers, 80 natives.

9 - Schooner Felicite, J. S. Pulle, 47 tons, from Jaffna, 4th Feb., cargo sundries - Passengers, Rev. W. W. Howland, Mrs. Howland, 6 children, and 11 natives. Schooner Henrietta, Madar, 49 tons, from Tutocoreen, 8th Feb., cargo sundries-

Passengers, 3 natives,

Brig Hydroos, N. M. Lebbe, 81 tons, from Adrampatam, 7th Feb., cargo Rice-Passengers, 4 natives.

Brig Thande Pane Audy Letchemy, A. Appen. 102 tons, from Valagany, 4th Feb., cargo Rice-Passengers, 5 natives.

Brig Fathur Rahaman, A. Ibrahim, 100 tons, from Adrampatam, 2nd Feb., cargo Rice-Passengers, 8 natives.

Brig Mohodin Cader Box, T. Inasee, 106 tons, from Negapatam, 5th Feb., cargo

Rice—Passengers, 3 natives.

10-Barque Ferris, T. Goddard, 293 tons, from Liverpool, 20th Sep., 1856, cargo general. Schooner Royal Family, Balthazar, 70 tons, from Negapatam, 4th Feb., cargo Rice-Passengers, 18 natives.

Legislative Enactments.

Ordinances enacted by the Governor of Ceylon, with the advice and consent of the Legislative Council thereof, during the Session of 1857.

No. 1.—For the confirmation and ratification of two Supplemental Agreements, relating to the Construction of a Railway between Colombo and Kandy.

AT HEREAS by the Ordinance No. 1 of 1856, entitled "For giving validity to a Provisional Agreement entered into by Her Majesty's Secretary of State for the Colonies, and the Ceylon Railway Company, for the Construction of a Railway between Colombo and Kandy," it was enacted, that the said Ordinance should take effect so soon as it should have been ratified and confirmed by Her Majesty: And whereas the Legislative Council of this Colony submitted an humble Address to Her Majesty, praying that She would be pleased not to give Her assent to the said Ordinance, until after a new Survey of the site, and Estimate of the cost had been made. And whereas with a view of meeting the aim of the aforesaid Address to Her Majesty, without Her delaying Her assent to the said Ordinance, a Supplemental Agreement has been entered into between the parties to the original Agreement in the said Ordinare mentioned, and thereby confirmed and ratified. And whereas for the purpose of supplying an omission in the said last mentioned Agreement respecting the amount expended by the said Company on Surveys and other preliminary services, to be included in the sum of £800,000, upon which interest at 6 per cent. per annum, is guaranteed by the Ceylon Government, and for other causes, it has also been deemed advisable by the parties to the original Agreement aforesaid, to enter into a Provisional and Second Supplemental Agreement, which, it is thereby agreed, shall take effect when and so soor as the same shall have been duly confirmed by an Ordinance, passed be the Governor and Legislative Council of this Colony. And wherea the said Supplemental Agreement, and the said Provisional and second Supplemental Agreement having been executed by the parties there respectively, Her Majesty was pleased to ratify and confire the st Ordinance No. 1 of 1856; and it is expedient, for the avoid ace of doubts, to confirm and ratify by Ordinance, both the Supplement I Agr ments aforesaid. IT IS THEREFORE ENACTED BY THE VERNOR OF CEYLON, with the advice and consent of the Legisli Council thereof, as follows:-

Confirmation of and Kandy.

1. THE Supplemental Agreement, and the Provision two Supplemental and Second Supplemental Agreement, in the Schedule Agreements relat- this Ordinance annexed, which have been entered into ing to the construct between The Right Honourable HENRY LABOUCHERE, Her tion of a Railway Majesty's Principal Secretary of State for the Colonies, on behalf of the Government of Ceylon, of the one part; and

The Crypon Ratiway Company, of the other part; shall be, and the same are hereby confirmed and ratified, and shall be deemed and taken to be incorporated with the Agreement mentioned in and confirmed by the said Ordinance No. 1 of 1856; and shall be read and construed together with the said lastmentioned Agreement, as one entire Agreement; and shall be binding upon the said Government and the said Company respectively, according to their true intent and meaning.

2. THIS Ordinance shall take effect from and after the

to take effect. passing thereof.

THE SCHEDULE.

No. I.

A SUPPLEMENTAL AGREEMENT made the fifth day of December, one thousand eight hundred and fifty-six, between The Right Honourable Henry Labouchere, Her Majesty's Principal Secretary of State for the Colonies, on behalf of the Government of Ceylon, of the one part; and The Ceylon Railway Company, of the other part.

WHEREAS on the tenth day of June, one thousand eight hundred and fiftysix, a Provisional Agreement bearing that date, was made between the parties hereto, respecting the construction of a Railway between Colombo and Kandy, in the Island of Ceylon, subject to the confirmation of the said Agreement by an Ordinance of the Governor and Legislative Council of Ceylon;—

AND whereas an Ordinance has been passed by the Governor and Legislative Council of Ceylon, confirming the said Provisional Agreement, but taking effect only from such date as Her Majesty may assent thereto, and the said Ordinance is now awaiting Hc Majesty's assent.

AND whereas the aforesaid Governor and Legislative Council, have at the same time submitted a unanimous Address to Her Majesty, praying that she will be pleased not to give Her assent to the aforesaid Ordinance, until after a new Survey of the site, and estimate of the cost has been made.

A NL whereas in consequence of certain suggestions and requisitions made by the behalf of Her Majesty's Government with a view to meet the aim of the attressed Address to Her Majesty, without her delaying her assent to the aforesaid remarks, the parties hereto have come to such Agreement by way of Supplement to the said Provisional Agreement, as is hereinafter expressed or contained.

NOW therefore it is agreed between the parties hereto as follows:-

The Fourth Article of the Provisional Agreement, of the route and direction of a for the construction of the Railway, a survey of the Country may be made by Deylon Government.

THE Secretary of State shall take measures for such Survey being made but delay by and at the expense of the Ceylon Government, by a Railway wor or Engineer, qualified to make Estimates for Railway Works, who shall bointed by the Secretary of State.

PENDING such Survey, and until the result thereof and until the satistion or dissatisfaction of the Ceylon Government with such result shall have een notified to the Company by the Secretary of State, as hereinafter provided, the execution of the contract between the Governor of Ceylon and the Company, contemplated by the second Article of the Provisional Agreement, and all proceedings, acts, deeds, matters and things under or in pursuance of, or for giving effect to such Provisional Agreement, shall be suspended by the Secretary of State and the Company respectively, and continue in abeyance, the Secretary of State on the one hand not requiring any payment of Capital by the Company, and the Company on the other hand not requiring any payment of the guaranteed interest during or in respect of the period of such delay.

4. THE result of the Survey to be so made, and the satisfaction or dissatisfaction of the Ceylon Government therewith shall be notified in writing by the

Secretary of State to the Company, with all practicable despatch.

5. IF the result of such Survey is to satisfy the Ceylon Government that the Railway can be made from Colombo or its immediate vicinity to the Town or suburbs of Kandy, within or for the sum of One million Two hundred thousand pounds, by some line affording reasonable prospect of fair return for the outlay, then the said Provisional Agreement as hereby varied and controlled, shall be carried into effect without further delay.

6. IF the result of the Survey is not to that effect, the Ceylon Government, with the concurrence of the Secretary of State, shall be at liberty to annul the Agree-

ment without any claim for damages on the part of the Company.

7. ANY letter or writing under the hand or authority and direction of the Secretary of State, addressed to the Company or its Directors or Secretary, notifying the result of the said Survey, and the satisfaction or dissatisfaction of the Ceylon Government with such result, shall be conclusive as to the matters so notified.

8. ANY Instalment of Capital which the Secretary of State is entitled to require the Company to pay up under the 31st article of the Provisional Agreement, shall not be required to be paid up until after the expiration of thirty days from the day on which the result of the said Survey, and of the satisfaction of the Ceylon Government with such result, shall have been notified by the Secretary of State to the Company.

9. THE interest guaranteed to the Company by the Ceylon Government under the said Agreement, shall begin to run from the day on which the result of the said Survey, and the satisfaction of the Ceylon Government with such result, shall

have been so notified, and shall not begin to run until that day.

10. THE Ceylon Government shall have the option of taking up one half or any less proportion of such, if any, of the existing Scrip-Shares of the Company, as shall be thrown up by the Scrip-holders, by reason of the change hereby made in the terms of the Agreement, between the Ceylon Government and the Company,

- 11. THE Ceylon Government shall have the option of subscribing one half or any less proportion of any Capital beyond Eight hundred thousand pounds, whi shall be raised by the Company for the purposes of their undertaking, it being clearly understood that the lower rate of guaranteed interest of five per cent., and not the higher rate of six per cent., shall apply to any Capital so subscribed the Ceylon Government, and that the Ceylon Government shall not claim to ticipate in the aggregate of the several guarantees.
- 12. THE Company shall give in Ceylon written notice to the Ceylon Goment of any rejection of existing Scrip Shares by Scrip-holders, and like not any intended issue of additional Capital beyond Eight hundred thousand por and the aforesaid respective options shall not be exercisable by the Convernment, after the expiration of three Calendar Months, from the reconsuch notice, by such Government of Ceylon.
- 13. WHEN and so soon as the Ceylon Government shall become entitle shares in the Company, whether in the manner aforesaid, or by ordinary purch of scrip or shares, to an amount not less than Fifty thousand pounds, and thence forth during the continuance of an interest of the Ceylon Government to that extent in the Capital of the Company, the nomination of one Ordinary Director of

the Company, shall rest with the Ceylon Government so far as this object can be

legally effected.

IN witness whereof the said Henry Labouchere has hereunto set his hand and seal, and the said Company have hereunto affixed their Common Seal, the day and year first above written.

The Common Seal of The CEYLON RAILWAY COMPANY was in pursuance of an order of the Board, affixed hereto in my presence on the fifth day of December, 1856.

(Signed) G. E. COOPER, Secretary.

A PROVISIONAL and SECOND SUPPLEMENTAL AGREEMENT made the fifth day of December, 1856, between the Right Honourable Henry Labouther, Her Majesty's Principal Secretary of State for the Colonies, on behalf of the Government of Ceylon, of the one part; and The Ceylon Railway Company, of the other part.

WHEREAS by a Provisional Agreement between the parties hereto, bearing Jure 1856, arrangements were provisionally made between to, subject to confirmation by the Ceylon Legislature, for the alway between Colombo and Kandy, and such arrangements in Ordinance of the said Legislature which awaits Her Majesty's plemental Agreement bearing even date herewith, and hereintest Supplemental Agreement," certain provisions varying and Provisional Agreement which were required and authorized overnment in consequence of an Address from the Ceylon Leagreed to between the parties hereto.

the said Provisional Agreement, it is in effect provided, the thousand four hundred and thirty-seven pounds nineteen shillings and theretofore expended by the Company on Surveys and other preliminations, should be treated as part of the Capital of the Company, but the much expenditure appears to have been omitted in the recital of the conal Agreement which is made in the Schedule annexed to the Ordinary such Agreement.

whereas by reason of a postponement of the proceedings contemne said Provisional Agreement, which has been agreed to by the first al Agreement with a view to a preliminary survey by the Ceylon and, some further preliminary expenditure will be incurred by the Company provisions of the said Provisional Agreement can take effect.

therefore it is agreed between the parties hereto as follows:-

confirmed by an Ordinance of the Ceylon Legislature, the following Additional Article shall be added to and form part of the arrangements effected by the said Provisional Agreement, as varied and controlled by the first Supplemental Agreement; that is to say:—

THE sum of Eight thousand four hundred and thirty-seven pounds nineteen shillings and two pence, expended by the Company before the date of the said Provisional Agreement on Surveys and other preliminary services, shall be treated as capital paid up by the Company on account of the first instalment of Capital, which the Company will become bound to pay up under the thirty-first article of the said Provisional Agreement, as varied and controlled by the first Supplemental Agreement, subject to any further verification of such sum which the Secretary of State may direct; and such further preliminary expenditure as the Company shall prove to the satisfaction of the Secretary of State to have been properly incurred by the Company between the respective dates of the said Provisional Agreement and of the notification to the Company, in pursuance of the first Supplemental Agreement, of the satisfaction of the Ceylon Government with the result of the said Survey, shall be treated in like manner as part of the said first instalment of paid up Capital. It being however intended and agreed, that although the expenditure herein called preliminary, shall be considered as terminating with the said notification of satisfaction, such other expenditure properly incurred by the Company before the opening of the Railway for traffic as would be properly and usually considered as an outlay of Capital, and shall be admitted as such by the Secretary of State, shall be treated as Capital paid up by the Company from time to time, subject always to the conditions of Article 30 of the said Provisional Agreement, if and whenever the Secretary of State shall direct, as in that Article provided.

IN witness whereof the said Henry Labouchere has hereunto set his hand and seal, and the said Company have affixed their Common Seal the day and year first above written.

Electric Telegraph Rules.

Rules for the transmission of Messages by the Electric Telegraph, framed by the Governor and Executive Council, under the 6th Clause of the Ordinance No. 2 of 1857.

1. Messages on the Public Service shall take precedence of all others.

2. No Government Officer shall employ the Telegraph, except on urgent and important occasions, and no Message shall be sent on Service by the Electric Telegraph, unless

the saving of time effected by the Telegraph is of real importance.

At the seat of Government authority to despatch Messages is vested in the Governor and his Private Secretary. All other Service Messages, Civil or Military, shall be sent under the authority only of the Colonial Secretary, and of the Chief Military Officer, respectively.

4. At Colombo, or Kandy,—whichever place may be the residence of the Governor for the time,—Service Messages will be sent under the signature of the Governor, of his

Private Secretary, and of the Colonial Secretary.

5. At other Telegraph Stations, no Service Message shall be sent, unless it be signed

by the chief Civil or Military Officer of the Station, each for his own department,

6. The Officer who signs the Message will be responsible for the necessity of sending it by the Telegraph; and if on the periodical inspection of the Station books, it shall be discovered that Messages of a trilling nature have been despatched, the Officer who authorised them will be made to pay for them.

7. Officers whose signature will authorise Messages to be sent free, are bound in honor

not to send private communications under cover of that authority.

8. All Service Messages must be conveyed in as few and as short words as possible.

Private Messages will be received for transmission by Electric Felegraph at the

undermentioned rates of charge, and subject to the following Rules.

Messages of 6 words and under, including the name of the sender, the name of the person addressed, the date (if inserted) and the names of the places of despatch and destination (unless they be also the names of Telegraph Stations,) will be sent a single distance along the line for two shillings.

Messages, as above, exceeding 16 words, but not exceeding 24 words, will

single distance along the line for Three shillings.

Messages, as above, exceeding 24 words, but not exceeding 32 words, will gle distance along the line for Four shillings. And for every addition fraction thereof above 32 words, there shall be charged for a single dista additional.

A single distance is to be considered 100 miles, or any distance every additional single distance above 100 per there will be charge equal to the charge made on the same messa,

No charge is made for stops or for prepositions, or such Col., &c.," occurring in the address of a Message.

The name of the sender, of the person addressed, and c written on the face of every Message.

The date may be written, or not, at the option of the Peon hire at the rate of Six-pence per mile sent to any place at a distance beyond half a

10. No Message, however brief, will be charged

reply will in every case be charged for separately.

11. Mercantile or other Messages, involving impo ceived on condition of being repeated back from each I will be charged for repetition according to the practice

12. The sender of a Message may prepay the charge

limited to the number of words so prepaid for.

13. All Messages must be in the English Language, and mo. Peon hire, when it is chargeable, will be recovered by the Office

Message.

14. As a General Rule, no unpaid Message shall on any account to many except in the cases provided for by Rule 30. But as cases may occur in which not provided with money at the time might be subjected to serious liverand nience by their non-transmission, the Assistant in charge will be allowed to ex discretion, and to forward unpaid Messages on his own responsibility, recovvalue afterwards. But it must be distinctly understood, that the Assistant will to pay into the Treasury, at the beginning of each month, the full value of transmitted by him during the previous month.

15. Messages in cypher will be charged for at triple rates under special h

may be learned at the different Telegraph Offices.

for the property thereby conveyed.

4. Where any person, having contracted for the purchase of property but not having obtained a conveyance thereof, shall contract to sell to any other person and the same shall in consequence be conveyed immediately to the sub-purchaser; the instrument of conveyance shall be charged with the duty, in respect of the purchase or consideration money therein mentioned to be paid or agreed to be paid by the sub-purchaser.

- 5.—And where any person having contracted for the | CONVEYANCE or transfer of immoveable propurchase of property, but not having obtained a conveyance thereof, shall contract to sell the whole or any part or parts thereof, to any other person or persons, and the same shall, in consequence, be conveyed by the original seller to different persons in parts or parcels; the instrument of conveyance of each part or parcel thereof shall be charged with the duty in respect only of the purchase or consideration money which shall be therein mentionedto be paid or agreed to be paid for the same, by the person or persons to whom or to whose use or in trust for whom the conveyance shall be made, without regard to the amount of the original purchase money.
- 6 .- And in all cases of such sub-sales as aforesaid, the sub-purchasers, and the person immediately selling to them, shall be deemed and taken to be the purchasers and sellers, within the intent and meaning of the provisions and regulations of this Ordinauce relating to the duties on conveyances of property hereby imposed.
- 7 .- But where any such sub-purchasers shall take an actual conveyance of the interest of the person immediately selling to him, which shall be charge able with the duty in respect of the parchase or consideration money paid or agreed to be paid by him, and shall be duly stamped accordingly; the instrument of conveyance to be afterwards made to him of the property in question by the original seller, shall be exempted from the duty, and be charged only with the duty on a notarial deed.
- 8.—And where any property, separately contracted to be purchased of different persons, at separate and distinct prices, shall be conveyed to the pur-chaser, or as he shall direct, in and by one and the same instrument; the instrument shall be charged with the said duty in respect of the aggregate amount of the purchase or consideration monies therein mentioned to be paid or agreed to be paid for the same.
- 9.-Where any lands, or other property shall be sold and conveyed, subject to any mortgage, bond, or other debt, or to any gross or entire sum of money, to be afterwards paid by the purchaser, such sum of money or debt shall be deemed the purchase or consideration money or part of the purchase or consideration money as the case may be, in respecwhereof the duty is to be paid.
- 10 .- And where there shall be several deeds, instruments or writings, for completing the title to the property sold; such of them as are not liable to the said ad valorem duty, shall be charged with the duty to which the same may be liable, under any general or particular description of such deeds, instruments or writings contained in this Schedule.
- 11 .- And when any deed or instrument, operating as a conveyance on the sale of any property, shall operate also as a conveyance of any other than the property sold by way of settlement, or for any other purpose, or shall also contain any other matter or things besides what shall be incident to the sale and conveyance of the property sold, or relate to the title thereto, such instrument shall be charged, in addition to the duty to which it shall be liable as a conveyance, with such further Stamp Duty, as any separate deed containing the other matter, would have been chargeable with.

Letters posted after Office hours.
he regular hours during which the several Post Offices shall be kept open, shall

heretofore.
Colombo, Kandy, and Galle, the Post Office Box for receipt of letters will be five o'clock, P. M.; but it will be re-opened at six o'clock, P. M., for receipt of ested during the night, to be forwarded by the morning's Mail.

12. On the days for closing the Overland Mails at Colombo and Kandy, the packets for such Mails will be made up at five o'clock P. M., precisely; but an extra packet will be kept open till six o'clock, for letters only, and a fee of Sixpence, in money, for every letter shall be paid by the person posting the same.

13. A similar rule shall be in force at Galle, with respect to letters posted after the hour at which it shall have been notified that the packets by Mail Steamers will be closed.

Sale of Postage Stamps.

14. Postage Stamps will be sold at the Post Offices, of any station where there is a Government Agent, or an Assistant Government Agent, during Office hours. But on the Overland post days at Colombo and Kandy, Stamps will not be sold at the Post Office after three o'clock, P. M.

* Colonial Secretary's Office, Kandy, March 26th, 1857.

By His Excellency's Command, C. J. MACCARTHY, Colonial Secretary.

OPTIONAL PRE-PAYMENT OF THE BRITISH PACKET POSTAGE

ON OVERLAND LETTERS, VIA SOUTHAMPTON.

- 1.—Instructions having been received from the Postmaster General in London that the optional payment of the British Packet Postage on Letters between Ceylon and the United Kingdom via Southampton should be forthwith commenced, it is hereby notified for general information, that from the 1st of December next, the several Post Offices throughout Ceylon will be prepared to receive, at the option of the sender, the British Packet Postage on Letters directed to the United Kingdom, via Southampton, and Notice is hereby given that the system was to be carried into operation in English from the 1st of the present month.
- 2.—The following are the British rates of Packet Postage fixed by the Lords of the Treasury, according to which all Letters received "Unpaid" from, or despatched "Paid" to the United Kingdom via Southampton, will be taxed, viz

TANK THE PARTY OF		COUNTRIES AND SELECT			English	Colonial	Total
		ling half an ounce.			5d.	li.	CALL
Above hal		e and not exceeding 1			10d.	211.	
Adjuster 1	do.	and not exceeding 2	do.	3	1s. 8d.	4	
2	do.	and not exceeding 3	do.	1.	2s. 6d.	6d.	
o on inor		one shilling the	5000		A COLUMN TO SERVICE AND ADDRESS OF THE PARTY	- CONTRACT	

and so on, increasing one shilling for every additional ounce weight, thereof.

Colombo, 20th November, 1845.

OPTIONAL PRE-PAYMENT ON LETTERS VIA MARS

Notice is hereby given, that the postage on letters for the United Via Marseilles, can be paid in advance or not at the option of the

The charges will be the same as on letters forwarded via Southan addition of a French Transit Rate of 3d. the $\frac{1}{4}oz$.

The total charge on prepaid letters forwarded vià Marseilles will be

When under $\frac{1}{4}$ oz. in weight When weighing $\frac{1}{4}$ oz. and under $\frac{1}{2}$ oz. $\frac{1}{2}$ oz. and under $\frac{3}{4}$ oz.

and so on charging 3d. for every $\frac{1}{4}$ oz. or fraction of a $\frac{1}{4}$ oz. in addition to on letters forwarded via Southampton.

OVERLAND LETTERS

NOT SUPERSCRIBED "VIA SOUTHAMPTON."

Notice is hereby given, that under instructions received from the Postmaster in London all Overland Letters not superscribed to be sent "via Southamp be forwarded by way of Marseilles. In this manner they will reach England earlier, but will subject the party receiving them to a much higher rate of

OPTIONAL PAYMENT OF POSTAGE ON LETTERS

SENT BY THE CONTRACT-STEAMERS TO INDIA AND CHINA.

UNDER instructions received from Her Majesty's General Post Office in London, it will in future be optional with parties writing by the Contract Steamers from Point de Galle to the Presidencies of India or to Hong-Kong, to prepay, or not, the British Packet Postage directed to be levied under the Treasury Warrant dated the 11th day of September 1845; but that postage must always be paid in advance on letters sent to any foreign country or possession.

The British Packet rate will be levied here on letters on which it shall not have been

prepaid in the Presidencies of India or in Hong Kong.

REGISTRY OF OVERLAND LETTERS TO ENGLAND.

Notice is hereby given, that in obedience to Instructions received from the General Post Office, London, under date of the 17th August last, the fee of Six Pence, hitherto leded in this Island on Registered letters to the United Kingdom, will, until further notice, be levied in England, and no such charge will have to be paid here. The Postage on such letters must be prepaid, but the extra charge of Six Pence will be collected at home.

General Post Office, Colombo, 14th September, 1857.

GEORGE LEE, Packet Agent.

LETTERS FOR THE NORTHERN COUNTRIES OF EUROPE, VIA TRIESTE,

Notice is hereby given, that all Letters destined for the Northern Countries of Europe by the route "via Trieste," will be made up in separate packets addressed to the Austrian Post Office at Alexandria.

The Steam Postage of 1s. per ½ oz. must be prepaid on all letters intended for des-

patch by way of Trieste, as well as the Colonial postage of 1d.

Colombo, 10m January, 1851.

BOOK POSTAGE TO ENGLAND,

spacket may contain any number of separate Books, Almanacs, Maps or y quantity of paper, vellum or parchment (to the exclusion of Letters, d or open.) and the Books, Maps, Papers, &c., may be either printed, ain, or any mixture of the three.

and Address of the scoder, or any thing else not in the nature of a letter, vritted or printed upon the envelope or cover of the packet, in addition

and Address of the person to whom it may be forwarded.

sebinding, mounting, or covering of the same, or of any portion thereof tewhether such binding, &c., be loose or attached; as also rollers in markers (whether of paper or otherwise) in the case of books; salever is necessary for the sale transmission of literary or artistic mily appertains thereto.

Pastage on Book packets will remain as heretofore, viz: acket not exceeding 4 ounces in weight 0s. 4d. icket above 4 ources and not exceeding 8 ounces 0 8

acket above 8 ounces and not exceeding 1 pound 1 ng 8d. for every additional half pound.

ag regulations, however, must be observed.

POSTAGE ON LETTERS VIA MARSEILLES

"General Post Office, 25th November, 1856.

I am dire so by the Postmaster General to inform you that a new Postal has just been concluded with France, and that the Provisions of this condecome into operation, on the 1st January next.

ong the advantages obtained by this country is a reduction in the amount of the ate paid to France, for the conveyance of that part of the India Mail, which is ed via Marseilles, from 1s. 8d. an ounce to 10d. an ounce, and in consequence of action, the sum of three pence per quarter ounce, instead of 5d. per quarter ounce, chargeable, after the date above-mentioned, in addition to the uniform British

and Colonial rate of six-pence per half ounce, upon all letters exchanged between the United Kingdom and Ceylon, making the total charge for a Letter.

> if not exceeding \frac{1}{4} ounce. if exceeding $\frac{1}{4}$ oz. and not exceeding $\frac{1}{2}$ oz. 1 1 if 1 OZ. if $\frac{3}{4}$ oz. 2 0 OZ. 3 3 if oz. 11 oz. 3 6 14 oz. 1 0z.

and so on.

This convention also reduces the charges upon Letters conveyed directly between France and Ceylon, and it has been agreed that upon all Letters forwarded between France and Ceylon, the entire British Sea Postage shall be collected in France, and accounted for to this Office.

Under this arrangement the Red Sea rate of one shilling the half ounce, hitherto levied in Ceylon, upon all Letters contained in the Mails to or from France will no longer be chargeable, and no Postage for sea conveyance should hereafter be collected in Ceylon, either on the despatch of Letters to France, or on the delivery of Letters from France.

I have accordingly to convey to you the following instructions for your guidance.

- 1.—The reduced rate of nine pence per quarter ounce, and so on, to be collected upon all Letters prepaid in Ceylon, after the 1st January next, and forwarded to the United Kingdom via Marseilles.
- 2.- A corresponding reduction to be made in the postage of all prepaid Letters forwarded through the United Kingdom to British Colonies, or Foreign countries, when sent to the United Kingdom via Marseilles.
- 3.-No British Sea postage to be collected upon Letters or printed papers, received in the direct mails from France, nor upon Letters and printed papers forwarded from Ceylon in the direct mails to France.

I am, &c., F. HILL."

GENERAL POST OFFICE, Colombo, 7th December,

THE subjoined copy of a letter from the Secretary to the General Post Office London, is published for general information.

GEORGE LEL P. M. General.

Circular.

"GENERAL POST OFFICE, London, 30th September 1846

"SIR,—Much inconvenience and delay being frequently experienced, in quence of parties residing in the British Colonies and other parts abroad may have occasion to complain of undue detention of their letters, or of such letters being charged with a higher amount of postage than that to which the control of the control o are liable), omitting to forward to this office, with their complaints, the of the letters so delayed or overcharged; the Postmaster General is pl request that whenever application is previously made to you on the (and in all cases when you have an opportunity of recommending the course to be pursued,) you will point out how important it is that the should invariably be transmitted: as much time will ther be saved in in the complaint, and material assistance will be afforded this dep ascertaining where the error has occurred.

To George Lee, Esq. &c. &c. &c. Ceylon.

"I am, Sir, &c. &-W. L. N

Customs Regulations.

Regulations on Landing of Goods.

In landing the Cargoes of Vessels, the Masters or Supercargoes of which are Europeans, each separate boat-load shall be accompanied by a Note addressed to the Collector of Customs, specifying the number and description of the Packages, and the marks and numbers affixed thereon; or if in bulk, the quantity, as far as can be ascertained, of the Goods so sent by them; and if any Goods be found in any boat without a boat-note, or if being accompanied by such boat-note, the boat be found out of the proper track between the ship and the appointed place of landing, such boat, together with the Goods, may be detained; and unless the cause of deviation be explained to the satisfaction of the Collector, they shall be forfeited, as provided by the 22d clause of the Ordinance No. 18 of 1852.

Regulations respecting Goods in Transit by Mail Steamers.

All Goods in Transit by Mail Steamers, and declared to be so by the Master at the time of the ship's report, may be transshipped without Bond or Entry.

Goods arriving by Mail Steamers may be removed by land to any other Port, subject

to the following regulations:-

Upon the Owner or his Agent making application to remove Goods, they will be delivered to be passed on to the intended Port under Bond, to the satisfaction of the Collector, for their due arrival at such Port: who, previous to the delivery thereof, will cause the proper Seals of Office to be affixed thereto; and if such Seals be broken, or if the Package at the Port of Discharge be found not to agree with the particulars given in the Letter of Advice from the Port of Removal, such Package, with its contents, shall be forfeited, and the Bond given for the safe delivery of the Goods will be enforced under the 41st clause of the Ordinance No. 18 of 1852.

Regulations for the Carrying of Goods Coastwise.

1. All Trade by sea from one part of the Island of Ceylon, to another part of the same Island, to be deemed Coasting Trade, and all Vessels while so employed therein shall be deemed to be Coasting Vessels and

no part of such Voyage shall be deemed to be beyond Sea.

2. The Master of every Coasting Vessel which is to depart from any Port of this Island, shall deliver to the Collector an Entry his name, and under his hand, of the name and destinated Vessel, her Tonnage, and the number of the Crew, and Collector shall grant a General Sufferance and authority for and lading of all goods, except such (if any) as shall pressly exempted.

3. The Master shall record on the said Sufferance all board his Vessel, viz., the No. and description of Package ties, description and value of the goods therein; distinguished Goods Ex the Warehouse under Bond; 2ndly, Goods Foreign Import duty paid, and shall afford proof that such duties have been

3rdly, Goods the produce of Ceylon.

4. When goods are shipped for more than one Port, or for a not a Port, the Master shall note separately the goods for each Place.

5. Upon the production to the Collector of the Sufferance recorded and signed by the Master, and upon the furnishing by any further information that may be required, the Collector sha clearance, according to the statement rendered by the Master several sorts of goods laden on board such Vessel, and if the account be false, he shall forfeit a sum not exceeding £10, and

not appearing on the Clearance as duly shipped, shall be liable to seizure and forfeiture.

6. Coasting Vessels may call at places and Out Bays at which no Custom House Office is stationed, and may under the written Permit of the Collector of the Province in which such place is situated, land or ship any goods specified in the said permit, and the Headman, (duly authorized by the Government Agent for that Province,) of any place at which a Vessel may anchor, discharge, or ship Cargo, shall require the Master of such Vessel to produce to him the Clearance or Permit of such Vessel, and the Headman is enjoined and required, frequently to visit such Vessel, to examine and take an account of the goods landed or shipped, to note and write such particulars upon the Clearance or Permit of the Vessel, to detain such goods as shall be illegally landed or shipped, and to report any irregularity to the Government Agent or the nearest Officer of Customs.

7. All Timber, Salt, Arrack, or other goods which may be landed or shipped at places not authorized by the Clearance or Permit of the Vessel, will be liable to Forfeiture and may be seized by the Headman of such place, who is immediately to report the detention of the goods to the Collector of Customs for the District.

8. All Timber shipped without Permit of the Government or Assistant Government Agent, or being found not to agree with the description or dimensions specified in the Permit, shall and may be liable to seizure and forfeiture.

9. Coasting Vessels shall be allowed as Stores for the use of the Seamen on board, only the quantity of Arrack or Rum sanctioned by the Government Proclamation of December 30th 1854, and the quantity so ped as Stores, shall be so entered on the Clearance of the Vessel.

the Warehousing Port shall enter into Bond in double the duties leviable, that the goods shall be delivered into the Officers of Customs at the Port of destination; and the Warehousing Port where the goods are shipped shall the term (by Post) at the Port of destination, of the shipmed and unless the goods be landed at the Port for which outwards, or be otherwise accounted for, to the satisfactor, the Bond will be put in force, and in the event accourring between the Port of lading and the Port of accurring between the Port of lading and the Port of lading will be charged thereon.

shall be forfeited, under the provisions of the 48th

Ordinance No. 18 of 1852.

dearance or Permit granted to her, unless the Owner obtained from the Collector of the Port to which she cause, to be had on board on every such Voyage, specifying men Vessel, the name of the Master, the name of the Owner rage, and containing as many particulars of her dimensions may be sufficient to identify her; but the Collector of Cushin Province, may, if he should find it necessary, dispense in Vessels and Boats plying solely on any Lake, Canal or River rovince, with the Licenses, Sufferances and Permits aforesaid, substitute Boat Notes for Permits, &c.

Week.

The Tonnage of every such Vessel or Boat under 15 Tons shall be ascertained by measuring, 1st, The Length between the after part of the Stem, and the fore part of the Stern post; 2nd, The inside Breadth at midship; 3rd, The Depth at midship; multiply these three dimensions together, and divide the product by 130, and the quotient will be the amount of the Tonnage of such Vessels.

14. Before licenses, as hereinbefore provided for, be granted, the Vessel shall under the direction of the Collector of Customs, be inspected as to her being Sea-worthy, and her name, and the Port to which she belongs, shall be conspicuously painted on her Stern, and her Tonnage

and No. of License marked upon the main Beam.

15. Licenses will be in force for the year in which they have been issued, and must be renewed immediately after the 1st January, in each year; all changes of Owners and Tindals, during the year, must be reported for endorsation upon the License by the Collector of Customs, and if the name of the person acting as Tindal, does not appear upon the License, the Officers of Customs may refuse to recognize or allow him to do business as such.

16. The wilful and fraudulent breach of these regulations will render the Vessel liable to seizure and forfeiture, and the Tindal or parties concerned to a fine not exceeding £10.

HIS EXCELLENCY THE GOVERNOR has directed the following Extract from Her Majesty's Instructions to be published for general information.

By His Excellency's Command,

Colonial Secretary's Office, C. J. MACCARTHY. Colombo. 23d April, 1851. Col. Secretary. Fortieth.—And whereas We have by Our said Commisson appointing you Our Governor and Commander in Chief as aforesaid, given to you full power and authority in Our name and on Our behalf, but subject nevertheless to such provisions as thority in Our name and on Our behalf, but subject nevertheless to such provisions as are in that respect contained in your General Instructions, to make and execute in Our Name and under the Public Seal of Our said Island, Grants of Waste Land to Us belonging within the same to private persons, and for the Public uses of Our subjects there resident. Now We do hereby require and authorize you from time to time as occasion may require, to cause all necessary Surveys to be made of the vacant or Waste Lands to Us belonging in Our said Island, and to cause the persons making such Surveys to report to you what particular Lands it may be proper to reserve for Public Roads or other internal communications by Land or Water, or as the Sites of Towns, Villages, Churches, School Houses or Parsonage Houses or as the Sites of Towns, Villages, Churches, School Houses or Parsonage Houses, or as places for the burial of the dead, or as places for the future extension of any existing Towns, or Villages, or as places fit to be set apart for the recreation t of the Inhabitants of any Town or Village, or for promoting the h Inhabitants, or as the Sites of Quays or Landing Places er Towing Mathematical transport may at any future time be expedient to erect, form, or establish on the the neighbourhood of Navigable Streams, or as places which it may reserve for any other purpose of Public convenience, utility, health And You are specially to require persons making such Surveys to specify te, and to distinguish in the Charts or Maps to be thereunto annexed, and leave eces or Parcels of Land within Our said Island as may appear to them And it will, and We so strictly enjoin and require you that you do not under any hatsoever grant, convey, or demise to any person or persons any of the as aforesaid, nor permit or suffer -And We do further charge and require you not to make any Grant or in trust for, or for the use of any private person unless in confor sale by Public Auction at such an upset price per acre as shall nime by Our authority be fixed for the same, and for this purpose you Public Auction from time to time shall remain unoccupied and un-process of the sale by Public Auction from time to time as you shall at such Public Auction be made shall be accepted, provided that such bidding shall at least price per acre as aforesaid. Provided nevertheless, that no simply accepted until the person or persons making the same of Ten per cent on the amount thereof, and contract for the payment of the balance within one calendar accepted and we do hereby dealers and the payment of the balance within one calendar and we do hereby dealers and the payment of the balance within one calendar and the payment of the balance within one calendar and the payment of the balance within one calendar and the payment of the balance within one calendar and the payment of the balance within one calendar and the payment of the balance within one calendar and the payment of the balance within one calendar and the payment of the balance within one calendar and the payment of the balance within one calendar and the payment of the balance within one calendar and the payment of the balance within one calendar and the payment of the balance within one calendar and the payment of the balance within one calendar and the payment of the balance within one calendar and the payment of the balance within the payment of the pay

Provided nevertheless, and We do hereby declare, ordain, be competent to you, on Our behalf and authority, in direction which you may receive from Us through one of of State to grant Land or Lands either in exchange and satisfaction of any equitable claim to Land. And it is Grants of Land to be made by you in Our name to any consideration of the payment of money for the same shall the reson or persons, and to his, her or their Heirs and Assigns, them held in fee and common soccage, yielding and pay-and Successors, a Quit Rent of one Pepper Corn by the and every such Grant shall pass in Our name under the Pub-lsland of Ceylon, and shall be executed and delivered to the decirasers, in such manner as has been customary, or as you shall the payment of the purchase money for the same, and not before; not before the purchaser or purchasers shall be let in possession of ought by them; and for the delivery of every such Grant, and the me, the said purchaser or purchasers shall pay into the Colonial counting to forty shillings sterling money and no more, or of such as you from time to time with the advice of the Executive Council of Our said Island, shall appoint, and every such Grant shall previously to its being so delivered be enrolled in the Court of the District where such Land may be situate, and for making every such Enrolment the Registrar of such Court shall be entitled to receive from such Grantee or Grantees a fee of five shillings Sterling money and no more.

MINUTE

BY THE GOVERNOR.

HIS EXCELLENCY THE GOVERNOR is pleased to direct, that the undermentioned Minutes respecting the Scale of Fees chargeable by the Surveyor General's Department against purchasers of Crown Land, be cancelled, and that in lieu thereof the following Rules be observed:—

Minutes hereby cancelled.

Of the 22nd of November, 1845. Of the 2nd of July, 1847. Of the 16th of March, 1848. Of the 18th of April, 1850. Of the 2nd of December, 1853. Of the 22nd of August, 1855.

RULES.

1.—All Crown Land will be sold by Auction, and no Waste Land will be exposed for Sale at a price below Twenty shillings per acre.

2.—The Surveyor General, in conjunction with the Government Agents, will make arrangements for bringing forward for sale, from time to time, such portions of Waste

Land as may be by them deemed expedient.

3.—The preceding Rules shall not be held to preclude parties desirous of purchasing any particular tracts of Land, from applying to the Government Agent for the Sale of them accordingly. But the Surveyor General and Government Agents will exercise their own discretion in respect to complying with any such application,—and the applicant will not be at liberty to enter upon the Land for any purpose, without permission of the Government Agent. It will also be distinctly understood, that the making such application will give the applicant no claim whatever to the Land, if put up for Sale, in preference to any other person.

4.—The following (reduced) Fees will be recovered by Government, in aid of the expenses incurred by the Surveyor General's Department, in the preparation of Laud

for sale, and completion of Title plans.

Fractions of an acre to be charged as a whole acre, and quantities between the tabulated numbers an interpolated amount.

For the opening or defining of boundaries not opened, or incorrectly opened by the Proprietors of Land, their Agents or Managers, after such Proprietors or their Agents or Managers have received three weeks' notice, in writing, from the Surveyor General or Government Agent to open or define such boundaries, one Rupee per linear chain of

For appraisements, special surveys, or copies of documents, special terms will be made.

5.—Parties making application for the sale of any Land under the 3d Rule hereof, may be required by the Surveyor General or Government Agent to make a deposit, to the satisfaction of the latter officer, of the probable Survey Fees according

6.—Copies of the Plans, when completed, will be lodged in the Office of the Surveyor General, where they will be marked off in a general Topographical index, which, with a Register, will be kept for public inspection, and Registers will also be kept for the same purpose at the Offices of the Government Agents, of the lands sold in their re-

7.—The Sales will be held, when practicable, at the Government Agent's Office, twice a month, after Six weeks' public notice by Proclamation in the Government Gazette, and care will be taked to prevent the days of Sale in the several Provinces s.—On the day of Sales Government Agent will specify the preparation Fees Surveyor General's Department under this Minute, at he paid in full by the purchaser on the day of Sales.

late that they but be paid in full by the purchaser on the day of Sale,

balance of the purchase money must be paid within one month from sale, and in default of such payment the sale will be considered void, ent. will be forleited, and the Government will be at liberty to re-sell

following Fees for the preparation of Title Deeds must be paid into the

cants of Land sold for a sum not exceeding £5.—one shilling. than .Co. - four per cent.

case is such fee to exceed 40s. for any one grant: and the Secretary of the District in which the Land granted shall be situate, shall

the of five shillings for enrolling the grant.

The Government Agent will apply to the Colonial Secretary for a control of the purchase money in full, and of the Fees enumerated the Government Agent will apply to the Colonial Secretary for a control of the purchaser, who shall forther the colonial secretary for a control of the colonial secretary for a colonial secretary fo the possession of the Land, and the other be enrolled in the District Court. deter-courses, as may be necessary for public purposes in and also to such indigenous timber, stone, clay, and the Land, as may be required for making and keeping or Water-courses, in repair, and for any other public reserves to itself all mines of precious metals.

By His Excellency's Command.

C. J. MACCARTHY, Col. Secy.

MINUTE

BY THE GOVERNOR.

Office

ocuemical oth, 1857.

SEVERNOR is pleased to direct that the following rules for adjustment of Costs attending the Survey of Lands intended to be substituted for those laid down in the Minute of the 7th

on his application, furnish the Principal Officer in charge of ment, with the necessary funds to meet the expenses of Survey; these sums as advances, for the settlement of which the Principal the Survey Department will be responsible. these sums from the purchasers of Land will be made by the

Government Agents and remitted to the Principal Officer in charge of the Survey Department, and by him forwarded to the Treasurer in liquidation of the advances

outstanding.

If any Land is not sold within one year from the date of its being advertised for sale, the expense of Survey on account of such Land is to be brought to account as a charge by the Principal Officer in charge of the Survey Department—in order to which it will be necessary in all cases, that proper Vouchers should be obtained for every payment as incurred.

Should any such Land be afterwards sold, the costs of Survey recovered are to be paid by the Principal Officer in charge of the Survey Department to the

Treasurer, to be accounted for as an Incidental Receipt.

The Principal Officer in charge of the Survey Department will transmit to this Office quarterly a Return of all unsold Lands, the expenses of surveying which shall have been charged as an expenditure-making a note of such as may have been subsequently sold.

He will also furnish the Auditor General with a quarterly Account of all payments made by him out of the Advances received from the Treasurer, and of the recoveries on account-accompanied by a separate Account of the payments finally brought to

account, and of the recoveries since made.

These rules are not, however, to apply to the advances already made to Government Agents by the Treasurer, which they will settle in .erms of the Minute of the 7th October 1844 - returning to him any balance that mey be now in their hands. By His Excellency's Command,

Colonial Secretary's Office, Colombo, 24th November 1845.

P. E. WODEHOUSE. Actg. Col. Secy.

MINUTE. BY THE GOVERNOR.

It being the desire of Her Majesty's Government, that advantage should be taken of the additions made, and about to be made, to the Department of the Surveyor General, under the Surplus Fund Ordinance, -in the first place, to bring to a settlement those native land claims, upon which a deposit was paid in 1848; and secondly, to facilitate the acquisition of Crown Land in small holdings, whenever a sufficient number of persons, Native or European, shall have made known, through the Government Agent, their readiness to become the purchasers of land in a particular District, and shall have made such Deposit as may be required, to prove the bona fide character of the application.

It is hereby made known,

1st. That the Surveyor General is authorised, and empowered, to cause lands thus applied for, to be surveyed, and put up to sale by Public Auction; and that he will be prepared, as the new organization of his Department advances, to commence this duty, in various parts of the Island, when the applications are sufficiently numerous.

2ndly. That the Survey will be, to all intents and purposes, an accurate, and registered Survey, the position of the Lots put up to Sale being defined by artificial Landmarks, as well as by the usual boundaries, -both, to be maintained at the cost, and upon the responsibility, of the purchaser, so that there will be no difficulty in incorporating the properties thus acquired with the Trigonometrical Survey of the Island, as it proceeds.

3rdly. That the Survey Plans delivered by the Surveyor General, will be detailed plans, and the Grants to be issued in conformity therewith, will give a legal Title to the land, whether the Trigonometrical Survey of the District be, or be not, compl.ed, so that the land granted may be sold, mortgaged or otherwise alienated as at present.

4thly. The Surveyor General will publish certain Rules, with respect to the inand upkeep, of Boundaries, with which every purchaser will be expected to com-By His Excellency's Command,

Colonial Secretary's Office, Colombo, 14th January, 1857.

C. J. MACCART

NOTICE.

HIS EXCELLENCY THE GOVERNOR having received from His Grace the SE STATE the following amended Regulations relative to the privileges in the Lands allowed to Military and Naval Officers purposing to settle in certain Colonies, has directed the same to be published for general information. By His Excellency's Com

Colonial Secretary's Office, Colombo, 25th August, 1853.

Information for the use of Military and Naval Officers proposing to settle in certain of the British Colonies.

1. Privileges in the acquisition of Land are at present allowed to Military and Naval Officers in the Colonies of New South Wales, Victoria, Van Deimen's Land, South Australia, Western Australia, New Zealand, Ceylon, and the Cape of Good Hope. As, how ever, the control of the Waste Lands of the Crown in New Zealand is vested in the Legislature of that Colony, it must be distinctly understood that Her Majesty's Government cannot guarantee the continuance of the following Regulations, but that they will be liable to be altered or discontinued by the local Legislature; and the same caution will be applicable to any other of the Colonies named, in which the same control may bereafter be transferred to the local Legislature.

The same privileges are extended to Officers of the East India Company's Service in

Van Deimen's Land.

2. In the abovenamed Colonies, land is disposed of by sale only; but Officers purchasing land, are allowed a remission of the purchase money, according to the undermentioned scale.

Field Officers, of 25 years' service and upwards, in the whole	£600
Field Officers, of 20 years' service and apwards, in the whole	500
Field Officers, of 15 or less years' service, in the whole	400
Captains, of 20 years' service and upwards, in the whole	400
stains, of 15 years' service or less, in the whole	300
solutions, of 20 years' service and upwards, in the whole	300
schalterns, of 7 years' service and upwards, in the whole	200

Moderns, under 7 years' standing, are not entitled to any remission in the

he benefit of this Rule.—But Military Chaplains, Commissariat Officers, and fany of the Civil Departments of the Army; Pursers, Chaplains, Midshipmen, Officers of every description, and Officers of any of the Civil Departments avy, are not allowed any privileges in respect of land. Although members been admitted formerly, and under different circumstances, now excluded. Mates in the Royal Navy rank with Ensigns in the Army es of three years' standing, with Lieutenants in the Army, and are entitled to corresponding privileges in the acquisition of lands.

order to take advantage of this privilege, Officers of the Army and Navy on the pay should provide themselves with a Certificate from the Office of the Commissioners of the Admiralty, or of the Lords Commissioners of the Admiralty, or of Commissioners of the Army and Service of the Army and Navy on the Commissioners of the Admiralty, or of the Commissioners of the Commissione

of State is necessary.

not on any account be issued more than once to the same on half pay who shall for two years immediately preceding the ided in the Colony in which he seeks to make it available.

ceased to belong to Her Majesty's Service will not be equisition of Land. This rule, however, is not to affect Ofpermission to settle in a British Colony, have quitted the doing so. But, in such cases, it will be necessary that their rmission should bear the date of their retirement from the one year from that date, but not otherwise, it should be presented of the abovenamed Colonies, which will be sufficient the arer the advantages to which his rank and length of service to the above scale.

Military and Naval Officers, and it being necessary to premember of the privilege, and it being necessary to premember of two years from the making use of the privilege,
making advantage of the privilege,
making use of their Certificates,
any Land purchased by such Certificates, but will, in the
Location Ticket." At the expiration of two years, the Officer,
making action of the Governor that he is bond fide a resident Settler in
the so resided continuously since receiving his "Location Ticket," will
come Grant in exchange for it. If, however, application should not be
change of the "Location Ticket" within 12 months from the expiration
for which it is granted, it will be considered to have lapsed, and the
med to sale or grant. In case of the Officers dying while holding a
"the Land to which it refers will be transferred to his legal repre-

In case of such death occurring before the "Location Ticket" is obtained, the Governor of the Colony is authorized to make the Certificate available in favour of the Child or other nearest representative of the deceased Officer, as he may find advisable.

7. For the convenience of Officers, the following heads are subjoined of the Rules for the sale of Land in the Australian Settlements:—

All Lands are disposed of by sale alone, and must have been once at least exposed to public auction.

The lowest upset price is not less than £1 per acre; but the Government has power to raise the same by Proclamation, though not again to reduce it.

The Lands are distinguished into three different classes; viz., Town Lots, Suburban

Lots, and Country Lots.

Upon Town and Suburban Lots, as well as upon a proportion not exceeding one-tenth of the whole of the Country Lots offered for sale at any auction, the Governor has the power of naming a higher than the general or lowest upset price: these last to be designated "Special Country Lots."

Town and Suburban Lots are in no case disposed of except by public auction; but Country Lots, which have already been put up to public auction, and not sold, may be

disposed of afterwards by private contract at the upset price.

No Lands are sold by private contract, except for ready money. When sold by public auction, one-tenth at least of the whole purchase-money must be put down, and the remainder within one calendar month, or the deposit is forfeited.

Lands are put up for sale in Lots not exceeding one square mile in extent.

8. In Ceylon, Land is sold by auction at an upset price, which is to be fixed by the Governor, but which is not to be less than £1 per acre. Before the Lands are exposed for sale, they will be surveyed by the Government, and buly advertised.

9. At the Cape of Good Hope the upset price is 2s. per acre in the old Colony,

and 4s. per acre in the District of Natal.

10. The several prices above-mentioned are of course subject to a revision at any time by the proper authorities, and the pecuniary amount of the Remission made to Officers cannot be increased on account of an increased value set upon the Lands.

Revised Regulations respecting the sale of Salt in the Northern Province.

THE following revised Rules regarding the issue of Salt for exportation from the No Province are published for general information.

By His Excellency's Command,

olonial etary's Office, Colombo, 31st January 1855. W. C. GIBSON, Actg. Col. Secu.

THE Se' will be shipped by and at the expense of Government if desired. The shipment of a cargo however cannot be guaranteed at any time out of the regular season for shipment as herein stated,* and in respect to any such shipment that may be made, the expenses actually incurred in respect to it not be paid in addition to the stated price of the Salt when shipped by the purchaser.

If desired boats can be held in readiness from a fixed day to be named by the purchaser, at an extra cost of 1s. $4\frac{1}{2}d$. per boat per day. In the absence of such arrangement, it will take from 1 to 3 days, according to the size of the vesset to collect the full number of boats required, though attiment can commonly be commenced in all cases with a smaller number

Appendix.

CEYLON RAILWAY.

REPORT by Captain W. S. Moorsom, the Chief Engineer in charge of the Government Railway Survey.

TO HIS EXCELLENCY SIR HENRY GEORGE WARD, GOVERNOR, ETC., ETC.,

Kadogunawa, Ceyion, 12th May, 1857.

SIR HENRY,

On the 24th of December last, I concluded the arrangement by which, under instructions from Mr. Secretary Labouc ere, Her Majesty's Principal Secretary of State for the Colonies acting on behalf of the Government of Ceylon, I undertook to proceed to that Island, for the purpose of determining certain estions which had there arisen, relative to the establishment of Railway communication. r. Labouchere's instructions, received by me shortly after the above date, and with which you are acquainted in detail, contemplated, that, in compliance with certain "articles of two Agreements, entered into between the Ceylon Government and the Ceylon Railway Company, I should prepare and submit in Ceylon, to the Governor, with a Report, Plans and Sections, together with estimates of cost in construction and working, and of returns from traffic for the most eligible line or lines connecting Colombo and Kandy, including a due consideration of the line already surveyed by Mr. Drane."

On the 4th of January, the first division of my Surveyors left England. On the 20th of January, a second division followed; and on the 4th of February, I sailed with the last portion of the expedition. On my arrival, I found that Mr. Atkinson, a Railway Engineer of twenty years' experience, who acted for me as principal sur-'rge, had actively fulfilled the instructions I had given him; and by means

and other observations then made, as well as by those subsequently to under my immediate direction, I was enabled, without loss of time, to appreciate.

ched; but this

and connecting features of this remarkable country.

The hill country of Ceylon, in which Kandy is situated, rising as a mass not less the in 1,500 feet above the sea level, is encircled on its west and northern sides by mountains, of which none of the passes on those sides are less than from 1,500 to 2,400 feet above the The intermediate ranges vary from upwards of 3,000 to upwards of 6,000 feet ri sing in peaks to more than 7,000, and in one case, to more than 8,300 feet above the sea. The length and breadth of this singular elevated tract, may be considered as about 60 miles each way.

The low country, from which this elevated district rises, does not train more than 400 feet above the sea level, until the bases of the hills are closely low country, also, is intersected with ranges of hills, partially companions, and is dotted with hillocks almost down to the s may say that a general level, hardly exceeding 200 feet above 30 miles from the shore, going inland from the neighbourhood beyond this distance, the inferior ranges, rising from this base from 500 to about 1,300 feet above sea level, still render the practically, a mountainous country. After 50 miles from th the mountains: any Railway or Turnpike road, (of which lat Kandy from Colombo, or from the north, must encounter the so becomes a perfect engineering problem; and all other co railway policy, must give way here to the physical features

I must here premise that in quoting names of places I s. General Fraser's Map of the Island,* revised by Major Skin and Commissioner of Roads in the Island. I know of no other

can be so well established.

First, than approaching the hill country from Colombo by the most southerly Pass of Ambegonmowa, a Line may be laid down for a Railway, making the distance between Counbo and Kandy about 79 miles, and the ruling gradient one in 60, with the addition a Tunnel, and an inclined plane of about one in 20, to ascend from the basin of the Kalany This Line would have no part in common with the others about to be named, after leaving the first three miles out of Colombo, which three miles, as far as the sing of the Kalany river, would be common to all the Lines I have contemplated. The other Lines about to be named, have all a common course towards Ambepusse (about 35 miles from Colombo), which course is ruled by the Ambanpettia range of hills striking for miles directly across the Colombo and Kandy road, to heights of 1,300 feet, and the lowest ness of which rise to 700 feet above sea-level, while the general level of the country a wind Ambepusse is only 250 feet. This range cannot be crossed with locomotive gradecrees of ordinary character, and can only be turned by taking the vale of the Maha Oya

Starting from Ambepusse towards the Amboolwawa Pass, which is the next mos southerly from Ambegommowa, the total length of line for a Railway from Colombo andy by this route would be about 82 miles, and the ruling gradient one in 50, obaround only by incurring an expensive Tunnel through the Pass which is about 2,400 feet The e sea-level.

and the Vales of the Maha, the Hingo and the Gadadesse Oyas (rivers) to the Par-Pass, with a total length of Railway line from Colombo to Kandy of 79 miles, a ruling gradient of one in 60, with a short Tunnel. The summit level of the ground is Pass is 1,780 feet above sea-level.

Again starting from Ambepusse up to the Vale of the Maha Oya, and diverging a line may be of the mountain called Allagalle, and circling round its northern as a line may be obtained, the total length of which from Colombo to Kandy, would the rating gurdient one in 50, with a summit level of 1,770 feet

Extract Sados ganawa and Ballany, which come next in order from the south, are by locomotive grades ordinarily so called. Northern lives, and of these,

near Ambepusse, and running within two miles of Kornegalle, the of Gallegedera (the Turnpike road near the spet is only marked tenne" on (coveral Fraser's Map) may be surmounted by a line, from Colombo to Kandy, would be about 83 miles, and the ruling something of the ground about 1,800 feet above sea-level.

some conte as far as Kornegalle, and thence by the Vale of the Ib-Ambokka, and up the Vale of the Yatlewera Oya The may be obtained, the total length of which, from Colombo gradients, repeated frequently, but only for two summits on this line at Yattewatte and \$500, the latter rather more than 1,500 feet above

the base been either pointed out to me by the sedulous care of the course of the Line, or which I have seen to be worthy of the purpose amid the ranges of this truly magnificent coundeservatives to not vary so materially in their absolute level the modes by which they must be approached for Railway one come, due regard to the expense of construction and of southerly Passes are the highest, and the most northerly is matter of abstract level.

introns of these routes to traffic.

Immowa is represented as to its traffic by Turnpike tolls to um, and by a Boat traffic to the extent of £6,000 per annum, nnum, over 79 miles of Railway to be made, or about £548 ere made in this direction, no doubt a large trade would ola Stations, and the total would probably amount to about

olwawa, and the route No. 3 by Parnepettia, are represented, iount of traffic; for while the Amboolwawa route would gain tratic which might be wholly lost to the Parnepettia route, the raffic towards Kirimittia, which the former would not take, except for a portion of its length. Thus balanced, each of these routes would be represented by a traffic of about £130,500 per annum, as evidenced by the Turnpike tolls, or at the rate of £1,591 per mile per annum, for No. 2, and of £1,652 per mile per annum for No. 3.

The route No. 4 by Allagalle would be represented by a smaller traffic than No. 3, because it would lose some of the Dollosbage and adjoining traffic, and would gain no adequate balance on the Tumpanne side of the country; it would be represented (in comparison

the other routes) by a traffic not exceeding £1,600 per mile per annum.

The two Northern lines are at present represented in their traffic by the Turnpike tolls on the Kornegalle and Kandy road, increased by those on the Kandy and Trincomalis road, and by those taken on the roads which converge on Kandy from the direction of Hoonis girikanda. To these must be added such portions of the Kandy and Colombo road traffic

as would be attracted by the Railway Stations of Kandy and Ambepusse.

These items, in the aggregate, would probably amount to about £101,760 per annum for the route No. 6, by Pittiagedra, and to about 10 per cent. less for the route No. 5, by Gallegedera; the amount being taken, in each case, from the same data as those which give the above comparative results on the other routes. Thus, the route No. 5, by Gallegedera, would be represented in comparison by a traffic of about £1,103 per mile per the route No. 6, by Pittiagedra, would be similarly represented by a traffic of about per mile per annum.

We have next to consider the comparative costs of these routes; and for this purpose of comparison, I introduce only the items of cost which lie under the heads of Land and Property, construction of all Works and Stations, and supply of Working Stock. The cast of management and engineering, during construction, is excluded in all the cases, as being

fairly presumable to be much the same whatever route may be taken.

Thus premised, I find the route No. 1 would cost £800,150.

the route No. 2 would cost £776,175. the route No. 3 would cost £706,557.

the route No. 4 would cost £736,950.

the route No. 5 would cost £752,025.

and the route No. 6 would cost £953,500.

To these sums respectively, we may add about £150,000 for management during constitutions. tion, and for unforeseen contingencies.

Taking into consideration all the foregoing facts, and still viewing each route compara

tively and not absolutely, I come to the following conclusions:-

The route No. 1, by Ambegommowa, involves objections as to its inclined plane pense, together with a paucity of general accommodation, which are not counterbala by any sufficient advantages to the Public. It may therefore be thrown out of furni consideration.

The route No. 2, by Amboolwawa, is convenient for general accommodation, by average and accommodation, by average and accommodation, by a second accommodation, and a second accommodation accommo a cost at the rate of nearly £11,300 per mile, with a gross corresponding tra would yield at the rate of about 14 per cent. per annum on the cost of the line.

The route No. 3, by Parnepettia, is, at the least, equally convenient with any of the for general accommodation, and involves a cost at the rate of £10,800 per mile, gross traffic at the rate of 15 per cent. per annum upon the cost of the line.

The route No. 4, by Allagalle, gives a smilar item of cost to No. 3, with a resultant to Allagalle, at the rate of 14 per cent. on that cost, and less general accommodation then any of the oth lines except that by Ambegommowa. It does not therefore se ther consideration.

The route No. 5, by Gallegedera, accommodates Kornegalle, the populous district which lies on or near the Turnpike Peradenia. It involves a cost of nearly £10,900 per mile with of £1,103 per mile or at the rate of nearly 10 per cent. per a and it has besides, the disadvantage of comparatively bad g advantage sufficient to counterbalance the above comparati be thrown out of further consideration.

The route No. 6, by Pittiagedra and Matella, accommodate district, which give it peculiar claims for consideration.

Under my instructions, however, from the Secretary of St same scale of comparison with the other routes above enumer the above stated north and north-eastern accommodation at a the traffic converging upon the Colombo road from Kaigalle denia on the east, including Allagalle, Kadooganawa, Gampolla would be about £10,600 per mile, and its gross traffic less the the rate of about 10 per cent. per annum, on the cost of the line.

Viewed in these general positions, it is evident that the routes No. 2 by Amboolwawa, and No. 3 by P respectia, have prominent features of accommodation which entitle them to nearly equal favor but the route No. 2 is less remunerative than that numbered 3 by Parapettia, and it has besides, the engineering disadvantage, that the trains upon it would require engines of a power which may be familiarly represented by 56 horses as compared with 18 horses, which the same trains working at the same speeds, would require on the Percenttia line. I am of opinion, therefore, that the Parnepettia line is preferable to that

The remains for consideration, comparatively, the route by Pittiagedra, No. 6. with that Parnepettia No 3. The main considerations which have been urged on me, locally, in the world a line from Colombo to Kandy vid Matella and Pittiagedra, are the extremely productive character of the Coffee Estates in the Districts through which such line would pass, and the commexions which would be thereby advanced with the Northern and Eastern Provinces of the Island. Taking first, the productive powers of the Districts in question, and the soing their produce to be delivered at Railway stations on the respective routes, I find from a comparison of Returns, with which the Surveyor General, the Government Agent the Chairman of the Planters' Association, and the Secretary of the same Association and the Secretary of the same Association and the Secretary of the Secretar a Marsha and Pittiagedra line, is represented according to the Government Map, by 39,800 acres and in the Chairman's Return by 22,900 acres; and the produce which would be thus accounted is about 114,000 nett cwts. of Coffee. The Chairman has subsequently written to me, that this figure should be 141,000 cwts; but upon a revision, I differ from him is a plying to the respective stations the figures given in his own Returns. On the ther accommodated by a Parnepettia The is a mose ted on the Government Map by 132,400 acres, and on the Chairman's Re-13.000 acres; and the produce which would be so accommodated, is, by the Governterm, about 201,000 nett ewts. of Coffee, or by the Chairman's Return, about nest owls. While these figures taken from different Returns, differ as to the agreement in the last instance as to produce, it will be observed, that they agree that the relative accommodation as regards Coffee, is nearly in the proportion one on a line by Paracrettia, as contrasted with a line (in each case from Colombo We are therefore left with the consideration, whether any large or certain, or likely to exist northwards and eastwards from Kandy, backs upon the largely producing districts west and south of to the Tolls received (as rent by Government) from the Toll-bars Matella, ss produce of these Tolls—as sold for 1857 on the Matella the rate of £137. 16s. per mile of road; and on the Kornethe Allowe Ferry, at the rate of £21. 16s. per mile of per mile of the whole of these roads.

acoust.

Is of the Colombo and Kandy road between Peradenia thern traffic, have been sold at the rate of £383 per mile

rate of Toll as being derive nom goods susceptible of n amount per mile evidently larger than rin other words giving credit to the Matella district for the tolls on the Colombo and Kandy road between Perathis to the credit of Matella, we still have a preponderat-Tolls at the rate of £246 per mile, to convince us that orth and east of Kandy, sufficient to induce a circuitous olombo. Still the question remains, is there any large northwards and eastwards of Kandy, in the event of forded in a direction which may combine the traffic of e of the Island and its internal relations, this is very There is a large connexion (about 87,000 persons in (coolies), who come and go as regularly as the men of and used to visit England. Cattle also are driven in ame direction—(about 1,200 horses, and nearly 58,000 toll bars in 1856). Persons officially connected with the hat there is "scarcely any traffic between Kandy and ever does exist, is confined to fish carried upwards withthis to the want of good roads, which, if made," might to the now on the Kandy and Colombo Road, to Trincomalee," for simments than Colombo. I have failed to discover any

tangible ground for expecting a large, - that is to say, a remunerative Railway traffic, in the directions quoted; and I am of opinion, that experiments, upon grounds of future speculations, without any present basis, ought not to be made with British capital, raised upon a guaranteed interest, for which the people of Ceylon may be taxed. Some years hence, there may be sufficient ground for probable remuneration, to connect the interior of the Island with Trincomalee, which is certainly the finest Port, and possesses the only Dock Yard of the Island; but the country must be opened, and commercial connexion rendered apparent between that Port and other countries, before the expense of Railway accommodation can, with reason, be incurred in that direction. There is an existing and large traffic between Colombo and Kandy, certain to remunerate the adventure of a Railway Company, if that Company conduct its operations with prudence and economy, and if it be met by the Government with experience and liberality, as to the control which the Government has obtained the right to exercise.

On this ground, and subject to these conditions, I recommend the route No. 3 from Colombo to Kandy, via Parnepettia, as being that which combines the greatest amount of public accommodation, with that which affords the most remunerative prospect; and to the

details of this route I now address myself.

Commencing at Colombo, at the Canal or head of lake water near the back of the Kutcherry, a Goods Depôt should here be formed, for the receipt and delivery of all goods connected with the numerous Mills and Stores on the borders of the lake, as well as the general goods for Colombo City. And from the Custom House Quay, a line of rails carried along the new road, and through the arch of the Leyden Bastion, (which, by the timely foresight of Colonel Hope, R. E., has been constructed in a manner suitable for this purpose,) may be further laid along the Bankshall Street, to join the before mentioned line of rails from the Canal on the Sea-shore road; and when thus united, the line will lead to the open space in front of the Native Church called St. Thomas's, at the very outlet of the business carried on in the Pettah (suburb) of Colombo. On this space should be placed the terminal

Passenger station. The site is partly Government property.

The Locomotive Line, commencing at this station, will run at the back of the Mutwall Road, behind the Bishop's residence, and will cross the Kalany Rivera quarter below the Bridge of Boats, at an elevation sufficient to admit the to all times of navigation. A station should be placed at the crossing of the $2\frac{1}{4}$ miles from the terminus in Colombo. From this point, the Rahvay line processed easterly direction, nearly parallel to the Kandy Road. It crosses the Negombo at a distance of $1\frac{1}{2}$ mile from Mahara, and at this point. At miles from Colombo, at a distance of half a mile from Hene and the Heneretgodde to Negombo, at a distance of half a mile from Hene and the result of the Rahvay line cross roads are all well formed, and will being traffic to a Rahvay line. These cross roads are all well formed, and will bring traffic to all $30\frac{1}{2}$ miles from Colombo, the Railway line crosses the road from Ferry, near the 5th mile post from Passyale, and here a small At $37\frac{3}{4}$ miles from Colombo, the Railway line crosses the road from near the 39th mile start of the roads. Here should be a first distance of the roads and from the north cost, and a hidden and from the north-east, and a bridge in lieu of the Allowe access from the Kornegalle side of the country, and would no execution. From this station, the Railway will ascend Oya, crossing about 5 miles on varies the toot-road from Ferry (where, probably, hereafter a small station ma continue along that bank to a point about two miles an where it will cross the Maha to its north eastern bank, north-eastern bank of the Hingoola, till it arrives Colombo. Here long sidings and a long approach station, will be desirable for waiting wagons, as this st the Locomotives, before ascending the Ghauts, or passes in Province. From Gordon's Bridge the Line will cross the and will take the left or south bank of the Gadadessa the north bank of the same stream near Mr. Lambe's s station for several Estates, the traffic of which will con station the Railway Line will keep the right bank of th dient enables it to turn over the high land which separa Hingoola, into the valley of the latter, up which it is can Bridge. Here another station will be required for the according to the according to the station will be required for the according to the accordi the neighbourhood of Amboolwawa. Continuing up a north

the Railway attains its summit level of 1690 feet above the Sea, at the east end of a Tunnel 750 mid. The 25th, at about a mile and a half from Craig's Bridge, in the valley of the 11th value, there are the Hindu Temple of Wallapolla. The Line then descends to the Kandy and Colombo road, at the 64th mile stone. Here should be a station for the accommodation of the Allagalle Estates, and for the populous neighbourhood of Kadooganawa. Crossing the Kandy road at this point, the Railway descends along the north bank of the Nana Cya, crosses the Kandy road again at the Nana Cya Bridge, and keeps the vale of the Nana to its junction with the Mahavilla Ganga. It crosses the Gampola road at the I and Bridge on that road, one mile south of Peradenia, and seven miles north of Gampola. Here should be a station for the traffic which converges from all sides on Gampola. The Mahavilla is then crossed at an elevation of about 40 feet above its bed, and the Railway Late proceeds in a nearly straight direction skirting the south of the race-course and thence parallel with and on the south side of the Colombo and Kandy road, to the entrance of Kanara, terminating in the open plot of ground, which is the property of Government, opposite to the Post Office; and at a level which renders it capable of extension onwards at the Post Office; and at a level which renders it capable of extension onwards at the Post Office; and at a level which renders it capable of extension onwards at the Post Office; and at a level which renders it capable of extension onwards at the Post Office; and at a level which renders it capable of extension onwards at the Post Office; and at a level which renders it capable of extension onwards at the Post Office; and at a level which renders it capable of extension onwards at the Post Office; and at a level which renders it capable of extension onwards at the Post Office; and at a level which renders it capable of extension on wards at the Post Office; and at the Post Office; and at the Post Office; and at the

mend deadly with my instructions, there are some places where the Line may be deadly with my instructions, there are some places where the Line may be deadly with my instructions, there are some places where the Line may be deadly under a licence similar to that which Parliament allows to Railway the Line Line and the licence (which is there confined to 100 yards on either side) and to 100 yards on either side in the Town plots. I have preferred open to these amendments, rather than to make them myself, because they one to any experienced eye, when the plan and sections are compared and they may be easily made hereafter when the Line is finally set out;—the latter of the latter of lat

Together provided against beforehand.

towards construction, as the determination of a general Colombo end, the Bridge over the Kalany is a work of of firm sand overlying rock, as far as I have been able to tover the River Severn, in Gloucestershire, which I laid pitt, the well-known Contractor, offered to construct, in se a different construction, in iron, for the Kalany Bridge, From this point, there is no work worth mentioning, till 5th mile. Here, an ordinary Bridge, about 5 feet above lowered,) and with about 150 feet width of water-way for building about the spot, and also on the foundations. most important works on the Line, — a Viaduct to cover teight of 107 feet above the latter. There is good stone is almost the same in height and length with one I which the total cost, for double way, was £9,300. The

Hingoola Viaduct, at Gordon's Bridge, being for single way, ought to cost less, There are no works worth mentioning upon the ascent of the Ghauts to the hill country, unless

we except some heavy work in the Gadadessa which is susceptible of amendment.

The line is scraped, as it were, along the sides of the hills, like the Turnpike roads, whose constructors deserve great credit for the skill with which they have thus carried them up Passes apparently so formidable at first sight. There are some formidable looking cuttings on the upper Gadadessa, but the material is excellent. The Wallapolla Tunnel begins at both ends in clay, but will soon run into indurated sandstone, formed by the disintegrated quartz and mica, which are evident in the numerous natural sections around. No doubt, blocks of solid stone will be met with in it, and it must be carefully drained; but with these points of foresight provided for, it will be found to be a very ordinary work. It might be dispensed with altogether, by a deviation of the Line, if the name of a Tunnel be distasteful; but I prefer it to open cutting in the position it will be in, on account of the comparative safety from rushes of water. The Nana Oya will be crossed thrice, and deverted in another place, but the bridges will be insignificant. The Mahavilla Bridge will require about 200 feet for water-way, and will, probably, be the most expensive Viaduct next to that of the Hingoola. Stone is to be had on the western bank, and for the arch, I am inclined to recommend an iron lattice design, with a single span. From this spot into Kandy, there is no work worth naming. The terminus is on the level of two roads, thus giving a double frontage for Goods, as well as for Passengers; and there is a mound of earth at the spot, to afford excellent material for the station-yards and platforms, so as to serve a large Goods trade, which will, no doubt, be done here.

Continuing with details of the Line, I must next mention the principal curves. are easy, until we get into the tortuous basin of the Maha Oya, beyond the 50th mile. Subsequently, the Line is laid out with curves of 12, and sometimes of 10 chains' radius, in situations where deep cutting or lofty imbanament is to be avoided by such current of the curves are of like radius with those at Bristol on the Exeter Line, and at N on the Birmingham and Liverpool Line; on the former of which I trequently pass Express Train, at 35 miles per hour. The only curves of smaller radius are at Bridge Station, and at Gadadessa Station, each of about 8 chains' radius, which is the same as those at Southampton on the South-western Line, and at Birmingham on the Midlands Line; over the latter of which is daily passed all the trade of the Midlands

way, between Leeds, Derby, and Bristol.

I have now to state the material to be found on the Line, and the mode I recor

executing the works.

First then as to the material. The almost universal material of the district which the Railway will pass the whole way from Colombo to Kandy is of a granit classist syenite, gneiss, hornblende, and granite, are found to compose the stones we pict up and the boulders and masses we frequently see around to compose the stones we pict up and the boulders and masses we frequently see around to compose the stones we pict up and its such as I have never witnessed elsewhere to be same extent. Universally are cut,—(and from 20 to 40 feet deep in ma colaces) with the space or rather at the dealy into a face of what I took to be grantic rock, but I took to be grantin took to be grantic rock to be grantic rock to be grantic rock t th that About of this to be met with in the shape of boulders and emptive masses stone and rock will continue for two or three hundred vands, but than two instances. Mr. Evatt, the Assistant Commission

finds he has to send long distances for a sufficient sapply of The roads are usually cut with a slope of a quarter to c (disintegrated felspar) to be found frequently, and many bro along the roads: Kaolin clay is not unfrequently met wil

become an article of transport.

Limestone is found in abundance in chrystalline form Peradenia. At Colombo coral is used for the purpose the Civil Engineer of the Colony, and who knows the Is found on the banks of the Maha Oya, where the Railway

self seen any there.

Timber is abundant for ordinary building purposes, a Chiefs that they have on their estates along the Line of Rar but I do not believe that this will be found to be so. Althe be had, - and probably quite enough for temporary sleepers, fo buildings, and such Bridges as it might be desirable to use wo be very few)-still I think the permanent sleepers must, in the if cut in the country and carried to the Line, they will cost as much a list of eleven woods of Ceylon which seem well fitted for sleepers, and of 24 woods from the opposite coast of Malabar which have been found to be so. Besides these, several other woods are well known for dry building. For fencing I should prefer the "Indaroo;" but there are sandry other quick growing woods-" Sooria," "Prickly Pear," "Cactus," and "Alos"-which if properly treated, will make excellent fencing at about one third of the prices which we pay in England. Ditching will form the Railway fence for many miles.

The entire line is be-strewed with ballast of the best description, except only where it passes over the paddy (rice) fields. The maintenance of such a line ought to be cheap, if the drainage is carefully and skilfully made and attended to afterwards. In forming the Railway through paddy-fields, special care should be given to the water levels, and penstocks

should be provided wherever necessary for the irrigation.

The best mode of executing the Ceylon Railway is a matter of the utmost importance to be well considered, and as a point involved in such consideration comes the question,-How is labour to be provided for this work?—A question viewed with alarm by the Planters, and in which view I confess, I concurred to some extent, until I had more fully studied the question. I am now persuaded that under such wise and cordial co-operation between the Railway Company and the Government, as I have elsewhere stated to be indispensable to the success of the undertaking, not only may sufficient labour be provided for the Railway without draining labour from the Estates to any appreciable degree, but the estates themselves may receive a surplusage of labourers from the Railway, just as in England I have found that during harvest time our numbers on the Railway diminished when we were not undaly pressing the works, and not paying time wages to our labourers on those

I think that the Railway Company should have a liberal discretionary permission accorded them by the Government, to apply a portion of their funds to aid the contractorsbunging from the several coasts of India where labour is abundant, and not from the such lab up as by conference with the contractors may be deemed purpose. The Company thus acting, not by way of interference with medium through which the contractors' association (if I

ract either together or separately.

the summit of the Line, which is an ordinary tunnel, accessibrick-earth, fuel, and stone at hand, and therefore, peculiarly open

to any tenders from English Contractors, to compete with those more locally acquainted. The fifth class of works are those which comprise the Permanent Way (rails and their bearings and fastenings), and the Working Stock. For the supply, in the first instance, of these articles, except timber bearings, the Railway Company must be dependent upon England; but as soon as the patterns are thus imported into the Island, local makers will be found to make, in a way better suited for this country than can be done in England, all the wood work of the carriages and other appurtenances of the working stock. I have seen specimens of the Island make, which lead me to believe that these items will form a new,

or rather a greatly extended branch of local industry. With regard to the mode of executing these several classes of works, it will be evident to those who know the Island, that it is only the Tunnel, and the larger masses of earthwork that will require any importation of Europeans, other than overlookers. Out of 79 miles of Railway to be formed, about 50 are either side cutting or ditching, and the remainder alone will require wagons and rails for leading the excavated material to embankment. The hill country will require careful drainage on the tops of the slopes, and I have estimated for forty culverts per mile over this portion, so that the Line, when thus properly formed, shall be kept dry and safe from liability to sudden rushes of water, which rapidly destroy some of the minor roads in the Island. The Kandy and Colombo Road, where it enters the Passes, is as good a sample, as I can point out, of the mode of formation by which the Railway should be kept dry: and the hill-road close to Kandy, called "Lady Horton's Drives," is a fair sample of what the Railway will be, when its cuttings are formed through the Hill Country. The only addition I can point out is, that a catch-drain should be led along the top of the slopes of cutting, in every situation where water can, by possibility, make a rush towards them; and these drains must be led right down the slope in steps, and under the Railway clear down the hill.

The Bridges and Viaducts will require nothing more than foresight, to provide the stone and brick in time for the earthworks. I think the larger spans will be best executed in iron; and, for the Kalany, I should recommend the piers to be iron cylinders, laid in the admirable manner first introduced by Mr John Hughes at Rochester Bridge, and now well

known to the profession.

If the Railway Company will confide the laying out of their works and their contracts to an Engineer capable of organization, (rather a rare quality), and at the same time skilful in his technical application, and will abide by the principle I have here endeavor shadow forth, they will have an ample margin for executing their works, and e the Railway I have recommended, within the sum already stated, namely, £856 557 on the contrary, the Company neglect those precautions, they will increase their expenditure and diminish rateably their dividend, and the funds of the Island will proper tionage. ly suffer. The Company must organize an efficient and well paid staff of skilful I under a chief who can control and keep in perfect and harmonious action, a force as large as a division of the British Army, -say five or six thousand people, with all the apple ances. The Railway Line must be subdivided into portions, comprising distinct and server rate works; each portion being in the responsibility of an Engineer, who shall depend on the responsibility of an Engineer, who shall depend on the responsibility of an Engineer, who shall depend on the responsibility of an Engineer, who shall depend on the responsibility of the respo set out each work, and place it in the hands of a Contractor, and control the Contractor with vigilant supervision till the work is completed. The contracts must be simple and clearly drawn up by the Chief Engineer, with sufficient detail to enable a Contractor to the what he is required to produce, without tying him too much as to his mode of production. If this system is pursued, sufficient competition and labour will India as well as from Europe.

I have now to state the prices upon which I think the actual (including overlooking, and all materials, except a certain qua may be calculated, and to which each Contractor must add su petition will admit, taking into account, on the other hand. that he himself may devise for executing the works.

leave him fair margin for a profit of 20 per cent.

These costs are as follow :-

For clearing the jungle, at from 30s. to 50s. per acre. For fencing on the ordinary line, from 3d. to 4d. the lines For fencing at stations, from 1s. to 6s the lineal yard, sin For earthwork formed by side cutting or by ditching, from

on the average. For earthwork excavated and led beyond the above stated 1 per cubic yard, (in addition to the side cutting or ditching price mile so led, the use of a certain quantity of permanent rails being .

For blasting runs of rock in the cuttings, an average price of 2s. 9d. per cubic yard. For masonry in upright walls, from 5s. to 11s. per cubic yard.

For masonry in upright walls, dry laid, from 2s. 6d. to 3s. 6d. per cubic yard.

For brickwork in upright walls, from 13s. to 15s. 6d. per cubic yard.

For brick work in arches, from 7s. to 17s. per cubic yard.

For ballast leid in place, an addition of 4d. per cubic yard (upon the price of earthwork, if previously paid as such beforehand), with the price for leads respectively, as above stated. For rells and all other iron work the English market price of the metal, with 30s. per

ton in addition for freight to Colombo, and an average price of 30s. more per ton for delivery from the ship to the line.

For fitting permanent way, for the first 30 miles so fitted, double the English price, say

2s. per yard, and after that say the usual home price, with native fitters.

For timber at Colombo from 1s 6d. to 5s. per cubic foot, and in addition an average price

of Od per cubic foot for delivery upon the line.

For Station buildings, an average price of from 3d. to 6d. per cubic foot of capacity of each building taken from the outside dimensions : and without interior fittings.

For freight from Great Britain to Colombo an average of 30s. per ton for dead weight,

but carriages or engines sent in bulk must be specially allowed for.

For carriage from Colombo inland a rate of 5d per ton per mile, but an addition must be made to this, dependent upon local position, if the delivery is to be made away from the main or any good cross-road.

For labour of excavators or ordinary labourers on the roads, from 6d. to 9d. per day. For Isbem of masons, bricklayers, smiths or carpenters, from 1s. 2d. to 1s. 6d. per day.

For overlookers, from 1s. 6d. to 2s. per day.

All tools for European workmen, or indeed, tools of any description, to be relied on, must

te procured from England. Upon the basis of these prices it will be found that the Railway works as exhibited by

the Plans and Sections appended to this Report, will not mount up to the sum total I have and for them, and it must be remembered, that my estimate of £856,557 includes the precions of land, the working stock and the cost of the accessory establishment during the which I think ought not to be pushed hastily, while, at the same must be exercised by the Government, that no time be wasted. desirable to open any one portion of the Railway before the whole raffic,—chiefly because the lower division of the line near Henneretorks which will take as much time to execute as any works upon the and the cost of opening patches of Railway, (when the total length is unseldom, if ever been found to be answered by any corresponding profit. Tomber the people of clauses of agreement with the Railway Company, as portion of the Line beyond three years from its

Pass within three years, if the opening of the see that the same sum of £856,557 only, is required for the trunk to know with its rolling stock, and that the agreement with the the sum of £1,200,000 to be raised for the purpose of may feel matter of further consideration, whether the balwho lie or is part to an extension of that trunk Line. Now a lappear that two districts, one on the north-Randy, possess each at present a considerable traffic and the direction of Matella and Hoonisgirikanda, I give a rent of about £137 per mile per annum, and to the south east of that place and not including Livit £107 per mile per annum. The latter direction has for the formation of a branch Railway as far as Gampola would probably be executed for £50,000. A similar extenwould be more costly per mile, because the direction must e to the river Mahavilla, and an expensive Bridge must be et of land through Kandy must be purchased. Seven miles d of the Yatlewera Oya, would cost probably not less than the Yatlewera is the key to a northern Line, for the future, and cellent road from the rich districts of Matella and Maturatta,these sums amounts to £120,000, still leaving a margin upon the it may be well to consider how far a judicious expenditure in one

or both of these directions may benefit the principal interests of the Island, and still produce a remunerative return sufficient to redeem, or at least to relieve, the guarantee. The earnings of the Matella branch (based on the above receipts of tolls) would probably not exceed £7,000 per annum for the first two years, and the earnings of the Gampola branch on a like basis would probably not exceed £4,200 per annum during a like period; but it must be considered, that in addition to this, the traffic of the main Line would receive a small increase per mile which it would fail to get, were these extensions not made. In point of time, it may be well to wait until at least the period when the contracts on the main trunk line shall be nearly completed, or even till it has been practically shewn that the trunk will pay the guarantee, but it may also be well to have this part of the subject so previously considered and arranged, while there is ample time for the arrangement, that no frittering away of the surplus funds of the Company shall be allowed either on ornament, or on ill-judged amendments of a plain and practical working Railway,—instead of applying those surplus funds in extending the working rail, where it shall accommodate the public and reap its own fruits in return for the accommodation, under equitable agreement with the Company as to the extended length of Railway, which would

I must now finally state the grounds upon which I am of opinion that this Railway, when completed, as I have above described, for nearly £857,000, will be remunerative to

the Company apart from any guaranteed dividend.

Having before me the returns of Exports from and Imports into the Port of the returns of produce in the Kandian and Western (Colombo) Provinces; and I olombo; prices of articles, in those respective positions, I find that while the districts which the Railway will connect is Coffee to go down and Grains to g there are a number of other articles which may be enumerated under about 4 heads, which will be interchanged beween the districts in question. I find in an article in Colombo differs in price from the same article at Kandy as much as to 100 per cent. at the same period. This applies to 17 articles of general and dail sumption, without taking into account any or the numerous minor articles whice items of Railway carriage. I find further, that between Kandy and Colombo 100,000 journeys of bullock carts (bandies) 100,000 journeys of bullock carts (bandies,) each conveying when loaded an aver from 12 to 15 cwt. were made during the year 1856, and although I have carefully were these bandies, which literally swarm on that Road, and cause the greatest conceivable nuisance to faster travellers by blocking up the way, I have not been able to discover mor than three that I could positively say were empty. It is aureasonable to detay cour. that there must be a large goods traffic on the Railway under these circumstances, a I estimate the amount which may be derived from these sources if freignts and station the Railway are properly arranged, at nearly 685,000 per annum, the proportion be two-thirds of the weights to go up, and one third down the Passenger tradic at I sent restricted to the daily Mail coaches up and down which care box between the aud Colombo, for 72 miles, or at the rate of the per mile, but to be so poor as to be unable to pay that rate of fire are taken that the private of 4d. per mile—a rate higher by nearly one half than that paul to wealthing man in England, for his seat in the most luxurious follows a rate of the private or him to back. It is not be wondered at, that croy back. It is not be wondered at, that croy als of natives are med their bundles over their shoulders. It is the calculation of on (merchant tradesman) of Kandy, that it costs a native four s go to Colombo to do his business there, while if he trusts to pays dearly for it.

Besides the numerous passengers whom ordinary business of conveyance force to go on the tramp - there are at cert who congregate from different quarters to visit sacred by

near Colombo, and another at Kandy.

The coolies, who now incur a frightful land journey fre vince, averaging more than 160 miles, may be saved both fatigue and waste of life by taking to the Railway.

From these elements and allowing for the usual "Railwa and private travelling, I make a total of nearly £26,000 per from passengers, provided that the trains are arranged and the the times and means of travellers.

Thus, I get a total of about £111.538 per annum as the revenue first year or two of Railway travelling, when the entire Line shall

and Colombo.

w, on checking this by two methods, namely, by the earnings per train mile run, which are made on the partially opened Madras Railway, (65 miles), and by the Tolls received on the Kandy and Colombo Road, I find the mean of the two gives me about £107,000, as the probable earnings of the Ceylon Railway for 79 miles. It must be remembered, that the Madras Railway is in a very crude state, recently opened, and its anthorities and the Government are quarrelling like a house divided against itself; and as I am persuaded that the turnpike tolls give us the safest criterion by which to judge of the Railway traffic, I give the case which I found on them in detail.

In 1857, the Tolls between Colombo and Kandy, at the six bars on that road alone, without taking into account any branch Tolls, have sold for £28,588 for the year. Taking into account the expenses and profit of the Lessees, the earnings of those toll bars cannot be less than £30,000, and indeed they are put at a higher figure by the most experienced Officers of the Government, who have the charge of the Financial Department; but to stop all question, let us take £29,000 as the earnings of the Road. These Tolls have steadily increased each year up to the above figure since 1854, when they rented for

The olls are 6s. per Bandy (Bullock Cart) per complete journey. £17,678. The Dandy takes 15 cwt. down, and 12 cwt. up, on the average.

The jerrney up and down costs the person who hires or employs the Bandy from 70s. to 80s. - but say only 70s.

Thus we have tolls paid to the extent of 12s. upon a cost of 70s., or about one-sixth as

the ratio between tolls and sums paid for carriage of goods.

The coach does not pay toll at all, being a Mail coach; but when hired as a private convevance, it pays, (or ought to pay,) 24s. for the double journey, for which the hire is £20, or about one seventeenth as the ratio of toll to cost.

A morse hired to ride would give about one-seventh as the ratio of toll to cost.

But I we take no ratio higher than the Bandy ratio, (which is the lowest,) we get \$25,000 × 6, or £174,000, as the cost paid by the public for conveyance between Kandy and the still be paid for ordinary conveyance by Road when the Railway is made: than the phance thus left for the Railway is £130,500 per annum.

Lower Caraffic, that I know of, exists where less is paid, since the opening of a Railthe light was district, than was paid before such Railway was established, but notorious y more is always paid for locomotion by the public after such Railway has been

From these three analyses, viz: - The detailed calculations which produce £111,538, tarn, which lead us to see the way to £130,500, and the comparison of those that the later armings which give us £107,000; my conclusion is, that the earnings of the Railway for the first two years after ,538 per annum, and that after that period, its traffic will

to us shewn by the turnpike tolls.

the probable expense of working the Railway, which expense the carrings before any dividend can be paid. I am of opinion, and the carring expenses founded on a per centage of earndecoducted traffic, or one with light passengers and heavy goods, ligher per centage than on a Railway better managed and more think the Ceylon Railway will be less favourably circumways, in so far as the proportion of work done (or miles run) an that done with passengers; still I do not think the expenses arnings ought to come up so high as 50 per cent. Taking 48 re, the expenses on £111,538 would be about £53,000 per

> mileage, I think the Ceylon Railway will require to run annum, and taking the present cost of the Indian Railways which I believe they really are working at), and adding to erance of goods trains on the Ceylon Railway, - we get the the probable amount of working expenses for a traffic earnbelieve this is as truthful an approximation as can be at ius is, of course, the sum available for re-payment of guaranteed

ice that part of my instructions, which desires that I should oMr. Drane's line."-I would rather have left this subject in silence, that line was reported upon, and very nearly adopted, involves That I must not shrink from stating the result of the consideration I

Mr. Drane, a young assistant Engineer at the time he surveyed this line, deserves credit for having selected the best general tract for his line, that the country afforded between the rivers Kalany and Mahavilla. But there were no commercial termini to the line, the Plans and Sections agree with the information given to me on each spot where they terminate;—seven miles from Colombo in a jungle on the river Kalany at one end, and three miles from

Kandy at the other end in open ground-near, but not on the turnpike road.

The Chief Engineer of this line knew nothing of the Country from personal observation; and his Report both mystifies and mis-states the position of these termini. I must also declare my conviction—after examining the ground with the Plan and Sections before methat the ground, in several places (and I allude more particularly to the Section representing the Line in the basin of the Maha Oya, and in the dell of the Upper Hingoola) cannot be found as there shewn, and that, consequently, the Estimates had no reliable basis. In fact the detailed Report, and the Plans and Sections disagree among themselves, the statistics of traffic were all but worthless, and the interests of the Company and of the Island have fortunately escaped from the inevitable consequences of beginning a work of magnitude upon such data, which would have involved an expenditure of fully a quarter of a million more than I have recommended in this Report.

I wish not to be mistaken while expressing these strong remarks—Mr. Drane acted well in the position of a Surveyor; but to place the line in the hands of a Chief Engineer, who had never seen the country, and knew nothing personally of the material to use, and the resources to apply in that country, was a gross error of principle, from which the Company may be thankful they have escaped. May they be thus fairly

warned for the future.

I cannot conclude this Report without expressing publicly to the several Officers of Government as well as to every individual whom I have addressed for information, my acknowledgments in return for the prompt and efficient manner in which Maps and Statistical papers, as well as the prices and specifications of various local Works, have been placed by them at my disposal. The labour of compiling these has been considerable, and I can only hope, these gentlemen will perceive that valuable strvice to the Island has resulted from the analyses of their Returns, which are embodied in this Report. Every facility has also been afforded to the Surveyors, and aid in addition frequently and freely extended to them, by the hospitality of the Planter in the reighbour-hood of their work, which has comprised 120 unless of trial sections, and in addition about 160 miles of flying levels; much of the work having been on through dense jongle, and under the intense heats of the hottest season in Ceylon, during which he surveyors have been so providentially spared that not one case of serious illness has been experienced throughout their arduous service.

The valuation of lands and property required for the Railway, has been made by Mr. Bailey for the Western Province, under direction of Mr. I available by Mr. Adams, for the Central Province, under direction of Mr. I available by Mr. Adams, for the Central Province, under direction of Mr. I available by Express my thanks for the ready manner in which this service has been performed. The sum estimated and allowed by Government for this Survey, has a large to the sum estimated and the expedition shall have finally returned to England, I believe I are correct in saying, that without trenching upon the contingent fund, the Survey will have been a supered within the Estimates by about five per cent.: and this is the best carries? I can give that the Railway, if properly handled, will be constructed within the survey of in my best of the performance.

REPORT on the Natural History of the Pearl Oyster of Ceylon, by E. F. KELAART, M.D., F.L.S.

HAVING understood that some account of my researches into the Natural History of the Pearl Oysters of Ceylon, is desirable, even at this early period of my labours, I shall endeavour briefly to sketch a Report, that can only be considered in the light of an Introduction to a more extensive and prolonged series of observations; which, if means are afforded me, may be brought to a more speedy conclusion than I have any prospect of doing

at present.

2. Before I proceed to detail the results of my researches, since I was commissioned by His Excellency the Governor, in March last, to undertake this desirable investigation, I have to acknowledge the great facilities which the aquarium gives, for the investigation of the natural habits of Molluscs, and other moderately sized fresh and sea water animals. Without glass aquaria and a powerful microscope, I should not perhaps have obtained even that information on the minute anatomy and habits of the Pearl Oyster, which is embodied in this Introductory Report. Soon after my appointment, I ordered out large glass aquaria and other apparatus, which will be of service hereafter, to myself, or to those who may be engaged years hence, in reporting to Government, from time to time, the natural condition of the Gysters in their various banks. In the mean time, I have made use of large glass globes and Ceylon manufactured aquaria, made of thick crown glass, roman cement, and state purchased from the Naval Stores. Large chatties too, and tubs, are also in use. The Oysters thrive best in chatties, but these do not afford the same opportunity of seeing their habits as glass sided aquaria. I have also, in addition to the above named means of observation, had perforated wooden boxes, with a few Oysters in each, deposited in various depths of the sea; and latterly, I have used large canoes (ballams) for the same burgese :- lastly, though perhaps of most importance, I have had unexpected facilities of distriction among the several small beds of Oysters, found in the Inner Harbour of Trinare found of all ages and sizes, at various depths, and different kinds of The mo Naturalist has perhaps ever had the same opportunities of observing Pearly Mollusc, as I have at present.

O ster, and this I may perhaps do most simply, by describing, in a content of the external and internal structure of the species of Mollusc producing the

Paris of Caylon.

described by which it described in the Manks of Arripo, and the Pearl Oyster, found in the Banks of Arripo, and Harbour, and other parts of the Island, does not belong to the same Oyster of Europe, although, in its internal structure, it has a resemble and Mollusc resembles more the Mussel tribe than the Oyster; more has like the Mussel, a byssus or cable by which it attaches itself to form to others of its kind. The only source of information that I know of alable to the Ceylon student, is to be found in "Lebeck's Account of Ceylon, 1797," to be seen in the Appendix to Captain Steuart's book.

The check gives, is very imported, and excites a smile in the modern preferror is executed in any account written in the infancy of the land for a sees, and the "ovaria" for "lungs." This is a few that hings and the anterior edge of the shell, easily took like tour, or two pairs, of whitish (in a few can) seni-lunar combs or bands, stretched from side to

sters of all ages, and have noted the structure of the thich will to the subject of illustration in a future scribe the animal; as it is of the greatest importance, aince of the animal structure, before a physiological understood.

Pintadine méreperle.

Mootoo Cheepee. Tamul, Sing.

Mytilus margaritiferus. Linn.

Margarita sinensis. Leach.

Avicula margaritifera. Roissy. Avicula meleagrina. Blain. Avicula margaritifera. Sowerby. Avicula radiata. Leach.

Conchologists have long agreed, that Lamarch was right in separating the "Pearl Oyster," par excellence, from the old genus Avicula, of which there are several species in Ceylon, some producing valueless pearl of a dusky blue and blackish colour. The only description of the Pearl Oyster of Ceylon I have access to, is Lamarck's, in his "Histoire Naturelle sans Vertebres," and that, too, is only of the shell.

" Meleagrina testa, subquadrată, superne rotundată, fusco virente. Alboradiata, lamellis per series longitudinalis imbricatis, superioribus majoribus."-Lamarck, vol. 7, p. 107.

6. The Ceylon shell is a variety of that above described. The white radiating lines are alternated with rays of a red or black colour. Doctor Templeton made it appear, that the Ceylon variety corresponded with Leach's description of his Avicula radiata. I am more inclined to believe, that they are only accidental or occasional varieties. The shell, however, appears to attain a larger size in America, and in the Persian Gulph, than in the Seas of Ceylon. In the largest Ceylon shells, the red or black radiating lines become obsolete. If they are permanent varieties, they are both found in Ceylon. I have a faint recollection of having seen both varieties on the Pearl banks of Arripo. I had also a small perfectly white Pearl Oyster; this may be an Albino specimen, or Lamarck's Meleagrina albina. M. testa albida, irradiata, absolete squamosa; auriculus duabus semper distinctis,

originally found on the coasts of New Holland and Van Diemens Land.

On removing the animal from the shell, the whole of the internal parts is seen enveloped in a membrano-muscular covering, called the "mantle," and known popularly in Ceylon as the "skin." The free border of the mantle lining each valve, dips downwards, to meet a similar veil on the opposite side; thus forming a kind of double fringed veil. The one set of tentacular fringe, in immediate contact with the shell, is composed of hairy tentacles, looking horizontally forwards, the other, about three eighths of an inch apart from the former, and lining the edge of the mantle, from side to side, looks downwards, and dove-tails with the tentacles of the opposite flap of the mantle. These tentacles consist of a series of long and short flat filaments—the long ones having lateral filamentous projections, and tentroles are exceedingly sensitive; and one would armost give them the power of the ; for act only the touch of a feather, but the approach of one, when the animal and in good health, makes them draw forwards, and perfectly shut out the intruder the molleges have no organ of sight, I have no doubt that the delicate nerves was a se distributed through the mantle and its tentacular processes, possess in some day the sense enswering to vision in other animals, as well as of touch I for an Orster will be observed rapidly to close its valves on the approach to the aquarium of a lighted earlier of the approach of a hand, or the shadow or a person, near the glass sides of a vest in the approach of a hand, or the shadow or a person, near the glass sides of a vest in the it is confined. I should not, in a popular Report, advert to this physicial at a pert, but that the senses of the Oyster have a great deal to do with its habits, not at a the aquarium but also in its native bed. Were it not for these delicate frames surposed a the months, the softer parts of the Oyster would easily became the food of a convivocous creatures, abounding in the sea; and many those Pearls would drop to the shell, than do now with such sentinels at the entrance of its external run. I would be shell, than organ the animal has for the formation of the shell if a locative of the light of the animal has for the formation of the shell if a locative of the locative organ. organ the animal has for the formation of the shell; the increase or a selected dimension of which, and the formation of the pearly nacre, and Pearls of this important investment. If it is injured, the pear abundance over the shell, or if, by some cause, it bee grow rapidly, and the mother-of-pearl living is jagged a brilliant colour. However its temporary retraction other irritating particles, which doubtless become the i hereafter observed. The forepart of the maatle is cole colouring matter is secreted by glands found in these serves the purpose of increasing the lateral and longit is after this is deposited, that the pearly secretion (nother shell, which, concreting or solidifying, increases its creted by nearly the whole external surface of the man stood, that when a grain of sand or the larva of an inse and shell, it will become covered over with the pearly se is augmented at the part where the foreign matter lies. 1.

with the aid of the Microscope, in its very earliest stage. About one and a quarter inch from the rim of the shell, is s segments of a circle, or semilunar combs, stretching transve

other, the convexity looking forwards. There is a vacant space between the concave surface of the gill and the body of the Oyster. The adductor muscle, called "grizzle," is now seen, covered over with the delicate membrane. This muscle is attached to the inner surface of both shells. On one side (the left, when the Oyster is placed with the hinge next the observer,) is seen a short, conical, tubular, sharp-pointed prolongation; this is the terminal end of the intestines; it looks like a sharp-pointed claw. The intestine is short; leaving the stomach, it winds round the adductor muscle, and terminates, as I have just remarked, on the side opposite to where the mouth is placed. There is always an nnclosed space, between the edges of the mantle, when the tentacles are brought together, admitting of the free passage of excrementitious matter; and it was through the same opening between the mantle, that I observed, on one occasiou, the ova escape, in a cloudy stream, which continued to pass into the water for nearly 15 minutes. I failed to detect the immediate part of the animal though which the ova found their exit; and I have not beer able to detect a regular oviduct. The ovaria, when distended with ova, cover nearly the whole of the stomach, heart, and liver, and project even on the conical caecal process of the stomach, and also on the base of the foot. The stomach is very small, placed in the centre of the liver; the esophagus is very narrow, scarcely admitting a moderate sized probe; it is about 3 lines long. The mouth, situated near the hinge, behind the foot and byssus, is a horizontal slit, of about 3 lines in length, in the duplicature of the lower pair of labial palps. These palps are large, broad, truncated anteriorly, and rounded on the sides; the inner surface plaited, or rather grooved. The sense of feeling, or touch, is no doubt, by this rugose structure, greatly increased. The palps serve the animal as organs of touch, if not of taste; they also serve to collect feed, and give the animal the power of rejecting indigestible particles of matter, or such substances as might prove injurious.

I have, through the Microscope, ascertained the kind of food Pearl Oysters live on. Fits consists of minute algae or weeds, animalcules and shells, called Foraminifera. Diatoms these minute vegetable forms which can scarcely be detected with the naked eye, and growing on the external surface of the shell; where a host of infusorial and its likewise find a pasturage. So that the Oyster may be said to carry of upon which it lives. The siliceous internal skeletons of these Diated in the excrementitious matter of the Oyster. It will be a subject whether any of these sharp pointed skeletons do not permeate the coats thus become nuclei of Pearl. I have, on examination of "seedling" eleton of a Navicula, (species of Diatom) among the ova; but whether the stomach of the animal, or got there by passing under the mantle, for me to determine.

, like other Bivalves, (Conchiferæ,) are all Monœceous, or rather hergh, properly speaking, they can neither be said to belong to one or two exception of the presence of ovaria (or egg bags,) no other sexual discovered. Doctor Johnson, in his valuable work on Conchology, eræ, "that every individual is sufficient to its own felicity." But howy be regarding the feeling of sexual gratification, it is clearly established agner, that in some Acephalous bivalves, as likewise in Tunicata, olyps, the ovaries of some individuals contain a milky fluid, instead of milky fluid contains spermatozoa, (seminal animalcules.) I have now Meleagrina Margaritifera) as another of the bivalve species of

with spermatozoa, or seminal fluid, in organs similar to of individuals contain ova, or eggs. It will not, perhaps, is important subject, than to remark, that the Native and female Pearl Oysters," is not altogether fabulous. ale Oyster must play in the formation of banks of Oysarly established, that the ova absolutely require the I have not seen more than three or four individuals is; nor have I yet satisfactorily made out any differf the two supposed sexes. The Native divers' opinion, Lebeck, viz., that "the large flat ones they call males, nd vaulted, they call females or Peedoo Chippy," is not rvations. I found well formed ova in Oysters which ossible, however, that in the course of this investigation, covered, by which the male Oyster can be distinguished very small number of males (about 3 to 100) to females, I ome natural or artificial cause, the males are destroyed, the , and that in time, they will become extinct; i. e., supposing

the majority of Naturalists are correct in their present view of the Diœceous character of Oysters. It is just as likely, that Mr. Garner's opinion will ultimately prevail; viz., "that the organs called ovaria, do at certain periods secrete the seminal fluid, which impregnates the ova contained in them; and is then discharged as an excretion by the oviducts." To this observation of Garner I have to oppose the fact, that not a trace of ova was seen in the ovaria of the supposed male Pearl Oysters, which were distended with the milky fluid at the time when the ovaria of other Oysters where distended with ova.

8. The last, though not the least important part of the animal, is the foot. This important member, which has so many useful sevices to perform in acephalous molluscs, requires a more than ordinary consideration. It is that long, brown, leech-like member, which is seen when the animal is at rest, coiled up in a corner on the right side, above the byssus, which, when protruding out of the shell, and moving about, gives one the popular idea of a tongue. It is of a dark brown colour above, and whitish beneath; in middle age it is speckled. It is composed of longitudinal and transverse muscular fibres, the latter interlacing between the former, which proceed in two columnar masses from each side of the adductor muscle; between the bundles of fibres, are placed the abdominal viscera. From its base is sent off, posteriorly, a glistening white fibrous band; this is attached to the duplicature of the mantle, near the angle of the valves. Thus, the foot is seen to be admirably adapted for locomotive powers; and also serves, by its counce with the adductor muscle, to lengthen or shorten the cable or byssus. The foot, in sized Oyster, is about two and a half inches long when extended; at rest, it is not than one and a half inch in length. It is broad at the base, tapering to a conical poi the upper surface is rounded and smooth, the lower flattened and grooved. The groove extending from the base, terminates at the point in an oval cup-like fosset. This groove is lined by a secreting membrane, and is an exact mould for the formation of the bysons at the will of the animal. When it finds a necessity for making one, the foot is protruded out of the shell, and with the tip it seeks out a spot, where it can rest the terminal disof the groove. If not satisfied with the substance or position of the stone matter on which it rests, it removes to another more stituble sports for a (say five or six, if the animal is strong) it rests, and is then retracted with

matter on which it rests, it removes to another more antable san (say five or six, if the animal is strong) it rests, and is then retracted relative leaving behind a strong fibre with an oval disc, of the form of the strong. This whitish fibre is attached to the base of the foot at one end, and the shell of another oyster, at the other. In a day or two, this fibre greenish colour, and looks like hair, with a broad flattened oval rock. This process is again and again repeated, at intervals of sufficiently strong cable is formed. In a large Oyster, removed from the fifty such fibres form a thick strong cable or byssus, which is attached foot by a bifurcated fleshy root. The animal cannot detach the byssus which it is attached, but it has the power of casting it off its own which it is attached, but it has the power of casting it off its own behind, (like a ship letting slip her cable and anchor in a storm, and order to make another byssus, either on the same rock, or an any other cables.

I observed all this process in the aquarium, at a very early period of the second of and was not surprised to find, that the Pearl Oyster having meanly the Mussel, should form and re-form its byssus. But I was an early state of the s by these observations, that Captain Steuart, in his valuable and prices the Pearl Fisheries of Ceylon, was incorrect in denying to the He states, that " it is not believed that Pearl Oysters have " to remove at their own will." I have not only satisfied my seen the Oysters in the aquaria which I have established, or unmoor itself, but likewise that it walks away with it hind; and does not, as Captain Steuart observes, " move w " shuffling" movement alone attracted Captain Steuart's a ant one; as all bivalves without a byssus have it, and it animal, owing to the valves being opened and closed for imperfect must Captain Steuart, a candid inquirer, now say when the Oyster is seen, night after night, taking a wall mounting the glass side of a vivarium, forming, here an fortunate, that he and others should not have made thes ple in their nature, but yet conclusive of the possibility "o, their original rocky beds to other more convenient locations.

Who can tell what the results might have been, had Dr. out? I know of my medical brother's Report (made I belie brief notice taken of it in Mr. Boyd's observations, and quoted b Appendix to his work (page 53). Mr. Boyd's observations clea Wright proposed, some thirty years ago, the transplanting the am

nient for fishing them, when they arrive at maturity. Either Dr. Wright did not observe the facility with which the Oyster re-forms its byssus; or he was misunderstood by Mr. Boyd, who remarks further on, "that surely as the animal has not the power of regaining its adhesion, after it is once detached, it cannot, when once broken away from its attachment, fix itself again, and must either perish, or be carried away by the current."

Now, it is very gratifying to me to be able to speak positively on this subject; and this I do hopefully, as I have observed the Pearl Oyster detaching itself spontaneously from its old moorings, in a glass vivarium, and attaching itself to another part of the glass vessel, not once only, but I have noticed, that some Oysters will go through this process a dozen In addition to the above related facts, I have successfully estimes, in less than a month. tablished a colony of Pearl Oysters near Fort Frederick, in the open sea, at various depths; and have also Oysters which have been living for several months in wooden boxes, finger glasses, glass globes, chatties, and large canoes, sunk in the sea. Some were thrown into the ses, after being removed from the inner harbour and kept in my house in chatties and tubs for two and three days. The byssus of most of them had been broken and torn from These they have cast off, and are now living attached to each other, and to pieces of coral, and to rocks, exposed to all the influences of the sea.

9. When an Oyster is first put into a vivarium, it sickens, i. e. the mantle becomes retracted, and a collapse is observed; - in a few hours it revives, but, with few exceptions, it is on the third or fourth day, that the portion of byssus attached to the foot of the animal is shaken or cast off, and the animal puts out its foot and forms another near the spot where it lies; or walks, by a snail-like motion of its foot, to, or up the side of the glass, to the level of the water, and there fixes itself. Some of the Oysters which were thrown into the sea, are now seen growing on the sides of rocks, four and five feet from the bottom.

am not surprised at these results, for the edible Oysters, without a byssus, have been coown for ages to bear translating with advantage. If Oysters in artificial beds in Engand can live and breed, I see no reason why the Pearl Oyster should not do the same, and, le Oyster, yield a large revenue; or prove remunerative to private individuals,

ertake the establishment of new banks.

one other subject, connected with the interior economy of the Pearl Oyster, i ; and which the microscope which Government aided me in procuring, has

investigate very satisfactorily.

ous commenced about the middle of March last; although I was not offiwith the Ceylon Government till the first of May. I have ever since made dal through April, May and June, every Oyster I opened, young and old, the overial except the few which had the seminal milky fluid; so that the the edible Oyster is in spawn almost from its birth. A precocity serving and doubt and its prectical bearing easily understood. From July to the Oysters examined did not all contain ova; some of the ovaria were only contained a very small quantity. It will be very interesting to proceed the examinations, and to ascertain, whether the Oyster is only in spawn is cother ear, and if possible, to determine whether it spawns more than A land and the 100 Oysters from the Pearl Banks of Arripo, kindby Mr. Vans contained ova, their form preserved, although saturated nicroscepe the ovum is seen to be pear-shaped; each measured

or at its broadest part; longitudinally it is 1000 with a calculated, with the micrometer, the number of eggs confor five or six years of age, and I find that there cannot enwenboek states, that ten million eggs exist in one Eusider how few of these millions of eggs can arrive at the and the great demand that man makes upon the only see in this great fact, the bountiful provision denencial purpose.

John I shall briefly recapitulate the important discoveries

sacious of life, than any bivalve Mollusc I am acquaintwater, and in places so shallow, that it must be exby the sun, and other atmospheric influences. averovers, beyond any idea which can be formed from former

moving from place to place, is inherent, and absolutely neces-This is obvious from young Oysters stayed permanently in one place, adhering to each other, the growth of the animal, and particularly of its shell, would be prevented.

That the Pearl Oyster will move about in search of food, if the locality in which it

is originally placed is not rich in its natural supplies.

5th. That it will move from its original situation, if the water becomes impure, eitherfrom the decomposition of vegetable or animal matter, or muddy; and, probably too, if there is a large influx of fresh water.

That if the water is agitated to an inordinate degree, the Oyster will leave its old

mooring place and seek another.

That a thunder storm will kill some in an aquarium. (Query, if thunder storms

have similar fatal effects on Oysters lying deep in the sea ?)

That the animal can unfix itself from its byssus; and that crabs, shrimps, and other creatures, force them to form a new byssus, by nibbling through the old one.

That it can re-form its byssus at pleasure, if in good health and condition.

That it can live for a long time, without forming a byssus; and that it will re-10th. form a byssus when it has recovered its strength.

11th. That the power of re-forming its byssus, is not confined to the young animal; but that the largest living Oyster I have seen, can re-form it in an aquarium, as well as

in the depths of the sea, but not so actively as the young and middle aged

12th. Pearl Oysters are gregarious in their habits. In placing several young Oysters in different parts of an aquarium, they will sooner or later be found attached to each other. The older ones have also this desire; but their heavy shells impede their motion, and they are contented to remain apart from their fellows.

13th. That taking the foregoing facts into account, there appears to be no reason why Pearl Oysters should not be translated from their native beds, and made to colorize other

parts of the sea.

That the young, as well as the old, are in spawn from March to Septem.

that probably there is no stated period for spawning.

15th. The whole occupation of the Oyster, when fixed to a spot, appears to be, keeping its valves open, and admitting food to its mouth. For several hours the valves tenam open, they then close for a few minutes, or for an hour or two, then open again. It is the the valves remain generally open till towards daylight, when the close, and remain till the sun shines brightly over the horizon. It is during the care part of the algebras soon after sunset, that they exercise, when required, their locomotic power I have watched the Oysters in aquaria for nearly a whole night; and they appear to be then ac tive in moving and attaching themselves to new localities. During the day I have only seen, on one occasion, an Oyster form a new byssus. This nocturnal habit, is deported an instinctive precaution; for should Oysters move during the day, they are more likely to become the food of fishes, and other animals which prey upon them. Their movements are instinctive, and guided by the sense of touch. Darkness sales them better than day light, of the difference of which they are very sensitive.

Most of the Oysters in which I have found Pearly and entered to be a first of the ing been retarded in their lateral growth, and displaced in early life from their fixed most tion on a bank. I am inclined to believe, that Oysters which have abundance of food, and are not disturbed, remain fixed for the last two or three years of their enough to one spet. These are less likely to have a large proportion of pearl bearing individuals among them.

This of course requires more extensive practical observation, eight bour of Trincomalie, or on the Pearl banks of Arripo.

17th. With reference to the formation of Pearls, I have counts found in the best modern books on the subject; exc the view taken by Sir E. Home; viz. that Pearls are forme the ova left behind in the ovaria, are not the nuclei of Pear cape through the distended coats of an overgrown ovar interstices of the mantle, become nuclei of Pearls formed edly examined seed, or young pearls, in process of fore power of 1-5 inch lens, I was able to see distinctly, the through the first or superficial layer of nacre, surrounded readily understood, how an overcharged ovarium will, by so lution, have its coats ruptured, allowing the ova to escal contiguous attenuated parts of the mantle. As Pearls are 1 in the mantle near the hinge, the most likely place where the I consider this very conclusive of the new theory I have here pro serve, that I have seen the vestiges, or cicatrices, in the mantle existed. Though Pearls originate in the mantle, when large they lie loose between it and the shell; or become attached to the " Moth the latter. I have no doubt that Pearls can work their way out it be found entangled in the meshes of the byssus. I also consider it very possible, that an over-distended ovarium is one of the causes of Pearls being discharged from the Oyster and lost. If this be really the case, it will easily account for the singular fact, that a sample of Oysters, fished in the month of October, will yield a larger proportion of Pearls, than a batch of Oysters fished from the same bank in the months of April and May of the following year. These observations are somewhat suggestive, and can be improved upon by future investigation.

12. I have now drawn to a conclusion this Report, which, I fear, has extended to a greater length than will suit the patience of the reader. But the subject being one which has been so long neglected and so little understood, I hope that the Government which has engaged my services, if they do not consider my endeavours as already productive of some practical results, will, at least, see in these researches, glimpses of future success. It is due to Sir Henry Ward, here to acknowledge my grateful thanks, in which my brother Naturalists in all parts of the world, will, I am sure, join, for the gracious manner in which my humble services have been retained, for investigating, fundamentally and practically, the Natural History of a species of Shells, which from the darkest ages of the world to the present has been considered of inestimable value in producing one of the richest of gens. The was when the product of Pearl Oyster fisheries founded Cities in South America and the Red Sea. But what is the state of the Islands of the Red Sea, "whose marchants were Princes"?—They are now thinly inhabited by a miserable race of fisher. The site of some of the Oyster banks in South America are not even now known; they have been destroyed by being overfished. New beds are doubtless forming in locali-Ceylon Pearl banks were once on the point of the subsequent observance of more caution. I was we of the largest fisheries ever made off Arripo, in 1835 and 1836. The Oysdan dering the first half of the fishery were full sized, and yielded a good price, Government was encouraged to pursue The resume Oysters were taken up; many of the purchasers, inflated with former parabased readily, and were ruined; and, I believe, to this day, these over, or prethe same banks, have not been very productive; although twenty years have since same incentious and unscientific plan were adopted on the Oyster banks The state of the results would soon be perceived there. Not a "native" would be flad ven a cultivated one seen any where. If Government desires to have a precatons revent, from Pearl Oyster fisheries, let good laws protect the are now forming; and let means be adopted to secure year more Oysters are consumed in England, than were year and this consumption is repeated year after year, the natural laws having been once found out, they it indeed be a very great source of satisfaction to me, scribed in this Report, suggest to Government an im-

tew still alive, which were translated in May last. If plated, the whole of Batticaloa lake might be converted items placenta has no byssus, and can, therefore, be towal from their native beds, does not necessarily detected on the Pearl Oyster Meleagrina, die from being applied when detaching them from the rocks to which

Large fresh water mussel; but which method, I believe, the real Pearl Oysters. Time, and further experience, are of this practice in Ceylon. Dr. Gray, of the British application of the same means, succeeded in producing ster of England. It may therefore be hoped, that I shall Oyster of Ceylon.* All that I can at present say, is, per tion, and that they are still living, having also reme only way the period required for the formation of good There are some other points in the natural habits of the for future Reports; as precipitate conclusions may mislead

has presented to Government, I have satisfactorily ascertained, that good by these means; so that, if at any time the natural banks are lost to Government than the mere assurance of a Naturalist, that artificial beds of the formed, and that the oysters can be made to produce Pearls. E. F. K.

The Oyster found in the Tamblegam lake, and from which Pearls are obtained, is the Placuna placenta, "Vitre Chinoise" of some French writers, and the "Window Oyster" of English travellers in China,—the shells, from their semi-transparency, being used for windows. The Placuna belongs to the same family of Conchiferous Molluscs as the edible Oysters of Europe and of this country. It has no resemblance (except slightly in the animal structure) to the shells of the Arripo Oyster Meleagrina. When full grown, the valves (shells) measure, at their broadest transverse diameter, from 6 to 7 inches; and their longest longitudinal diameter is about the same; some, half an inch more. They arrive at maturity sooner than the Meleagrina margaritifera, and like the Arripo Pearl Oyster, the young also have Ova. I am not able from my own observation (having been only a few months engaged in these researches) to say, in how many years this Oyster arrives at perfection. But from the appearance of shells of all sizes, and the history of the Tamblegam Pearl fisheries since 1839, I should say, that in three years, this birdlyce Mollusc attains its adult age; and that after that it also large in the pearl in the pearl of the pearl of the pearl in the pearl in the pearl in the pearl of the pearl in the pearl

From the flattened formation of the shells, Pearls are very liable to drop out when the animal reaches its full growth; I would therefore fix, as the best period for fishing, the time when the animal has closed its supposed two years' age, or when the shell measures

from $5\frac{1}{2}$ to 6 inches in transverse diameter.

I have inspected the Tamblegam bank this week, and am sorry to report, the prospect of even an average good fishery before the middle of 1859. The bank, we been overfished. The Natcha Cooda bank is completely destroyed. The renter in 1856 left scarcely any Oysters behind, and this portion of the bank will, consequently, be improductive for many years; possibly never again, unless Government should re-stock it.

Nothing could have been more prejudicial to the interests of the Government, that to have leased out the bank by the year. The Government Agents who could have acted so unwisely as to lease out to native renters a small bank of Pearl Oysters for three consecutive years, without any stipulation as to the size of the Oysters to be fished, must have lost sight of the natural laws of reproduction and multiplication of species, known even to the Native divers. It is therefore very gratifying to observe, that the present Government Agent, Mr. Morris, takes great interest in my researches; that he is after to the importance of the Naturalist's opinion, and has recommended that all young Oysters be thrown back into the lake; a measure which I had the opportunity of suggesting to His Excellency The Governor in March last, but which, I believe, was only partially acted upon, during the last Pearl fishery at Arripo.

I watched the number of Oysters fished during the two da (Keenear), and have to report, that there could not have be day. More than two-thirds of this number were young, at in the lake for another year or more. The renter is evident months he has yet liberty to fish, or rather rain the bank. If all the divers, whom I questioned on the subject, stated, the sent year more than 50,000 Oysters were asked daily arrive at any other conclusion, than that the former centheir finances, from the Pearl banks, when they got Gov the rent, and had the fishery re-sold for a smaller sum,

am informed, of one of the original renters.

All Oysters are very prolific, and the *Placuna* is not the lowest calculation, in three years, there must have wards of 18 millions of Oysters, supposing that there year. The renters' share must have been (allowing Oysters) nearly £2250, from which, deducting the must have derived a profit of at least £1250. To this of gain, (a very ingenious one) from the divers' share on half the quantity fished, but he is not permitted to sell that to the highest bidder. He is obliged to open the Oysters renter all the Pearls, at a fixed rate, which the renter takes go market value. Any plan therefore, which may relieve the divam sure, be thankfully welcomed by at least 200 individuals, wis by diving for Pearl Oysters.

Oysters of upwards of two years of age, (i. e. about six inches ten shillings a thousand, but if there is any competition, they

Combieness
Childen ach
then less
then less
the few
to Wannell, a

fifteen shillings a thousand; for although the Pearls they produce are about two-thirds less in value than those from the Arripo Pearl Oyster, (Meleagrina), the quantity obtained in 1000 Oysters, is at least three times more than what is obtained in a similar number from the Arripo banks.

Upon these considerations, I have to submit for the future guidance of Government,

the following proposals.

1st. That the banks be allowed to remain undisturbed for 18 months after the termination of the present year.

and. That future fisheries be conducted by Government Officers, and the Oysters sold

in the highest bidder.

3rd. That the fishery be held only for two or three months in the year; say, April, May and June, and that a sufficient number of boats be employed daily, so as to have the

matured Oysters fished during this period.

Attr. That the backs be carefully watched, and placed under the immediate supervision of the Translegan Modian, to whom a per centage might be promised on the nett profits of each tone father which yields to Government more than £500. I suggest this per center who know by that any extra work thus thrown upon a native official, will be badly perference unless paid for according to the value of his labour.

The that no thater under 54 inches broad, be allowed to be removed from the banks. That a fourth share of the Ovsters fished he bond fide the divers' share, which

ches start to as there; to dispose or to the hest advantage for themselves.

That these parts of the Tamblegam lake which have been denuded of Oysters by everyshing I be socked with young Oysters, found in the shallow parts of the lake, or which if left in their present position, are very likely to be clandestinely although the banks may be strictly watched.

There s method of divers walking over most parts of the bank, searching for their feet by which means, they crush the young Oysters and destroy the

his Report, that it is worthy the attention of Governof Ceylon with this species of Oyster. The lakes of Immountaite, if stocked with the "Window Oyster," have availed myself of the present opportunity to sters (which the renter gave me) to Yard Cove in ddy bottom promises to be suitable for breeding them. de on a larger scale, to test the full value of translating this I am not able to do from want of funds to meet the dready, in my former Report on the Natural History of some of the Oysters, which were placed in other parts of the ing.

Medical and Zurgical Mints.

ACCIDENTS AND EMERGENCIES IN THE JUNGLE.

THESE hints and instructions are intended to meet the emergencies of the far-off world, where a case may be urgent, and the doctor beyond reach. It cannot be too earnestly insisted on that the first best thing to be done when an accident has happened, is to send away at once for the doctor; if much time must elapse before he can be brought to the spot, or if his assistance cannot be obtained, the next best course to be adopted shall be set forth in these pages, as shortly and intelligibly as possible. Happily for mankind, ordinary accidents require little more from the tenderness and intelligence of others, than the obvious suggestions of good sense, aiding the operations of nature, and committing to her the wonderful process of restoration, which to our encouragement, is often seen equal to the necessity of the case, and bringing about a perfect cure or a well-adapted compensation.

We shall treat in due order of Bruises, Sprains, Wounds, Bleeding, Scalds and Burns Broken Bones, Dislocations, Drowning, &c., Sundry Ailments, Useful Medicaments.

BRUISES.—The best application for a bruise, be it large or small, is moist warmith; therefore a warm bread and water poultice, or het moist flaunels should be put on, as they supple the skin, so that it yields to the pressure of the blood beneath, and thereby the pain is lessened. If the bruise be severe and in the neighbourhood of a joint, it is well to apply some leeches on grown-up persons, but not on young children, because the bleeding may be continued to a very serious extent. Ten or a dozen show the spread over the whole bruised surface, and afterwards a poultice, or flannels should to be continued so long as pain and swelling remain. If the bruise b the poulticing will often require to be long continued, on account of the stimay attend it, and wher left off, it advisable to wrap up the joint in a soat aster.

Be cautious about the knee cancle, because too early use of these parts after injury often lays the foundation for serious mischief, and in scrofulous persons, especially.

those who are young, may run on to the loss of a limb.

Sprains.-It is worse to sprain a joint than to break a limb; and sprains are among the most severe accidents to which we are liable, not only in present suffering, but in their results. In general, the treatment of a sprain is to be conducted as a bruise with perfect rest; and if it be a knee or ankle, the person should lie on bed or en sofa. Warm, moist flannels, a bread and water poultice on going to pain and swelling be consderable, leedles. When the tenderness is st a little pain and stiffness in the joint remain, a vinegar poultice is tion, as it produces a diversion of the low inflammation going co bringing out a crop of pistules on the skin, at a time wiwith any stimulating lininent cannot be borre. Bev joint, which often swell a long time after with straps of soap plater, or a reller

Wounds.—Cuts or chops, if the parts, are the most simple and manas or a toe, may be cut ir chopped off, a per treatment. But, occasionally, a very triffing and simple temperate person, wil prove fatal from locked-jaw. If a and if it do not bleedmuch, or even if it do bleed, but the bathing for a short tine with cold water, it is generally can be easily and simply treated The corresponding brought together as perfectly as possible, and while are to be laid across the wound, with a small space b the escape of an oozing fluid, which often continues to wound should not be dragged tightly together, but me and if the wound be in the finger, arm, toe, or leg. 1 plaster should not overlap, as there is always a dispos hood of the wounded part; and then if the ends do over at least causes unnecessary pain, even if it do not set up sticking plaster, or strapping, be not at hand, court-plaster of tow, wound lightly round the part, and smeared with gum w ed on linen; or, in the absence of all these, a soft bit of line the part, which is quickly moistened by the oozing from the the linen sticks pretty firmly together. Should the bandage, or

aux important lesh, even a finge

tight by the swelling, and cause pain, it should not at once be taken off. but the blade of a pair of seissors should be carefully run beneath it, and it should be divided from end to end, on the opposite side to the wound. This generally gives instant relief, and the dressing requires no further meddling with. It is always better to leave the dressing requires no further meddling with, usually three, four, or five days, and if ing as long as it remains fast, and without pain, usually three, four, or five days, and if

then taken off, either the whole, or the greater part of the wound will be found united.

But if the wound, or its neighbourhood, become painful, and throb, the dressing must be removed, which is best done by soaking in water of an agreeable warmth, or by covering with a wet poultice, which after a few hours softens the dressing, so that it can be easily removed. If the wound he not inflamed, that is, red and tender, and if the discharge from it be good, that is, straw-coloured, and of a creamy consistence, the dressing may be re-applied; but if the edges be red and inflamed, or if they be pale and flabby, if the wound gape, if the matter be watery and stinking, then a single strap or band is to be applied to keep the edges near together, and the part must be covered with a poultice till the pain and inflammation cease, and the matter be of a good kind. Do not mess a wound with Friar's balsam, Tincture of benjamin, or such nostrams, as they hinder rather than encourage its union; and for the same reason, use no greasy applications.

A clean trab, if of depth, although it should not cause any serious mischief, generally does not heal so readily as a cut. because it often unites near the surface, whilst its bottom lodges matter; and therefore, although for some days it may seem to heal very steadily, let then it becomes painful, the wound opens, a gush of matter follows,

and this may be repeated once or twice before the cure is completed.

the suck-to

cut, is to be treated by endeavouring to unite the edges by sticking-plaster cut; but if there be much bruising, the part destroyed must separate and be through the bear of the wound can heal. Apply a bread and water poultice first to much be inflammation; and as soon as matter begins to form, and the extent of the long it and the living; then change it for a inseed-meal poultice, new flesh sets above the edges of the wound, it is commonly improved to prevent the healing of the wound and wrongly apposed to prevent the healing of the wound in the positive may be left off, and the sore lightly bound of the positive may be left off, and the sore lightly bound with the positive bandage moistened with cold water, and carried and the same purpose. If the new flesh rise most also it may be brushed blue vitriol; and sometimes merely a bit of dry

mountail weally be stopped by ressure; -if in the arm, de his fromb firmly in the neck, behind the the pressure is made immediately below the When the injury is below the middle ouigh, remaise may be had to ochief once or twice round the Pord sied rightly and firmly. Be quick water, and let him be put to bed immewere said with much caution, is under rough handmay be torn off with it; and he accident rendered not to treat. Remember, that is it is always hoped inflaming or blistering the skin it is of the utmost be unbroken, dry or wet applications, as they are out if the skin be broken, wet applications, if they can rwise dry ones must be used, the object being to protect in that lies beneath the scarf skin, of which the blister n renders it excessively painful.

dry materials are flour or cotton, or cotton wadding; the wet spirits of wine or good brandy, lime water and oil, lime water r bread and milk poultice; and these wet applications must be mth to feel comfortable to the finger, but not hot. Flour is best dusted on with a dredger, and should be thickly strewed over the injured part and some little distance beyond it. A cambric or thin linen handkerchief, well floured, should be wrapped round it. Cotton should be carefully pulled, so as to be free from lumps or knots, but cotton-wadding is better; the unglazed side should be put next to the skin, in three or four thicknesses, and the whole confined with a roller.

Spirits of turpentine, or of wine, or any other spirits, heated by placing in a cup-full of warm water which the finger can bear, must be gently smeared over with a broad web of a feather, or a large camel's hair brush; this should be continued ten or fifteen minutes, after which, lint or soft linen thickly spread with a liniment of spirits of turpentine and yellow basilicon, should be applied and confined with a roller; the dressing should not be removed for twenty-four hours; then the part washed over with proof spirit, and the liniment as before re-applied immediately. The third dressing, twenty-four hours after, should have the liniment composed of the basilicon and camphorated oil; or, if this should be too sharp, calamine or zinc ointment, thickly spread on linen, may be applied and continued. This is known as Kentish's treatment, and is much practised in the coal districts.

If the scald or burn be very extensive, lime water and linseed oil is a most excellent application. One part of lime water must be mixed with two parts of oil, and stirred round quickly with the hand; into this a sheet or large piece of linen is plunged and thoroughly soaked then wrung out lightly, and quickly wrapped round the limb or body. Lime water and milk in equal proportions, or the milk alone, may be used in like manner. Bread and milk poultice, thinly spread, is also a very good application, and in burns, where the skin has been much charred or roasted, it is the best application from the

beginning.

In about forty hours, if the blister look as if its contents were milky wr of inflammation round its edge, the water must be let out with a point needle, or three or four snips with the scissors; it should then be pressed

a wad of lint, with a dressing of simple wax and oil.

When the true skin has been destroyed, a linseed poultice must be applied a tinued till the dead part or slough come away: this must then be dressed with call or zinc cerate, and rolled; or it may be protected by sifting flour, or starch, or chalk, or calamine powder, repeated two or three times a day, if need be, it crust be formed.

Burns with lime most be treated with vinegar, which converts it into substance, and then a poultice or a dressing of ointment and a roller mass Quicklime in the eye must be washed with vinegar and water; in sure to follow, and leeches may be applied, and diligent bathing water or simple warm water; a smart purge must also be given.

BROKEN BONES-With at a right angle of the the the points of the original angles. carriage of with straws upon it; let the firmly together v the outside of the as possible in its r. an end of the brok Broken limber -1

latter accident may be known, if at every breathing, a chest be felt, and if the hand be placed on this part, a ly, the ends of the bone will be felt moving on each oth feel; a flannel or linen roller, about six yards long and be wound tightly round the chest, so as to prevent any which must be performed by the midriff alone; this ren will suffice. If the ribs be broken on both sides, or the do mischief: there is little for it but complete rest, If the collar-bone be broken, place high up un as hig as two fists, and twice as long. and secure it there; secu with a bandage, and place the elbow and the fore-arm in a she the shoulder, and should be tied on the neck on the sound side be worn a month.

An arm broken above the elbow may be thus treated. The

(4) (p

after the accident having subsided, the limb must be placed with the fore-arm bent at a right angle with the upper. The hand and arm are to be lightly swathed in a the turns of which should over-lap each other, and be continued a little above the elbow; and then a long roller well soaked in gum water or stiff starch may be swathed round the oper arm, from the elbow to the armpit. The limb must then be swathed round the oper arm, in, as nearly as possible, its natural position; and in the course laid carefully on a pillow, in, as nearly as possible, its natural position; of a few hours the gem or starch dries, and a tough, unyielding, well-fitting case encloses the arm, and rarely r quires being meddled with till it be removed at the end of a month,

An arm broken below the elbow, if but one of the bones be broken, may be treated in the same way. If both bones be broken, two padded splints are required, extending from the tips of the fingers to the bend of the elbow in front, and to the point of the elbow behind. The fore-arm is now bent on the elbow; the splints applied, one before, the other behind, and both bound firmly to it with a roller, from the fingers up to the bend of the elbow. The arm then resting on its back is to be put into a sling;

and the splints must be kept on a month.

A broken leg, in most cases, can be managed easily and well by merely rolling it, from the middle of the foot to the knee, in a long bandage, well soaked in thick starch or gum water, which is preferable. The limb is then laid on its outside upon a smooth pillow, and little further remains to be done till the end of the month, when it may be removed.

A broken thigh, though a much more serious accident than any yet mentioned, may be managed quite as easily, and, in many cases, if the person will be quiet, without any splints, although it is cetter to use them. The patient must be placed on his back upon a splints, although it is cetter to use them. The patient must be placed on his back upon a first mattrass, laid on a board resting on the bed frame, as the sacking sinks with the body resting on it for some weeks. Two thick pads are to be made, weight of the whole of the inside of the sound knee; the other, the inside of the one to c Both limbs must now be laid close together, in the same same limb. as ise. body, resting on the hords, with the toes right upwards, and the calves Thus far done, the body must be kept momoveable by one person. with his two hands. A second person then takes hold of the broken the later just above the ankle, and gently and steadily draws it down withon, whilst a third places the knee-pad between the two kneethat of the broken limb, but a little above it, so that it rests against a loopt, and then, both being kept close together, a pad, about as tenst be turned round both legs, directly below both knees, and around stee yards tong, must be tenderly, carefully, and rightly wound, so as lipping from the other. a person apparently drowned, care should be taken to keep han the trunk; if a house be near, let him be carried to it with and placed between the blankets, which may have been warmed If it a distance from a house, and the sun be powerful, and laid fully exposed to it, in such dry clothes as

may be procurable; the body should be wiped dry, the mouth cleared of the clammy froth, the head and shoulders a little raised, heat applied to the pit of the stomach and soles of the feet, and rubbing with a coarse flannel, or a jacket incessantly, over the body and limbs, but especially over the chest. The heat may be furnished by bottles of hot water, by hot bricks, sand, or ashes in woollen stockings, by a pan of warm coals, taking care it be not too hot, or even by immersion in a warm bath, if it can be bad. Endeavour to get air out of and into the lungs, by pressing the chest and belly, but not so as to interfere with the rubbing, which is the principal thing to be relied on. This rubbing may be continued for some hours; there is a case on record of a person recovering when no sign of revival had appeared till the rubbing had been continued eight hours and a-half from the time of the accident. As early as possible, warm tea or weak wine and water, should be carefully given, taking especial care that it be put far back into the throat, or it may be poured into the windpipe and do serious mischief.

ACCIDENTAL POISONING. - If with oil of vitriol (sulphuric acid), give, as quick as you can, some strong soap, dissolved in warm water. If with oxalic acid (salt of sugar), give some whiting or chalk made into a thin cream with water, as quickly as possible.

In other cases of poisoning, give an emetic; to do this, take two teaspoonsfull of common flour of mustard, (even that in the mustard pot will do), mix this with a small tumbler of warm water.

LIME WATER .- Take half a pound of unslacked lime, and three-quaters of a pint of water, mix them slowly in an earthen pot, and after three or four hours when the slacked lime has sunk to the bottom, pour off the clear fluid and cork it well, keeping the bottle from the light.

I was inde correspondents, some three years ago, who wrote of the attended the application of ipecacuanha to the bites of the application of ipecacuanha to the application of ipecacuanha case was that of a palkee bearer, who was bitten on the reowing to its being at night, the animal escaped. When I say receipt of the injury, he complained of the leg feeling hea throughout the whole of the limb: it was cold to the touch, and swollen. The man was suffering from great depression of the vital powers, and prostration of strength. I gave him a tablespoonful of sal volatile in a little water; and on examining the foot, discovered the two punctures where the fangs had entered. I scarified the part freely, and put the whole of the foot into hot water, but it did not bleed freely. I therefore applied the cupping glasses to the calf of the leg in two places. In a quarter of an hour I gave him another tablespoonful of sal volatile, still keeping the foot in hot water; the heaviness of the leg was less, but the gnawing sensation continued. Three-quarters of an hour after i first saw him I applied the ipecacuanha paste; in less than five minutes the man told me his foot was quite light, and then the gnawing pain had entirely left it. The man remained in my verandah two hours, and had not any return of pain; he then wen t to his house in the neighbourhood, and the following day I heard he was free from pain, but that the leg was still swollen. For three days he applied goulard water, and in ten days came and made me a salaam, perfectly well. The scarifications had not quite the leg was of the natural size. H. J. Thornton, Assist. Surgeon.—Hong-

SNAKE BITES.

To the Editors of the Sydney Morning Herald.

The kindness and humanity with which you some months since made communication recommendatory of the powder of ipecacuanha as a remedy of snakes, centipedes, and other venomous animals, lead me once more to the for a further paragraph on the same topic. My former paper was simply from the Government Medical Officer at Hongkong, Mr. Thornton, coat clearness the cerative effects of a simple poultice of the powder of the downwards of the above description.

appeared to me so satisfactory, as to lead me to resolve to seize the first today the efficacy of the drug. No such occasion, however, presented to search and suffering such an industrious neighbour was bitten in the foot while wood in the adjoining bush. She returned home with her leg swollen to an advocations. I did not hear of the accident till Monday, when on inquiry, the symptons were in nowise abated, and that no medical assistance had an aquantity of powder was sent for, and applied by an intelligent person a peaking as directed by Mr. Thornton. On Tuesday morning the swelling casure subsided, the pain had ceased, and she was able to resume her Wednesday she was well.

Trich nopoly, 18th June, 1851.

THE CHOLERA.

BOARD OF HEALTH. - The fifth notification from the Board of Health earnestly repeats the cautions previously given as to diet and clothing, and states that the articles of food, where there are the means of choice, should be solid and nutritious, and such as tend to maintain a moderate costiveness in the bowels. Every day's experience shews the urgent necessity of instant attention to the slightest degree of diarrhœa, as being the most certain Where medical assistance cannot be immediately procured, the premonitory symptom. same medicines formerly recommended by the Board are again set forth, viz., for an adult, from 10 to 20 grains of confection of opium, with two tablespoonsful of peppermint water, in a draught composed of one ounce of chalk mixture, with 10 to 15 grains of the aromatic conjection. From 5 to 10 drops of laudanum, and from half a drachm to a drachm of the fincture of catechu. That such a dose should be taken where there is any degree of relaxation in the bowels. The caution is also repeated against the use of cold portative and the such as salts and seidlitz powders and all drastic purgatives, such scolor and salts and seidlitz powders and all drastic purgatives, such scolor and selections are selected with cold, giddiness, and selected with cold, giddiness, such scolor and selected with cold, giddiness, such selected with selected with cold, giddiness, such selected with s perspiration as much as possible with white wine whey, a teaspoonful of hot water, &c.

t well to make this simple remedy known, it me save this dreaded disease has visited our land. e, your Lordship's very obedient and faithful serant,

"CHARLES CAULEILD."

Treatment of severe and especially collapsed cases of CHOLERA, by Dr. W. G. MAXWELL. Extracted from the " Home News" of September 10, 1855.

HAVING observed in the Home News sad accounts of the ravages of cholera at Varna, both among the soldiers on shore and amongst the men of war, of its continuance even after the embarkation of the troops, and of their almost having fought the battle of the Alma while many of them were being more or less prostrated by the disease, I venture to offer the following observations in the hope of directing attention to a more uniform and successful treatment of the collapsed forms of the great Leviathan pestilence.

I was formerly, and long, in the habit of treating all kinds of cholera alike, whether mild or severe, whether pulseless or not pulseless. Some of the equivocal cases recovered, but the majority of severe cases, and all the collapsed and pulseless cases, died. I now began to perceive that I had all along been deceiving myself; I had made no distinction between the different types and forms and stages of the disease, but had grouped all the cases together, the most mild with the collapsed; making it appear that I had been successful in an unprecedented degree. Many of the cases I had also not seen, but trusted to report. The true state of the case therefore was, that I had scarcely cured a case of severe cholera, and certainly none of true collapsed cases. The question then arose, what shall I do now? I still foundly clung to the hope of finding a specific. Nostrums were to be had at every turning. Every one had an infallible cure; "Ing me to try them. Inundated with these, and failing also myself, with the hundred emedies I continued to try, and having observed the fact recorded, that pulseless co. d case had recovered without medicine, I determined to witness one of these, and, in Hear He time, to discontinue the use of all medicines in these collapsed cases.

I was called to see a case of pulseless collapsed cholera, in a female aged 12. next visit, the friends showed me another case, the grandfather of the girl, he is ill for two days and nights, and had been laid out to die, in a sepa hopeless, they resolved to try the same with their father, whom they a fair way of recovery. He had still a collapsed appearance, but the imperceptible pulse at the wrist, and some heat returning to the surface next day he walked into the house to meet me.

There was now no doubt in my mind that the main case of dough baiding, my pulseless collapsed cases of cholera was my rejudicacus no indicacus, with narcotics, &c. I the redetermined to abandon the runs on the ligaments long adopted, and to folic advice of Sydenham and or he pressure in rubb in the ligaments by he pressure in rubbing didents : nor to or port the powers of life wir early use of a si case it may be

to atra-

chicken and mutton-broth, and beef-tea, &c.

^{*} Observed by me in dissections of fatal cases of Cholera in Europeans full of gases.

Yet how infinitely more, I thought, must these nourishing drinks be required in cholera, where there is not only far greater and more rapid debility and exhaustion, but where there is also a constant drain, and the blood itself in a state of decomposition. It was also evident to me that no medicine could supply the place of this natural nourishment to the system, and therefore till that nourishment, that support, that fuel, was supplied, the pulse would not return, nor warmth to the surface, but that life would continue to ebb till death ensued.

Reasoning after this manner, and while collapsed cases were still continuing to die under my then treatment, I determined (as I have said) at once to abandon it, and to follow Sydenham whom I had so long neglected.

ESPIE

stated of tem a

operate called b

e aim pie, l'é a

It was not long before I had an opportunity; an outbreak of cholera occurred in my immediate vicinity, and 57 pulseless and collapsed cases came under treatment. Several of them had been treated before with opium and other medicines; most of them were in the last stage; and most of the patients were in poor circumstances. I commenced the above system in every case as soon as I was called, and gave whatever drink I could get ready first; while that was being given, another kind was being prepared; they were generally given as hot as possible, and as often and as much as the patient wished, and they were relished greatly; the patients had, generally speaking, been drinking cold water for hours before I saw them. In some cases, the pulse returned in an hour, in other cases, not till after 12 bours; in an old lady of 70 or 80, the pulse returned in an hour after drinking three or four basins of chicken broth; in another case of a delicate lad who had been ill for 12 hours, the pulse did not return till after other 12 hours, during which he had taken the broth of five chickens; in other pulseless collapsed cases, of two day's a wation, wheat gruel was the only drink given and the pulse returned.

ase. 7 recovered and 10 died. tormer treatment, all these 57 collapsed, pulseless hopeless cases must have

description for into any details, which would confuse or distract attention from the like it to say that the above treatment most be continued till a cosometion takes place, which is the favourable crisis. Therefore remember no med icine, no nostrum, no specific (so-called), can produce this; that pabulum vite, that support, that natural fuel, supplied with

an almost continued and uninterrupted stream.

THE MARSHALL HALL METHOD

OF

TREATMENT IN CASES OF SUSPENDED RESPIRATION FROM DROWNING; CHILDREN APPARENTLY STILL-BORN, ETC., ETC.

Dr. Marshall Hall's Instructions.

1.—Treat the patient instantly, on the spot, in the open air, exposing the face and chest to the breeze, (except in severe weather.)

I.-TO CLEAR THE THROAT.

2.—Place the patient gently on the face, with one wrist under the forehead. [All fluids, and the tongue itself, then fall forwards, leaving the entrance into the windpipe Free.] If there be breathing—wait and watch; if not, or if it fail—

II .- TO EXCITE RESPIRATION.

- 3. Turn the patient well and instantly on his side, and
- 4.—Excite the nostrils with soulf, or the throat with a feather, &c., and dash cold water on the face, previously rubbed warm.—If there be no success, lose not a moment, but instantly,

III .- To IMITATE RESPIRATION,

- 5.—Replace the patient on his face, raising and supporting the chest well, coat or other article of dress;
- 6.—Turn the body very gently on the side and a little beyond, and then brist face, alternately; repeating these measures deliberately, efficient severingly fifteen times in the minute, occasionally varying the side patient reposes on the chest, this cavity is compressed by the weight and expiration takes place; when he is turned on the side, the removed, and inspiration occurs.]
- 7.—When the prone position is resumed, make equable but efficient movement along the back of the chest; removing it imme on the side. [T first measure angments the expiration.]
