NORTHERN PROVINCE ADMINISTRATIVE BOUNDARIES

ADMINISTRATIVE BOUNDARIES

OVER VIEW OF THE NORTHERN PROVINCE

1. Land and Soil

The Northern Province consists five districts namely, Jaffna, Kilinochchi, Mannar, Mullaitivu, and Vavuniya. This covers an area of 8,835.02 sq.km amounting around 13.46% of the total land area of the island. This region has a forest cover of 1,981.30 sq.km. Inland water area covers 302.90 sq.km.

The land of the region is relatively flat and of low elevation towards the coast. Six major soil groups have been identified in the region. The dominant group of soil in the region is Reddish Brown Earth (RBE). The association of Low Humic Gley (LHG) with RBE soil (92%) is well suited for paddy cultivation. Red Yellow Latesol, Non-Calsic Brown soil and Grumusol exist in Kilinochchi, Jaffna and Mannar areas respectively. The RBE has low organic matter content and the nitrogen and phosphorus status is usually low while potassium status varies from medium to low. These soils are very well supplied in calcium and magnesium, and they have a very good cation exchange capacity. By tropical standards, these soils could be considered as having a very good chemical quality. The other soil types are alluvial of variable drainage and texture (4%), Rock Knob Plain (2%), Erosion remnants (1%) and Solodized Solonets & Solonchaks (1%)

2. Weather and Climate

Sri Lanka enjoys a typical monsoonal climate. The Northern Province tends to be hot and dry in the dry season (February to September), and moderately cool and wet in the wet season (October to January). The province's climate is of the tropical kind and therefore during monsoons there is always the chance of a deluge. In the lowlands the climate is typically tropical with the average temperature is around 28° to 30° for the year. However, on the whole, January is the coolest month and May is the hottest month. Relative humidity varies from 70% during the day to 90% at night. The dry zone of the Sri Lanka is the North and East of the Island and this region is affected by the North East Monsoon (December to March) and South West Monsoon (June to October). It is thought to be dry because most of the rains fall during the North-East Monsoon season.

Annual rainfall is less than 1,250 mm in the North West and South East of the Inland. It has two rainy seasons South West Monsoon - May to August, North East Monsoon- November to February

3. Economy

The Northern Province is still pre-dominantly an agricultural region having crops, livestock and fisheries as pivotal sub sectors. Reflecting the rapid expansion in income generation activities in the province, contributions from the Northern Province increased marginally to 4.2% in 2016 compared to 4.1% in 2015. The Provincial Contribution to the National Gross Domestic Product (GDP) was Rs 495 Bn in 2016. It comprises three main sectors such as Agriculture 12.6%, Industry 24.6% and services 54.4% in the provincial economy in 2016.

4. Agriculture

Agriculture is the dominant productive sector in the Northern Province. Result of the rapid development of the agriculture sector in the Northern Province; paddy harvesting reached the level of 296,268 Mt in 2016. 36,756.7 Ha. highlands brought under annual crops, perennial crops and homesteads cultivation in 2016.

5. Livestock

The livestock industry is becoming an important field for entrepreneurs in the Northern Province. This sector is considered as an additional source of income for the farming society in the region. Several stakeholders i.e. government sector, private sector and NGO are involved to strengthen the sector through their various projects and programmes. Average milk production reached 112,606 liters per day and milk collection reached 61,651.71 liters per day in 2016. Meat production that is chicken reached to 17,035 Kg. per day, beef reached 9,458 Kg. per day and mutton reached 2,991 Kg. per day. The egg production reached 88,694 nos. per day.

6. Irrigation

Irrigation sector is one of inter related sector to the agriculture and inland fishing. Therefore, hundred thousands of people in the province are dependent on irrigation for their livelihood activities. So, this sector takes a vital role in the Province. 45 medium irrigation schemes and 9 major irrigation schemes come under the Provincial Irrigation sector. In addition to this, there are 3 major tanks that come under the central administration. There are 2,661 tanks and ponds also under minor irrigation. Nearly 74,196.82 Ha. irrigable areas came under irrigation facilities in 2016.

7. Education

The Education sector takes significant role to produce the knowledge based society in Sri Lanka. The number of functional schools have been increased to 1,003 out of 1,093 to serve for 249,811 students with 15,162 teachers in 2016. National programmes such as 1,000 schools and 5,000 feeder primary school programmes are being successfully implemented in the Province. Child friendly approach has been introduced in 500 schools. Technical lap facilities have been provided to 90 schools in the Province. Infrastructure facilities are also continuously provided wherever the needs are identified through various sources. Therefore, the adult literacy rate increased to 88% and the rate of attendance at schools has also increased to 73% in 2016. Sports and cultural affairs also are included as sub sectors. Further to the secondary and primary education, the higher education and tertiary and vocational education centers are also established in the province such as University of Jaffna, Vavuniya Campus of the University of Jaffna, Open University of Sri Lanka, National Colleges of Education, Teachers' Training Schools, Technical College and Advance Technical Institute being the main educational Institutions in the province.

8. Health

Health is the wealth of our society; therefore, the health sector takes prominent role in the Province. The sector serves through western medicine and eastern medicine to the people in the Province. There is one teaching hospital, 4 general hospitals, 6 base hospitals, 56 divisional hospitals 39 primary medical care units, 5 district Ayurvedic hospitals, 11 Ayurvedic Central Dispensaries and 59 free Ayurvedic dispensaries which are functioning in the province. Primary, Secondary health care Institutions, curative as well as preventive institutions are mainly managed by the Provincial Health Department. Maternal and child health care services have been extended to the peripheral areas and human resource capacities also strengthened in 2016. As a result, maternal mortality rate has increased by 17.4% and infant mortality rate decreased by 0.50. Dengue eradication programme and local level nutrition intervention programmes have also been implemented in 2016.

Natural resources and Development in the Northern Province

The Northern Province is rich in natural resources in its extensive coastal area, in its dense forests and its mineral deposits. Forests resources are largely intact despite many decades of conflict and form a considerable percentage of the total forest cover in the country. From extensive sand dunes in Jaffna peninsula, to quarry metal and clay for bricks the Province is especially rich in mineral

resources needed for construction. The land is generally flat and undulating with no significant elevation, however the highly diverse coastal belt more than compensates. lagoons, bays, salt flats, wetlands, coral reefs, islands and islets, and estuaries are some of the prominent coastal features that are important both ecologically and economically.

Water Resources

The Northern Province does not have a single perennial river, and very limited seasonal streams and rivers. Traditional water storage was through built irrigation tanks. The area belongs to the dry zone of Sri Lanka with low annual rainfall. The ground water surveys done prior to the conflict indicate that intensive agriculture, especially paddy, cannot be supported without adequate replenishment of surface water storage. Water scarcity is a main constraint in many parts of the province, even for drinking and domestic use.

The major tank cascade systems and existing major irrigation schemes (Iranamadu, Giant's Tank, Pavakkulam, Kalmadu) should be closely examined to determine the productive capacity of agriculture and irrigation, plus quality of drinking water available in the northern districts.

Marine and Coastal

With 40% of the country's coastline, the province has immense potential for fisheries, aquaculture and tourism. While the existing marine and lagoon-based fishery industry need to be modernized and reequipped to enable the population to benefit from the rich and under tapped fishing grounds, new aquaculture-based industries could be established to elevate productivity and offer more livelihood options for young people. The main fishery areas are in Jaffna, Mullaitivu and Mannar Districts.

For this purpose the fishery potential, looming threats and important conservation areas (such as sea grass beds and coral reefs) should be surveyed and mapped so that exploitation of the resource is done within the limits of sustainability with adequate emphasis on conservation and protection for future use.

Mineral Resources

One of the greatest issues of current importance is construction materials. Out of the construction materials required sand and quarry metal are considerably available in the Province. In addition the province has limestone deposits, clay for bricks and tiles and beach mineral sand. Some scientific option of possible oil deposit of the Gulf of Mannar has not been fully explored yet.

A survey of the quantity and quality of building materials available in the north and their extraction capacity is necessary because of the huge demand brought on by reconstruction and development projects that involve large-scale construction.

Forests and Wildlife

The North has by far the most extent of dry monsoon forests in any province. The forest cover has remained intact largely despite the conflict and due to lack of development of the province. Kilinochchi, Mullaitivu and Mannar districts are extensively forested, while Vavuniya is partially in forest. Jaffna has no significant forest areas.

The important wildlife areas (already gazetted) are Wilpattu north, Madhu road, Giant's tank, Chundikulam and Kokkilai. But this does not take into consideration new biodiversity hotspots and other ecologically important areas (river catchments, salt marshes, lagoons and estuaries, islands, arid zones of Mannar etc). The forest and wildlife reproduction is important as an economic resource for forest products (non – timber) and tourism.

History and Culture

There are many areas in Jaffna and Mannar of exceptional archaeological value. These include ancient temples and sites mentioned in chronicles, sites of pre-historic significance and old churches and temples of high cultural value to the northern people.

Many of these sites have been recorded by the department of Archaeological in its document, but there could be many that are unrecorded and undiscovered. The value addition prospects to local tourism is immense, especially sites such as Thiruketheeswaram (Mannar), Nallur (Jaffna) Nainativu (Jaffna) and Madhu Church (Mannar)
